BROADCASTING, August 7, 1961
AMENDED RULES ON LOCAL NOTICES

- The amended text of Secs. 1.359 and 1.362 of FCC's rules concerning local notice requirements (BROADCASTING, July 31):

1. In § 1.359, paragraph (c) is amended, paragraph (d) is redesignated as paragraph (g), paragraphs (f), (g) and (i) are redesignated as paragraphs (h), (j), (k), and (l), and new paragraphs (d), (e), and (f) are added, and § 1.359 Pre-grant procedures

(a) Except as provided in paragraph (e) of this section, an application for filing a radio or television station location approval or proposed station location meeting the conditions of § 1.359, if filed for publication in a newspaper in which the station is located or proposed to be located, shall be published in such a newspaper once a week until a petition to contest such location approval or proposed station location has been filed with the commission, or once a week for the three weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

(2) If no newspaper of general circulation is published in the community in which the station is located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the filing for filing of such application, for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

In the daily newspaper having the greatest general circulation in the community in which the station is located or proposed to be located, a notice of the station's location or proposed location shall be published once a week until the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358, and no other publication of the location or proposed location shall be made.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

In a daily newspaper of general circulation in the largest city in the principal area to be served in the United States by the station, and in the daily newspaper of general circulation in the next largest city in the principal area to be served in the United States by the station, a notice of the station's location or proposed location shall be published once a week until the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358, and no other publication of the location or proposed location shall be made.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

And provided further, that in the case of an application for a permit pursuant to Section 309(b) of the Act for a station located or proposed to be located, notice shall be published at least twice a week for the two weeks immediately following the tendering for filing of such application and thereafter for one week for the two weeks immediately following notification by the commission pursuant to §§ 1.354, 1.356, 1.357, or 1.358.

Continued from page 104

in addition to publishing a notice of such filing as provided in paragraph (c) of this section, the cause of the notice to be broadcast over that station at least once daily on four days in the week immediately following the tendering for filing of such application, or in the week immediately following notification by the Federal Communications Commission of the publication of the notice in a weekly newspaper of general circulation in the largest city in the principal area to be served by the United States by the foreign radio broadcast station. In the case of an application for a permit pursuant to Section 325 of the Communications Act, the notice shall be published at least twice a week for the weeks immediately following the release of the commission's order specifying the time and place of the commencement of the hearing in the daily newspaper having the greatest general circulation in the largest city in the principal area to be served by the United States by the foreign radio broadcast station. Such notice shall be broadcast during the following time periods:

1. For television broadcast stations, between 7 p.m. and 10 p.m.
2. For standard and FM broadcast stations, between 7 a.m. and 10 a.m.

(1) If the station in question is the only operating station in its broadcast service which is located in the community and the publication of the notice in a newspaper, as provided in paragraph (c), is not required, and the publication of the notice in that station, if the publication of the notice as provided in paragraph (d), shall be deemed sufficient notice of the publication of paragraphs (c) and (d) of this section.

(2) The purpose for which the application was filed, (i.e., construction permit, modification, transfer, license renewal, etc.).

(3) The date when the application or amendment was filed with the commission.

(4) The call letters, if any, of the station, and the frequency on which the station is operating or proposes to operate.

(5) In the case of an application for construction permit for a new station, the facilities sought, if any, the type of call of the station, power, location of studios, transmitter site and antenna height.

(6) In the case of an application for modification of a construction permit or license, the existing facility, the nature of the amendment.

(7) In the case of an application, the exact nature of the amendment.

(8) In the case of applications for a permit pursuant to Section 325 of the Communications Act, the call letters and location of the foreign radio broadcast station and the frequency or channel on which it operates and a description of programs to be transmitted over the station.

(9) In the case of an application for renewal of license, as follows:

"The application of this station for a renewal of its license to operate. The frequency on which the public interest was filed with the Federal Communications Commission on...

Members of the public who desire to bring to the commission's attention facts concerning the operation of the station should write to the Federal Communications Commission, Washington, D.C., before...

Letters should be set forth in detail the specific facts which the writer wishes the commission to consider in passing on this application.

Within five days of the last day of publication or broadcast of the notice, or renewal of license application was filed with the Federal Communications Commission on...

The application of this station for a renewal of its license to operate. The frequency on which the notice was published, the newspaper in which the notice was published, the text of the notice, and/or, where applicable the date and time that the notice was broadcast. When public notice is given by the publication in a newspaper, the text of the notice, was published, the newspaper in which the notice was published, the text of the notice, and/or, where applicable the date and time that the notice was broadcast.
Weight Controllers Need Sound Advice — Not More Fads!

Obesity Usually Is Symptomatic Of Disease That Needs Treatment

400 Million Pounds Of Excess Weight

If Americans sometimes look tired to you, just consider that we are carrying around some 400 million pounds of weight (a conservative estimate!) that we not only don't need but which, life insurance company statistics suggest, is unnecessarily shortening our life span.

Obesity, often the symptom of psychological distress, is certainly one of the major health problems facing Americans, and it is pitiful to note how the faddists and quacks, as well as many otherwise respectable purveyors of foods and drugs, have jumped onto the bandwagon with nostrums and gadgets that do an amazingly successful job of lighten- ing pocketbooks but seldom accomplish much in actual body weight loss.

There is no doubt that we must give more attention to the problem of weight control, but this concern should be based on understanding of the problem and what medical and nutrition scientists have been able to determine as being proper approaches to solving the situation.

Weight Control Is A Lifetime Task

It seems quite likely that the food habits we develop as small children are as important to future weight control as almost any other factor. If food becomes a substitute for the kind of personal interaction the child needs with members of his family, then he is acquiring the type of food habits that may very easily lead him into the obese category throughout life. It will be doubly difficult for him to beat the weight problem later in life also.

Food, of course, is much more than stoking the furnace to provide immediate energy. In all societies certain rituals develop around food consumption. There have been societies, too, in which obesity was a symbol of high status and affluence, and doctors in this country still find some traces of this kind of thinking when they must treat infants who have been overstuffed with food to make them fat.

Mass Media Play A Key Information Role

In a study of consumer attitudes conducted for the American Dairy Association in the spring of 1959, Alfred Politz Research, Inc., reported that newspapers and magazines, and to a lesser extent radio and television, play a very important role in providing information about diets, usually for weight reduction. About 46% of the total national sample of adults interviewed indicated they had obtained diet information from non-professional sources. Of this group 37% reported they found their information in newspapers and magazines and that 22% of them actually took some diet action.

In the case of radio and television 28% of the group who obtained information got it from these media, and 14% took some action.

This, of course, reaffirms the importance of the mass media as sources of health and food information. This also stresses the tremendous responsibility which the media must assume and practice in disseminating health and diet information.

Faddists And Quacks Don't Help Health

Much too often the food faddists and health quacks, making sensational charges of one kind or another, seem to be far more successful in gaining attention than do the professionals in health and medicine and nutrition whose advice is much more cautious and not nearly so dramatic. The mass media can help the American people avoid the oftentimes dangerous advice offered by the quacks and faddists by checking sources of information more closely.

Weight control is not a simple matter of going on a crash diet. It is a lifetime project and should be one that is carefully planned with the obese person’s physician or a well qualified nutritionist. Frequently the psychological problems of which the obesity is a symptom must be solved first. People who eat to satisfy other than food needs will not be helped, may, indeed, be harmed, if they adopt the on-again, off-again crash diets which are so popular in the mass media.

Building Health Is Everyone’s Job

Good health is a precious possession which is available to most of us if we will follow certain rather simple rules. Eating a well balanced diet that contains only enough calories to supply daily energy needs is one of these rather simple rules that is so easily violated. However, it is entirely possible that more people could be influenced to eat properly if all of us—the food industry, the medical profession, and the mass media—work together to explain the facts and avoid the temptation to profit from temporary fads.

Providing people unsound diet information may attract attention, and it is no crime in most circumstances. However, all of us certainly should let our consciences be our guide and ask: will this promote good health, or is this merely another passing fad or fancy that will probably do more harm than good?
OUR RESPECTS to Senator Warren Grant Magnuson (D.-Wash.)

All is not bleak on the 'New Frontier'

To broadcasters across the country who may feel they have few friends in Washington these days, the presence there of Sen. Warren Grant Magnuson (D-Wash.), chairman of the Senate Commerce Committee, offers some reassurance that all is not bleak on the New Frontier.

One network vice president headquartered in Washington described the veteran legislator recently as a "reasonable guy, easy to get along with. You can talk to him," he added, indicating by his tone of voice that he regarded this as a rare and commendable quality.

Other industry people echo these sentiments. All agree that the senator from the Far West isn't after any broadcasting scalps.

Technically, at least, Sen. Magnuson, generally referred to as "Maggie," is a broadcaster himself. He owns about 4% of KIRO-AM-FM-TV Seattle, his home town. And although he doesn't participate in the management of the properties, he is a member of the Washington State Broadcasters Assn., and attends their meetings regularly. In addition, the Broadcast Pioneers awarded him a life membership, and gave him membership card No. 1, during the NAB convention last May.

Magnuson On Minow • This doesn't mean that Sen. Magnuson has become a secret lobbyist for the broadcast industry. On the contrary, he has publicly backed Newton N. Minow, the controversial FCC chairman, arguing he may be just what the broadcasting industry needs—someone who will stir things up, or, as he more graphically expressed it, "a pig in a carp pond."

But his long experience with legislation affecting the broadcasting industry—in 1938, while a member of the House, he was appointed to the first special committee created to study the FCC—and his many friendships among broadcaster groups have given him considerable insight into the problems of the individual broadcaster and the industry. He isn't likely to be stampeded into approving any of the various repressive legislative proposals pending.

Strict regulation of the networks, for instance, is unnecessary, in his view. "The objectives of those who advocate regulation can be accomplished by persuasion and public opinion," he said recently. "At times, networks have not been as responsible as they should be, but they've done a better job in the past two years than they have in the prior 10."

Taking a leaf from his own experience, Sen. Magnuson feels the FCC commissioners would do a better job if they "climbed down out of their ivory tower" and maintained closer contacts with the networks and the licensees.

Scaring Bureaucrats • This is a pretty radical notion, coming, as it does, at a time when the merest hint of conflict-of-interest or ex-parte contact is enough to send a Washington bureaucrat running for the woods. Nevertheless, the senator feels the commissioners could maintain their integrity and still become better acquainted with broadcasters. "By knowing them well," he said, "they could do a better job than they can by staying aloof. In this industry, there are as many opinions as there are licensees and networks."

At the moment, Sen. Magnuson has two pet projects affecting broadcasting in the legislative mill. One bill (S-204) would amend the Communications Act to enable broadcasters to make free time available to future major party presidential candidates. Like just about every other legislator, Sen. Magnuson feels the Kennedy-Nixon debates last year constituted a tremendous service to the public.

His other project is educational television. Although a bachelor with no children of his own to educate, he has been working for eight years for legislation that would enable states to use federal funds to establish or expand educational television facilities. And his chances of seeing his efforts crowned with success this year are better than ever. His own etv bill (S-205) has passed the Senate, and a companion bill (HR 132) backed by the administration, is pending in a House committee.

A Senate Veteran • Sen. Magnuson, a stocky, russet-haired individual whose well-tailored figure is often wreathed in clouds of smoke from his inevitable cigar, has become one of the most prominent members of the Senate in his 16 years in that chamber. He has had considerable success in pushing through Congress power- and other resource-development projects for his home state, and has initiated a number of important social welfare measures. He has also made a name for himself in foreign affairs; a decade ago he worked with the late John Foster Dulles in drafting the Japanese Peace Treaty.

Sen. Magnuson, who ranks eighth among Senate Democrats and 11th in Senatorial service, has come a long way in his 56 years. Born in Moorhead, Minn., on April 12, 1905, he was orphaned at an early age. He grew up in Moorhead, and helped earn his keep during his high-school years by running a YMCA camp.

In 1922, he worked the wheat harvest westward, and got his first glimpse of Seattle from the open door of a Great Northern freight train car.

He apparently liked the view, for he settled down in Seattle. With the money he had earned in the wheat fields and, with the money he subsequently earned at a variety of jobs, including driving an ice wagon, he put himself through the U. of Washington and its law school.

He lost no time plunging into politics, and in 1932, when he was 27, he was elected to the state legislature. Two years later, he was elected prosecuting attorney for King County, and, finally, made it to Washington in 1937 as a member of the House of Representatives. He made his first Senate race in 1944, and has been reelected twice.

Another Campaign. He will be seeking his fourth Senate term next year, and will be going home to do some preliminary campaigning when the current session ends. One message that he can be expected to deliver to the folks back home—and one that could be well heeded by broadcasters in general—is that he has, over the years, developed a considerable bank of goodwill in the Senate, on which he can draw to assure support for the bills he backs.

In addition, he has developed a set of delicate political antennae that tip him off as to the chances of a particular proposal.

For these reasons, he seldom makes a speech on the floor. It's his view that "if you need the speech, you don't have the votes; if you have the votes, you don't need the speech."

And "Maggie," his friends say, "almost always has the votes."
The problems of print

BROADCASTING by the criticism of bureaucrats, the self-serving attacks of print media and the well-publicized scorn of professional snobs, television broadcasters might be forgiven if they sometimes felt that things could not be worse. But they would be wrong. They could be in the newspaper or magazine business, for instance.

Just imagine: If you are engaged in the publication of a mass magazine or daily newspaper, nobody is sounding off in Congress about what a lousy job you’re doing or running investigations to prove that point with hand-picked witnesses. You haven’t been accused of creating a “vast wasteland” lately (and the accusation isn’t apt to get much circulation even if it is made, because you control the headlines).

The only thing you have to worry about is your P&L statement. But unless you’re the New Yorker or one of a handful of other unusually fortunate magazines and newspapers, that’s enough. For your revenues, sir, are slipping. And in your heart you know this slippage is no freak mishap, for you are in a business where the trend is down.

This can be demonstrated statistically. Figures for the first half of 1961, for instance, showed that only television’s revenues moved upward. But for graphic summary we have seen none better than Dick Pinkham’s speech to the magazine promotion people a couple weeks ago (Broadcasting, July 31). Mr. Pinkham, who is senior vice president in charge of broadcast operations for Ted Bates & Co., did not of course suggest that magazines are doomed. But what he did tell the magazine men was only slightly more encouraging. For instance:

“You think you’ve got competition now? It’s going to get worse. And I would suggest that if you have lulled yourself into a trance of comfort because of the heavy barrage of criticism that has been leveled at television lately, you need psychiatric help.”

Television programming, as Mr. Pinkham predicted, is going to get better. That has been its history and—with or without the goading of critics—the evolutionary process will continue. Even in the face of the heaviest attacks, television’s attraction to people—the same people who “own” the air, to borrow a doubtful phrase—remains such that its revenues are still rising. No print medium can make that statement.

Newspapers and magazines have long been major investors in the broadcast media, and it seems likely as a matter of economic logic that the trend will continue and perhaps accelerate. In this summer of widely headlined discontent, television is fighting for its good name and its freedom. Its print competitors, whose name and freedom are not in issue, are fighting for their lives.

Too much too late?

IT WAS just as well that the FCC waited until its pre-recess meeting to unload its deintermixture and drop-in omnibus tv package. The repercussions will resound long after it returns from its August hiatus and inevitably will wind up in Congress and the courts.

The stated objective is to create greater competition in underserved markets and at the same time give impetus to development of uhf as possibly the ultimate exclusive tv service (a development we cannot foresee in this lifetime). The objective is expedient from the regulatory standpoint, and the desire to accommodate at least three full-blown network outlets in all major markets is laudable. But there are countervailing considerations of whether the public will lose more than it gains.

Eight markets that now have two vhf’s each are ear-marked for a third vhf through the device of shorter separations. The FCC obviously selected the least extreme cases and committed itself to no additional drop-ins in derogation of existing mileage separations. The question here is whether these drop-ins will deprive substantial segments of the public of existing service through curtailed coverage of other stations on these channels. And, despite the promise, would this be the first step in a series of “break-downs” in tv that would follow the pattern that developed in am broadcasting during the past two decades?

The deintermixture proposals in eight markets present equally perplexing problems. Additionally there is to be considered the heavy investments made by the public in vhf receivers that would have to be replaced or converted as well as the substitution of clusters of uhf stations to replace each existing v in these single-station markets. Several of the uhf stations that the FCC proposes to remove are pre-freeze and in good faith should receive “grandfather” consideration.

All these arguments and many others will be developed in the weeks ahead and in response to the rulemaking notices due on Oct. 2. There is, for example, the potent argument that in inducing Congress to appropriate $2 million-plus last year for the New York city uhf experiments, on the theory that if uhf station clusters can cover the greater metropolitan area with its shadows, canyons and skyscrapers, uhf probably will work anywhere, the FCC committed itself to stand by on deintermixture until it knew the results two years hence.

What gives us greatest pause, however, is that the deintermixture rulemaking notice was approved by the margin of a single vote. And who were the three who voted against the package plan? The FCC’s two engineering members—T. A. Craven and John S. Cross—and the dean of the commission, Rosel H. Hyde, who was the chairman after the freeze was thawed in 1952 and when tv allocations were given greatest impetus.

There was a time—before the new uhf stations were built in single station markets—when deintermixture would have been workable with minimal injury to the public and broadcasters. Any change now may be a major wrench and we have the notion that the public will make itself heard.

SEE THE DIFFERENCE KPRC-TV MAKES

Food looks so real you more than see the difference—you almost taste it.

Sports come alive. Drama actually breathes, and the commercials—the commercials are no longer signals for indifference. On KPRC-TV in Houston, commercials sell, for at KPRC-TV they have believed in television from the very first and put their skills and fortune behind this belief. The result—reasonably priced TV that is performance-proved. KPRC-TV has created a new dimension in home entertainment and it has given you one more good reason to expect the first and best in television—today and tomorrow, too!
Over 200,000 Atlantans “Salute America” at WSB-TV’s July 4th parade

FLAGS FLEW ALL OVER ATLANTA—American flags! Especially along the parade path on July Fourth. As a summer patriotic theme WSB-TV is emphasizing Americanism. Results: stores in metropolitan Atlanta sold out of flags. 200,000 patriots rallied ’round the WSB-TV parade route. The station’s “Salute to America” continues with locally produced programs on the Revolutionary, Civil and Cold wars. People in Atlanta look to WSB-TV... the traditional leader.
The Pennsylvania Rifle, also known as the Kentucky rifle, was developed in the Mylin Gun Shop, Lancaster, Pennsylvania. It was used by early settlers and frontiersmen because of its accuracy and dependability.

WGAL-TV, a pioneer station, introduced television to a sizeable area of Pennsylvania. Since its inception in 1949, WGAL-TV has firmly maintained its pioneering principles by being constantly alert to new and better ways of serving viewers throughout its coverage area.
Census Politz-ed

Those much-challenged sample figures issued fortnight ago by Census Bureau, purporting to show that radio-equipped homes in U.S. have dropped from 95.6% of all homes to 91.3% (Broadcasting, Aug. 7), are due to get impressive answer in near future. Studies by noted researcher Alfred Politz in five major markets across U.S., based on more than thousand personal interviews in each market, show that in three of these areas 98% of all people 15 years old and over live in households with at least one radio in working order, while in other two figure is 99%. In addition, homes with two sets in working order ranged from 60% in one market to 67% in another; those with more than two ranged from 26 to 36%, and those with FM sets from 23 to 33%. Details of study due for release late this month or early next.

KXXL-AM-FM-TV to Murphy

In process of negotiation last week was approximately $3.25 million sale of KXXL-AM-FM-TV Spokane by Joseph Harris and Norman E. Alexander (each half owners) to Morgan Murphy, newspaper-broadcasting interests. Ch. 4 KXXL-TV began operation in 1953 and was sold to Harris-Alexander group following year for $1,723,500, with KXXL-AM, by Ed Craney, Bing Crosby and associates. It is CBS-TV affiliate, with highest hour rate of $800. KXXL-AM operates with 5 kw fulltime on 920 kc and is also CBS affiliated. KXXL-FM operates with 2 kw on ch. 260.

Harris-Alexander interests also own KELP-AM-TV El Paso, Tex. Morgan Murphy, stations are: WEAU-TV Eau Claire; WLUK-TV Green Bay; WISC-TV Madison, all Wisconsin; WLUC-TV Marquette, Mich., and KVOL Lafayette, La. It's understood no change in KXXL management is contemplated with James R. Agostino continuing as general manager. Blackburn & Co. is handling transaction.

Networks approaching SRO

Within next two to three weeks, CBS-TV expects to have its fall business (fourth quarter) at near SRO with only exception being some minutes in CBS Reports (Thurs., 10-11 p.m.). Reason: Orders now in hand but not yet formal would indicate such near sell-out within weeks. (Other networks, meanwhile, report they are well ahead of last year's sales records, again particularly for first three months of new tv season).

**THE BUSINESSWEEKLY OF TELEVISION AND RADIO**

Published every Monday, $3rd issue (Yearbook Number) published in September by Broadcasting Publications Inc. Second-class postage paid at Washington, D. C.

Subscription prices: Annual subscription for 52 weekly issues $7.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for Canada and $4.00 for all other countries. Subscriber’s occupation required. Regular issues 35 cents each copy. Yearbook Number $4.00 per copy.

Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1735 DeSales St., N.W., Washington 6, D. C. On changes, please include both old and new addresses plus address label from front of magazine.
The programming standards of a television station are always on view. All you need do is watch to see that WPIX-11, New York's Prestige Independent, has the "network look"—an array of network proven and network caliber programs night after night. Groucho Marx, Wyatt Earp, One Step Beyond, World of Giants, Troubleshooters, It's a Wonderful World, Wanted, Dead or Alive are some of the new fall shows joining the best looking and top-rated* independent in New York—and the only one qualified to display the NAB Seal of Good Practice. Only WPIX gives you minutes in prime time in such a network atmosphere. A client list that is 98% national advertisers is the clincher. where are your 60 second commercials tonight?

*During every month of this year ARB reports WPIX-11 has the largest share of audience among the independents, 6 PM to Midnight, seven nights.
TWO TOP JOBS SET AT NAB

Wasilewski picked for executive vice president, Swezey for code boss; boards asked to ratify

First steps in reorganization of NAB were taken Aug. 11 when two top-level appointments were sent to NAB board for confirmation.

They are:
- Vincent T. Wasilewski to be executive vice president. He currently is government affairs vice president of NAB.
- Robert D. Swezey to be chief administrator of NAB television and radio codes (CLOSED CIRCUIT, July 31). He is former executive vice president and stockholder of WDSU-AM-TV New Orleans.

Appointments were submitted to NAB Advisory Committee at Aug. 10 meeting by LeRoy Collins, NAB president. Although no announcement was made of actions, letters announcing proposed appointments were to be mailed to directors by NAB over weekend.

Advisory committee took two other steps:
- Approved Gov. Collins' appointment of Donald H. McGannon, president of Westinghouse Broadcasting Co., to be chairman of new research committee that will work on plan to set up major NAB research project in conjunction with universities.
- Laid plans for NAB's participation in FCC hearing on proposed revision of license renewal and application, with emphasis on burden these forms would place on broadcasters and right of broadcasters to exercise own judgment in programming, free of censorship.

Members of advisory committee are Clair R. McCollough, Steinman stations, NAB joint board chairman, who is committee chairman; George C. Hatch, KALL Salt Lake City, NAB radio board chairman, and Dwight Martin, WDSU-TV New Orleans, tv board chairman.

Gov. Collins said research project will cover "all phases" of radio-tv media by probing underlying trends rather than developing public relations tool or project that seeks "only the self-serving purposes of the industry." Basic goal is greater knowledge and industry progress. It does not "contemplate tearing down existing audience measurement systems although it may well delve into the problem of methodology behind these systems."

Gov. Collins first proposed development of elaborate research project at NAB board meeting last February (BROADCASTING, Feb. 13). At that time he said industry had let rating service, which he called outsiders, "become master of its house and doesn't even check his heart card."

Selection of Mr. Wasilewski, 38, for executive vice presidency was no surprise. His name has been mentioned along with others inside and outside association staff (CLOSED CIRCUIT, July 17). He joined NAB in 1949, was named chief counsel in 1943 and government relations manager in 1955. In last-named post he directed NAB's activities at Capitol Hill and regulatory agencies. He is graduate of U. of Illinois Law School.

Mr. Swezey, 54, is Harvard law graduate. He entered broadcasting at NBC in 1939, moving to Blue network when it was split from NBC in 1942. After World War II he became vice president-general manager of Mutual network, later joining WDSU-AM-TV New Orleans where he later acquired 20% stock ownership. He has been active in industry and association affairs, including important roles in writing both original radio and tv codes. After selling his WDSU Inc. holdings last year he became consultant to Secretary of Labor Mitchell, leaving this post at end of Eisenhower administration.

Fm engineering study planned at NAB session

Special fm broadcaster-consultant engineering group was set up Friday to study engineering problems raised by FCC's proposal to revise fm allocations picture (BROADCASTING, July 3).

Group was named after meeting of special NAB fm committee in Washington. Committee also voted to ask FCC for 60 days extension of deadline date for comments, now due by Sept. 5.

Named to special technical subcommittee are Allen T. Powley, WMAL-FM Washington, D. C.; Ogden Prestholdt, CBS, and George T. Bartlett, NAB's acting manager of engineering. They will meet with Walter Davis, Ronald Culver and James McNary, representing Assn. of Federal Communications Consulting Engineers.

Ben Strouse, WWDC-FM Washington, D. C., is chairman of full special committee. Other members, in addition to those named above; Harold I. Tanner, WLDM (FM) Detroit and William Tomberline, KMLA (FM) Los Angeles.

Minow, Craven defend world satellite program

FCC Chairman Newton N. Minow and Commissioner T. A. M. Craven defended on Friday commission's action setting up groups of international carriers to prepare plans for private ownership and operation of U. S. communications satellite system.

Testifying before Senate Antimonopoly Subcommittee, headed by Sen. Russell Long (D-La.), they denied charges commission is, in effect, creating "giant monopoly," dominated by AT&T. They said no commitments have been given to any carrier and maintained that final decision on form of ownership has not been made.

Sen. Long, openly critical of FCC's

more AT DEADLINE page 10
WEEK'S HEADLINERS

Lawrence M. Carino, general manager of WWL-TV New Orleans, named managing director of WJBK-TV Detroit. He succeeds Bill Michaels, whose regional duties include supervision of Storer tv stations WJW-TV Cleveland, WSPD-TV Toledo and WJBK-TV. Mr. Carino has been in broadcasting field since 1944. He began as page boy with ABC in New York, worked as salesman for KTNT-FM Tacoma, Wash., was appointed sales manager for KTNT and later was named sales manager for KTNT-TV. In 1956 he was appointed manager of KTNT-AM-FM-TV.

Charles C. (Bud) Barry, vp and recently named director of radio & tv department of Young & Rubicam (Week's Headliners, July 3), elected senior vp Aug. 11. Mr. Barry has been with Y&R since July, 1959, briefly served as president of NTA Television Network and with MGM-TV before that, as well as in various tv network positions. Vp Norman Glenn moves up from account supervisor to associate director of radio-tv department (he joined Y&R in 1956).

Fred Klein, founder and manager of Chicago office of Doyle Dane Bernbach since 1958, joins North Adv. there as vp and chairman of plans board. Earlier he was vp and account supervisor of Earle Ludgin & Co., Chicago.

Wilmot H. (Bill) Losee, general manager, AM Radio Sales Co., New York, elected president. He succeeds Donald H. McGannon who becomes board chairman. Mr. McGannon is president of Westinghouse Broadcasting Co., owner of AM Radio Sales. Radio representative firm, which opened in 1951, currently serves 13 independent outlets in major markets. Mr. Losee has been general manager since firm was started as rep for four independent stations. He previously served as general manager of WINS New York, and was associated in rep field with Branham Co. and John Budd Co.

For other personnel changes of the week see FATES & FORTUNES

Zenith to split stock; tv, radio sales increase

New high-profit performance of Zenith Radio Corp. for second quarter and optimism for success of new color tv and stereo fm lines to be introduced late this month prompted board of directors of Chicago set maker Friday to vote what amounts to three-for-one stock split, subject to approval of stockholders at special meeting Oct. 24.

Board voted 50 cents dividend payable Sept. 29 to holders of record Sept. 8. Previous quarterly dividends have been 40 cents per share. In proposed stock action, Zenith would increase authorized $1 par common stock from 8 million shares to new total of 12 million and distribute two additional shares for each share held by stockholders of record Nov. 3.

Zenith's second quarter sales topped last year by 5% and net consolidated profit soared 34% over 1960. Six-month sales of $116.7 million were off 1.3% from 1960. Factory shipments of tv sets established new six-month record and second quarter radio shipments exceeded same 1960 period.

AMST asks delay in tv spectrum plan

Assn. of Maximum Service Telecasters Friday asked FCC to extend deadline for comments on deintermixure and vhf drop-ins six months beyond present Oct. 2 date (see page 31). AMST pointed out that eight general FCC proposals and rulemakings are outstanding for comments before Oct. 2 and that August vacations and Labor Day interfere with work schedules. AMST further said that time allowed is not comparable to that allowed for other complicated proposals and that, even working seven day week, present deadline would allow only 3½ days to study each docket.

Following letter of FCC law, AMST filed 275 copies of its request, 15 for each of 17 docket involved.

Evening news policy to be revised by WOR

WOR New York will extend its 15-minute newscast policy into evening hours when its affiliation with Mutual, which it helped organize 27 years ago, expires Aug. 28 (early story, page 68), according to Robert J. Leder, WOR vice president and general manager.

He noted that WOR had carried only nighttime programming from Mutual for past year and thus was "semi-independent already. He said Mutual—which is affiliating WINS New York—had understandably wanted WOR to add network's daytime service but that this was incompatible with WOR's format and could not physically be accommodated. Parting, he said, was entirely amicable. He suggested WOR might continue Mutual's Fulton Lewis Jr. newscasts and perhaps one or two other MBS features but this had not been worked out.

Option time delay

FCC announced Friday (Aug 11) one-week extension (from Oct. 27 to Nov. 3) of date for oral argument on reopened option time rulemaking. Commission said such rescheduling "would be conducive to the orderly dispatch" of FCC business. Comments still are due Oct. 6.

GE plans spot drive

General Electric Co., Cleveland, (GE lamps) plans four-week tv spot campaign in 150 markets starting early October. BBDO, Cleveland, is to make buys this week.

ABC moves account

ABC has awarded o&o radio stations advertising account to Daniel & Charles, New York, according to Charles Goldschmidt, agency chairman. Media plans not complete.
It's easy to be a winner in Kansas. With 1,632,150 paying customers in the stands, who could lose? That's a two-billion-dollar gate. And WIBW delivers it on the air regularly. No wonder Nielsen calls this America's 46th market!

Let WIBW trot your product out on the field to the cheers of this demanding, consuming, buying crowd...40% of the people in 94 counties! And they're not just sports enthusiasts...or just farmers. These WIBW people, from five states, compose the best-balanced, urban-suburban-rural market in the country...a prime market for your goods!

What an opportunity to show your stuff! It's yours...on WIBW, Topeka.

Mattel mathematics

EDITOR: In your July 17 issue you featured an article titled "'61 toy tv totals may pass $15 million" in which the grossly exaggerated claims of the Ideal Toy Co. regarding their advertising schedule and expenditure for 1961 were given credibity. According to our computations, the "$3.5 million television schedule" of Ideal turned out to be $1,350,000.

Our client, Mattel Toy Makers, is investing $3 million in advertising this year. As reported earlier by the company, this includes two exposures each week on the ABC-TV network of their own program, Matty's Fun Day Funnies, a half-hour animated show seen nationally at 7:30 p.m. Friday and 5 p.m. Sunday, and spot tv schedules in more than 50 markets, weighted generally at 10 to 16 announcements per week per market.

Tv has been so successful in the selling of toys that retailers and wholesalers alike oftetimes stock their shelves in direct relationship to the amount of advertising scheduled for a particular toy or line of toys.

We are writing this letter to protect Mattel's investment against minimization by the industry.—Eddie Smardan, radio/tv director, Carson/Roberts Inc., Los Angeles.

No repping planned

EDITOR: BROADCASTING (Closed Circuit, July 31) reported a rumor that Corinthian was among those considering moving into the representative area, but added that this was roundly denied by responsible officials.

To reiterate, Corinthian has not given five minutes consideration to moving into the representative area since it decided to consolidate the national representation of all its stations with H-R Representatives and H-R Television in 1959.—C. Wrede Petersmeyer, President, Corinthian Broadcasting Corp., New York.

ratings and their use

EDITOR: . . . I read in BROADCASTING that the owner of KQBY (San Francisco) attributes the station's demise to "the rating services," on the grounds that they did not detect the many listeners who could be inferred from the angry popular response to the closing (THE MEDIA, July 24). Yet, further on, it becomes obvious that his main contention is with slavish devotion to numerical ratings alone.

In the same issue you quote at some length from the speech of Walter J.
It takes four newspapers... or nine radio stations... or the five top national magazines... or two other television stations... to equal the intensity of daily penetration which WTVJ-Television alone delivers to its hundreds of advertisers. Consider this significant fact as you plan your Fall-Winter advertising schedule for South Florida.

Brown (WSPA-AM-FM-TV Spartanburg, S. C.), who doesn't believe in ratings "because the samples are too small and the margin for error too great."

But in the next paragraph, Mr. Brown is saying timebuyers should not use ratings on programs to determine cost per thousand without regard to a station's image or the quality of its audience, indicating that it's the use of ratings which really bothers Mr. Brown. It is difficult to see how an industry-sponsored "bureau of circulation" (which Mr. Brown suggests) could help improve ratings or their use. Remember BMB and CAB?

There's a world of difference between a bad product, and bad, or controversial, uses to which it may be put—and it would I think be a real service on the part of everyone who speaks or writes on this subject to differentiate between what's done with ratings and the ratings themselves.—Sydney Roslow, The Pulse Inc., New York.

BOOK NOTES

The expected thorough approach is evident in Studies in Public Communication as its authors dissect television and its viewers.

Probing deep into the rationale and the morality of viewership, the authors arrive at a number of conclusions, some heretofore not considered.

Among the major industry topics are studies of the Charles Van Doren story—what he did and why and an evaluation of public reaction—what children are learning from television and whether the medium is really harmful to youngsters; an analysis of the western, why there are so many and why people watch them; and the impact and effect of communications.

Studies in Public Communication is the third in a series of similar publications with subjects ranging from "Portrait of a Playboy" to "The Great Debate on Cultural Democracy."

Special requests and copies of the previous two issues as well as the current one are available by writing to Studies in Public Communication, the Department of Sociology, U. of Chicago.
Says John Hopkins:
General Manager, KTVT, Dallas-Ft. Worth, Texas

“We bought Seven Arts’ Vol. I and II because YOU CAN’T HAVE TOO MUCH OF THE BEST.

“We have one of the most extensive film libraries in the country, but still we bought Warner’s ‘Films of the 50’s’ to enhance our reputation for presenting the best in feature film entertainment. Vol. I and Vol. II both represent by far the best post-’48 features you can buy. And we need the best to pitch against network competition.”

Warner’s films of the 50’s...
Money makers of the 60’s
And NBC Daytime has the personalities that sweep them off their feet! It’s the biggest love affair in television. NBC Daytime personalities are turning the heads of America’s women...towards the products they recommend. The ladies admitted as much in a recent study conducted by O’Brien-Sherwood Associates. Quizzed about 16 shows on all three networks, most of them favored products associated with NBC Daytime personalities over products endorsed by competing non-personality shows. Why? Here’s what the study revealed: NBC Daytime personalities are more effective salesmen because viewers like...
women

the
daytime!

them, trust them, are receptive to them. The selling climate on NBC Daytime personality shows is better because commercials gain greater attention and confidence. The fact is that personality-delivered commercials rank best in honesty, sincerity, friendliness and reliability. Let this advantage work for your product via the NBC Daytime personalities that women like, listen to and trust. Remember, they admitted it. Remember too, NBC offers more top personalities than any other network—personalities like Bill Cullen, Hugh Downs, Bill Leyden and Jan Murray. No wonder NBC Television is leader in the Daytime!
The difference between U. S. and British tv techniques

If I collected a pound note every time an American has asked me the difference between U. S. and British television techniques, approaches and taste, I would have accumulated a tidy sum by now.

Let me state at the outset, however, that many initial conceptions and (mis-)conceptions I had about U.S. tv have long since faded, some have dimmed slightly, but others remain vivid. As my fellow Britishers frequently ask: Does U. S. television really carry on 24 hours a day? What precisely does sponsorship entail? How bad is American programing with all that "hard sell"?

Shortly after I checked into my New York hotel room last year, I turned on the tv set and was introduced to the Big Picture—American style. The first image that appeared on the screen was that of a spirited group of young people dancing to modern music. My first reaction was to adjust the set, and finally achieved some satisfaction after sharpening the focus.

This is one distinct point of difference. Reception, at least in the New York area, leaves a great bit to be desired. This I would attribute primarily to the difference in line system.

Picture-sharpening inevitably led to dial-turning and I was equally impressed, astounded and frustrated by the number of available channels (7 in New York). Here, I felt that I was missing something of significance or interest that might be taking place on several channels.

First Commercial • Then I experienced my first U.S. tv commercial. It was "live" and featured the show's leading personality. This in itself is something uniquely American, because in Britain, the rules of non-sponsoring quite definitely rule out any connection between a program and commercial time. So strongly is this enforced that if one were to use a tv celebrity in a commercial it could not run adjacent to any program in which he was featured.

Compared with the average British commercial, this one at least, seemed to drag on for an exceptional length of time. It was followed by a lengthy film spot about a breakfast cereal and it seemed the sales points were repeated more frequently within the spot than would be the case in Britain.

A short while later I was informed that two or more advertisers were credited for my entertainment. This interested me, as it would most British conditioned to unsponsered shows—firstly, because I was finally seeing the method by which shows were sponsored, and then by the fact that more than one client was paying for the time.

After more than a year here, I can honestly say there is basically very little difference in the creative and mechanical tv approaches between the two countries. From writer to camera man, the Englishman is set up and organized to work in a similar way, though he may not tend to take himself quite so seriously.

Difference In Taste • Only in that controversial area of taste do the British differ. To state it bluntly and in the words of someone else, they do not "bring the bathroom into the living room" via schematic, cartoon-type diagrams of stomach ailments and aids, deodorants and ad infinitum. Instead, they employ a more intelligent and certainly a more subdued approach.

On this score in England there appears to be an over-all softer touch that pervades selling techniques. This is partly due to the nature of the British viewer, who is not "psychologically oriented" or "conditioned" to "hard sell." He must be gently wooed and courted—"romanced," I believe is the American word for it.

As to length, the British commercial at the moment seems more condensed, and the recent trend is one of greater frequency rather than greater length. This, I feel, is due to the media shortage, rather than time costs. However, I can quote one company (Proc- ter & Gamble) as having maintained a level balance of 60-second spotting throughout, not conforming to yearly fashions which have ranged from as much as 2 minutes to 15 seconds.

Regarding this point, I can personally attest to one highly successful campaign for a new British cigarette that was launched on the basis of 15-second spots. It was a roaring success and paid off handsomely, an example of good audience selection, coupled with creative understanding of the product.

Another interesting aspect is the adapting of a successful series of U.S. commercials for the British viewer. Because Britain has a considerable volume of American products on the market, the British tv producer must often adapt a commercial to fit the British situation, i.e., a cricket field may be substituted for a baseball diamond, or a coffee bar for barbecue. The significant point here is the fact that adaptability—a sort of theme-with-variation approach—can and is successfully being used. And it proves that a basic creative approach and concept can appeal equally to both types of audiences, despite national characteristics or idiosyncrasies. In this respect, I would say that the British are not so far apart as one would tend to believe. The recent American Film Festival reel of commercials certainly bears this out, and I personally hope that it will be made available to British audiences.

As to production, the manner in which the independent film production companies in England are set up is identical. The only difference, and perhaps a superficial one, is that in America, producers seem more publicity-conscious. What about the human element involved in this business of tv? I distinctly recall wondering whether tv people on this side of the Atlantic were a different breed from those 3,000 miles in the other direction. Not so. Basically, like most people, they are the same. The only real discernible difference is one of tradition associated with England on all levels of society—including tv producers. That is, Americans drink coffee in the afternoon instead of tea.
ROUND UP YOUR RUPEES! In India, rupees go a long way towards the downpayment on a sacred cow, the purchase of a new spring turban or a trip to the Taj Mahal. But in Baltimore, an advertiser gets the best run for his rupees on WBAL-RADIO, the DOMINANT force of this densely populated province. Here's why: There are no "untouchables" in the land of WBAL-RADIO... WBAL-RADIO covers the entire metropolitan area, plus 37 counties in Maryland and 4 adjacent states. WBAL-RADIO gets you results, without rope tricks, providing more unduplicated coverage in this market than any other native station. WBAL-RADIO knows how to charm listeners of every age, every interest, with a distinctive format of Full Range Programming and Music for Mature Minds... If you want your advertising to purchase more sales, round up your rupees and reap results on WBAL-RADIO, Baltimore.

WILL UHF SOLVE TV'S PROBLEMS?

- Deintermixture again offered as solution to competition
- Vhf losers promise last-ditch fight to prove plan mistake
- AMST declares war: will battle against any compromise

Still reeling from attacks on programming and a tougher FCC, the broadcast industry last week was in the throes of a new and complex problem: uhf.

The top level of broadcasting's leadership spent hours and days last week considering the pros and cons—and the implications—of the FCC's latest moves on the road to uhf (Broadcasting, August 10). At week's end such considerations were continuing, but one group alone had made up its mind and in some instances set wheels in motion. This was the group of eight vhf broadcasters threatened with deintermixture, the loss of their vhf channel.

These broadcasters had little trouble deciding what they were going to do. They were going to fight to retain their v's, "come hell or high water," as one put it.

The battle strategy became known toward the end of last week when Connecticut Gov. John N. Dempsey issued a strong protest at the action threatening ch. 3 in Hartford, and urged the entire Connecticut congressional delegation to attend a meeting in Washington tomorrow (August 15).

The threat of short separation vhf drop-ins brought almost an instant response from the Assn. of Maximum Service Telecasters which numbers the nation's major tv stations among its members. A special meeting of the AMST board convened in Ponte Vedra, Fla., on August 8 and reiterated the association's long standing opposition to any compromise of the tv mileage standards. It also expressed its sustained opposition to deintermixture.

**Battle Points** - From a check with most of the station operators whose vhf's are proposed to be removed, the defense is clear: Broadcasters will show the FCC that the proposed moves must be denied on these grounds:

- Thousands, in some instances hundreds of thousands, of people will lose the only first grade television service they have.
- Vhf signals from other areas come into these communities and negate the commission's purpose to establish a uhf area.
- In some instances the threatened vhf channels are in the state capital and would withdraw service to a great area of the state. This is true in Montgomery, Ala., Hartford, Conn.; Columbia, S. C., and Madison, Wis.
- Uhf coverage cannot hope to match the service areas of existing vhf stations, and will result only in downgrading tv coverage.
- Instead of cutting down the service areas by substituting uhf for vhf channels, the better plan would be to add vhf channels, even at short separation. This would enhance service to the pub-

---

**To mothers-in-law and pies-in-the-face add Minow**

FCC Chairman Newton Minow finally made the big time last Wednesday, when he was co-starred with Jimmy Durante, Bob Hope, Gary Moore and Janice Rule on the hour-long NBC-TV colorcast sponsored by the United States Brewers Foundation.

Like the title star of another hit show, *Harvey*, Mr. Minow did not actually appear on camera. But he was the focal point of the hour-long program's dialogue.

Mr. Minow was mentioned in Jimmy Durante's introductory remarks at the start of the show: "The next hour will be devoted to uplifting the quality of television . . . if Mr. Newton Minow of the FCC is listening, at least, Nett, we're trying."

He was mentioned by Garry Moore in a chorus at the conclusion of the program. "I just say 'hello' and right away I have to say 'goodbye for a while,'" Mr. Moore warbled. "It's been an uplifting show and I'd like to say I hope Nat had a laugh or a smile."

And he was mentioned frequently in between the beginning and end of the show. The most memorable reference, at least to one viewer, was made by Mr. Hope who made a pass at a stout elevator girl and commented: "That's what Newton means by tv's vast waistline." The most pertinent reference was probably that of Mr. Durante. Returning rebuffed from an attempt to pick up a girl on the beach, he tried to alibi himself with his pals by stating: "I don't think it right, fellows. After all, we're married. What would Mr. Minow say?"

What Mr. Minow thought of the program could not be learned. He was in St. Louis last week and did not comment publicly.
WILL UHF SOLVE TV'S PROBLEMS? continued

lic and engender a more competitive situation.

**Expanded Uhf** - The FCC's proposals, issued two weeks ago, moved to expand the use of uhf through a series of proposals: (1) deintermixture, (2) dual vhf-uhf operation, (3) elimination of the uhf table of allocations, (4) granting of an application for a uhf facility on a first come, first served basis without the necessity of a hearing, and (5) the relaxation of technical standards to make the cost of building and operating a uhf tv station more easy.

The proposal to drop in a third vhf facility in areas where there are now only two vhf's operating was termed an "interim" measure to aid in the competitive situation in these cities.

The eight cities scheduled to be deintermixed if the FCC single-vote majority remains together:

Binghamton, N. Y.; Champaign-Urbana, III.; Columbia, S.C.; Columbia, Md.; Dayton, Ohio; Jackson-ville, Fla.; Johnstonstown, Pa.; Knoxville, Tenn., and Oklahoma City.

The eight cities scheduled to be deintermixed if the FCC single-vote majority remains together:

A BROADCASTING query to these stations produced these remarks from some:

Paul W. Morency, WTIC-TV Hartford, Conn.—"There is absolutely no reason to remove ch. 3 from Hartford. Over 250,000 people will lose their only clear tv service, and it would require more than 20 uhf stations to cover the area we now serve with our vhf channel.

Gov. [John N.] Dempsey has called a meeting of our congressional delegation of two senators and six congressmen for August 15 in Washington. Both the Senators and several congressmen have already voiced their opposition to the proposal and have pledged their support to see that this does not happen to the capital city's only v channel."

August C. Meyer, WCA (TV) Champaign-Urbana, Ill.—"I have instructed our attorney and engineer to prepare documents showing that the FCC is wrong in its proposal to remove the vhf channel from our area of Illinois. Thousands of people will lose their only good tv service."

G. Richard Shafio, WIS-TV Columbia, S.C.—"There has been a rising response in opposition to the proposal. The Governor has issued a vigorous protest, and both our Senators and our Congressmen have assured us of their solid support.

"Our Chamber of Commerce board unanimously passed a resolution at a meeting this morning [Aug. 10] charging that the proposal would severely curtail the communications of our community. This action was taken even though the chamber was not asked to take sides. The chamber considers this possible loss on a par with the loss of a community asset like an airline, a railroad or a newspaper.

"The FCC acted without enough facts. Columbia and the WIS-TV coverage area are infiltrated by vhf signals from all sides—Florence, Augusta [Ga.], Greenville, Asheville-Spartanburg, Charlotte and Charleston. And in addition we know that uhf cannot begin to serve the area now covered by WIS-TV."

Carter C. Hardwick Jr., WSFA-TV Montgomery, Ala.—"This is a blow to the state capital and unjust in the bargain. The people in Central and South Alabama now receive their tv communications from a station in the capital of the state; if this vhf is deleted, they will be receiving television information from vhf stations outside the state, from Columbus, Ga.; Meridian, Miss., and Pensacola, Fla."

"Both WIS-TV and WSFA-TV are commonly owned, by the Broadcasting Company of the South. This is the only broadcaster hit twice by the commission’s deintermixture proposal."

Morton H. Wilmer, attorney for Triangle Stations, whose WNBF-TV Binghamton, N.Y., is one of the stations threatened with loss of its vhf channel—"The removal of our vhf channel is indubitably against the public interest. Uhf cannot possibly serve this New York state audience, the terrain is too rough. More than 75% of our audience would lose their only first class tv service. We did not oppose deintermixture in Fresno [KMTF-TV in Fresno, a Triangle station, was changed from ch. 12 to ch. 30 this year], but in Binghamton we are vigorously opposed. The commission is leading from weakness here; what it should do is put another v in the area. We would welcome competition from another v."

Ralph Immell, WISC-TV Madison, Wis.—"Of course we will oppose it by any and all proper means."

**AMST Board** - The FCC's actions and proposals sparked an urgent, special board meeting of the Assn. of Maximum Service Telecasters. It was held August 8 in Pontiac, Vedra, Fla., with virtually 100% attendance of the 21 members of the board.

The only official word of the board's discussions or decisions came in a letter sent by Lester L. Lindow, executive director of the association, to members.

Salient significance of the AMST activity was contained in the last two paragraphs of the three paragraph letter:

"In the opinion of the board, and after thorough discussions, many undesirable consequences to the television service now received by the American public would result if the Commission proposals are finalized.

"Additional studies and analyses are contemplated by the association and you will be hearing further from us in the future."

The one-day meeting was chaired by AMST President Jack Harris, KPRC-TV Houston, Tex.

AMST is on record in previous FCC proceedings as opposed to short mileage separations and also deintermixture. The latter, it has said, would bring on a "creeping paralysis" because the

Europe moves toward

A surge toward an intermixed vhf-uhf television system is occurring in Europe, with an ultimate count of over 1,100 vhf stations and five times that many uhf outlets possible in the next few years.

This is the principle significance to be drawn from the recently completed Stockholm European Broadcasting Area conference which made assignments for the first time in the uhf bands.

The conference, held in the Swedish capital May 26 to June 23, issued about 3,600 authorizations for European uhf television—and even so did not complete action on all of the over 5,600 requests for uhf assignments.

Actually the conference made assignments only up to 742 MHz. Uhf television in Europe runs from 470 mc to 960 mc. Additional assignments in the remainder of the uhf band will be made later.

Assignments provide for specific transmitter locations, frequencies, radiated power, antenna heights and, in some instances, directional antennas.

The assignments become effective Sept. 1. The Stockholm authorizations supersede the 1952 television and fm assignments in Band I (416-68 mc), Band II (87.5-100 mc), Band III (162-230 mc), Band IV (470-582 mc) and Band V (582-960 mc).

In television, the Stockholm conference made 230 assignments in Band I, 40 in Band II (which is officially the fm sound broadcasting band), 800 in Band III and 3,600 in...
intermixed television system

Bands IV and V.

The conference also made 1,900 assignments for fm sound stations—300 in Band I and 1,600 in Band II.

Standardized Standards • All the uhf assignments were made uniform for the whole European area. All are 8 mc wide and standardized on 625 lines, although there are minor technical variations among the different countries.

This compares with the gamut of standards in European vhf television, ranging from 405 lines to 819 lines, on 5 to 14 mc widths.

Each uhf channel (which runs from ch. 21 to ch. 81) had approximately 110 stations authorized, except ch. 38 which had 40 assignments made.

Although the effects of these new tv assignments on all countries could not be ascertained at this time, West Germany sees the uhf assignments as permitting the full expansion of its "second" tv network. Also in the planning stage is an all-uhf network which is scheduled to start the end of this year or early in 1962. Some of the uhf assignments received by West Germany will be used as transmitters to fill in white areas in that country's vhf tv network.

Impressed with the European Broadcast conference's approach to uhf was C. M. Jansky Jr., chairman of Jansky & Bailey, consulting engineers, a division of Atlantic Research Corp. Dr. Jansky attended the conference as the representative of the International Radio Maritime Committee, one of several international organizations which had observers present. He was the only U. S. citizen in attendance.

The technical foundation on which the conference set the uhf assignments was excellent and a sound basis for determining the spacing and power/antenna height ratios, Dr. Jansky said. These included: propagation curves, protection ratios, field intensities, signal-noise ratios, visual-aural ratios and directional antennas.

The technical standards were based on a study of uhf television by the International Radio Consultative Committee (CCIR) at a meeting at Cannes Feb. 28-March 17.

"This philosophy is sound," Dr. Jansky said the other day, "not at all like the mileage separation philosophy we have. They figured out in each instance who the station should serve and what they needed to accomplish this purpose."

Dr. Jansky said he was also impressed with the use of an electronic computer for determining powers and antenna heights based on coverage and other criteria. The computer at Stockholm U. rattled out answers at the rate of one transmitter every 20 seconds.

Effective Sept. 1 • The Stockholm agreement becomes effective Sept. 1. Provision is made in the agreement for possible revisions in 1968.

Countries participating, all in Europe or bordering the Mediterranean Sea:

Austria, Belgium, Bielorusia, Bulgaria, Czechoslovakia, Cyprus, Denmark, Spain, Finland, France, Greece, Hungary, Ireland, Iceland, Israel, Italy, Lebanon, Libya, Luxembourg, Morocco, Monaco, Norway, Netherlands, Poland, Portugal, Romania, Sweden, Switzerland, Tunisia, Turkey, United Arab Republic, Vatican West Germany, Yugoslavia, Ukraine, United Kingdom, USSR.

Albania, Iraq, and Jordan were entitled to participate but did not have any delegates at the meeting. Also present were representatives of the maritime radio committee (Dr. Jansky), radio and astronomy group, western broadcasting association, eastern broadcasting group.

There were approximately 150 delegates at the meeting, representing these 37 countries, plus an observer team from East Germany.

simple moves of deintermixture in individual markets cannot be separated from the chain reaction inherent in the engineering foundation of tv.

Congressional Action • The first full scale attack on the FCC's proposal to deintermix came from Hartford, Conn., where the commission suggested removing WTiC-TV's ch. 3 and substituting ch. 76.

On August 9, Connecticut Gov. John N. Dempsey, issued the following statement:

"Ch. 3 has established itself as an invaluable asset to Connecticut and adjoining areas through the years it has served the public as a vhf (very high frequency) television station.

In all phases of its operations—public information, entertainment, education—it has consistently adhered to a policy of high quality and has demonstrated an unusually high sense of public responsibility.

"The Federal Communications Commission (FCC) now proposes to transfer this station from its present ch. 3 to ch. 76, a uhf (ultra high frequency) band. The effect of this change would be to deny to hundreds of thousands of residents the many benefits which ch. 3 has brought to their homes and their communities.

"To those many thousands of people in Connecticut and adjoining areas who would be deprived of their only acceptable television service, ch. 3 has become a vital part of their lives. The loss to them of ch. 3 as a vhf station would be contrary to the public interest.

"Because of the urgency of the situation, I have asked the members of the Connecticut congressional delegation to meet with me in Washington next Tuesday, August 15.

"I shall also name as soon as possible a citizens committee of prominent Connecticut residents to insure a full presentation of the case to the FCC. I am prepared to take whatever other steps may be deemed necessary to keep ch. 3 operating with its present services unimpaired and with full opportunity to serve the needs of this growing and important industrial and business area."

The text of the telegram sent by Gov. Dempsey to members of the Connecticut congressional delegation is as follows:

"The recent order of the Federal Communications Commission proposing to wipe out the present operation of television ch. 3 in Hartford is a serious threat to this necessary facility in our state. More than a quarter million of our people would find themselves with-
WILL UHF SOLVE TV'S PROBLEMS? continued

out any clear television service. An additional 145,000 would lose their choice of service. I'm sure you will agree with me that we cannot allow this to happen.

"This threat is of such gravity that I am appointing a committee of prominent Connecticut citizens to insure proper presentations to the FCC.

"Because of the emergency nature of the situation, I respectfully urge you to join me with your fellow members of the Connecticut congressional delegation next Tuesday, August 15, at the Statler Hilton Hotel in Washington for full consideration of a plan of action to assure the continuation of the present operation of ch. 3 in the interest of our people."

Nets Study • The three television networks were giving the FCC's proposals the closest scrutiny. Top floor executives huddled in furrowed-brow policy discussions, but none was prepared to give a definite answer yet.

Some of the FCC's proposals, like dual operation in the same city, sounded sweet in the ears of some network officials. Even if uhf did not prove out, this was insurance they cannot afford to overlook. And the intangible benefits from acceding to the FCC's wishes was not to be overlooked, either.

This was some of the thinking going around in at least two network headquarters last week.

ABC had a different problem. There its consideration of uhf was tempered with satisfaction at the commission's action proposing to drop a third vhf channel into eight significant markets where there are only two vhf presently, and where ABC has no primary affiliate.

The ABC executive meeting on the subject took place last Wednesday. While no decision was reached, it was understood there's a far from negative attitude about filing for uhfs in the five cities in which the network owns its own vhf stations. It's evident, ABC feels, it is under some obligation to go along on the FCC's uhf proposals as an indication of its good faith for what the FCC did in the matter of vhf drop-ins.

In the course of the discussions at ABC, it's understood, the predominant feeling was that uhf operation in o&o markets must definitely be duplication. This is based, it's believed, on cost factors and the premise that separate programming on uhf would put a broadcaster in competition with himself.

Prospective Applicants • ABC executives figure there will be from five to eight applicants for each of the vhf channels proposed to be shoe-horned in the eight markets chosen to be de-intermixed.

This estimate is based on queries already received by the network regarding affiliation in Syracuse, Rochester and Grand Rapids, where the commission issued final orders adding an extra vhf channel, but at regular mileage.

The matter of vhf-uhf dual operation was also under consideration by the executives of the dozen group tv owners, but none was ready at week's end to make a public announcement. It is presumed that no final decisions have been made by these either.

There was some thought the FCC's moves toward uhf might have a deleterious effect on color tv set sales. This was discounted by color merchandising executives. RCA authorities said that the uhf moves would not disrupt their plans in the manufacture of either broadcasting or receiving equipment for color or uhf. Bruce S. Durant, vice president, production planning and development, RCA Sales Corp., had this to say:

"RCA Victor now has uhf tuners as an optional feature of its color tv sets. This means that such sets can be sold in any uhf-color broadcasting area. The price with the uhf tuner is about $30 more than conventional models."

BROADCAST ADVERTISING

LONGER 10-SECOND ID'S

Their 'selling portion' to be increased as result of new 42-second station breaks

Advertisers using 10-second television IDs in the new 42-second station breaks this fall will get one-third more time for the audio portion of their messages and one-fourth more time for the video. That's two seconds of each portion.

It means that the selling portion of the so-called 10-second ID, which up to now has been only 8 seconds, will become a full 10 seconds. The usual two seconds for the station ID will be added onto that, so that the total time for commercial plus ID will be 12 seconds instead of ten. In the past, the advertiser has had to give up two seconds of the 10-second total in order to make room for the station ID.

The two-second increase in advertising time is the net result of revisions in the Station Representatives Assn.'s standards for 10-second IDs in television, as announced last week by SRA Managing Director Lawrence Webb. The video portion, which has been eight seconds, becomes 10; the audio portion goes from six seconds to eight (the audio portion is shorter than the video in order to allow for switching by stations).

Clarification • The standards were revised in response to agency requests for clarification as a result of the three tv networks' decision to expand prime-time station breaks from 30 seconds to 42 seconds, effective with the start of the new fall season.

The 30-second break leaves room for a 20 and a 10; the 42-second break can accommodate a 30 and the new, 12-second-size 10. The time may also be sold in other lengths, but the NAB code forbids more than two commercial messages in the break and network affiliates generally have foresworn triple-spotting.

Although the revised standards specify new commercial lengths for 42-second breaks, they do not rule out the old standards. These will necessarily still apply in 30-second breaks which are not being expanded. Commercials made to the old standards also may be used in the 42-second breaks, but in that case the stations will have two seconds of time to fill (or leave blank).

No Rate Hike • Authorities said they do not anticipate any increase in 10-second time rates as a result of the lengthening of allowable commercial time.

The original 10-second ID standards were adopted in 1954 by representatives of SRA, the American Assn. of Advertising Agencies, the NAB and film producers. Last week's revision was made by the SRA television trade practices committee, headed by Ed Shurick of Blair Tv.

The revision provides these specifications for use in the production of full-screen 10-second ID commercials:

Audio: 1½ seconds silent; 8 seconds commercial; ½-second silent to allow for switching.

Video: 10 seconds commercial.

Padding specifications were not changed. Nor were the standards for three-quarter-screen shared IDs, which are no longer used to any great extent.
"Listen!"is on. Each weekday afternoon thousands of people in the greater Boston area listen to "Listen!" with Paul Benzaquin—a program typical of the idea radio produced by WEEI. They get entertainment, of course, but entertainment for adults—information on books and the theatre, on what's going on in the civic and cultural life of Boston, good fun, good music, interviews with important personalities—everything that interests alert adults.

You find this kind of idea radio only on the CBS Owned Radio Stations across the country. Radio for adults—the forgotten people who spend the money. In all seven of our markets it will pay you to stop and look into idea radio... the kind that makes people in Boston listen to

"Listen!"
FEMININE HYGIENE ON TV DESPITE CODE

Colleens' campaign directs viewers to newspaper ads

How to place a new feminine hygiene product before the television audience despite obstacles of usual broadcaster reluctance to carry such advertising, and the necessity of good taste. That's the problem which presented itself in the New York office of North Adv. for its client, Mayfield Industries Inc., Fort Worth, Tex., a new company organized in 1960 for the express purpose of marketing the new product called Colleens.

North's answer starts on tv as a test in Dallas and Fort Worth next week (Aug. 21).

The conception, as explained last week by Mrs. Dolores E. Kupperman and Sam Novenstern, North's supervisor on the account and media director respectively, is to use ID's exclusively to stimulate women viewer interest in a newspaper test introduction campaign.

The name of the product is neither seen nor heard in the quickie commercial, and reference is made only to the newspaper advertisement which identifies both the product's name and the package.

Only One Market — Since the product is being introduced only in Mayfield's home town at this point, the Fort Worth-Dallas area also is the only tv market. Ads will appear at the outset in three newspapers, two in Dallas and one in Fort Worth. They are headlined, "A love letter to every woman in the world from a few tired (but happy) scientists."

The ID technique picks up a montage of the newspapers' mastheads with voice noting "In the woman's section of tomorrow's paper . . ."

visor on the account and media director respectively, is to use ID's exclusively to stimulate women viewer interest in a newspaper test introduction campaign.

The name of the product is neither seen nor heard in the quickie commercial, and reference is made only to the newspaper advertisement which identifies both the product's name and the package.

level of such accounts—nationally—is estimated at $2.25 million). Preceding the full-scale print and tv test in the market, the company used small pre-view newspaper ads which offered the product for 25 cents plus a coupon (it retails for 89 cents).

Is Shell Oil coming back to tv advertising?

Reports mounted last week that Shell Oil's $15 million honeymoon with the print media was just about over and that next year will see a substantial return of the oil company's consumer billings to the broadcast fold.

It was said that Shell, through Ogilvy, Benson & Mather, was buying into at least five widely scattered test markets around the country for a four-month campaign using 60-second spots in fringe times. If the results of the tv test campaign warrant it, Shell reportedly is prepared to commit a considerable chunk of its advertising billings—probably on a spot-only basis—by early next year.

Last month Shell made its first firm move toward tv since its print-only campaign began, when it approved a three-week spot tv schedule of ID's, chainbreak 20's and one minutes in some 30 markets covering about 12 (mostly southeastern) states (BROADCASTING, July 17). The campaign, supplemented by a 9 to 15 week radio spot campaign, was geared to a sailboat giveaway promotion that Shell dealers were handling.

It was revealed last week that Shell had at first been fearful that the giveaway might be deemed a lottery, but decided after study to go ahead with the campaign—steering clear, however, of such states as Florida, New Jersey, Connecticut, Ohio and Missouri, which have strict anti-lottery laws.

The American Newspaper Publishers Assn. is trying to win more oil company advertising money on the strength of Shell Oil's 1961 all-newspaper advertising campaign.

In a presentation to oil men at the Tulsa Advertising Club on Aug. 4 (said to be the first such to a top-level group of oil company executives), ANPA's Bureau of Advertising claimed Shell's $15 million newspaper campaign is enjoying a "high degree of success."

A statement from Jock Elliott, senior vice president and the account executive for Shell at Ogilvy, Benson & Mather, the agency handling the oil company's consumer billings, was featured in the presentation. Mr. Elliott is quoted as saying that the "voice of Shell is being heard," thanks to the newspaper campaign, and that's the way it's going to continue.

Daytime news on WQXR open for sponsorship

Advertisers for the first time can sponsor news programs broadcast in the daytime on WQXR-AM-FM New York, owned and operated by the New York Times which also prepares and edits the newscasts. Evening newscasts will remain restricted for The Times promotional purposes as they have been in the past. The Times newscasts have been on the stations since July 1946.

No sooner did the station make public its turnabout in the 15-year old policy than it got its first news advertiser: Air France, through BBDO, New York, was reported to have signed already for one of the packages of Times newscasts.

The news summaries are six minutes in length with some exceptions and usually broadcast each hour on the hour. As explained by the station last week, the news programs will be limited to five sponsors. sold in four packages and open to four advertisers on a Mon.-Fri. schedule but in one package to one advertiser on Saturday and Sunday. Each of the Mon.-Fri. packages will include 16 news periods (6:30 a.m.-5 p.m.).

Radio has made Drug Fair a ‘buy’ word

64-STORE CHAIN SAYS IT’LL NEVER STOP BEING STRONG RADIO USER

"Don’t say drug store, say Drug Fair—there’s a big difference." Put these words to music, buy saturation radio (500-800 spots weekly) and you have in essence the success story of one of America’s fastest growing drug chains—Drug Fair, pharmaceutical “buy” words in the Washington area.

In 10 years of accelerated success—each year surpassing the previous one—Drug Fair and its agency, Kal, Ehrlich & Merrick, Washington, have concentrated for the most part on a strictly "soft sell" saturation program—not to peddle any of the firm’s more than 25,000 products but to create a household image of Drug Fair, a goal that has more than been accomplished.

From four scattered and occasionally profitable stores in 1951 (before radio and before Kal, Ehrlich & Merrick), Drug Fair has become a sprawling chain of 64 stores from Washington, D.C., to Zagreb, Yugoslavia. The Zagreb store was built at the request of the U.S. Dept. of Commerce to represent this country at the 1960 International Trade Fair there. And it stole the show, attracting more than 2 million persons in two weeks and producing unlimited good will between the U.S. and Yugoslavia. A duplicate store is located in McLean, Va.

Drug Fairs are super drug stores of about 15,000 square feet of space which offer an unusual variety of products in a one-stop shopping area. "At one time," said Dr. Milton L. Elsberg, president of Drug Fair, "a customer could buy a car and even a house in a Drug Fair—and some did." These products are out of stock now, he added.

Always Radio • From the outset of its association with Kal, Ehrlich & Merrick, Drug Fair has used a saturation radio plan, a maneuver KEM has used successfully with many of its clients. As many as 800 one-minute and 30-second spots were purchased weekly on 12 Washington area stations. Radio and television accounted for 60% of Drug Fair’s advertising budget in those important early days of expansion.

Television actually did not come until late in the 1950s when Drug Fair purchased its only show, Tippy Stringer and the Weather, on WRC-TV, a daily late evening (11:10-11:15 p.m.) report on the weather. Other tv purchases were strictly on a spot basis. In Tippy Stringer, Drug Fair and KEM officials believed they had the “perfect personality” with which to associate their image.

“I don’t know what there was about her,” commented “Doc” Elsberg, “she was fresh-looking, mildly pretty but a marvelous spokesperson. She had that ‘familiyish’ quality, a particular realness that appealed to her audience.” Drug Fair and Tippy remained a loyal combination until she retired in 1959 to become the wife of Chet Huntley of Huntley-Brinkley fame.

With the departure of Tippy to domestic life, Drug Fair, unable to find a suitable “personality,” has relied solely on radio as its broadcast media. Today Drug Fair divides its 800 weekly spots among WTOP, WMAL, WWDC, WOL, all Washington; WEAM and WAVY, both in nearby Arlington, Va., and WINX Rockville, Md.

Other Radio Activities • In addition to its regular schedule, Drug Fair also has purchased a three-week, 250-spot campaign on WAGE Leesburg, Va., to promote its newest store there (about 40 miles south of Washington) this week. Earlier this year Drug Fair opened a store in Winchester, Va. (75 miles from Washington) using a three-week 250-spot saturation on WINC, that city, and a similar plan in Warren, Va., on WEER and WKCW, that city. Drug Fair maintains a strong spot schedule on all these stations.

At least six similar campaigns will be in the offing by the year’s end since Drug Fair officials plan to have 70 stores in operation by that time. The firm has established 34 stores since the start of 1959.

The importance of radio as a tool in the continuing rise of Drug Fair still is a factor to be reckoned with, according to Alvin Q. Ehrlich, vice president of KEM, despite the fact that it now shares about one-third of the firm’s $500,000 annual advertising budget, a 45% slice of the position it held four years ago.

Radio Forever • “We (Drug Fair) will never stop being a strong user of radio,” Mr. Ehrlich said, “particularly now with so many car radios and transistor radios in use. As a medium it proved itself when we needed it most. And it still is our most effective form of advertising,” he added. All but 10 Drug Fairs are located in suburban shopping areas.

Indicative of the truth of Mr. Ehrlich’s words has been the uniform acceptance of the Drug Fair jingle in the Washington area, resulting basically from a radio effort. In a recent Marketing Analyst & Co. survey in which 3,000 Washingtonians were asked to name their favorite advertising slogan, the catchy Drug Fair tune was far and away the most popular, beating the nationally advertised (both radio and television) Winston cigarette phrase, “Winston tastes good, like a cigarette should” by a considerable margin. “The words to the jingle weren’t too impressive, nor were they much of a sales tool in print,” disclosed Philip F. Berne, senior account executive on Drug Fair, adding, “but they really caught fire when we put them on the air.”

The use of radio as the key chapter in the Drug Fair story might be a little more than a casual circumstance. The firm’s president, Dr. Milton L. Elsberg, served a brief tenure as a disc jockey at WCBM Baltimore in the early 1930’s before striking out for greener pastures in the pharmaceutical field.

Began In 1938 • He built the first Drug Fair—then called the Community Drug Co.—with his partner Robert

An artist's drawing of the Drug Fair store which represented the U.S. at the 1960 international trade fair at Zagreb, Yugoslavia. Yugoslavians managed to transform the firm's radio jingle into their own language: Don't say drug store, say Apoteka Sajam—there's a big difference.

Oh, boy! — my Pulse says 42% MORE WIMMIN!

Yes, the latest 55-county Pulse Area Report (March-April, 1961) again proves WDAY Radio to be the most-listened-to station in, around, or near Fargo!

42% more women! Monday thru Friday, WDAY Radio has 155,100 women listeners!

50% more men, too (though we really don’t care nearly so much about them)! WDAY Radio has 91,400 men listeners!

But don’t think there’s anything unique about this situation. It’s been going on for years and years and years. Ask PGW for all the facts!

Gerber (now the firm's board chairman) in September, 1938 in Arlington, Va. The 1,200-sq. foot store (since expanded) still is in operation. At the insistence of Kal, Ehrlich & Merrick, the firm took the name Drug Fair in 1951.

The multi-million dollar chain has snowballed amazingly. Projected sales for 1961 will total $40 million (highest in history) as compared to the $24 million for 1959. Last October Drug Fair appeared on the American Stock Exchange, closing the first day at $10.12 per share. It has climbed to more than $17 per share.

The future of the Drug Fair-radio combination appears bright, if Dr. Elsberg's estimations hold true. The chain should reach 100 stores by 1965, he predicts, mostly in new areas far outside the Washington area (Maryland, West Virginia and parts of southern Virginia) where the Drug Fair image is not known. And it will be spot radio, as usual, telling the story.

Business briefly...

Jacob Ruppert Brewery, N. Y., for its Ruppert-Knickerbocker Beer, has bought $50,000 worth of radio spots in the N. Y. metropolitan area alone. Stations in New York carrying the 16-week schedule are WNBC, WCBS, WOR, WNEW, WMGM, WABC and WMCA. Agency: Warwick & Legler.

E. R. Squibb & Sons, division of Olin Mathieson Chemical Corp., N. Y., will sponsor ABC-TV's ABC Evening Report (Mon.-Fri. 6-6:15 p.m. EDT), when the revamped news program starts Sept. 25. The network's current news show in the 6 p.m. slot has been unsponsored. The new show's format will feature the reporters who cover each day's stories. It will have three permanent anchor men—Bill Lawrence in Washington D. C. and Al Mann and John Cameron Swayze in New York. Agency for Squibb is Donahue & Co Inc., N. Y.

P. Ballantine & Son, Howard Clothes, L&M Cigarettes and Parks Sausage ordered sponsorship of the 19-game schedule of the New York Giants pro-football team on WNEW New York, starting with an exhibition game last Saturday (Aug. 12) in Portland, Ore. The schedule includes all home and away pre-season and regular season games, with exclusive radio coverage of seven games. Agencies: William Esty (Ballantine), Mogul, Williams & Saylor (Howard Clothes), Dancer-Fitzgerald-Sample (L&M) and Leon Golnick Adv., Baltimore (Parks).

General Motors Corp. will sponsor Danny Kaye's third tv appearance as star of an hour-long comedy special on CBS-TV Nov. 6 9-10 p.m. EST. Agency: Campbell-Ewald Inc., Detroit.

Beecham Products, N. Y., has signed to sponsor The Connie Francis Show, an ABC-TV special to be broadcast Wed., Sept. 13 (9-10 p.m. NYT). The show, Miss Francis' first network tv special, will have as guest stars Art Carney and George Burns. Agency: Kenyon & Eckhardt, N. Y.

The Brunswick Corp., N. Y., has signed for partial sponsorship of The Steve Allen Show (Wed., 7:30-8:30 p.m. NYT) on ABC-TV during the 1961-62 season. Agency: McCann-Erickson, N. Y.

Kemper Insurance Cos., Chicago, have bought partial sponsorship of NBC-TV's All-Star Golf show (Sat., 5-6 p.m. NYT) starting Oct. 14. Agency: Clinton E. Frank Inc., Chicago.

Hazel Bishop for new products in its cosmetics line has begun buying nationwide for a new saturation spot tele-

A quality image is the reflection of many business facets. And, at WFAA-TV there is the constant search for the new, the unusual, the stature-building ingredients which will help to implement that image. An example is the recently initiated and widely acclaimed: “Let Me Speak to the Manager.” Answers to viewers’ questions are openly and honestly aired during this Sunday evening 30 minute program. And they range all the way from violence on TV to distasteful commercials. Sorry, but it is not available for sponsorship. But WFAA-TV does have many fine availss, and your local PETRYMAN is kept abreast daily. Call him TODAY!
A fresh, clean approach to sex

Sharp copy, creative photography, subtle humor and coy sex as personified by an alluring new spokeswoman, have been blended by Doyle Dane Bernbach into two highly effective, much talked about, surprisingly soft-sell deodorant commercials for 5-Day Labs.

Called "The Girl in the Bath Towel," and "The Girl in the Tub," the commercials, in the little more than two months they have been on the air, have stirred an impressive audience and sales response. They also have placed their star performer on the threshold of a new and exciting career.

Morris Levinson, president of 5-Day Labs, a division of Associated Products Inc. (the corporate firm that also makes Rival Dog Food), calls the commercials "memorable—especially for a deodorant." He claims that they have created "10 times as much reaction" among people in the drug trade, customers, and just plain TV viewers, as any commercial his firm has used in its 10 years in TV (network and spot).

Sales also have apparently been affected by the commercials. Mr. Levinson says that in May, 5-Day Labs did a special promotion, selling almost 40% of its year's business to the trade in order to supply stores with the product for the summer season. Because of this heavy promotion, Mr. Levinson explains, the company budget was expected to be 10% below normal during June and July, but thanks to a still unknown factor—most probably the DDB commercials—the budget is 10% above normal for the period.

"The Girl in the Towel" commercials, a 60-second announcement from which a 20-second spot also was cut, are being shown in some 60 markets across the country, while "The Girl in the Tub" commercials, also a 60 and a 20, are being shown exclusively in Los Angeles; Washington, D. C.; Seattle, Wash., and Indianapolis where 5-Day is testing. All of the spots were first put on TV June 19 and will continue at least until October. Chances are, partially because of its overwhelming reception, the "towel" spots will be renewed in most markets and shown in new markets for an additional 13 weeks. The "tub" commercials likely will be shown regularly in markets across the country by early next year.

Chief factor in the success of the spots is the work of a virtually unknown model-actress named Barbara Feldon, never before in a TV commercial. As the girl in the towel and the tub, Miss Feldon, whose main claim to fame in the past was desultory work in some 40 summer stock theatrical shows, and a "crawl-on" part in a short-lived Broadway production of "Caligula," combined the sweet-girl sexy allure of a Brigitte Bardot with the sophisticated, com inherit promise of a Lili Palmer.

Since the spots' debut, New York advertising and drug trade circles, at least, have reverberated with the unanswered question of "who is the girl in the 5-Day commercial?" To satisfy the curious, 5-Day Labs sent out more than 3,000 illustrated reprints of the commercial story board.

Charles Rollins, account executive for the 5-Day product at DDB, says the agency was looking for "warmth, good taste, and memorability" when it made the spots and that Miss Feldon conveyed these qualities "remarkably well." People, he says, remember the girl and remember her message (which is directly opposed to the hard-sell philosophy which says a sexy girl sells nothing but herself), "thanks to her exquisite delivery."

The "towel" commercial has Miss Feldon wiping her apparently nude body (she wore a skin-tight, flesh-colored bathing suit) after a shower and talking about and demonstrating the deodorant product in a simple, direct, innocent manner while bathe her enormous false eyelashes and pouting her lips in the best bedroom fashion. The theme is an appeal to fastidiousness—the same theme which, when used with inanimate objects last year, won a 1961 American TV Commercial Festival award.

The 5-Day spots were filmed by Elliot, Unger & Elliot in April, with Mike Elliot producing. Bruce McGuiness was the producer for DDB, Lillian Bassman was responsible for the agile camera work, and Rita Selden wrote the copy. The two commercials were filmed in three days, with one day out for rehearsals. Each commercial was shot in one take.

vision campaign that will start in the fall. The advertiser expects to enter between 40 and 50 major markets in the U. S. North Adv., N. Y., is handling the buying.

Rep appointments...

- CKEY Toronto: WEED & Co., N. Y., as U. S. representative.
- KIRL Wichita, Kan.: Edward Petry & Co., N. Y., as national representative.

Agency appointments...

- WAKE Atlanta, Ga., and WYDE Birmingham, Ala.: Robert E. Eastman & Co., N. Y., as national representative.
- WANN Annapolis, Md.: Continental Broadcasting, Wilmington, Del.
- WMMS Bath, Me.: Breen & Ward as New York representative.

Nichols Toys (Toys), three 60s, animation, film. Tom Young prod. mgr. Agency: Aubrey Williams Inc.; Aubrey Williams a.e. Approx. cost $5,000.

Tonka Toy Corp. (Toys), one 60, live, film. Larry Herndon prod. mgr. Agency: Kerker Peter- son Inc.; Paul Lemay a.e. Approx. cost $3,000.

Bolting takes a look at buying patterns

The Bolting Co., in an effort to brief its stations on next season's new business, has released a comprehensive 40-page forecast of spot tv and radio buying patterns. The report, which covers 14 major domestic markets, notes broadcast advertising plans of 225 national and regional companies which are expected to be most active during the fall and winter of this year and the early part of 1962.

Included in the report are starting and terminating dates of campaigns, number of markets, type of spots, dollar expenditure and new products.

Among the highlights:

- Of all accounts reporting, 108 plan to increase their advertising budgets over 1960, while only 17 expect to decrease.

- Of 202 accounts committed at this time, 102 plan to continue advertising in the same number of markets, with 93 increasing their number of markets and 17 accounting employing less markets.

- There will be 26 more tv-only accounts—104 in all—as compared to 78 accounts that will use radio exclusively with 46 advertisers using both mediums.

- Emphasis is being placed on minutes and 20-second spots for tv, and heaviest motor travel periods for radio. Programs of 5- and 10-minute lengths, especially news, weather and sports, are gaining in popularity.

- The extended station break time in the fall has only a minor place in account strategy at this time, with 140 of the tv and radio-tv accounts reporting no definite plans to take advantage of the increased time, and only 10 indicating they will use it.

- An evident trend is developing outside of New York and especially in the area of Atlanta, Ga., to advertiser reliance on tv-only in major markets with a heavier emphasis on radio in medium to smaller markets.

4A's attitudes study nearing completion

Field work on the American Assn. of Advertising Agencies' depth study of opinion leaders' attitudes toward advertising has been completed and analysis of it will be finished next month, AAAA announced last week.

A pilot study over a four-month period prior to the start of this survey showed that "television advertising and to a lesser extent radio advertising bore the brunt" of criticism (BROADCASTING, April 24). Officials said that pending analysis of the current findings they could not tell whether this is equally true in the new study.

The field work consisted of depth interviews with 175 so-called opinion leaders—educators, public officials, editors, religious and social affairs leaders, economists, businessmen and the like—in 16 cities.

This study is the cornerstone of a broad program to be conducted by AAAA in an effort to improve opinion-leaders' feelings about advertising. The program is to be directed at opinion leaders on the theory that the chief criticisms of advertising come from them rather than from the general public.

Another scheduled feature of the program is a new AAAA monthly publication, Advertising Today.

B&W lines up tv broadside

Brown & Williamson Tobacco Corp. reported itself set last week for the 1961-62 tv season with sponsorship in a prime-time show for each night of the week and with exposure on each of the networks. B&W said the new season marks the advertiser's most extensive and complete nighttime coverage in behalf of its Viceroy, Kool, Raleigh and Belair cigarette brands and its Sir Walter Raleigh pipe tobacco.

John W. Burgard, B&W's vice presi- dent and advertising director, said the firm's budget for participation in six one-hour shows and one half-hour show will be "somewhat in excess" of its expenditures in the 1960-61 season. tv represents the largest proportion of B&W's over-all ad budget, estimated in the past season at more than $30 million.

B&W's fall schedule includes participation in two of its current programs on ABC-TV—Surfside Six and Naked City. New additions on B&W's program list are: Bob Cummings Show and The Defenders, both CBS-TV; Bus Stop and New Breed, both ABC-TV and Captain of Detectives, NBC-TV. B&W will also continue sponsorship of the post-Saturday night fights feature, Make That Spare, on ABC-TV.

Ted Bates & Co. is the agency for Viceroy, Kool and Belair brands, while Keyes, Madden & Jones, Chicago, handles Raleigh cigarettes and Sir Walter Raleigh tobacco.

Rinsko brands back to JWT

After one year at Sullivan, Stauffer, Colwell & Bayles, Lever Bros.' Rinso and Rinso Blue detergent brands were returned last week to J. Walter Thompson Co., New York. Rinso brands' agency switch a year ago was the first in a series of product reassignments by Lever.

The total ad budget for Rinso is currently estimated at $1 million, with the major share going to tv spot. Television Burger of Advertising's estimated tv spot expenditures for Rinso in 1960 were $843,880.

DDB adds $1 million from CZ

Doyle Dane Bernbach will handle consumer products division account of Crown Zellerbach Corp., San Francisco, effective Jan. 1, 1962. The account, which bills more than $1 million, left the San Francisco branch of Cunningham & Walsh earlier this year. Crown Zellerbach uses spot tv for its "Zee" and "Chiffon" household tissues, towels and napkin products and billed $1,067,200 in gross in spot tv in 1960.
THE BELL-RINGER: The bell in this case is the famed Gold Bell Award of the Catholic Broadcaster’s Association. It is awarded every year to one radio station and one television station for exceptional service to its community in quantity and quality of Catholic programs. This year, the bell-ringer in radio is WFMJ—Youngstown, honored for the second time by the CBA. WFMJ programming for other denominations is equally impressive. Bell-ringer and bell-wether in Youngstown, WFMJ is proud of this recognition ... proud, too, of the leadership it holds in other areas of broadcasting and advertising importance—in news and public service, in circulation and efficiency, in Pulse audience and in the wide variety of information, service and entertainment it provides for the more-than-a million people in the Youngstown area.

Pastore wants FCC reins on networks

NEW BILL WOULD ALSO PLACE CONTROLS ON REGIONAL HOOKUPS

Sen. John O. Pastore (D-R.I.) last week began setting the stage for a new effort to grant the FCC authority to regulate the radio and television networks. The chairman of the Senate Communications Subcommittee did it by introducing a bill giving the commission this authority and promising to hold hearings on the measure "soon." Network licensing is not involved.

The bill was drafted by the FCC and reached Sen. Pastore less than a week after the commission, in a progress report on the status of its continuing study of network practices, renewed its request for the regulatory authority (At DEADLINE, Aug. 7).

Measure (S 2400) is comprehensive, going to the heart of network practices, and broadly drawn, reportedly to give the commission the "flexibility" it feels it would need in regulating the networks.

The term "network" itself is so defined as to go far beyond the four national chains. It would include any organization that feeds two or more affiliated stations coordinated programming.

Sen. Pastore's subcommittee has held hearings on network regulation twice in the last five years, but never sent a bill to the floor. Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, introduced a network regulation bill (HR 1164) on the House side last January, but has yet to schedule hearings on it.

Bill's Provisions: The Pastore bill would require networks to provide the FCC with data on their ownership and operational policies, practices and activities.

And it would empower the commission to adopt rules and regulations "to insure that the networks do not "adversely affect" the ability of the local stations to operate in the public interest.

Under the bill, the FCC could:
- Require a network to exercise control over the material it supplies to its stations, and prohibit discriminatory practices in the selection of that material.
- Prohibit a network from giving unfair advantage to anyone connected with it by promoting the sale or distribution of its products or services.
- Prohibit networks from imposing terms on licensees that limit their ability to operate their stations. These terms could include exclusive affiliation agreements, option time, acceptance or rejection of network programs, or the influencing of non-network rates.
- Limit the ownership of stations by networks. (No limit is specified.)
- Restrict the number of networks that an individual or corporation may own or operate.
- Require networks to distribute their programs on a "reasonable" basis.
- Prohibit networks from discriminating in the selection of their affiliates.
- Prohibit or limit network practices in representing stations in the sale of non-network time.
- Require the networks to identify the sponsor of any material submitted for broadcast.

Equal-Time Requirements: Other provisions make the political equal-time features of the Communications Act applicable to the networks as well as the individual licensee.

Under the bill, the commission could compel compliance with its rules through cease and desist orders. In addition, the penal provisions of the Communications Act, which include fines, could be brought to bear on alleged violators.

In requesting the legislation, FCC Chairman Newton N. Minow said that the commission's present authority—over the individual licensee—is no longer sufficient "to provide reasonable assurance that the airwaves will be used in the public interest." He said "the realities of network broadcasting make it essential that the FCC be empowered to apply corrective rules directly to networks."

House okays revising conflict-of-interest law

The House last week shouted its approval of a bill (HR 8140), revising and recodifying a host of existing conflict-of-interest and anti-bribery laws.

Designed to guard against improper activities by government employees, the bill would, among other things, ban government employees from helping private parties get broadcast licenses or other awards from federal agencies.

The bill would also impose a lifetime bar on former government officials participating in a case before the government with which he was "substantially" involved while on the federal payroll.

The legislation is based on identical bills introduced by Reps. Emanuel Celler (D-N.Y.) and William M. McCulloch (R-Ohio), chairman and ranking minority member, respectively, of the House Judiciary Committee. Contributing to the bill's final form also were the New York City Bar Assn. and the administration.

Full FCC budget approved

Congress last week completed action on a compromise $8.9 billion Independent Offices bill that contains $12,525,000 for the FCC, the total amount requested by the agency. The House had trimmed $125,000 from the FCC budget, but agreed to the Senate's action in restoring the cut. (At DEADLINE, Aug. 7). The bill also gives the commission another six months to use the special $2 million appropriation for a uhf study (see story page 52). The present deadline is June 30, 1962. The bill carries $10,345,000 for the Federal Trade Commission. This is $345,000 more than the House had originally approved.

State Dept. schedules another briefing

The State Dept., which has won plaudits for the foreign-policy briefings it has held for radio-tv and print-media newsmen is holding another one, in Washington beginning today (Aug. 14). President Kennedy, Secretary of State Dean Rusk, Undersecretary Chester Bowles and other senior government officials are scheduled to participate.

The conference is the fifth held by the department in an effort to provide newsman with background information on U.S. foreign policy. The first was held in Washington in April (BROADCASTING, April 10) for radio-tv representatives. Three weeks later, a repeat was staged for the print media.

Since then, the State Dept. has put the show on the road. In June, it held regional briefings in San Francisco and Denver for small-sta-
tion newsman and editors of small dailies and weeklies. The regional meetings will continue until the en-
tire country has been covered.

As in the previous briefings, the Aug. 14-15 conference will be for background only—the information obtained may be used but not at-
tributed.

Etv bill gets going over in the House

DOMINATION OF STATES RIGHTS FEARED BY OPPONENTS

A rousing battle over the House aid to educational television bill (HR 132) is going on behind the closed doors of the House Commerce Committee. Both sides in the fight now expect a bill to be approved, but its final form won't be known until the committee finishes its work, sometime this week.

In two executive sessions last week, proponents of the bill had their backs to the wall fighting opposition attempts, to kill the legislation, then to tack on amendments that would materially alter the bill.

The fight crosses not only party but also regional lines. Basically, however, the opposition is composed of States'-rights Southern Democrats and Republicans. Supporters of the measure include Rep. Oren Harris (D-Ark.), chairman of the committee, and Rep. Morgan Moulder (D-Mo.), chairman of the Communications Subcommittee, which approved the bill initially.

The bill, sponsored by Rep. Kenneth Roberts (D-Ala.)), would appropriate $25,500,000, which would be made available to the states on a matching basis for the preparation of etv plans and the acquisition and installation of transmission equipment. The individual states would get sums ranging up to a maximum of $1 million for the equipment and as much as $10,000 for the surveys. The program would be administered by the commissioner of education but the measure prohibits him from interfering with educational plans.

Rep. Robert W. Hemphill (D-S.C.) reportedly led the opposition to the bill, contending it would permit federal domination of the states' etv programs. A motion to table the bill, taken on Wednesday after he had held the floor for most of the executive session, reportedly was defeated by a vote of only 12 to 9.

Williams' Amendments - On Thursday, Rep. John Bell Williams (D-Miss.) offered amendments that would entitle states to the federal aid simply on the certification by their governors that matching funds were available and that the federal money would be used for etv. As written, the bill spells out a number of requirements that must be met before the aid would be granted.

The first of Rep. Williams' amendments, which dealt with survey funds, was approved by a vote of 13-12, while a backer of the original measure was out of the room. But the second, dealing with the acquisition of equipment, was defeated on a 13-13 tie, when the absent member returned.

Observers noted that even if the bill is reported out of the Commerce Committee, it may be shelved in the Rules Committee, which killed a similar measure in the last Congress. It was noted that the religious issue, which has already stalled the administration's principal aide-to-education legislation would work against the etv bill. A key Democrat on the Rules Committee, however, predicted the measure would be cleared by that unit for the floor.

The Senate has already passed an etv bill ($205), which was introduced by Sen. Warren G. Magnuson (Broadcasting, March 27). The Senate bill would appropriate up to $51 million and make a maximum of $1 million available to each state for etv facilities. No matching funds would be required, and it provides no funds for planning.

Sec. 315 holds for non-news personalities

If an air personality who is not a newsmen wishes to seek public office, he must be prepared to offer equal air time to all other candidates for the same office.

This was the advice the FCC gave last week to Joe Rosenfield Jr., executive director of Big Joe's Happiness Exchange Foundation. Mr. Rosenfield, under the name Big Joe, broadcasts from midnight to 4 a.m. on WABC New York. He interviews people seeking assistance or charity and officials of charitable institutions. He also spins some records but, as he told the commission, news is provided by the station.

Mr. Rosenfield wants to file for election as a city councilman in New York. The FCC cautioned him, that since he is not a newscaster equal time would have to be offered to all candidates for councilman from his district.

Last fall the FCC exempted a weatherman on a Waco, Tex., tv station from the equal-time requirements when he ran for sheriff because his air duties were connected with a news program. Congress waived Sec. 315 provisions for news and interview programs.

Gannett Co. tells FCC to ignore sale protest

Gannett Co., owner of four radio and two tv stations, has asked the FCC to ignore a protest to its purchase of WAVY-AM-TV Norfolk-Portsmouth-Newport News, Va. (At Deadline, July 24).

Gannett said the objector, Beachview Broadcasting Corp., had no standing to protest to the commission. Gannett said that to be a party in interest, a petitioner must show how the sale would cause it injury. The fact that Beachview was a losing applicant in the original contest for ch. 10 WAVY-TV does not qualify it as a party in interest at this time, Gannett claimed.

Tidewater Teleradio, which is selling WAVY, also rebutted Beachview objections. Among the protests was the charge that Tidewater had preempted network public information and cultural programs to present wrestling matches. Tidewater said that it had run three of four in the NBC opera series but had not been given sufficient advance notice to clear the fourth. Tidewater explained it had moved The Nation's Future from Saturday to Sunday so it could be tied in with another public affairs program and would not have to buck such Saturday night competition as Gunsmoke.

Gannett said that the changes of monopoly by Beachview had been considered by the FCC (when Gannett bought WHEC-TV Rochester, N. Y.) and had been dismissed. It further maintained that the company's lack of local ownership and management of newspapers were not disqualifying factors.

House conferees named

Members of the House of Representatives committee who will confer with the Senate committee (At Deadline, Aug. 7) on the two bodies' FCC reorganization bills were selected last week.

The conferees are all members of the House Commerce Committee: Chairman Oren Harris (D-Ark.); Reps. Walter Rogers (D-Tex.); John Flynn (D-Ga.); Paul Rogers (D-Fla.); John Bennett (R-Mich.); William Springer (R-III.); J. Arthur Younger (R-Calif.), and Vernon Thomson (R-Wis.).
Crêpes a la Masson

OLD NEW ORLEANS FAVORITE

1 lb. Lump Crabmeat
1 lb. Cooked Shrimp
1 lb. Cooked Lobster Meat
1/2 cup Chopped Shallots
1/2 cup Chopped Mushrooms
1/2 lb. Butter
2 cups White Wine
1 cup Cream
4 Egg Yolks
Cognac

Favorite Pancake Recipe

Sauté shellfish ingredients with 1/4 lb. butter for five minutes. Sauté shallots and mushrooms with 1/4 lb. of butter until shallots are soft, then add white wine and cook for five minutes. Add to this mixture cream and cook until simmer. Remove from fire and add egg yolks. Flambé-baste shellfish mixture with cognac and combine 1/2 of shallots and mushroom sauce. Prepare 12 crepes (use favorite pancake recipe and thin slightly) and fill each with shellfish mixture, roll, and serve at once covered with remaining sauce. Superb serving for six.

WWL-TV... new New Orleans Favorite

A delightful new favorite in New Orleans is the ANN ELLIOTT SHOW. Ann is a woman’s woman, who knows exactly what the important buying female segment wants to see and hear. The ANN ELLIOTT SHOW is full of variety, programmed at a time most convenient for the greatest number of New Orleans homemakers. Weekday mornings at 9:30 almost every housewife is enjoying the sparkling package of entertainment presented by the ANN ELLIOTT SHOW.

Ann showcases the latest in styles, make-up ideas, chic coiffeur. The tastiest recipes are prepared. Shortcuts to easier housekeeping are discussed. Interviews with visiting personalities are part of this New Orleans Favorite.

Giving Ann a helping hand is New Orleans’ popular man-about-town HENRY DUPRE.

Be sure to zero in your sales message on the purse strings of New Orleans: those ever-lovin’ homemakers and housewives.

P.S. Ann Elliott returns each evening, by popular demand, to present the most complete weathercast in New Orleans.

BROADCASTING, AUGUST 14, 1961
Where the money is going in uhf experiment

The cost picture is shaping up for the FCC's $2 million uhf project in New York City (Broadcasting, July 31). Congress authorized the money to be spent during fiscal 1961 and 1962. The study, spearheaded by Commissioner Robert E. Lee with Arnold Shrivesth engineer in charge, is designed to determine reception conditions in the "canyons" of New York.

Programs will be telecast over ch. 31 (WUHF-TV), picking up material from the seven New York stations with some programming supplied by the City of New York, under FCC supervision.

The following contracts are those that have been awarded: (on an annual basis):

RCA, $377,584, for lease of a transmitter and transmission line. Final testing is scheduled to be completed prior to Oct. 1, with part time availability to the FCC during the period of Sept. 1 to Oct. 1.

Melpar Inc., $248,000, for the Empire State Bldg. tower antenna, slated for installation by Nov. 10, target date for program transmission, and $9,897 for a temporary directional antenna for window mount on the 80th floor of the Empire State Bldg. for making comparative tests of circular and horizontal polarization by Sept. 1.

Jerrold Electronics Corp., $213,895, for installation of receivers and making observations and measurements, tentatively to commence Sept. 15.

City of New York, on a cost basis estimated at $100,000 annually, for operation of the Empire State transmitter. This includes providing and supervising operators as well as a portion of the programming.

Empire State Bldg. Corp., $93,600 for lease of transmitter space in that building.

Smith Electronics Inc., approximately $57,500 for 12 light-weight field strength meters to measure both uhf and vhf.

RCA Sales Corp., $22,922 for tv receivers to be used in the test. There will be 100 black-and-white, 15 portable and 10 color sets.

U. S. Census Bureau will determine locations where measurements and observations are to be made "on a statistically sound basis." The bureau will also probably do data analyzing. This will be on a cost basis.

Progress is reported by the FCC in arranging for rights with news wire services, program sources, music licensing organizations and unions and guilds.

FCC looks at trafficking, program copying

KMAK SALE HELD UP; SECOND INQUIRY REQUESTED

Carbon-copy programming proposals and short-term buying and selling of broadcast properties are being carefully looked at by the FCC. Aug. 1 the commission held up the sale of KMAK Fresno, Calif., to explore these issues and the Broadcast Bureau recommended a similar investigation into transactions by Petty Durwood Johnson, applicant for an am station in Niles, Ohio.

The FCC gave Radio One Inc., prospective buyer of KMAK, 30 days to explain what steps it has taken to determine Fresno's programming needs in light of the similarity of its proposals for KMAK to those of its other two stations, KLIV San Jose and KXOA Sacramento, both California.

The commission also questioned statements by Riley R. Gibson, Radio One's president, in response to an FCC letter "raising the question of trafficking," in which he said his health had been impaired by his duties as owner-manager of KAGO Klamath Falls, Ore., leading him to sell the station. In applying to buy KMAK, however, Mr. Gibson stated only that he had been president and majority stockholder of KAGO and listed Robert Bartlett as manager, the FCC said. The FCC also mentioned that complaints had been received prior to 1957 that Mr. Gibson, as manager of several California stations, had falsely advertised surveys which showed his stations to be "number one" in their communities.

Similar charges against Petty Durwood Johnson were brought to the FCC's attention several weeks ago when Carnegie Broadcasting Co., which holds a construction permit for an am station in Pittsburgh, questioned the character qualifications of Mr. Johnson to operate a proposed station in Niles, Ohio (just across the Pennsylvania-Ohio border).

Not in Time — Mr. Johnson replied that the Carnegie protest should not be considered because it had not been filed within the time limit set by commission rules. He also termed the opposition "vague and insubstantial."

The Broadcast Bureau agreed that the charges had not been filed in time but suggested the commission enlarge the issues on its own motion and include the Carnegie charges which the Bureau said it has substantiated by its own investigation.

Mr. Johnson had filed identical programming proposals for his stations in Spring Valley, N. Y., and Orange, Tex., and the Niles format was extremely similar, the bureau said. He had failed to fully disclose his financial situation, the bureau added, and said that he may have been trying to deceive the FCC as to his financial qualifications.

The bureau also charged Mr. Johnson with trafficking in licenses, an accusation Carnegie had not made. It said that in June 1958 the FCC had approved Mr. Johnson's purchase of KWEL Midland, Tex., which he said was buying to operate a station to serve the Midland community. The purchase price was $60,000. In July 1959 Mr. Johnson applied to sell KWEL for $126,000. He said then that although the station was making money, his other financial interests required him to take too much money from the station. Shortly after the FCC approved his sale of KWEL, Mr. Johnson applied for am stations in Spring Valley, Orange and Niles.

Update Canadian fm table to care for U.S. grants

The Canadian table of allocations for fm channels has been amended to accommodate case-by-case fm grants made by the FCC since 1958, it was announced last week. The Canadian Dept. of Transport said that revisions were necessary to relive "critical shortages" which developed in certain areas and to insure further fm channel availability in Canada.

An Oct. 15, 1947, agreement present-ly governs fm assignments within 250 miles of the two countries' common border. In a letter to the Canadian department, the FCC said that the revised table is compatible with existing U. S. assignments. The commission pointed out that it is now engaged in an extensive review of fm assignments and will, within nine months, enter into further discussions with Canada looking toward a more definitive agreement.
Cover the Hard-to-Get Spots with the RCA VHF Translator System (TRV-1A)

- Operates unattended
- One-watt output on all VHF channels
- Low intermodulation distortion
- Improves coverage of TV signals

- Handles both monochrome and color signals
- Equipment is self-contained, including power supply
- Mounts in standard 19" rack

The Most Trusted Name in Television
RADIO CORPORATION OF AMERICA

A dependable method for improving coverage in certain areas. Translates signals from one VHF channel to another. Consists of individual channel amplifiers, converters and filters necessary for complete system. Designed for unattended operation. Single- and double-conversion units are available. Special identification keyer is available to transmit call letters every half hour.

Wide-spaced Yagi antennas are used for both receiving and transmitting. Developed to provide high gain, maximum co-channel rejection. Offers exceptional mechanical strength. For additional gain, antenna may be stacked with custom phasing of the harness to provide increased co-channel interference rejection. Ideal for high tower and mountain top installations where wind velocities may exceed 100 mph.

WDKD says FCC no judge of obscenity
BROADCAST BUREAU SAYS LICENSEE LIED IN HEARING

WDKD Kingstree, S.C., has been on probation since the FCC set its license renewal for hearing on charges of lack of licensee control over alleged off-color broadcasts, misrepresentation by the licensee and for not serving community needs. It has proved it will perform creditably in the future and should be granted renewal. This recommendation has been forwarded to the FCC in findings by WDKD counsel in connection with the June hearings (BROADCASTING, June 5, 12).

WDKD's licensee, E. G. Robinson Jr., has lied to the commission prior to and during the hearings; his promises are not to be trusted and his license should not be renewed, the Broadcast Bureau urged.

Since disc jockey Charlie Walker, who had made the allegedly indecent remarks, was not found guilty of this offense under applicable criminal law, the FCC has no right to make a judgment of taste as to Mr. Walker's program content, WDKD held. Quoting the Supreme Court decision that the Postmaster General lacks the expertise to find Lady Chatterly's Lover obscene, WDKD held that terming the Walker broadcasts indecent was outside the commission's authority.

WDKD's public service activities and its importance to Kingstree outweigh its admitted overcommercialization and the remarks of Mr. Walker, the station claimed.

WDKD maintained that, as in the case of KORD Pasco, Wash., the FCC should give fair warning and a chance for the licensee to correct deficiencies before taking away his license.

Falsehoods Charged - The bureau was unsparing of Mr. Robinson in its charges that he had lied on the stand and in statements to the commission. It also accused him of encouraging or giving tacit consent to efforts of two "close friends" to prevent two FCC witnesses from appearing at the hearing.

From the testimony of two former WDKD employees, the bureau adduced that Mr. Robinson had abdicated programing responsibility to his wife; that he had not held regular staff meetings as he claimed and that he had not cautioned his employees against using bad taste (by a station memorandum) until the FCC had made its charges.

Legal precedent cited by the bureau upon which the FCC could refuse WDKD license renewal were the cases of Dr. Brinkley (who advertised goat glands and spot prescriptions for unseen patients) and Rev. Schuler (who was anti-Catholic, anti-Semitic and blackmailed listeners).

The bureau argued that five other stations provide coverage to Kingstree, but WDKD counsel said that only WDKD covers the area adequate, with the best of the other stations covering but 63.4% and that area citizens had testified that WDKD's service was necessary.

Miami ch. 10 seeks Supreme Court writ

Another step along the judicial route was taken last week by National Airlines (WPST-TV Miami) in the long-contested battle for the 10 Miami. National asked the Supreme Court to review the decision of the U. S. Court of Appeals. That court decided the FCC was correct in awarding the channel to L. B. Wilson Inc. and ordering National to vacate ch. 10 on grounds National and North Dade Video were disqualified by their ex parte contacts.

In asking the writ of certiorari, National said the appeals court erred in finding that the FCC had the right to positively disqualify an applicant on ex parte grounds and in holding that there was no irregularity in attempts by Sen. George Smathers (D-Fla.) to aid L. B. Wilson.

L. B. Wilson, which hopes to operate ch. 10 as soon as WPST-TV is ordered to vacate the channel, responded last week to a National request that the appeals court stay the effectiveness of its decision until the Supreme Court acts on its request for consideration. Wilson said that unless the Court of Appeals acts promptly on National's request for stay, the effect of such delay will be to give that company extra time without making a legal determination of its right to a stay.

WWIZ sale deal illegal, says WEOL in petition

WEOL-AM-FM Elyria, Ohio, has charged unauthorized transfer of control and trafficking in licenses in a complaint against Sanford A. Schafitz, majority owner of WWIZ in nearby Lorain, Ohio. The complaint was made in a petition to the FCC asking denial of an application by Mr. Schafitz for transfer of control of WWIZ to WWIZ Inc.

The charges were denied by WWIZ and The Lorain Journal.

WEOL said the application for transfer is a move to legitimize the control held for the past two years by The Lorain Journal. Two officers of the newspaper are on the three-man board of WWIZ and have the power to remove any officer or employee of the station by a majority vote, WEOL claimed. WEOL said Mr. Schafitz obtained his permit for WWIZ on false statements that he would be the sole stockholder. He has operated WWIZ less than three years, WEOL pointed out, and during that period has received $55,000 through sale of 200 shares of preferred stock and 90 shares of common stock. If the FCC grants the transfer, Mr. Schafitz will receive an additional $70,000, WEOL said in charging the licensee with trafficking.

The Journal told the commission that WEOL has attempted to harass the paper for years and should not be permitted to continue. The paper said that after a $948,000 antitrust suit against the Journal by WEOL, the judge found "No damage of any kind has been proved."

Mr. Schafitz owns 55% of WWIZ stock, the response said, and at no point has he held less than control of the station. An affidavit from an officer of the paper and the station stated that Mr. Schafitz has never surrendered control of WWIZ to The Lorain Journal.

Fm applicant argues basis of denial

An unsuccessful applicant for an fm station last week threw down the gauntlet, challenging the constitutional right of the FCC to consider programming in granting or denying applications. The U. S. Court of Appeals will be the referee.

Suburban Broadcasters, which was denied an fm station in Elizabeth, N. J., by the FCC on grounds the company had not indicated in its proposed programming what steps it had taken to determine the community's needs, made the appeal (BROADCASTING, July 3). Suburban told the court the FCC "has no statutory authority to inquire into the needs of the area to be served nor to pass judgment upon the adequacy of the applicant's proposed programming to meet those needs." The company further charged the commission with censorship and violation of the First Amendment's guarantees of freedom of speech and of the press.

Suburban also objected to the FCC decision as being "arbitrary and capricious," because the community's program needs were not included within the scope of the hearing issues. Furthermore, said Suburban, the FCC had not heretofore given notice that an investigation of the program needs of the community was required in order to obtain a grant.

54 (GOVERNMENT)
Great electric “power grids” are much in the news today. The idea goes back more than 40 years to the first Interconnecting and Pooling of power by the investor-owned electric companies.

Thanks to such pioneering, the investor-owned companies today have thousands of miles of lines and billions of dollars worth of plants connected to bring America a new dimension in low-cost, dependable electric service.

These networks are in every section of the country and growing very fast. They benefit millions of homes and businesses by helping keep electric rates low, and making your electric service ever more dependable.

If an emergency shuts down one plant in such a power “pool,” users may never even know it. Electricity is instantly brought in from other plants—across hundreds of miles, if necessary.

There is no need for the companies to build expensive duplicate facilities to make sure an ample reserve of electricity is on hand. A city, for example, may need most of its electric power in the wintertime. A lumbering area hundreds of miles away has its peak demand in summer. So the investor-owned companies exchange power as needed—keeping costs down, keeping electric rates low.

Interconnecting and Pooling helps individual communities...vast areas...whole states...the entire nation. It is a major reason why the investor-owned electric companies can supply all the additional electricity America will need.
Committee publishes debate transcripts

Transcripts of the Kennedy-Nixon radio-tv debates, meetings which many observers regard as the decisive factor in last year's presidential election, have been published between the green covers of a Senate subcommittee report.

They were included in Part III of the exhaustive report the Senate Watchdog Subcommittee is preparing as source material in an examination of the objectivity of broadcasters in presenting former Sen. John F. Kennedy and former Vice President Richard Nixon.

The report also includes transcripts of all radio and tv programs on which both the presidential and vice presidential candidates were afforded free time to expound their views. All these were question and answer and news-in-depth shows.

This section takes up more than half of the 616-page Part III. The remainder concerns published answers to identical questions put to the presidential candidates during the campaign.

Parts I and II deal with the campaign speeches, press conferences and statements of Senator Kennedy and Vice President Nixon, respectively. Part IV, which is in preparation, will include all 15-minute radio and tv network news programs between Sept. 26 and Nov. 7.

FCC'S PROGRAM FORMS

Comments say they're too expensive, censorship

The Nebraska Broadcasters Assn. last week asked the FCC to withdraw the agency's rulemaking on proposed programming forms and logging requirements (Broadcasting, July 10).

Through its president, Arden Swisher of KMTV (TV) Omaha, NAB said the forms would require "a great mass of information which would be irrelevant and immaterial unless the commission contemplates program control. . . . From the fact that the application form is designed to elicit such information, it would appear that the commission would be attempting under the new form to accomplish indirectly what it is forbidden by law . . . to do directly."

NBA said that the forms would impose an unreasonably expensive and burdensome routine on applicants. The proposed logging requirements would place upon technicians and announcers "a burden of clinical detail which they cannot carry without impairing their efficiency . . . " NBA stated.

"The proposed new logging procedures are so elaborate and expensive that some stations may be forced to offset the expense by curtailing hours of service," NBA continued.

Other state associations are preparing comments, presently due at the commission by Sept. 7. The Kansas Assn. of Radio Broadcasters, in a memo to its members, said that the new forms present a "burden of paperwork for broadcasters." A special committee, headed by Ed Mason of KXXX Colby, is preparing comments.

The Texas Assn. of Broadcasters noted that "some quarters say that it (proposed form) is as near to censorship as the FCC has ever been." The Kentucky Assn. of Broadcasting wired NAB President LeRoy Collins urging the national association to "use all persuasive powers" to urge the FCC to make certain changes. KAB said comparison vs. actual programming should be deleted "since it means program control. . . ."

In a comment submitted to the commission last week, KATL Miles City, Mont., asked that small stations be exempted from the proposed logging requirements. KATL pointed out that often only one man is on duty and he is too busy to keep detailed logs.

Bureau opposes request for program study issue

One can go too far in charging a rival station with failing to determine the programming needs of its community, the FCC Broadcast Bureau thinks.

The FCC was asked to adopt that issue in determining whether KHOT Madera, Calif., should be allowed to increase power from 500 w to 1 kw. The protest was submitted by Elbert H. Dean and B. L. Golden, applicants for an am station in nearby Lemoore, which assertedly would receive interference from the power boost. They held that low percentages of religious, educational and discussion programs on KHOT indicated it does not serve the needs of its present area and that its coverage should not be extended.

The bureau opposed the request, stating that it has been established that applicants for new facilities must investigate community needs, but that an already licensed station has presumably passed this test. Furthermore, the bureau said, the percentages cited are not proof that KHOT is not fulfilling its service obligations.

KHOT asked the FCC to enlarge the issues to include its programming plus the issue of whether the new station proposed by Messrs. Dean and Golden would bring any new and necessary service to Lemoore, since that community is already served by KLAN Lemoore and KGNS Hanford, Calif. (five miles away).

SATELLITE OWNERSHIP

Congress, Administration differ on "consortium"

While most congressional interest in communications satellites last week centered on who should own the system, a Justice Dept. official pointed out that broadcasters will have a more direct problem to worry about once the system becomes operational. And that is censorship.

When international television becomes a reality, Assistant Attorney General Nicholas deB. Katzenbach told Congress, "one can predict that we will have to face" that problem.

Testifying before the House Science & Aeronautics Committee, he said "various nations may seek to maintain different practices as to censorship and control of program content." And, he said, "we would have to recognize and reconcile both our traditions of freedom of expression and the policies of other nations."

But the more immediate problem—who should own the system—was the subject of a meeting of congressional Democrats who are opposed to the administration's proposal to set up a consortium of ten international carriers to own and operate the system. No decisions were made but it was felt the group could bring considerable pressure to bear on the administration.

The meeting was presided over by Rep. Emanuel Celler (D-N.Y.), chairman of the House Judiciary Committee, and attended by members of his antitrust subcommittee and the Commerce and Space Committees. Representatives of Sens. Hubert Humphrey (D-Minn.), Senate Whip, and Estes Kefauver (D-Tenn.), chairman of the Senate Antitrust Subcommittee, also were present.

A number of congressmen are known to fear that AT&T, the largest company chosen by the FCC to participate in ownership of the system, would dominate the consortium. They say ownership should be opened to common carriers and equipment manufacturers. Some prefer outright government ownership.

Administration determination to guard against giant companies gaining advantage through their pioneering efforts in the space communications field was voiced by James E. Webb, director of the National Aeronautics & Space Administration, in testimony before the

56 (GOVERNMENT)
Let me express my appreciation to you for your efforts and cooperation in connection with positive action against the menace of the child molester.

J. Edgar Hoover, Director
FEDERAL BUREAU OF INVESTIGATION

WLOS-TV recently created an on-the-air children's poster contest to publicize the FBI's campaign alerting the public to the problem of child molestation. Children were urged to create posters illustrating the rules they should follow to play safe. The winning posters in the contest were chosen by J. Edgar Hoover.

WLOS-TV's contest was a tremendous success, and throughout the Carolina Triad, schools and organizations have taken their cue from WLOS-TV in planning similar programs of their own.

In the Carolina Triad, WLOS-TV is synonymous with public service!
Gathered around a model of the communications satellite AT&T plans to launch (BROADCASTING, Aug. 7) are some of the men in Washington most interested in space communications. From the left, they are Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee; Newton N. Minow, FCC chairman; James Webb, director of the National Aeronautics & Space Administration; James E. Dingman, AT&T's chief engineer; Sen. Andrew F. Schoeppel (R-Kan.), and Sen. Warren G. Magnuson (D-Wash.), Commerce Committee chairman.

Sen. Hartke asked the President to create the commission by executive order if the same end cannot be achieved through legislation. The Senator later said President Kennedy expressed interest and told him he would consult his advisors on it.

Sen. Hartke feels that control of all spectrum allocations should be placed under a single authority responsible to the President. At present, allocation problems that develop between the FCC and government users, such as the Defense Dept., must be negotiated by the agencies.

Sen. Hartke's proposal, which would require the special commission to report on its findings within six months, was first introduced in the last session of Congress, but never got out of committee.

Reintroduced at the beginning of the current session as SJ Res 32, it was aired by the Senate Communications Subcommittee two weeks ago, and received something of a cold shoulder from the FCC (BROADCASTING, Aug. 7). Speaking for the commission, FCC Chairman Newton N. Minow agreed a study was needed, but he was critical of the manner in which it would be conducted under the resolution.

Sen. Hartke said last week there is “no basic disagreement” between his position and the FCC's. The important thing is that a study be made and a report issued, he said.

**WINS DENIES PAYOLA**

Tells FCC it never knowingly tolerated the practice

The licensee of WINS New York “emphatically” denied last week that it has ever knowingly tolerated payola practices, as questioned by the FCC in a pre-hearing inquiry on the station’s application for license renewal (BROADCASTING, July 10).

“Long before the possibility that payola practices might lead to violations of the . . . Communications Act was generally considered, the owner and president of the licensee [J. Elroy McCaw] opposed such practices as a matter of business policy,” WINS said in reply to the FCC letter.

WINS maintained that its license should be renewed and that the FCC must keep these points in mind: (1) After intensive investigation by the FCC and the New York district attorney, only three instances have been found in which WINS personnel allegedly accepted payola; (2) all three cases were effectively dealt with by the station; (3) of the three persons involved, only one was an on-the-air personality; (4) WINS moved “fairly, diligently and effectively” in an effort to develop the facts;

Also, (5) each of the three individuals has been formally charged of having accepted payola “without the knowledge and consent” of his employer; (6) WINS established a policy against payola long before the subject received any governmental attention, and (7) so far as the licensee knows, other McCaw stations—KTVR (TV) Denver and KTVW (TV) Tacoma, Wash.—have not been involved in payola.

WINS is being sold to the Storer Broadcasting Co. but FCC approval has been held up pending action on the station's renewal application.

**Hruska would exempt football tv from antitrust**

A move to prevent a blackout of professional football this fall was urged by Sen. Roman L. Hruska (R-Neb.) last week, an outgrowth of Federal Judge Allan K. Grim’s decision (BROADCASTING, July 31) declaring the National Football League’s package contract with CBS-TV void.

Sen. Hruska is co-sponsor of a bill (S. 1856) which would exempt professional football telecasts from antitrust laws. It would allow clubs to contract...
We are proud to be in the broadcasting business. We feel the potential of this business, for the public good, to be unlimited. We recognize that we are living at a moment when broadcasting can make its greatest contribution to American life. We are living in an age where man has progressed in mechanical knowledge to an extent that he now has in his hands the power to cause the destruction of civilization as we now know it, or the power to bring forth a better life than man has ever known.

We believe that in the operation of radio and television stations we can make a significant contribution to this better life. (Taken from comments by Herbert E. Evans, President, Peoples Broadcasting Corporation, to Federal Communications Commission.)
for telecasting, provided there is a blackout within a 75-mile radius of a game involving a club in another league, unless there is an agreement with the affected team.

It is Sen. Hruska's contention that footfall should be on a parity with baseball, which is exempt from the antitrust laws. Judge Grim in 1953 first ruled football was in violation of the antitrust laws and was upheld by the Supreme Court.

S. 1856 would clarify, it is understood, the differences between baseball and football in relation to the antitrust laws.

**Lombardo doesn't like radio-tv weathercasts**

The man who makes "the sweetest music this side of heaven" complained of sour notes struck by New York radio and tv weathercasters last week in a telegram to FCC Chairman Newton N. Minow.

Bandleader Guy Lombardo claimed that weather forecasts predicting "the worst weekend of the summer" for the weekend of Aug. 5 had discouraged New Yorkers from going to Jones Beach Marine Theater to see the outdoor extravaganza he produces. Mr. Lombardo said that by 4 p.m. Sunday not a drop of rain had fallen.

It is not the official U. S. Weather Bureau forecasts but the way weathercasters handle them, Mr. Lombardo insisted. The FCC said it will investigate the complaint.

**No private agreements**

The FCC has served notice that it will not countenance private agreements where one station does a favor for another in exchange for that station's withdrawing an objection to an application. The commission granted an increase of power to WHOP Hopkinsville, Ky., from 250 w to 1 kw on condition that it file a joint statement within 10 days with WTCJ Tell City, Ind., informing the FCC that the stations have called off a deal under which WHOP would pay engineering costs for WTCJ to apply to increase its power to 1 kw. The FCC felt that approval of this agreement would "establish an unfortunate precedent leading to possible abuses of the commission processes."

Commissioners John S. Cross and Rosel H. Hyde dissented.

**Government briefs...**

**Dismissal recommended**  * Recommendation that payola complaints against three affiliated record companies in Chicago be dismissed has been made by a Federal Trade Commission hearing examiner. The initial decision, applying to complaints against Chess Records, Argo Record Corp., and Checker Record Corp., was issued on a motion by the FTC staff counsel who pointed to the recent amendment of the Communications Act as adequately protecting the public against the challenged practices.

**On probation**  * The Dept. of Commerce has issued an order putting Visual Electronics Corp., New York, on probation for one year because of a charge it and other companies sent strategic goods behind the Iron Curtain in violation of U. S. export controls. The firm said the matter arose three years ago and resulted from a clerical error in shipment valued at less than $100 and containing no critical materials. The firm was fined $10,000 last year in a court action in connection with the charges.

**MacIntyre confirmed**  * The Senate last week confirmed by a voice vote, President Kennedy's appointment of Everett MacIntyre to the Federal Trade Commission. He succeeds Robert T. Secrest, whose term expires in September. Both men are Democrats. Mr. MacIntyre, counsel for the House antimonopoly subcommittee at the time of his nomination, has spent 25 years with the FTC prior to 1953.

**Conflict bill advances**  * Legislation revising a host of existing conflict-of-interest legislation was approved by the House Judiciary Committee. Based on identical bills introduced by Reps. Emanuel Celler (D-N.Y.) and William M. McCulloch (R-Ohi.), chairman and ranking minority member, respectively, of the Judiciary Committee, the legislation would ban government employees from helping private parties get broadcast licenses or other awards from federal agencies.

**Case of the disappearing manager**

WREA East Palatka, Fla., which went off the air last February when its manager "disappeared" (Broadcasting, Feb. 27), must go through an FCC hearing on its license renewal application, the commission said.

Among the issues cited by the commission were legal, technical, financial, unauthorized transfer of control, and programming. The hearing will be held in East Palatka on Oct. 10. Owners of record of WREA are Anthony, Peter and Concetta Corrado of Flushing, Long Island.

Answering a letter of inquiry from the commission, Peter Corrado said WREA is "almost at the state of bankruptcy." The commission, in its hearing order, said that the station's transmitter has been repossessed and the antenna dismantled.

The unauthorized transfer involves an alleged lease of the station to Paul Yates Jr., who in turn reportedly hired the missing manager, J. D. Bullard. Mr. Corrado said the station is listed for sale with Paul H. Chapman Co., Atlanta broker, with the Yates lease broken off after Mr. Corrado determined Mr. Yates' credit standing.

Mr. Bullard, it was reported, was hired by Mr. Yates and left the station after the latter disclaimed any responsibility for WREA and when Mr. Bullard and other station employees did not receive their pay for several weeks.

**SMALL BUSINESS PROBE**

**Controversial program forms to be included in hearings**

The FCC's proposed program reporting forms that have met with considerable broadcaster opposition (see story, page 56), will be included on the agenda of hearings to be held next fall by a subcommittee of the House Select Small Business Committee.

This was disclosed last week by Rep. Dale Alford (D-Ark.), chairman of the subcommittee, in announcing plans for the hearings, which will deal with radio-tv advertising opportunities for small business firms (Broadcasting, Aug. 7).

The announcement said the hearings will be held following the adjournment of Congress.

Rep. William Avery (R-Kan.), a subcommittee member, urged Rep. Alford to include the proposed program forms on the hearing's agenda. He feels that since no other congressional unit has aired the matter, the Small Business subcommittee should provide a forum in which the small broadcaster can express his views.

Rep. Avery, in a letter to the chairman, said the subcommittee should investigate the question of whether the forms, by requiring broadcasters to submit a mass of detailed information, constitute a censorship threat.

The agenda announced by Rep. Alford includes national advertisers' influence on networks, pay tv, broadcasting practices that adversely affect small advertisers, tv time periods reserved for large advertisers, the steps taken by the FCC to enhance competition and encourage the small advertiser, and the need for new legislation to help small business in broadcast advertising.
ON APRIL 5, 1961, in a steel and glass skyscraper overlooking a major U.S. metropolitan city, a meeting was held to discuss the purchase of a new five kilowatt AM transmitter. The main points in consideration were economical operation, quality sound and industry acceptance. Each five kilowatt transmitter on the market was thoroughly evaluated, with only the Gates BC-5P-2 meeting all the stringent requirements. These progressive broadcasters found that the modern Triode power tubes in the Gates transmitter reduced operating costs, and that overall average power consumption was as low as could be found. Their analysis also revealed that the BC-5P-2's combination of very low distortion and wide response produced the truest quality sound. Finally, no other five kilowatt AM transmitter could equal the acceptance of the BC-5P-2. This is the world's number one best seller in the five kilowatt field. The decision was made. A new Gates BC-5P-2 transmitter is now in operation at this top rated station giving day-in and day-out trouble-free performance. Let us tell you more about the Leadership Five. Write today for Brochure No. 94 - yours for the asking.
THE MEDIA

‘Freedom meeting’—Georgia style

SYMPOSIUM OF SOUTHEASTERN BROADCASTERS TO DISCUSS PROBLEMS

The Georgia Assn. of Broadcasters last week sent out a call for a grass-roots meeting of southeastern broadcasters to discuss problems.

The meeting, scheduled for Sept. 15 in Atlanta, will see presidents and secretaries of seven southeastern station broadcasting associations assemble to discuss such matters as the threatened infringement of the federal government into the affairs of licensees, the FCC’s proposed new program forms, the NAB’s leadership in attacking potential government encroachment, and the NAB’s decision to drop sponsorship of the Voice of Democracy contest.

In an unprecedented move, the association passed a resolution complaining that the work of the majority of American broadcasters “is not being adequately recounted by the NAB,” and urging that NAB: “spread the cause of broadcasters, neither accepting nor allowing to go unanswered any unjustified criticism; to fight any and all proposed infringements on the prerogatives of broadcasters, not attempt to promote their acceptance; to resist any attempt by any governmental agency to inflict upon broadcasters the onerous chore of unnecessary and costly recording of minutiae to the extent that the equality of his service is lessened; and to offer to broadcasters the leadership and moral support they deserve—and which their financial support presupposes.”

Invitations to attend the Southeast Radio-Tv Symposium (SERTS) were sent to the presidents of the following state associations: Alabama, Florida, Georgia, Mississippi, North Carolina, Tennessee and South Carolina. Also invited were FCC Chairman Newton N. Minow, NAB President Leroy Collins, and James L. Howe, WIRA Fort Pierce Fla., Fifth District NAB director.

The seven states invited to the conference represent 24% of all radio stations licensed and on the air, and 16% of all such TV stations.

“This should give the conference the grass-roots flavor and the local point of view which seems to be lacking, or unheeded, in the broadcasting industry in recent months,” H. Randolph Hold- er, WGAU Athens, Ga., newly elected president of the association, said. (For new officers see page 86).

In other actions by the GAB at the Aug. 6-8 meeting at St. Simons Island:
• Agreed to undertake a realistic research project on the FCC’s proposed new programming form by underwriting the expense of field testing for one full week the logging requirements needed in complying with the proposal. Stations which will participate in this test, to determine needs in personnel, time and cost, will be WDEC Americus (1 kw on 1290 kc daytime, employing six parttime and two parttime employees, and WCON Cornelia (250 w fulltime on 1450 kc, with eight fulltime employees).
• Urged all Georgia stations to try out the proposed new program form and report to the FCC how it works out, or how it can be revised to be more acceptable to broadcasters. This was recommended by FCC Commissioner Robert T. Bartley in his remarks to the association.
• Both of these actions came after the Georgia broadcasters heard Commissioner Bartley and Washington communications attorney Frank Fletcher speak on the FCC’s activities.

Mr. Bartley called on broadcasters to regulate themselves quickly or face the probability of government intervention. Self-regulation is the greatest tool the industry has to work with, he said. “The broadcasters I need to talk to are not here today,” Commissioner Bartley added, “they’re back home trying to undersell you.” The commissioner stated that if the industry doesn’t fight abuses, government control is assured. (See story, this page).

Mr. Fletcher reviewed the upbeat in FCC activities going back to the warnings sounded by Commissioner Frederick W. Ford when he was chairman in 1960. In discussing the proposed new program forms, Mr. Fletcher declared that in his view it calls for an accounting of every second of at least two weeks of broadcasting. It also, he added, asks for information on operating policies and procedures never before requested. He surmised that broadcasters may have to add an extra employee to their rolls in order to maintain the logging information required.

Among the resolutions passed by the association, one called on NAB to reconsider its decision to drop sponsorship of the Voice of Democracy con-

Bartley sees no policy change

The FCC’s current regulatory policy was born on the “Old Frontier,” Commissioner Robert T. Bartley told the Georgia Assn. of Broadcasters last week (see story above). He expressed surprise that the press has seized upon Chairman Minow’s speech as a change in policy. He attributed the phenomenon to use of the catch phrase “vast wasteland.”

Commissioner Bartley described the new chairman as “intelligent, reasonable, pleasant, hard-working and determined.” Mr. Minow, he said, is determined that broadcasters shall exercise their responsibilities in a responsible manner.

The Democratic commissioner pointed out that addresses he had made in 1954, 1955 and 1956 were stimulated by his “violent disagreement” with the views expressed in speeches by some of “Sherman Adams’ appointees” to the commission on the responsibilities of the FCC. He noted that since that time he had been gradually joined in his dissenting position by other commissioners and that the majority had shifted to his views some two years ago.

Among the views which Commissioner Bartley expressed:
• That the FCC should examine carefully multiple radio-TV property owners. He said “I feel a license is a personal thing, not just the concern of a corporation, and people can spread themselves too thin.” He agreed some multiple owners run excellent stations but said he believes those stations would be even better if the owner were to “rub shoulders daily with the listeners to his station.”
• That lifting the restrictions of Sec. 315 and allowing the broadcaster editorial discretion in the matter of equal-time in political broadcasting will increase correspondingly the responsibility of the broadcaster.
• That integration of station ownership and active management outweighs the factor of possibly greater broadcast experience of a multiple owner.
• That “any broadcaster concerned about his community need not be concerned about the FCC.”

SPECIFY GENERAL ELECTRIC TV

1-KW VHF High Channel Transmitter, Type TT-49-B.  
A new design providing the base for a low-cost building block approach to a 35-KW or 50-KW transmitter for maximum commercial power. A second cubicle can be added to form a compact 5,000 watt transmitter or for use in driving a 35-KW watt amplifier or a 50-KW amplifier.

5-KW VHF High Channel Transmitter, Type TT-50-B.  
Two-cubicle 5,000 watt transmitter, for use in driving a 35,000 watt or 50,000 watt amplifier. The most efficient way to step up to full commercial power. Features long life silicon rectifiers. Completely self contained, designed for simplicity of operation and easy maintenance.

50-KW VHF High Channel Amplifier, Type TF-5-A.  
Designed to provide a 50-KW peak synchronizing television signal and a 26.6-KW frequency modulated aural signal in any of the VHF television channels 7 through 13. This amplifier requires only modulated RF drive and access to the 5-KW driving transmitter's main "plate off" circuit.

VESTIGIAL SIDEBAND FILTER AND DIPLEXER TYPE PY-33-A
Available to feed either a single or dual transmission line to the antenna.

requirements from 1-kw to 100-kw...

TRANSMITTERS AND AMPLIFIERS

10-KW VHF High Channel Transmitter, Type TT-32-B. Designed to furnish a higher power basic station transmitter, or a conservatively operated driver for high power RF amplifiers. This air-cooled transmitter delivers a 10-KW peak synchronizing television signal and a 5.5-KW aural frequency modulated signal. Transmits both monochrome and NTSC color signals.

35-KW VHF High Channel Amplifier, Type TF-14-A. Designed to provide a 35-KW peak synchronizing television signal for channels 7 through 13. A 5-KW transmitter provides ample power to drive this amplifier to a full 35-KW which will provide 316-KW ERP signal using a standard 3-bay helical or 12-bay batwing antenna. Transmits both monochrome and NTSC color signals.
Radio's summer lead

Radio's summer audience lead over television started in June this year instead of July, according to Sindlinger & Co. media comparisons reported last week by Radio Advertising Bureau.

RAB's claim of 92,022,000 listeners daily during the first week of July was 11% more than tv's audience. It was radio's highest total audience since the start of media comparisons by Sindlinger.

test (Broadcasting, July 24). Another urged all member stations to join the radio and tv codes, and a third asked that the FCC revise its publication regulations to permit a station to use its own facility to publicize an application for a new or changed facility.

3M's profits up

Minnesota Mining & Mfg. Co. reports second quarter sales of $151,034,000 and earnings of $17,826,047, equal to 35¢ a share. For the same period last year, 3M sales were $134,343,955, with earnings of $16,148,091, equal to 32¢ a share. The 3M Co. also owns Mutual Broadcasting System.

HOW TO READ BAROMETERS IN IDAHO

After letters, NAB, Idahoans reach a kind of concord

The FCC's proposed revisions in program reporting forms, and the NAB's several advices to members on the subject, have stirred up more fuss in Idaho than anywhere else.

It started during the Idaho Broadcasters Assn. meeting July 19-20. In a telephone interview with Broadcasting during the meeting Gale (Gub) Mix, general manager of KRPL, Moscow, Idaho, and outgoing president of the association, said that members were up in arms over the FCC proposals and the position that the NAB at that time was taking.

A week earlier LeRoy Collins, NAB president, had sent a memorandum to members describing the proposed forms as a "net improvement" over those now in use (Broadcasting, July 17). At the Idaho meeting James McKnight, of the NAB's Los Angeles office, made a speech that reportedly confirmed the position first taken by Gov. Collins.

The featured speaker at the Idaho meeting was FCC Commissioner Rosel H. Hyde. He described the recent history of government moves toward tighter scrutiny over broadcast programming, and he criticized the industry for its failure to resist the moves.

In its July 24 issue Broadcasting reported, on the basis of its reporter's understanding of his conversation with Mr. Mix, that the Idaho association had "officially" condemned the NAB position and the FCC proposal.

Comeback • The reaction at NAB headquarters was immediate.

In the next issue (July 31) of the NAB's internal newsletter, Highlights, Gov. Collins said his position had been misinterpreted and his first comments distorted by Broadcasting. Meanwhile, NAB officials were in touch with executives of the Idaho Association.

Mr. Mix wrote Gov. Collins that he was "gratified" to read in the July 31 Highlights that the NAB was not approving the FCC proposals for program forms. Mr. Mix said that he had told Broadcasting's reporter that "those broadcasters who had commented on the NAB stand to me had all felt the NAB was off base in their approach." He denied, however, that he had indicated any official action was taken.

But Mr. Mix advised Gov. Collins that since the appearance of the Broadcasting story on the meeting "I have received more than 200 letters, telegrams and calls from broadcasters throughout the land, including a majority of the IBA, five state associations and broadcasters from 34 states." All, he reported, agreed with the Idaho attitude that had been reported in Broadcasting.

Mr. Mix closed his letter to Gov. Collins with this suggestion: "Give them hell. We've backed up far enough."

Nothing Official • The incoming president of the Idaho association, Duane D. Wolfe of KCID Caldwell, also wrote Gov. Collins stating that no official action on the program forms or the NAB's statements about it had been taken at the state meeting.

Mr. Wolfe also denied the existence of a "poop sheet" that Broadcasting, in its July 24 issue, described as having been compiled by a special committee of the IBA. The poop sheet was a memorandum of advice to station operators on what to do if FCC inspectors called.

Contrary to Mr. Wolfe's disavowal —apparently without his knowledge—the poop sheet was available during the Idaho meeting. According to Mr. Wolfe's predecessor, Mr. Mix, the memorandum was prepared last winter. A person in attendance at the Idaho meeting sent a copy of it to Broadcasting, and its authenticity was

WSJS opens new facilities with a bang

WSJS Winston-Salem, N.C., made the switchover to its news $150,000 broadcast installation with a bang as evidenced in photo above. Describing the fireworks used to herald WSJS's promotion theme, "Big, Brilliant Sound of '60," is Phil Hedrick (pointing), the station's vice president of operations. Others (from left): George Lohnes, installer of the RCA towers; Harold Essex, president and general manager of WSJS, and Hank Pointel, the director of special events for WSJS.
From sign-on to sign-off (now 6 A.M. to 8:45 P.M.) Monday thru Friday, WLIB is dedicated 100% to the goals and interests of the enormous Negro Community in greater New York.

WLIB thus becomes the first and only station in New York to dedicate its efforts and facilities so completely to this need. And the need is vital because one out of every nine persons in the greater metropolitan area is a member of the Negro Community.

But its strength is larger than the strength of numbers alone. In education, its growth has been fantastic—proportionately far outstripping every other ethnic group. At the economic level, the Negro's standard of living is the highest in history. It has become one of the great buying forces in the marketplace.

In this new WLIB schedule, "dedicated community service" will play a more dominant part than ever before. More "Negro" news; more interviews with outstanding leader from all over the world; more Community Interest program (such as "The Editor Speaks"—broadcast for seven consecutive years) will be the station's constant aim.

In every way, the great growing voice in the land now has a bigger voice than ever in New York.

WLIB

Hotel Theresa, 125th Street & 7th Avenue, New York 27, N. Y.
checked with Mr. Mix while the meeting was still in session.

For broadcasters, in Idaho and elsewhere, who may be puzzled by the NAB's position on the program forms, Broadcasting published last week a full record of Gov. Collins' various observations (see "Which Collins comments d'ya read?" on pages 64-65, Broadcasting, Aug. 7).

Drivers prefer radio ads over those on billboards

The nation's drivers feel radio does a better job of advertising than billboards, Radio Advertising Bureau learned in a national survey that probed consumer attitudes toward the two media.

As reported in a new RAB presentation on outdoor advertising called "Inside Outdoor," radio emerged ahead of billboards on the following counts: telling about new products, creating interest in products, making consumers feel favorable toward an advertising product and reminding consumers to buy products.

The media comparison study was conducted by R. H. Bruskin Assoc., which sampled 2,000 adults who spend a part of each day in a car, either as drivers or passengers. RAB also points out that today's higher highway speed limits slash reading time, and the necessarily "big, bold, brief" posters limit outdoor advertising's ability to get across the advertiser's complete selling story.

DiSalle accepts debate on WCKY Cincinnati

An interview on WCKY Cincinnati's Compass series has led to a statewide controversy about the extent of Ohio Gov. Mike DiSalle's powers after his intervention in the sentencing of a convicted murderer.

In the interview, Hamilton County prosecutor G. Watson Hover said (referring to Gov. DiSalle's action in changing a death penalty to life imprisonment), "Gov. DiSalle is reaching a point where he is becoming a dangerous individual when he acts as a one-man board of review for judicial determination." Mr. Hover then offered to debate the case with the governor, who promptly accepted.

WCKY has arranged a debate under the sponsorship of the Cincinnati Bar Assn. Three law school deans will act as judges. The station has invited all Cincinnati television stations to telecast the proceedings and WCKY will feed the broadcast to any radio station desiring it, station officials said.

FCC consultant Dean Barrow (U. of Cincinnati) is one of the judges.

Luncheon heralds WCCC's Mutual affiliation

Mutual Broadcasting System president Robert F. Hurleigh (left), WCCC station owner William M. Savitt (center), and Connecticut Gov. John Dempsey demonstrate together-ness in celebration of the Hartford station joining the Mutual radio network. Action took place at a gala luncheon held last week in Hartford. Speakers, in addition to Messrs. Hurleigh and Savitt included veteran Mutual newscaster and commentator Cedric Foster, who was born, raised and first worked in Hartford. Also present at the luncheon were Anthony Armentano, Lt. Gov. of Connecticut; Hartford Mayor Domi-

nick DeLucco and Edgar T. Sloan, president, Greater Hartford Chamber of Commerce.

Its new affiliation gives Mutual a total of 428 direct station affiliations (another station, WMMP Westport, Conn., has since been added).

WCCC is a 500 w., daytime station. Greater Hartford Broadcasting Inc. is the original owner. The station features a format of time, news and temperature every quarter hour, with "quality" music in between. Besides service to WCCC, the newly-signed contract calls for Mutual to supply music to Greater Hartford Broadcasting's fm outlet, WCCC-FM.

WINS TO BECOME MUTUAL'S N.Y. KEY

WOR relinquishes 27-year affiliation on Aug. 28

WOR New York, one of the founders of the Mutual network 27 years ago and its key New York outlet ever since, is slated to become an independent on Aug. 28. On that date WINS will become the network's basic New York affiliate, according to an announcement slated for release yesterday (Aug. 13) by MBS President Robert F. Hurleigh and WINS President J. Elroy McCaw.

Mr. Hurleigh said WINS wished to carry more of Mutual's news and public service features than WOR had been clearing and that this led him to make the move "which will markedly improve the MBS impact in New York." He said he regretted the dissolution of Mutual's "most amicable basic affiliation with WOR," but that "the type of news format followed by WINS provides a more logical integration of Mutual news coverage."

In addition to carrying more of Mutual's extensive news and feature schedule, officials said, WINS will make available to the network its own news staff and mobile units. WOR has been carrying a relatively limited number of Mutual programs. Some time ago Mutual made an arrangement with WVNJ Newark to carry some of the programs not cleared by WOR. This arrangement may be revised as a result of the WINS affiliation, it was understood.

WOR, now owned by RKO General, was one of four founders of the Mutual network as a cooperative programming operation on Sept. 15, 1934. The others were WGN Chicago, WXYZ Detroit and WLW Cincinnati.

68 (THE MEDIA)

BROADCASTING, AUGUST 14, 1961
Financial management group names directors

A 15-man board of directors has been selected to direct the activities of the newly organized Institute of Broadcasting Financial Management.

The organization was formed to develop and maintain progressive concepts for the broadcasting industry and to provide financial executives with a medium through which they can exchange ideas and methods.

Media notes...

New facilities • Construction began early this month on a new tower and transmitter for WPRO-TV Providence, R. I., in Rehoboth, Mass. The new equipment, which will enable WPRO-TV's programs to be seen by southern New England viewers, is expected to be installed by October 15. The new transmitter and antenna were purchased from RCA.

Investigation • Because of a series of broadcasts by Lou Gordon on WXYZ Detroit concerning some 60 complaints against the labor unions operating in the city's new $55,000,000 convention center, the problem has been virtually solved. With WXYZ bringing the issue before its listeners, a public hearing was held in which the convention hall's directors explained why they allowed such a situation to exist.

Duplication • WGR-FM Buffalo this month began duplicating programs of parent WGR from 6:30 a.m. to midnight. According to Richard C. Shep- ard, station manager, WGR-FM will begin stereo broadcasting in the near future.

Appointment • Storm Adv., St. Louis, has been appointed advertising agency for WAFS Amsterdam, N. Y., which is to go on the air Sept. 1. The new station, on 1570 kc, 1 kw, is owned by Valley Information Programs, Irving Segel, president.

Stubblefield brings suit against Hamilton-Landis

William T. Stubblefield, broadcaster and former station broker, has brought civil suit in U. S. District Court for the District of Columbia against Hamilton-Landis & Assoc. and its principal Ray V. Hamilton. He seeks commissions and wages he claims are owed him from 1957 when he was a partner in the brokerage firm, then Hamilton, Stubblefield, Twining & Assoc.

Mr. Hamilton said, "Mr. Stubblefield is in error. A countersuit will be filed in the very near future, asking for an accounting of money he owes for breaching his contract."

Mr. Stubblefield's claims total over $53,000, not including undetermined commissions which he states are on the firm's records to which he has been denied access. He was with the firm from September 1957 until October 1958. In his suit Mr. Stubblefield accues Mr. Hamilton of violating provisions of their contract. He said he is definitely owed $2,600 salary, some $46,000 in commissions, $4,800 that he loaned the firm at 7% annual inter-est and secretarial expenses.

Mr. Stubblefield now owns and manages WAGE Leesburg, Va.

NEWSPAPERS THAT MEAN BUSINESS IN SAN DIEGO

San Diego County is among the nation's top 25 for 1960 in lumber, building materials and hardware sales*. Build your sales in this robust and rising market. BROADCASTING, AUGUST 14, 1961
SWITCHING NETWORK for the world’s first Electronic Central Office in Morris, Illinois, contains thousands of neon gas tubes. Here, an installer of the Western Electric Company holds a modular unit that he is checking with a Bell Laboratories technician.
New experimental switching system at Morris, Illinois, demonstrates the essential role of Western Electric in the Bell Telephone System. Four hundred telephone users are the first to enjoy the advantages of the revolutionary electronic office which works thousands of times faster than the present type and offers new economy of operation.

Western Electric has manufactured a major part of the components and assemblies for the world's most exciting telephone central office. Located at Morris, Illinois, this office is the first switching system to perform electronically every function in handling telephone calls. To help make this trial possible, Western Electric has worked closely with Bell Telephone Laboratories, converting the designs of the Laboratories into factory production.

At least four major Western Electric manufacturing locations have provided specialized services or components for the Electronic Central Office. Hawthorne Works in Chicago produced the original circuit and electronic packages and assisted the Laboratories in the design of the equipment. Indianapolis Works built the special phones. Allentown Works made the entirely new-type, tiny gas tubes and the 138,000 semiconductors, which, with other electron devices, perform the switching operations. W.E.'s Columbus Works has since assumed responsibility of engineering and control location for the project known as ECO.

ECO makes possible new services which will greatly increase the value of each customer's telephone. With a built-in memory that retains millions of bits of information, electronic switching works thousands of times faster than standard equipment and offers new economy of operation. At present, ECO permits its trial users to:

- Use home extension telephones as intercoms
- Reach frequently-called numbers by dialing only two digits instead of seven
- Have incoming calls routed to another phone when the line originally called is busy
- Dial a code which causes automatic transfer of all subsequent incoming calls to be automatically transferred to other local numbers.

Western Electric is proud of its essential contributions to this new system, which was installed in the summer of 1959 by a team of specially trained W.E. installers. This group, working with Bell Laboratories and Illinois Bell personnel, helped to put the equipment through an exhaustive series of tests to attain maximum performance and reliability.

Based on this experience, Western Electric engineers will be able to make significant contributions to future Electronic Central Offices by helping to select the most economical design for manufacture. Most important of all, Western's experience will be of great value in planning for the production of further improvement in switching systems for the Bell System.
Canon 35: a verdict without a trial

ABA TOLD IT HAS NO RIGHT TO LEGISLATE OUTSIDE OWN MEMBERS

The American Bar Assn.'s Canon 35 and reorganization of federal regulatory agencies, particularly the FCC, dominated broadcast-oriented subjects at the annual ABA convention in St. Louis last week. Convention highlights of interest to radio-tv:

- A blistering attack on Canon 35, which bars radio-tv and photographers from the courtroom, by Richard H. Amberg, publisher of the St. Louis Globe-Democrat (which owns 25% of KTVM [TV] St. Louis).
- Speeches by FCC Chairman Newton N. Minow, FTC Chairman Paul Rand Dixon and White House Advisor James M. Landis on agency reorganization before the ABA's administrative law section.
- Extension for one-year of a special ABA committee to study possible revisions of Canon 35. The committee's report sought this course of action without making any specific recommendations.

While not an official convention activity, KMOX-TV St. Louis featured a judge-lawyer discussion of Canon 35 on its Close-Up program.

John C. Satterfield of Yazoo City, Miss., was installed as the new president of ABA, replacing Whitney North Seymour of New York, one-time special counsel to the NAB. Chosen as president-elect, to take office in 1962, was Sylvester C. Smith Jr., general counsel for the Prudential Insurance Co.

The new ABA president, a former member of the Mississippi State Legislature, worked his way through law school as a reporter for Associated Press, the Memphis Commercial Appeal and the New Orleans Times-Picayune.

Indictment by Fiat • Canon 35 is a verdict without a trial, a finding of guilt simply by declaration, Mr. Amberg told a conference of chief justices at the ABA convention. Canon 35 "indicts ... everyone in the communications media—by fiat, rather than proof, and is deeply resented," he said.

He argued against the ABA ruling on these three points: (1) there was no need for the restriction in the first place; (2) even if there was a need at one time, techniques have changed so vastly in the past quarter century that the need no longer exists, and (3) the ABA has no right to legislate in fields touching anything beyond its own membership.

Canon 35, adopted in September 1937, states that court proceedings "should be conducted with fitting dignity and decorum. The taking of photographs in the court room . . . and the broadcasting or televising of court proceedings are calculated to detract from the essential dignity of the proceedings, detract the witness in giving his testimony, degrade the court and create misconceptions with respect thereto in the mind of the public and should not be permitted."

Mr. Amberg said that the courts belong to the public, not to the lawyers or litigants. "Is a trial in a court of law so sacred that it cannot be exposed to the full, unhampered right of the people to know? he asked. "There was no valid reason for enacting Canon 35 in 1937. There is no reason for its continuance today."

And, Mr. Amberg continued, with the U. S. history of free speech, "it is perfectly astonishing that the bar association would limit, by unilateral action, the term free press as expressed in the Constitution. . . . When the action of one group limits the freedom or legal action of another group—as does Canon 35—I think it far transcends not only the bounds of judgment and good taste, but of legality . . . ."

Up Close • Featured on KMOX-TV's Canon 35 discussion were Chief Justice Frank H. Hall of the Colorado Supreme Court and Chief Judge Charles S. Desmond of the New York Court of Appeals. Colorado allows radio-tv court coverage while New York has a law making such coverage a felony.

Judge Desmond maintained that there is a world of difference between newspaper coverage of a trial and "letting a tv camera come in there and bring the trial out of the courtroom and into the homes. . . . Frankly, I think that has a tendency to turn it into a theatrical performance."

Justice Hall countered that newspapers can slant the news, distort the appearance of the participants in a trial but that it is hard to slant actual sound and film coverage. He said that 27 trials have been televised in Colorado without in any way detracting from the dignity of the court.

"The dignified court is not going to lose its dignity by virtue of exercising the privileges granted by our rules," Justice Hall said. "If you have an undignified court, it will remain undignified" not withstanding radio-tv coverage.

KMOX-TV also featured an interview with Chairman Minow on Eye on St. Louis during the ABA convention.

Further Study • The ABA House of Delegates granted its Canon 35 committee another year of study. The committee, headed by St. Louis attorney Richmond C. Coburn said that it has been trying to raise funds to conduct a pilot study on the effect radio-tv would have on a fully objective trial. The ABA has been unable to interest the media or research foundations in helping finance the study, he said.

The committee therefore asked for another year to pursue means to complete its study of Canon 35.

Senate Curb • A possible curb on

Chief Justice Frank H. Hall (l) of the Colorado Supreme Court makes a point for the abolishment of the ABA's Canon 35 on KMOX-TV's (St. Louis) 'Close-Up.' Chief Judge Charles S. Desmond of the New York Court of Appeals listens before getting in his points in favor of the canon, which bars radio-tv and photographers from courtrooms.
broadcasting of investigations by Senate committees was contained in a committee report submitted to the ABA House of Delegates last week. The ABA committee on individual rights as affected by national security, under the chairmanship of George S. Geffs of Janesville, Wis., suggested in its report that the standing rules of the Senate should be amended to prevent broadcast coverage if a witness objects.

**Unique Burden** Chairman Minow said that the FCC has to shoulder a "unique procedural burden—the 1952 amendments to the Communications Act," which are much more severe in the separation of functions than statutes applying to other agencies. These amendments, he stated, erected an "Iron Curtain" between the commission and its staff in all adjudicatory cases.

He charged that the present provisions "make no sense. ... This concept of separation of functions runs counter to the very reason for having administrative agencies." And, the chairman continued, little comfort is provided by the review staff which also is prohibited from advising the commissioners.

But, he said, the commission itself has no complaint compared to its hearing examiners who are forbidden consultation with anyone, including a fellow examiner. Pending FCC reorganization bills which have passed both houses of Congress and are now in conference (see page 46) would return the commission to the "salutary standard" enjoyed by other agencies under the Administrative Procedures Act, Chairman Minow said.

**Wrong Assumption** Mr. Landis, also plumping for reorganization, said that the bar has assumed that uniform procedural requirements can be imposed upon the regulatory agencies. "Nothing is further from the fact," the author of the President's reorganization plans countered.

Broadcasters, Dean Landis charged, opposed the FCC reorganization because of a fear that "license renewal requirements might really be made workable." The Federal Communications Bar Assn., he said, in a sense has the same vested interests as broadcasters with the "complexity and prolixity of the existing procedures redounding to the benefit of its [FCBA] members." The basic issue of reorganization was concealed beneath an unreal procedural battle, he stated.

Paul Rand Dixon, chairman of the Federal Trade Commission, stressed the importance of improving the efficiency of that agency. He pointed to new procedures designed to prove "that the commission can make rapid progress within the framework of our free institutions." He said that about 2,500 cases now are under investigation by the FTC and that, threatened with inundation when the normal percentage matured for litigation, the FTC acted to increase its efficiency.

Philip Elman, a member of the FTC, said that the FTC should "systematically survey and search out unfair practices which, if allowed to grow, may become full-blown monopolies or restraints of trade." He stated that the agency's role as guardian of a free economy cannot be confined to the complaints that arrive by mail.

Other federal officials participating included Alan S. Boyd, Civil Aeronautics Board; Jerome K. Kuykendall, Federal Power Commission, and Everett Hutchinson, Interstate Commerce Commission.

**CBS wins ABA's Gavels, but 'Perry' is criticized**

CBS swept the annual "Gavel Awards" for commercial radio-tv of the American Bar Assn., meeting in St. Louis last week. However, on the convention floor, CBS' Perry Mason series was criticized as a "shocking distortion. . . ."

Armstrong Circle Theater (CBS) received a gavel for "tv dramatizations fostering public understanding of the work of Legal Aid Societies in providing counsel to the indigent." The award was received by C. J. Backstrand, president of sponsoring Armstrong Cork Co.

An award went to CBS Reports for "increasing public understanding of the processes of justice in the documentary production 'A Real Case of Murder.'" Jay McMullen, Reports producer, accepted.

CBS-owned KMOX St. Louis was cited for "dramatizing the essential role of the lawyer through its program A Case in Point. Accepting the award was Robert Hyland, vice president of CBS Radio and general manager of KMOX.

The U. of Michigan TV Center, Ann Arbor, won ABA gavel for "its educational film series Blessings of Liberty dramatically illustrating basic constitutional rights of Americans." Dean Allan F. Smith of the U. of Michigan Law School accepted.

In criticizing the Perry Mason series on the convention floor, Brooklyn District Attorney Edward S. Silver charged that the nation's DA's are not getting a fair shake on tv screens. With the fictional tv defense attorney always winning his case, the faith and confidence of the public in the integrity of law enforcement is in danger of being undermined, he said. "The Perry Mason triumphs on the tv screen . . . are a shocking distortion of the real problems facing every district attorney in the land," prosecutor Silver maintained.
The television networks have their advertising and promotion plans for their new fall program schedules all set to go. And apparently they're going strikingly different ways.

Only NBC-TV authorities were willing last week to go into detail on the strategy they'll follow. CBS-TV and ABC-TV were maintaining secrecy in hopes of keeping each other—and NBC—in the dark until the last minute. But it was apparent there is a cleavage on the question of newspaper advertising's influence on tune-in.

NBC authorities said they planned no newspaper advertising at all except for institutional or image purposes. They're abandoning not only the newspaper campaigns used in the past to kick off the new season, but also their co-op allocations toward newspaper advertising for specific programs during the season. Instead they plan to go heavy—again—on on-air promotion and concentrate their co-op allotments in *Tv Guide*.

The *Tv Guide* advertising will depend on support from both affiliates and the advertisers on the programs involved. The advertiser will pay half and the network and station 25% each. In the past the cost of NBC's within-series program promotions in newspapers has been shared equally by network, station and advertiser.

On-air promotion of NBC-TV programs is slated to be as heavy as last year, when virtually all available time was devoted to it. The value of the network time, based on card rates, was estimated at $110 million. In addition NBC-TV affiliates devoted the equivalent of about $52 million in station time to the promotion of network shows.

NBC's move away from newspapers is not complete. It will continue to use newspapers for institutional advertising and this, if the past is any guide, may play up specific shows—though not in the "don't miss tonight" tradition of tune-in advertising.

**Value Doubled** — NBC's decision to steer clear of turn-in ads in newspapers is based, according to network authorities, on a feeling that the value of such advertising is doubtful, to say the least. There have been indications that NBC may conduct a study of the effectiveness, luck of effectiveness shown by this type of promotion.

While NBC is cutting back on its use of newspapers, CBS-TV appears to be moving in the opposite direction. Officials at that network, which about a year ago curtailed its newspaper use by limiting it to the promotion of new shows, would not divulge plans for the coming season except to say that they would be using more newspaper advertising this year than last.

ABC-TV officials declined to discuss any phase of their plans.

Both CBS-TV and ABC-TV are expected, like NBC-TV, to put heavy emphasis on on-air promotion in addition to whatever print strategies they follow.

**CBS sales increase but profits drop**

An increase in net sales but a decline in net consolidated income for the first six months of the year were reported last week by CBS Board Chairman William S. Paley and President Frank Stanton.

Net income totaled $9,409,332, down from $12,669,169 earned in the corresponding period last year. Earnings are equivalent to $1.09 a share compared with $1.47 per share (and adjusted for a stock dividend) a year ago. Net sales amounted to $240,767,745, up from $231,821,970 for the first six months in 1960.

The CBS board of directors Aug. 9 declared a cash dividend of 35 cents a share on common stock, payable Sept. 8 to stockholders of record at the close of business Aug. 25.

The decrease in earnings was attributed principally to increased costs, general business conditions, and the performance of CBS Electronics Div. It was explained the latter included losses and expenses related to the discontinuance June 30 of the manufacture of receiving tubes, and the losses estimated at about $4 million after applicable credits are being charged against retained earnings.

**Fm outlets name Harris**

The National Assn. of Fm Broadcasters has appointed Marion R. Harris, KGB-FM San Diego, chairman of a committee to study the FCC's proposed new rules for fm (Broadcasting, July 3).

Serving with Mr. Harris are: Gary M. Gielow, KPEF (FM) San Francisco; T. Michell Hastings, WBCN (FM) Boston; John L. Humphreys, KXTR (FM) Shawnee Mission (Kan.); Jack Roth, KONO-FM San Antonio; Shirl Evans, WBFM-FM Indianapolis, and Harold Tanner, WDLF (FM) Detroit. Fred Rabell, KTIT (FM) San Diego, NAFMB president, will serve on the committee ex officio.

---

**No NBC-TV coin for newspaper advertising**

**PROGRAM PROMOTION WILL BE MOSTLY ON-AIR VARIETY**

---
NBC-TV gets piece of NFL coverage

NBC turned a CBS legal downfall into a potential sales windfall with announcement last week that it will televise regular-season games of two National Football League teams on Sundays this fall. The telecasts are made possible by the federal court decision last month which voided CBS-TV's "package" contract to carry the games of all NFL teams (BROADCASTING, July 24).

NBC's windfall consists of tv rights to home and away games of Baltimore and Pittsburgh on 14 Sundays from Sept. 17 through Dec. 17. The network also televised the games of the same teams last season. The football contests, to be selected on a week-to-week basis, will not be seen in the 14 NFL cities. The Ford Motor Co., through J. Walter Thompson Co., has bought one-quarter sponsorship of the games, and sales of the remaining time to cigarette, beer and oil advertisers is imminent.

The NFL is well on its way to implementing the provisions of its last season's tv contracts, with CBS-TV already committed to carrying at least 90 games of nine NFL teams this fall (AT DEADLINE, Aug. 7), and the Cleveland games to be carried by Sports Network with Carling Brewing Co. as spon- sor. Still unaccounted for are Washington and the new Minnesota Vikings. Under last year's provisions, tv rights to the Washington games are held by the American Oil Co. and its games will probably wind-up on CBS-TV. Minnesota has been forced to negotiate as a new entity and its games will likely be carried by CBS, but for considerably less money than the team would have received under the now nullified league contract.

ABC-TV runs legal risk, signs for NCAA games

Ignoring possible legal torpedoes, ABC-TV proceeded full-speed last week, announcing it would televise 23 National Collegiate Athletic Assn. football games on 13 telecast dates starting Sept. 16. The proposed telecasts are part of the NCAA's two-year, $6 million "package" deal with the network.

The schedule of 13 telecasts, 12 on Saturday afternoons and one on Thanksgiving Day, will be sponsored by Gillette Safety Razor Co. (through Mason Inc.), Humble Oil & Refining Co. (through McCann-Erickson Inc.), and the R. J. Reynolds Tobacco Co. (through William Esty Co.). The telecasts begin Sept 16 with the U. of Pitts- burgh-U. of Miami game from Miami and close Dec. 2, with the Army-Navy game from Philadelphia. On five of the Saturday dates, three regional games will be presented, an increase of one regional date over last season's schedule.

Rams' football network

Formation of the 1961 Los Angeles Rams Radio Network, a tri-state hook-up which will broadcast all games live, was announced by Bob Forward, director of programs at KMPC Los Angeles, key station of the special sports radio network. Other stations are: KMAP Bakersfield, KWTC Barstow, KROP Brawley, KXXO El Centro, KSFE Needles, KCMJ Palm Springs, KPRL Paso Robles, KITO San Bernardino, KGB San Diego, KVEC San Luis Obispo, KIST Santa Barbara, KSMA Santa Maria, all California; KLAS Las Vegas, Nev.; XXIV Phoenix and KCUB Tucson, both Arizona.

Changing hands

ANNOUNCED • The following station sale was reported last week subject to FCC approval:

KBTB (TV) Denver: half-interest sold by Webb & Knapp (New York real estate firm) to John C. Mullins, owner of KBTR Denver (formerly KICN), for $2.4 million. KBTB is

Newhouse buys second Portland newspaper

S. I. Newhouse, group publisher-broadcaster, has bought the Portland ( Ore.) Journal for an estimated sum in excess of $8 million. This gives Mr. Newhouse ownership of both the morning Portland Oregonian and the afternoon Journal. The Oregonian holds a 50% interest in KOIN-AM-FM-TV Portland.

The transaction did not include KPOJ-AM-FM Portland, owned by the Journal. Submitted to the FCC last week was an application seeking commission approval to the transfer of control of KPOJ Inc., the licensee, from the Journal Publishing Co. to individual stockholders of the newspaper company.

Newhouse sources said the Journal would be continued as a separate publication; it has about 150,000 daily circulation. The Oregonian has a daily circulation of over 200,000.

Strong reports circulated, meanwhile, that the Newhouse interests are nego-
The Buffalo (N.Y.) Courier-Express at a sum reported to be about $13 million. The Buffalo newspaper owns WEBR-AM-FM in that city.

Newhouse stations, in addition to those in Portland, include: WSYR-AM-FM-TV Syracuse, N. Y.; WAPI-AM-FM-TV Birmingham, Ala.; WPTA (TV) Harrisburg, Pa., and 22.71% of KTVI (TV) St. Louis, Mo. Mr. Newhouse owns newspapers in these cities and in others, plus controlling interests in Conde Nast Publications Inc. and Street & Smith Publications.

**Transcontinental stock offered**

Transcontinental Television Corp., through Carl M. Loeb, Rhoades & Co., and Bear, Stearns & Co., put a block of 400,000 Class B common shares of company stock on the market Thursday (Aug. 3), at $12.50 a share. The shares belonged to the present stockholders. The underwriters said that the issue was oversubscribed and that the stock was quoted at $12.50 bid, $13 asked.

The sellers were General Railway Signal Co., selling 200,000 shares out of 268,000 held, and J. D. Wrather, individually and through a corporation he controls, selling 200,000 shares, retaining 198,208 shares. For the fiscal year ended March 31, TTC reported gross operating revenues of $17,641,893 and net income after taxes of $1,329,814 (Broadcasting, June 5).

---

**EQUIPMENT & ENGINEERING**

**Short-wave system for trans-ocean tv?**

TV ENGINEERS DOUBT DEUTSCH PLAN WILL WORK

Industry engineers discount the practicability of a trans-oceanic short-wave tv transmission system demonstrated last week by Dr. Sid Deutsch, associate professor of electrical engineering at Polytechnic Institute of Brooklyn.

Dr. Deutsch claimed his system would enable tv programs to be sent across oceans at a cost far below that of the projected world-wide communications satellite system. He admitted at a news conference Aug. 8 that the system's picture quality is poorer than conventional tv, but said it would be "acceptable" to viewers.

A network engineering executive (CBS) said, however, that the system would be impractical "for the reason of the tremendous shortage of overseas short-wave channels. Even to get a single channel at this narrow band width is a hopeless situation." He said there is "just too much interference and congestion" at the 45 mc band width on which Dr. Deutsch's system would operate.

The slow-scan system introduced by Dr. Deutsch requires an ordinary dual-channel tape recorder attached to a short-wave pickup. It utilizes 45,000 cycles per second in contrast to the 4 million-cycle signals used by conventional tv channels. A complete picture requires 1.6 seconds under Dr. Deutsch's system, while in conventional tv a complete picture is transmitted in one-thirtieth of a second.

As Frank Marx, ABC's vice president of engineering, explained, "In any slow-scan system you're trading time for band width." Nevertheless, Mr. Marx thought Dr. Deutsch's system "an interesting idea, if yet an untried one."

Blurs Rapid Motion • Dr. Deutsch said rapid motion appears blurred on the screen with his system, but he thinks people will accept this image because in most tv programs there is not much action and the effect of blurring would be minimal.

At the Brooklyn demonstration last week, Dr. Deutsch used an adapted Sylvania closed circuit tv system. Reporters saw a rectangular picture filling about three-quarters of the tv screen. Definition was said to be fairly low and horizontal lines were prominent.

The professor said that the shortwave system was developed at the Brooklyn college for recording classroom lectures, and he proposed that most schools could use the system for taping of classroom and lab work because of the low cost.

William H. Trevathen, vice president, NBC-Television operations, told Broadcasting that he would withhold comment on the new system until he has seen a demonstration himself. He said Dr. Deutsch was being invited to hold a demonstration for NBC engineers, specifically to see how his system compares with the international slow-scan pictures transmitted by AT&T cable. NBC-TV can receive and send tv signals on the cable system, which was first introduced by the BBC nearly three years ago to link BBC with Canada.

**Technical topics...**

Color tv market • Sears, Roebuck & Co., Chicago, plans to re-enter the color television set market sometime this fall, the company said last week. The set will be marketed under the Silvertone label. Sears declined to say when the new color line would be ready and indicated it was too early for details about price or technical specifications.

New equipment • Newly developed conversion equipment for fm stereo broadcasting, manufactured by the Standard Electronics Div. of Dynamics Corp. of America, has been sold to KPEN (FM) San Francisco. The station, which received FCC "type-acceptance" certification on the equipment, began stereo broadcasting Aug. 10.

Joins parent • The Westrex Recording Equipment Co., developers and manufacturers of sound recording equipment and systems, has moved to larger quarters at 335 North Maple Dr., Beverly Hills, adjoining its parent corporation, Litton Industries, Inc.

Stock split • National Video Corp. will submit to its stockholders at the annual meeting Sept. 19 a plan for a two-for-one split of its common stock. Also announced was a quarterly dividend rate of 25 cents per share on class A holdings in Rico Electronics Inc., whose stock is beneficially held by National Video Corp. shareholders. This is a 2½-cent increase over previous dividends.

**June set-making up from May, says EIA**

Tv and radio set production moved upward during June with tv retail sales 24% over the previous month, the Electronic Industries Assn. reported last week.

Mid-year totals for sales in 1961 were 95% of sales in the first six months of 1960, EIA announced.

Get the high quality you require with the new General Electric GL-8093 Image Orthicon

GL-8093/ZL-7803—3-inch image orthicon specifically designed with video taping in mind. This one has it! High signal-to-noise ratio (peak-to-peak signal vs. [RMS] noise—min.: 38, av.: 50) and improved definition you need for critical video tape recording. Yet, it is competitively priced with standard camera tubes. Key to its high signal-to-noise ratio is an improved target-mesh assembly in the scanning section which improves your picture quality...provides sharp transition from black to white without white edges. This also improves flatness of field and corner resolution—helps prevent distortion.

The GL-8093 is especially recommended for critical video tape recording work, such as found in network centers and tape production centers. Its good definition and improved signal-to-noise ratio are important features where numerous copies are made from an original tape, as in many educational programs, and for those productions where you can’t settle for less than top quality.

The GL-8093 will save you set-up time—reduce the need for compromise between sharpest focus and minimum background blemishes. It is interchangeable with the 5820, 5820A, 7293, 7293A and 7513. Try this new G-E image orthicon in your own cameras. You’ll like the difference it makes in your video tape recording work.

For more information, call your General Electric tube distributor or write for descriptive literature, ETR-2801, to General Electric Company, Room 7246B, Owensboro, Ky.

Progress Is Our Most Important Product

GENERAL ELECTRIC
**ABC-TV GIVES UP ITS ‘DISCOVERY’**

Children’s show, in Minow vein, meets clearance stymie

*Discovery*, ABC-TV’s answer to FCC Chairman Newton Minow’s demands for better children’s programming, has turned out to be a mirage.

The network announced last week that the program, which was due to premiere on Oct. 2, had been cancelled because of insufficient station acceptance. It was to be an informational program for children and televised from 5 to 5:30 p.m., Mondays through Fridays. The period is outside network option time.

Broadcasting learned that 72 of the network’s 116 primary affiliates, including the five owned and operated stations, had cleared the program, but that eight key stations would not make the time available. Reportedly included among these stations were WKBW-TV Buffalo, N.Y., WEWS (TV) Cleveland, WNHC-TV New Haven, Conn., KMBC-TV Kansas City, Mo., and KETV (TV) Omaha, Neb.-Council Bluffs, Iowa. It was indicated that because of the network’s failures to get enough clearances in major markets, several prospective advertisers pulled out of the program.

In justification of some of the clearance difficulties, authorities acknowledged that the program had been ordered “a little late” — that some stations already had committed the time to other advertisers and hence had no alternative but to reject the network offering.

Jules Power, of Jules Power Productions Inc., who was to be executive producer of *Discovery*, described the program’s fate as “a perfect example of how a good program doesn’t get on the air.” He claimed that the show was already sold to A. C. Gilbert Co., New Haven, Conn., maker of games and toys; Blumenthal Bros. Chocolates Co., Philadelphia (on a regional basis); and to Milton Bradley Co., Springfield, Mass., another manufacturer of games and toys (conditional on certain station clearances). In addition, Mr. Power said, Quaker Oats Co., Chicago, had placed a verbal order for the program for its Life product.

Mr. Power said ABC should have kept *Discovery* on the air even on a sustaining basis. He felt the fourth quarter of the year is a tough time to sell “a new and far reaching” children’s program in the 5 p.m. time slot, because game and toy advertisers are eager to get their Christmas and Thanksgiving messages across on tested cartoon shows.

The producer also said that if the program had “stayed alive” until the end of the year, picking up “awards and notice,” it would have been “easy to sell” by the first of next year. He indicated that he would try to sell the show to another network.

ABC had been heralding the program since last May (its first announcement followed Mr. Minow’s “vast wasteland” speech to the NAB convention in Washington, when he called for programs “to teach, to inform, to stretch and to develop the understanding of our children.”). The network’s latest publicity release covering the program described it as “a new concept in tv programming for children.” A highlight of the show was to be a 10-minute daily broadcast of news stories and in-depth coverage of current events, all geared for a young audience.

This portion of the show, at least, would be salvaged. ABC-TV News and Special Events Vice President James C. Hagerty, said that beginning Oct. 2, a 10-minute news program would be televised for a “young” audience Mondays through Fridays, from 4:50 p.m. to 5 p.m. The program will explore the background of stories as well as news events. It will employ young reportorial talent from the ABC news department, and also two college students — one from the Columbia School of Journalism, the other from the U. of Pennsylvania.

Graud Chester, ABC-TV’s vice president in charge of daytime programming, said an attempt would be made to sell the news program, and that he anticipated no difficulties in getting sufficient station clearances.

Music in the Minow manner

PAMS Productions, Dallas, Tex., has announced availability on Aug. 23 of a new radio musical background package, "PAMS New Frontier," designed to "introduce and showcase such normally dry subjects as public affairs, religion, agriculture, education and local talent." It includes both instrumental and vocal treatments.

A novel feature of the package is division of the music into four categories of style and mood, each designated by a different color.

In addition to being designed to gain more total radio audience, the package is claimed to "build and maintain station identity without so-called 'program interruption' in conformance with New Frontier FCC ideals."

Also included in the package are customized instrumental and vocal station IDs.

Should there be fewer television awards?

MOVE WOULD INCREASE PRESTIGE OF THOSE REMAINING

A move which may lead to a reduction in the number of awards offered in television and radio—but greater prestige for those that remain—was authorized Thursday by a group of awards-givers at a meeting sponsored by the Radio & Television Executives Society.

The meeting, held in New York, was attended by representatives of organizations which sponsor the Peabody, Emmy, Broadcast Pioneers, Ty Guide and Ohio State U. awards, among others. The group agreed to make a preliminary study of the radio-tv awards situation in search of "ways and means to increase the prestige and importance of awards given in recognition of unusual skills and achievements."

This was generally interpreted to mean that the consolidation of some awards may be encouraged.

The study was proposed by Matthew J. Culligan of Interpublic Inc., president of RTES, who initiated the meeting. RTES, which ended a four-year association with the Peabody awards last April, had planned to issue its own awards in the future, but deferred these plans 10 days ago (Broadcasting, Aug. 7). At that time Mr. Culligan said RTES "would like to better the awards situation in the broadcast business."

Those present at last Thursday's meeting were Dr. Keith Tyler, Ohio State U; Dean John Drewry, administrator of the Peabody awards for the U. of Georgia; Robert Levine of CBS films, president of the Academy of Television Arts & Sciences (Emmy awards), and Ben Grauer of NBC, academy vice president for New York, which makes local awards; Charles H. Tower of Corinthian Broadcasting Co., representing President Leroy Collins of NAB; Mary Walker, past president of the New York chapter of American Women in Radio & Television, representing Montez Tjaden of KWTV (TV) Oklahoma City, national president of AWRT, which is associated with McCall's Golden Mike Awards; Gordon Gray, WKTV (TV) Utica, N. Y., national president of Broadcast Pioneers; John F. White, president, National Educational Television & Radio Center; James Quirk, publisher of Ty Guide, and Charles Alcoate, publisher, Radio-Television Daily.

RTES representatives with Mr. Culligan were Sam Cook Diges of CBS Films, RTES vice president and awards committee chairman, and Claude Barrere, executive director.

Why WICE, Campbell-Ewald?

Cynics might suppose Campbell-Ewald airs its automobile commercials over WICE only because the agency's good client and WICE annually co-sponsor the Providence Soap Box Derby. But not smart cynics. Truth is, civic-minded WICE is a trusted public spokesman people listen to hard. People who buy cars, for example.

So, if you're buying Providence radio, buy it like the wise ones at Campbell-Ewald. Count heads and ears as well as noses. The smart money is on WICE.
MCA ACQUISITION

‘Jack Benny’, ‘Checkmate’ plucked off in J&M Deal

Music Corp. of America reached agreement last week to acquire all the outstanding capital stock of J&M Productions Inc., a Los Angeles tv production company. MCA, through its Revue Productions Div., is already one of the biggest program producers on tv. Among other activities, the company also is the nation’s largest talent agency, and through MCA-TV, a major tv program package and distributor.

Last season, J&M productions, which is owned by Jack Benny, produced Checkmate and The Jack Benny Show, on CBS-TV. Both programs were filmed at MCA’s Revue Production studios in Hollywood. MCA also is personal talent representative for Mr. Benny.

The addition of the Jack Benny and Checkmate programs to the MCA fold, brings to 10 the total number of shows the giant talent agency will produce or co-produce for tv next season. They are: Wagon Train (NBC), Alfred Hitchcock Presents (NBC), Leave it to Beaver (ABC), G. E. Theatre (CBS), Laramie (NBC), Ichabod and Me (CBS), Tall Man (NBC), and Tales of Wells Fargo (NBC). The agency also acts as selling agent for My Three Sons (ABC).

MCA said the agreement with J&M Productions calls for payment in common stock of an amount equal to about 1% of its common stock outstanding.

According to the latest figures taken from the New York Stock Exchange, the purchase price would total $2.5 million, since MCA’s outstanding common shares amount to $63 a share asked.

Despite its costly acquisition, MCA was never in better financial condition. The company’s semi-annual report released last week revealed that for the first six months ending June 30, 1961, unaudited net earning reached a record level, and was approximately 21% in excess of the 1960 first six months.

Earnings before taxes for this year’s first six month period were $7,789,376, compared with $6,515,547 last year. Net income for the first two quarters of 1961 was $3,786,196, compared with $3,129,447 in the same six-month period in 1960.

Ziv-UA releases third show for fall

Ziv-UA released for sale last week a third tv series for near simultaneous fall starting dates. The announcement of Everglades, starring Ron Hayes as Everglades (Fla.) County Constable Lincoln Vail, was preceded by the release of King of Diamonds and Ripcord.

M. J. (Bud) Rifkin, Ziv-UA executive vice president in charge of sales, said last week that normally the company’s syndicated productions are released for viewing at spaced intervals of two or three months, with occasionally a pair opening at the same time.

Program notes...

New production outfit • Richard Gliss, NBC-TV producer-director announces the formation of a new tv packaging firm, Seven League Productions Inc., N. Y. Miss 1962, a tv-oriented beauty contest, is being prepared for weekly syndication and reportedly has been optioned by stations in seven major markets. SLP’s headquarters are at 550 Fifth Ave.

Kangaroo court • Land We Love, a 60-minute agricultural series presented by WJRT (TV) Flint, Mich., portrayed July 23 a mock trial with “farm safety” as the subject. Purpose of the program was promotion of Farm Safety Week which began the date of the telecast.

Joins series • A third CBS-owned tv station, KMOV-TV St. Louis, following the lead of WBBM-TV Chicago and WCBS-TV New York, is now presenting a biweekly appraisal of newspapers and magazines. The St. Louis series is called KMOV-TV Views the Press, and is telecast every other Sunday, 12:30-12:45 p.m. CDT. In Chicago, a similar series was first seen in the spring of 1960 on WBBM-TV and another began in New York about six months ago.

Brown to tv • Jim Brown of the Cleveland Browns, leading ground gainer in the National Football League and a member of Pepsi’s marketing department since 1959, will star in a weekly radio series produced by Bob Carr of the Cleveland office of BBDO, Pepsi’s agency. The five-minute recorded sports program is being offered for sponsorship to Pepsi-Cola bottlers for local stations.

New headquarters • Wolper Productions, Hollywood, has moved to larger quarters at 8720 Sunset Blvd. The move is in anticipation of the expected tripling of the firm’s 41-member staff within the following month.

Ullman becomes radio’s ‘jingle king’

Richard H. Ullman Inc., major distributor of jingles and radio station program and production aids, has become exclusive sales representative of Commercial Recording Corp. of Dallas. CRC, which had handled its own sales, has produced such station identification jingle packages as “Sing Along,” “The Sound of Good Music” and “Radio USA.” (CLOSED CIRCUIT, Aug. 7).

RHU, a subsidiary of The Peter Frank Organization, is also distributor of “The Big Sound” and “Formatic Radio,” produced by Stars International, another PFO division; IMN Jingles, Ev Wren Jingles and Target Jingles. Ullman also is sales representative of Spotmaster tape cartridge equipment. Ullman has opened a new sales office at 3200 Maple, Dallas, in addition to those in New York and Los Angeles.

Arrangement was announced by Peter Frank (left), president of RHU and PFO, and John C. Coyle (right), head of CRC as Marvin Kempner, executive vice president of Ullman, looks on. Mr. Coyle is also president of KVIL-AM-FM Dallas.
A GROWING FOLLOWING FOR TV MOVIES

Pulse survey in N.Y. reports increase in two-year span

More people are watching more television movies according to a survey taken in the New York area by The Pulse Inc.

In an average week, the survey showed, 84% of New York's tv viewers watch a movie compared with 69% in 1958. New Yorkers, however, are not spending any more time watching movies than they did in 1958 with 62% spending the same amount of time and the remaining 38% equally divided between more and less watching.

Biggest reason for the rise, according to Laurence Roslow, associate director of The Pulse, is "better movies." Most people, he said, didn't care how old the picture is but they wanted to know what it's about and who the stars are.

The complete results of the survey:

Kaltenborn award

H. V. Kaltenborn, radio commentator, has donated $500 as an added incentive to radio writers and producers from 34 colleges competing in the year long "National Radio Contest in Work for the Blind." The Kaltenborn Award will be presented to the writer of the best half-hour radio program dealing with problems and potentials of the blind. The American Foundation for the Blind, contest sponsor, will present 12 additional prizes of $200 each to the runners-up.

New chapter

The executive board of the Screen Directors International Guild has issued a charter to the Florida Director's Organizing Committee, in answer to a request from a group of SDIG members representing directors active in filmed tv dramas, spot commercials and theatrical features. The organizing group has 12 members, with some 20 more slated to join the Florida branch.
Embassy, Filmways plan feature-pilots

Embassy Pictures Corp. and Filmways Co., both New York, together will produce two motion pictures which will also serve as pilots for projected network tv series. One of the films will be based on the exploits of Hercules, demigod of Greak mythology known for his strength. Two previous movies about Hercules have already reaped approximately $25 million in theatre box office receipts for Joseph E. Levine's Embassy Pictures.

Mr. Levine and Martin Ransohoff, president of Filmways, have announced that shooting will start this fall in Europe on both films. They said a worldwide search is underway to find an actor to play Hercules, while Rory Calhoun has already been signed to star in the other film, entitled "Capri." Mr. Calhoun's Calvic Corp. will co-produce "Capri" with Embassy and Filmways. John Calley, recently appointed vice president of Filmways, was named producer of the "Hercules" venture.

"Hercules" and "Capri" will be released theatrically in the world market prior to the distribution of the tv series. Mr. Ransohoff said the two adventure series would each be an hour long, but that the pilots would be 72 minutes in length and would be used to kick off the series as 90-minute introductory shows if and when the series are set for a network run. Negotiations with all tv networks are underway.

The new venture is Mr. Levine's first tv entry. Filmways has produced tv shows and commercials about 10 years.

Project III Enterprises schedules two pilots

Project III Enterprises, independent packager, which two months ago agreed to create and produce six tv series for MGM-TV (Broadcasting, June 19), has announced pilots of its first two series will be filmed in October.

The series are All That Jazz, a situation comedy, and The House of 7, a drama-action show. The latter is to be produced in association with the Phil Silvers-owned Tranan Productions. Both are hour-long and targeted for the 1962-63 season. In addition Project III is developing a third-hour-long series called Jeopardy, an anthology based on stories by noted authors.

Project III Enterprises is headed by motion picture director Blake Edwards, and by two former Music Corp. of America executives, Freddie Fields and David Begelman.

GAC to produce 'Miss Teenage' for tv

General Artists Corp., which last month reactivated GAC-TV as an entry in the tv packaging field (Broadcasting, July 31), has contracted to produce the Miss Teenage America pageant for network tv presentation on Oct. 19. Contest officials say that time period, network and sponsor for the special program are still being negotiated, but indicate the finals of the pageant will be sponsored by a major cosmetic firm in an hour-long, prime-time telecast originating from the Texas State Fair in Dallas.

This is the first year the contest is being held. Its purpose is to select a teenage girl—between 13 and 17 years of age—who personifies the "whole-some" and "vital" qualities of American youth (and without judging in bathing suits). The contest begins in August on the local and regional level, with the winner of the national finals sharing in $100,000 worth of prizes and a four-year college scholarship.

According to a spokesman for the Miss Teenage company, the local contests, to determine "Miss Hometown Teenager," as well as the finals from Dallas, will be sponsored by regional advertisers in some 100 radio markets throughout the U.S. Reportedly several major department stores are included among the regional advertisers. They are Sennelbourg on WIP, Philadelphia, Shillito's on WCPO Cincinnati, Richards on WFUN Miami, Maurice Cohen on WCAO Baltimore, and Halley's on WHK Cleveland.

The radio broadcasts of the local contests start today (Monday). GAC will not be associated with the radio broadcasts.

Miss Teenage America Inc. is a newly formed company with offices at Southland Center, Dallas, Tex., and 97 Lexington Ave., New York.

Landau gets O'Neill rights

Ely A. Landau, former board chairman of National Telefilm Assoc., New York, has formed a new company which has been granted a series of options on television and motion picture rights to all dramatic properties of Eugene O'Neill controlled by the playwright's widow, Mrs. Carlotta Monterey O'Neill. Mr. Landau said his initial projects will be in the motion picture field, but hopes to become active in tv as soon as his film plans are developed more fully.
INTERNATIONAL

NGERIAN URGES BETTER U.S. FILMS

Warms some current imports are undermining our image

Nigerian television viewers have a crime-and-cowboy image of the U. S., according to a report last week on Africa's first tv station, WNTV in Western Nigeria.

Nigerian Minister of Education Chief Emanuel A. A. Fadayiro, who will be in New York until Aug. 17 to inspect radio and tv facilities as part of his current State Dept.-sponsored U. S. tour, expressed his country's need for programs that would not only "correct" Nigerian thinking about America, but which also would help to speed "economic development, political unity and educational enlightenment."

Chief Fadayiro explained at a news conference last week that Western Nigeria in 1959 "invested a large amount of scarce capital" to establish WNTV in Ibadan, Western Nigeria. Its three transmitters cover an area of 4,000 square miles with a population of 3 million, including the federal capital of Lagos. The commercial outlet's six hours of programs daily are viewed on approximately 10,000 sets, but the Nigerian official pointed out that each set has an average viewership of 20-35 persons.

"The greatest weakness in our programming at this stage is a lack of good material," Chief Fadayiro charged, criticizing U. S. programs in particular. He said: "Our production funds are limited, and our programming depends largely on antiquated and inferior American filmed shows. Nigerians are learning a great deal today about crime and cowboys. That, unfortunately, is our image of America."

The minister expressed the hope that responsible foreign governments would give some thought to including good broadcast material along with capital grants to underdeveloped countries. He said that in his country's broadcast media particularly, where set ownership is limited largely among the political and economic leaders, the broadcast message has an influence far out of proportion to the actual number of sets.

Shows Seen • Among the U. S. shows carried by WNTV: Blue Angels, Loreta Young, Sgt. Preston, People Are Funny, Medici, 77 Sunset Strip, Laraine, President Kennedy's Press Conference, Liberace, Tombstone Territory, Topper, My Hero, Fibber McGee and wrestling.

The station's program commercials, with rare exceptions, are all in English (the accepted language in Nigeria), Chief Fadayiro stated. A 60-second spot costs $33.60 and sponsorship of one-hour costs $134.40.

WNTV's advertisers include: Air France, Guinness Export, Lux, Willys Jeep, Pepsi-Cola, Kent cigarettes, Beech Nut baby food, Necchi sewing machines, Ajax, Bendix washing machines, Norge refrigerators, Pontiac, Ford, and Hoover vacuum cleaners. None of the station's newscasts is sponsored as a matter of policy.

Comparing Africa's programming functions with the U. S., Chief Fadayiro said that while U. S. radio and tv are mainly intended to uplift and amuse, the "big job in Africa is to instruct our people in such basics as health, sanitation and nutrition. We don't really need Pagliacci when they are dying of pellagra."

Third German tv hookup not expected till 1964

A third tv network will not be available in West Germany before 1964, the Bonn Government announced. The Third Network will operate in the uhf band and it will be used by regional public-institution broadcasting organizations to be supervised by local (Lander) governments.

The delay stems from a shortage in manufacturing capacity in West Germany. The German Postal Ministry is currently trying to complete its first network of 82 transmitters in the vhf and uhf bands, covering 99% of the German population. This network will be completed, according to current plans, by 1962.

To get an early start for the Third Network the German Ministry plans to slow down construction of the Second Network. The latter is already on the air on a regular basis in uhf bands. It is operated by existing local broadcasting organizations. Uhf transmitters "saved" from the slowdown of the Second Network will be hooked up to the nucleus of the Third Network. Political problems are involved in the introduction of the Second and the Third Networks and delays may come, partly, from this angle.

ABC, Japanese tv reach agreement

An agreement providing for closer television broadcasting ties between the U. S. and Japan is expected to be announced formally this week by Donald W. Coyle, president of ABC International Television Inc., Hiroshi Okawa, president of Nippon Educational Television Co. of Tokyo and Shinzo Takanashi, president of Mainichi Broadcasting Co. Ltd. of Osaka.

ABC International's agreement with

Turnabout

CHFI-FM Toronto, will request permission to build a 50-kw daytime am radio station at Toronto when the Board of Broadcast Governors meets Aug. 22 at Ottawa, according to CHFI-FM board chairman E. S. Rogers. He said CHFI-FM hopes to use the am station to promote its fm programs. CHFI-FM would carry the same programs on its am affiliate. CHFI-FM recently received a power boost to 200 kw. The station unsuccessfully opposed CFRB-FM Toronto's applications to program separately from its am affiliate and for a power increase to 200 kw. Toronto am stations are expected to oppose the application for an am license by the city's sole fm-only station.
The role of radio-tv in Communist Russia

Television and radio have been assigned influential roles in Russia's new program for communist advances in the next two decades. The 183-page, 50,000-word draft program of the Soviet Communist Party, made public a fortnight ago, says "the largest facilities"—radio, television and motion pictures—"will be widely used in schools" as part of a system of "high-standard instruction and education of the rising generation." Radio and tv, along with press and cinema, also are characteristic as having "an important part" in "the molding of the new man" of Russian communism, according to the program.

The wide-ranging document reports that "all means of communication . . . will be further developed" in the coming years; that "all regions of the country will have reliable telephone and radio communications and a link-up system of television stations," and that "the country-wide radio diffusion network will be completed [and] television stations covering all industrial and agricultural areas will be built."

British tv ad tax increased to 11%

Britain's Chancellor of the Exchequer Selwyn Lloyd has announced that the tax on tv advertising will be increased by 10%, bringing the over-all tax to 11%, as a part of the United Kingdom's economic emergency measures.

A comment from the British Institute of Practitioners in Advertising was "The increase means an additional dead-weight on the cost of distribution, and as such is still of a burden."

An Advertising Assn. spokesman said, "The most that can be hoped for is that the chancellor will reconsider the tv tax after the Pilkington Committee Report."

Abroad in brief...

Pay-television • Canada's newest community will have pay-television in October. A mining town is now under construction at Thompson, Manitoba, 200 miles northeast of Flin Flon, Man., inaccessible at present by road. The population of this nickel mining town will be around 8,000. Canadian General Electric Co. Ltd., Toronto, Ont., is supplying the closed circuit pay-tv system with two vidicon cameras, two film projectors, a slide projector, tape recorders, sync generators and switches. This will permit the station to transmit its own live programs and locally-produced film shows. Operator of the system is Canadian Engineering Surveys Ltd., Edmonton, Alta., which will provide 8 hours daily of tv entertainment on one channel and continuous music on another. All receivers will be connected in this new town by a cable system.

Rep added • CHVC Niagara Falls, Ont., has appointed Alex Bedard & Co. Ltd., as its Toronto, Ont., representative, with the Montreal office of Lorrie Potts & Co., continuing representation in that city.
FATES & FORTUNES

BROADCAST ADVERTISING

Duane C. Bogie, account supervisor on Hallmark Cards, appointed vp of Foote, Cone & Belding, Chicago. Group supervisors John E. O’Toole, John B. Rand and Donald B. Williams were also named vp’s.

Cherie Lee, associate creative director of Chicago office of McCann-Erickson, appointed vp. Before joining agency three years ago, Miss Lee was senior copywriter at Earle Ludgin & Co.

**PROGRAMMING**

Joel Chaseman, executive on programming staff, Westinghouse Broadcasting Co., New York, appointed to newly-created post of general manager, PM East and PM West.

Robert Emmett Ginna Jr., formerly associate editor, Horizon magazine, New York, named vp, Sextant Inc., that city, tv and motion picture production company.

George Hankoff, formerly with national and syndicated sales departments, Screen Gems, New York, elected sales vp of newly-established distribution company, Fountainhead International.

Henry T. Sjogren, formerly assistant general manager, WNBQ (TV) and WMAQ-AM-FM Chicago, named director of communications, Troy-Beaumont Co., film production and communications consultants.

Robert Bruce Hicks, formerly with Jam Handy Organization and Wilding Inc., both Chicago, named director of sales for central division of MGM’s commercial and industrial division, Chicago.

John Dunn, staff writer, NBC-TV’s Today show, named editor.

Louis E. Miller, formerly with Wilding Inc., Chicago, tv commercials producer, joins Atlas Film Corp., Oak Park, Ill., as production manager of slidefilm division. Atlas also is producer of tv commercials and slides.

**EQUIPMENT & ENGINEERING**

Arne Schleimann-Jensen, technical assistant to chief engineer, Sylvania Electric Products, Mountain View, Calif., appointed manager, product engineering for microwave device operations for Sylvania.

Francis J. Dunleavy, general manager, Industrial and Automation Div., RCA, New York, appointed general manager, Communications and Controls Div. He succeeds John J. Graham, recently named to newly created position of division vp, operations, RCA Electronic Data Processing Div.

Gerald G. Griffin, formerly head of new products marketing activity, distributor products department, RCA, New York, appointed to newly-created post of marketing director, TelePrompTer Corp., that city.

Al Josephsen, 40-year veteran who retired last year as RCA sales engineer in New York, is now residing in Fort Myers, Fla. Mr. Josephsen began in radio with American Marconi Co., predecessor of RCA in 1919. His entire subsequent career was with RCA Broadcast Equipment and he is holder of RCA’s award of merit for Empire State Building tv antenna design and installation.

Joseph K. Kaleba, formerly engineering supervisor of Controls Company of America, manufacturer of electronic components, Chicago joins Shure Bros., Evanston, Ill., manufacturer of mikes and other communications and high fidelity equipment, as manager of product design and specifications section.

Sidney Harman, executive vp of Jerrold Electronics, Philadelphia communications systems producer, elected president and chief executive officer. He succeeds company’s founder, Milton J. Shapp, who remains chairman of board of directors. Mr. Harman was president of Harman-Kardon, manufacturer of high fidelity instruments, when company merged with Jerrold last February 28.

George R. Freifeld, sales representative with Audio Devices, New York based manufacturer of sound recording equipment, named Mid-Atlantic sales manager of new Washington sales office. Assisting Mr. Freifeld will be Andrew Rice for Washington and Baltimore and Albert Rader for Philadelphia.

Charles Cadley, assistant manager, network transmission facilities, CBS-
Earle Anthony, broadcast pioneer, dies

Earle C. Anthony, owner-president of KFI Los Angeles and one of the pioneers of broadcasting in America, died Aug. 6. He was 80.

Mr. Anthony put KFI on air in 1922, one of first radio stations on West Coast. In 1929 he added KECA, initials commemorating three generations of Anthony's—"K" for Kelly, his son, "E" for Earle, "C" for Charles, his father, and "A" for Anthony. In 1944, following FCC order forbidding ownership of more than one station in single community, KECA was sold to ABC, which renamed it KABC. In 1948, he launched KFI-TV, ch. 9, but sold it three years later to Don Lee. It is now KHJ-TV. Active in broadcasting industry affairs from start, Mr. Anthony served two terms as president of NAB in days when that was an honorary elective position.

Born Dec. 18, 1880, in Washington, Ill., Earle C. Anthony moved to Los Angeles with his family in 1892, graduated from grammar school and Los Angeles High School, attended U. of California at Berkeley, where he founded The Pelican, pioneer college humor magazine which is still going strong today, and, after getting a degree in mechanical engineering there, went east to Cornell where he earned degree in electrical engineering.

Name of Anthony is as prominent in West Coast automotive field as in broadcasting. In 1904 he became automobile distributor, handling many makes of cars, both American and foreign built.

His wife, Irene Kelly Anthony, died in 1954. Their son, Kelly, former KFI executive, now retired, survives.

KFI broadcast services for Mr. Anthony Thursday at 12:30-1 p.m. and was silent from 1 to 4 p.m. that afternoon while his funeral was held at Forest Lawn, Los Angeles.

Mr. Anthony

DEATHS

Dr. Claude Everett Robinson, 61, founder and chairman of executive committee, Opinion Research Corp., Princeton, N. J., died of hepatitis Aug. 7 in Columbia-Presbyterian Medical Center, Stockton, N. J. Dr. Robinson was board member of Gallup & Robinson, advertising research company he founded with Dr. George Gallup in 1948.

Frances Holmes, 85, believed to be first woman to own and operate advertising agency in United States, died Aug. 7. Miss Holmes, residing in Los Angeles since 1885, went to work for city's pioneer advertising agency, J. C. Newitt & Co., in 1896. She founded her own agency there in 1909, accomplishment for which Los Angeles Advertising Women have honored her by naming their annual achievement awards for her.

Andrew Mercier, 49, manager, plant operations, CBS-TV Building Services, died Aug. 6 in boating accident near Long Beach, N. Y.

Max H. Aronson, 70, attorney in renewal branch of FCC, died of heart attack in Washington Hospital Center Aug. 7. Mr. Aronson had been with FCC since 1934. Earlier he had practiced law for 11 years.

A GENERAL ELECTRIC STATION

ALBANY • SCHENECTADY • TROY
A good time was had by all

When Blair-TV assumed representation of KOA-TV Denver in July, the station and the rep firm invited New York media buyers and officials for a day of fun, including rides on the carousel and Good Humor ice cream. Approximately 80 agency staffers showed up at a parking lot in mid-Manhattan for the occasion. Dick Harris (extreme left), sales manager, KOA-TV and Bill Vernon (right center) of Blair-TV were uniforms provided by the Good Humor Corp. and served as hosts. Shown (l. to r.) are Mr. Harris; Lou West, Gumbinner Adv.; Al Kalish, Foote, Cone & Belding; Barrie Alley, Benton & Bowles; Mr. Vernon; Bob Jones and Paul Halpren, both Benton & Bowles.

S.F. broadcasters take show on the road

A traveling radio roadshow presentation of the San Francisco Radio Broadcasters Assn. starts a cross-country tour this week. The 17-minute color slide film—put on the road by support of 10 stations in San Francisco which make up the organization—was previewed in New York last week for newsman and the stations’ sales representatives. It will be shown to advertisers and their agencies also in Chicago, Detroit and Philadelphia this week following the initial showings made in San Francisco and Los Angeles on Aug. 9-11.

A year ago, SFRBA supported a traveling tour that featured five competing station managers as part of a campaign to foster the radio image, extoll that west coast market and counter intra-market rivalry. Heading the 1961 presentation, called “The Best Way Around in San Francisco” is Homer Odom, KABL vice president and the association’s president. Stations involved: KABL, KCBS, KLIA, KEWB, KGO, KFRC, KNBC, KSAN, KSFO, KYA.

Newsmen fail to get story on nudist meet

When two members of the news staff of KVAL-TV Eugene, Ore., turned prude, changed their mood and failed to shoot the nude, the station was deprived of one of its most interesting feature stories in recent years.

Keith Gebers and Will Trumbull had arranged to film the crowning of a nudist queen at a recent sunlover’s convention there, complete with long shots, peek-a-boo shots, head and shoulder shots and plenty of e ceteras.

When the time came the two, hauling various equipment, were ushered into the woodland paradise, given preferential treatment and were about to begin filming when their guide told them where to hang their clothes.

The story abruptly ends at this juncture as the courageous newsmen figured it was not worth it to be caught with their pants down, literally, story or no story.

Drumbeats...

Unanswered • WSB-TV Atlanta’s summer Challenge series, a program offering new, experimental and creative ideas in local production and programming, has gone unanswered in its invitations to two area professional television critics to produce the “ideal program.” Alan Patureau, Atlanta Journal, and Paul Jones, Atlanta Constitution, were invited to develop their own half hour shows with facilities provided by the station. Both critics expressed interest but declined the invitations.

Neighbor awards • KVFD and KQTV (TV) Ft. Dodge, Iowa, have established a “Good Neighbor” award to be presented to individuals in the area for special efforts. The first “Good Neighbor” citation and gold medal was presented to a man who leaped into the Des Moines river in a vain attempt to save the life of a seven year old boy.

WCCO-TV’s army • Twenty officers and men of the 360th Psychological Warfare Co., an Army Reserve organization based at Fort Snelling, Minn., have spent their annual two weeks active duty training in the studios of WCCO-TV Minneapolis-St. Paul. Charged with the mission of supervising operation of communications media in a liberated or occupied area when mobilized, members of the unit have participated in several special projects set up by the station to give them a greater knowledge of the intricacies of a broadcast organization.

Radio outing • More than 27,000 listeners of WPOP Hartford, Conn., gathered at Riverside Park in Agawam, Mass., three weeks ago in what WPOP claimed to be the largest outing ever held by a radio station. At the “All Family Outing,” a three-year-old station tradition, 45,000 hot dogs and 50,000 bottles of soda were distributed free to guests.

Awareness • WJXT (TV) Jacksonville, Fla., has published its second annual report on its offerings in the areas of news, cultural, public affairs and documentary programs in a 20-page booklet called “Awareness.” Some 1,225 hours were devoted to this type of programming in 1960, WJXT says.

Big pitch • KABL San Francisco is mapping plans for what it terms one of
the biggest promotions ever undertaken by a Bay area radio station. To promote its good music programming, the station has purchased 70 10-second ID's on KPIX (TV) and KTVU (TV), both San Francisco, and seven 1500-line, two color ads in the San Francisco Chronicle and Examiner. Television spots will continue for several weeks at a reduced schedule. KABL says it plays 86 billion microseconds of good music every day.

'Go Get 'Em Braves' • Earl Gillespie, sportscaster for WEMP Milwaukee and voice of the Braves network, is the narrator of a new LP album entitled, 'Go Get 'Em Braves.' Gillespie is heard describing no-hitters by Jim Wilson, Warren Spahn and Lew Burdette as well as other action highlights since the historic shift of the National League franchise from Boston to Milwaukee in 1953. The 12" hi-fi LP is available through outlets of the radio broadcast sponsor, Miller High Life.

Series promotes farm shows

Promoting radio farm programs, the latest in a series of promotion spot announcements in the NAB's "Build Radio With Radio" campaign is being offered member stations. The series is the 16th in the campaign. The choice of farm program promotion was based on its high standing among preferences received by NAB from member stations. The series contains 17 announcements of varying lengths. The announcements are so written that stations can personalize them if desired by inserting the name of their farm director and calling attention to various farm-interest programs. The series were prepared by NAB's public relations service.

Super salesmen

WCNS Canton, Ohio, almost went 'into the appliance business during a recent promotion.

The station promoted a three day boxcar sale at trackside of Amana and Maytag appliances, with a 43½ hour remote campaign that lasted three days.

A total of 122 appliances was sold, with WCNS announcers personally selling six of them. According to a survey of the purchasers, 75% of them said they were prompted to come to the boxcar sale by spots heard on WCNS.

TvAR goes to the 'Summit'

Television Advertising Representatives Inc., New York, went to the Summit Aug. 1 to introduce socially its three recently acquired TV stations to a regiment of agency timebuyers. The scene of the elegant meeting was the ballroom of New York’s first new luxury hotel in 30 years, the Summit (located on Lexington Ave. in midtown Manhattan).

TvAR hosted some 500 agency guests at the ballroom’s inaugural event, a party to welcome WTOP-TV Washington, D. C., WBTV (TV) Charlotte, N. C., and WJXT (TV) Jacksonville, Fla. The stations were formerly represented by CBS-TV Spot Sales. TvAR, in the past, has repped only the five TV stations of the Westinghouse Broadcasting Co.

More elaborate guide

The compact WFMT Fine Arts Guide that WFMT (FM) Chicago has published each month and sold for 50c a copy to 25,000 listeners, has proved so successful the station is replacing it with an even more elabo.
rate publishing venture. Beginning in October, WFMT will offer an 84-page illustrated magazine with an enlarged 8½ by 11 inch format, titled *WFMT Perspective*. Initial run will be 50,000 copies. The magazine will contain essays, symposiums of well-known U. S. and foreign authors and thinkers, plus a general cultural preview of city activities and the station’s schedule.

**Pepsi-Cola for muchachos**

In what was said to be one of the largest radio buys of its kind, the Metropolitan Bottling Co. of New York, bottler and distributor for Pepsi-Cola, is investing an estimated $30,000 to sponsor a 52-week *Record Hop* over WADO New York to reach the large Spanish-speaking teen-age audience among the area’s Puerto Rican residents. The program originates each Saturday (1-2 p.m.) from a motion picture theater than runs Spanish films. Teenagers in the audience compete in a dance contest for prizes. Charles De Charleroy, vice president of the Metropolitan Bottling Co. of New York, said the program represented the first large-scale advertising effort to reach the growing Puerto Rican teen-age market in the New York area. The program was planned by Mr. De Charleroy and Sydney Kavaler, vice president and manager of WADO in association with the bottler’s agency, BBDO.

**KTLA’s “Declaration of an independent”**

An independent TV station’s “declaration” to agencies and advertisers in New York was unveiled last July 31 and continued through the week. The New York edition of the KTLA (TV) Los Angeles fall presentation followed a week’s run in Chicago.

The presentation, titled “Declaration of an Independent,” told the story of the station’s growth, outlined production, programming and merchandising values, and premiered a cost study. Much of the presentation is devoted to emphasizing both the influence and image of the station in the Los Angeles market.

Attending the “preview” are (1 to r): H. Preston Peters, president of Peters, Griffin, Woodward Inc., national advertising representative for KTLA who is pointing to the “declaration”; Seymour L. (Stretch) Adler, vice president and general manager of the station, and Paul Raibourn, president of Paramount Television Productions Inc.

FOR THE RECORD 103
DOORWAY TO BETTER LIVING

Ever wonder what’s inside? We’ll tell you—there are new TV sets, cartons of baby food, enough toilet articles to stock a small drug store, a shipment of ladies’ dresses, some bicycles, and an assortment of machine parts, to mention only a small part of the load. The hundreds of thousands of other trucks and trailers backing up to unloading platforms all over America are filled with everything you can think of to make life fuller, safer, more interesting for all of us... Yes, these are the doors that lead to better living. And through them passes everything you eat, wear, or use.

AMERICAN TRUCKING INDUSTRY

American Trucking Associations, Inc., Washington 6, D. C.

THE WHEELS THAT GO EVERYWHERE
OUR RESPECTS to Seymour Reed, president, Official Films Inc.
The syndication 'bottom' has 'flattened out'

Seymour Reed, president of Official Films Inc., New York, beams pleasantly when industry acquaintances ask him to explain Official's resurgence over the past 18 months. Frequently, by way of reply, he quips: "The harder you work, the luckier you get."

Mr. Reed would be the first to acknowledge that this is too pat an answer. But he is convinced that Official's climb from the threes of early 1960 can be attributed in part to "the long hours and diligence by the entire staff, from the office boys up." For Mr. Reed, long hours and hard work have been an accepted fact-of-life throughout his business career, but, he says, he was "fortunate to have people around who would work along with me every step of the way."

**Progress Charted** - As accountant and executive counsel by education and experience, Mr. Reed charts Official's financial growth in these terms: in the first half of fiscal 1960-61, ended last Dec. 31, the company showed a profit of $92,000, as contrasted with a pre-tax loss of $1.5 million for the corresponding period of fiscal 1959-60. Figures have not been compiled for the entire fiscal 1960-61, but Mr. Reed's projection is that the balance sheet will show "substantial improvements in both gross earnings and profits."

Why the turnaround? Mr. Reed explains the answer is tied up with the field of tv film distribution as it has emerged over the past three or four years. "You must remember that tv film syndication has been suffering for three or four years, largely because the market was glutted with programs," Mr. Reed points out. "The market was a strong one for buyers. Stations had so much to choose from that they could pretty well control prices."

When Mr. Reed assumed the presidency of Official Films in February 1960, he realized that the key to success was to "give stations and their viewers what they wanted and what was not easily available."

**Right Climate** - The climate was appropriate in 1960 for informational type programs. The growing popularity of the network documentary and other news-in-depth programming attracted Mr. Reed's attention and persuaded him that local stations would be amenable to syndicated films of an informational nature. Official developed a cluster of programs that fit this format—*Almanac*, 377 five-minute episodes dramatizing an historical event on a particular day of the year; *Greatest Headlines of the Century*, 260 five-minute segments relating important news events, and *Portfolio*, 260 one-minute episodes re-enacting thrilling moments in the world of sports.

"We have had wonderful acceptance of these programs, at home and abroad," Mr. Reed comments.

Mr. Reed also foresaw an expanding market for off-network programs. This was understandable because for many years Official had handled for syndication such former network series as *Robin Hood*, *My Little Margie* and *Foreign Intrigue.*

"The depressed status of the syndication field in 1958, 1959 and 1960 led to fewer and fewer first-run syndication films being produced," Mr. Reed notes. "I felt the market was ripe for quality network programs that had attracted an audience. We negotiated for and purchased the rights to such proven properties as Peter Gunn, *Yancy Derringer*, Mr. Lucky and *Wire Service.* Sales on these programs will reflect themselves in the last half of the 1960-61 fiscal year but more importantly for next year."

**'Soft-Sell' Salesman** - Mr. Reed is a tall, soft-spoken man of medium build who projects modesty and solidity. He is not in the rapid-fire, talk-it-up tradition of television salesmen; he could be termed a disciple of the "soft sell." But colleagues stress that although he is not primarily a salesman, he often picks up a telephone and, quietly but persistently, "talks stations and agencies into some of our biggest sales."

His associates point out he is a capable organizer and administrator who rarely is ruffled by the tensions engendered by a highly competitive business. He likes to banter with his subordinate executives and often says in jest, "I don't run them; they run me."

Seymour Reed was born on Aug. 12, 1915, in Mount Vernon, N. Y., and still makes his home in that suburban New York community. He was graduated from Mount Vernon High School in 1933 and attended the New York Stock Exchange Institute in 1933-37.

He worked as an investment analyst for Bache & Co., New York, after completing his studies at the institute. In the evenings he studied accounting at the New York U. School of Commerce. In 1939, he was appointed to head the cost accounting unit for the Third Naval District in New York, and supervised the work of approximately 90 certified public accountants. He remained there until 1945 when he joined the U. S. Internal Revenue Service as an agent for one year. From 1946 until he was appointed controller of Official Films in 1949, Mr. Reed operated his own accounting and tax consultancy firm in New York.

His business acumen soon was recognized at Official. Shortly after joining the company, he was appointed treasurer and in 1956 he was elected executive vice president. In February 1960, he was named president and chief executive officer.

From his long and continuous service with Official, Mr. Reed has learned that tv film syndication is a "high risk" business. The vicissitudes of the industry have been such that today there are few independent syndicators still functioning. (The large bulk of distributors are those attached to a network—CBS Films, NBC Films, ABC Films—or those allied with a strong production company—Screen Gems, MCA-TV or Ziv-United Artists.)

He is proud that Official has withstood the economic assaults of the past few years and, as a financial man, cites this yardstick: "In the past 18 months, Official's stock, traded over the counter, has risen from $1 to about $4."

Mr. Reed is married to the former Florence Blatt of Mount Vernon. They have three children—Phyllis, 18, an incoming freshman at Skidmore College; Carolyn, 14 and Alan, 4. For relaxation, Mr. Reed played bridge at tournaments throughout the country for 25 years, but has stopped.

Both his working days and many of his weekends, he confesses, are devoted to consolidating the gains that Official has made under his stewardship. He is confident that "the bottom" of the syndication business has "flattened out" and companies that have survived will prosper and expand.
Uncensored

HE seminar on broadcast regulation at Northwestern U.
Aug. 4-5 was among the more useful dialogues on that
troublesome subject in recent years. It cannot be said that
any participant disabused another of preconceived views or
that anyone emerged a winner or a loser. It can be said,
however, that the seminar itself was an eloquent argument
on behalf of free speech. The transcript, when finally
published, will be required reading for anyone who wishes to
become informed on the conflict between those who reject
and those who admire government interference in radio-tv.
It was not a case of one side unalteringly lining up against
the other. There were shades of opinion between both ex-
tremes. In this respect the seminar was a healthy departure
from the adversary type of argument that has obtained in
other forums of recent times.
If nothing else, it proved that diversity of opinion is
fundamental in American society. It was the kind of diver-
sity the First Amendment was written to protect.

Much ado about what?
AS REPORTED here last week the Census Bureau is in
a tizzy over preliminary estimates that show a better
than four-point drop in the percentage of U. S. homes
having radios in 1960 as compared with 1950.
Radio researchers are in a tizzy too.
If the 1960 preliminary figure turns out to be right, it
could mean that researchers have been working for the past
11 years with inflated 1950 figures. Or maybe it will be
proved that the figures for both years were right but that
they were measurements of different things owing to differ-
ences in the techniques of obtaining the information.
The latter possibility was raised in a BROADCASTING re-
port last week. There were different questions asked in
1950 and 1960; the definition of a household was changed;
the methods of collecting the answers were different. It is
entirely possible that these differences were the reasons for the
95.7% radio penetration calculated in 1950 and the
91.3% preliminarily estimated in 1960.
It is important, of course, that statisticians finally wind
up with radio figures that are reliable. But we wonder if
it is vitally important to the broadcaster or the advertiser
whether penetration is 91.3% or 95.7%. The fact is that
both radio and television are so near total saturation in this
country that the number of homes without both is of little
practical consequence.
No matter what the final figures show, it is evident that
radio will turn up in better than 90% of all U. S. homes.
And television is within a whisper of that penetration. A
Census Bureau survey last May showed television in 89.4%
of all homes.
Circulation of that magnitude can be considered total.

Dearth of debate
RICHARD L. STROUT, Washington correspondent for
the Christian Science Monitor, reports in a recent article
that debate has almost disappeared from the United States
Senate. "Senators," he says, "would mostly rather make
their big speeches on radio and television."
The Senate likes to be known as the greatest deliberative
body in the world. Yet it is a rarity these days to find sena-
tors in head-to-head debate.
There is a ready remedy for this lamentable situation. All
that has to be done is to amend the archaic rules of either
or both houses of Congress to permit direct broadcasts by
radio and television of their proceedings.
There is plenty of precedent. Several state legislatures
allow broadcast pickups. Even the Senate permits live pick-
ups of committee sessions at the discretion of the committee
chairman. The United Nations sessions are available for
broadcast (and the UN constitutes an international parlia-
ment). Many courts now permit direct pickups, having
learned that microphones and cameras are unobtrusive and
do not disturb the decorum of the court room.
If members of Congress knew that they would be on
camera and live mikes, we predict a new era of Congres-
sional oratory would bloom. The problem of leadership
then would be to keep debate within manageable limits.
One of Mr. Strout's observations—an accurate one, we
can report from personal knowledge—was that visitors to
Washington who hope to see the Senate in action are usually
disappointed. What they anticipate is an historic chamber
filled with serious-minded legislators threshing out, in articu-
late debate, the great questions of the day. What they see,
upon arrival in the Senate gallery, is a virtually empty chamber containing here and there a senator dozing while
one mumbles a prepared speech.
As long as the galleries consist only of transient gawkers,
the Senate does not feel it is really on display. Can you
imagine what would happen if the whole country could
see what was going on?

Earle C. Anthony
MOST of radio's founding fathers were unusual men.
Such a man was Earle C. Anthony, who died last
week at the age of 80.
Earle Anthony was a controversial figure from the day
he started KFI Los Angeles, in 1922. He was president of
the NAB in 1927-28. He was also one of the pioneers in
the automotive field and started the first gasoline station
by putting a canopy over the pumps at a corner location in
Los Angeles. Despite many tempting offers and ill health, he
maintained ownership of KFI from its founding.
"The outstanding characteristic of Earle C. Anthony
was his indomitable pioneering spirit.... He brought to radio a
refreshing zest for life; a never-satisfied feeling of accom-
plishment because there was so much to be done which had
not even been attempted.... His name one day will be
inscribed in Broadcasting's Hall of Fame."
These quotes are not ours. They are from William S.
Hedges, who retired a few months ago as a vice president
of NBC, with which network KFI was affiliated from NBC's
start. Mr. Hedges succeeded Mr. Anthony as NAB presi-
dent. We subscribe to Mr. Hedges' eulogy.
From sign-on to sign-off, Sunday through Saturday, KSTP-TV is **FIRST in audience** in Minneapolis-

SHARE OF AUDIENCE

7 AM–6 PM Monday through Saturday
(Sept. thru Dec. 1959—Monday thru Friday)
Three companies started out on a shoestring. To save string, they agreed to share an enclosed courtyard.

This indeed held down costs, but the courtyard mingling of personnel became highly undesirable. Time was wasted, rumors were rumored, business secrets were stolen. To secrete their personnel, the companies agreed that each would build an enclosed entryway from its building to one of the gates.

Company B built to the middle gate, Company C to the gate on the left, Company A to the gate on the right. None of the three paths crossed.

Show us how this can be done and win an exciting new prize. We're offering several so be sure and tell us what you've already won.

Nothing secret about the people in Washington, D. C. ARB openly proclaims that their TV tuning habits have made WMAL-TV first in the market, 6 PM-Midnight, Monday-Friday. (June '61)
Deintermixture bait

Fondest hope of proponents of deintermixture at FCC is that one or more of eight owners ear-marked for shifts will express willingness to accept uhf if he will be assured of continued operation on his v for specified number of years (seven is suggested by one highly placed FCC source). Assumption is that this would break back of opposition since long-range transition would assure ownership of return of investment and then some.

At deadline last week there was no indication that any one of eight would yield or take FCC bait. Conversely, all signs pointed to maximum opposition, with initial request for extension of time to answer proposed rule-making. (Story page 50.)

Power and Glory sponsors

CBS-TV, after long search, is reported to have found two sponsors willing to underwrite one of TV's most expensive productions of all time-two-hour long The Power and The Glory, scheduled to be carried on CBS-TV on Oct. 29 (9-11 p.m.). Word is sponsors are John H. Breck Co. (hair preparations), Springfield, Mass., through Reach, McClinton, New York, and Motorola Inc., Chicago, through Leo Burnett, Chicago.

Though it would normally cost advertisers about $1 million to sponsor The Power and The Glory for time and production charges, Talent Assocs.-Paramount Ltd., produced drama knowing it could not recoup high production costs (Broadcasting, July 10). It hopes to recoup its investment and make a profit through showing tv production in foreign theaters.

Snowstorm

New York's ticker-tape snowstorms will have nothing on responses FCC will receive on its proposed new program forms. Whereas most rule-making proposals bring delugery comments from individual broadcasters and perhaps NAB as overall spokesman, advance signs are that all shades of stations, plus state broadcasters' associations, will descend upon FCC in outraged opposition to proposal that would not only threaten if not impose censorship but also would saddle every station with what they regard as unconscionable paper work burden. Among state associations which already have oppositions in preparation are Tennessee, Michigan, Georgia and Mississippi.

McGannon's head of steam

Since assuming chairmanship of NAB Research Committee to evolve plan to set up major research project in conjunction with one of leading universities, Donald H. McGannon, president, Westinghouse Broadcasting Co., is moving ahead full tilt to get project airborne. Full membership of his nine-man committee won't be announced for another fortnight but Mr. McGannon already tentatively has arranged for meeting of group in New York in mid-September, to be followed by one in Chicago about month later. He's trying to meet mid-November deadline for implementation of plan to be submitted to NAB board at its January meeting in Florida by NAB President LeRoy Collins.

Some 14 universities already have advanced proposals for participating in project which will cover all phases of radio and tv media by probing underlying trends. Audience rating studies are integral part of project but Gov. Collins has emphasized this does not contemplate "tearing down" existing systems but will get into methodology.

All balled up

Those NBC-TV officials who are arranging World Series telecasts for this October, are sure to be rooting for contending L. A. Dodgers to lose National League pennant. It would save them good deal of adverse publicity and business complications. Reason: This year, series is supposed to open in American League park on Wednesday, Oct. 4. First NL game is scheduled for Saturday, Oct. 7. Catch is that L. A. Coliseum (Dodger's park) has previous iron-bound commitment for that day to U. of So. Calif. football team. Rather than relinquish its wide-audience Saturday telecast, NBC has suggested that schedule be turned around with series opener on Wednesday at NL park. Baseball people are reportedly enraged at idea.

Westerners go broadcasting

Increasing number of small advertisers ($250,000 class), most on west coast, are shifting advertising billings from print and outdoor to broadcasting. Los Angeles Soap Co. through Erwin Wasey, Ruthrauff & Ryan, for its White King product, and Wilshire Oil Co., through Doyle Dane Bernbach, are two examples. Soap firm is taking money from outdoor and investing it in ten western markets, while oil concern is switching its entire $270,000 outdoor budget for 1960 to radio in 1961. Trend was discovered (but not cited) by Bolling Co., station representative, in course of surveying 225 advertisers for sales forecast presentation published earlier this month (Broadcasting, Aug. 14).

Satellite tv odds

Don't hold your breath for global television relays once space satellite communications becomes operational in 1964 (government estimate). Even if it proves technically feasible, overcoming such limitations as adequate satellite power, time differentials, language barriers and differences in technical standards (lines and frames) there would still be cost factor since tv requires much broader band to transmit images and voice than is used in telephone or telegraph communication.

One expert points out that if it now costs $12 for three-minute telephone call to London, using narrow 3,000 cycle band, it would cost about $12,000 for one minute to relay tv sight and sound to London via satellite. Thus 30-minute program relay would run $380,000. Such costs would be justified, it is calculated, only for such special events as coronation of royalty or installation of new Pope. It's pointed out, moreover, that video tape now can be jet-flown from London in four hours and that with space craft of future, time would be cut about one hour.

Big push by Bishop

Media planners might keep their eyes fixed on tv advertising strategy of Hazel Bishop Inc., New York, for two reasons. Company, which returns to spot tv after absence of several years with 40-market splurge (Broadcasting, Aug. 14), is said to be considering network tv program sponsorship next year, and also is one of advertising agencies known to have produced 40-second spot for possible use in its upcoming campaign. It has not definitely scheduled 40-second commercial but may place it into markets where company wants extra push. Agency: North Adv., New York.

Hang up your gun, pardner

Of next season's new shows, tv networks appear to be pinning "white hopes" for "hits" on non-violence programs series. For example, ABC-TV concedes its top entries are Ben Casey and Bus Stop; CBS-TV emphasizes its expectations for Defenders, and NBC-TV is especially high on DuPont Show of the Week. Not one of these programs is shoot-em-up type.

Published every Monday, 93rd issue (Yearbook Number) published in September, by Broadcasting Publications Inc., 1735 DeSales St., N., W., Washington 6, D. C. Second-class postage paid at Washington, D. C., and additional offices.
A because Atlanta is different from Milwaukee...

and because people are different in different markets... Storer programming is different! We put together a flexible format to fit the needs of the community... making it local in every respect. That's why Storer Stations are liked, watched and listened to—why they rate high in the 9 key markets where they are located*. Local programming—quality-controlled—assures you the best is being presented. You know you’ve made the right buy when you buy a Storer Station. Storer representatives have up-to-the-minute availabilities at their fingertips. *WITI-TV now leads in prime time.

Important Stations in Important Markets.
The “minute-man” sponsor who buys network participation spots is heading toward an all-time high. Right now it looks about $3.8 million a week in these spots. Representatives take a very dim view of all this. See . . .

**NETWORK SPOT RECORD HIGH . . . 23**

Big things are happening in the Southwest. Big, booming Texas has shed its chaps and is developing new scientific industries and fabricating. A brand new market of 10 million people with money to spend has arisen. See . . .

**TEXAS OF THE 60’s . . . 59**

An old trouble-maker arises again—hard liquor advertising on radio and television. This time it’s Publicker, Philadelphia distiller, testing both media. NAB claims code and member stations aren’t accepting it. See . . .

**LIQUOR ON RADIO-TV . . . 34**

The newest thing in ratings—a full nationwide service by Arbitron, providing overnight national reports starting Sept. 24. Audience-size information to be supplied for a period of 26 weeks, plus daytime ratings. See . . .

**ARBITRON RATINGS EXPANDED . . . 32**

Georgia broadcasters are unhappy because NAB President LeRoy Collins has declined an invitation to take part in seven-state seminar on regulation, according to H. Randolph Holder, president of state group. See . . .

**BROADCASTING**

The businessweekly of television and radio

Published every Monday, 53rd issue (Yearbook Number) published in September by Broadcasting Publications Inc. Second-class postage paid at Washington, D. C.

Subscription prices: Annual subscription for 52 weekly issues $7.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for Canada and $4.00 for all other countries. Subscriber’s occupation required. Regular issues 35 cents per copy, Yearbook Number $4.00 per copy.

Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1725 DeSales St., N.W., Washington 6, D. C. On changes, please include both old and new addresses plus address label from front of magazine.

**BROADCASTING, AUGUST 21, 1961**
Frankly, it's easy on WINS, and we deliver far more than you imagined. Not just New York City, but 24 counties in 3 states surrounding it. Not just homes and offices, but over 2,800,000 cars on the road, as well. Over 17 million people of all ages, interests and incomes whose annual purchases equal those of the next 3 markets combined. Examples? Over 6 billion on food, 2 billion on apparel, 2½ billion on cars and automotive products. Yes, you buy all this when you buy WINSland, the mammoth market reached by Radio WINS.

And summer brings you an extra bonus: 1 million radio-equipped boats that rely on WINS for official offshore weather and marine reports. Buy WINS to sell New York. It's as simple (and profitable) as that.
Examiner would lift KLFT's license

Charging that Leo Joseph Theriot, licensee of KLFT (1600 kc, 1 kw) Golden Meadow, La., repeatedly violated FCC rules and lied under oath, Hearing Examiner Jay A. Kyle recommended Friday (Aug. 18) that KLFT's license be revoked.

Revocation proceedings were instituted against station last January on grounds licensee had misrepresented statements to commission, had violated numerous rules in spite of citations from agency and that KLFT had no first-class engineer employed fulltime.

"The demeanor of Theriot on the witness stand was poor," Examiner Kyle's decision stated. "He was a sullen and evasive witness. . . . His testimony generally was lacking in candor. He was not cooperative and offered little, if anything, in the way of mitigation for his repeated day-to-day violations of the commission's rules and regulations."

Specifically, examiner ruled that Mr. Theriot: (1) "wholly ignored" two notices of violations from FCC; (2) "made a false representation" to commission (in sworn petition for reconsideration) concerning employment of George Rountree as KLFT engineer; (3) instructed two KLFT employees to lie to FCC investigators, and (4) made no genuine effort to hire engineer or to comply with commission requirements.

'Statistical Abstract' issued

Basic statistics covering U. S. commerce, industry and agriculture are updated in 1961 edition of Statistical Abstract of the United States ($3.50), published by U. S. Census Bureau.

New 2-pound, 10 ounce volume deals with population and housing data from 1960 census, income by states, taxes, distribution, manufacturing and other facts of American economy. It is basic reference work, available from Superintendent of Documents, Government Printing Office, or field offices of Dept. of Commerce.

KF MU (FM) to expand stereo

KF MU (FM) Los Angeles has begun broadcasting stereo and will on Aug. 26 expand its 8-10 p.m. Monday-Friday classical good music program with 1-3 p.m. afternoon show. Station is owned by International Good Music Inc. (Rogan Jones). KFMU is using RCA equipment.

FCC budget unscathed

President Kennedy on Friday signed appropriations bill containing $12,525,000 for FCC, all that agency requested. Congress completed work on bill, which provides total of $8.9 billion for score of independent agencies, two weeks ago (Broadcasting, Aug. 14).

FCC extends remarks date on program report forms

Extension of deadline for comments in FCC rulemaking on new program reporting forms and logging requirements to Oct. 2 will be made this week, commission spokesman said Friday (Aug. 18). Present deadline in both documents is Sept. 7.

More time for comments will be granted because of actual tests by stations in Georgia (Broadcasting, Aug. 14) and Oklahoma operating under proposed requirements, it was reported. Commission thinking is that other stations and trade associations might want to finance tests and agency will openly encourage such practices.

RCA's Watts predicts color growth in fall

Color tv will shine brighter this fall than ever before, RCA Sales President W. Walter Watts told RCA Victor dealers in Detroit. NBC's colorcasts will be used in conjunction with dealer demonstrations to expose public to color tv, Mr. Watts declared. "And when people see color tv, they want it," he added.

NBC in 1954 ran 68 hours of color, today it is running at rate of 1,600 hours of color, and in 1962 should reach 2,000 hours, Mr. Watts stated.

In past three years, he noted, color-equipped stations have increased from 33 to 61 "and many others are known to be sizing up equipment needs in preparation to seeking their own 'pot of gold' at the end of the tv rainbow."

$4 million drive set by Gillette for fall

Gillette Safety Razor Co., through Maxon Inc., will launch $4 million tv-radio-newspaper advertising campaign beginning in September and continuing through middle of October. Purpose is to promote 265-page World Series Encyclopedia, which will be offered to consumers free with purchase of Gillette razor.

Tv campaign will include four 60-second spots weekly for two-week period in selected markets across country and heavy promotion on ABC-TV's Fight of the Week, Make That Spare and NCAA football game broadcasts, and NBC-TV's World Series telecasts.

On radio Gillette merchandise will be featured on disc jockey programs in 100 top U.S. markets.

Rep. Mack opposes deintermixture plan

Rep. Peter F. Mack Jr. (D-Ill.), member of House Commerce Committee, has joined growing congressional opposition to FCC's proposal to remove vhf channels from eight markets.

He said proposed deintermixture would discriminate against those communities which would be reduced "to dependence upon the inferior type service provided through uhf channels."

Declaring rural areas particularly would be hurt by deintermixture, Rep. Mack specifically opposed proposal to remove vhf ch. 3 from Champaign-Urbana, Ill. He cited messages from Illinois Agricultural Assn. and Mayor of Shelbyville, Ill., as "sample of protests" he has received in ch. 3 case. (See earlier story, page 50.)

Hearing on FTC injunction

Representatives of advertising, manufacturing and business groups are expected to testify at House Commerce Committee hearings Tuesday and Wednesday on bills to strengthen FTC's regulatory hand.

One bill (HR 1833) would permit FTC to issue cease and desist order to prevent continuance of alleged fraudulent practices. Stop order would remain in effect until completion of proceeding against suspected firm.

more AT DEADLINE page 10
S. B. Siegel, financial vp, AB-PT Inc., elected executive vp. He also continues as executive vp of ABC, division of AB-PT, position to which he was elected last month (Week's Headliners, July 24). According to Leonard H. Goldenson, AB-PT president, Mr. Siegel's election as executive vp is in line with AB-PT's "desire to strengthen executive management and meet the growing requirements resulting from this expansion." Mr. Siegel has been key figure in company's growth since 1953 merger of United Paramount Theatres and ABC.

J. Michael Early, New Orleans labor management expert who has been consultant to WWL-AM-TV for more than 20 years, last week was named acting manager of WWL-TV. He succeeds Larry Carino, who has become general manager of WJBK-TV Detroit. (Week's Headliners, Aug. 14). Mr. Early, prior to entering private practice, was regional attorney for National Labor Relations Board for 15th region headquartered in New Orleans.

Thomas J. White, vp, tv sales, Avery-Knodel Inc., elected director of corporation and to newly-created post of senior vp. Mr. White joined station representative in 1948 as salesman in radio department. He later moved into firm's tv division becoming sales manager for tv in New York office in 1958, and vp, tv sales in 1960. Roger O'Sullivan also was named senior vp. Mr. O'Sullivan joined station representative in 1947, and was made vp, radio sales of Chicago office in 1960. He remains in Chicago branch.

James Theiss, account executive with Blair Television Assoc. since 1956, appointed to newly-created post of vp and general sales manager of representative company. Earlier he had been in media department of Benton & Bowles, New York, as timebuyer on General Foods and Procter & Gamble accounts. Blair Television Assoc. represents stations in major medium markets. Blair-TV represents stations in major, large-sized markets.

Workers like etv, Oregon study shows

"Working class" tv viewers have a higher acceptance of educational tv than any other class except professionals, according to three-year survey conducted by U. of Oregon. Among "blue collar" workers interviewed in Eugene (site of university), 14% were viewers of educational KOAC-TV Corvallis, Ore.

Survey indicated only 4% of "white collar" workers and 9% of merchants and public officials are regular KOAC-TV viewers. Among professional people, 19% watched etv. Preliminary results showed, however, that only 2% of area tv viewers regularly watch KOAC-TV; 23% watch it occasionally, and 59% "almost never" watch. Remaining percentage either cannot tune in KOAC-TV or have never heard of it.

Those with only grade or high school education spend more time each week watching general tv than college-level viewers, survey disclosed. Survey is part of project by U. of Oregon Institute for Community Studies, which is probing nature and sources of resistance to etv. Project, which began in 1959, is being conducted under grant of $178,000 from U. S. Office of Education. Nearly $60,000 was received last month to continue study through June 1962.

Reasoner to CBS-TV show

Harry Reasoner, CBS News correspondent, has been named to handle new daytime news program starting Oct. 2 on CBS-TV. Titled Harry Reasoner With the News (Mon.-Fri., 11:55 a.m.-noon), program is one of three news shows scheduled to debut on same day. Mr. Reasoner also will be news reporter for half-hour series of news and features, titled Calendar (Mon.-Fri. 10:10-10:30 a.m.). Previously announced was Charles Collingwood With the News (Mon.-Fri. 3:55-4 p.m.).

WOOO sold: $75,000

WOOO DeLand, Fla., has been sold to Trio Broadcasting Co. to Polaris Broadcasting Inc. for $75,000. Polaris principals are S. Donald Potter, Edgar Backus, John W. Fitzgerald and Otto J. Allen. Messrs. Potter and Backus are associated at WJIM-TV Lansing, Mich. WOOO is a 5 kw daytimer on 1310 kc. Broker was Paul H. Chapman Co. with Walter Grimes as co-broker.

KTAL (TV) sets sights to go on air next month

KTAL (TV) Shreveport, La., ch. 6 last week announced tentative plans to go on air early next month, after completion of its new 1,553-foot tower near Vivian, La.

Tower was fabricated by Dresser-Ideco Co., Columbus, Ohio, and erected by the Tesco Corp., that city.

Station studios and offices nearing completion, are at 3150 North Market St., Shreveport. Cost of new NBC-affiliated station has been estimated at $1 million. Walter M. Windsor is general manager.

Fm comments reset Nov. 10

FCC Friday (Aug. 18) extended to Nov. 10 deadline for comments in rulemaking which proposes major changes in fm allocations and operations. Extension had been requested by NAB and engineer and lawyer trade groups (see story page 51). Comments formerly were due Sept. 5.

Sisskind to WIBW-AM-TV

Carl I. Sisskind, news assistant to Sen. Gordon Allott (R-Colo.), Friday announced resignation, effective end of this month, to join WIBW-AM-TV Topeka, Kan., as news director.

Prior to joining Sen. Allott's staff, Mr. Sisskind was news director of KGMC Englewood, Colo.

New Collins transmitters

Collins Radio Co., Cedar Rapids, Iowa, today (Monday) unveiled new line of broadcast transmitting equipment for both am and fm. New fm transmitter, 250-watt model 830B-1, includes self-contained multiplexing equipment for FCC-approved stereo system. It is push-button operated and will also serve as exciter unit for 5-kw fm installation.

Collins' new am transmitter is model 20V-3 and serves for 1-kw, 500-w or 250-w installations. Both new am and fm lines feature colorful cabinetry and easy access to all internal components.

ATAS to advise in uhf test

New York chapter of Academy of Tv Arts and Sciences has accepted invitation from New York Municipal Broadcasting System to serve as advisory and consultancy board for System's forthcoming uhf tv operation—WUHF-TV. Academy will advise on programming aspects of operation and also will provide programs for station's schedule. New uhf station, first in New York, was made possible by $2 million appropriation to FCC by Congress for test of feasibility of uhf coverage in urban areas.
BUT...
how good
are the ones
at the bottom?

Top or bottom—COLUMBIA POST-48's are your best pick!

Starting with "On The Waterfront," "All The King's Men," "Born Yesterday," "The Caine Mutiny"—and right on down through the list of over 200 post-48's from Columbia Pictures—you'll find one top quality feature after another.

No wonder smart shoppers across the country are making this outstanding feature package their number one feature buy. So why not call us? We always enjoy doing business with people who know their onions...or berries!

DATEBOOK
A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

AUGUST

Aug. 22-23—Annual Defense Communications Seminar, National Industry Advisory Committee, under sponsorship of FCC. Defense Commissioner Robert T. Bartley will moderate first day; Assistant Defense Commissioner Robert F. Lee will address the meeting. Departmental Auditorium, Washington, D.C.

SEPTEMBER

Sept. 5—Comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

Sept. 7—Deadline for comments on FCC rulemaking on revised program forms required with all broadcast applications.

Sept. 7—Comments on FCC rulemaking imposing new log-keeping methods and stipulating three-year maintenance of logs due.

Sept. 9-12—Assn. Canadienne de la Radio et de la Television de Langue Francaise, annual convention. Seaway Hotel, Toronto, Ont.

Sept. 11-13—Affiliated Advertising Agencies RAB management conferences. Sept. 7-8 Haddonfield, N. J.

Sept. 11-12 White Sulphur Springs, W. Va.

Sept. 18-19 Sea Island, Ga.

Sept. 21-22 Dallas.

Sept. 22-29 Des Plaines, Ill.

Oct. 5-6 Omaha.

Oct. 9-10 Palo Alto, Calif.

NAB fall conferences
Oct. 13—Hotel Jefferson, St. Louis.
Oct. 16—Sheraton-Dallas, Dallas.
Oct. 18—Hotel Utah, Salt Lake City.
Oct. 20—Sheraton Palace, San Francisco.

Nov. 10—Somerset Hotel, Boston.
Nov. 13—Pittsburgh Hilton, Pittsburgh.

Nov. 15—Hotel Leamington, Minneapolis.

Nov. 20—Robert Meyer Hotel, Jackson, Miss.

“FIRST IN PRIME TIME SPOT RATINGS”
March ’61 ARB

“ARB GIVES KXLY-TV MOST HOMES”

The most recent ARB taken in Spokane (March) gives KXLY-TV more firsts in homes reached in the “prime time” half hour breaks from 6:30 P.M. to 10:30 P.M. Sunday through Saturday! In over-all night-time viewing (6:00 P.M. to midnight) ARB gives KXLY-TV 4,800 more homes than station “B” and 5,500 more homes than station “C”!

Network 17th annual international meeting. Sheraton-Blackstone Hotel, Chicago.

Sept. 15—Reply comments due on FCC rule change requiring broadcast announcement of financial interest held by station management or employees in products or services promoted on air (plugola).

Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and Western Union for leased-line telegraph services.

Sept. 15—Comments due on proposed FCC rulemaking limiting grants of vhf translator stations only to those which would cover unserved areas rather than simply extend an existing station’s coverage area.

Sept. 18—Reply comments due on FCC rulemaking on revised program forms.

Sept. 18—Reply comments due on FCC rulemaking on new time and period for keeping station logs.

Sept. 22—Radio & Television Executives Society, newspaper luncheon, Hotel Roosevelt, N. Y. FCC Chairman Newton N. Minow is speaker.

Sept. 29—Minnesota Broadcasters Assn., annual convention. Speakers include NAB President LeRoy Collins and FCC Commissioner Robert T. Bartley. Leamington Hotel, Minneapolis.

New TK-12 Monochrome Camera by RCA Provides

Finer Product Detail...Better Brand Identification

Pictures of products and people come up clearer and sharper than ever with this new RCA camera. It gives you better definition for better product detail...it provides improved rendition of gray scale for improved brand identification. The 4½ inch I.O. tube means 50% larger image for greater picture detail. And lighting can be used more creatively to provide added emphasis on product features, thus improving the quality and believability of your live or tape commercials.

For instance, your lighting can either be arranged for overall effect, or to emphasize the product for best brand identification. Furthermore, you can vary the emphasis at will and the camera will pick up all the wanted details and faithfully reproduce them. Advertisers will welcome the well-lighted, highly detailed pictures that can compete with the best magazine photography. Give your station a competitive edge with the TK-12 Camera. See your RCA Representative or write, RCA Broadcast and Television Equipment, Dept. YC-22, Bldg. 15-5, Camden, N.J.

A commercial should have no function other than to sell

Perhaps 15 years spent in the fields of broadcasting and telecasting, prior to becoming a partner in an advertising agency, have prejudiced me in favor of these media. I hope so. Had it not had its effect, or left its mark on me, I am sure that at least a part of those years would have been lost.

To the contrary, those years of elbow-rubbing with station, agency, sponsor and public now are standing me in good stead and, at every opportunity, I do everything in my power to see that some of this experience rubs off on the clients.

The Curran-Morton Co. in four years has become one of the two top-ranking agencies in Arizona. I know that the use of radio and television in generous quantities has contributed nothing to our success story.

Both radio and television have been put to outstanding use for one of our clients—a good example—Staggs-Bilt Homes. Ralph E. Staggs, president of Staggs-Bilt, one of America’s largest home builders, has built 45 subdivisions incorporating more than 8,000 homes and currently is developing new projects involving some 12,000 additional homes in the Greater Phoenix area.

Investment—Staggs-Bilt’s advertising budget exceeds $500,000 annually. We invest more than 50% of this in radio and television, with gratifying results. I use the word “invest” instead of “spend” because we feel that every cent of any client’s budget represents an investment which must net a reasonable return. In other words, we are not of the opinion that media should be a mirror to reflect and magnify the ego or vanity of the sponsor or the sponsor’s wife.

We feel that the listening and viewing public of today has at least one or one ear focused on the news. Therefore, we are sponsoring news and public affairs programs on two television stations and one radio outlet. We also maintain a fairly heavy schedule of sportscasts.

Feeling that women motivate the family purchasing of new homes, we buy at least 30 daytime spots per week beamed at the home-loving housewife. These spots are divided about equally among the three network affiliates in this market.

At one time Staggs-Bilt was sponsoring five or six half-hour syndicated shows each week, but lack of a good available property at this time has caused us to move to a heavy, seven-days-a-week spot schedule. Results have been even greater than we anticipated. Staggs-Bilt Homes has sold more homes this year than any other Arizona builder. If and when the time comes when syndicated shows are as entertaining as their pilot films, we may return to the 30-minute segment.

With more than a half million dollars entrusted to us, it is only natural that we devote more than an ordinary amount of time, thought, talent and energy to our spot material, as well as to other media.

When we at Curran-Morton are putting an announcement together, the one word uppermost in the minds of everyone is sell! We don’t believe any part of a 20-, or 30-, or 60-second period of time should be wasted in an effort to entertain, amuse, educate, or be “cute.” We prefer to leave this area to the joke writers.

Well aware that there exists, alas, an element of potential purchasers who will desert their screen for the refrigerator at the drop of a commercial, we try to design our spots so that at least the first or last six or seven words will be more thought provoking, more apt to cling to the average mind, than the slam of an ice-box door.

Words Must Work—In brief, we waste neither words nor film on so-called “attention getters.” If there is any attention to be gained or held, then it must come from the principal vehicle. As it was once so quaintly phrased, “the play’s the thing.”

If a spot contains no more than, say, 60 words, then it is our sober intent to see to it that as many as those 60 words as possible spell s-e-l-l! The letters may be group differently. They may say, “no monthly payments until January 1962,” “your choice of built-ins,” “awarded the Good Housekeeping citation,” “four gracious bedrooms,” or any number of intriguing and inviting little phrases, but... when translated, if they don’t spell sell, then we—and more significantly, the sponsor—have emerged the loser in this greatest word game since the advent of the cross word puzzle.

We are not selling pretty girls in gorgeous gowns, not matinee idlers with bulging biceps; if we were, we would not— orally or visually—waste anyone’s time in extolling the virtues of fine homes. We are, however, selling something that is also well-built and attractive—houses. We let this fact be known, in every worthwhile time slot, from one end of the dial to the other.

Among our agency’s other top accounts are the Arizona Bank, which has been serving Arizona since 1887, and the Wright Manufacturing Co., builders of air conditioning equipment. The rest of the Curran-Morton list shows clients of similar caliber.

We feel that we are known by the company we keep, and on occasion find it necessary to decline an account we do not regard as equal in stature to our present ones.

We would also look with disfavor upon any prospective client who failed to agree with us that radio and television are the best salesmen of our time.

To sum it up—there can be little doubt that there is much room for improvement in the field of broadcasting, just as there always has been and always will be.

But, until something better comes along, it’s delivering a whole lot of goods for us.

Kenneth Morton, executive vice president of Curran-Morton Co., was vice president and station manager of KOOL-AM-TV, CBS affiliates in Phoenix, for eight years prior to becoming an agency executive. At KOOL he handled all sales, both local and national, and was responsible for national sales for affiliated KOLD-AM-TV in Tucson. Now 36, Mr. Morton has spent 15 years in broadcasting. He is a member of the board of governors of the Arizona Academy of TV Arts & Sciences.

The case for uhf

EDITOR: It was very interesting to read your lead story in the Aug. 14 BROADCASTING, "Will uhf solve tv's problems?"

I am convinced that the FCC spent a tremendous amount of time and did an extensive amount of research before the proposed rule making to deintermix eight markets. They and many other interested people are convinced that the public would be better serviced by having these mixed markets change to all uhf markets to provide comparable and competitive outlets of local expression. Even though you are not required to give equal space, don't you think that in all fairness to the industry that the uhf performance should be given an opportunity to explain their position?—N. L. Benton, President, WKOW-TV Madison, Wis.

[BROADCASTING] regards as newsworthy all responsible opinion in its area of coverage and certainly uhf is included. The record of issues of BROADCASTING over the years shows we have carried all shades of observations on uhf vs. vhf. Editorially we have consistently taken the position that no uhf channel ever should be turned back and that there should be a dual uhf-vhf system. Let the comments come.]

WNHC-TV explanation

EDITOR: A basic reportorial inaccuracy exists in your story regarding non-clearance of ABC-TV's "Discovery show by WNHC-TV (Programming, Aug. 14). Ch. 8 . . . dislikes the inference that we were one of eight key stations to hold up this potentially new worthwhile children's programming . . . . If you . . . wish to have additional facts . . . please feel free to call me personally.—Howard Maschmeier, General Manager, WNHC-TV New Haven, Conn.

[Mr. Maschmeier subsequently explained to BROADCASTING by telephone that WNHC-TV did not refuse to accept the proposed ABC-TV program but offered alternatively to carry it on a delayed basis at 7:30-8 a.m. instead of during the 5-6:30 p.m. Monday-Friday period as offered by ABC-TV. He explained that WNHC-TV already carries "an outstanding local children's program," "Admiral Jack," in the station's 5-6 p.m. schedule and that this program is important to WNHC-TV because of its appeal to local and state viewers.]

Pay tv in catv's future

EDITOR: Will appreciate five reprints of "The place of pay tv in catv's future'" (THE MEDIA, June 19).—William J. Ryan, General Manager, WNOG Naples, Fla.

EDITOR: Would you please send us 100 reprints of "The place of pay tv in catv's future'".—Frand Ward, Systems Management Co., Denver.

[Since there are no plans to make reprints of this article, BROADCASTING has forwarded five tear sheets to Mr. Ryan and has given permission to Miss Ward to make reprints locally, provided that proper credits are given to the magazine.]

Why is approximately 80% of the local TV money in the Des Moines market invested on KRNT-TV?

KRNT-TV makes cash registers ring!

The quality of our quantity of audience is apparent to local advertisers who live here and who must prosper here. Their cash register must ring — they have no alibis! Their cash register is their copy tester!

The believability of the exclusive KRNT-TV personalities (we have more than all other stations) is shown by the cash register and by the Central Surveys.

Month after month, year after year, KRNT-TV ratings are high. Highest Newscast ratings in the nation! Highest sportscast ratings! Highest local personality ratings!

If you want to find out more about this unusual station, we suggest you check any business man in your line of work in Des Moines. Ask him about KRNT-TV. You, too, can get outstanding results by advertising on . . .

What makes Samantha run?

Community Club Awards, that's what. Samantha and 100,000 other Baltimore clubwomen eagerly buy the products of CCA-participating advertisers on W-I-T-H and amass mountains of proofs-of-purchase in competition for the $10,000 W-I-T-H gives away each 13 weeks to women's clubs to spend as they like for worthy projects.

$190,000 is the total cash W-I-T-H has distributed through CCA, and if you think this isn't a powerful incentive, you should see the millions of bottle-caps, box-tops, labels and sales slips we collect.

Let us show you how we can increase your sales. You'll find it refreshing to hear about a merchandising plan that really works. Write, phone or wire today.
NETWORK SPOT $3,800,000 WEEKLY

■ 1961-62 season sees minute billings at all-time high
■ Participations become dominant pattern in nighttime shows
■ 25 to 75 percent of prime time will be taken by spot buys

The minute participation in nighttime network shows will make its greatest impact in the 1961-62 season. It’s conservatively estimated that the amount of time devoted to “minutes” each week in regular series next fall on all three networks represents approximately $3.8 million in gross billings (at the one-time rate).

These “minute men” advertisers are becoming more solidly entrenched than ever before in prime time periods, the estimated weekly gross billing above covering only the nighttime network schedule. (Daytime participation sales also are prevalent.)

Once the experimental form of NBC’s so-called “magazine concept” as employed in the early 1950’s with the Today, Home and Tonight participating programs, the minute sale in prime time has become acceptable to both the blue chips (Procter & Gamble, General Foods, Brown & Williamson among them) and the smaller advertiser.

Dominant Pattern • It’s effects are spreading in nighttime. A study by Broadcasting last week shows minute selling in prime time, which started in 1957, is evolving into the dominant pattern at both NBC-TV and ABC-TV, while CBS-TV is moving more slowly along the same path. This fall, minute buys will account for approximately 75% of prime time program availabilities on ABC-TV; 55% on NBC-TV and 25% on CBS-TV. The increases are substantial for each of the networks over last year, with comparable figures for 1960-61 estimated at 70% for ABC-TV; 45% for NBC-TV and 15% for CBS-TV.

Probable Sell-out • Though networks are confident that minute buys will be sold out by the time the fall season begins, the precise amount of dollars that “minutes” will bring in over the season is indeterminable. Such buys on network shows are for varied periods— for 13 weeks, 26 weeks, 37 weeks or 52 weeks. At the end of each cycle, programs may revert to a weekly or alternate-week sponsorship, so that a full-year projection is not practicable. But whatever the contract length, minute purchases appear to the networks as the immediate answer for problems emerging out of shifting economic conditions and changing program formats.

Schism • The trend toward minutes, however, also is widening the schism between sellers of so-called “true” spot TV and network “spot carriers.” Station representatives contend that so-called “minute selling” of programs leads, in effect, to “distress selling,” which, in turn, brings in reduced amounts of compensation to affiliates and contributes to a downgrading of the tv medium. Representatives acknowledge that minute selling on prime network programs tend to cut into spot TV revenue, but insist that the “deteriorious effect” of this practice is exerting on the medium constitutes their primary objection.

The reasons for the growth of minute selling, as outlined by network sales officials, are the following:

■ Costs of network TV programs have risen sharply over the past four or five years and fewer sponsors can meet the expense of weekly or even alternate-week sponsorship.
■ Minute participations in programs provide sponsors with “reach,” and they have learned over the years that it’s possible to obtain broader circulation through investment in a wide range of programs.
■ With the emerging inter-network competition, there’s a greater degree of safety for the advertiser in spreading an investment over a group of programs; it’s an accepted fact of television life that a substantial number of programs

50 years ago Mr. Terrell was the entire FCC

1934, and the appointment of Newton N. Minow as chairman in 1961.

Mr. Terrell, hale and alert, celebrated his 90th birthday on Aug. 10 and last week reminisced about his days as the government’s first G-man for radio. The Florida-born telegraph messenger was appointed the first inspector of radio stations July 1, 1911 in the administration of William Howard Taft. This was after the government passed the 1910 radio act requiring U. S. passenger ships to install and operate radio-telegraph stations. He continued in this field with the Dept. of Commerce until the organization of the FCC in 1934, when he moved over to become chief of the group now known as the Field Engineering & Monitoring Division. Mr. Terrell retired in 1943. He has four grandchildren and two great-grandchildren and lives with Mrs. Terrell in a small cottage in Arlington, Va., next to the “big” house they bought in 1915.

“I was an expert right from the beginning,” he said recalling his early work in radio, “because we knew next to nothing and nobody else did, either.”
NETWORK SPOT $3.8 MILLION WEEKLY continued

will become fatalities despite the most optimistic expectations.

- The popularity of hour-long programs has contributed to the practice of buying participations, because few advertisers could sustain the cost of underwriting such an extended time period each week or on alternate weeks (ABC-TV and NBC-TV each has 12 hour-long programs sold on the minute formula).

- A minute participation can be more economical for the advertiser than a comparable national spot TV buy, particularly if the advertiser can purchase a program that conforms largely to his distribution pattern.

- The sizable number of programs that reach late summer without being fully sponsored appears to be increasing, so that networks are more amenable to offering parts of programs on a minute basis. A striking example of this practice was the ability of Mobil Oil to buy participations only last week on 21 programs (8 on CBS-TV and 14 on ABC-TV) for next season (see story page 25).

Thomas H. Dawson, vice president, network sales, CBS-TV, in an interview last week stressed the trend toward minute buying does not sound the death knell to program sponsors. He pointed out that advertisers who require prestige and identification with programs will still keep their franchises alive with program sponsorship.

From the network point of view, he observed, there are advantages and disadvantages to selling minutes.

He said there is less loss to a network when a minute advertiser drops out, and the method permits a program to go on the air sponsored in full or with a substantial part sold. The other side of the coin, he said, is that minute buys are often short-termers and sometimes more difficult to clear. Mr. Dawson believes a combination of program and minute purchases is the “best approach” for many advertisers.

**NBC-TV’s Views**  Thomas B. McFadden, vice president, National Sales, NBC-TV, echoed the view of other network sales executives when he said: “I’m sure we would all prefer to sell programs on a straight sponsorship, rather than on a minute basis. This type of selling creates an horrendous problem in paper work. After all a contract for a minute advertiser takes as long to write and to service as one for a full-program sponsor. But like it or not, this is the way our business is heading these days.”

Mr. Dawson at CBS-TV also indicated it was difficult to trace the history of the minute buys with precision but mentioned that as long as five years ago, the rising costs of the television medium led to the development of what he called the “true third” sponsorship (two minutes to a single advertiser on each half-hour show), and the “alternate thirds.” A logical off-shoot of these sales stratagems, he believes, was the minute participation.

**At ABC-TV**  Edgar J. Scharick, vice president in charge of network sales, ABC-TV, expressed the belief there are trend cycles in buying as well as in programming shows. It is Mr. Scharick’s view that with the expected rise in live programming for 1962-63, there will be a corresponding rise in program sponsorship on a full or alternating-week basis. But he emphasized that minute buying has its place in network television, depending on the requirements of the advertisers. Noting that many of the large advertisers still utilize a combination of program and minute sponsorship (he cited Whitehall Pharmacal and Brown & Williamson on ABC-TV), but added: “For advertisers new to television and for those who have used the medium sparingly, the minute participation is a test for TV. And I feel that, on the whole, television has come off well in satisfying these advertisers.”

Among advantages of the minute buys to the networks themselves executives pointed to:

- A greater “flexibility”—and ease—in network selling.

Stronger network control over a program. (A minute participant—usually short term—can have little say as compared to the advertiser of a full hour or half-hour or even the sponsor of an alternate week.)

Many station representatives were reluctant to express their sentiments openly on the subject of minute participations. Some objected to the use of
Network spot wins $3.2 million of Mobil’s advertising budget

The current appeal of the network’s minute “spot” participations (see adjacent story) has attracted approximately $3.2 million of Mobil Oil Co.’s $12 million in annual advertising billings.

The oil company only last month officially became a client of Ted Bates & Co., an agency that is a prime mover in the recent trend towards advertiser sponsorship of program “minutes.”

Last week, Mobil Oil, which is a division of the Socony Mobil Oil Co. and the fourth largest petroleum company in the nation, bought a heavy schedule of participating minutes on a total of 21 ABC and CBS tv shows. While most are regular weekly series, one of the buys includes minutes in 10 of the 17 American Football League game telecasts scheduled for the fall on ABC-TV.

Buying 69 Minutes • It’s estimated the oil company will spend $3.2 million in its minute sponsorships—$1.6 million on each network—for a total of 69 minutes spread over eight shows on CBS-TV, and a still-being-negotiated number of minutes on 13 ABC-TV programs. All of the CBS shows and 11 of the ABC shows are in prime time.

The network participations are part of Mobil’s new multi-million dollar advertising campaign scheduled to get underway by early fall. Besides network sponsorship the campaign will include a concentrated schedule of full page newspaper ads in major markets across the country. They will be geared, as well as the tv commercials, to a new copy theme still to be announced (but not related to the Mobil gasoline economy run, which it sponsors annually).

The coming advertising campaign will mark ‘Ted Bates’ first efforts on behalf of Mobil Oil since officially taking over the account from Compton Advertising on July 1. Mobil announced the split with Compton in March (Broadcasting, March 6) after an 18-year association with the agency. At the time, Compton claimed that Mobil’s commissionable billings in 1960 amounted to only $7 million and not the $12 million figure given out by the oil company. Last year the advertiser spent about $2.8 million in radio and tv spot, and was not involved in network participations.

Male Viewers • All of Mobil’s network buys for the fall season are aimed at attracting the adult male viewer. On CBS-TV some of the participations are on alternate-week schedules, and all are effective the week of Sept. 25. They include Frontier Circus (Thurs., 7:30-8:30 p.m.); Pete and Gladys (Mon., 8-8:30 p.m.); Ichabod and Me (Tues., 9-9:30 p.m.); Checkmate (Wed., 8:30-9:30 p.m.); The Twilight Zone (Fri., 10-10:30 p.m.); and The Investigators (Thurs., 9-10 p.m.).

Mobil participations on ABC-TV start the last week in September and continue for 13 weeks through the end of the year. They include, besides the 10 AFI telecasts, Target: The Corrupters (Fri., 10-11 p.m.); The Hathaways (Fri., 8-8:30 p.m.); Straightaway (Fri., 7:30-8 p.m.); Cheyenne (Mon., 7:30-8:30 p.m.); Naked City (Wed., 10-11 p.m.); New Breed (Tues., 9-10 p.m.); Ben Casey (Mon., 10-11 p.m.); Bus Stop (Sun., 9-10 p.m.); Roaring 20’s (Sat., 7:30-8:30 p.m.); Ozzie and Harriet (Thurs., 7:30-8 p.m.); Adventures in Paradise (Sun., 10-11 p.m.); and the new ABC Evening Report (Mon.-Fri., 6-6:15 p.m.).

the term “network spot carrier” because this connotes, they claimed, that networks are selling spot. The objections of representatives can be summed up this way: They believe that minute buys often are sold more cheaply than their rate cards prescribe (one source claimed that one network sold a minute for as low as $9,500, although rate cards generally prescribe a range of $23,000 to $49,000 per minute—time and talent net and commissionable. They contend that in selling programs cheaply, the networks absorb part of the production costs to get the programs on the air. They insist the result is that affiliates are “short-changed” and the whole medium as a natural consequence earns a dubious “bargain-basement” reputation.

Hurt By Minutes • Many representatives agree that they are “hurt” by network minute sales, particularly at the beginning of the fall season, but contend that the values of spot—its flexibility, its economy and its weight of impressions—beome more impressive to the knowledgeable advertiser as time progresses. They acknowledge that network minute buys are harmful (to “true spot” revenue) particularly to stations in markets below the top 50, in which the network programs may have had circulation and in which the advertiser may not invest because of budgetary limitations.

G. Richard Swift, president of the Tv Division of The Bolling Co., called the network’s practice of selling minutes “an infringement into spot tv.” He asserted that networks have “obviously failed to sell their product on its own merits and are attempting to encroach upon spot to fill their coffers, at the expense of affiliates.”

Mr. Swift stated that the experience of several large advertisers in recent years demonstrates the “impracticability” of network minute buys. He cited an unidentified candy manufacturer and an electric manufacturer as having switched from spot tv to network participations, and claimed the results were “disastrous.”

“The principle of ‘spot’ cannot be applied to ‘network’ for the same reason basketball is not played by football rules,” Mr. Swift declared. “It was a good idea—but failed for these accounts and more than likely will fall again.”

Scott Donahue, vice president, tv sales, The Katz Agency, claimed it is the advertisers—and not the networks—who are “in the driver’s seat in providing network participations.” He said advertisers forced the networks’ hand, and insisted “his eggs be taken out of one expensive network program basket.” Mr. Donahue contended the offering of network participations is “an admission” by the network that they “no longer can compete with spot with the argument that ‘network program identification’ offsets the values of economy, flexibility and weight of impressions that are built into the spot medium.”

Mr. Donahue claimed that the strength of spot is its ability to provide flexibility and number of impressions economically. He insisted that the “less expensive form of network purchase” is only a partial answer; the next logical step for advertisers is to allocate a major portion of their budgets to pinpointed schedules in spot tv, a strategy that takes advantage of the benefits accruing from this medium.

“Thus, at The Katz Agency, we feel the networks, in trying desperately to offer advertisers another alternative to spot, are really doing an educational job for the spot medium,” Mr. Donahue said.

A spokesman for Blair Tv voiced similar sentiments on an advertiser’s learning the value of spot tv as compared with a network participation through initial use of the latter. He said he is convinced that many advertisers will learn that they can buy a selected group of 50 stations throughout the country for a cost that will be more...

RAW TEXT

The rule of thumb in minute accom-
modations in programs being sold
on a participating basis on any one
of the networks generally is six
in the full hour show and three in
the half-hour. In several cases the
networks have thrown open to ad-
ters minutes in the alternate
week of half-hour programs which
have an alternate week sponsor.
(Example: in Straightaway on ABC-
TV, Autolite purchased an alternate
week, leaving the program half-sold.
The other half [or alternate week] is
then offered to advertisers on the
basis of three participations, or one
and a half minutes if calculated on
a weekly basis.)

Approximate totals of minutes be-
ning sold to advertisers in the net-
works' 1961-62 season schedule and
the shows in which about 206 one-
minute participations will appear:

**ABC-TV** • Has a total of some
91½ weekly one-minute participa-
tions in the coming season. They are
in the half-hour Bus Stop, Adven-
tures in Paradise, Cheyenne, Surf-
side Six, Ben Casey, New Breed,
Steve Allen Show, Hawaiian Eye,
Naked City, The Untouchables, 77
Sunset Strip, Target: The Corrup-
tors, and The Roaring 20's. The half-hour
programs in which they appear:
Bugs Bunny, Ozzie & Harriet, Huth-
aways and Leave It To Beaver. The
half-hour Straightaway has participa-
tions in the alternate week.

**CBS-TV** • Has a total of about 40
one-minute participations in the new
fall season. They appear in these
half-long programs: Checkmate (al-
ternate half of the show), Frontier
Circus, Investigators, CBS Reports,
Rawhide, and Perry Mason. Half-
hour shows: alternate weeks of Pete
& Gladys, Twilight Zone and Ichabod
and Me; three minutes per week
in one out of four telecasts of EYE-
forcement to History; full three minutes
of I've Got a Secret, and Father
Knows Best.

**NBC-TV** • Has a total of approxi-
mately 75 one-minute participations
in the fall season. The half-long
shows: 87th Precinct, Thriller, Lar-
amie, Dick Powell Show, Cain's Hun-
dred, Outlaws, Dr. Kildare, Inter-
national Showtime, Captain of De-
tectives, Tales of Wells Fargo. A
two-hour program sold in minutes:
Saturday Night at the Movies (12
participations weekly). The half-
hour National Velvet and Tall Man
have participations in the alternate
week.

Over 200 participating minutes each week

**Business briefly...**

**Nichols Industries** (manufacturers of
top cap pistols and guns), Jackson-
ville, Tex., has announced a 13-week
spot campaign this fall in 25 U. S.
markets through Aubrey Williams Adv.,
New Orleans. The commercials are
being produced by Keitz & Herndon,
Dallas, at Six Flags Over Texas, a
Disneyland-type entertainment center
which opened earlier this month on the
Dallas-Ft. Worth turnpike.

**Beatrice Foods Co.**, Chicago, will
sponsor ABC-TV's new Magic Ranch,
starting Sat., Sept. 30 (11:30-12 noon EDT).
The program is devoted to hocus-pocus,
sleight of hand and other magical div-
erions. Agency; Erwin Wasey, Ruthrauff
& Ryan, N. Y.

**Procter & Gamble Co.**, Cincinnati, has
signed to sponsor the Academy of Mo-
tion Picture Arts & Sciences' annual
"Oscar" awards show for the second
consecutive year on ABC-TV. Agency:
Grey Adv., N. Y.

**Purex Corp.**, Southgate, Calif., is in-
creasing network TV spending this next
year and will sponsor eight evening spe-
cials, as many daytime specials for
women and increased quarter-hour par-
ticipations on regular daytime shows,
all on NBC-TV. Purex scored high
in past year with Irving Gitlin series of
six specials on women's problems.
Planned for evening shows is Don
Hyatt series on The World Of such per-
sonalities as Bob Hope, Billy Graham
and others. Agency; Edward H. Weiss
& Co., Chicago.

**American Bakers Co.**, Chicago, will
turn to TV this fall for its cake division
and use about 38 children's programs in
24 markets. Firm has been using radio
spots through the summer for Tastee
bread. Agency; Young & Rubicam,
Chicago.

**Elgin National Watch Co.**, Elgin, Ill.,
will sponsor three special NBC News
public affairs programs on NBC-TV
between Nov. 28 and Dec. 15. With
the Elgin order, NBC News' schedule
of specials for 1961-62 is more than
half sold. Agency: McCann-Marschalk
Co., N. Y.

Economical than a network participa-
tion, and produce results that will be
highly satisfactory. He indicated that
the "waste" circulation of a network
participation will not be lost for long
upon astute advertisers.

---

**CBS-TV's "Perry Mason"** is hailed as
the "most expensive" of hour-long
shows on which minutes are sold and
may be the grand daddy of such pro-
grams since minutes were first sold
on it in 1957. Though show is begin-
nning its fifth season as minute carrier,
CBS-TV has moved more slowly than
other networks in selling prime time
participations, with only 25% of its
nighttime schedule offered in this
manner as compared to 75% for ABC-
TV and 55% for NBC-TV.
PLUM: Almost as precisely as with a builder’s plumb bob, Columbia is centered geographically in South Carolina. Hub of the state, it’s the center to which all eyes (like all roads) turn. And people! Total of 257,961 in the 1960 Census, making it the state’s largest metropolitan area, and second only to Charlotte in both Carolinas, and still building. Add WIS-television, with its 78.7% share of the home market audience, according to Nielsen... add WIS-television’s central 1526-foot tower that delivers (in this strategic central location) more of the state than any other station can reach... and you come out with a real PLUM of a buy. South Carolina’s major selling force is WIS-television NBC/ABC—Columbia, South Carolina

WIS-television, Channel 10, Columbia, S.C.  •  WIS Radio, 560, Columbia, S.C.  •  WSFA-TV, Channel 12, Montgomery, Ala.  / All represented by Peters, Griffin, Woodward, Inc.
List of central billing service grows
THE LATEST TO FORM: BROADCAST CLEARING HOUSE INC.

A new central billing service—Broadcast Billing Co.—was formed in New York last week as a wholly-owned subsidiary of Standard Rate & Data Service Inc. (CLOSED CIRCUIT, Aug. 14).

The announcement of the new company, which proposes to simplify and expedite paper work in spot tv buying, came two weeks after the set-up of Broadcast Clearing House Inc., which has been formed for a similar purpose (broadcasting, Aug. 7).

An indication that the field of central billing in the buying and selling of broadcast time—previously a vacuum—is rapidly filling is the expected formation of still another service by former Remington-Rand systems experts and an existing company.

Broadcast Billing Co. is headed by Albert W. Moss, SRDS vice president, as BBC’s president; George W. Schiele, former sales vice president of Broadcast Advertisers Reports Inc., New York, who becomes sales vice president of the new firm; Richard I. Golden, previously supervisor of automated operations for the Triangle Stations, who becomes operations vice president, and SRDS President C. Laury Bothof, who also will represent SRDS’ interest in the subsidiary as board chairman.

**Dry Run First** • Letters introducing the service to stations and agencies are slated to be sent out this week, and presentations will be made. Before Jan. 1, 1962, the general “target” date for the start of the billing company’s service, the firm expects to set up a “dry run” billing operation which is described as a “control period.” The firm’s birth was made official Aug. 14 in a meeting at SRDS in New York.

The new company, with offices at 432 Park Ave. South, in New York, plans to open operations in Chicago, and later in San Francisco and Los Angeles as the business justifies their openings.

At the outset, the paper jungle in tv will be the first area to come under servicing. Radio will be worked out at a later date. As explained last week, tv is the larger volume of business with “most dollars at stake” and more applicable for control because of the fewer stations and major agencies involved compared to the thousands of radio stations and wide spread of agencies handling radio.

**Warning sponsor**

Sponsorship of Florida Defense Network test weather broadcasts was announced last week by Lee Ruwitch, president of the Florida Assn. of Broadcasters and general manager of WTVJ (TV) Miami.

Mr. Ruwitch said he believed this was the first time broadcasts of a state defense network have ever been sponsored. Permission for such sponsorships was granted by the FCC last year, but too late for any commercial tie ins.

The sponsor, D. W. Onan & Sons, manufactures electric generator sets for emergency use. The five-minute broadcasts will be heard daily during the hurricane season.

It was noted that the company is preparing a rate structure that most likely will be based on volume.

**Background** • Mr. Schiele, who was instrumental at BAR in developing a tv audit system now used by several major agencies, was associated with WPBN-TV Traverse City, Mich., and later served in a publicity capacity for the WFIL stations in Philadelphia.

Mr. Golden, who joined WFIL-TV Philadelphia in 1953, developed a centralized traffic and billing system for 13 stations in the Triangle group (excluding one west coast operation—KFRE Fresno). The Broadcast Billing Co. system will use existing order and billing forms and will be patterned to some extent after that developed by Mr. Golden at Triangle.

As seen by the principals of the new company the basic philosophy for a central billing service is founded on the problem that buyer and seller have no access to each other’s orders. The task of matching one order against another has developed what Mr. Schiele calls “the war of paper work” (duplication, misunderstanding, etc). The system will permit a daily check of performance and order.

**How It Works** • Though the type of service performed will vary from client to client, it’s noted, for example, that client station invoices will be prepared and submitted to both cooperating and non-cooperating agencies, and that matching and verification of invoices for client agencies will be performed from both cooperating and non-cooperating stations.

The data processing equipment will be fed all information pertinent to confirmed purchases of tv advertising with daily advance memoranda forwarded to stations as a control in preparing operations logs. Daily match lists will confirm successful performance of ordered

The principals in the new Broadcast Billing Co. formally organized the firm on Aug. 14. At the session (l to r): George W. Schiele, vice president, sales; C. Laury Bothof, chairman of the board of the subsidiary and president of the parent SRDS, and Richard I. Golden, vice president, operations.
Flint–Bay City–Saginaw moves into the top 40
(in actual TV homes delivered)

New market? Not really. Only in the sense that when Flint and Bay City–Saginaw (two long-established TV markets) were combined, they formed one large Eastern Michigan market. And this moved the market up among the nation’s top 40.* It’s now in the same neighborhood as Providence, Charlotte and Denver.

It’s top 40 in terms of actual homes delivered, too: people watching television, not just set owners. And it’s so easy for you to reach them. For nearly all the viewers in these three heavily populated cities get their television from within the market area—on stations, such as WJRT, which have City-Grade service to all three.

If you’d like more information on the big move, the big market and how big we are in it, just call Harrington, Righter & Parsons, Inc. Offices in New York, Chicago, Detroit, Boston, Atlanta, Los Angeles and San Francisco.

*Based on ARB Reports—March, 1960 (Sun.-Sat., 6-10 p.m.)
announcements with discrepancies prepared for agency-station renegotiation. Monthly invoices will be made from the record of performed announcements at proper rates and reflecting all discounts and credits, and including necessary data of multi-agency advertisers.

Tighter operations for broadcasters with opportunity for recovery of announcements by rescheduling within current ad campaigns, faster collection of receivables, internal cost savings, etc., are seen. Agencies obtain a “pre-reconciled, verified detailed invoice payable with no additional clerical work,” it's explained, while still other costly chores and paper work now necessary at agencies also would be alleviated.

$50,000 please

Good commercials don’t come easy and they don’t come cheap. Stan Freberg, whose Freberg Ltd. has won prizes and plaudits for its successful broadcast campaigns for Chun King Chow mein and Butter Nut coffee, revealed last week that the basic fee for the firm’s consulting and creative service is $50,000. Production costs are extra, he said.

Currently in preparation at Freberg Ltd. are commercials for Chun King, Tv Guide, Cheers, Nytol and Salada tea.

NETWORK BILLINGS UP 8.2%

First-half shows ABC up 23%; CBS down 3.9%; NBC up 12%

NBC-TV’s 12.6% gain in gross time billings for the first six months of 1961 boosted the network more than $3 million ahead of its closest rival, CBS-TV, for the period. The three-network total of $363,869,472 was 8.2% ahead of last year’s first-half total of $336,294,077.

NBC-TV’s billings also topped CBS-TV and ABC-TV in each month of 1961.

This the first time in some seven years that CBS-TV has fallen behind NBC-TV in gross time billings for any length of time. NBC-TV moved slightly ahead of CBS-TV in October, 1960, and stayed there, except for one month (December of that year), through June of this year. CBS-TV edged past rival NBC-TV in 1953, according to available estimates of network gross time billings (computed at the one-time rate).

January-June through June billings totals were: NBC-TV, $136,293,905; CBS-TV, $132,939,527; and ABC-TV, $94,636,040. ABC-TV was up 23% from its first-half total last year of $76,950,570. CBS-TV declined 3.9%, from $132,939,527; and NBC-TV went up from $120,992,398.

The three tv networks had gross time billings of $59,894,527 in June 1961, an increase of 13.1% over 1960 when billings were $52,970,855.

June network tv billings, as compiled by Leading National Advertisers-Broadcast Advertisers Reports and released by Television Bureau of Advertising, were: ABC-TV, $15,233,000; CBS-TV $21,787,201. and NBC-TV $22,874,326.

Nighttime gross time billings for the three networks are up 2.8% from the first half of 1960, $242,621,764 as opposed to $235,953,120. Daytime billings rose 20.8% over the six-month period a year ago, $121,247,708 as against $100,340,957.

*ACCORDING TO ARB, MARCH 1961, THESE SHOWS REACHED MORE HOMES THAN ANY OTHER.
ARBITRON RATINGS EXPAND
New overnight national sample with 1,000 homes to replace present seven market ratings

The American Research Bureau will expand its multi-city Arbitron Instantaneous Audience Measurement System to a full national service, starting Sept. 24 (CLOSED CIRCUIT, July 24).

ARB announced last week that on that date, Arbitron will provide overnight national ratings and audience size information for network programs from 7:30-11 p.m. for 26 consecutive weeks, ending March 24, 1962. In addition, seven weeks of daytime network ratings will be supplied. The schedule for national Arbitron after March 24 has not been completed.

The national reports will be supplied to subscribers on the day following the telecasts. Each report will consist of rating data by half-hour segments, showing program title, network identity, total number of homes reached, share of audience and sets in use. It will also show coverage factors for each network program.

Data for the national Arbitron will be secured by sampling points throughout the country. The sample will average 1,000 homes per half hour. Initially, a large percentage of sampling areas will be reported electronically by Arbitron meters and others will be covered by the telephone coincidental method. ARB said that the ultimate objective is a complete electronic overnight national service using about 1,500 metered homes in sampling points throughout the country.

With the introduction of the national Arbitron, the multi-city reports will be suspended, according to James W. Seiler, director of ARB. They have been in operation for the past three years, supplying rating information on network programs from a sample of TV homes fitted with electronic meters in Baltimore, Chicago, Cleveland, Detroit, New York, Philadelphia and Washington. The metered homes will now contribute to the total national sample size needed for the national Arbitron.

OB&M lands KLM
Ogilvy, Benson & Mather, one of at least four agencies seeking the more than $1.5 million KLM Royal Dutch Airlines account, has landed it.

The account, which only covers the North American division of the international carrier, was with Erwin Wasey, Ruthrauff & Ryan for the last four years. KLM is only a modest user of the broadcast media for advertising purposes. Last year the company billed some $300,000 in radio announcements, most of which were pegged for key, international travel cities, and little more than $20,000 in TV spots.

Florida citrus group considers six agencies
The Florida Citrus Commission has reduced to six agencies the number of applicants vying for its $3 million plus advertising account.

They are BBDO; Campbell-Ewald Co.: Grant Adv.; Lennen & Newell: Gardner Adv.: Benton & Bowles. The presentations will be heard on Oct. 11-12. B&B has handled the account the past six years.

J. Walter Thompson Co. originally was selected as a candidate in place of Gardner Adv., but withdrew last Thursday because of a company policy against "speculative" presentations where prospective ads and copy ideas are shown. Withdrawing for the same reasons were Campbell-Ewald and Benton & Bowles.

Sam A. Banks, vice chairman of the 12-member commission, told agency representatives the presentations were set up "to be sure we are buying the best possible advertising representation for the citrus industry (11,000 growers strong). It is not anything against Benton & Bowles and does not mean that the commission is dissatisfied with its present agency."

Stations change mind on Colleens campaign
Stations which originally had accepted the placement of IDs in the Fort Worth-Dallas market for Mayfield Industries Inc. (Colleens, a new feminine hygiene product) reportedly have turned down the short range test. The "campaign" was to start today (Aug. 21) for a three-day run over this week and next.

It's said the stations acted thus when informed by NAB code officials that the advertising, though not an actual violation, would appear to circumvent the intent of the code.

The NAB's apparent stand on the matter is understood to have come as a surprise to the agency (North Adv.) and to the advertiser which did not feel they had circumvented the code's intent because neither the product's name nor package appear in the TV commercials, nor is there any mention of the product and its use. The commercials point only to advertisements running concurrently in the newspapers (BROADCASTING, Aug. 14), making no reference to the product.

FACE-TO-FACE SALESMANSHIP GETS ORDERS!
National spot is a fast-moving, competitive business. You've got to be there when the buying decisions are being made. You've got to use every creative approach...every technique of forceful salesmanship...to get the order. This is sales impact. And you can't achieve it through periodic field trips, phone calls or letters.

That's why... Weed maintains 14 offices throughout the U.S.—more than any other representative firm.

That's why... Weed hires salesmen with years of solid experience in their territories. In most cases, our men are native to the city in which they are based.

That's why... Weed's policy of "depth selling" reaches every decision-making level up to and including the advertiser.

Wherever a buying decision is made... a WEED man IS THERE!
Here's how to spend your ad dollars to sell to the young adult. Buy "Breakfast Club," News, "Flair," Sports or Special Events in ABC Radio. You'll sell the consumer who buys more of almost everything. Federal Reserve Board statistics show that during 1960, young adults (18-44) bought 59% of all refrigerators; 62% of all washers; 60% of all TV sets. But whether it's phonographs or food, automobiles or aspirin, young adults buy more. If you want to reach them, your best bet is ABC Radio.

YOUNG ADULTS:
BUY MORE SMALL APPLIANCES
BUY MORE BIG APPLIANCES
BUY MORE EVERYTHING

ABC RADIO
FIRST WITH YOUNG ADULTS

Publicker is placing two separate test campaigns, according to agency information. One is for Old Hickory bourbon, through the Ellington agency, a campaign that started Aug. 5 on an estimated 30 stations, including two tv stations. The other is for Philadelphia White Label whiskey, a blend of Continental Distilling Co., a Publicker subsidiary, also begun Aug. 5 in over a score of markets.

NAB radio and tv code officials have been in touch with the situation. John F. Meagher, NAB vice president for radio, and Edward H. Bronson, tv code director, said as far as they knew no code stations or NAB members were taking the business. Both voluntary codes have flat bans against hard liquor advertising.

The NAB radio code office, headed by Charles M. Stone, sent out an Aug. 14 bulletin calling attention of code members to a letter sent by Ellington, a letter asking station reaction. NAB said, “Needless to say there has been no change in the provision of the radio code which states, ‘advertising of hard liquor shall not be accepted.’”

Small Stations — Al Paul Lefton has been placing the White Label account in areas where the product has heaviest distribution and where there are no state regulations against hard liquor advertising. Most of the stations are described as smaller operations.

Spots are being placed at all times of the day and night, with some in the afternoon. They vary with different markets as the agency gauges reaction to the commercials. The campaign began when inquiries met with general interest and approval, it was reported. The strongest refusal, the agency indicated, was of this type. “Sorry, we personally see nothing wrong in liquor commercials but as subscribers to the NAB code we don’t feel we can accept them.”

Most, perhaps all the stations on the schedule are not code subscribers, it was indicated.

A year ago Publicker had put out similar feelers but at that time met with what was described as general disapproval.

The Philadelphia White Label commercials are 30-second spots. Copy is constantly changed and tested. No effort is made to hide the nature of the product. Instead the theme would indicate it’s pretty good.

Old Hickory spots are scattered around the country in areas where bourbon is a big seller or where the company figures it might take hold. This, too, is experimental and the agency hopes stations won’t “chicken out” on the schedule.

After 9 p.m. — The Old Hickory spots are placed after 9 p.m., according to Al Paul Lefton. Recent inquiries to stations had produced “surprisingly good” response from both radio and tv, the agency said, though most of those indicating they would accept are smaller stations. Larger stations, which the agency presumed were code subscribers, expressed approval of the spots but said it might not be in their best interest to use them.

Copy stresses “unsurpassed lightness,” mellowness and age of the product. The copy line suggests listeners taste Old Hickory. Tv commercials are similar to four-color ads now appearing in newspapers. They show the product—bottle and decanter—against a pleasing background, well-dressed men and women sitting around with filled glasses. They are not shown actually drinking bourbon. The spots are 20 and 30-seconds on radio, 20 seconds and a minute on tv.

At the Distilled Spirits Institute in Washington it was emphasized DSI adopted a resolution a quarter-century ago opposing use of the airwaves by its members for advertising of hard liquor. Later this was amended to specify both radio and television. The policy has been effective, according to DSI, which knows of no breach by a member. Publicker Inc. and its subsidiaries are not DSI members.

Station Representatives Assn., New York, endorses the principles of the NAB codes, said Lawrence Webb, managing director. He indicated that most member firms would not approve code violations.

At the heart of the liquor advertising problem is the fear of broadcasters that appearance of liquor commercials might lead to congressional legislation that would ban all forms of alcoholic beverage advertising on the air, including beer and wine.

Poor Mixers — Radio and liquor found they didn’t mix easily back in the autumn of 1958 when the subject came up during NAB regional conferences. At that time WCRB-AM-FM Boston was carrying vodka commercials on a late-night good-music program, sponsored by Federal Liquors Ltd. The station had been carrying advertising several years for two package stores.

Theodore Jones, station operator, finally agreed to discontinue the vodka account after the late Harold E. Fellows, then NAB president, criticized stations that sold their birthright for a $20 bill.

About this time WOMT Milwaukee announced it was planning to accept hard-liquor advertising. This also created a stir on the NAB conference circuit. The excitement simmered down when the station yielded to association persuasion and the NAB code.

A survey of broadcasters attending the NAB conference at Boston during the period shows 65% approved acceptance of liquor advertising by WOMT but only 9% of those surveyed said they were approving it.

At any rate, a perennial problem has arisen again as a liquor firm tries to gain access to the effectiveness of broadcasting.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television shows for each day of the week Aug. 10-16 as rated by the multi-city Arbitron instant ratings of the American Research Bureau. These ratings are taken in Baltimore, Chicago, Cleveland, Detroit, New York, Philadelphia and Washington.

Tv's 'wasteland' is lack of hard-goods ads

NO COMPETITION, SO MOTOROLA PUTS MONEY INTO TV

Motorola agrees with FCC Chairman Newton Minow that television is a "vast wasteland," Edward R. Taylor, executive vice president of the Motorola consumer products division, said last week. But where Mr. Minow's wasteland is an area of tv programming, to Motorola it is in durable-goods advertising.

"Television today does not have the advertising of Frigidaire, Maytag and other producers of major household appliances and home entertainment units. There are no Norge ads on tv. Kelvinator is not represented, nor is Hotpoint, nor Hoover. True, some appliances, some radio and tv sets, are advertised on television. It is not a completely no-man's land. But the majority of the good advertising is going into other media," he stated.

The dearth of competition is one reason why Motorola is returning to tv this fall with its own advertising. Over $1 million, he said, over the regular budget in other media, has been allocated for sponsorship of three CBS-TV tv specials this fall. On Sept. 27, Motorola will pick up half the cost of a Jack Benny concert from Carnegie Hall, with Sara Lee Kitchens as co-sponsor. On Dec. 11, Motorola and Timex will share sponsorship of Bing Crosby's Christmas Around the World program. And arrangements for Motorola to sponsor The Power and the Glory, probably with John H. Breek Inc. (shampoos) as co-sponsor, around the first of November, are virtually complete.

These tv specials will be used to promote Motorola's overall company image, Mr. Taylor said, as well as to sell its consumer products. The September broadcast will feature the Motorola line of stereophonic record players; the November special will present the company's tv line and all products will be advertised on the pre-Christmas program. Leo Burnett Co., Chicago, is the Motorola agency.

RCA pushing color tv
via NBC programming

RCA, the pioneer company in color tv (last year it made about 140,000 of the approximate 150,000 sets sold in this country), has redlined the first big salvo in what should be its most ambitious sales promotion campaign in a number of years.

Raymond W. Saxon, RCA's marketing vice president, is announcing today (Aug. 21), the scheduling of three special "Color Nights" on NBC-TV this fall. The "nights" are slated to coincide with the peak periods of the fall retail selling season and are being promoted as a means of encouraging color tv dealers to offer in-store demonstrations of the sets on Oct. 4, Nov. 1, and Dec. 6. Wednesday was chosen for the color demonstrations because it was indicated that the greatest number of dealers could take part in the promotion on that day of the week. Dealers also will be asked by RCA to offer the in-store demonstrations on Saturdays, which is a naturally heavy color programming time on NBC-TV.

The first "Color Night" on Oct. 4 will actually start in the daytime with a three-hour color lineup from 10 a.m. to 1 p.m. On such shows as Say When, Play Your Hunch, The Price is Right, Concentration, Truth or Consequences, and It Could Be You. These shows will be followed by the opening game telecast in color of the World Series.

The evening color schedule for Oct. 4 begins with the hour-long Wagon Train program at 7:30 p.m., followed in succession by the half-hour Joey Bishop Show, the full-hour Perry Como Show, and another, the 60-minute Theatre '61 drama, "The Spiral Staircase." The other "Color Nights," will both offer 3½ consecutive hours of color telecasts.

RCA will support the "nights" through both tv and print advertising, special displays, and mats and mailers, and a full color introductory spread in the September issue of Reader's Digest. NBC-TV's full-hour program Walt Disney's Wonderful World of Color, will carry the brunt of the promotional campaign. The theme for the promotion will be: "Every day you're missing more and more if you don't have color tv."

RCA is said to be spending about $5 million in an effort to perk up the sale of its color sets. The company believes sales of the sets this year should increase by 50% over 1960.

DuPont's Zexel, Teler set big radio drives

DuPont is set for the largest radio campaign in its history for its anti-freeze and coolant brands, Radio Advertising Bureau, New York, said last week.

Zexel, duPont's permanent-type anti-freeze, reportedly will get the bulk of

COMMERCIALS IN PRODUCTION

Listing include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

A.P.S. Inc., 6 Eest 46th St., NYC 17
Channel Master Corp. (Antennas), two 60s, live & semi-animation, film, Hilliard A. Schendorf prod. mgr. Approx. cost $2,700.

Smith-Corona-Marchant (Typewriters), two 60s, tape. Chuck Holdren prod. mgr. Agency: BBDO; Ev Hart prod. mgr.

36 (BROADCAST ADVERTISING)
"Eye on St. Louis" concerns itself with what’s unusual, interesting and important locally—such as the 630-foot Saarinen arch being constructed on the riverfront—and has itself become unique in the process. For "Eye on St. Louis" (fully sponsored for three years) commands an average rating of 16.6—higher than the ratings of 80% of all prime-time programs, local or network, on the other three stations. This popularity, remarkable for a serious public affairs program telecast nightly (10:15 Monday-Friday), aptly demonstrates what happens when a television station has close rapport with its audience and a deep-grained understanding of local community needs and tastes. Such a station is CBS Owned KMOX-TV, first with audiences in St. Louis in every Nielsen report for more than three years.
the budget. Telar, all-year coolant, will use the rest.

At the same time, RAB noted Union Carbide plans to spend about $1 million in radio this winter for Prestone, a competitor of DuPont's Zexel.

RAB to study retailers in series of meetings

Radio Advertising Bureau's persistent efforts to lure the nation's big department stores into radio will take a "psychoanalytical" approach next month when RAB's series of eight regional management conferences get underway (see Datebook, page 14).

RAB reported last week that top-level radio station management attending the series of two-day meetings will get a close look at the major retailers. The Bureau will use information gathered in the course of its "department store challenge" study as it "toothcombs" the store executives and "the stratified confines of the major department stores they head."

Information to be included in the retailer profile-making: duties, typical business day and business viewpoints with suggestions on how to work with and not against their opinions. Other points to be covered include the techniques of dramatizing the radio buy to store personnel and a profile of the duties, opinions and general outlook of typical store buyers.

ABC Radio reports record-breaking gross

ABC Radio grossed $1,682,469 between July 15 and Aug. 10; 90% of it in the Aug. 1-10 period, according to Jim Duffy, the network's national sales director. He said $1,382,180 of the record-breaking gross represented new business and $300,298 was renewals.

Campbell Soup Co., a new ABC Radio client, bought a $500,000 schedule in Flair, Breakfast Club and weekday newscasts beginning Sept. 17.

Other new accounts, each spending $150,000 to $200,000, include Miller Brewing Co., Mennen Co., American Motors and Thomas Leeming & Co.

IBA 'Spikes' to honor outstanding commercials

The second annual International Broadcast Awards of the Hollywood Advertising Club will be presented to the creators of the outstanding radio and television commercials broadcast this year anywhere in the world at a banquet in Hollywood on Feb. 13, 1962.

The date was announced last week by Kenneth C. T. Snyder, vice president of Needham, Louis & Brobrby and chairman of the IBA awards commit-

tee. Mr. Snyder said brochures are being mailed to prospective competitors throughout Europe, Asia and Africa, as well as the Americas, with complete details of the competition. The deadline for entries, he said, is Dec. 31, 1961, at the HAC offices at 6362 Hollywood Blvd., Hollywood 28, Calif. Entry fees are $5 for each radio or television commercial, $10 for each tv spot. Competition is open to any advertiser, advertising agency, producer or broadcaster in the world. Radio entries may be submitted on tape or disc, any speed. TV entries may be on film, 16 mm or 35 mm, or on tape.

The television competition is divided into individual categories for live action, animated art, combination and video tape, each further divided into commercials of less than 60 seconds, 60 seconds and more than 60 seconds, ID's, local-regional (for small budget advertisers), stop motion, station and program promotional spots, plus special technical awards for cinematography, design, direction, special effects, use of music and use of color.

In radio, awards will be presented for open, dramatic, humorous, musical and local-regional commercials of less than 60 seconds, and of 60 seconds or longer, plus ID's, station and program promotional spots.

For both radio and tv there will be a special marketing award for the best complete broadcast-based campaign and there will also be sweepstakes awards for the world's best radio and tv commercials of the year. The IBA award is a tower rising from a metal arch, designed by Louis Liets, Hollywood artist. Since their original presentation last February at the first annual IBA awards banquet, the IBA trophies have become familiarly known as "Spikes," taking their place alongside the "Oscars" and "Emmys" of the Motion Picture and Television Academy.

$3.5 million campaign for new Lever product

Lever Bros., New York, is investing approximately $3.5 million in a campaign on behalf of Mrs. Butterworth's Syrup to introduce the product throughout the country, starting this week. A major portion of the budget will be in television, including a heavy spot schedule in daytime and evening time periods and representation on all six of Lever's nighttime network programs.

The product was placed in test markets last year and now has distribution west of Kansas City. The advertising copy stresses that the syrup contains butter and implies that the product does not require the addition of butter. The agency is J. Walter Thompson Co., New York.

Radio's BBB outlines program for the year

The recently-formed Better Broadcast Bureau Inc., New York, which will attempt to develop new business in national spot radio on behalf of station representatives and station groups, last week announced its program for the coming year.

Clifford J. Baborka Jr., president of BBB, said the organization is preparing 24 major presentations (to be known as "A" presentations), which will be "custom-tailored" for a particular advertiser who uses spot radio sparingly or not at all. The presentations offer prospective advertisers fully-produced copy platforms, special marketing research studies for each account or product, and a specific radio plan designed to meet a client's marketing and distribution strategy, according to Mr. Baborka.

BBB also is preparing 48 "B" presentations which, Mr. Baborka said, will attempt to attain one or more of the following objectives: help increase radio budgets of current users; develop new strategies for radio of current users; work with one or more station representatives on special sales projects; create copy ideas or plans, or develop specific presentations as required by one or more representatives.

To Second-Stage • BBB already has made three major presentations to advertisers in the cereal, watch and pharmaceutical fields, Mr. Baborka reported, adding that "BBB has been invited in each case for the second-stage follow-through."

The organization has been retained by several station representatives but Mr. Baborka declined to name the clients at this time.

BBB's objective is to obtain for national spot radio a more equitable share of the advertising dollar. Mr. Baborka observed national spot today accounts for "less than 2% of total advertising expenditures, compared with more than 7% for the directly competitive medium of national newspapers." He added "this disparity in billings is even more glaring in the face of the greater number of radio stations (4,000 am and 850 fm), compared with newspapers (1,763 daily)."

"To support its radio sales-building effort, the BBB has retained the services of the marketing research division of George Fry & Assoc., Chicago, and the John Slade Ely Center for Health Education Research Inc. The latter organization will provide studies and material in the mass-consumed food and drugs areas to the BBB.

The BBB makes its headquarters at 16 E. 42nd St., New York 17. The telephone number is Yukon 6-9680.
Another Completely GATES Equipped Radio Station . . .

WWIL AM & FM, Ft. Lauderdale, Florida

Covering Southeastern Florida's Famous Gold Coast 24 Hours A Day

New and modern facilities, the leadership line of broadcast equipment, a fresh and appealing format, a jump from 1,000 watts to a booming 10,000 watt AM directional signal and the superior high-quality sound of FM . . . all make up the New Voice of WWIL AM & FM. From the top of the radio dial—at 1580—WWIL serves the fabulous Florida Gold Coast from Miami Beach to Palm Beach with 10,000 watts daytime and 5,000 watts nighttime power.

This modern AM and FM radio station wanted the finest broadcast equipment money could buy . . . so they chose Gates . . . from remote amplifiers to transmitters, complete with a studio installation of three audio consoles, five turntables and a Cartritape system, plus numerous audio and transmitter accessories. And, big WWIL-FM will soon install Gates stereo. A total broadcast equipment package for total performance!

Colonel William A. Roberts, Owner

Gates FM-5B 5,000 watt FM transmitter, BC-10P 10,000 watt AM transmitter and directional antenna equipment installed in WWIL's new AM & FM Broadcast Center.

HOW TV ‘MADE’ COLOR PLUS

Fresh from successful use of tv for nail enamel, Color Plus plans similar campaign for lipstick

National tv spot and “spot” participations on the networks have formed the backbone of a national introductory advertising program for Color Plus nail enamel, which entered test markets a little less than a year ago. The product currently is estimated to have a 13.3% share of the nail enamel market’s $33 million annual dollar volume.

That Lanolin Plus Inc. believes “tv did the job” for Color Plus is evidenced by the advertiser’s preparations to introduce a companion product in October, Color Plus Lipstick, again by national tv spot and network participations. The new product reportedly will be packaged as a “piggy back” to the nail enamel.

Lanolin Plus and television have been growing up together 15 years and the advertiser has become known increasingly as a tv account. Joseph Chira, ad director, bases the early success of Color Plus enamel on the company’s past experience in the medium. Knowing how and when to use tv, said Mr. Chira, “we took advantage of its flexibility in terms of choosing markets, selecting audiences, getting as much frequency as we could pay for, test marketing, in-store tv tie-ins, and the more sophisticated development of network spot carriers.”

Summer Activity • The advantages of network tv’s participation buying, according to Mr. Chira, “gave us the opportunity to tell our product news in minute messages dispersed among a number of programs this summer, which gave us different audiences plus the programs’ merchandising benefits.” (also see story page 23 on participations). Since June, Color Plus has participated in ABC-TV’s Cheyenne, Asphalt Jungle, Roaring 20s and Guest Ward Ho, and NBC-TV’s Michael Shayne.

Another consideration in summer participation buying, Mr. Chira pointed out, was the opportunity for summer discounts, which made it economically feasible to test network usage for the product. In addition, participations reinforced the blanket of spot tv buys in the top 50 markets.

The Color Plus ad budget in 1961 will exceed $1.5 million, reportedly the largest ad budget for any nail enamel. Al Plaut, Color Plus account executive at Daniel & Charles Inc., New York, agency for both the enamel and the upcoming lipstick brand, said tv is allocated about 75% of the total budget.

Test Stage • San Francisco and Los Angeles were the initial targets of the Color Plus barrage last September. The strategy was to reach women in their 20’s to mid 40’s—the group which uses more nail polish than others. The first phase of the campaign was the use of minutes to relate a therapeutic message about the enamel’s lanolin content to women who have the problem of “splitting, breaking or cracking” nails, as well as those women who want to avoid the problem.

Within eight weeks, Color Plus had achieved a 26% share of the San Francisco market and a 23% share in Los Angeles. On Jan. 1, 1961, the product entered the top 20 markets, and by April it was in some 150 markets. Since the test marketing stage, Color Plus commercials and print ads (mostly fashion magazines) have alternated between the therapeutic claims and a fashion approach, which emphasizes the variety of shades. Some 10 new shades have been brought out since the original 13 were introduced on the West Coast. The added colors are in response to requests from consumers, retailers and beauty salons, all of which also asked for a matching lipstick.

Lipstick On Way • Color Plus lipstick, with 35% lanolin, will be introduced in October in a combination lipstick-enamel package to retail at $1.50. Commercials are now being prepared at Daniel & Charles, which also just finished a new series of enamel commercials (see pictures). A “mix” of minutes, 40s, 30s and 10s, will be used to carry on the full polish campaign in approximately 100 markets. Lanolin Plus also ordered minute participations for Color Plus in NBC-TV’s new season entry, Saturday Night at the Movies.

Now that the task of informing the public of Color Plus enamel’s arrival on the beauty care scene has been completed, the objective is to relate the product’s “uniqueness” on a continuous, evenly-pressured level. The buying is geared to get more cumulative reach than frequency.

But the basic philosophy of Lanolin Plus product advertising remains the same. As stated by Mr. Chira: “People watch commercials for product news. The advertiser who gets his message across to the consumer will get business once the public’s interest is aroused and if the product answers a need.”

MOISTURE SHIELD

HELP'S STOP SPLITTING NAILS

40 (BROADCAST ADVERTISING)
GROWING! This dramatic new concept in documentaries is being picked up fast from coast to coast! Every day more and more markets join the success parade of these twenty-six hour-long specials starring such renowned figures as Lindbergh, Al Smith, General MacArthur, the Duke and Duchess of Windsor, De Gaulle, and more. Actual, on-the-scene filmed highlights in their lives, from the world-famous film libraries of Hearst Metrotone News, are skillfully augmented with new footage from Hearst Metrotone cameramen throughout the world. All brilliantly woven together by the masterful writer John O'Toole, to give a true "PERSPECTIVE ON GREATNESS." Dramatic entertainment of real prestige and stature. The kind to attract important local advertisers. Plus this practical bonus: a single, compact, easily stored source of material on famous people—complete shows to run at a moment's notice when needed.

WEST SEES POOR AD IMAGE

WSAAA survey of media, ad men finds 70% feel advertising's public image needs improvement

A need to upgrade the image of advertising with both the general public and top business management is seen in results of the 1961 survey of western advertisers, advertising agencies and advertising media conducted by the Western States Advertising Agencies Assn., the second in an annual series inaugurated in 1960.

The survey was completed in June. Returns were received from 100 national advertisers, 165 advertising agencies and more than 170 representatives of radio, television, outdoor, newspapers and business and consumer publications in the western states, including Alaska and Hawaii.

Asked, "Do you believe the advertising business today has a poor public 'image?'" 70% of the advertisers, 70% of media and 71% of the agencies answered "yes." This would indicate advertising's reputation has suffered rather than improved during the past year.

The agency-advertiser-media view of management's opinion of advertising is equally discouraging. Nearly two-thirds of media (63%) and well over half of agencies (54%) expressed the belief that management is not fully convinced of the importance and value of advertising. Advertisers themselves were divided almost evenly, a bare majority (51%) believing advertisers do appreciate what advertising can do for them.

The always controversial subject of agency remuneration revealed a sharp difference of opinion as to whether the 15% commission generally in use is enough for an agency to make a sound profit. More than three-fourths of the advertisers (76%) and more than half of media (56%) felt an agency can make a profit on a 15% commission. But only 19% of the agencies agreed with them, the other 81% contending this is not enough. Only 7% of the media, 10% of the advertisers and 14% of the agencies, however, felt media would tend to increase the amount of the commissions to more than 15% in the next 12 months.

Optimistic - Agencies were generally optimistic about the outlook for advertising in the immediate future, 57% stating the future looks brighter, 35% feeling it will remain about the same and only 8% seeing gloomier prospects.

More than half (55%) of the advertisers responding to the WSAAA questionnaire reported the recent recession did not affect their advertising expenditures, but 45% said the recession caused changes in their ad budgets.

Licensing and standardization of qualifications for advertising agencies by the individual states was favored by a larger segment of the agencies (46%) than by either advertisers (25%) or media (39%), but only 37% of the agencies felt licensing would benefit them. Only 13% of the advertisers

THE MEDIA

Collins Sends Regrets to Georgia

Won't be able to attend grass roots seminar

Miffed at NAB President LeRoy Collins' inability to accept an invitation to attend the Sept. 15 grass roots seminar sponsored by the Georgia Assn. of Broadcasters, H. Randolph Holder, WGAIU Athens, Ga., president of GAB, had some tart comments:

"We know the NAB president is busy, but Mr. Collins himself suggested a meeting of broadcasters and government officials and here is his chance to get down to the real heart of our problems in a location far removed from the bigness of New York or Washington. It poses a real problem for broadcasters when their leading spokesman doesn't discuss current and critical problems in an informal atmosphere removed from the pressures of high-level conferences.

"I think it is time NAB realized that its strength comes from its small grass roots members, and it is unfortunate that Mr. Collins turned down this excellent chance to learn what really is going on in broadcasting. We hope he can be with us."

Mr. Collins could not be reached, but it is understood that he is scheduled to chair a meeting of the Dept. of Commerce's Committee on Area Redevelopment scheduled to meet that day.

The South East Radio-TV Seminar will meet Sept. 15 in the Biltmore Hotel in Atlanta, starting at 10 a.m. It will continue through dinner that evening. Sponsored by GAB, it is intended to be a meeting of the presidents and secretaries of seven state broadcaster associations plus others (Broadcasting, Aug. 14).

Among the topics to be discussed
thought agency licensing would benefit them to 61% who felt it would not (the other 26% were uncertain). Media voted 39% that agency licensing would help them to 41% thought it would not, and 20% were uncertain.

About half of the respondents (51% of advertisers, 50% of agencies, 40% of media) felt that the general diversification of product lines and sales divisions within many advertisers' organizations tends to create significant increases of "conflict of interest" in existing and prospective accounts. But only one-third (35% of advertisers, 36% of agencies, 33% of media) felt that these situations are actually hazardous to the advertiser.

The vast majority of all three groups said that the advertising agency system is the best method of serving their interests.

**Agency appointments...**

- Lake Central Airlines, Indianapolis, appoints John W. Shaw Adv., Chicago.
- San Giorgio Macaroni Co., Lebanon, Pa. (macaroni, noodles, spaghetti and other pasta products), appoints Ketchup, MacLeod & Grove, Pittsburgh.

will be the FCC's new program forms, government regulation, censorship and NAB's leadership. No formal agenda is planned.

**Down to Earth** - Mr. Holder set the keynote with this observation: "Distant experts who attend only high-level symposiums and don't have to battle the day-to-day problems of the local broadcaster just cannot speak with authority for us in national councils or make our local views known to the government. Our September meeting will be broadcasters talking about broadcast problems as they really exist, not the way some think they exist."

Among those who have already accepted the GAB invitation to the Sept. 15 seminar:

Kenneth Giddens, WKRG Mobile, Ala., president of the Alabama Broadcasters Assn.; Fred L. Beard, WJDX Jackson, Miss., president of the Mississippi Broadcasters; Lee Ruwitch, WTVJ (TV) Miami, president, Florida

Nothing succeeds like success, and two resounding news coups scored by WCKY in the last 3 weeks have convinced Cincinnati that Total News and Information is not just a phrase on WCKY. When the El Paso plane hi-jacking story broke, WCKY maintained an open phone line into a hanger at the sealed-off airport for 8 solid hours, giving WCKY listeners continuing, live, eye-witness reports throughout the day. UPI, using tapes fed by WCKY, claims it ran 25 minutes ahead.

Then, less than a week after the El Paso story, WCKY interviewed Hamilton County Prosecutor C. Watson Hover...longtime critic of Ohio Governor DiSalle. In response to questioning, Hover agreed to debate the Governor on the question of whether or not DiSalle had exceeded his executive powers in commuting the death sentence of a woman Hover had successfully prosecuted for murder. In a matter of hours, the story broke across the state...front page headlines, TV bulletins, and radio interviews. DiSalle called a special press conference the next morning, and accepted Hover's offer to debate. WCKY is presently completing arrangements for this face-to-face meeting...and has invited interested radio and TV stations to air the proceedings. These two incidents are indicative of why WCKY is fast becoming Cincinnati's most talked-about news station. You talk to your AM Radio salesman about WCKY!

50,000 WATTS • CINCINNATI
Manager Shapiro braves audience in WFAA-TV forum program

“I object to your interruption of programs for weather bulletins.”

The objector: a member of the audience of WFAA-TV Dallas.

This put the station on the spot—a spot it likes to be put on during its new forum program, Let Me Speak to the Manager.

Every Sunday, 10:30-11 p.m., Mike Shapiro, WFAA-TV general manager, answers vote critics on a program that started June 18 as an experimental quarter-hour that has now been expanded to a major feature.

About the weather bulletins; here is Mr. Shapiro’s on-the-air reply: “After an investment of thousands of dollars for radar equipment which is vitally important in the area because of tornadoes, we feel this is our obligation as a broadcaster and we will interrupt at any time during programs to bring this information to our audience. If we’re wrong, let us know.”

And they did. Tremendous mail came in, overwhelmingly in favor of continuing weather bulletins.

That one was easy. Some aren’t. Like this: “Your program Naked City ends with the words, ‘There are eight million stories in the Naked City.’ If this is true, why do we have to have re-runs?”

Real Good Point • Mr. Shapiro replied frankly on the air, “You have a real good point there and we don’t know the answer to it.”

Mr. Shapiro speaks as manager. Questions are read to him by a staff man. The manager is seated at a simple office set and replies to questions in an easy, informal and interested manner. And he mentions names and call letters—his own and others—in giving serious replies to viewers’ letters.

“We are overwhelmed by the response;” he said, “We had been wanting to start such a program for a year. FCC Chairman Newton Minow’s wasteland speech at the NAB convention in May triggered it and viewer mail has kept the program moving.”

Viewers are happy, judging by the response. They’re grateful for the chance to have their questions answered by the station manager himself. “I find it quite refreshing that you don’t pull any punches about your station and your competition,” a viewer observed.

The program now includes guests. The first was Bill Jones, director of advertising for Frito Co., Dallas. He voiced the advertiser’s viewpoint in response to questions about commercials, using the same frank and straightforward approach featured in Mr. Shapiro’s replies. PTA members and others will appear as guests, the station says.

Assn. of Broadcasters; Ken Ballinger, executive secretary of FAB; Lou Neale, WBEU Beaumont, S.C., president of the South Carolina Broadcasters; James Howe, WIRA Fort Pierce, Fla., NAB Fifth District Director. Mr. Howe will be conference moderator.

Invitations also went to FCC Chairman Newton N. Minow and other state association executives.

The seminar will be the forum for states representing 25% of all AM radio stations and 15% of all TV stations in the country, GAB noted.

IBEW joins AFTRA in strike

Hollywood Local 45, International Brotherhood of Electrical Workers, at a meeting Wednesday night, voted unanimously to support the American Federation of Television & Radio Artists in its five-week-old strike against KFWB Los Angeles. The eight IBEW members employed at KFWB were still on the job Thursday, despite the AFTRA picket line around the station (Broadcasting, Aug. 14).

Changing hands

ANNOUNCED • The following station sales were reported last week subject to FCC approval:

KRGV-AM-TV Weslaco, Tex.: Sold by LBJ Co. to Kenco Enterprises Inc. for $1.4 million. Kenco Enterprises is principally owned by John A. Kennedy, veteran broadcaster. Stoddard P. Johnston, KTVU (TV) San Francisco sales executive, is vice president and will be operating head of the Weslaco stations. No changes in personnel are planned. LBJ Co., headed by Mrs. Claudia T. Johnson, owns KTBC-AM-TV Austin, 25% of KWTX-AM-TV Waco, and through KWTX, 50% of KBTX-AM-TV Bryan, all Texas, and 75% of KXII (TV) Ardmore, Okla. LBJ Co. bought 50% interest in KRGV-TV in 1956 for

the sales we reject...prove our worth

In selling or buying a broadcast property, one of your greatest protections is Blackburn’s often demonstrated willingness to reject a sale rather than risk our reputation. For our business is built on confidence, and no single commission can be worth as much as our good name. Why hazard the risks of negotiating without benefit of our knowledge of markets, of actual sales, of responsible contacts?

“I personally took offense at Chairman Minow’s charge that all broadcasters had failed,” Mr. Shapiro said. “I wanted to get across to the audience that WFAA has taken its public affairs obligations seriously and at the same time have the people tell us if they like what we give them. If they don’t we want to know why. And we want to know how they feel about commercials and station personalites.”

All Kinds • Mr. Shapiro acknowledges all mail, some of it intriguing, informative and humorous; some crackpot. One problem—the questions become repetitious. “We try to solve this by using visuals, by revising the answers to include other angles, or by getting an expert to appear on the show and contribute new ideas on the same subject.”

Stations around Texas, hearing about the show, have borrowed tapes. TVb has asked for a set of them.

Radio gets its share of the program. Mr. Shapiro does two five-

$5,000 plus loan of $140,000; acquired the remaining 50% in both radio and tv in 1958 for $100,000. KRGV operates fulltime with 5 kw on 1290 kc.

KRGV-TV, ch. 5, began in 1954.

• KXLY-AM-FM-TV Spokane, Wash.: Sold by Joseph Harris and Norman E. Alexander to Morgan Murphy interests for $3.25 million ($2.6 million for the television station; $650,000 for radio stations). (Closed Circuit, Aug. 14). Mr. Murphy owns newspapers and the following broadcast properties: WEAU-TV Eau Claire, WLUK-TV Green Bay, WISC-TV Madison, all Wisconsin; WLUU-TV Marquette, Mich.; KVOL Lafayette, La. James R. Agostino, vice president and general manager of the Spokane stations, will remain in that capacity. KXLY 5 kw fulltime on 920 kc; KXLY-FM is 2 kw on 99.9 mc; KXLY-TV is on ch. 4 and began operating in 1953. Both are affiliated with CBS. The KXLY stations were bought by the Harris-Alexander group in 1954 by Ed Craney and associates for $134 million. Broker was Blackburn & Co.

• WYSL Buffalo, N. Y.: Sold by McLendon Corp. to Leonard Walk, James H. Rich and Bernard Friedman for $230,000. Messrs. Walk, Rich and Friedman own WAMO Pittsburgh, Pa. Sale of WYSL facilities is necessary because McLendons are buying WBNY Buffalo (Changing Hands, July 24). WYSL operates with 1 kw daytime on 1080 kc. Broker was Blackburn & Co.

• KASO Minden, La.: Sold by Frederick A. W. Davis and Jimmy Hugh Howell to Harold (Boe) Cook for $50,000. Mr. Cook is former manager of KGAK Gallup, KMIN Grants, KICA Clovis, all New Mexico. Mr. Davis retains his interests in WGLC Center-

programs on WFAA-TV Dallas, by General Manager Mike Shapiro (l), and Bill Jones (r), advertising manager of the Frito Co.

but letters deal strictly with radio topics.

EXCEPTIONAL QUALITY BUYS

WEST—Profitable daytime servicing single station market of 40,000-plus. Attractiveness of this physical facility is exceeded only by beauty of the area itself. Good gross-cash flow record. Priced at $360,000.00 on long terms.

SOUTHEAST—Major market fulltime radio station presently billing $160,000.00 annually and capable of doing much better as previous track record indicates. Priced at $250,000.00 with $70,000.00 down and balance to be negotiated.

John F. Hardesty, President

Broadcasting, August 21, 1961
And now, the girls from Syracuse

It was bound to happen—a female version of NAB’s annual Harvard seminar—and it did when the American Women in Radio & Television held its first Mid-Career Seminar at Syracuse U.

Eighteen members of AWRT, including past president Esther Van Wagoner Tufty, became coeds-for-a-week.

This year’s experimental venture, which is to become an annual event, was produced in conjunction with the radio-tv department of Syracuse U. and the Educational Foundation of AWRT. It dealt with four main subjects: audience, programming and community needs; business of broadcasting; new look at American women. Montez Tjaden, AWRT president, termed the seminar an “overwhelming success, more than we ever imagined, and something we’ve needed for a long time.”

Next summer’s seminar, the place and date of which have not been determined, will likely have a midwest-

5% of C-C sales come from stations

The three radio stations comprising the Crowell-Collier Broadcasting Corp. (KDWB Minneapolis-St. Paul, KEWB Oakland-San Francisco and KFWB Los Angeles) account for about 5% of the total sales volume of Crowell-Collier Publishing Co., C-C President Raymond C. Hagel said Wednesday (Aug. 16) in a talk to a group of financial men in Los Angeles.

Advertising sales of these stations dropped slightly in the first three months of 1961, he said, but rose enough during the second quarter that the first half ended with the broadcasting division “ahead of 1960 in both sales and operating margin.”

Referring to the questions raised by the FCC about the operations of the Los Angeles and San Francisco stations, Mr. Hagel said: “Within the last few days we have furnished the FCC with additional information to help them in their deliberations. We are hopeful that the matter will be resolved in our favor and that the license for KFWB, the point at issue, will be renewed in the near future. If the commission is not satisfied, it has the right to call a hearing.”

“About 60% of Crowell-Collier sales volume comes from Collier’s Encyclopedia, a number of other reference books and the Harvard Classics,” Mr. Hagel reported. A new young people’s encyclopedia is in preparation, he said. The C-C General Publishing Division includes Macmillan Co., with a general book list although 75% of its business is in the educational book field; Free Press, publisher of professional books and graduate textbooks, and a new paperback department, Collier Books, which will begin operations this fall with a balanced list. And in June, Mr. Hagel noted, C-C expanded its service to the educational market by acquiring Staples, ABC New York; Lilian Okun, New York free lance writer-producer; Wana McDole, radio-tv director, public schools, Seattle, Wash.; Margaret Mary Kearney, WCAU-AM-TV Philadelphia; Margaret Strickland Parks, National Adv., Washington; Modane Marchbanks, Corn Products Co., New York; Dr. A. William Bleum, director of the seminar.

Not available when the picture was made were Nena Badenoch, Chicago radio-tv consultant and chairman of the board of trustees of the AWRT educational foundation; Kay Bailly, in charge of public relations and radio-tv for the Junior League Asn., New York; Doris Brown, president and general manager of WKBC North Wilkesboro, and WATA Boone, both North Carolina; Virginia Pate, president and general manager of WASA Havre de Grace, Md.; Del Roberts, assistant to the director of radio-tv for the American Cancer Society, New York.

La Salle Extension U. correspondence school.

Overall, C-C had sales totaling $27,977,000 for the first half of 1961, slightly below the first half of last year, but Mr. Hagel predicted that the year’s total, excluding La Salle, will equal or exceed the $64.4 million gross for 1960. Net earnings for the first half of 1961 were equal to 28 cents a share, down from 53 cents for the first half of 1960, he said. He attributed the drop to “start-up expenses for the paperback operation and the various new encyclopedias and to the expansion taking place in editorial and marketing organizations at other points throughout the company. . . . Despite these relatively heavy outlays, we expect per-share earnings to exceed slightly the $1.35 reported last year.” The financial position is sound, he said, noting that “when the agreement for the purchase of WMGM New York expired last month, $4 million became available for working capital.
Etv outlets on catv proposed for NCTA

A plan for every community tv system in the country to carry a local educational tv station where there is one to be had was adopted by the National Community Television Assn. board last week.

The board, meeting in Chicago, charged its educational tv policy committee to put the program into effect. Homer Bergreen, Seattle catv executive, is chairman of the committee, and will work closely with William G. Harley, president of the National Assn. of Educational Broadcasters; Loren Stone, chairman of the tv board, NAEB; Richard B. Leeii, director, audio-visual service, San Jose State College, and Lee Campion, technological development, National Educational Assn.

The board also:
- Named George J. Barco and Al Ricci to its executive committee. Mr. Barco is president of the Meadville, Pa., catv; Mr. Ricci, Keene, N. H.
- Authorized a study of a plan for a management institute.
- Scheduled second legal seminar on catv for December in Chicago.

NCTA President Glenn Flinn, Tyler, Tex., named the following committee chairmen:
- Jim Lenahan, Coos Bay, Ore., membership; Jack Crosby, Del Rio, Tex., budget and audit; Fred Goddard, Aberdeen, Wash., industry relations; Fred Stevenson, Rogers, Ark., public affairs; J. R. Willis, Granite, Okla., regional and state; Courtney Kirkeeng, Phoenix, Ariz., information; Kip Fletcher, Pottsville, Pa., standards; J. Holland Rannels, Cumberland, Md., convention host; R. L. Stoner, LaGrande, Ore., safety; Gene Schneider, Casper, Wyo., constitution and bylaws; Ed Whitney, AMECO, Phoenix, Ariz., industry advisory.

Storer chooses Zwicky
For D. C. legal office

The establishment of a Washington legal office was announced by Storer Broadcasting Co. last week. Named to head the office is Warren C. Zwicky, a partner in the Washington law firm of Jones & Zwicky. The new office, which will handle Storer's Washington legal affairs, is part of the company's legal department, headed by John E. McCoy, vice president for law and finance and secretary.

"FIRST WE'LL TEST IT IN SOUTH BEND"

Find out fast what the Midwest thinks of your new product by testing first in the South Bend market. The conditions are ideal: isolation from outside TV... a good mixture of employment in industry, commerce and farming... incomes way above average.

The per household income in South Bend's metro area is $7987, highest in Indiana. But it's only part of the total South Bend market picture. This is a 15-county market with a buying income of $1.7 billion! The people can afford your product, all you need do is tell them about it.

There's one way to do this effectively and economically.... use WSBT-TV. From sign-on to sign-off WSBT-TV delivers 41% share of sets in use.* And this in a 3-station market. Test in South Bend with WSBT-TV. Get market and coverage facts from Raymer.

* Nielsen Survey, Feb. 20-March 19, 1961
of the company. Mr. Zwicky will also work with Earl H. Gammons, Storer representative in Washington.

Mr. Zwicky, 32, has been in Washington communications law practice since 1953 when he was graduated from Harvard Law School. He is a member of the Wisconsin and D. C. bars and is admitted to practice before the FCC, the U. S. Court of Appeals and the U. S. Supreme Court. He received his undergraduate degree from the U. of Wisconsin in 1950. He is a native of Oshkosh in that state.

Robert F. Jones, former Ohio congressman and FCC commissioner, will continue his law practice in Washington.

**WIRL warns listeners about dangerous fumes**

The effectiveness of radio during an emergency was again proved when a line from a barge on the Illinois River ruptured, saturating the air above nearby Peoria, Creve Coeur and North Pekin with 150 tons of compressed ammonia fumes.

WIRL Peoria told Broadcasting of its role in helping to avert a possible serious situation with a quick appearance on the scene and an equally quick series of broadcasts warning its listeners of the impending danger and urging them to remain calm.

The station’s seven mobile units, cruising around the danger area, gave wind reports, directed persons to shelter areas and broadcast the word when the mayor decided to evacuate the city.

WIRL was on the air more than four hours giving reports and instructions to the community. It made more than 60 broadcasts.

Last week, Robert W. Frudeger, president of WIRL, reported that the incident has inspired a research team from the U. of Pennsylvania to document the events.

**Accuracy preferable to speed, says Gramling**

Newsmen of the world face their greatest responsibility today, Oliver Gramling, assistant general manager of the Associated Press, told the recent convention of the Texas AP Broadcasters Assn. He said the world crisis places upon broadcasters and newsmen of all types "the burden of taking a little bit more time and being satisfied with being second or third with the news, but being right."

KCRS Midland received the top news award, one of 19 member stations sharing 30 awards. A special plaque went to Herb Humphries, KCRS news director for covering the story of a West Texas farmer's murder of his four children and his suicide.

The association elected Lee Butler, KTRE-AM-TV Lufkin, president, succeeding Roy Eaton, KXOL Ft. Worth.
Free tv fighters gather new steam

Pay tv foes, buttressed by a "substantial" financial donation from the Theatre Owners of America, plan to appeal the July 28 ruling of the Arkansas Public Service Commission. The decision directed Southwestern Bell Telephone Co. to provide rates and lines to the Midwest Video Corp., an affiliate of International Telemeter Co., for establishment of a closed circuit wired pay tv system to about 5,000 homes in Little Rock (at deadline, July 31).

The anti-pay-tv forces—Independent Theatre Owners of Arkansas, a state affiliate of TOA, United Theatres Corp., and Rowley United Theatres—all of whom are represented by attorney Howard Cockrill, announced last week they will file notice of appeal with the Arkansas Appellate Court before the Saturday (Aug. 26) deadline for such action. The movie exhibitors again will contend that the Arkansas Public Service Commission does not have jurisdiction to rule on the proposed pay tv test because it's an interstate matter.

Plans for the appeal were formulated only after the theatre owners' finance committee voted unanimously to advance the necessary funds—believed to be more than $20,000—for the court fight. The Arkansas movie exhibitors also are contributing to the legal war chest.

The appeal will mark the second pay tv battle that the movie exhibitors are waging in the courts. They previously filed a brief in the U. S. Court of Appeals for the District of Columbia against FCC's decision last February authorizing RKO General to test the Phonevision system for three years on WHCT (TV) Hartford, Conn. (Broadcasting, July 31).

Media notes...

Tall tower • The Storer Broadcasting Co. has announced the beginning of construction of what it describes as the world's tallest self-supporting tv antenna at its WITI-TV Milwaukee facility. Resting on a triangular base, the 1,077 foot high antenna is designed similar to the Eiffel Tower of Paris. The antenna is expected to be operational early in 1962.

Third quarter payment • AB-PT Inc., New York, announced Aug. 14 the third quarterly dividend of 25¢ per share on outstanding common stock and 25¢ per share on outstanding preferred stock, payable Sept. 15 to holders of record on Aug. 25.

WIP move • WIP Philadelphia this fall will move to new and larger studio facilities and offices in the Wellington Building, 19th & Walnut Sts.

If you think that Southern and Central Michigan are the only IMPORTANT parts of this state, read this!

WWTV covers more homes in Northern Lower Michigan than are available in ten entire states*. Ratings far exceed those of any other television station in this area—and to approach WWTV's coverage in Northern Lower Michigan you would need 13 daily newspapers or 16 radio stations!

Add WWTV to your WKZO-TV (Kalamazoo-Grand Rapids) schedule and get all the rest of outstate Michigan worth having. If you want it all, give us a call!

* WWTV area has more homes than Alaska, Del., Hawaii, Idaho, Montana, Nev., N.H., N.D., Utah, Vermont or Wyoming.
HILL RALLIES TO SAVE V’S
Connecticut delegation, Rep. Kearns lead attack against FCC plan to delete single vhf channels

Backfires against the FCC’s proposals to delete the single vhf channels in eight cities began burning last week on Capitol Hill.

* The entire Connecticut congressional delegation voted to fight the FCC’s threat to remove ch. 3 from Hartford, the state’s capital, “by all proper means, including legislation if necessary.”
* Rep. Carroll D. Kearns (R-Pa.) pledged “all out” support in maintaining ch. 12 in Erie, Pa.

These were two of the eight cities in which the FCC proposed to substitute a uhf channel for the sole vhf there in order to make cities all uhf. The other cities: Binghamton, N. Y; Champaign-Urbana, Ill.; Columbia, S. C.; Madison, Wis.; Montgomery, Ala., and Rockford, Ill. (BROADCASTING, August 7, 14).

Connecticut Strategy – Underway in the Nutmeg State is a far-reaching citizens’ campaign against the removal of ch. 3 from Hartford.

The prime lever in the project designed to arouse public opinion is a committee comprising 300 leading citizens, led by Gov. John N. Dempsey.

The entire Connecticut congressional delegation endorsed the plan and accepted membership in the group.

Their endorsement was made at a war council in Washington last Tuesday, August 15.

Present at the two-hour meeting, which took place in the Capitol, were Gov. Dempsey, Sen. Prescott Bush (R), Reps. Frank Kowalski (D), Emilio O. Daddario (D), Robert N. Giaimo (D), Horace Seely-Brown (R), Abner W. Sibal (R) and John S. Monagan (D).

An aide represented Sen. Thomas J. Dodd (D) who was in Europe at the time.

Also present were Paul W. Morency, president, and Tom Easton, news editor, of ch. 3 WTIC-TV Hartford.

Congressman Kearns met last week with Arthur Ingram, general manager of ch. 12’s WICU-TV in Erie, and Michael Csop, chief engineer of the station. According to the WICU-TV officials the better part of four Pennsylvania counties would lose their only Class B service if ch. 12 is deleted from Erie.

Opposes Delay – WTVK (TV) Knoxville, Tenn., (ch. 26) asked the FCC last week to deny the request of the Assn. of Maximum Service Telecasters for a six-month extension of deadline for comments on the commission’s proposals to delete in certain markets and add a third vhf in others (including Knoxville) (At Deadline, Aug. 14).

The station said another vhf service is “desperately needed” in that city and accused AMST of delaying tactics. WTVK claimed AMST had fully commented on vhf drop-ins at less than the minimum mileage in the FCC’s inquiry on drop-ins last February. The FCC has proposed adding ch. 8 in Knoxville.

WS-TV Columbia, S.C.: WSFA-TV Montgomery, Ala.; WCIA (TV) Champaign, III.; and WNB-B-TV Binghamton, N.Y., threatened by the FCC with swapping their vhf channels for uhf, joined AMST’s request for an extension and emphasized that the time allowed for comments in this proceeding was slight compared with that permitted in other, less complex, rule-makings.

Taft Broadcasting Co., which owns WRBC-TV in Birmingham, also supported AMST’s request for extension. In addition to Knoxville and Birmingham, v drop-ins are proposed for Baton Rouge, Charlotte, Dayton, Jacksonville, Johnstown and Oklahoma City.

Senate subcommittee to resume spectrum study
The Senate Communications Subcommittee, which is looking into the nation’s over-all telecommunications policy, will resume hearings this week on space communications and the manner in which spectrum space is allocated between government and non-government users.

The subcommittee will hear James E. Webb, head of the National Space and Aeronautics Administration; Lee Loevinger, the Justice Dept.’s antitrust chief; and Frank Ellis, director of the Office of Civil & Defense Mobilization, on Wednesday. Philip J. Farley, special assistant to the Secretary of State, and a Defense Dept. representative will appear Thursday.

One of the matters being considered is the proposal (SJ Res 32) of Sen. Vance Hartke (D-Ind.) to create a special five-man commission to study and report on the manner in which the spectrum is allocated. The aim of the resolution is maximum use of the spectrum.

The subcommittee, which is headed by Sen. John O. Pastore (D-R.I.), began its hearings Aug. 1, when it took testimony from the FCC (BROADCASTING, Aug. 7).
ABC-TV offers financial assistance for vhf

ASKS FCC FOR SWIFT ACTION ON 3 INTERIM STATIONS

ABC-TV told the FCC last week that it is prepared to assist financially in the construction of new interim tv stations on the third vhf channels recently assigned to Grand Rapids-Kalamazoo, Mich., Rochester and Syracuse, New York (Broadcasting, Aug. 7).

The network, in offering "thoughts [which] may be of assistance to the commission . . ." said it "regards the establishment of temporary operations . . . to be of such importance to the public and to network broadcasting that it is prepared to assist . . ." with the approval of the commission. In a letter to each of the commissioners, AB-PT President Leonard Goldenson said the network has received "a large number of inquiries" which indicate that the channels will be eagerly sought by numerous competing applicants.

Despite past efforts of the commission, it has not proved possible to expedite the comparative hearing process, ABC pointed out, with it being of first importance that interim authorizations be made in the instant cases. Effective Sept. 11, the FCC has added ch. 13 to Rochester, ch. 9 to Syracuse and ch. 13 to Grand Rapids. In each of the three markets, there now are two commercial vhf stations operating. Consequently, a full-time third network service is not now available there.

The commission has invited proposals for temporary operations in the three cities pending a final grant and, ABC said, it is apparent that most of the prospective applicants will propose some type of interim operation. "To avoid the appearance of giving any applicant a comparative advantage, a [temporary] grant to a combination of the applicants is definitely to be preferred," ABC told the commission.

Help From FCC: It would be helpful if the commission would announce what type of interim proposals it would consider acceptable, the network continued. All applicants in a given city should have the privilege of participating, but should not be required to do so, Mr. Goldenson wrote. Those applicants who do participate should share equally in financing, profits or losses, and operation. "I stress the concept of equality because unless equality of participation is enforced, it is likely that some applicants will attempt to insist on a larger share and this could well lead to the breakdown of negotiations," he said.

Officers and staff of the interim station should not include any persons associated with any of the applicants, ABC stated. "This is important to avoid jockeying for position among the applicants and perhaps some comparative advantages accruing to an applicant who succeeded in infiltrating the operation," Mr. Goldenson continued.

The transmitter site and installation for the interim station should be permanent, while temporary studios would suffice, the ABC president said. If the applicants cannot agree on a site, the FCC's chief engineer should step in, the network felt.

"I hope these thoughts may be of assistance to the commission in its efforts to establish an effective interim policy and I can assure you that ABC will cooperate in every possible way with the commission and with the applicants for the new channels," Mr. Goldenson concluded.

FCC asked to extend date for fm comments

Broadcasting lawyers, engineers and the NAB last week asked the FCC for a nine-week extension of the deadline for comments in the commission's rulemaking proposing major changes in fm allocations and operations (Broadcasting, July 3). Comments presently are due Sept. 5, but NAB, the Federal Communications Bar Assn. and the Assn. of Federal Communications Consulting Engineers asked an extension of the deadline to Nov. 10.

In a joint filing, the three groups said the new rules are of "far-reaching significance and raise substantial problems of a technical and legal nature." Therefore, they said, additional time is needed to prepare more meaningful comments and data to assist the FCC in reaching a final decision.

The proposed FCC rules would establish three classes of fm stations with protected service areas and minimum mileage separations. The NAB has appointed a special committee, headed by Ben Strouse of WWDC-AM-FM Washington, to study the proposal and advise the association on its comments.

At the same time the fm rulemaking was issued, the FCC asked for comments on whether the duplication of am station schedules by fms under common ownership should be curtailed. No proposed rules on this subject were issued and the FCC said none will be adopted without further proceedings.

WBEN-FM Buffalo, N. Y., also asked for "at least" a 90-day extension of the fm deadline date last week.
BILLS BACK NFL-CBS PACT
Antitrustgers Kefauver, Celler would legalize group deals for pro sports tv rights recently held illegal by court

Congress’ two chief trustbusters moved last week to try to free the National Football League from the bind in which it was put by a court decision which found NFL’s package television deal negotiated with CBS-TV to be illegal.

Sen. Estes Kefauver (D-Tenn.), chairman of the Senate Antitrust & Monopoly Subcommittee, and Rep. Emanuel Celler (D-N.Y.), chairman of the House Antitrust Subcommittee, introduced legislation to legally sanction the NFL-CBS agreement—and others like it.

Rep. Celler, who said he had been contacted on the matter by Pete Rozelle, NFL commissioner, and Ford Frick, baseball commissioner, announced his subcommittee will hold a one-day hearing on his bill (HR 8757) Aug. 28.

Ordinarily, Sen. Kefauver and Rep. Celler are more concerned with putting new antitrust laws on the books or with stricter enforcement of existing statutes. But in the NFL-CBS case, they feel the effect of the decision of Federal Judge Allan K. Grim (Broadcasting, July 24) was unduly harsh.

The decision blocked a two-year, $9.3 million pact, from which each of the 14 league teams would have derived about $300,000 annually. This is more than any team has been able to get from television through individual negotiation.

Hardship • Sen. Kefauver said the court decision, by forcing the teams to negotiate individually, “would work a hardship on many teams and jeopardize the future of organized team sports.”

Rep. Celler noted that the rival American Football League operated under a package tv deal last year and had renewed its contract for the 1961 season. He added that the National Basketball Assn. and the National Col-

legiate Athletic Assn. have had the same type of television arrangements for many years, and that the National Hockey League operated under a similar television contract at one time.

Both bills expressly permit the NFL and other professional football, baseball, basketball and hockey leagues to negotiate group tv arrangements with the networks. Judge Grim had ruled that the proposed NFL-CBS contract violated a 1953 decision of his as well as the antitrust laws.

Rep. Celler said he had agreed to sponsor the legislation “to remove the inequity that exists” because the AFL is permitted to sign a group contract while the NFL is not. Another factor in his decision, he said, is that Commissioners Rozelle and Frick had assured him no attempt would be made to broaden the bill’s coverage.

Differences • Although the Kefauver and Celler bills would authorize package tv-sports contracts, they are not identical. The Kefauver bill contains a provision from one of his earlier proposals (S 168) which would prohibit major league baseball teams from telecasting their games into an area within 75 miles of a minor league game without the home team’s permission. The provision would afford college football teams similar protection from professional football telecasts, except on Sundays, the traditional playing day for the pros.

The Celler bill does not contain this blackout provision. The New York Democrat believes it “unnecessary and undesirable.” Football league and network officials oppose the blackout, arguing that while professional football teams now play on Sundays, they might want to schedule games on Saturday, when most college teams play.

Hill conferees agree on FCC revamp bill
SENATE, HOUSE NOW TO TAKE FINAL VOTE ON PROPOSAL

Senate and House conferees reached swift agreement last week on legislation to streamline the FCC. The bill (S 2034) permits the commission to delegate adjudicatory functions to individual members and subordinate employees and eliminates the mandatory right of litigants to review by the full commission.

In the only point of serious difference, House conferees agreed to a Senate provision permitting the parties to any dispute to seek commission review.

The House bill would have allowed the commission to rule out in advance the possibility of review for certain types of minor cases.

Both versions, however, permit the commission to exercise discretion in granting review. Under the agreed-on legislation, litigants are guaranteed review only by individual commissioners or employee boards that would be created to hear appeals from initial decisions. The commission could limit the cases it would consider to those it
Everyone talks about the weather and now pressure is building up to get the FCC to do something about it. A freshet of protests inundated the agency last week, ranging from stormy to balmly, after a telegram from bandleader Guy Lombardo to Chairman Minow which complained that dramatic embellishments on inclement weather reports by New York weathercasters had dampened business at an outdoor show. Mr. Lombardo runs at Jones Beach, L. I. (Broadcasting, Aug. 14).

More than a dozen comments and protests were received last week at the FCC Complaints & Compliance Division and the barometer was still rising. A division staffer said he feels the FCC’s jurisdiction in the matter is very limited unless the plaintiffs can prove that weather broadcasts have been deliberately falsified or broadcast with the motive of hurting the businesses that are protesting.

Repeaters * Resort operators from New Jersey and New Hampshire strongly backed Mr. Lombardo’s position. The Jerseyites cited radio comments such as “The sun may dry the beach, but now it looks like the Everglades swamps” and “If you’re going on the boardwalk, you’d better take a coat.” The New Englanders accused some radio stations of running gloomy early-morning predictions throughout the day, despite official weather bureau revisions predicting good weather. The latter problem might be settled, the FCC suggested, if stations give the time the forecast was made when broadcasting it.

Several business interests and Chambers of Commerce wrote their congressmen to complain of weathercasts. The letters were forwarded to the commission.

Two private weather-predicting firms added to the tumult. One, taking a swipe at “the high degree of error” in U.S. Weather Bureau reports, said it is asking the Dept. of Commerce to investigate radio-tv weatherecasts. Another told the FCC it thinks the problem is “worth more than passing notice.”

Back to Normalcy * Thomas C. Orr, vice president of the Ask Mr. Foster Travel Service, wired Chairman Minow, urging that “tv weather forecasts be tempered before they arouse more tempers.” He said programs originally intended to be a public service have degenerated into “vehicles for fashion models, would-be actresses and even cartoonists.” He asked that the country be “allowed to return to normal” and vacationers be allowed to take their chances with the weather.

The Auto Laundry News, Detroit trade publication for the car-washing industry, said that broadcast weather reports seemed always to err on the gloomy side. If forecasters predict rain, people don’t have their automobiles washed. The News pointed out.

Embroidery * Robert Moses, president of the Long Island State Park Commission, wired complaints to the FCC announcing that he has requested all New York City stations to avoid “dramatic and fanciful embellishments and interpretations added to factual reports.”

WPIX (TV) New York, to calm Mr. Lombardo’s wounded feelings, invited him to conduct the weekend weatherecasts last weekend. Which he did.

In another matter, the conferees agreed that functions could be delegated or withdrawn by a majority of those commissioners holding office, as provided in the House bill. The Senate version would have permitted these actions by a majority of the commissioners present and voting.

The legislation, which now goes back to Senate and House for final approval, was introduced as a substitute for the President’s FCC-reorganization plan, which the House killed, largely on the ground it would give the chairman too much power (Broadcasting, June 19).

The respective Senate and House bills which followed closely recommendations submitted by the FCC, were introduced by Sen. John O. Pastore (D-R.I.), chairman of the Senate Commerce Subcommittee, and Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee. They also headed the conference committee on the bill.

Government briefs...

Set for hearing * The Securities & Exchange Commission last week, at the request of Broadcast International Inc., New York, set for hearing the agency’s suspension of 60,000 shares of common stock offered by BI to the public June 2, 1961 (Broadcasting, April 10, July 10). The SEC suspended the offering June 29 on charges that the prospectus made false and misleading representations as to the clients and officers of the company and the use of proceeds.
Reception highlights State Department briefing

Some 350 broadcasters attended a State Dept. foreign-policy briefing for radio-tv and print-media news men last week. High point in the two-day affair was a reception given by Secretary of State Dean Rusk Monday in the impressive State Drawing Room, atop the new State Dept. building. In the photo at the left, Secretary Rusk (right) greets J. Leonard Reinsch, executive director of the Cox Stations and radio-tv advisor to President Kennedy. In the photo at the right, Charles E. Bohlen (center), special assistant to Secretary Rusk for Soviet affairs, chats with James Borman (left), news director of WCCO Minneapolis, and David Mohr, of WJAR-AM-TV Providence, R. I. Other senior government officials who addressed the briefing session and attended the reception for informal conversations with the newsmen were Gen. Lyman Lemnitzer, chairman of the Joint Chiefs of Staff; Foy Kohler, assistant secretary of state for European affairs; Walter P. McConaughy, assistant secretary of state for Far Eastern affairs; and Arthur H. Dean, chairman of the U. S. delegation to the nuclear test-ban talks in Geneva, Switzerland.

House committee okays aid to etv

A federal aid to educational television bill (HR 132), which had run into unexpectedly stiff opposition in the House Commerce Committee, finally won that group's approval last week.

The bill, sponsored by Rep. Kenneth Roberts (D-Ala.), would make $25 million in matching funds available to the states for the preparation of surveys and the installation and acquisition of educational television facilities.

In two executive sessions, Southern Democratic and Republican members of the committee had come close to killing the measure (BROADCASTING, Aug. 14). The session last week, however, was comparatively serene, as the bill was approved by a 21-3 vote.

While the bill requires states to match the federal aid on a dollar-for-dollar basis, those that pioneered in educational television would get consideration. An amendment introduced by Rep. Robert W. Hemphill (D-S. C.) would entitle states wishing to expand an existing station, to an additional grant of up to 25% of the cost of their etv facilities.

Another amendment, offered by Rep. John E. Moss (D-Calif.) specifically prohibits federal control over the programs broadcast by the etv stations. He said later he felt this was already implied in the bill but he added his amendment to ease the fears of some committee members.

Although it finally won the backing of a sizeable majority of the Commerce Committee, the bill still faces a high hurdle in the Rules Committee, where a similar bill died in the last Congress.

The Senate has already passed an etv bill ($205), but it differs from the House bill.

Time limit set for listeners’ complaints

Members of the public who have something to say about an FCC licensee must do so within 30 days after an application for renewal is tendered for filing or set for hearing.

Noting that its present rules—adopted three weeks ago (BROADCASTING, July 31)—do not clearly specify a time limit for protests from the public, the commission amended its new rules requiring local notification last week. Applicants for renewal are required to inform the public, at the time their application is tendered and again if a hearing is scheduled, that comments may be made to the commission.

The rules change was taken by an FCC “board” consisting of Commissioner Robert T. Bartley, acting chairman.

USIA’s budget upped by Senate committee

The Senate Appropriations Committee last week grudgingly recommended that the Senate vote the U. S. Information Agency $138.9 million for its propaganda activities in fiscal 1962, which began last July 1. The total is $4.1 million more than that approved by the House but $12.5 million less than the administration requested.

In reporting its recommendations to the Senate, the committee said it has “serious reservations about the effectiveness of many” USIA activities. The report expressed the hope that the new USIA director, Edward R. Murrow, “will bring needed improvements and the development of a strong, competent agency which will display initiative and aggressiveness in attacking the evils of communism and telling the good things about America.”

The report didn’t mention the Voice of America specifically, but that operation has come through the budget-hearing process in good shape. The House approved $19 million for the Voice, and the agency considers that amount sufficient for the present. USIA, however, plans to seek an additional $2.4 million in a supplemental appropriation, of which $1 million would be used to strengthen the Voice.
-EQUIPM'T & ENGINEERING-

Shure reports gains abroad

The fear of foreign "cheap labor" electronic competition both here and abroad has been overemphasized and U. S. quality gear can beat the price phantom in the world market, H. I. Blumenthal, export manager for Shure Bros., Evanston, Ill., said last week in a report on the growth of the firm's foreign sales. Shure makes broadcast microphones and other components.

Mr. Blumenthal said that Shure sales abroad show that high quality American electronic products "are now gaining a foothold" in Asia as well as Europe, selling at prices "well above competitive foreign brands." These markets traditionally have been dominated by their own locally-made goods, he said.

ITA expands sales units

ITA Electronics, Lansdowne, Pa., last week announced an expansion of its sales activities to better serve its customers. The enlarged sales operation will be headed by A. S. Timms, formerly field service engineer at ITA.

Industrial sales will continue under Eliot S. Baker, recently elected a vice president. He will direct sales of special ITA products for industry, government and research applications.

U. S. sues in merger

The proposed merger between Ling-Temco Electronics Inc. and Chance Vought Corp. has been attacked by the federal government. The Dept. of Justice on Thursday filed an antitrust suit in Dallas federal court. U. S. District Judge Joe E. Estes denied a government request for a restraining order and set Sept. 11 as the date for hearing on a preliminary injunction.

Technical topics...

Agency appointed - Federal Mfg. & Equipment Corp., Garden City, N. Y., appoints The Zakin Co., N. Y., as its agency, effective immediately. Federal manufactures a complete line of TV station equipment and other communication devices. Advertising will be in radio-television trade and specialty publications.

Quieting amplifier - The Ron Electric Co., Livingston, N. J., has developed an automatic background quieting amplifier, Gate Amplifier 40 A, designed to key itself on and off with the sound intended for transmission. The unit is designed for standard rack mounting, 3-1/4" panel space required including self-contained power supply and VU meter. Further information is available from the company.

Programming center for full or part-time automatic broadcasting

Plays up to 55 tape magazines and can be used to automatically start other broadcast equipment after any magazine.

The remarkable ATC 55 allows use of regular staff voices at all hours, with a minimum number of personnel on duty. Ideal for early morning and late evening hours, or to clear announcers for other duties during certain hours of the day. Lets you use your best talent during week ends or for separate FM operations. The ATC 55 will automatically play back up to 55 magazine-loaded taped spots, themes, and production aids; up to 165 full length musical selections, without resetting or reloading. It is also designed to operate in conjunction with other broadcast equipment. A special 3200 cycle auxiliary control tone may be inserted at any point in the sequence to start (1) material recorded on reel-to-reel tapes, (2) a Seeburg record changer, or (3) the standard ATC units. Used in multiples of two or more (4), the ATC 55 may be programmed to play in any desired sequence automatically. It delivers the highest quality broadcast reproduction. And, best of all, it is so easy to operate that any of your personnel can run it. Write, wire or phone collect for complete information and literature today.

TELE-WEST AIMS FOR U.S. TV MARKET

Taped English-language productions cost 50% less

Tele-West Productions, a West German producing organization, is aiming for the United States market by preparing drama programs on tape in English as well as German. The company claims production costs are approximately one-half of those for a similar program produced in the United States.

Ronald Kahn, joint managing director of Tele-West, Duesseldorf, who was in New York on business recently, said he has approached various networks and producers here in the hope of arranging co-production deals. He said he has received "a great deal of encouragement" and is returning to Germany to make a report on the progress of his talks.

Made a Sale • During his visit, he showed two hour-long taped programs to various networks, producers and station groups and sold one of the dramas, A Child’s Game, to Metropolitan Broadcasting, which will present the property on two of its stations—WNEW-TV New York and WTTG (TV) Washington, D.C. Tele-West also has produced, in German and English versions, another hour-long taped drama, Concerto for Combs. Mr. Kahn said he thought that the production in two languages, using the same actors for both versions, is a unique technique.

Mr. Kahn is a native of Germany who lived in the United States more than 20 years and has worked with various Hollywood film companies and with Bartell Broadcasting Corp. in sales and programming capacities. He returned to West Germany last year and formed Tele-West in association with several German film and tv executives.

Mr. Kahn believes there are several factors that contribute to the saleability of programs produced in Germany for export to the U.S. He cited these: there is a substantial pool of performers who can speak English as well as German because they lived in the United States, England and Australia during the years of Adolph Hitler's rule; the production cost is about one-half of the U.S. rate because scales for actors and technicians are considerably lower; there is an adequate pool of capable dramatic writers living in Europe.

Sequences are shot initially in German; then the same sequences are shot in English. Mr. Kahn said on the first two programs Tele-West has produced, the shooting was in the film technique, with scenes edited in sequence at a later date.

The co-production transactions Mr. Kahn has been offering U.S. producers and networks involve the use of a name U.S. star and director and a German cast for the remainder of the roles. He believes there is "wonderful opportunity" in Germany because the country is now the No. 4 tv market (behind the U.S., the United Kingdom and Japan) with five million tv sets and the number of receivers is increasing each week as the country awaits a second tv network in 1962.

IBS signs Japanese affiliations pact

International Broadcasting System Inc., New York, last week announced the affiliation of Japan International Broadcasting System as a first link in a proposed worldwide chain of radio-tv networks to interchange programs and to interest advertisers in their sponsorship.

The affiliation was signed in Tokyo last week by John M. Keessing, IBS executive vice president, and Saburo Matsukata, board chairman of the Japanese company. The plan is to provide a clearing house in New York for production and distribution of "suitable" programming anywhere in the world.

The next link in the system, a central American network, is expected to become IBS-affiliated within two weeks. Programming throughout the projected global system will be largely public service in nature, and it was emphasized that "everything that goes out will be paid for." Mr. Keessing candidly told a news conference in New York: "The project is altruistic, but with a selfish motive—we know money can be made."

Mr. Keessing said he will begin in Europe in September to negotiate two additional IBS-affiliated networks.

The Japan IBS was formed especially to participate in the new worldwide system. It will cover the geographical area of Japan proper, Republic of Korea, Okinawa, Hong Kong, Nationalist China, the Philippines, Thailand, Burma, Singapore and Malay.

L. Nicholas Dahlman, president of IBS in New York, reported that through the services of IBS, television executives will be able to pinpoint their messages anywhere in the world in the "most acceptable and effective manner." (In 1958 Mr. Dahlman organized Broadcast Planning Corp., which is now a wholly-owned subsidiary of International Broadcasting System. Broadcast Planning performs a public interest program service for local tv stations in the U.S.)

Mr. Dahlman stated that IBS will be its own sales representative, and by November the company will be ready to announce a rate card applicable to all stations in the affiliated networks.

Official-Fremantle agree

Official Films Inc., New York, entered an agreement last week with Fremantle International Inc., New York, for Fremantle to handle distribution of five Official tv film series in various parts of the world. Fremantle will sell Peter Gunn, Mr. Lucky, Wire Service, The Dupont Theatre and Yancy Deringer in Italy, and distribute all the series except Peter Gunn in the French-speaking countries of Europe and all of Canada. The contract was signed by Paul Talbot, Fremantle president, and Seymour Reed, Official president.

East Germany not member

The reference to a delegation representing East Germany at the Stockholm European Broadcasting Conference (Broadcasting, Aug. 14) was in error. East Germany is not a member of the International Telecommunications Union and, therefore, is not eligible to seat a delegation. There were East Germans attending the conference as members of the delegation representing the Eastern European Broadcasting organization (OIRT).
ABC said buying 25% of Toronto tv outlet

American Broadcasting Co., New York, is reported in the Toronto Daily Star as having acquired 25% of CFTO-TV Toronto, Ont., the maximum amount permitted to a non-Canadian citizen or company. ABC is said to have bought part of the 17% owned by television personality Joel Aldred, Toronto, part of the 10% owned by Ted Rogers, Toronto, and part of the 10% owned by Paul Nathanson, Sovereign Films Ltd., Toronto.

Mr. Aldred has been president of CFTO-TV since its inception early last year. The station went on the air as Toronto's second station at the end of 1960. Mr. Aldred and Ted Rogers own CHFI-FM Toronto.

No comment from Mr. Aldred or John Bassett, chairman of CFTO-TV and publisher of the Toronto Telegram, was available. The sale of shares is subject to approval by the Board of Broadcast Governors. ABC in New York had no comment.

Financial losses heavier than anticipated in the first year of operation are at the base of the reported sale. Mr. Aldred was removed from active management of the station in May when it showed such losses.

Similar problems have plagued CHAN-TV Vancouver, B. C. (where the management has changed in recent months), during the first year of operation. The licenses for these stations were awarded by the BBG to companies and individuals with no previous broadcast station management experience. Other second station applications in these cities by radio broadcasting stations were turned down by the BBG.

In cities were second tv stations are affiliated with successful broadcast stations, no such problems have appeared on the surface.

Abroad in brief...

New agency • Huxley-Irwin Ltd. has been formed in Hamilton, Ont., Can., to provide services to advertisers in the consumer, agricultural and industrial fields. The new firm is headed by Michael K. Irwin, president, and John W. Huxley, vice president. The agency is headquartered at 70 Stanford Ave., North, Hamilton, Ont. Telephone: Jackson 8-0058.

Stations boost power • French-language CF酋M-TV Quebec City, Que., and its English-language sister station CKMI-TV both boosted power last month. CF酋M-TV jumped from 12.7 kw video to 100 kw to cover 220,000 homes from a new transmitter. CKMI-TV increased video power from 5.6 kw to 13,850 kw; using CF酋M-TV's old transmitter, it covers the 156,000 homes which used to lie in the French-language station's area. Both stations are owned by Television de Quebec (Canada) Ltd.

Radio provides • To test radio's power in providing leads for its agents, Prudential Insurance Co. of America recently bought five morning spots over CJRH Richmond Hill, Ont. Offer of a “Map of Discovery” drew 75 telephone callers, about three times as many as company officials had expected.

Ford of Canada • Ford Motor Co. of Canada has signed a $22,000 contract for a nightly news-in-depth program over CFRB-FM. On week nights, show will not work to rigid time limits, may last a full hour when news is heavy, other times may stop after 10 minutes.

Tax imposed • Ty commercials, filmed or taped in the United States for use in Canada, will have to pay a 20% duty based on cost of total production when entering Canada, under new regulations imposed following a brief from local producers. British commercials have to pay 15%. In addition, there is an 11% sales tax based on total production costs plus duty. However, tv commercials made for and used by U. S. companies, and then sent to Canada for use by subsidiary firms, are not affected by new customs regulations.

Rep appointments • CJQY Guelph, Ont., has appointed Air-Time Sales Ltd., Toronto, Ont., as exclusive representative. CKNW New Westminster, B. C., has appointed Stephens & Townsdew Ltd., Toronto, Ont., as exclusive representative.

Several Canadian am's being sold to groups

Sales of a number of Canadian radio stations are underway, subject to approval by the Board of Board of Governors. CKRM Regina, Sask., in operation since 1926, is being sold to a group associated with CKSO-AM-TV Sudbury, Ont. It is understood this is the first of a number of stations this group plans buying.

CFUN Vancouver, B. C., is reported sold to Gordon W. Burnett, CHOW Welland, Ont.

BBG and its predecessor the Canadian Broadcasting Corp. have in the past not favored multiple ownership of stations by any one group, nor by interests outside the locality in which the station is situated. Approval of these two sales by the BBG will be watched with interest by the industry as setting a precedent for more radio and tv station sales to groups owning stations in other parts of Canada.

...in the land of Profitunity!

"Challenge" created by WFLA-TV is a continuing series of documentaries in dimension focusing on ordinary people in extraordinary pursuits — from the issue of Discrimination to Education; from Beauty Queens to Population Explosion; from Harbor to Highroad. Its purpose: to interpret to the community we serve the many activities that serve the community.

The response of the public has been tremendous — and immensely satisfying to us. And "Challenge" is only one of hundreds of documentary public interest programs produced on this station and applauded by the public.

"Challenge" is available to advertisers — another reason to spot your product or service on WFLA-TV. Rates and information on request.

Today’s Texan too busy for tall tales

SCIENCE HAS ADDED MIDAS TOUCH TO STATE’S BOUNTIFUL RESOURCES

Texas of the 60s isn’t Texas any more.

It’s bigger and better. Bigger as an industrial, commercial and farming complex. Better as a developing marketplace fitted with the best facilities of the astro-economic era.

Today’s Texas looks little like the lusty Texas of pre-World War years. It’s different from post-war Texas after the chemistry had been brought in by the military. And the last decade has seen a reshaping of its productive, distributive and cultural facade.

Big, bragging Texas has succumbed to the sweep of a population and industrial shift toward the Southwest. Its surface is studded with the tall pipes and stills of petrochemistry. The gadgetry of science is overrunning the land of the cowpoke and gusher-blessed millionaire.

Even the Texas gag is dying out, with an assist from the entry of land-superior Alaska to the Union and because of the arrival of millions of immigrants from other states.

Bragging a Bore • The tall tale has become tiresome. Few Texans start off a talkfest with a whopper about this heel-kicking millionaire who had a ranch-full of pink Cadillacs and pinker blondes. Bragging has become bore-some. It’s being relegated to the porch rocks of mellow oldtimers who remember when Main St. was littered with buffalo bones and the sign left by a past mode of transport.

In Texas, 1961 model, the gags have given way to talk of supersonics, economics, electronics and, naturally, embryonics. Oil-gusher gossip has been joined by the jargon of petrochemistry — a multi-billion-dollar miracle that abets the rocket, clothes the body, soothes its aches, and powers as well as equips modern industry.

Texans talk today of stocks and cotton and the new plastics. Not just the millionaires — and there still are a few thousand around cities and rangeland — but the men who man the electric consoles of soup-mixing towers at cattle feedlots, the top-drawer and lesser executives in spearshaped office buildings, and the well-paid roughnecks who pierce the bowels of the earth in search of still more oil.

Changing State • There are 10 million stories and 10 million people in Texas
TODAY'S TEXAN TOO BUSY FOR TALL TALES continued

of the 60s. A month and 5,000 miles on the trail will reveal a few of the stories and permit contact with a few hundred business people.

Today's Texas is changing. Five years ago Broadcasting took a look at the Texas economy (Broadcasting, July 23, 1956). What it saw was good, but nothing bearing resemblance to the tall tales. Texas was still talking it up back in 1956, but a change was taking place.

The rapid rise of Texas into one of the nation's most important industrial states—fastest growing in the U. S.—somewhow didn't fit into the pattern of thighbobbing whoppers about oil and cattle barons.

Texans don't know how to brag, the 1956 Texas analysis contended. They ignore the transition of the people and wide open spaces into an important market blessed with the fruits of the nation's highest farm income and the balanced economies stimulated by industrial expansion supported by more mineral resources than any other state.

In five years there have been important changes, most of them favorable. But there is a stark, conspicuous exception—oil.

Oil the Exception • Oil! More oil, much more than anywhere else in the United States. "Oil is sick," a Texas oil man said. That's an extreme view.

Production has been cut by state rationing to eight days a month. "Eight lousy days, yet they keep pumping 16 even 20 days in other states," he added (see oil-gas-petrochemistry, page 62).

The story sounds and is painful.

It's not pleasant for those who live off oil and oil production, but not as gruesome as it sounds for Texas produces well over a third of all U. S. oil.

It's a petroleum paradox, however.

Texas has achieved an economic miracle in the last few years. It has survived a blow in the oil-enriched belly that might have crippled a weaker business structure.

Business Better • Right there is living proof that Texas is tough. Business, except oil, is better than ever. There's plenty of oil to feed the refineries and petrochemical plants. And there's gas to feed the same industrial structure.

Oil production will hold its present level, many top oil men say, and it may increase.

In the period of its oil miseries Texas can offer this evidence of business durability during the five-year period 1956-61. In the half-decade these trends are noted:

• Manufacturing production up 15%.
• Population up 8%.
• Personal income up 21%.
• Per capita income up 12%.
• Farm income up 23%.

All around Texas are signs of economic maturity. The hotter boom areas are levelling off in many spots, still climbing at a startling pitch in others. Statewide the trends are healthy, commanding the attention of those in the business of selling goods and services.

Five years later, a month-long look from the Panhandle to the Rio Grande, from El Paso to Orange, reveals an area that throbs with commercial vitality.

End of Feud • Dallas can't tell where it ends and Fort Worth begins; the latter is shedding its Cowtown moniker. And this is breaking up a delightful municipal feud.

Houston may start piercing the stratosphere if its skyscraper binge continues.

The Gulf Coast is tube-and-tank happy—the greatest petrochemical industry in the world, a golden crescent of processed mineral wealth.

East Texas is growing trees faster than it chops them down for paper, and keeps adding to its oil-gas-chemical facilities.

A ribbon of new industry and business stretches westward from Abilene, in west central Texas, to Midland and Odessa.

El Paso's central city more than doubled in the 1950-60 decade.

San Antonio's military foundation base is supporting a growing populace. Corpus Christi is pacing the Gulf growth.

Lubbock maintains its fancy pace. Amarillo is having a gas, helium and chemical splurge.

Wichita Falls is in a building boom. Waco and Austin are benefitting from the shift of population and industry.

Big Spenders • The 10 million people comprise a consuming market that is stimulating the transition from a raw-material toward a fabricating state. Advertisers find Texas a good place to

The basic contours of Texas are the same but the markets aren't. This itinerary, consuming the entire month of July, plots the air and highway route taken by J. Frank Beatty, senior editor of Broadcasting, in search of the story of the new Texas.

Five years ago he traveled a similar trail, describing the entry of the Lone Star state into industry and commerce, replacing and/or supplementing the basic oil-cotton-cattle income of the past.

The remaking of once-humming Texas can be understood only by on-the-scene inspection. This review of the new Texas market is based on nearly 5,000 miles of travel, hundreds of personal interviews, research into the files of local enterprises, and the extensive facilities of the U. of Texas Bureau of Business Research directed by Dr. John R. Stockton.

This is one of a series of regional and major market reviews by Broadcasting.

BROADCASTING, AUGUST 21, 1961

(SPECIAL REPORT: THE TEXAS MARKET) 61
Today's Texan Too Busy for Tall Tales continued

advertise. The people spend a larger share of their pay than is the case in most states, apparently because of the fast growth, the relatively young population and the spirit that prevails in a market that's on the make. After all, only three states gained more people in the 1950-60 census returns.

Many economists are coming to the new definition of a market as the area covered by a good television signal. Texas has plenty of these—two score of them, reaching out from West Texas into New Mexico, Kansas and Oklahoma, with the help of community boosters; from Wichita Falls into Oklahoma; from east Texas into Arkansas and Louisiana; from border states into improving Mexican markets.

Along with the tv stations are 300odd radio stations. Fm lagged in most parts of Texas but caught fire in Houston which has as many fm as am stations.

Leaders Are Young • Young blood, some of it from pioneer families, now leads the march of Texas. The fast millions are no longer made in oil. Instead the growth is paced by industry—big firms and little firms. The money comes from Texans and from East and West (see business story page 68).

"Distance ceases to be a Texas problem," said Dr. John R. Stockton, director of the U. of Texas Bureau of Business Research. And Todd G. Cole, executive vice president of Delta Air Lines added, "Commercial aviation has moved Texas to within a few hours of the nation's financial and governmental centers." Delta was awarded new flights this summer to the West Coast and Las Vegas. They're at 60% capacity already.

Speed and energy loom in the future of Texas. The aeronautics center around Fort Worth and Dallas, where the 1,400-mile-an-hour Hustler (B-58) bomber was sized, is hoping to build more Hustlers and is quietly working on the 2,000-mile plane of the future.

Energy Center • Energy is Texas' dish. It supplies nearly a third of the 42,000,000,000,000,000 (or quadrillion if numbers baffle you) units of energy (BTUs) used up by the United States in a year.

"Texas is adjusting to the oil slowdown," Dr. Stockton said. "Personal income is up. Gas has increased 15%. Minority groups are improving their economic status. Growth is substantial and healthy. Texas must get new industries, fabricating plants that process oil, gas, food and other resources into finished goods.

"We will have 10 million people before year end. Retail sales are now $12 billion a year. Chemical industries will grow. Manufacturing will determine the shape of the future Texas."

Add it all up—No. 1 petrochemical state (650 plants), half of the nation's synthetic rubber, two-thirds of its polyethylene (basic chemical and plastic material), one-third of U. S. oil output, half of U. S. oil within pipeline reach, half of John R. gas-resent, oil and barge transport to all the nation and a network of pipelines—add all that and Texas promises to make more exciting economic history in the 60s.

Petrochemistry boosts oil, gas profits

NEW INDUSTRY PROSPERS THOUGH PRORATION CUTS PETROLEUM OUTPUT

American life in the 60s, mobile and teeming with gadgetry, supports one of the world's notable chemical complexes—the tall plumbing that protrudes all over the Texas landscape and the oil and gas industries on which this petrochemistry is based.

When mom takes a box of brandnew detergent to wash baby's waterproof panties and rompers in a plastic sink dish, everything but mom and the baby is synthetic. Baby's aspirin plus the bottle it came in were products of Texas' underground wealth. One of these days even the water may be fresh water converted from the sea.

The thousand or more products made out of oil and gas support the Texas petrochemical industry, the nation's largest and likely to remain the largest for decades to come. The basic crude and natural gas from which these products are made provide the greatest source of power, heat and chemicals.

Raw Materials • Texas exploded out of its original cow and cotton economy when oil was discovered. It started to become an industrial state when oil and gas supplied the raw stuff for plastics, synthetic fibres, rubber tires, detergents, pharmaceuticals, machinery—the list of products runs on endlessly.

As long as Americans live well, dress neatly and keep moving there will be a prosperous oil, gas and petrochemical economy in Texas. Texas provides nearly a third of all fuel energy used by the U. S.

But all is not well with oil, even though Texas has produced 24 billion barrels—close to a billion barrels in 1960 alone.

The sad fact remains there is too much oil coming out of the world's underground. Imports, from newer fields in the Near East and other areas could flood international markets if not controlled. That's why the average Texas well is now a dribbler instead of a gusher, averaging maybe 12 barrels a day under eight-days-a-month proration. Texas wishes other oil states would curtail production as sharply. Behind this severe proration is vivid recollection of the 3-cent-per-barrel oil early in the century when East Texas fields were booming and gushing. In the 30s oil prices dropped from around $8 to 10 cents a barrel; now it's about $2.50.

Present production schedules run a fraction of those a decade ago. A third of Texas wells are exempt from proration limits because they are shallow or starting a new life with the help of waterflooding or gas pressure-builders.

Not Too Gloomy • The oil story is gloomy, but not too gloomy. The miracle, of course, is that Texas' economy has risen steadily in the last five years during petroleum's troubled times. After all, petroleum supports a third of the Texas manufacturing-mining employment. Jobs in the oil and gas industry have dropped 23,000 in a decade. Drilling continues at a lower rate and suppliers of oil-field equipment and materials have suffered heavily.

"Oil has reached a level," according to Dr. John R. Stockton, director of the U. of Texas Bureau of Business Research. "The plain fact is we have more oil than we can sell."

As oil settles down to this less buoyant level, gas and petrochemicals take up the slack easily and point the way to a new prosperity. Gas, it's realized, is doing to oil what oil once did to coal. A cheap fuel, gas can be used without processing though actually it's stripped of rich hydrocarbons to feed a share of the petrochemical industry. Of all natural fuels, gas is the only one on which the price is controlled by public agencies.

Supplies Much of U. S. • Extensive underground networks of pipes take Texas gas to three-fourths of the states, providing half of all the gas consumed in the nation. Although there's too much oil for a peacetime world, the gas supply isn't at all inexhaustible. Half of the gas in the Carthage Field of East Texas has already been removed, according to those who deal with the problem. The production in Texas is rising over the 5 trillion (cu. ft.) yearly mark.

62 (SPECIAL REPORT: THE TEXAS MARKET)
Gas, by the way, introduced the word "trillion" into Texas economics.

The magic word in petrochemical is "on-stream," the opening of a new plant. A $25-million Mobil ethylene plant went on-stream in July in the Beaumont-Port Arthur-Orange complex. It's now at capacity, turning out high-purity ethylene from which many intermediate plastics come later to become food wrappers or greenhouses, bottles or shirts and suits.

**Plumber's Paradise** - A petrochemical plant is mostly plumbing and a few hundred people can run a $100-million complex. But that's only the beginning. Over 1,500 people have been working on the Rexall plant, getting it ready to go on-stream. Less than a third that many will be needed to keep it running. But with all the satellite and corollary functions, the Rexall plant eventually will mean an increase of several thou-
This night scene is typical of dozens of Texas cities where refineries and petrochemical plants operate around the clock. This plant, with its own Texas’ main source of revenue,” Dr. Stockton said.

New Industry • All this from an industry that didn’t even exist two decades ago. Actual petrochemical production added $1 billion to the value of chemical products in Texas, according to the U. S. census of manufactures, a jump of 47% in a few years.

Intermediate chemical plants are developing. Finally the processing of the intermediates into finished goods is expanding. Already Houston has 18,000 chemical workers earning $100 million a year; Beaumont-Port Arthur-Orange has 5,000. The finishing industries are becoming more important, spurred by the increased consumption of chemically based finished goods as the Texas market develops.

**DIVERSIFIED INDUSTRY KEY**

**Electronics, aircraft, food processing, apparel among many non-petro manufacturers in state**

Earlier in the year Houston’s petrochemical experts “gasped,” according to the Houston Chronicle, when Monsanto Chemical Co. announced it would build a new complex with the world’s largest ethylene plant and several somewhat smaller units in nearby Brazoria County. This whopper may run up to $100 million.

**Other Industries • Petrochemical plants** come in big, costly spreads. But Texas also has important non-petro industries, and they're getting more important every year. The state ranked first among all states last year in the petrochemical report of Industrial Development & Manufacturers’ Record.

A good part of the industrial and population growth occurred in four counties—Harris (Houston), Dallas, Bexar (San Antonio) and Tarrant (Fort Worth). Electronics plants are expanding and new ones are being built as diversity in the state's economy continues. Food production and apparel manufacturing are developing. The aeronautics Industry, facing competition from missiles, had 38,500 employees at year end.

Temco Aircraft merged with Ling-Altec Electronics to form Ling-Temco Electronics, with diversified output including refrigeration. Chance-Vought abandoned the word “aircraft” and included electronics, automation gear, mobile homes and trailers in its diversified line. It then joined Ling-Temco to form Ling-Temco-Vought. The big Texas Instruments and Collins Radio Co. have expanded. Carling announced a $20 million brewery in Fort Worth and Falstaff expanded in Galveston, where Continental Can Co. will operate a plant to make beer cans.

**Growth in Food Processing • Food processing grows and grows.** Corn Products Co. installed a new sugar plant in Corpus Christi, using milo grains (sorghum). United Fruit entered the frozen shrimp business in the lower Rio Grande Valley. Holsum Baking, Frito, American Beauty Macaroni, Pillsbury and others are listed by

Out of the depths

TEXAS HAS:
48% of U. S. known oil reserves (18 billion barrels).
46% of natural gas reserves (120 trillion cu. ft.).
30% of all U. S. petrochemical plants.
Nation’s top rank in oil-gas chemical production.
60,000 miles of oil pipelines.
68,000 miles of gas pipelines.
57 refineries processing 778 million bbls. of crude yearly; over fourth of U. S. capacity.
Nearly 200,000 oil wells in 6,800 fields.
Out-of-state gas sales of quarter-billion dollars a year.
14% of total world oil production.
60 million acres (third of state acreage) under oil-gas lease.
All-time oil production record—23 billion bbls. in less than century.

the Texas U. Bureau of Business Research.
From airplane and auto, the industrial picture around the major cities and the Gulf Coast will flip the eyelids of a wandering observer. Obviously Texas has made fantastic progress in the last few years. Why shouldn’t it, with all its natural blessings?
There’s a curious side to this industrial growth. Florida, South Carolina and dozens of other states spend big money to lure new industry. Yet mighty Texas, with over $350 million tax income from petroleum and gasoline, operated up to 1958 without an industrial promotion fund. And Texas knew, but didn’t seem to care officially, that 10 factory jobs create 75 jobs in other lines including service, 112 new households, 296 people added to the area, 107 autos, 70 telephones, retail stores, $360,000 gain in retail sales and $590,000 increase in personal income.

Old Law Repeated • Finally an old 1878 law designed to keep out carpet-baggers was repealed and Texas had the chance to promote. So what did Texas do? It appropriated a tiny $23,000 to bring in new industry. It upped the figure modestly this month in the new appropriation bill.

“We send $23 billion out of Texas every year for things we can make ourselves,” said Walter E. Dickerson, chairman of the states Industrial Commission. “We have fuel, labor, resources. Eventually we will get a lot of new industries. The chemical plants, for example, feed each other. They make a product and sell it to another plant. Then they sell the scraps left over to someone who combines them with something else."

One of these days Texas will get the promotional message. Luckily its banks, investors, railroads, utilities and manufacturers have the go-get-it spirit and have done privately a job neglected by the state. Mr. Dickerson began doing this very sort of thing for Central Power & Light Co. in Victoria three decades ago, helping bring Pittsburgh Plate Glass and American Cyanamid to the coastal bend.

Other Industries • Texas industries include cellulose from pine trees and the fuzz on a cotton seed (linters), bromine-magnesium extraction from salt water, chemical processing, solvents (sulphur), transportation equipment, electrical machinery (mostly electronics).

But Texas has a long way to go in the fabricating business. Dallas and Fort Worth are developing their production of finished goods. Alcoa has an aluminum plant at Rockdale, using lignite as fuel, and another on the Gulf at Port Lavaca (Point Comfort), burning gas. These plants, convenient to bauxite supplies and fuel, turn out pigs and ingots. Reynolds has a gas-burning aluminum plant at Corpus Christi.
The two Alcoa smelters have a capacity of nearly 300,000 tons of ingot a year. They employ 2,300 people with a $16 million payroll and spend about the same amount for materials, goods and services. Alcoa owns its Point Comfort gas wells and is building a deep-sea channel to the adjacent Gulf to provide a turn-around basin for large ore boats.

Unluckily for Texas, most of the aluminum is shipped outstate for processing—a situation the state hopes to correct as its industrialization continues.

Iron and steel production mostly comes from the Lone Star Steel Co. in East Texas, where there are ore deposits. Armco has its expanding Sheffield division on the Houston Ship Channel. Their combined output is 2.4 million tons a year.

Texas needs more semi-finishing and fabricating plants to provide jobs and new income for its swelling urban population.

“Here lies the future of Texas,” Mr. Dickerson said.

New leaders wear old Texas names

YOUNGER MEN CHANGE STATE'S FACE AND TIES WITH REST OF U.S.

The stunning commercial facade of Texas, deeply impressive despite its dispersal, is a tribute to the hardy pioneers who shaped a diversified economy out of their cattle and oil earnings.

Monuments to the shapers of a new commercial and industrial structure on the southwestern plains abound in Texas cities. But they are practical monuments — tall, impressive office buildings and less attractive industrial complexes that symbolize their faith in the future of the land of the longhorn.

Familiar Names — The names are familiar — Jones, Belo, Carter, Murchison, Stewart, Thornton, Hough, Ware, Dealey, Maedgen, Dobie, Joiner, to mention only a few. The list could go on for pages.

Their wheeling and dealing moved from cattle through oil into the sophisticated industries of the '60s — petrochemicals, electronics, supersonic aviation.

Now second and third generation descendants are directing the destinies of Texas. They operate quietly. Few wear wide Stetsons except possibly on ceremonial occasions. Their decisions are based on the reports of accountants, lawyers and electronic computers.

The spirit and courage of early Texas still course through their arteries but their methods are mature and scientific.

Bankers generally aren't as stuffy as their eastern counterparts.

Take a Chance — They're more likely to ride along with a customer in temporary trouble. Texas was built on the sagacity and risk-taking of its bankers, who helped finance the upgrading of herds, the ventures into cotton and sorghum, the search for oil and, more lately, the processing of raw materials into semi-finished and finished products.

The wheeling-dealing men of a few decades back were often rip-snortin', rugged operators who employed primitive methods in a primitive economy.

But Texas is changing, and so are its business leaders. Despite the juicy rhetoric of some latter-day historians, they're normal and average men. They aren't running around in levis and diamond-studded chaps. They don't buy their dog a boy, as suggested in a recent effort to revive the tall tales of Texas. And they don't keep a Piper Cub in the living room for quick hops to the patio.

The people of Texas have changed, and so have the ties with the rest of the United States.

Good Communications — There's a blessing that Texas is enjoying to the hilt — fast and efficient communications. The vast spaces — 900 miles from tip to tip — once were a problem that encouraged the state's bubble-gumish lore of rip-snortin' people who made a million bucks before breakfast. The exaggerations helped rationalize the state's built-in handicaps.

But economic and social miracles have happened. Half of Texas' 10 million people had never seen the state a decade or two ago. The vast distances have been cut down to working size by highways — and they are the best. They were cut by the piston plane and now the whine of the jet is everywhere. The supersonic jet will bring Calcutta, India, as close to Dallas as pre-war Shreveport, La., a city near the northeastern state line that has strong Texas ties.

Financial Center — Wall Street has come to Texas. And vice versa.

The economic evolution was dramatized early in the summer when the Dallas Murchisons — John D. and Clint Jr. — took over control of Alleghany Corp., an empire-building trick that caught worldwide attention.

They're under 40, these two (John, 39, Clint Jr. 37). But in Texas business life has begun long before 40, and it often continues another three or four decades.

The Murchisons symbolize the new era of youth in the state. Bank presidents under 40 are a dime a dozen. They're full of fire, energy and a commercial pioneering spirit reminiscent of the older oil and cattle barons.

"Young men could once come to Texas and make a quick killing in oil," John Murchison recalled.

Changing State — "But all that has changed. All Texas has changed. The competition for young men is tougher but the opportunities are great in management, manufacturing, industry, technical fields and the professions."

"It's tougher to build big individual enterprises," said the man whose family will live in the history of big individual enterprises. "A lot of Texas' industrial growth has been built by big industry, not individuals. Heavier manufacturing is here. People are moving out of the country into the city. That's important, and it will continue."

"We're starting to process our own raw materials. In Lubbock the Lewters feed lot is fattening Texas cattle for market. These cattle formerly were shipped to Kansas City and other cattle-finishing centers." The lot is said to be a Murchison enterprise.

Field is Broad — But the key to the spectacular post-war growth of Texas is traced by Mr. Murchison to communications. "There's interplay among important markets," he explained. "Texans are looking for business opportunities in New York, San Francisco, Los Angeles and Chicago. They're seconds away on a telephone, three hours on a jet."

"Texans really aren't spectacular characters. There aren't many millionaires, despite all the tall tales. And these tales are fast dying out. Texas businessmen have always felt these tales were hurting the state."

This soft-spoken, relaxed empire builder is the antithesis of the fictional and tall-tale Texan. He quietly answers

The Murchisons, John D. (left) and Clint Jr., startled the financial world when they took over control of the Alleghany Corp.

almost hidden by nearby skyscrapers.

Own Dallas Cowboys • The Murchi-
sons’ interest in broadcasting is sec-
dary—the impact of antitrust decisions
on one of their teams, the Dallas Cow-
boys of the National Football League.

Interest centers on the federal court
ruling upsetting the plan to telecast
games, a decision affecting the Cow-
boy’s exchequer.

They promote enterprises to make
money, these amazing brothers, but
they allow sentiment and civic spirit to
subdue the profit motive in this new
and losing enterprise.

The spirit of old Texas is there, too
—Lamar Hunt Jr., also a wealthy sec-
ond-generation Texan, is pouring
money into the American Football
League’s Texans. It makes little finan-
cial sense, but it’s great fun for these
competitive entrepreneurs, and for the
football-loving fans of central Texas.

Banks Bigger • Getting back to more
serious economics, Mr. Murchison said,
sors. Robert L. Thornton, known up
and down and across Texas as Bob,
celebrated his 81st birthday last Aug.
10. This was just three months after
he had stepped down as eight-year
mayor of Dallas. He is chairman of
the board of Mercantile National Bank,
whose sky-piercing tower can be seen
30 miles out. It’s the third ranking
bank in the city ($320 million deposits,
and there’s no chain banking in Texas).

Feet on desk and sucking a cigar,

71
helping them keep their equity."

In a thoughtful mood, he observed, "If there's any trouble, we're getting too smart. We're fighting among ourselves." He made this prediction: "Dallas County, I figure, will reach 2 million people by 1975."

In another imposing building, a younger banker thoughtfully discussed the state's elemental economics. "Oil isn't up to five or ten years ago—it was spectacular then—but it's still big business, accounting for $100 million of our loans or a fourth the total," said Robert H. Stewart III, president of Dallas' largest bank though still in his early 30s.

"A lot of big corporations are setting up headquarters or important regional facilities in Dallas. Haliburton Oil Supply Co. is moving in from Oklahoma. Hunt Oil, major independent, and others are headquartered in Dallas. Southwestern Life, Southland Life and Republic Life headquarter in Dallas."

Work Together • What's to come? Agreeing with most other Texas businessmen, he observed, "Diversity assures the future of Texas and Dallas. We have a good labor supply, not highly unionized. Our banks team up on big loans that might otherwise go to New York or Chicago. We have the largest banks between Chicago and the Pacific Coast."

The softness in oil is mentioned by all financiers as they survey the blooming economy but all emphasize that oil's still a basic money maker and supports satellite as well as processing industries.

A. G. McNeese Jr., at 50 president of Houston's Bank of the Southwest, is concerned about residential construction industries as well as oil in that market. But he's "generally optimistic" about the trade area's future.

Petroleum Will Solve Problems • The residential lag will be overcome automatically and the petroleum industry will solve its problems, he believes. And new consumer goods industries will support large numbers of employees per investment, bring payrolls that will expand the per-capita income and in-

cidentally stimulate the purchase of new homes.

Houston's expansive economy has attained the expected recovery from the recent depression, according to 42-year-old James A. Elkins Jr., president of First City National Bank, largest in the area. Expenditures for capital improvements and construction tend to offset the lower level of the oil and gas industry, he said, a statement vividly verified by a fast look around the central city and outlying industrial clusters. At last count (early July), First City National had $665 million in deposits.

Water Resources • Of special concern to J. W. McLean, president of Texas National Bank, is the area's water resources. Any time, any place in Texas, water is a favorite topic. While Houston is blessed with rainfall, surface resources and underground resources, "the vibrant industrial growth between the Mississippi and Rio Grande" promises to create vastly expanded needs for water.

"This region will rank first in the country in use of industrial water before this century ends, if the present growth rate prevails," Mr. McLean said. "A zone of 75-mile radius around Houston is the hub of this burgeoning industrial complex. About 1.8 billion gallons of water daily are available within this zone. Reservoirs to be built by 1966 will add another 1.5 billion gallons daily to the supply. Still other planned reservoirs on four different rivers will increase the total supply to over 4 billion gallons daily by the end of the century. This insures a surplus of some 700 million gallons daily above the highest estimated needs for the year 2,000 and allows for a doubling of demand in the next five years alone."

Engineering Study • Texas National recently conducted an engineering study of the water subject, coming up with what Mr. McLean called "an intriguing story for the nation's industrial leaders." His local pride prompted this postscript, "Houston's population is expected to double the 1960 census figure (1.2 million) by 1970. The growth immediately ahead of us appears to be terrific and I am convinced the water resources will be a chief contributing factor."

In some parts of Texas where water isn't so plentiful—the plains and Permian Basin, for example—the people know how to utilize and conserve their resources which often are underground rather than surface.

To Ware, vice president of Amarillo National Bank in the Panhandle High Plains, reminded there are vast underground water supplies augmented by new surface ponds that dot the region. In the works is a Canadian River Dam. "This visible water supply will impress easterners who scoff at the countless ponds and are skeptical about the immense underground reserves," he said. And of course it will bolster the water supply.

C. E. Maedgen, chairman of the board of Lubbock National Bank to the south, summed up the water problem this way: "We have 9 million acres of fertile land, irrigated by underground water and there's little sign this hidden resource will dry up. We've been irrigating since the mid-30s."

Lubbock had 3,500 people when Mr. Maedgen arrived in 1917. "I figured a city would be built here," he said, "and I bought a 25-foot lot for a bank. It was built. It's growing and Lubbock National is growing with it. We have financed a lot of this growth and we'll keep growing." The bank is housed in a 12-story building decorated with mosaics and murals. There's a snazzy chrome-plated fire plug outside for the benefit of lovers of chrome-plated fire plugs, a symbol of Lubbock National's pride.

Achievement • An ex-mayor of Houston, lawyer and broadcast investor, (KTRK-TV Houston), Roy Hofheinz, oozes optimism as he contemplates the past of Texas and looks ahead. "Texas is going through a transition from enthusiasm to achievement," he said. "A lot of eastern capital is moving into Texas real estate."

"Texans once had trouble raising money in the East. Now the Munchions and others can get money. Texas is on the march."

"Everybody's getting away from tall
Houston's most interesting radio station because its
Key People Really Care!

KPRC, Houston's first radio station, isn't just another jukebox with a transmitter and tower. Its Key People Really Care about listeners and clients, and do everything possible to make the listening pleasant, meaningful, interesting, and resultful. They also insist upon truthfulness and good taste, and as a result, KPRC! has thousands upon thousands of loyal listeners, hundreds of sales-happy clients. It all started years ago when KPRC! engaged Dr. Ernest Dichter's organization to make the first motivational research survey in Houston's radio history to find out what Houston radio listeners wanted from radio. Following the findings in this survey, KPRC! started making the necessary changes, and today you'll find more and more Houstonians listening to KPRC! for its

1. Interesting News! Announcers at KPRC! don't just read releases off a news ticker or machine. KPRC! maintains a staff of 11 newsmen. They go to the scene of the news, witness it, write it, and in most cases, report it themselves on the air. Since they live the news they know the news . . . and, KPRC! news is most interesting!

2. Interesting Music! The records heard on KPRC! aren't the records KPRC! thinks ought to be heard—they're the records listeners indicate they want to hear by their purchases at record stores, by the records they play in public places, by what they say in conversation to KPRC! people and their friends.

3. Interesting People! The voices on KPRC! are friends. The voices belong to real flesh and blood people like Tim Nolan, Bob Byron, Johnny Edwards, Jack London, Gordon Smith and Ken Fairchild. They are companionable people, intelligent people, friendly, interesting people.

As a result, KPRC! is most interesting, most believable, most resultful, because its

Key People Really Care!

How Do You Measure Television?

On the bias, obviously. But whose? That of nose-counters who equate big numbers with stature? That of tv critics who prefer to kill audiences instead of bad guys? Or something in between?

One yardstick we suggest: the distance from a station to its community. Corinthian has always believed that local programming is the shortest distance to its viewers.

A look back at highlights of the past season’s local affairs programming—in prime time—is informative: In Tulsa, a candid study of a local John Birch Society leader and a report on “Tornado Alley.” In Houston, a look at emergency hospital procedures and a teenage spectacular. In Sacramento, Civil Defense and a full hour non-clinical approach to VD problems. In Indianapolis, a report on flood control and a study of Indiana highways. In Fort Wayne, the work of a school for the mentally retarded and a program with the Fort Wayne Philharmonic.

Enlightened sponsors are discovering the value of such programming—but, sponsored or not, Corinthian stations are continuing these local efforts on a monthly basis in prime evening time.

When the instrument is Corinthian television, twenty-one inches reaches from station to community—and from seller to buyer.
FOUR MAJOR TEXAS MARKETS

Here is the growth record of four major markets in Texas, based on figures compiled by the Dallas Chamber of Commerce. The figures, except bank deposits and employment, cover the first five months of 1961 and 1960, unless otherwise indicated.

We have right-to-work laws and true free enterprise. We have decent government. The future of electronics and petrochemicals is beyond our dreams.

"We in Texas should make heavy equipment and sell it out over a wide area. We should fabricate our products and sell them to the Far West, Southwest and South instead of letting the business go to Detroit, New York, New Jersey, Chicago and other cities.

"We should manufacture Fords, not assemble them."

**Widespread Interests** - Young Vaughn’s interests are spread over 17 states and foreign countries. He’s interested in construction, helicopters, cattle, owns Spartan National Life Insurance Co. 100% and is a banker. Television holdings include KROD-TV El Paso; KOSA-TV Odessa and KVII-TV Amarillo.

These are a few of the thousands of successful, aggressive Texas businessmen who have taken part in the growth of Texas, 1961 model, and who are shaping the future.
HUGE HOUSTON GROWS 5% YEARLY
Huge plants line 50-mile sea channel; boosters point to prospects for future

An innocent question, "Just how big is Houston?" can bring a loaded answer from any member of the tops-in-Texas cult that has grown up at the headwaters of the Big Ditch.

Asked a few hundred feet above average terrain in Houston's formidable skyscraper center, the question is apt to—and did—inspire this forward-gazing reply: "Two-and-a-half million in 1975."

They talk that way in Houston when the conversation gets around to the essential economics of this ocean-tied miracle—and don't try to imply the metropolis is anything short of super terrific, or anything as ordinary as Dallas.

50-Mile Channel • Houston's Big Ditch is a 50-mile ship channel to the Gulf, 100 yards wide at the narrowest point. It's fondly described as "The Port of Houston's Fabulous Fifty Miles." There are three ways of seeing it—by air, water and auto. From above, the view is beautiful. Aboard the sleek Sam Houston, a city yacht used to enrich visits of industrialists, the channel view is impressively functional. By auto the clusters of tanks and tubs can be glimpsed in hundred-million dollar bits.

At one end the visitor aboard the Sam Houston will watch this collection of plants unveil: Stauffer Chemical, Signal Oil, Lone Star Cement, Continental grain elevators, Southwest Sugar, more Signal Oil, Koppers—and they're all on one side. Across the channel are Tennessee Coal & Iron, Ideal Cement, Mayo Shell, U. S. Gypsum, Gulf Oil, Armco Steel, Tenn-Tex Alloy, Todd Shipyards.

This 20th Century spectacle goes on and on. It's getting so crowded they're figuring out a series of finger ditches to make room for more industry.

"Houston is on the threshold of the largest chemical complex in the history of the world," said Roy Hofheinz, lawyer and ex-mayor. "It has a combination of cheap fuel, water, water transport, adequate land and mild weather."

Statistical Proof • For number lovers, Houston has stacks of tables, charts and
statistics that tell one of the exciting stories of American city progress. Here are some of the current numbers: 544,000 in May labor force with 518,000 at work—match that if you can, Dallas; 92,375 in manufacturing; nonresidential construction contract awards totaling $134 million in the first five months of 1961 and $288 million in the 12 months of 1960; doubled bank debits in a decade, $14 billion to $28 billion; almost doubled bank deposits, $1.3 to $2.6 billion; more than doubled postal sales, $8 to $20.6 million.

But getting back to the original question, "Just how big is Houston?" the answer is 1,234,158 people in 1960 compared to 806,000 in 1950, according to the U. S. Census (metropolitan area, Harris County). A fast pass at a slide rule will suggest a 1961 mid-summer population of 1½ million. The growth rate is running over 5% a year.

Million Mark Jubilee • Some years ago Houston set up six months in advance a rousing July celebration as the city attained the million-people mark. This miracle of the data-processing arts was based on honest planning fortified by intense promotion. Nobody ever proved the million mark was reached earlier in the year, or a few weeks later. Anyhow The Fete of a Million People called world attention to the city's numerical achievement and industrial progress.

The basic economy of Houston is supported by $3 billion worth of oil and gas plants, the 50 miles of ship channel plants devoted to a wide assortment of other industries, 125,000 cows (tops for any Texas county), enough docks and a turning basin to justify the proud claim Second U. S. Port, assorted farm products and such basic facilities as freeways, the international airport and the geographical-geometric achievement—a harbor for ocean commerce and a full 360 degrees in which to spread.

Plentiful Resources • A thoughtful Houston businessman will account for the growth this way: To a major extent the growth in the Texas Gulf Coast area, especially Houston, must be attributed to the incomparable natural resources, the geographical location of the region and the mass production industries—notably oil refining, chemicals and metals—which have been built upon them.

And the future? The prospectus goes: Booming Houston increased 54% in the last decade, according to the 1960 census, and population analysts are predicting an even faster increase in the years to come. Growth of the port and city go hand in hand, with business and industry moving ahead at full throttle, looking to a dynamic future.

Interlinking of oil and gas throughout
Station KPAC-TV
Beaumont-Port Arthur
has appointed
Blair Television Associates
as national representative
effective August 14, 1961.
Here at Beaumont-Port Arthur is where America's big blue-chip companies make a lot of their blue chips, in petrochemicals—companies like:

- Allied Chemical
- Bethlehem Steel
- Olin Mathieson
-DuPont
- Firestone
- Goodrich
-Koppers
-U.S. Rubber
-U.S. Steel

These blue-chip payrolls build business in four thriving cities—Beaumont, Orange, Port Arthur and Lake Charles.

Remember one station, and only one, delivers all four markets:

**KPAC-TV**

Channel 4 NBC

NEW SUPER-TALL TOWER—To give still finer service to this growing market, and bring Lake Charles well within its Grade A zone. KPAC-TV is putting a new-super-tall tower into operation early this fall. Rising more than 1,000 feet above average terrain, the new tower is estimated to bring more than 25,000 additional TV homes within the service area of KPAC-TV—a substantial increase for the station that already reaches more homes than any other in the market.

TIME FOR ACTION—Check with your nearby Blair office for complete data on KPAC-TV and its great Gulf Coast market.

TEXAS GOLDCOAST TELEVISION, INC.

HOUSTON GROWING 5% A YEAR continued

the main types of manufacturing is significant, according to a Federal Reserve Bank review. Oil and related industries account for over 150,000 employees and over $1 billion in personal income, the bank said—and that was two years ago.

Inland Waterway Too • Besides the heavy ocean traffic Houston is tied into the inland waterway system with access to the entire Mississippi Valley and Great Lakes region. The total traffic of its port exceeds 60 million tons. Nearby Beaumont and Port Arthur have 49 million tons, split about 50-50 with Beaumont having an edge.

The younger generation is taking hold in Houston just as in Dallas, Fort Worth and other Texas cities. These businessmen are behind new physical, cultural and educational facilities.

A $38-million pond, Lake Livingston, will bury 80,000 acres on the Trinity River, including the village of Kickapoo, some good roads and pipelines.

U. of Houston, second largest in Texas, has 13,000 students. Like Rice U., it was founded by a local philanthropist.

The symphony signed Sir John Barbirolli as conductor; local grand opera plays to full houses. There are a number of museum and art galleries.

Covered Stadium • A new $22-million stadium with a protective dome will provide weatherproof football and baseball. The Houston Oilers were the American League champs in 1960. The new Colts baseball team will join the National League next year. The stadium will seat 53,000 for football, 46,000 for baseball and 66,000 for sports less demanding of ground area. It will have $8 million in needed facilities and a $1 million standby stadium for use next year while the dome project is being completed.

This recreational tidbit isn't unusual in Houston. A review by the local Chamber of Commerce listed these Houston rankings in the Southwest—first seaport, first in population, first industrial market, first in retail sales, second in wholesaling, first in value added by manufacture, first in factory payroll and first in factory capital expenditures.

National Rankings • Nationally Houston was ranked this way—second seaport, seventh in population of incorporated area, 16th in metropolitan area population, 14th industrial market, 15th in retail sales, ninth in manufacturing, 18th in value added by manufacture and 20th in factory payroll.

Retail sales, according to the U. S. Census Bureau, rose 90.4% from $811 million to $1.54 billion from 1948 to 1958. And value added by manufacture rose in four years, 1954-58, from $869 million to $1.17 billion.

Houston recently spent $3 million on its international airport. New air routes to both East and West Coasts have opened. Airlines contribute over $10 million a year to the economy. The $120 million Texas Medical Center is expected to be one of the world's greatest medical concentrations. Baylor U. College of Medicine and U. of Texas Dental Branch are located on the 163-acre tract.

“No other city in the world has on its doorstep such a wealth of natural resources,” the Chamber of Commerce has proclaimed. No other city has refuted the claim.

Science increasing Texas farm profits

1960 INCOME TOPS $2 BILLION; LEADS IN LIVESTOCK, MANY CROPS

As elsewhere, Texans can't keep them down on the farm after they've seen Big D, Houston or other modern cities.

But the decline in the Texas farm population to a little over 10% has been in inverse ratio to the income from its agriculture. Last year's cash income to farmers totaled $2.2 billion (see table).

Texas is full of farming firsts. It tops the U.S. in cotton, cottonseed and grain sorghum. And it has the largest harvested acreage of any state—24.1 million acres. Texas is generally around top place in the rice standings.

Fancy Cattle • It's superfluous to observe that Texas is first in livestock. There are over 9.2 million cattle—fancy breeds suited to the state's assorted climates and pastures and looking little like the fabled longhorn. Cattle supremacy is now tied to Texas' top position for grain sorghum, blended with cottonseed meal, molasses and other goodies to fatten range-reared cattle for market. At the Lewters feed lot in Lubbock they fix a mechanized supper for up to 30,000 cattle at once, a do-it-at-home function once handled at Kansas City and other centers.

Texas agriculture naturally utilizes the latest in farm machinery. Farms are big and getting bigger. Of importance to those who sell goods and services to Texans, the rural living standards are rising steadily as they keep pace with urban trends.

More Cows in the East • It startles outsiders to hear there are more cattle clustered on lush East Texas pastures than on the West Texas range. Fancy grasses have been planted there and water is plentiful. Harris County (Houston) has a heavier cattle population than any other county.

And those unfamiliar with cotton are often startled to learn that a by-product of the average bale of cotton is 800 to 1,000 pounds of cottonseed worth $45 to $50 a ton. Once dumped, this product is worth up to $100 million yearly to Texas ($56 million last year). It's used for stock feed after the oil has been extracted. The oil finds its way into shortening, salad oil, other foods.

Texas is learning how to conserve its

Truck farming is a big industry in the Rio Grande Valley. This photograph of an irrigated field was made in the McAllen area.

80 (SPECIAL REPORT: THE TEXAS MARKET)
water supply, a boon to irrigation in the arid farm areas. Dry-farming methods have been improved where water isn’t available. Irrigation is found all the way from the Rio Grande Valley to the Panhandle, much of it based on conservation techniques. In the valley most of the water comes from the river; in the plains from vast underground sources.

**Supplies Demand** - This ground water supply manages to keep up with the plains irrigation but experts can’t agree on how long it will be available. Thousands of ponds built on the plains are collecting runoff that, farmers hope, will trickle down into limestone caverns to replenish the supply. At least half the state has underground water. It’s sinking slowly, studies show, but there isn’t any sign of exhaustion. Many cities once dependent on ground water are now developing surface water sources.

The rich soils of vast plains and humid flatlands produce over $2.2 billion a year in agriculture products, with livestock producing $1 billion and crops the rest. Naturally the price of cotton is a key factor in determining the success or failure of a crop year since this crop accounts for a little over half the farm income. In 1960, for instance, cotton farmers received $565 million for their crop. This was $107 million or 15.9% below the amount received for this crop in 1959.

**Temperamental Cotton** - Cotton is grown from the Sabine river in the east to Lubbock in the west. It’s temperamental, this little bush with the fuzzy fruit. In the Rio Grande Valley they raise fast-maturing strains because of parasites and pests; out on the western plains they produce different types. Careful selection of strains, pest control, irrigation and mechanized harvesting of fields defoliated by airplane spraying have kept Texas in the front of cotton-growing states.

The second grain crop is sorghum, a dwarfish sort of corn-like plant with tassels of tiny, oily kernels. This grain will produce $200 million in a good year ($195 million in 1960). The discovery that it is 98% as efficient as corn for cattle fattening is perhaps the main reason Texas is now finishing its own steers. Nearly 7 million acres were planted to grain sorghum last year, topping the nation, with another 800,000 acres planted to other types for silage and forage.

**Wheat, Too** - It’s not often anyone thinks of Texas as a wheat state, but last year farmers received $135 million from their crop. It was a good wheat year. Wheat acreage ranks fifth in the nation, practically all of it winter wheat. And Texas ranks one-two-three-four with Arkansas, Louisiana and California in its rice crop, which brought the state $56 million last year.

Fruits and vegetables produced $89 million for farmers. The Rio Grande Valley is raising better types of oranges and grapefruit as the killer-frost damage of a decade ago is forgotten. Its red and pink grapefruit are the world’s finest, the valley boasts.

The famed Texas cattle bear no resemblance whatsoever to the longhorns of legendary grazing days. The vast King Ranch, with headquarters at Kingsville, 25 miles from Corpus Christi, has its renowned Santa Gertrudis strain with a tickproof hide bred in from Brahman cattle. This is the only American-developed strain. Whitefaces dominate the herds but there is a growing percentage of Black Angus and other types. Cattle ranchers got over a half-billion dollars for their animals last year.

**Scientific Ranching** - A drive around famed King Ranch headquarters provides a quick course in scientific agriculture. Cattle breeding has been raised to a form of high art. Fancy quarter-horses and racers (two Kentucky Derby winners—Assault, triple crown winner in 1946, Middleground in 1950) are bred and trained but ogling tourists are kept at a distance because these thoroughbreds are temperamental. Everything about 50 two-year-olds are shipped to major tracks to start their racing careers.

The ranch consists of 823,400 acres. It was founded before the Civil War by Richard King, a native New Yorker, with the present-day ranch operated by a corporation of which Robert J. Kleberg is president and general manager. Other ranches are operated in Kentucky, Pennsylvania, Australia and Latin countries. Experiments cover the range of land utilization, breeding, feeding, and wildlife conservation.

**Broadcasting, August 21, 1961**
DALLAS IS BIG BUSINESS
Battling Houston for top population Big D claims
Ft. Worth's 600,000 as part of its trading area

In Dallas they hang two favorite tags on the metropolis—"Big D" and "Business Hub of the Southwest." Both are descriptive. And both are accurate, judging by convincing statistics telling one of the great stories of American civic achievement.

Any time Big D gets an argument from Houston about who's biggest—Houston has more people—it has an economic ace up its sleeve: Fort Worth. The combination is unmatched in Texas. The combined population is equaled in only eight or nine other American markets. Dallas has over a million and Fort Worth is about 600,000; Houston, 1,243,000 (U. S. Census). That's 1,600,000 for Dallas.

The historical rivalry between Dallas and Fort Worth is disappearing from the market along with the chaps and horsey scent of a half-century ago. This rivalry was fanned chiefly by Fort Worth. At least, that's the way they tell it in Dallas where the calmer civic-minded business leaders point out that the younger element in Fort Worth is trying to shake off the city's long-promoted legend—"Where the West Begins." (See Fort Worth story page 86.)

Sell The Market • These two major markets are a logical demonstration of the power of broadcasting in modern economics. Their tv stations and radio sell the market during Madison Avenue sales forays on the basis of Dallas and Tarrant Counties plus dozens of perimeter counties within range of the signals.

A tv signal can't split the market into two separate units. Nor can an outstate observer, plodding highly developed Route 80 between Dallas and Fort Worth, escape thinking of them as one, or at least as Siamese twins. And an air view shows two big cities moving toward each other, merging their facilities and commerce. A turnpike has cut the bus trip to 35 minutes.

Dallas has assumed many of the economic aspects of New York, with its commerce, finance and industry. It's newer, cleaner and more efficient, lacking mainly a seaport. Someday, Dallas enthusiasts say, they'll have a 400-mile canal along the Trinity River to Galveston. A survey is under way. Anyhow, it's a cheery dream and it just might come true.

The Dallas Federal Reserve Bank put it this way: "Dallas and the neighboring cities of Fort Worth, Arlington, Grand Prairie, Richardson, Irving and Garland—as well as others in the Dallazas and Tarrant County areas—are steadily drawing together into an economic unit which ultimately will know only political boundaries."

Big D Booms • Big D is big, beautiful and booming. It's apparent as an airplane glides into Love Field, as a cab plies a few minutes along a modern freeway into downtown and as the residential and industrial sections are inspected. Above all, Dallas is exciting as its civic and business leaders tell stories—not about millionaires or oil barons, but about universities, culture, construction, banks, outstanding communications and general progress.

Dallas has its water supply under control. Five years ago during a drought they were peddling drinking water at 50 cents a gallon bottle. All that has changed. New lakes have been developed. One lake alone, Tawakoni on the Sabine River to the east and outside the Dallas watershed, is near completion and will double the present enlarged supply. Dallas now boasts it has a lot more water than it needs and will have no future worry.

Impressive Growth • In the last five years Dallas has grown impressively. Only New York has built more office space, Dallas boosters insist. Main and Commerce streets are true skyscraper canyons, with new buildings going up at many spots. Downtown shopping is holding its own; giant suburban shopping centers abound. And they still come from thousands of miles to shop at famed Nieman Marcus, a modest but plush store that can provide a vast assortment of usual and unusual items from trinkets to luxuries.

Dallas now has two pro football teams, Cowboys (National) and Texans (American) that siphon Murchison and Hunt money, an expensive hobby these financial families seem to tolerate and even enjoy. The city has been after a big league baseball club but even the well-heeled financiers haven't yet been

able to swing it. Houston gets a National League baseball club in 1962.

Long an industrial community, the factory aspect is shifting from aeronautics to the newer sophisticated industries that serve the missile age (see Dallas Electronics story, page 86). But an intensified defense crisis could bring back some of the dwindling aeronautical activity.

Income High • Personal income more than doubled in a decade, according to government figures, wages-salaries going up about 120% and other labor income 2½ times. Living standards are high; there's minimum unemployment and the city has tooled up its physical facilities for fast expansion in the 60s. Bank deposits in Dallas were up $310 million in mid-summer over a year ago.

Dallas isn't exaggerating when it boasts of financial prowess. It has big banks, big insurance companies, big business, big financiers and big wheels —the Murchisons (Alleghany Corp.), for example (see story, page 68). Their influence is felt all over Texas, the U. S. and around the world.

Big Banks • It has two of the largest banks in the nation—Republic National Bank with nearly $1.2 billion in resources, and First National Bank in Dallas, with just under $1 billion. Combined, Dallas banks have over $3 billion in resources and there is no such thing as a branch bank in Texas.

A score of Dallas-based insurance companies have over $9 billion insurance in force; the city is one of the four leading U. S. insurance centers. There are 19 members of the New York Stock Exchange, ascribed to its proclaimed role of "leading securities center of the South." Merrill, Lynch, Pierce, Fenner & Smith has 100 employees in its two Dallas offices and is in a big expansion program.

The city is a transportation center, dominating southwestern traffic. Mexicana Airlines last April started international service. Delta has just added new service to Las Vegas and the West Coast; Eastern to New Orleans and Miami. Two-score truck lines have terminal facilities, averaging $200,000 a day in freight clearings as 1,200 trucks head in all directions. Some 1,800 Texas communities rely solely on trucks for shipping service.

Style Leader • With its crossroads location, Dallas has assumed a dominant position in the apparel and dry goods industry. Its styles have become pattern-setters. Dallas Fashion Manufacturers Assn. members, employing 11,000, have a $30 million annual payroll. Over 6,000 garment buyers go there four times a year. Sales comprise 80% of the state total.

Industrial districts are prettied up in the modern manner. Brook Hollow along the freeway is described locally as "the most beautiful entrance to any city in America." It houses 200 firms with $75 million plant investment and includes such names as GE, RCA, Abbott Labs, Insurance Co. of North America and Parke Davis. There are a score of other districts plus another 17 industrial areas. The new 16-lane Stemmons Freeway runs along Trinity District, an industrial center with 1,000 firms and $100 million in buildings located on a 1,500-acre plot.

Many Conventions • Conventions and trade shows numbering about 200 will bring the city $75 million this year. The Merchandise Mart of Dallas was set up in 1952 and a furniture mart was added in 1957, the largest outside Chicago. In mid-July there were 10,000 furniture buyers in Dallas for the summer show. Other marts are devoted to decorative, home furnishing and gift wares. A new building, with a million square feet is devoted to gift wares. Hotel space doubled in the 50s, including large Hilton and Sheraton facilities.

Industrial payrolls last year totaled $1,785 million, up $77 million in a year. Principal sources were manufacturing, $457 million; retailing $237 million; wholesaling $224 million; service, miscellaneous $193 million; government (including private education) $186 million; transportation, $120 million; construction $104 million.

Bank deposits were up 8.1% in 1960, payrolls 4.6%, bank debits 10.1%, electricity use 10.7%, number of telephones 5.9% and postal receipts 7.7%—all that in one year.

Wholesale Center • Over 3,000 wholesale firms, who do a business of more than $4 billion, leading the rest of the state and ranking 12th nationally. Leading items are machinery, groceries, and farm products. Metropolitan Dallas has 28% of the Texas wholesale business compared to 11.3% of the population. Houston is second-ranking wholesaler with $3.6 billion.

But where Dallas really gets exciting is in its office, industrial and highway facilities. The city set a local building permit record in the first quarter of 1960, its $57.6 million ranking third in the U. S. Among current projects are an upcoming First National Bank in Dallas building, Praetorian Bldg., Southwestern Bell, Gllidden Co. plant at Carrollton, Republican National Bank tower, Southwestern Life, more freeways, St. Paul's Hospital, $3 million Medallion department store, Montgomery Ward, $50 million shopping center and 10,000 homes (1961 total). The city is becoming an important building supply center.

Dallas electronics production center

The most spectacular factor in the growth of Dallas industry is the production of electronic items and associated research. Blessed with skilled engineers, these firms are neck-deep in the Minute Man, Saturn, Nike-Zeus, Sergeant, Thor, Atlas, Hawk and all the magic names of the missile era.

By yearend these firms will have turned out electronics products with a total value of $263 million, according to a compilation by the Dallas Chamber of Commerce. The industry employs around 17,000 persons with a payroll of $100 million—17.4% of all Dallas factory workers.

Doubled in Three Years • Nobody's much excited over the growth rate, but for the record it must be stated that Dallas electronics employment doubled between 1958 and 1961. And this is just the beginning, according to a recent statement by James J. Ling, board chairman of the new Ling-Temco-Vought combine (a merger of Ling-Temco Electronics and Chance Vought Corp. that will be wrapped up by the time these lines appear).

Ling-Temco-Vought covers the gamut of electronics, radar, tv, missile and industrial electronics. It has a backlog of $300 million. A subsidiary, Continental Electronics Mfg. Co., built the most powerful transmitters in the world. They include a 2,000 kw job for the Navy and superpower gear for Voice of America. Continental developed radar for the Nike-Zeus antimissile-missile system and many types of space equipment. A Polaris sub system was developed in collaboration with Alpha Corp., a Collins Radio subsidiary.

Largest of the Dallas electronics firms is Texas Instruments (18,000 employees worldwide. 11,000 in Dallas County; 1960 billings of $233 million). TI is a leading manufacturer of transistors and other components. Last year it spent $38 million on engineering alone, about half supported by other firms and the government.

Collins Plant • In Texas, Collins’ Dallas headquarters directs operations that employ 3,000 (including the subsidiary Alpha Corp.). It has an $1.8 million addition. The Texas division is devoted to single sideband communication, airborne navigation, flight control, broadcast and space equipment. Alpha handles space surveillance, integrated land-sea-air systems and instrumentation switching facilities.

Electronic Corp. makes low-cost tv stations and automated gear. It has proposed a commercial tv service (uhf) for Dallas businessmen, providing visual-audio news, market data and weather. Varo Inc. provides power supplies, components and other electronics items.

HST Division of Dresser Electronics designs and makes magnetic components and electronic sub-systems for missiles and rockets, radar and television. In all there are 14 Dresser Industries divisions. Among Dallas electronic firms are Geotechnical Corp., Space Corp., General Electrodyamics, Airborn Inc. and dozens of others.

FT. WORTH INDUSTRY GROWS

Cowtown label fading as new plants multiply; stockyards and packing houses still important

Some of the oldtimers hate to admit it, but those who measure markets with slide rules instead of sentiment can state a good case on behalf of the claim that Fort Worth is losing its beloved “Cowtown” reputation. For Cowtown has gone modern.

Of course some western flavor persists, especially in world-famed Amon G. Carter Museum of Western Art where it appears in high concentration, but a curious pedestrian who talks to a hundred or so of the natives will find they’re more interested in the chance of reviving the Hustler (B-58 bomber) as a key defense weapon or the state of business at Sun Chemical, the shift of Great Southwest Corp. headquarters from Dallas and the building plans of Carling’s beer, Crown Cork, General Foods and Sears Roebuck.

The late Amon Carter knew Fort Worth when it was a trail crossing. He observed and sparked its growth into a modern city as publisher (Star-Telegram), broadcaster (WBAP-AM-TV), and civic leader.

Industrial Parks • Major industrial parks house much of Fort Worth’s industry. The city and environs are the second largest aircraft production center in America. The Hustler is the fastest manned weapon in the U. S. arsenal but production at General Dynamics, with 16,000 employees, has been hit by Washington indifference, an attitude that is starting to feel the pressures of international crises. Bell Helicopter-seller aircraft in 50 countries, is keeping busy and employs 3,000. Carswell air base has B-52 bombers.

The cattle industry, which drove Fort Worth into business prominence, is still important. The $30-million investment in packing houses and stockyards provides work for 10,000 and a $30-million annual payroll. About 3 million animals are handled annually, a business that grosses $200 million a year.

Grain storage capacity, 72 million bushels, is fifth largest in the nation. Flour and feed mills are important.

Forth Worth likes the tag “Detroit of American Boats,” the industry having $14 million in annual sales and a $4.6 million payroll. There are 400 concerns directly connected with the oil industry. Life insurance and fire-

FORT WORTH — 3900 BARNETT... DALLAS — 1900 NORTH AKARD
Ask any Colonel: Peters - Griffin - Woodward, Inc.
Here is the Ft. Worth "Mixmaster" highway system with the downtown casualty companies based in Fort Worth have assets over $200 million.

**Transformation** • All this tends to clash with the "Cowtown" label, excepting the livestock industry. Fort Worth is undergoing a marketing transformation. By itself it is an important market of 600,000. But tying Fort Worth into the area covered by its TV signals brings an entirely different story. At this point Fort Worth becomes part of a market area approaching 3 million persons in 53 counties served by Dallas-Fort Worth TV stations.

The older generation isn’t happy about the merging of Fort Worth into other marketing groups. Yet a survey of the city will show it expanding eastward toward Dallas as Dallas expands toward Fort Worth.

Times and Fort Worth are changing. The traditional motto, "Where the West Begins," has been modernized by younger business people to this version, "Fort Worth—Where Modern Living Meets the Hospitality of the Old West."

This draws a fast reaction from old-timers, who stick to the original version. "The spirit of West Texas remains," according to Harold Hough, WBAP-AM-TV vice president-director. "Many of the ranchers live here. We’re the marketing center for West Texas. Ranching and oil are still important."

He conceded Fort Worth has become more modern with its aeronautic and scientific industries. Then he added, "Many of the people who work at Convair live as far west as 100 miles."

**Industrial City** • "Don’t swallow those yarns about our Cowtown atmosphere," another business official stated with a suggestion it would be better if he remained anonymous. "Fort Worth is an industrial city, with close Dallas ties. Everybody goes back and forth so much over the turnpike and old Route 80 that it’s getting to be a joke—except when you mention Amon Carter airport and Love Field." Carter airport is 19 miles from downtown Fort Worth.

A diligent right-of-way purchase, 16 miles long and 50 feet wide, brought it into the Fort Worth municipal boundaries. But Love Field, 15 minutes from Dallas hotels, dominates the traffic movement despite the fond hopes of Mr. Carter.

Medium-size cities have sprung up between Dallas and Fort Worth. Tarrant County has 53,500 employed in manufacturing, 128,000 in construction, 53,700 in retail trade, 24,200 in government. With assorted other lines, the county has 219,000 employed compared to 455,000 in Dallas county, according to late figures of Texas Employment Commission. Wages and income rose 139% between 1948-57 and the pace is still brisk. Food and related products are big employment sources. Candy is an important item.

**Shopping Center** • Fort Worth continues to be the shopping center for much of northern and western Texas, southwestern Oklahoma and eastern New Mexico, according to a Federal Reserve study. The city leads in work clothes manufacturing in the Southwest and has a number of furniture plants. Lennox Industries is the Southwest’s No. 1 producer of air conditioning equipment. Value added to manufacturing, all products, tripled in the 1948-58 period. The low work-stoppage record is claimed to lead the Southwest.

Looking ahead, Fort Worth hopes for a million population in the mid-70s. Its bank debits (individual accounts) doubled from $4.7 billion to $9.3 billion from 1950 to 1960.

Whether it’s Fort Worth, Dallas-Fort Worth or 53 counties, Cowtown is living, spending and thinking like other Texas cities which are mostly thinking like other American cities.

"The Voice of Dependability"
since 1922
Television’s potential as a sales tool has taken on new dimensions in a handful of U. S. markets. Each of these areas boasts one of those unique engineering achievements usually dubbed “The Tall Tower.” A lofty tribute to someone’s ability to “think big,” this utilitarian giant sends TV’s selling signal booming out to consuming masses that competing media can only dream about reaching.

Experts Re-Evaluate • The result: experts in every phase of the marketing function find they must re-evaluate these markets to take full advantage of this unusual video impact.

No longer valid is the old concept of covering only a metropolitan market. Outdated, too, is that favorite of print media, “the retail trade zone.” Even the more modern idea of regional marketing via TV has to be expanded in Tall Tower markets. Any lesser approach passes up a golden opportunity to use the most muscular of all mass media, Tall Tower Television.

New Sales Support • An advertising manager, for example, finds a Tall Tower supplies solid TV sales support for trade areas that never before enjoyed such help. Obviously, retail activity can be stepped up without any increase in overall advertising investment. This is a development that is not likely to bring gloom to any board of directors.

And what about the effect of this Tall Tower on the company’s co-op advertising program? The smaller dealer—who traditionally has moaned “When are you going to do some advertising in my town?”—is finally willing to agree that the company’s schedule on a Tall Tower station really reaches local customers. Participation by more distributors of this type cuts the amount that each must pay, so co-op campaigns become more welcome, more frequent and, hence, more effective.

Media Analysis • While the advertising manager has been becoming pleasantly acquainted with Tall Towers, the media analyst at his advertising agency also has made interesting findings.

This expert notices that some TV stations are pushing back the horizon, adding a dozen or more counties that competing channels do not penetrate to an effective degree. In the San Antonio Television market, for example, the 1960 ARB Coverage Study credits WOAI-TV (the Tall Tower station with the greatest coverage) with 52 counties—compared to only 39 for the VHF with the shortest tower.

The media authority recognizes, too, that a Tall Tower station’s greater potential audience makes it possible for each schedule to reach a larger unduplicated cume, a benefit that is vital to the sales strategy of many advertisers.

Homes vs. Ratings • Everyone performing the time-buying function for an agency is made conscious of Tall Towers by sales presentations stressing “Total Homes”—supplied by stations fortunate enough to be operating from a big stick. Conversely, pitches by competing channels show a strange fondness for metropolitan rating points and are apt to speak disparagingly of extended coverage that delivers "windmills and jackrabbits."

The real oddity in this difference of emphasis is that some of the most vocal supporters of the glorious rating point have quietly applied for permission to build their own Tall Towers! Clearly, continuing market research by agencies and advertisers has firmly established the importance of delivering people rather than percentage points.

And an increasing number of 1961’s fourth quarter schedules are going to Tall Tower stations solely on the basis of potential. With many of their commercials slotted in or adjacent to wholly untested program fare (which describes the prime time line-up in any market), time buyers and their clients reason that they are reducing the risk by choosing a channel which, sign-on to sign-off, delivers more than its fair share of the audience.
San Antonio's skyline is impressive as seen from one of the modern ex-pressways which lead into the city. The look belies its historic past.

BASSES BOOST SAN ANTONIO

Old and new blend to give southern Texas center unusual, but prosperous, economy

In San Antonio, where the old and new live in prosperous harmony, they "Remember the Alamo" every time there's an excuse for a festival. More recently they're learning to enjoy more prosaic symbols such as the payroll at Lackland air base or the $675 million in bank deposits.

This city of contrasts is a tourist's dream and an economic exception.

Military Center • Much of the basic economy can't be observed easily. San Antonio is surrounded by colossal military bases scarcely visible from highways — the biggest military center outside the Pentagon. There's no collection of big industrial parks or chemical plants to dramatize local industry. San Antonio is content with its unusual economic facade for obvious reasons — these for example:

• Nearly half its wages and salaries come from the government, a steady income source immune to the harsh fluctuations of the average city.

• Even without the business boosts of major industries its population is increasing at a pleasant rate — 500,460 in 1950 to 687,000 in 1960, a healthy 37%.

• The defense installations promise continued growth — it's a haven for retired military personnel and younger men coming out of the service.

• It serves as a financial center for south Texas.

• Distribution and service industries are the second main source of income. Manufacturing is developing but San Antonio isn't yet a major factory city with only about 26,000 so employed. Strikes, by the way, are rare.

• The historic shrines and other tourist attractions bring in $50 million a year; conventions draw another $10 million; an urban renewal project is in the works.

• Important medical facilities at the military bases; a new hospital is underway at Lackland and the U. of Texas is to have a medical center.

The governmental side of San Antonio isn't easily documented. Many of the primary facts are on record but the full spread of federal influence has intricate and important aspects.

Military statistics as of July 1960 (and they haven't changed much in a year), show 49,888 military and 29,987 civilian personnel drawing $270 million in annual pay.

Since World War I • The Army came to San Antonio in World War I. Kelly Field was the first great flying center, flanked soon by Brooks air base. Now there are five Air Force bases — Kelly, Brooks, Lackland, Medina (usually included in Kelly) and Randolph. Lackland is by far the largest with 26,000 military and 1,900 civilian personnel.

Add that all-important "quality touch" to your next videotape production! WFAA PRODUCTIONS is a complete entity affording the ultimate in technical equipment and production know-how. Studio or location, no job is too big or too small. Our $250,000 VideoTape Cruiser can range up to 500 miles for "on location" taping... has its own power supply, two Ampex VideoTape units and 6 Marcon cameras. "In studio" shooting is the most flexible and fully equipped you will find anywhere!

Texas' fabulous country clubs provide pleasing backgrounds for "on location" taping. However, WFAA's VideoTape cruiser can go anywhere... to retail outlets, ranches, traffic areas, even the oilfields to achieve that added realism.

DICK GRAY, Manager
WFAA PRODUCTIONS
Former network unit manager and producer of many national live, film and videotape commercials in New York, Dick Gray's extensive background will prove invaluable to advertisers and agencies. He is in charge of all production, including taping, mobile contracts and commercial recording.

WFAA productions

Special set construction, as well as the utilization of a variety of existing sets provides limitless backgrounds. Rear screen projection is also available.

Unsurpassed Fidelity and Flexibility

RADIO RECORDING

Monaural or multi-track stereo (up to 4 track), WFAA PRODUCTIONS is fast becoming noted throughout the nation for the quality of its transcriptions...tape or disc. And the talent supply is almost unlimited, back-stopped by engineers and directors with many years of experience.

Studio “D” with its polycylindrical sound diffusion walls and special grids create the ultimate in staging. The entire studio “floats” independently from the rest of the building.

A battery of 8 Ampex #354 stereo-monaural tape recorders permit mass tape duplications with one single tape simultaneously duplicated up to 8 times.

Two German-made Neuman Lathes produce transcriptions in four speeds—microgroove and stereophonic. This is the most advanced recording equipment available today!

WFAA productions

Address all inquiries to Dick Gray, WFAA Productions, at Communications Center, Dallas, Texas
Kelly has 4,496 military but 20,701 civilian workers. The Army operates Brooke Army Medical Center at Fort Sam Houston where there are 12,942 military and 4,566 civilian personnel.

These statistics seem simple enough. They comprise about a fourth of the city's personal income and possibly three times the factory income, according to a Federal Reserve Bank analysis at the close of the last decade.

Here's where the related influences appear. The military bases spend around $40 million a year in local products and services, a boost for factories, wholesaling and retailing. Another influence—dependents of military people live around the area. Many retired officers settle down there, close to old friends and delighted with the balmy climate (about one measurable snow every three years and a steady breeze). Finally, young military men stay around when they leave the service.

**Stable Influence** The military influence is marked by stability, all bases being permanent peacetime installations. A disturbed world suggests possible expansion of these bases. Capsized, San Antonio now has roughly 100,000 people in its military facilities, with an income of a third of a billion dollars.

Another secondary factor: U. S. Services Automobile Assn. has its world headquarters in San Antonio, with a 1,600-employee payroll and a flow of money into local banks.

San Antonio has the elements for growth. Ample land for city spreading is available despite the big military bases. New freeways are being built with a $40-million project approved by the voters. South Texas is on the move. Livestock, vegetables and fruit are the backbone of food and packing plants. The large Latin populace is several generations removed from old Mexico and its income is increasing. It went from 25th to 17th in central city population in a decade. Five new industries came in 1960. A complex of federal offices is expected to expand. The Chamber of Commerce is headed this year by James M. Gaines, president-general manager of WOAI-TV.

**Mexico Prospering** About 150 miles away in Mexico there are growth signs. This is important to San Antonio as a shopping and distribution center. Mexico is developing a middle-class citizenry.

Friedrich refrigerator plant, major San Antonioindustry, employs 1,500. It began in 1883 and recently was acquired by Ling-Temco of Dallas. Tumpane Co., aeronautical plant, employs 250.

The old shrines are getting older. The Alamo inspired a movie whose premiere last fall brought a lot of publicity to the city. The physical facilities are becoming thoroughly modern, though a charming tree-decked waterway that once was a river winds through the downtown and some of the streets wander around in the spirit of a past century.

It adds up to a city of cultural contrasts and economic solidarity.

### WEST SETS RECORDS, EVEN FOR TEXAS

Five cities, on route 80, trying to outgrow each other

One of the boomingest of all Texas booms is remaking the map along Route 80 in the Permian Basin. Strung out 210 miles east of the Pecos, five new cities are trying to see which can grow the fastest. They are, from west to east, Odessa, Midland, Big Spring, Sweetwater and Abilene. Somewhat south lies San Angelo. West Texas is full of surprises, especially the unexpected group of skyscrapers that comes up on the route en route to Midland. The almost-twin cities of Odessa and Midland, circled by air, show vividly what's happening in the basin. At the present rate of growth they'll be physically tied to each other in another decade or so. (See El Paso, page 111.)

Oil and gas, new industries and military money are behind much of the boom. The basin, which actually reaches into nearby New Mexico, has over 81,000 oil and gas wells producing close to a tenth of the oil in the world—1.45 million barrels a day. Last year 5,318 wells were drilled. If the holes were laid end to end, they would reach from New York to Los Angeles and back again (taking a crow-flying course).

West Texas has huge chemical industries related to petroleum, mineral plants, gypsum and cement. Enough building is going on to keep some of the cement plants busy. The West Texas water problem is being solved as new lakes and dams are built, though they learned long ago how to live on slim water rations. With more water there will be more industry.

**Abilene-Sweetwater**

The city of Abilene doubled in population in the last decade, maintaining the West Texas pace. It grew from 45,570 to 90,368 (98.3%) from 1950 to 1960.
The mohair industry is becoming more important each year in Texas.

to 1960, enjoying the employment and money from 90 manufacturing plants, the oil industry, three colleges and two military units. Metropolitan Abilene has 120,377 people.

Dyess Air Force Base has a $2 million monthly payroll, housing two bomber wings and a transport wing. A $6 million Nike Hercules unit has a personnel complement of 315. New Atlas ICBM launching sites are on the way. The downtown is slated for a new look with building of an enclosed mall shopping center covering two blocks. Streets and utilities have been overhauled.

The colleges are Abilene Christian, 2,500 students; Hardin-Simmons U., 1,600, and McMurry College, 1,157.

Agriculture centers around livestock, cotton, grain sorghums and wool-mohair. Abilene is a financial and wholesaling center as well as a producer of food products, apparel, brick and tile and structural steel.

Sweetwater is the main city in Nolan County, 19,000 population. It has gypsum and cement plants and a packing income. Like Abilene it gets money from oil and transportation.

Big Spring

New and modern Big Spring bears little resemblance to the little county seat of Howard County in the pre-oil days. Opening of the Howard-Glasscock field in 1925 brought about the change. Cosden Petroleum Corp., now a subsidiary of W. R. Grace & Co., built a refinery in 1928 and it has a daily flow-through of 30,000 barrels. Cosden supplies jet fuel and gasoline by pipeline to local Webb Air Force Base ($14 million payroll) and Dyess Air Force Base at Abilene. Another line feeds into Midwest and Ohio Valley distribution systems. Besides custom fuels for other oil companies, Cosden is a big petrochemical producer, including $9 million a year of roofing-paving asphalt and a similar business in bases for fibres, rubber, plastics and drugs. Styrene alone runs 70 million pounds with new capacity.

Population is 31,230 in the city, a thumping 92% increase in the 1950-60 period. Dry farming includes cotton and grain sorghum. There’s a lot of ranching. Farm income in Howard county is around $9-10 million. Telephone connections jumped from 5,329 to 13,316 in a decade. Big Spring has over 50 manufacturing plants, including Cabot and Richard carbon black. Webb air base has been expanded.

San Angelo

San Angelo’s metropolitan population rose from 59,000 to 65,000 during the last decade but it’s getting ready for a larger gain in the ‘60s. A master municipal plan is in the works. The city, with its water supply being augmented by a $32 million dam, is promoting the processing of its own raw products. These include grain-feed crops, cattle and wool-mohair, the world’s largest wool market, it’s claimed. The gas supply is unlimited. A rail project in Mexico will tie San Angelo via the Santa Fe to new Chihuahua al Pacifico railroad trackage, providing an outlet to Topolobampo on the Pacific. Home building is up 41% over last year. There’s a spurt in nearby gas drilling.

Odessia

Odessia can’t be dealt with calmly. Not long ago it was a cattle-loading point on the Texas & Pacific RR, with an occasional stopover by Route 80 motorists in search of a service station. Now it brings into being some of the civic fantasies once portrayed by oiled Texans at Madison Avenue’s posh refreshment stalls. It’s really dizzier than most of their descriptions. The Odessa Athletic Club can send a New Yorker sinking home in shame, or better still down to the Golden Rooster for a calming potion or two, probably more.

The Chamber of Commerce is guilty of gross understatement in its slogan, “America’s New Industrial Frontier.” Ask any Odessian. It’s newer and greater than that. The city’s population jumped 208.1% in the 1950-60 decade—29,495 to 80,338. Another 10,000 live out in Ector County. Twenty-odd miles to the east is Midland.

Here are a few of the goodies that Odessa proclaims: largest oil supply center in the world; largest oil equipment show in the world, an honor shared every other year with Tulsa; slickest publicity gimmick—a 250-member Chuck Wagon Gang that travels the nation feeding up to 18,000 at a time (cost plus 10%) and spreading the fame of Odessa; fastest growing city in Texas; “Drilling Tech,” a twice-a-year,
a channel 12 community service presentation

As surely as "the air waves belong to our people"... KONO-TV devotes a prodigious portion of its time, talent and energies to conscientious community service. Our entire staff is public-service oriented, recognizing that we have the opportunity to continue building a safer, better educated, more enlightened San Antonio and South Texas. Besides carrying a large schedule of nationally created public service programs and local and national spots... we initiate numerous community service projects which are conceived and produced by our station... working closely with civic, cultural, military, religious and educational groups. Several programs are reproduced for us for airing on other stations. We are proud of this year's community service accomplishments... locally produced... as partially outlined on this page.

six-week course in oil drilling at Odessa Junior College, only such course in the world; a high school with three football fields; authentic recreation of Shakespeare's original theatre; $175 million, maybe more, petrochemical palace on one side of town, including a $70 million Rexam plant soon to open and a General Tire synthetic rubber plant that use ethylene and its chemical relatives from El Paso Natural Gas Products Co.; highest retail sales per family in the U. S.; big, beautiful buildings built by banks whose deposits multiplied 25 times in 15 years; very high boat concentration (Odessa driveways seem bare without one); population headed toward 250,000 in 1965 (this is both Odessa and Midland but it just could happen in this bursting economy).

Everything is spanning new and attractive, even the sewage plant where they recapture water for industrial use. The exhibition hall and oil equipment facilities are eye-openers.

That's the sort of impression Odessa makes on a visitor's first inspection. According to local lore, the second visit is apt to be permanent.

Midland

The control point for the vast Permian Basin oil fields is Midland. Some 650 oil companies and their satellites maintain offices in this rather new oasis along Route 80. The first question a stranger asks goes about like this, "How come all the big buildings?" The answer, of course, is that 650 oil companies do their Permian planning out of 72 Midland office buildings.

The city took the 1960 census figures in stride — figures that might have caused municipal apoplexy in the prosaic East. The central city had 9,352 people in 1940, went up to 21,731 in 1950 and then up 188.4% to 62,625 in 1960, almost triple in the last decade.

In Midland they like to talk about the handsome, efficient airport. Airlines schedule it as Midland-Odessa airport but this doesn't fool Midlanders who note it is part of their own city property and add that Odessans are welcome to share the conveniences. Like other Texans, they're great plane riders. The airport is said to park more planes per capita than any other U. S. Airport.

The office building binge started in the '20s, not much later the Permian Basin's riches were unlocked. Gulf Oil was first, eventually to be joined by 649 others. Midland ranks sixth in the state in office area (2 million sq. ft.).

Among other cities are Brownwood, 17,000, trade center for 10 counties and garment as well as meat processing center; Snyder, 13,850, ranch-farm center with refineries; Monahans, 8,600, petroleum center.
INDIENCES BUILT WICHITA FALLS

Oil production and service second largest in U. S.

The city of Wichita Falls was built by independent oil producers who prospered and drilled and then prospered and drilled some more wells. This process is still going on and Wichita County continues to be one of the largest producers.

Last year production in the 15-county district totaled 70 million barrels despite rationing cutbacks, with 1,584 producing oil fields of which 69 were opened in 1960. The oil production and service industry is second largest of any U. S. county, it’s pointed out. The large makers of drilling rigs and other drilling gear have plants in Wichita Falls, and the city claims more independent oil companies headquarter there than any other city. Two major refineries are operated.

Exploration Continues • Despite the concern over oil poration, the district is still one of the most active exploration areas in the world with an avera of 63 wells drilled per week—all this after 50 years of wildcasing. About 8,000 Wichita County residents work in the oil business and a few thousand sit around offices planning ways to make millions, or ways to spend them.

Many of the legends dealing with the spending sprees of Texas oil kings grew out of area wildcasing. Oil was discovered early in the century and Wichita Falls has been oil-dominated ever since that time. Natural gas came along later and the city built the first municipal gas supply. Oil booms in 1911, 1918 and 1937 high-spotted the wealth that gushed out of the ground.

Ranching gave way to oil as the big money-maker but agriculture still is important. Main crops from 135,000 acres — 40,000 irrigated — are wheat, beef cattle, cotton, dairy cattle, alfalfa and grain sorghum.

Wichita Falls and its surrounding counties comprise a growing trade area. City merchants get half their business from outside shoppers who come from a North Texas-South Oklahoma area with a half-million population. The metropolitan area of Wichita Falls rose 23.1% in the last decade, from 105,309 in 1950 to 291,638 in 1960. But the central city enjoyed just short of 50% expansion (40.5%), from 68,042 to 101,724, according to the U. S. Census. Fifty miles to the north Lawton, Okla., has a metropolitan population of 90,803, up 64.6% from 1950. Lawton’s central city population in 1960 was 61,697, up 77.5%.

Building Boom • There’s a housing boom in Wichita Falls. Last year 1,621 residential building permits were issued. Total permits amounted to $25,7 million. First National and Wichita National merged to form First-Wichita National Bank, described as “the largest and strongest financial institution between Fort Worth and Denver.” Midsummer deposits for all city banks totaled $182 million, up from $176 million a year ago. A projected 44 million regional shopping center would be planted right in the heart of downtown, replete with air-conditioned mall and the newest in diversified merchandising.

Sheppard Air Force Base has 17,000 personnel and is undergoing expansion. It’s a big missile training unit and has a strategic B-52 bomber wing. Wichita Falls includes 112 plants with $1 million payroll a month.

The spirit of the gushing era is maintained. “This is a good place to advertise,” one businessman explained. “The people have the daring Texas spirit, spending a high proportion of their income.”

The land that wildcatters built is more sedate these days but it’s riding along with the rest of Texas toward the balanced formula of oil, farming and finished goods.

WATER MAKES RIO GRANDE DELTA RICH

Industry adding millions to agricultural prosperity

The deep alluvial soils deposited around the Lower Rio Grande delta are richly fertile but need a water boost. Much of the irrigation is gravity flow because the delta fields are below river level.

This economy embraces four counties—Cameron, Hidalgo, Starr and Willacy. They have a combined population of 370,000, having risen from 321,000 in the last decade, and relish the term, “Fifth Largest City in Texas.” There are 250,000 more across the border.

Industry is coming to the valley. New plants appear in Harlingen, McAllen, Brownsville and Weslaco. Farming and ranching, however, remain the basic sources of income. International bridges cross into Mexico from Brownsville and south of McAllen. The Mexican border towns are growing and the living standards are improving. Tourism, aided by the border crossings and the charms of Padre Island, amounts to a $50 million business.

Among crops are 10 million boxes of citrus fruit a year. After the groves were frozen out a decade ago new and improved strains were planted. The red grapefruit, Valley growers boast, is the world’s best and sweetest. Ranching is big business and the shrimp catch is important.

Cotton is raised as are other crops such as vegetables. The valley’s worst problem is its end-of-the-line location far from markets, even Texas markets.

Brownsville industrial development is based on petroleum, alcohol, chemicals and food processing. The port ships out cotton. The shrimp catch is huge. Port Isabel is terminus for 10 barge lines that ply the Gulf coastal canal. Population is 48,040, an increase of 33.2% from 1950.

Harlingen, linked with a fast freeway to Brownsville, is a distribution center and ships cotton and grain crops via Port Harlingen. Fruit and vegetable canning is important, including a large cannery operated by the HEB food chain for its own supermarkets and private brands. A Fiesta Tourist is held in February, adding to the tourist income. Four international bridges are within an hour’s drive. Harlingen’s population is 41,205, a 77.4% increase in a decade, and is still rising.

San Benito has a population of 16,442. It has an extensive modernizing project under way, dressing up the civic facilities. Located on the new expressway, it is a market for cotton, fruits and produce and shares in the areas food-processing industry.

McAllen, “City of Palms,” has a population of 32,728, a gain of 60% for the decade. As a highway crossroads with access to Reynosa, in Mexico (60,000 people), it has garment plants, marketing facilities, food processing and oil-field machinery. Falcon Dam is 65 miles upstream.

Weslaco has a 15,649 population, doubling in the last decade. It has can and garment manufacturing, farm machinery, wholesaling, citrus marketing and food processing. Among other markets are Edinburg, Mission, Pharr, Mercedes and Elsa.

Cotton growers have learned how to beat the pests and have an $80 million income yearly. Mechanical pickers cut harvesting to a third the cost of hand-picking. If more water to supplement river and underground supplies is made available, farming should enjoy further growth. The valley has vast gas reserves. Texas Plastics is located at Elsa. Oil production is extensive but gas is the money-maker. A fine causeway has been built to Padre Island.

Up the Rio Grande Valley 200 miles is Laredo, international crossing to Nuevo Laredo, Mexico, and in the heart of ranching country. Irrigation promotes truck crops for the winter markets. Some cotton is raised. Across the border Nuevo Laredo has a population of 45,000. Laredo is a shipping point for vegetables, wool, mohair and cattle. The population (metropolitan) was 64,971 in 1960.

A rubber plantation in the heart of the Rio Grande valley.

TRIANGLE SYNONYMOUS WITH INDUSTRY

Thriving businesses completely cover the Sabine Triangle

A short drive southeast out of Beaumont passes Spindletop Monument, symbolizing the greatest gusher of them all. The monument’s legend winds up with this tribute to petroleum, “In a brief span of years it has altered man’s way of life throughout the world. Jan. 10, 1901 is a day that lives in history.” The lower Sabine and Neches river area has been oil-oriented ever since.

A catalog would be needed to list Sabine Triangle industries. But a two-paragraph look at some of the current expansion will give a rough idea of this spectacular region of tank farms and petroleum processors.

The current list of Beaumont industries just completed or under construction includes: Mobil Chemical, ethylene, $25 million; Goodyear Tire, synthetic rubber, $25 million; Houston Chemical, ethylene and others, $25 million; Mobil Chemical, benzene, to be world’s largest; Mobil Oil, coking unit using dregs from oil tanks; Foster Grant, polyethylene; Dupont, two plastic plants; Texas Gulf Sulphur, $1 million; Port of Beaumont, imminent start of $25 million expansion.

Now look out around the rest of the Sabine area. The story’s the same: Philips Petroleum, at Echo, carbon black, $4 million; Dupont, at Orange, continuous expansion; Allied Chemical, at Orange, $1.5 million expansion; Spencer Chemical, Orange, continuous expansion; Firestone Tire, at Orange, $7 million synthetic rubber plant; Gulf States Utilities, Bridge City, first phase of $150 million power plant; Gulf Oil, Port Arthur, lube and coking units; Koppers, Port Arthur, polyethylene plant expansion; Texaco, Port Arthur, $7.5 million research center; Atlantic Refining and Pure Oil, big plant to produce benzene toluene and xylene.

The three Sabine cities—Beaumont, Port Arthur and Orange—are sharing the high wages and industrial impact of this exceptional growth. Local building is active. The two main counties, Jefferson and Orange, have 306,000 people (1960 census) and are closely tied to Lake Charles, La., where there is a neighboring center of petrochemical and refining activity. Beaumont city population is 119,175, up 26.5% from 1950; Port Arthur has 66,676, up 15.9%; Orange has 25,605 compared to 21,174 in 1950.

Beaumont lies conveniently near the Gulf on the Neches River, about 40 miles inland and 25 miles west of the Sabine river, separating Texas and Louisiana. Port Arthur is on Sabine Lake, between Beaumont and the Gulf. Orange is smack on the Sabine River.

But everything in Beaumont turns on what its businessmen refer to as the industrial conception at Spindletop when 100,000 barrels of oil erupted every day. It’s quieter now, especially with eight-day proration of production, but the mad men who grew rich at Spindletop had no idea they were setting the base for one of the nation’s greatest industries.

Beaumont is running a little ahead of Port Arthur in its port tonnage. Shipped out are petroleum products and crude plus iron and steel scrap. Total Beaumont tonnage is around 26 million tons a year compared to 23 million tons for Port Arthur and a million for Orange. Port Arthur ships wheat, grain sorghum, petroleum products and gasoline, coke and crude. Orange ships grains, steel pipe, crude and alcohol.

Over 200 major industries are located in the Beaumont-Port Arthur metropolitan area with $165 million payroll and adding $310 million value. Orange is making important improvements to its port. A huge Toledo Bend dam to be built 100 miles upriver will help the area. It will be built by Texas and Louisiana at a cost of $65 million.

The entire Gulf Coast is an eyescatcher as its eastern anchor at the Sabine Triangle moves down past Galveston, Texas City, Freeport, Corpus Christi and then jumps to Brownsville. The story written today is obsolete in

104 (SPECIAL REPORT: THE TEXAS MARKET)

BROADCASTING, AUGUST 21, 1961
a year. For those in search of growth points of the future, the Gulf Coast offers evidence of a great potential.

Galveston-Texas City reflect prosperity

The two main cities in Galveston County—Galveston and Texas City—live partly under the spreading Houston umbrella but are distinct commercial and industrial units. The U. S. Census Bureau combines them as one metropolis having a population of 140,364 in 1960, up 24.1% from the 113,066 in 1950. Most of the growth has occurred in the Texas City portion of the market, its 32,065 being almost double (92.9%) that in 1950. Galveston has 67,175 people compared to 66,568 in 1950. Population outside the cities has grown 37.6% since 1950.

Money-makers in these water-sided areas include manufacturing and processing plants, ship repair, commercial fishing, aircraft and food products. Agriculture is based on rice, grain sorghums, beef cattle, dairying, truck crops and poultry.

Galveston's port handles 6.7 tons of cargo, mainly sulphur, grain, cotton and sugar. Texas City's port has traffic of 13.6 million tons. It has a connection with the Galveston channel. Petroleum products and sulphur are the main cargoes. The city has tripled in size since the famed 1947 explosion took 560 lives and injured 4,000 others, with $32 million property damage.

A national experiment in saline water conversion is in operation at Freeport. The plant uses the long-tube vertical multiple distillation process.
Close to half of all Texas cotton—20% of the U. S. supply—is grown and processed in the area.

**Big Money Makers** • These basic ways of making a living in Texas have been developed into big money makers through automation and large-scale scientific agriculture.

Two of the most interesting zoos in the U. S. are found in Lubbock. The first is Prairie Dog Town in MacKenzie Park, where the little burrowing animals cavort for curious watchers. The second is the beef factory located on a 125-acre tract on the southwestern edge of Lubbock and known over the Southwest as Lewter's Feed Lots (see Agriculture, page 80).

The lots operate with large storage bins, electrical mixers and chuck-wagons of fodder for hungry Herefords and Black Angus cattle. Up to 30,000 are fed at a meal, which is a precision diet of cotton leftovers, antibiotics, minerals and milo.

After 120 days, in which the cattle jump from 500 or so pounds to 1,100, they are given a guided tour to the Supreme Beef Co. slaughter house next door or sent elsewhere for processing. This modern routine is an important step in the development of Lubbock's processing industries.

**Cotton Big Crop** • The story of Lubbock cotton deals with big statistics. Known as the world's most productive cotton area, it has the third largest inland cotton market in the world servicing 40-million productive acres in 36 counties. And the processing is a major business, from ginning to the world's largest cottonseed oil pressing center. Cotton is a $300 million crop—1.8 million bales in a good year. The area produces a third of the U. S. grain sorghum crop, worth around $100 million.

Lubbock has oil and gas, conforming to the Texas tradition. It has 300 manufacturing plants and 350 wholesale firms. The wholesale trading area has 54,300 producing oil wells; 66 gasoline, 25 petrochemical and four carbon black plants, and a heaven-sent underlayer of water supplying 50,000 wells that irrigate 4.6 million rich acres. A tenth of city employees are in manufacturing. T.I.M.E. Inc., $20-million-a-year trucking firm, operates from Los Angeles to Ohio.

This plains city is new and attractive. Its municipal housekeeping is good despite meteoric growth. Population rose from 101,048 in 1950 to 156,271 in 1960 (U.S. Census, metropolitan area). The central city at present growth figures to reach 200,000 by 1965 and 235,000 by 1970. The cultural facilities include Texas Tech U. Grain storage is the greatest between Fort Worth and the West Coast. The dry air is fine for

**CITY OF COWS, COTTON AND INDUSTRY**

Lubbock is one of the fastest-growing of all Texas markets

Out on the South Plains a little community that was measured in 1940 by its 7,653 telephones must now be evaluated by the 65,000 connections in its phone book. In two decades Lubbock has risen from a small town to one of the fastest developing markets in Texas, a state of market miracles. The population and income rise is astounding.

Lubbock has parlayed the original Texas formula of cows and cotton into major industries. Over 200,000 cattle are sold at auction in a year, many to be fattened for slaughter in Lubbock.
all kinds of warehousing. All's well on the 3,000-ft. Caprock. all they ask is plenty of water, cotton, cattle, oil and gas. Bank deposits are a record $212.6 million, up maybe 4000% in a quarter-century.

CORPUS CHRISTI'S FUTURE BRIGHT

Industry and tourism combine to give city solid economy

Corpus Christi combines the most handsome face and the largest collection of functional muscles along the 500 miles of Gulf Coast between Louisiana and Mexico. The combined oil, gas, petrochemical, aluminum, port and service facilities comprise an expanding market that blends the majesty of Nature in the raw with man at his industrial pinnacle.

The city is genuinely attractive along the edge of the Gulf. A stepped sea wall, marinas and the new sky-high Harbor Bridge make life pleasant for the natives as well as a million tourists from afar who spend $20 million a year enjoying the charms of the Coastal Bend and unspoiled Padre Island, 118 miles of sand dunes and, it's hinted, buried treasure. This strip, 1½ miles at the widest, runs all the way to the Mexican border. A bill in Congress would set aside a big segment for a national shrine.

Economic Well Being - This is fine for cozy living. But what sets off Corpus Christi from other Texas cities is the special combination of economic elements that supports a populace of 221,973 (metropolitan area, U. S. Census 1960, 165,471 in 1950).

The largest class of industry is related to oil and gas, including such majors as Celanese, Great Southern Chemical, Houston Natural Gas, Sinclair, Southwestern Oil, Humble, United Carbon, Sunray and Delhi-Taylor. These fan out as far as Bishop, a half-hour drive outside the city.

Backinging up this petrochemical structure are Reynolds Aluminum with a major plant; Corn Products, starch-
sugar and related items, for example. The soil is rich, turning out 100,000 bales of cotton (up to three an acre), worth maybe $40 million, a $28 million sorghum crop and other crops that swell the local income.

The 86-store HEB supermarket chain is headquartered in Corpus Christi. Charles C. Butt, one of the two sons of H. E. Butt, the founder, is a vice president still in the early 20s. The food industry is one of the largest in the area, he said, with vast room for development. HEB stores average a million dollars or more annually. The chain operates the largest pineapple cannery in the U. S. near the border (Harlingen Cannery Co.) processing Mexican pineapples and selling private brands to food chains all over the U. S. Mr. Butt stressed the importance of the population shift to the Southwest. He said commerce with Mexico and South America must be developed if Texas is to attain full growth.

There's talk of a $25-million missile plant on King Ranch and a launching pad on Padre Island.

Historic Victoria, 33,000, is 90 miles north. It's a major cattle center and has big industries, especially chemicals. A barge canal is underway, giving Victoria access to the Gulf Coast.

AMARILLO IS WORLD'S HELIUM CENTER
Agriculture, petrochemicals, oil all build the area

Up on the High Plains of the Texas Panhandle the city of Amarillo has a monopoly on the coldest stuff in the world. Only Nature knows why the gas beneath the Panhandle is polluted with an inert, non-burning chemical, helium, that has to be extracted.

This adulterant, however, promises to be one of the important elements of the missile age. Liquid helium can be brought near absolute zero, 400 degrees below the freezing point of water.

Economically, helium is hot right now. It's extracted for government use, and there are Interior Dept. plans for a dozen new plants within the next five years at a cost of $225 million. It's used in missiles, airships, aeronautical research, arc-welding shields, and atomic energy.

Used in Rockets • Helium acts as a sort of supplemental structure for liquid-fueled rockets. As the propellant and liquid oxygen are consumed in the engine, helium under high pressure expands to take their place, thus strengthening the flimsy stainless steel shell.

Amarillo is trade center over an extensive area having a 1,500-mile perimeter. It's three tv stations get as far as Liberal, Kan., 135 miles to the north, and Tucumcari, N. M., 100 miles to the west, bolstered by community antenna systems and translators that reach an estimated 27,000 homes.

A look at auto license tags at the $4-million Sunset shopping center shows numerous tags from New Mexico, Oklahoma and Kansas. A 100-mile shopping tour is routine stuff on those fast, level Texas roads.

Amarillo was delighted when the 1960 census confirmed its population claims—a gain of 71.6% from 87,140 in 1950 to 149,943 in 1960. The 137, 969 central city population was up

Sunset Center (foreground) and Wolf-lin Village are big regional shopping centers which have developed in West Amarillo during the last few years.
Prepared by U. of Texas Bureau of Business Research

85.8\% in the decade. Amarillo is drawing regional offices of national firms now that it is well over the 100,000 mark.

Agricultural Center • Agriculture contributes $665 million to the Panhandle's main market. Cotton, sorghum, wheat, cattle and other livestock, and truck crops are main income producers. Amarillo Livestock Auction Co. moves many animals a day, with local feedlots preparing them for slaughter. Both irrigation and dry farming are practiced. Producers Grain Corp., a co-op, is called the world's largest storage facility.

The local Air Force base employs 11,000 military and has a $15-million annual payroll. It's getting a $35-million construction project. Total deposits in Amarillo banks are $202 million.

The Amarillo pocketbook is blessed with $550 million area income from oil and gas, not including helium, synthetic rubber and some other items. Oil is about holding its own; gas is going good. Petrochemical plans include Celanese, at Pampa, 50 miles away. It turns out the ingredients for aspirin, waterbased paint and hundreds of other products. The Phillips Petroleum plant, in the same direction, is described as one of the world's largest. A $95-million Canadian River dam and aqueduct system is slated to get under way next year. It will provide a 30-mile lake for recreational use.

Amarillo, like Brooklyn, is plagued by gags. They center around its weather, which the local folks profess to love because they get five months of outdoor living, year-round breeze, cool summer nights, low humidity and little snow. "Of course we have some dust storms and there are some cold, snowy days in winter," one resident said. He added, "But we have sunshine 320 days a year, don't need air-conditioning and sleep comfortably."
THE BIG MONEY IN CENTRAL TEXAS

Austin, Waco dominate this thriving trade area

Centuries before the northbound cattle trails were first stomped on the rolling prairie by cattle droves, the site of Waco was a crossing point for aborigines and later the Indians and Spanish. It nestles in a curve of the Brazos River.

Before Chisholm Trail days another river crossing was picked by a president of the early Republic of Texas as a central site for a state capital. Austin is below the "Stairs of Lakes," on the Colorado, a 150-mile chain of lakes and dams.

These two cities are dominant trade areas for central Texas. Austin’s metropolitan area comprises 212,136 people. The central city has 186,545, representing a 40.8% gain in a decade. Waco’s metropolitan populace totals 150,091, with 97,808 in the central city, 15.5% above 1950. In between is Temple, a city of 30,419 and main city in Bell County (94,000). Killeen has a population of 23,377.

The state government brings in big money and provides work for Austin. Total economic push from all this can’t be figured, but latest bank data show an 11% increase in deposits since mid-1960 ($285 million). U. of Texas, approaching the 20,000-student mark, draws student money from all over the world and a comfortable quota from football fans who come to watch the Longhorns.

Two civic eyesores are due for cures. A new expressway highway has been scooped right through the downtown area. When it’s done the heavy north-south traffic will highball through without a stop — and without a look at the Capitol or other Austin attractions. The other project is an eventual five-mile scenic pond where the Colorado winds through on its way to the Gulf.

Austin has a new $3 million auditorium. Total income in a 20-county trade area is placed at $380 million. Bergstrom Air Force Base is a strategic unit with 5,500 personnel. Vice President Lyndon Johnson’s LBJ ranch is located 70 miles to the west of Austin on the road to Fredericksburg.

Military Spending Power • Waco has important military aspects. Twelfth Air Force Command Headquarters, often called the "Little Pentagon," has a $2½ million payroll. James Connolly Air Force Base, with 6,000 personnel, has an $18 million payroll. Fort Hood, 46 miles to the southwest, has 25,000 personnel and a $55 million payroll. Rocketdyne at McGregor is a solid rocket fuel installation with 500 employees and $5 million payroll.

While the 11th largest city in Texas, Waco has 254 factories and contends it thus is the sixth industrial city. Finished goods include textiles, millwork, work clothing, glass containers, tires, denim, medicines and foods. General Tire employs 1,800 — "The Akron of Texas." Owens Illinois employs 800.

Farming is mainly cotton, corn, fruit and cotton. They bring in $14.5 million a year.

Cultural facilities include Baylor U., oldest institution of higher learning in Texas and, of course, a contributor to the area’s financial well-being.

South of Waco is Temple, a manufacturing center that turns out insulation, cottonseed oil, shoes, plastics and furniture. Killeen, site of Fort Hood, tripled its population to 23,377 in the last decade. It’s a farming center. Bell County has around 100,000 population.

Dallas is becoming production center

Big D (for Dallas) is starting to catch national attention as a production center for radio and television.

This southwestern center has facilities to turn out everything from a radio jingle — and there are no jingles for Dallas jingles — to television commercials, industrial films and productions.

Dallas has natural advantages. It’s accessible — three hours from New York and Hollywood, two to Chicago; production costs are low; the market of more than a million has a fine talent pool and a supply of trained technical personnel; well-equipped studios with all the necessary facilities. On top of these, there is freedom from the feather-bedding that runs up costs to fantastic figures. (See Dallas review page 82).

Jingle Capital • Dallas is practically the world’s capital for radio jingles. The three principal firms are Futuronic Productions, Commercial Recording Corp. and Pams Productions. These three are said to do 75% of the nation’s customized station breaks. It’s a flourishing business.

“Listeners look forward to these customized station breaks,” said Jack Alexander, of Futuronic. Merchandising aids include direct mail, trade advertising, album covers and contest promotions.

Commercial’s output includes complete stereo albums for major record firms and it has scored theatrical films, said Dick Morrison, sales vice president. The firm is headed by John J. Coyle, oil-gas operator, part owner of KVIL.

Broadcasting, August 21, 1961
Dallas. It has just named Richard H. Ullman Inc. as sales representative.

At the McLendon station, KLIF, radio trailers are produced for theatrical motion pictures. Gordon McLendon, head of the operation, has produced three movies of his own. WBAP, WFAA and other Dallas-Fort Worth stations have production facilities, including TV at the first two.

Seventeen motion picture-tv film producers are listed in the Dallas telephone directory. Principals are Keitz & Herndon, Jamieson Film Co. and the new facilities of WFAA-TV.

Mike Shapiro, general manager, said WFAA-TV has two Ampex tv tape units in its main half-a-block-long mobile unit, one of two mobile studios operated by WFAA Productions. Richard Gray, former New York agency official, heads the operation, joining in July. WFAA has fed networks everything from a Dinah Shore pickup in San Antonio to football games, reaching out to 500 miles. It has vast studio facilities, nine Marconi cameras and a total of five video tape units. "Dallas will become a major production center," he predicted.

Keitz & Herndon does a lot of commercials, industrials, animation and other custom work. Clients include Humble Oil, new one-minute series, along with Fritos, Dr. Pepper, General Mills and others.

Jamieson has national and regional business. It has been operating a quarter-century. Jax, Regal and Pabst beer, Phillips 66, Johnson's wax and others have been clients.

EL PASO GETTING ITS FACE LIFTED

Agriculture, defense, industry combine to speed growth

Old El Paso, historic pass to the North and South, is getting a municipal face-lifting as part of its transformation into an important market—the fifth largest metropolis in Texas.

The usual market-rating formulas simply don't apply to this sunny center of agriculture, defense weaponry, industry and cosmopolitan population.

In the first place, the city of El Paso has risen from 75th to 46th in U. S. ranking and marketers are slow catching up with this statistical feat. The metropolitan area now totals 314,070 population, a gain of 119,102 or 61.1% since 1950. Yet the central city, with 276,687, rose 112% in the decade as its boundaries spread.

Population Deceptive • But to rate El Paso at 314,070 people is to ignore (1) a good share of the 30,000 military people who live in the area and (2) 300,000 Mexicans who live across the Rio Grande in old Mexico—more than 625,000 people within 20 miles of downtown or within an hour's drive.

Radio and tv executives say they have trouble convincing eastern buyers that El Paso truly is close to the top 30 U. S. markets in size. They have trouble, too, in putting over a practical point—the Juarez audience of wetback and peon history is moving into higher living standards and tuning to El Paso broadcast programs.

A Saturday night ride on the international trolley from El Paso to Juarez showed 39 Mexicans carrying large shopping bags full of American brand goods bought in El Paso chain stores. That was almost everybody in the trolley. The goods were checked during the Mexican customs inspection.

And a 1960 Juarez survey conducted by Western Union interviewers (449 calls) showed three out of four families shop in El Paso, averaging 2.3 trips a week: 192 families speaking English, 80 some English and 40 no English. Over 30 million people cross the bridge into El Paso every year.

Agriculture brings in $250 million a

SEVEN ARTS — FILMS OF THE 1950's

Each Monday and Friday evening at 9:00 pm, KTVT presents an outstanding first-run motion picture of the 1950's.

And every Tuesday, Wednesday and Thursday at the same time, KTVT continues the pattern of first-run movies with the presentation of the "Paramount Premieres"
Heavy buying power for Latins, Negroes

Texans know—and they wish Madison Avenue did, too—that two minority groups are exerting a profound influence on the way business is done in the state.

Quick, firm conclusions about the buying and living habits of the Latin (Spanish) and Negro can lead the market analyst astray. The most important lesson learned from a look all over the state is this:

* Don't underestimate the way these groups live and spend. Their financial status is improving fast.

The Latin population is being absorbed into the American way of life, generation by generation. But Latins are devoted to family ties, traditions and some of the habits of Mexican life.

Official U. S. Census figures for 1960 show that 131,000 or over 19% of the city of Dallas population, 680,000, is non-white. According to Dr. J. W. Bass, city health director, the Negro birth rate has increased 45% while the Dallas rate rose 1% from 1955 to 1960.

Taking the Dallas and Fort Worth metropolitan areas, the two markets show the importance of the Negro

---

A part of the huge El Paso Natural Gas Products Odessa plant.

year from irrigated fields, including fantastic yields-per-acre of fine pima cotton ($100 million crop) and cattle ($150 million).

Then there is the defense economy. Fort Bliss, Biggs, White Sands and Holloman have around $200 million in payrolls, much of the money finding its way to El Paso as the largest city within 600 miles. These centers of jet aeronautics and modern rocketry are expanding. Located atop high Franklin mountain, El Paso TV signals reach beyond the 100-mile mark in most directions and even farther with the help of community antennas and boosting devices. Franklin mountain is a tourist haven with trams and roads giving access to impressive views.

Many Factories • El Paso's income sources include 345 manufacturing plants, 16 of them in garment-making: Phelps-Dodge refines 28% of all U. S. copper; El Paso Smelting Works is the world's largest custom smelter. The garment plants employ 5,000, Phelps-Dodge 800 and the smelting works 950.

El Paso Natural Gas Co., second largest in the world, delivers gas to 10 states and it has a gigantic petrochemical plant at Odessa (see Odessa, page 96). Operating revenues rose from $41.3 million in 1950 to $179.4 million in 1955 and $504.6 million in 1960.

These are a few of the reasons El Paso must be inspected to be understood. This centuries-old market is a center of jet progress and a proving ground for missiles of the future, fortified by balmy climate; a tremendous underground water supply; jet, piston, rail and highway transport; thousands of tourists; a large university, Texas Western, and a cosmopolitan populace whose lower level is moving into the middle class.

---

Quick Fact Sheet

390,000 NEGROS IN DALLAS - FORT WORTH TRADE TERRITORY

★ 19% of population
★ KNOK only exclusive Negro programming station listed in both market surveys.
★ KNOK, a North Texas Negro institution is a must to insure complete market penetration and brand dominance.
★ Studios and programming, both Dallas and Fort Worth. One contract covers both markets.

audience to business. The ratio of Negroes in the two central cities runs higher than that of the combined metropolitan areas.

The 1960 census does not list the Latin population separately because the diffusion of Caucasian blood simply could not be tracked to show a scientific breakdown.

Marketers familiar with Texas minorities find special programming on radio-tv helpful in some areas. How effective requires case studies. Media directed specially at the Latin market, for example, claim substantial audiences are missed by normal American commercial approaches. They get an argument from those who practice average broadcasting programming, their position being that only small groups are influenced by special Latin commercials and programs.

In San Antonio and El Paso, the Latin specialists contend a large share of Mexican-Americans can talk English but they actually think in Spanish. There's very little Spanish taught in Texas public schools and all pupils get their schooling in English.

A million or more Mexicans south of the border are described as devotees of American broadcasts and regular shoppers in El Paso, San Antonio, Laredo, Brownsville and other easily reached Texas cities. One San Antonio survey reports the most frequent names are Martinez, Gonzalez, Gardia, Hernandez, Rodriguez, etc., with Smith 18th, Johnson 22d and Jones 31st numerically. A Juarez survey showed only a small minority of Juarez residents spoke no English.

Older Latin families have higher incomes than generally believed because the children turn their wages into the family till until they marry, and then often live with the old folks. They own cars, washing machines, mechanical refrigerators and 75% own their own homes. They buy American-type merchandise, and they also stick to many of the Latin customs. Sellers of food cater to their special preferences.

Negro incomes are rising spectacularly in such areas as Dallas-Fort Worth, Houston, Beaumont and north through East Texas, and the Gulf Coast. They're loyal radio and tv fans. Broadcasters specializing in this market claim their influence is profound and they offer evidence to support it. Here again there is media contention, with stations having programs directed to the entire audience emphasizing their impact on Negroes as living levels continue to mount. In any case, the Negro buyer is buying expensive items and living better as the years pass, at the same time retaining racial unity and developing higher educational standards.
WHY BUY OLD-FASHIONED RADIO TO SELL THE CONTEMPORARY ADULT?

One-third of Dallas' Contemporary Adults (the young buying group) prefer KVIL* and here's why:

- 15 minute segments of music between commercials
- No distracting station contests
- Sophisticated music (sans Rock'n'Roll) for the contemporary adult

* According to an accredited independent survey conducted among the young married families with good credit and above average income. A copy of the survey will be forwarded upon request.

BROADCASTING, AUGUST 21, 1961
The upsurge in children's programs

ALL THREE NETWORKS PLAN SPECIAL NEWS SHOWS FOR YOUNGSTERS

Better children's programming for tv, like prosperity in the 30's, is just around the corner. Evidence of it probably will be seen in the coming fall season. NBC-TV has slated at least four new informational-entertainment programs of special interest to young people, ABC-TV has scheduled a daily new program especially treated for a juvenile audience, and CBS-TV, while solidifying its current "cultural" children's programs, also is planning a new program for adolescent viewers. On a local level too, several stations are injecting new and imaginative life in a program area that habitually abounds in cartoons and clowns.

While this scattering of "good" shows does not constitute overwhelming evidence that better programming days for youngsters is here to stay, it is an indication that programming minds and steps are being channeled in that direction. The chances are, according to a Broadcasting canvass of network programming executives, that the corner to better children's programming will be turned in time for the 1962-63 season. By that season the all fun and no thinking complexion of the children's area, will have changed into a more balanced concept.

The movement to upgrade young people's programming is apparently a direct effect of FCC Chairman Newton N. Minow's well-publicized "vast wasteland" address to the NAB Convention last May. In that speech, Mr. Minow told his audience that most children "spend as much time watching television as they do in the schoolroom," and concluded that "if parents, teachers, and ministers conducted their responsibilities by following the ratings, children would have a steady diet of ice cream, school holidays, and a Sunday School." He then asked his listeners: "What about your responsibilities? Is there no room on television to teach, to inform, to uplift, to stretch, to enlarge the capacities of our children?"

All the network programming executives canvassed by Broadcasting answered Mr. Minow's rhetorical questions in the affirmative, but most of them deny that the speech turned their vocal acquisitiveness into action. They say that the programs were on drawing boards months before Mr. Minow made his public appeal. But a minority of the executives concede that "good" programs have been on drawing boards before, and that Mr. Minow's admonishing speech gave birth to more children's programs of merit than tv has seen in all its previous days.

NBC The Leader - NBC-TV is the network leader of the children's programming, and its showcase program on the fall schedule is 1, 2, 3,—Go! (Sun., 6:30-7 p.m.). The new children's series, which debuts Oct. 8, is a public affairs presentation of the network's news department under the supervision of executive producer Irving Gitlin. It will star tv performer Jack Lescoule, fresh from a nine-year stint with NBC's Today show. Mr. Lescoule will act as a kind of "Dutch Uncle" guiding 10-year-old Richard Thomas in exploring interesting places and situations around the world and universe.

Mort Werner, NBC-TV's new vice president in charge of programming, says the series "is a blend of fantasy and reality seen through the eyes of a young boy," and predicts that it will gain the attention of a large family audience.

Update (Sat., noon-12:30 p.m.), a news program conducted by correspondent Bob Abernethy for the junior high school and high school age group, is another weighty item in NBC's fall effort to uplift the juvenile mind. Mr. Werner says the program is "a venture into a needed area," and explains that it will "give explanation to what the front pages of newspapers mean." A feature of the program will be the enlistment of journalism students in interviewing top level government personalities.

With International Showtime (Fri., 7:30-8:30 p.m.), NBC is making a conscious effort to capture both child and adult audiences. The weekly series, to be emceed by Don Ameche, will focus on great European circuses and magic shows. NBC currently has camera crews travelling around Europe taping the shows as they are presented before live audiences for future showing on the tv program.

Walt Disney's Wonderful World of Color (Sun., 7:30-8:30 p.m.) is a new children's programming concept, ac-

Ludwig Von Drake
New character on NBC-TV's Walt Disney hour
cording to NBC, because for the first time on TV the chief exponent of cartoons will concentrate on real-life adventures in nature and science.

NBC-TV officials also single out three other network shows—Pip the Piper (Sat., 9:30-10 a.m.), Bullwinkle (Sun. 7-7:30 p.m.), and Burr Tillstrom's Kukla and Ollie (Mon.-Fri., 5-5:05 p.m.)—as further examples of how it is upgrading young people's programming.

Pip the Piper is a live show telecast in color which started on July 17. It has set out to combine imaginative production techniques with a fantasy theme, and features original music especially created for the show.

Bullwinkle, which begins Sept. 24, is the middle link in NBC's Sunday chain of children's programs which includes 1,2,3,—Go! and the Walt Disney program on either end. The network claims that the animated cartoon series in color will offer "sophisticated humor and satire" for the younger set, as well as adults.

Kukla and Ollie is the return to TV, on a five day a week, five-minute basis, of Burr Tillstrom's humorous and talented puppets.

ABC Plans • ABC-TV also had ambitious children's programming plans for the coming season, but they took a serious setback earlier this month when the network cancelled its previously announced Discovery program (Broadcasting, Aug. 14). The show was to be a Mon.-Fri., 30-minute informational program for children. Reportedly the show was cancelled because only 72 of the network's 116 primary affiliates cleared time for it. James C. Hagerty, ABC-TV news special events vice president said, however, that beginning Oct. 2 the network will present a ten-minute daily newscast tentatively titled American Newstand, aimed at a young audience (Mon.-Fri., 4:50-5 p.m.). The news program plans to explore the facts behind the news reports in an effort to bring greater comprehension of the world situation to an audience of from 8 to 18. The news program is scheduled as a break in Dick Clark's 4 to 5:30 p.m. American Bandstand.

CBS-TV is playing a fairly pat hand in the children's programming area next season. A company representative claims that the network has been doing a "good job" in the juvenile area and needs no great need to improve the situation at this time. He points out that Leonard Bernstein's Young People's Concerts will return for another season of four one-hour programs, and that Captain Kangaroo, an award-winning show of "gentle" adventures, knowledge and entertainment for children, has been expanded 15 minutes daily from a 45-minute to a 60-minute program (Mon.-Fri., 8-9 a.m.). The show also is televised on Saturdays from 9:30-10:30 a.m.

News Show in Works • CBS News, however, is planning a TV program in the children's news area. A spokesman for the network's news department said that a "great deal of money and time has been spent in exploring the situation." He explains that the network "is not satisfied" as to how a news program for a young audience should be presented. CBS News officials have talked to child psychologists at Yale U. and have been told that children below the sixth grade have no awareness of news, and that it is extremely difficult to reach them. They also have been informed that it's virtually impossible to reach an audience that spans more than a two year difference in ages. Since it isn't feasible for CBS to broadcast separate news programs for the 12 to 14, 14 to 16, 16 to 18 age groups, etc., the network is trying to work out a suitable format that will encompass a wide audience of young people. The network spokesman said that the debut of the news program in the fall is a possibility, but implied that a 1962 premiere is more realistic.

On a local level WCBS-TV New York is contemplating a daily news program for young people which would be conducted by Bob Keeshan, who is the creator and star of Captain Kangaroo. The program is still very much in the negotiating stage and must be counted as "iffy" for the fall.

Another local station, WAST (TV) Albany, N.Y., will present a series of cultural programs that should appeal to both child and adult audiences. Included among them are Dorothy in the Land of Oz, a ballet version of "The Wizard of Oz," and Sleeping Beauty.

Advertisers Cautious • Advertiser reaction to the new children's programs has been cautious. The programs that would seem to appeal more to an exclusively children's audience have had more difficulty selling than those shows which attract the entire family.

NBC-TV's Update is half sold to Helena Rubinstein, 1,2,3,—Go! is still unsold at this time for the fall season but has acquired a sponsor to pick up part of the program in January, while Walt Disney's Wonderful World of Color is sold out to RCA and Eastman Kodak.

Among other NBC-TV children's shows, Pip the Piper is half sold to General Mills; International Show Time is SRO to Bulova Watches, Sandura (Sandran), American Motors, Beech-Nut Life Savers, and to Warner Lambert, with some time still available; Bullwinkle is a sellout to Ideal Toys and

Captain Kangaroo and Easter Bunny
He gets 15 minutes more each day on CBS-TV
General Mills; and Miles Labs has brought all of *Kukla and Ollie*.

Indications are that ABC-TV's still untitled news program for young people will be sponsored, while CBS-TV's *Young People's Concerts* has been sold to Shell Oil for institutional advertising, and *Captain Kangaroo*, formerly a perennial money-loser, is a near sell-out to such advertisers as Kellogg's, Continental Baking, and Gerber products.

**Taft stations lease Britannica film series**

The Taft Broadcasting Co. has leased the library of over 700 Encyclopaedia Britannica films from Trans-Lux Television Corp., New York, it was announced last week.

The films will be telecast on the Taft stations starting Sept. 1. During the course of the five-year contract, an additional 200 films are expected to be added to the group. Taft television outlets are WKRC-TV Cincinnati and WTVN-TV Columbus, both Ohio; WBRC-TV Birmingham, Ala., and WKYT (TV) Lexington, Ky.

**Film sales...**

*Shannon* (Screen Gems): Sold to Genese Brewing Co. of Rochester for Buffalo, Rochester, Schenectady and Syracuse, N. Y.; Altoona-Johnstown market and Erie, Pa. Also sold to WAVE-TV Louisville Ky.; WABC-TV New York; WTIV (TV) Tampa; WLOF-TV Orlando; WMJ-TV Milwaukee; WILX-TV Jackson-Lansing, Mich., and WAPI-TV Birmingham. Ala. Now sold in 87 markets.

*Everglades* (Ziv-UA): Sold to WTVN (TV) Columbus, Ohio; WLWT (TV) Cincinnati; WVEC-TV Norfolk; WAGA-TV Atlanta; WDSU-TV New Orleans; KLLZ-TV Denver; WTIV (TV) Tampa; KELP-TV El Paso; KTVM (TV) Phoenix; KREM-TV Spokane; KGTV-TV Portland; KGUN-TV Tucson; WTKR-TV Mobile; WHIO-TV Dayton; WLOS-TV Asheville; WRBL-TV Columbus, Ga.; WDBO-TV Orlando; WCTV (TV) Tallahassee; WLBX (TV) Jackson, Miss.; KVOA-TV Bellingham, Wash.; KEZI-TV Eugene, Ore., KJEO (TV) Fresno, and KOOK-TV Billings, Mont. Now in 23 markets.

Films of the 50's Vol. I (Seven Arts Associated): Sold to WBIR-TV Knoxville, Tenn., and KBOI-TV Boise, Idaho. Now sold in 103 markets.

*Dick Powell's Zane Grey Theater; Captain of Detectives; The Tom Ewell Show and The Law and Mr. Jones* (Four Star Films): Total of 156 segments sold to Procter & Gamble to be televised in Canada.

*Stagecoach West* (Four Star Films): Sold to be shown in the Japanese market.

*Peter Gunn* (Official Films): Sold to KYW-TV Cleveland; WJBK-TV-Detroit; KMSP-TV Minneapolis; WTTV (TV) Indianapolis; WAGA-TV Atlanta; WDSU-TV New Orleans; WTVJ (TV) Miami; WTTG (TV) Washington; WDEF-TV Chattanooga; WNEP-TV Scranton and WBNS-TV Columbus. Now in 31 markets.

*My Three Sons* and *M-Squad* (MCA TV): Sold to Mexico for fall season. Other hour shows sold to Mexico consist of *Wagon Train*, *Thriller*, *Checkmate*, *Riverboat*, and *Suspicion*; half hour shows are: *Alfred Hitchcock Presents*, *Markham*, and *Staccato*.

*Whiplash* (Independent Television Corp.): Sold to WFTM-TV Indianapolis; WNHC-TV New Haven; WBIR-TV Knoxville; WHAS-TV Louisville; KOOK-TV Billings, Mont., and KXL-F- TV Butte. Now sold in 73 markets.

**Johnstone forms pr firm**

G. W. (Johnny) Johnstone, for the past 16 years director of radio and television for the National Assn. of Mfrs., has established his own public relations firm, G. Wilfred Johnstone & Assoc., Sea Bright, N. J. Its services will be available to the NAM on a consulting basis.

While with NAM, Mr. Johnstone created and produced *Industry On Parade*, a weekly tv program on about 270 tv stations for the past 12 years.

**RKO imports 34 films**

RKO General is marketing 34 foreign films for television in the U. S. through the sales offices of Ideal Pictures, Chicago. The movies—from France, Britain, Italy, Mexico and Japan —were selected from over 500 foreign pictures.

The offerings, labeled as the International Film Festival for Television, have been dubbed with English sound tracks. Most of the films have won many awards and range in release dates from 1949 to 1961.
Ziv-UA sets opera pilot

Ziv-United Artists, New York, has signed maestro Anthony Amato, founder and head of the Amato Opera Theatre, to produce a pilot film for a projected series of one-hour renditions of famous operas.

According to Ziv-UA, the enterprise represents the first known active step ever taken by a production firm to present a regularly scheduled, full-length season of tv opera.

Program notes...

Public-affairs drama • Warner Bros. Studios has agreed to produce as a public service, a half-hour tv drama, The Misery Merchants for the Arthritis & Rheumatism Foundation. The screenplay, from the original story of William K. Wells, will be produced by Cedric Francis and William L. Stuart. Filming began July 17.

New production concern • A new production concern, Planned Broadcast Services, operating as a consultant to advertisers and broadcasters, went into operation July 10 in Washington, D.C. High speed tape duplication, disc cutting, pressing services and distribution will be available with the entire system being geared for stereo. The firm, which will also record and distribute the new Family Altar and Euphonic monaural and stereo discs as well as pre-recorded tape, is located at 225 Vine St. N.W.

Cherchez la femme • Air France, N.Y., has developed a new programming service, which it is offering free of charge to radio and tv women’s interest commentators. Radio broadcasters are offered a spot featurette, “French and Feminine,” on a monthly basis. It is a one-minute script giving news about food, fashion, family, travel and the home. A second feature, designed for tv, is an illustrated travelogue, consisting of a script outline, black-and-white slides and travel literature dealing with a particular city or country served by Air France.

New series • Old-time film comedies are being made available for tv this fall by National Telepix, N.Y. The 90-13½ minute films, titled Comedy Capers, star Ben Turpin, Will Rogers, Laurel & Hardy and the Keystone Kops, among others. The films, originally silent two-reel comedies, were produced by Hal Roach and Max Sennett from 1919 to 1929.

New color series • Patterns in Music, a new Sunday afternoon live color series, will debut in mid-October on NBC-TV. The program, originating at WNBQ (TV) Chicago, will be presented at 4:30-5 p.m. NYT. It features Joseph Gallicchio as conductor of the NBC Chicago orchestra in thematically developed programs of popular and semi-classical music.

All about France • A “familiar but puzzling” U.S. ally is the subject of a new hour-long tv program, The Heartbeat of France, the second production of the recently established International Television Federation (Intertel). The study premiered on the National Education Television stations. It will also be aired by Westinghouse Broadcasting, NET’s U.S. partner in the Intertel project.

Firm organized • Television Enterprises Corp., tv program production-distribution firm, has been organized with headquarters at 8278 Sunset Blvd., Hollywood 46. Telephone: Oldfield 6-7900. Harold Goldman, formerly executive vice president of NTA, is TEC president. Jerome Kurtz, previously eastern manager of Official Films, is sales manager of TEC. First TEC production is a series of 78 programs of Mahalia Jackson Sings.

New college • The College of the Air, a half-hour, daily college credit course, will be presented this fall on CBS-TV. Reportedly the first of its kind on network tv, College of the Air will be fed to stations from 1-1:30 p.m. EDT, beginning Sept. 25. Stations may record it for broadcast at convenient local time.

New offices • The Academy of Television Arts & Sciences has established new offices in Hollywood at 7188 Sunset Blvd. Telephone is Hollywood 7-5115.

Ziv-UA’s ‘Keyhole’ • Ziv-United Artists has signed producer-narrator Jack Douglas to an exclusive contract to produce a new half-hour tv film documentary series, Keyhole, for distribution by Ziv-UA. Mr. Douglas, who will serve as narrator, has produced such series as Bold Journey, I Search For Adventure and Kingdom of the Seas. Segments for Keyhole are now under production in Austria, Hawaii, Detroit, San Francisco, as well as Hollywood.

Instant music • SESAC, New York, has released an “Instant Sports Music” package to meet the musical needs of radio and tv’s fall sports program schedules. Consisting of 10 hi-fi albums of football, collegiate and marching band music, the albums sell at a package rate of $19.95.

Jointly-produced • Seven 50-minute documentary broadcasts dealing with major national economic issues will be presented each Monday for seven weeks beginning Sept. 4 on CBS Radio
COLORCASTING

Here are the next 10 days of network color shows (all times are EDT).

Aug. 21-25, 28-30 (10:30-11 a.m.) Play Your Hunch, part.
Aug. 21-25, 28-30 (11-11:30 a.m.) The Price Is Right, part.
Aug. 21-25, 28-30 (12:30-12:55 p.m.) It Could Be You, part.
Aug. 21-25, 28-30 (2-2:30 p.m.) The Jan Murray Show, part.
Aug. 21-25, 28-30 (11:15 p.m.-1 a.m.) The Jack Paar Show, part.
Aug. 21, 28 (9:30-10 p.m.) Concentration, P. Lorillard through Lennon & Newell.
Aug. 23, 30 (8:30-9 p.m.) The Price Is Right, Lever through Ogilvy, Benson & Mather, Spiegel through Norman, Craig & Kummel.
Aug. 23, 30 (10-10:30 p.m.) It Could Be You, Procter & Gamble through Benton & Bowles.
Aug. 24 (9:30-10 p.m.) Great Ghost Tales, Ford through J. Walter Thompson.
Aug. 25 (8:30-9 p.m.) Five Star Jubilee, Massey-Ferguson through Needham, Louis & Brorby.

ok's. The series, How Serious the Challenge?, is the result of a collaborative project in which each station used its own news, public affairs and technical facilities.

Five-day schedule • The Texan returns to ABC-TV this fall as a five-a-week daytime feature starting Sept. 4 (11-11:30 a.m. EDT). It replaces The Gale Storm Show in that time period.

Wolper special • David L. Wolper Productions, Hollywood, in cooperation with the Motion Picture Producers Assn., has begun production of Hollywood: The Talkies, a 90-minute documentary special tracing the history of Hollywood and the film industry from the advent of sound to the present. The special will be a sequel to Hollywood: The Golden Years, which NBC-TV will air Nov. 29 for Procter & Gamble.

'Crypt Adventure' • KCOP (TV) Los Angeles has signed Bill Burrrd, travel-adventure producer, for 39 first-run episodes of his newly syndicated series, True Adventure, to begin Monday, Sept. 25, 7 p.m. The series places emphasis on true adventures filmed as they happened throughout the world.

Agreement reached • Capitol Records Inc., Hollywood, holder of 10% of Toshiba Musical Industries, Tokyo, has reached an agreement whereby it would acquire 49% of the stock. Capitol under the agreement will provide advice and counsel regarding the record business and contribute to the management of the Japanese firm.

Hoover on Wilson • Former President Herbert Hoover will narrate a special half-hour program about another ex-President, Woodrow Wilson, on NBC-TV next year. The NBC-TV Special Projects presentation is titled The Ordeal of Woodrow Wilson—a Personal Memoir by Herbert Hoover. Covering period of 1917-21, the program will include archive motion picture film, historic still photographs and film newly made with Mr. Hoover. James Nelson is the producer, Robert K. Sharpe the director.

'Story' goes 'public affairs' • Mutual's weekday My True Story series of hour-long dramas will fall into a public-affairs category on an once-per-week basis starting Sept. 11. At least one drama weekly will be devoted to a recognized public-affairs theme. The stations will be advised at least four weeks in advance of broadcast of drama plot outline plus suggestions on how to apply the broadcast to local level campaigns. Stations can arrange their own community inserts during the last five minutes of the programs.

Disney firm's income up • The gross income of Walt Disney Productions for the nine months ended July 1 was $43,852,820, up $10,031,214 from the gross of $33,821,606 for the same period of last year. Film revenue was up $10,227,107; tv income up $44,558, with slight decreases in other revenue. The net profit for the nine-month period was $2,373,083, or $1.46 a share, compared to $343,151, or 20 cents a share, for the corresponding period of 1960.

WSLS-TV Roanoke, Virginia • the station where leadership & integrity are tradition!

Laurette Banks, 50, manager of ticket division, CBS, New York, died Aug. 12 at St. Luke's Hospital, New York, following long illness.
WFBM teaches and learns at seminar
SATURDAY SESSIONS DRAW CAPACITY AUDIENCES

Time-Life Broadcasters' stations WFBM-AM-FM-TV Indianapolis are discovering that it not only pays to learn what significant segments of their audiences think of them but that listeners actually will flock to the door and spend their time and money for the opportunity to speak their minds.

Each Saturday last month and this, the WFBM stations are finding the big WFBM-TV studio filled with community leaders and representatives of all listening elements. They are there to take part in one of the 11 Saturday seminars sponsored by the WFBM stations on "The Air Media and You: Communications in a Free Society." Each participant pays $3 to cover expenses of a Saturday session, including a hearty dinner which is served in the studio.

Eldon Campbell, vice president and general manager of the WFBM stations, observed that the seminars are right in tune with FCC Chairman Newton N. Minow's desire that stations learn the desires and needs of their communities, but that considerable extra benefits are accruing from the meetings. For one thing, he noted, the meetings have proved very beneficial to special interest groups such as judges and lawyers who for the first time have had an opportunity to explore in an informal atmosphere some of their own peculiar problems and to become aware of and overcome some of their own intramural communication barriers.

Mr. Campbell stressed one important aspect of the seminars is that conclusions are reached in the minds of the individuals and not by the platform or the group as a whole. Participants get a new look at their own jobs and responsibilities, he indicated, as well as a broader understanding of the role of the mass media.

First seminar in July included the Toastmistress Clubs of Central Indiana. Other July Saturdays involved an Indianapolis Council of Women's Clinic and Human relations and law enforcement seminars. August meetings are being devoted to religious leaders, newspaper editors, youth citizenship, community progress and an AFL-CIO clinic, among others. Each participant also receives a seminar portfolio containing materials prepared by Television

highlight of Aug. 5 newspaper editors' seminar sponsored by WFBM-AM-FM-TV Indianapolis was full-hour two-way radiotelephone news conference with West Berlin Mayor Franz Amrehn (second only to Governing Mayor Willy Brandt) on Berlin crisis. Here putting question to Mayor Amrehn is 'Indianapolis Star' chief editorial writer Frank H. Crane (l, standing). With him are (r, standing) Sig Mickelson, vice president of Time-Life Broadcast Inc., and (seated, l to r) Dick Krolik, public relations counsel for Time-Life Broadcast Inc., and Eldon Campbell, WFBM vice president-general manager.

Let's eat out!

When it's show time at the old homestead, 60% of the time it's the lady of the house who suggests eating out. This was revealed in a new Radio Advertising Bureau presentation aimed at convincing restaurateurs that radio is the blue plate special on their advertising menus. RAB's message: 94.7% of all housewives listen to the radio in a typical week, reach them through radio advertising and they in turn will persuade their men to go out for a meal.

Information Office and NAB plus article reprints such as the July 1 Saturday Evening Post piece by NBC Board Chairman Robert W. Sarnoff on "What Do You Want from TV?"

Fort Bragg GI's get greetings from d.j.'s

Martin Daniels, an enterprising time-buyer at J. Walter Thompson, and Frank Fitzpatrick, a Katz Agency radio salesman, have combined to help bring the voices of home-town radio personalities to the thousands of GI's from all parts of the country stationed at Fort Bragg, N. C. In the process they also have managed to create a solid station promotion gimmick.

Mr. Daniels, who is in the U. S. Army Reserve, has helped operate a closed circuit radio station (WWAH) at Fort Bragg for the last three years. This summer, Mr. Daniels enlisted the aid of Mr. Fitzpatrick in getting radio stations across the country to send 10, 20 or 30-second voice tapes of their most popular local personalities. Some 60 radio stations, including 17 represented by Katz, responded.

Typical copy for one of the messages: "Hi, this is (name of personality) at (station) in (market) saying hello especially to you at Fort Bragg. Hoping you will be in (market) soon and when you are tune us in at (station jingle)."

Major Anthony J. Sava, commanding the 351st Psychological War Co., has congratulated Mr. Fitzpatrick, calling the project "interesting as well as entertaining."

RAB prepares for biggest fall

As its first step to prepare member stations for their "biggest fall ever," Radio Advertising Bureau last week announced plans for a massive direct
mail campaign aimed at local advertisers. RAB has pre-packaged for the stations all the essential materials for efficient mailing to prospective fall advertisers. The promotion packs include fact-folders to dramatize radio’s key selling points, a covering letter for every brochure, a complete mailing format to ensure that “all bases are covered,” and a strategy chart which includes tips for contests, prizes, etc.

Radio campaign brings 800% sales increase

Watkins Bros. furniture store in Manchester, Conn., is a firm believer that WINF, that city, is a super salesman. And the evidence supporting the theory seems to bear this out.

In a week-long saturation program on the station (and it was the only form of advertising used except for one newspaper ad the last day) promoting a special furniture sale, Watkins Bros. reported an 800% sales boost over a comparable summer day, following tabulation of the receipts.

WINF operated for 16 hours from the main floor of Watkins’ store on the day of the sale. Early (5:30 a.m.) bargain hunters received free coffee and doughnuts, compliments of the station.

So impressed was the advertiser with the results that WINF will become a regular salesman for Watkins Bros.

Interviews bring crackdown

Interviews conducted by WWRL New York, reportedly resulted in a crackdown on employment agencies by New York’s Bureau of Licenses.

Leon Lewis, station news director, interviewed four girls brought to New York City by employment agencies on promises of lodging, meal security and return transportation. None of the promises was kept by the agencies and the girls were offered positions at salaries below standard wage.

The interviews were turned over to the National Asn. for the Advancement of Colored People for presentation to the District Attorney’s office. The girls’ plight, broadcast on WWRL, resulted in phone calls to the station with offers of food and lodging and positions of employment at salaries normal for the metropolitan area.

Drumbeats...

Going to the dogs • Every dog has its day, as the old saying goes, and last weekend canines in the WGMS Bethesda, Md., audience had theirs. The Washington area good music station, participating in its third annual Dog Days, played an hour of music dear to most any dog’s heart—except low brow dogs. Such favorites as Chopin’s

A new way to promote traffic safety

Seven police jurisdictions in the Washington area are promoting traffic safety by calling drivers’ attention to Traffic Violators’ School, a special education feature shown on WRC-TV, that city. Many traffic offenders in the area are given a flyer advising them of the show—along with their summons. Such an event is taking place in photo above as Alexandria, Va., patrolman Edward Bass presents Gail Barber with a ticket and the WRC-TV literature (for photographic purposes, of course). For other “offenders,” however, it has been the real McCoy.

“Dog Waltz,” “Dogs” from John Alden Carpenter’s “Adventures in a Perambulator,” and Moussorgsky’s “Song of the Flea” were among the featured presentations. “Hound Dog” headed the list of the low brow tunes not played.

Viewing guide • CHBC-TV Kelowna, B. C., with seven satellite stations, is believed to be the only Canadian TV station which publishes a pocket-size viewing guide with a paid circulation every two weeks. CHBC-TV Teleguide has a paid circulation of over 7,000 plus newsstand sales throughout the Okanagan Valley in British Columbia. It publishes programs with dates and times, news of personalities on film and
Live shows, and advertising by program sponsors. Newsstand price is 10 cents per copy, subscription price $1.50 per year.

Jones promotion • WJW-TV Cleveland is urging viewers to keep up with the Joneses (Spike Jones) by sending out post cards alerting them to the Spike Jones show, carried by the station on Monday nights. For those who want to keep up with the Joneses, Spike reports that there are approximately 2,000 in New York; 2,000 in Chicago; 1,000 in Detroit and 500 in Cleveland.

Scrambled eggs • In an effort to promote the local poultry and egg industries, WCAU Philadelphia last week invited its listeners to a breakfast—5,200 scrambled eggs and garnishings. During the week WCAU devoted two minutes of every hour, 24 hours a day, to publicizing the benefits of eggs in the daily diet.

Swimathon • WTMT Louisville got in the swim of promotion with all of things, a swimathon. The station promoted an attempt by Britt Sullivan to swim the 133.8 miles from Cincinnati to Louisville non stop (which she did). Some 5,000 listeners were on hand at various stages of the record 59 hours, 46 minute swim. WTMT newsman Dick Good broadcast better reports during the event.

Welcome to Cranbrook • CKEK Cranbrook, B. C., distributes a welcome notice to all visiting motorists to the city, announcing special newscasts and programs on road conditions and special events in the Rocky Mountain area. The notice points out that the scenic mountainous terrain blocks radio signals from outside the area, and that CKEK will endeavor to take the place of the hometown station with hourly world-wide newscasts and special news and feature programs.

Lifting literacy • The Alabama Federation of Women’s Clubs has announced a drive to teach Alabama’s 70,000 illiterate adults to read and write. Reading courses, using the Laubach teaching system, will be broadcast by the Alabama Educational TV Assn., enabling residents of rural areas unable to attend classroom courses to benefit from the instruction.

You may never have breathed the pure, dry air of El Paso in your life. But, from the first time you utter through a Mic' microphone, you will be the mouthpiece about personality ever to appear on the air in West Texas. You will spend half a lifetime building a name for yourself. Your success will depend on the kind of name you have. We have been giving you an advance build-up for months, and you will step right in and capture the audience that is waiting for you. If all this sounds interesting to you, then write us, mentioning initiative, and the ability to operate a fast board for a major-market CBS affiliate, if you have an unusual delivery, you can listen to management's orders and use your own head at the same time, send us tape and intrigue us as we have intrigued you. Do the tape as you do a commercial for yourself. Sell yourself to us. If you are a tramp, an alcoholic or a drifter, do not bother to reply. We are looking for a solid man whom we can depend on. If you have hard feelings or personal ambitions, so much the better, but these qualifications are not essential. If your tape impresses us, we will send you an offer. If you are selling Job you have done on us, and you will be pre- sented with a rapid disenchantment. Address your tape and/or letter to Mo and Norman, P. O. Box 3565, El Paso, Texas.

UNDERSTANDING
We would like to increase our viewers’ understanding of what is taking place in the world today. At present, most of the time of our 16-man news staff is devoted to local and regional news coverage; we want to bring meaning to the world news outside our coverage area. We need a man with carefully developed thought processes, who understands world events and who can bring them to focus for our one million viewers surrounding California’s capital City. If you believe you are this man, write us in detail, including whatever information you believe we shall need to form a preliminary judgment. Based upon your letter, we shall make further inquiries leading to a personal interview.

To Independent Owners of Profitable Radio & TV Stations:
We own two profitable radio stations—are completing negotiations to put our own stock issue. We are interested in cooperative merger with a few profitable and well-managed stations. Our investment council advises us that stations will be valued at ten times average earnings over past five years. You will receive 20% in cash (taxed as capital gain) and 80% in marketable securities (no tax until sold). You will be invited to become member of Board of Directors and receive a contract to continue in management for next ten-fifteen years. If interested, drop us a note. Our president will contact you personally. Your communications will be kept in strict confidence. No brokers please.

Box 673G, BROADCASTING

PLANNING MERGER
We have three metropolitan stations considering a merger—if you are in the top 70 market and would like to investigate the possibilities contact Associated Media Brokers, Suite 328, Bayview Building, Fort Lauderdale, Florida, L.O. 6-7843.

OUR RESPECTS to Kenneth Allen Cox, chief, FCC Broadcast Bureau

The man who wields the scissors on FCC red tape

Historians often point to examples of a man growing to fit his office. In the case of Kenneth A. Cox, new chief of the FCC Broadcast Bureau, the office has grown to fit the man.

The commissioners have delegated more responsibility and authority to the bureau. And they did it with confidence. They know Ken Cox will not require extensive research to acquaint himself with TV allocations, deintermixture, network practices and licensing and other hot potatoes the FCC is juggling—he virtually wrote the books.

As special counsel to the Senate Commerce Committee, which investigated these subjects in 1956-60, Mr. Cox wrote “brilliant reports which have been used by everyone looking into these problems since,” a colleague said.

Characteristically Ken wasted no time shuffling papers at the FCC. Taking office in April, he met with broadcast and legal interests to thrash out the thorny problem of FCC program forms. An enemy of Federalese, Ken slashed many of the ambiguities from the revised forms.

A lawyer who negotiated with him says, “Here’s a man who is willing to listen to other points of view. He’s very capable, practical and perceptive.”

Mr. Cox has some firm convictions about broadcast regulation—but he’s reasonable. He admits the FCC’s probes into programming enter a “difficult area” in judging what constitutes censorship vs. protection of the public interest.

He feels broadcasters “can’t make TV the servant of mass advertising, to as great an extent as it is. I think there are advertisers who’d be willing to pay the going rate to put on new and different types of programs.”

Early Decision • “Public service” means a great deal more to Kenneth Allen Cox than just a category on a program form. He has interrupted a successful law practice many times to do the public’s business.

He was born Dec. 7, 1916 in Topeka, Kan., where his father, Dr. Seth Leroy Cox, was an officer in the U. S. Public Health Service. Dr. Cox moved his family to Seattle when Ken was 15.

Like many a youngster in the Great Northwest, Ken once dreamed of being a civil engineer and building dams. But studying history and starring on the debating team in high school sparked an interest in public issues. He decided that lawyers did it better, so he turned to law, graduating cum laude and Phi Beta Kappa in 1940 and receiving his master of law degree from the U. of Michigan the next year. He served as law clerk to a Washington state supreme court justice for a year and a half, then joined the staff of the attorney general of that state. Early in 1943, Ken Cox joined the Army.

Parallel Career • Donna Fumerton was a member of Ken’s city-champion debating team and was valedictorian the year after he graduated. She too gained a law degree at Washington, graduating with the highest honors in her class.

Such friendly rivalry often ends in partnership. They were married Jan. 1, 1943, a day after he was inducted.

Entering the Army as a private in the Quartermaster Corps, Ken rose to captain in Intelligence, putting in his first hitch in Washington, D. C., at the Pentagon.

Discharged in 1946, Capt. Cox became Prof. Cox; he returned to U. of Michigan law school as assistant professor. Early in 1948, the Seattle law firm of Little, LeSourd, Palmer, Scott & Slemmons asked him to join its practice. When Ken explained he was committed to finish the semester, the immediate response was, “Then send us Nona,” and Mrs. Cox “held down” the job until he finished at Michigan.

Mr. Cox has remained with the firm, which specializes in corporate and tax law, ever since. He was made a partner in June 1953.

The Korean conflict was the first of the “interruptions.” Capt. Cox was recalled to duty as instructor and administrative officer at the Army General School, Ft. Riley, Kan.

Kenneth Cox pitched tirelessly into Seattle civic projects and Democratic activities. Among other posts, he served as vice president of the Municipal League of Seattle, the Seattle World Affairs Council and president of the local chapter of the American Assn. for the United Nations. He was Democratic precinct committeeman 1954-60 and active in district political clubs.

Mr. Cox relishes the challenge of politics but his standards of civic responsibility outweigh purely partisan considerations. In Seattle he was a member of a committee which investigated the views and background of municipal candidates, made recommendations to the voters and supported selected candidates from both parties.

A Senate staff member who worked with him emphasizes, “Ken commands great respect from both sides of the aisle.”

Sen. Warren G. Magnuson (D-Wash.), chairman of the commerce committee, recalls Mr. Cox was a “most efficient, painstaking counsel, who offered every opportunity to the opposition to develop their points as he developed his points for the committee majority.”

For three protracted hearings on TV, Mr. Cox conducted investigations, examined witnesses and wrote reports. In April 1959 when Sen. Magnuson needed a top trial counsel for hearing on the nomination of Adm. Lewis L. Strauss to be Secretary of Commerce, he again called on Kenneth Cox.

FCC Chairman Newton N. Minow, although he had never met Mr. Cox, was impressed by “his fine record and reputation” and called him immediately after being confirmed to offer Ken the post of FCC general counsel. Although it meant another hiatus in his practice, Ken accepted. When he returned to Washington, D. C., the chairman suggested he could be of more service as chief of the Broadcast Bureau.

The Home Scene • “My favorite hobby is traipsing after my boys,” Ken says. The Coxes’ three sons, Gregory 11, Jeffrey 8 and Douglas 5, are avid TV viewers.

The family is scouting for camping sites near Washington and their suburban Bethesda, Md. home. They own a tent and frequently camped out in the Northwest.

He’s a voracious reader, particularly history and political science. But when job pressures build up he reads detective stories. “But this doesn’t mean I approve of crime and violence,” he adds.
New economics of tv

THE accelerating trend toward the sale of network participations, which is described in detail elsewhere in this issue, is less to be deplored as an evil than to be examined as a change in one of the fundamental sources of station income.

There is no discernible way the trend can be reversed. Indeed it is likely that a year from now the networks will be selling a higher proportion of participations to programs than they are selling now. Events are forcing that condition.

There are critics who say that the networks have suffered from inadequate salesmanship and have cravenly settled for the easier sale of bits and pieces when they should have vigorously adhered to the principle of selling whole shows. We are disinclined to attempt an appraisal of network salesmanship. To us it seems that the costs of full-program sponsorship on national networks have grown so big that no amount of sales ingenuity could have achieved anything approaching a sold-out situation on a universal application of the full sponsorship principle. The problems of the network salesmen are further complicated by the rise of a third network, ABC-TV, to fully competitive status.

There is no way to measure the effect that network participation selling will have on spot tv, but it is safe to assume that spot will not be helped. This means, of course, that stations face the prospect of a decline in revenue. The compensation that an affiliate gets for carrying a network participation announcement is no more than a fraction of what it gets for carrying the same announcement bought at spot rates. This is the problem that must somehow be overcome.

It seems to us the only way to overcome it is for affiliates to appeal to the networks to increase rates of station compensation. If networks are to eat into spot business as a necessary means of maintaining their own volume, they should be willing to compensate stations for the spot revenues they have taken away. It is not too soon for affiliates to begin working on revisions in their network compensation schedules.

Collins conundrum

NEXT to the NAB presidency the post of executive vice president organizationally is the most important in the trade association. That is the reason the 43-man board last June urged the selection of an experienced broadcaster for this No. 2 spot.

The new executive vice president, however, is not a broadcaster. Vincent Wasilewski, a 12-year veteran of the NAB's staff at 38, and its vice president for government affairs, has been elevated to this position. NAB's president, former Gov. LeRoy Collins of Florida, made the selection. It was endorsed by the three-man NAB advisory committee and is expected to be confirmed by the full board. The board really was given no alternative.

Mr. Wasilewski is an able young man. He is dedicated, sober and reliable. But because he is not a broadcaster, he doesn't meet the qualifications spelled out by the board. The board wanted a broadcaster because Gov. Collins isn't one either. It also wanted a man who could stand in for the president and perhaps succeed him if a vacancy occurs.

Promotions from within ordinarily are to be desired. It does not demean Mr. Wasilewski to say that the board did not have in mind a promotion from within. Mr. Wasilewski had no idea that he would be tapped. He made no drive for the job.

We agree with those members of the board who felt that an infusion of new blood was needed. Mr. Collins has been handicapped by a lack of knowledge of broadcasting and of the attitudes of the preponderance of the NAB membership. While he shifted his position from one of all-out support of program controls by government to passive resistance at the most in certain areas, he hasn't yet successfully made the transition from bureaucrat to chief lobbyist of the nation's broadcasters.

Cited as a mitigating circumstance is the selection of Robert D. Swezey, a seasoned broadcaster and former network and station executive, as chief administrator of the television and radio codes. This is an important post and Mr. Swezey—an attorney as well—appears eminently qualified for it. The code authority, however, is a position apart from NAB's overall management. It functions as a separate unit. Paradoxically, Mr. Swezey does meet the board's criteria for the executive vice presidency.

There are rugged days ahead. What Mr. Wasilewski can do as executive vice president that he could not do as vice president for government affairs, which principally is a lobbying job, is difficult to discern. He can't inculcate in Gov. Collins the practicalities of station or network operations because he hasn't had the experience.

If Gov. Collins had had a strong individual, conversant with broadcasting's problems based on first-hand experience, at his side in recent weeks, he might not have stumbled as he did in initially endorsing the FCC's proposed program forms or in advocating a freeze on ad grants (and by implication on tv) without recognizing the dire consequences that inevitably would lead to rate regulation.

Gov. Collins is persuasive. He is a salesman par excellence in politics and at the state level. But a salesman must know his product and the goals of his principals. His product is free enterprise broadcasting and his principals are the members of the association he is privileged to head. Unless he follows the bidding of the majority of his membership, he is not working for them but against them.

Gov. Collins has learned a few harsh lessons in the past several weeks. He now seems less reluctant about joining issue with the government but he's still far from being the champion of free broadcasting that the broadcaster has the right to expect. He has the capacity to do the job expected of him. He must show now that he has the will.

Gov. Collins should deny or confirm the widespread report that he has in mind running for the Senate from his native Florida. And he should realize that playing footsy with the administration isn't necessarily in the best interests of his membership.

And Sioux Citians are accustomed to KVTV's leadership on the local scene. The men of the KVTV Public Affairs team are well-known as a result of their active participation in community affairs. They are listened to with respect. Above, Newsmen Charles Powell, Dick Compton, Bob Billman and Program Director Clark Pollock discuss with City Manager Connie Bodine (center) a model of the new 18 million dollar Floyd River flood control project. The project, now under construction, will eliminate future flood problems in the Floyd River basin. This team produces KVTV's award-winning monthly documentary "Channel Nine Reports," one of many News and Public Affairs programs that has earned the continuing attention of Siouxland.

**WKBW • WKBW-TV**

**Buffalo, New York**

Represented by **avery-knodeL**

**broadcasting, August 28, 1981**
Dr. Vladimir K. Zworykin spent long years of research that resulted in major television developments; among them the camera tube he named the iconoscope, for which he filed patent application in 1923, and the cathode ray or picture tube called the kinescope, which he first demonstrated in 1929.

WGAL • WGAL-FM • WGAL-TV have pioneered in the development of mass communications. Established in 1922, 1944, and 1949, respectively, these stations have been and are dedicated to serving all listeners in the cities and communities throughout their coverage areas.
JFK’s “Montgomery”?

It wouldn’t surprise Washington observers to see Fred Coe, one of television’s top producers, figure in future direction of television-radio appearances by President Kennedy. Since President’s broadcast last month on Berlin crisis, dissatisfaction has been expressed with “production” relating mainly to manner of delivery and emphasis. Mr. Coe is personal friend of President and it was logically presumed, that despite other offers, he would become President’s “coach.”

Because of congestion in President’s office during broadcasts, consideration also is being given by Pierre Salinger, President’s news secretary, to limiting each news medium to one-man pool operation. Whereas tv now works on that basis, newsreel men, still photographers and USIA have insisted upon individual pickups. Plan is to have each medium rotate coverage on pool basis.

Viewers and violence

How much do viewers really object to tv’s “violence.” anyway? This is more indicative than definitive, but for what it’s worth, in month after FCC Chairman Newton Minow’s “Wasteland” attack last May, NBC received 1,005 letters characterized as “complaints”; of these, 25 complained of violence. Following month, after Mr. Minow’s blast had run out of headlines, there were 217 complaints, of which 11 were against violence.

Maggies running early

Although election is more than a year away, campaign for re-election of Senator Warren G. Magnuson (D-Wash.) chairman of Commerce Committee in which communications legislation originates, already has gotten under way. Magnuson supporters will kick off campaign Nov. 16 with $100 per plate Silver Anniversary banquet in Seattle. Senator Henry M. Jackson (D-Wash.) is chairman of dinner committee and Irv Hoff, former administrative assistant to Senator Magnuson and now director U. S. Cane Sugar Refiners Assn., is executive vice chairman.

Who Senator Magnuson’s Republican opponent will be is not yet known. Senator Magnuson has been in Congress since 1937, having served four terms in the House and is running for his fourth successive six-year term in Senate. His committee chairmanship enforces him as unofficial “superchairman.”

Collins won’t be there

Despite elimination of date conflict, NAB President LeRoy Collins won’t participate in seven-state seminar on broadcast regulation in Atlanta, September 15, under auspices of Georgia Assn. of Broadcasters. Reason is his Advisory Committee recommended against it because he would be preoccupied in Washington with other matters— including plans for his own high-level government-broadcaster conference on same subject. Seminar will be moderated by James L. Howe, WIBA Fort Pierce, Fla., District 5 NAB Radio Board member (Ga., Fla., Ala., Puerto Rico).

Credit clean-up

Television’s “clean-up campaign” (see page 74) isn’t being aimed at “violence” alone. NBC-TV, for instance, plans to simplify credit-crawls by eliminating wardrobe credits altogether. Target date for this policy—applied gradually for some time now—is October, start of new fall season. It’s not that wardrobe credits are considered improper, but that crawls will look “cleaner” without them. Policy means more money will have to be spent to buy or rent wardrobes, but NBC obviously figures it’s worth money to get rid of that much “clutter.”

NAB executives in

Despite some grumbling about method, NAB joint board of directors is headed toward almost unanimous approval of appointments of Vincent T. Wasilewski, as executive vice president, and of Robert D. Swezy, as chief administrator of radio and tv codes. As of last week, 36 of 43-member board had given endorsement. Those who had not yet voted, it’s understood, either had not voted because of absence from city or illness.

Several directors reported they were not pleased with method used in selecting officers and expressed misgivings over failure to select “practical broadcaster” for executive vice presidency. All felt, however, they had no alternative. Mr. Wasilewski is now on job. Mr. Swezy is in Europe until after Labor Day. (Story page 70).

No food, no foolin’

Agencies and sales-representation firms concerned about need for “serious” training course for new buyers and new rep-firm traffic personnel may find answer this fall in “radical change” being considered for Radio & Television Executives Society’s 1961-62 timebuying and selling seminars in New York. They’re being sounded out quietly, reportedly are enthusiastic. Result may be abandonment of “potroast and a talk” luncheon approach in favor of no-food, no-fooling “classroom” sessions with set instructors, probably in late afternoons. At least four agencies and three rep firms reportedly have already pledged help in getting project rolling.

Free dishes, anyone?

Can stations counter network motion picture programming? Test case might be developing with premiere this fall of NBC-TV’s Saturday Night at the Movies (9-11 p.m.). WCBS-TV New York, for example, plans to promote its own Late Show movies (after prime time) with dual purpose: (1) persuade movie fans to “wait” for Late Show (and not defect to NBC), or (2) if they watch NBC-TV movies, to switch to Late Show afterward.

Sponsor for VOD

There’s still some work to be done but it appears reasonably certain Veterans of Foreign Wars will adopt Voice of Democracy contest which NAB and Electronic Industries Assn. dumped early in summer. VFW is seeking sponsors such as hotels to help share expense of sending 50 state winners to capital. Contest was discussed last week by VFW council during national convention at Miami Beach, Fla. but was not brought to convention floor.

Educators miffed

Educational tv interests greatly upset over FCC refusal to reserve new Rochester, N. Y., and Johnstown, Pa., vhf channels for etv, as they requested. Feeling is FCC failed to back talk boosting etv with action. Educators are talking of going over commission’s head to courts.

No room

Despite list of willing sports sponsors, new American Basketball League is facing problem of clearances on radio-tv outlets. With schedules already jammed with pro and college football games this fall in addition to National Basketball League schedule, new loop reportedly is exploring a video tape solution before its November debut.
The programming standards of a television station are always on view. All you need do is watch to see that WPIX-11, New York's Prestige Independent, has the “network look”—an array of network proven and network caliber programs night after night. Groucho Marx, Wyatt Earp, One Step Beyond, World of Giants, Troubleshooters, It's a Wonderful World, Wanted, Dead or Alive are some of the new fall shows joining the best looking and top-rated* independent in New York—and the only one qualified to display the NAB Seal of Good Practice. Only WPIX gives you minutes in prime time in such a network atmosphere. A client list that is 98% national advertisers is the clincher. *where are your 60 second commercials tonight?

*During every month of this year ARB reports WPIX-11 has the largest share of audience among the independents, 6 PM to Midnight, seven nights.

NAB plans to be firm on liquor violations

NAB will take "prompt and decisive" action against any subscriber violating radio and TV code bans against acceptance of hard liquor advertising.

President LeRoy Collins, in letters to Sens. Warren G. Magnuson (D-Wash.) and John O. Pastore (D-R.I), said NAB agrees with letters sent him by two Senators in which they suggested self-regulation in tradition of free enterprise is preferable to legislative strictures (early story page 56).

Gov. Collins asked legislators to advise association if they receive any specific information that stations are violating NAB codes.

"Were the total industry behind our efforts in these delicate areas, such problems would not arise," Gov. Collins added. "I am hopeful that the strengthening of our code operations and their greatly-stepped-up activity in the coming weeks will enable us to impress more clearly on broadcasters the folly of carrying this advertising."

Two legislators were commended Aug. 24 by Robert W. Coyne, president of Distilled Spirits Institute, for initiating inquiry into reports broadcasters are considering acceptance of liquor advertising.

"It is interesting to note that the two Senators stressed the point 'self-regulation'," Mr. Coyne said. "Also interesting is the fact that members of the Distilled Spirits Institute, by self-regulation, have barred broadcast advertising of spirits for more than 25 years. This self-imposed discipline antedated the NAB codes.

"No member of the institute ever breached this industry rule. This self-government by the industry has been adequate and the broadcasters' code restriction at a later date merely reflected the attitude of the organized distilling industry."

Mr. Coyne said institute is in accord with Senators' statement that public interest is not being served by broadcasting and televising of liquor advertising into the American home.

USIA relates Berlin to world situation

U. S. Information Agency is making heavy use of television and radio to inform people around globe that Soviet threat to Berlin endangers freedom everywhere.

Agency has been aware that peoples of Africa, Asia, and Latin America regard Berlin crisis as none of their affair.

USIA projects include 30-minute TV documentary, "Anatomy of Aggression," produced in 30 languages; three-part series prepared by Voice of America on tape for use by radio stations abroad; and VOA short-wave broadcast documentary on Berlin, based mainly on interviews with refugees. USIA campaign portrays Berlin crisis as brought on by bankruptcy of Communist system. It underlines unity and resolve of Western allies, and their desire to settle dispute through negotiation.

Senate unit approves three TV-related bills

Senate Antitrust and Monopoly Subcommittee, unable to decide among three sports bills involving television, on Friday approved all three without recommendation and sent them to parent Judiciary Committee.

Two (S 2427 and S 1856) would permit type of package TV contract negotiated by National Football League and CBS-TV but voided by court on antitrust grounds (Broadcasting, July 31). S 2427 was introduced by Subcommittee Chairman Estes Kefauver (D-Tenn.) as direct result of that decision. Bill (HR 8757) similar to Kefauver proposal is subject of hearing today (Monday) by House Antitrust Subcommittee (see story, page 60).

Third bill approved by Senate group (S 168), also (introduced by Sen. Kefauver), would provide for TV blackouts of major league baseball and professional football games within 75 miles of minor league baseball and Saturday college football games, respectively. Similar provisions are in two other bills approved Friday.

Congressmen ask hedge on satellites

Thirty-five members of Congress, in letter to President Kennedy, have urged that creation of satellite communications system be achieved through government research and development contracts.

They also asked that decision of ultimate ownership and control of system be deferred until plan is completely operational.

Letter is being released today (Monday) by one of its signers, Rep. Emanuel Celler (D-N.Y.), chairman of House Judiciary Committee and its Antitrust Subcommittee. Other signers were New Frontier Senate stalwarts Hubert Humphrey (D-Minn.), Senate Whip; Estes Kefauver (D-Tenn.), chairman of Senate Antitrust and Monopoly Subcommittee; and Wayne Morse (D-Ore.).

Letter, which stressed importance of U. S. being first to put space communications system in operation, said "present commitments of any kind as to the control of this system may hinder its rapid development and prejudice vital questions of public interest and international relations."

It said if private ownership is finally decided upon, safeguards must be adopted to avoid monopoly of system's ownership and use. These would include, letter said, opening ownership to domestic communications carriers and communications and aerospace manufacturers, as well as international carriers.

New ABC-TV series set

New daytime audience participation series titled Make a Face will bow on ABC-TV Oct. 2 (Mon.-Fri. 12:30-1 p.m.).

Other changes in daytime schedule, also effective Oct. 2: Number Please moves to 2-2:30 p.m., Day in Court to 1-1:25 p.m. and American Bandstand to 4-4:50 p.m.

Chiquita back to tv

Vermont Census: 88% tv; 92.6% radio

First radio-tv returns from 1960 U. S. Census show 88% of homes in Vermont have one or more tv sets: 92.6% have one or more radio sets. Vermont radio figure is close to 91.3% saturation for entire U. S., based on sample of national radio data (Broadcasting, Aug. 7).

Bureau's data show number of television homes (110,732 occupied homes in state) with sets in working order as follows (one-set homes, two-or-more set homes and total circulation):

State: 90,019 one-set tv homes, 7,325 two-or-more, total 97,344.

Counties:
Addison, 4,075; 414; total 4,489.
Bennington, 5,995; 507; total 6,502.
Caledonia, 5,645; 404; total 6,049.
Chittenden, 16,027; 2,203; total 18,230.
Essex, 1,448; 104; total 1,552.
Franklin, 7,173; 487; total 7,660.
Grand Isle, 760; 58; total 818.
Lamoille, 2,550; 249; total 2,799.
Orange, 3,625; 220; total 3,845.
Orleans, 4,928; 205; total 5,133.
Rutland, 10,985; 737; total 11,722.
Washington, 10,223; 913; total 11,136.
Windham, 6,315; 362; total 6,677.
Windsor, 10,270; 462; total 10,732.
Radio circulation (one-set homes, two-or-more, total for state and by counties):
State: 42,322 one-set homes, 42,414 two-or-more, total 102,736.
Addison, 2,487; 204; total 4,511.
Bennington, 4,036; 2,850; total 6,886.
Caledonia, 3,427; 2,799; total 6,226.
Chittenden, 16,027; 2,203; total 18,230.
Essex, 953; 585; total 1,538.
Franklin, 4,535; 3,019; total 7,554.
Grand Isle, 614; 232; total 846 (100% saturation).
Lamoille, 2,023; 872; total 2,895.
Orange, 2,761; 1,360; total 4,121.
Orleans, 3,278; 2,019; total 5,297.

Washington, 6,829; 4,736; total 11,565.
Windham, 4,707; 3,620; total 8,327.
Windsor, 6,690; 5,069; total 11,759.

Better NBC news film role

Upgrading of role played by NBC news film in over-all NBC News operation was underscored Friday (Aug. 25) in new executive appointments.

Lefferts A. McClelland, director of operations, WRC-AM-FM-TV Washington, was named manager, news film. He fills post vacated by Eugene Juster, who becomes director, news film. David Klein was appointed manager, film procurement.

Grim humor

Perhaps one approach to countering charges of violence leveled at network tv programs (see story, page 74) is to inject humor into action shows. Initial program on NBC-TV's Thriller series on Sept. 18 (10-11 p.m.) will be "Masquerade," humorous drama about vampire-infested, haunted house. Story line centers around married couple who seek refuge during rainstorm in dilapidated southern mansion inhabited by three deranged human beings who act like vampires.

D.J.'s arraignment set on tax evasion charge

Hunter D. Hancock, disc jockey indicted last week (Aug. 23) by federal grand jury in Los Angeles on charges he evaded income taxes on $18,000, including payola reportedly received from record companies, has been released on $250 bail pending arraignment in federal Judge Harry C. Westover's court Sept. 18. Period involved covers 1956-58, while Mr. Hancock was disc jockey at KPOP, KGFJ and KFOX, all Los Angeles, and KSON San Diego, according to allegations by IRS official Virgil C. Crabtree, who revealed that three other disc jockeys are currently being investigated.

Downflake radio-tv plans

Downflake Foods Inc., frozen bakery products, will spend 85% of its $1 million budget in spot radio and tv campaign. Radio will be used only in New York; tv agreements have been reached in eight markets and more will be scheduled. Agency: Smith/Greenland Inc., N. Y.

Lincoln-Mercury news buy

Lincoln-Mercury Division, Ford Motor Co., Dearborn, Mich., will sponsor six hour-long NBC News special programs over NBC-TV starting in September. Dates are indefinite but casts will include two "JFK Report" programs in September and December; two "Nation's Future" shows in October and January, and single programs on Japan in November, and on heart disease in December. Agency: Kenyon & Eckhardt, New York and Detroit. (Also see auto buying story, page 27.)

NAB to oppose Celler bill

NAB is scheduled to testify today in opposition to bill (HR 8757) authorizing package radio-tv contracts by professional football leagues. Association will take position bill would deprive public of some football programming but it will admit subject is controversial within broadcasting industry. Hearing will be held before House subcommittee headed by Rep. Emanuel Celler (D-N.Y.). (Early story page 60.) Networks are not expected to testify.

WOOD-TV asks reopening of record on site move

WOOD-TV Grand Rapids Friday asked FCC to reopen record on its request to change transmitter site (Broadcasting, July 17). Original FCC permission was reversed by U. S. Court of Appeals last month following protest by WILX-TV Lansing-Jackson, Mich.

Court found station moved from under-served area to more adequately served area and directed FCC reconsideration. WOOD-TV Friday said whole record should be reopened in light of subsequent FCC grants to stations in that area which now provide coverage for under-served area about which court was concerned.

RKO, Crowell-Collier call off WGMS transfer

RKO General Inc. and Crowell-Collier Broadcasting Corp. on Friday (Aug. 25) announced agreement for sale of WGMS-AM-FM Washington has been called off.

Robert M. Purcell, C-C president, issued following statement: "This mutual termination was agreed upon because of the legal complications including those of the other participants in this omnibus situation which could not be resolved sufficiently soon to allow Crowell-Collier . . . to forward in timely fashion its program of radio-tv expansion."

C-C was to pay $1.5 million for Washington "good music" stations as part of deal whereby RKO General and NBC were to exchange radio-tv properties in Boston and Philadelphia, respectively, NBC buying KTVU (TV) San Francisco and RKO buying network's WRC-AM-FM-TV Washington. Because of latter contract, RKO General had arranged to sell its WGMS stations to C-C.

Grove opposes program form

William C. Grove, owner of KRAL Rawlins, Wyo., and KSID Sidney, Neb., added his voice Friday to other small station operators criticizing bookkeeping burden FCC proposed program forms would levy on them (story page 56). Mr. Grove suggested in comments to FCC that stations billing less than $150,000 annually and/or with less than 20 fulltime employees be allowed to continue under existing program reporting rules.

BROADCASTING, August 28, 1961
"60 color commercials a month prove the quality of RCA TV Tape!"

— says Roy Bacus, Station Manager, WBAP-TV, Fort Worth

"How did we ever get along without RCA TV Tape!" he adds. It makes possible special telecasts which can be done at the convenience of clients and talent. It facilitates special promotions, program intros and closes. And it helps us do a better overall production job.

"Besides all this, color really impresses our advertisers. Color sets are on the increase and our advertisers like the extra impact they get from color. This is especially true of food, toy and department stores. We've jumped from 17 to about 60 color commercials a month. This proves we get the finest performance from our two RCA Color Recorders!"

RCA TV Tape Recorders are ideal for station use. They are designed for color and part of a completely matched line of equipment. Unique RCA features include multiple monitoring checks for the very best picture . . . unequalled in sharpness and color realism. And precision headwheel interchangeability makes it possible to get uniform quality time after time.

Incidentally, it's these color design features that make the RCA Tape Recorder best for monochrome.

If you're looking for this performance plus in your commercials, you'll find the answer in RCA tape equipment. Call your nearest RCA Representative, with complete assurance, for the finest in equipment and service. Or write to RCA, Broadcast and Television Equipment, Dept. YD-22, Building 15-5, Camden, N. J.
Fascinating figures

Some of Florida's most fascinating figures are one-sided . . .
such as the 65 counties in Northeast Florida and South Georgia covered by WJXT vs only 39 for the other station . . . such as the top 35 shows in homes delivered according to Nielsen all appearing on WJXT. No matter what figures interest you, WJXT consistently offers a one-sided picture with thundering leads in this booming, bustling regional market!
DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

AUGUST

Aug. 28—ABC Radio Affiliates Meeting, Sheraton-Chicago Hotel, Chicago.

SEPTEMBER

Sept. 5—Comments due on FCC inquiry and notice of proposed rulemaking changing fm spectrum and looking into duplication of am-fm programming.

*Sept. 8-10—Fall meeting of West Virginia Broadcasting Assn. Speakers and panelists include Etho Ellis, Cox stations; Ed Reggin, Ralph Jones Agency; Thomas H. Wall, Dow, Lohnes & Albertson, Washington; Franklin Snyder, WTVAK(TV) Pittsburgh. Dinner speaker: Sol Taishoff, editor & publisher, Broadcasting Publications Inc. Greenbrier Hotel, White Sulphur Springs.

*Sept. 11—Space communications panel by Washington sections, Institute of Radio Engineers and American Institute of Electrical Engineers. Dr. John Pierce, Bell Labs.; Dr. Eugene W. Engstrom, ARS; Dr. Herbert Trotter Jr., General Telephone & Electronics Labs., and Richard P. Gifford, GE. Moderator: Edward W. Allen, FCC. Natural History Museum, Washington, D. C., 8 p.m.

Sept. 15—South East Radio-TV Seminar, sponsored by Georgia Assn. of Broadcasters, to discuss various problems facing broadcasters, including program form proposals, government encroachment, NAB leadership, etc. Biltmore Hotel, Atlanta.

Sept. 11-17—Affiliated Advertising Agencies Network 17th annual international meeting, Sheraton-Blackstone Hotel, Chicago.

Sept. 15—Reply comments due on FCC RAB management conferences

Sept. 7-8 Haddonfield, N. J.

Sept. 11-12 White Sulphur Springs, W. Va.

Sept. 18-19 Sea Island, Ga.

Sept. 21-22 Dallas.

Sept. 28-29 Des Plaines, Ill.

Oct. 5-6 Omaha.

Oct. 9-10 Palo Alto, Calif.

BROADCASTING* Magazine was founded in 1931 by Broadcasting Publications Inc., using the title "Broadcasting." The "News Magazine of the Fifth Estate." Broadcast Advertising was acquired in 1931, Broadcast Reporter in 1933 and Telecast* in 1953. Broadcasting-Telecast* was introduced in 1946.

*
New for you—a more useful telephone number!

You may already have a telephone number like this. If you don’t, here’s how it will look.

The first three digits are your Area Code. They tell the telephone system what part of the country you live in. The next three digits designate your particular telephone office, and the last four pinpoint your particular phone.

It’s your phone number. Unique. Not another like it anywhere.

This new kind of number helps others reach you—and helps you reach others—faster.

Area Codes here now—All-Number Calling on the rise

Today the majority of our customers already dial their Long Distance calls directly by means of Area Codes. Eventually everyone will be able to. Until then, if you call through the Operator, you can save time by giving her the Area Code of the telephone you are calling when it is different from yours.

And already, in many parts of the country, letters have been replaced by numerals in telephone numbers. Before this change, we were running out of usable telephone numbers containing letters, while phones were steadily increasing. All-Number Calling, however, will give us enough numbers to meet our needs into the next century.

Telephone progress like this benefits everyone. Your new personal telephone number is another step in our effort to anticipate the needs of a growing America.

BELL TELEPHONE SYSTEM

All-Number Calling may permit you to use simple, tiny number-buttons on portable phones of the future.
rule change requiring broadcast announce-
ment of financial interest held by station
management or employees in products or
services promoted on air (plugola).
Sept. 13—Deadline for comments on FCC
proposals to divide station frequencies
among several 16-channel operators. 

Sept. 15—Comments due on proposed FCC
rulemaking to limit the use of vhf trans-
later stations. If the FCC were to keep
unserved areas rather than simply extend
an existing station's coverage area.

Sept. 15–17—American Women in Radio &
Television, southern area conference. 

Sept. 18—Reply comments due on FCC
rulemaking on revised program forms.

Sept. 18—Reply comments due on FCC
rulemaking on new method and time period
for keeping station logs.

Sept. 18-19—CBS Radio Affiliates Assn.,
annual convention. Waldorf-Astoria Hotel,
New York.

Sept. 22—Radio & Television Executives So-
ciety, newsmaker luncheon. Hotel Roose-
velt, N. Y. FCC Chairman Newton N. 
Minow is speaker.

Sept. 22-24—Advertising Federation of 
America, 10th district convention. Hotel
Mayo, Tulsa.

Sept. 24-28—Louisiana Assn. of Broadcasters,
animal convention. Buena Vista Beach Hotel &
Motel, Biloxi, Miss.

Sept. 26—Resumption of FCC hearing on
network programming practices. Federal
Court House, Foley Square, New York City.

Sept. 27-30—Radio Television News Direc-
tors Assn., 13th international convention.

Sept. 29—Assem of National Advertisers,
novate products workshop. Waldorf-Astoria
Hotel, New York City.

Sept. 29-Oct. 1—National Federation of Ad-
vertising Agencies, central states group.
Lake Tower Motel, Chicago.

Sept. 29—Minnesota Broadcasters Assn.,
national convention. Speaker include NAB
President LeRoy Collins and FCC Commis-
sioner Robert T. Bartley. Leamington Hotel,
Minneapolis.

Sept. 29-Oct. 1—American Women in Radio &
Television, east central area conference.
Claypool Hotel, Indianapolis.

Sept. 29-Oct. 1—American Women in Radio &
Television, New England conference.

Nov. 13—Pittsburgh Hilton, Pittsburgh
Nov. 15—Hotel Leamington, Minne-
apolis
Nov. 20—Robert Meyer Hotel, Jack-
sonville, Fla.
Why WTAE, Pittsburgh bought Seven Arts' Volumes I and II

Says Franklin C. Snyder:

"The decision to purchase the Seven Arts features—Volumes I & II—was reached after thorough analysis of the various ‘post-48’ film packages currently available.

"The Warner's ‘Films of the 50’s’ add balance, freshness, quality and prestige to our film library. This new and exciting product will make it possible for WTAE to continue to program consistently high quality features and to maintain our position as Pittsburgh's dominant movie station."

FRANKLIN C. SNYDER
Vice President and General Manager
WTAE—Channel 4—Pittsburgh

For list of TV stations programming Warner Bros. “Films of the 50’s” see Third Cover SRDS (Spot TV Rates and Data)
WMCT/MEMPHIS features more local interest programs than all other Memphis TV stations combined!

In fact, locally-produced programs that serve the community's needs and interests have been a major effort of WMCT for over twelve years. Here are a few.

1. Mid-South Today... the area's only daily television farm information program.
2. Your Esso Reporter... Memphis' top rated television newscast for over nine years.
3. Looney Zoo... the most popular children's show in the Memphis market.
4. News Specials... the largest TV news staff in the Mid-South prepares special programs on local events.
5. News Picture... News Director Norm Brewer's popular evening regional and local news.
6. Weather... three daily weather programs. Complete in every detail.
7. Sports... golf, bowling, and other leading sports action is covered by WMCT's mobile unit.
8. Pride of the Southland... amateur talent show seen every Saturday morning.
9. TV Chapel (Religion)... live religious program featuring a different church each week.
10. Remotes... on-the-scene live coverage of important Mid-South events.

If it's of interest to the Mid-South, it's of interest to WMCT

Texas market story
EDITOR: The special article on Texas [SPECIAL REPORT, Aug. 21] is most impressive.—J. W. McLean, President, Texas National Bank of Houston.

EDITOR: Your series on Texas was tremendous and I enjoyed reading... it.
—Leonard H. Marks, Cohn & Marks, Washington.

EDITOR: ... A beautiful job and done in real Texas style. Your story made me homesick.—J. P. Taylor, Manager, Market Administration, Broadcast & Television Equipment Division, RCA, Camden, N. J.

(Reprints of BROADCASTING's special Texas market story are available at 20 cents per copy or $20 per hundred, plus express or mailing charges.)

New correspondent
EDITOR: ... I realized your publication was powerful, but I had no idea I would hear from so many old friends as a result of the article [MONDAY MEMO, Aug. 7]. You have a fine publication and I am delighted to be one of your correspondents.—Sherman J. (Jack) McQueen, Vice President and Director of Broadcast, Foote, Cone & Belding, Los Angeles.

New approach
EDITOR: We were delighted with the article, "A fresh, clean approach to sex" [BROADCAST ADVISING, Aug. 14] and we very much appreciate your taking the space to describe our efforts. ...—Morris L. Levinson, President, 5-Day Labs, New York.

Death Valley Days
EDITOR: ... Many thanks for your splendid cooperation and the most wonderful article, "Death Valley Days, U. S. Borax's big gun for 31 years" [BROADCAST ADVISING, July 31]. It is greatly appreciated.—Robert Werden, Publicity Manager, U. S. Borax, Los Angeles.

Editorials reader
EDITOR: ... I want to express my gratitude for the many fine articles you have published—all so fair, so down to earth and so true. The one "Which Collins comments d'ya read" [GOVERNMENT, Aug. 7] was especially fine. I celebrated my 25th year in radio in June 1960 and it would seem to me that with a leader like BROADCASTING radio stations should not only marshal their forces when you suggest it in emergencies, but should
Station on the move in the Market on the move

COMPLETE MOBILITY PUTS FIRST ON THE SPOT!

WTVT ORIGINATES CBS NETWORK PROGRAMS
WTVT originated "The Garry Moore Show" and two "I've Got a Secret" programs at the Florida Citrus Exposition for the CBS Television Network. All three shows were recorded with the ultra-modern facilities provided in WTVT's mobile videotape unit.

KEY WEST, FLORIDA, April 17-21, 1961.
WTVT COVERS CUBAN INVASION
Since all communications between Cuba and the United States were cut off during the recent rebel invasion, CBS Television News dispatched WTVT's mobile videotape unit to Key West in order to record news from the Cuban Government television station CMQ in Havana.

WTVT COVERS ALBATROSS SURVIVORS
After the brigantine Albatross sank in the Gulf of Mexico, taking the lives of six of its nineteen crew members, WTVT provided the only live coverage of the arrival of the survivors in Tampa. CBS Television News used the WTVT mobile videotape unit to record the memorable scenes.

WTVT ORIGINATES NBC NETWORK PROGRAMS
The NBC Television Network chose WTVT to originate a portion of their "Here's Hollywood" program in Savannah. One outstanding reason for their choice was WTVT's mobile generator which allows the videotape unit to record while in motion.

FOR QUALITY TAPE PRODUCTION NEARLY EVERYONE TURNS TO

THE WKY TELEVISION SYSTEM, INC. WKY-TV/WKY-RADIO
Oklahoma City. Represented by the Katz Agency

TAMPA-ST. PETERSBURG

BROADCASTING, August 28, 1961
Take TAE and see how to get more sales tonnage in the port of PITTSBURGH, PA.

According to the U. S. Army Engineers, the Port of Pittsburgh handled 6,872,194 tons last year. The greater Pittsburgh marketing area is even bigger when it comes to sales tonnage. Last year retail sales totaled $2,883,162,000. How to tap that market? Buy WTAE. Need proof? Just look at the record. In the past year, 46 major local Pittsburgh advertisers have switched to WTAE. They know the market. They demand sales. You can get more sales for your clients' money on WTAE, too. See your KATZ representative for the story of the overwhelming local and national trend to WTAE in Pittsburgh.

take extra precautions to put their houses in order.

Then, too, there's more truth than poetry to the article, "An open letter to Newton N. Minow" [GOVERNMENT, Aug. 7]. . . —Nat L. Royster, Sales Executive, WJMC Charlotte, Va.

Well-wishers

EDITOR: A belated thanks for the picture and story Broadcasting ran on my appointment to the post of station manager [FATES & FORTUNES, July 31].

If clips have the market value that box tops have, I'd like to send them in for a free subscription. It seems everyone read it in Broadcasting and sent me the clipping. . . —Peter M. Affe, Station Manager, WNBC-TV New York.

Drug Fair story

EDITOR: The article, "Radio has made Drug Fair a 'buy' word" [Broadcast Advertising, Aug. 14] does a fine service for the senior medium.

This case of Drug Fair is by no means an isolated, exceptional success story for radio. There are countless others like it, but all too infrequently do trade publications print such articles. . . . —Lloyd W. Dennis Jr., Vice President and General Manager, WTOP Washington.

EDITOR: Congratulations on the fine article about Drug Fair . . . (and) . . . of the tremendous job that has been done by Kal, Ehrlich & Merrick. . . . WMAI is very proud to have been a part of this success story. —A. M. Oekershausen, Station Manager, WMAI Washingon.

A bouquet for tv

EDITOR: At a time when television stations are getting a lot of bricks, I feel impelled to send a bouquet.

Three years ago my husband and I started a "do-it-yourself" international good will project. We had been in the Far East and saw how rare and expensive were American magazines and how plentiful and cheap were the Russian ones (printed in English and full of lies about us).

I wrote to a newspaper in Indonesia offering their readers contact with Americans who would send them magazines they had enjoyed. I expected about 50 answers. We received about 2,500. It was overwhelming until KNXT (TV) Los Angeles heard about it and arranged to have our story told on one of their programs. The response was quite wonderful . . . Since then we have arranged for over 75,000 Asians to have magazine contacts in America.

Although Mr. Austin Heywood, promotion director of KNXT, has given us every facility of his station, he feels the idea is larger than one station and so we have used all the other stations in town and in various parts of the country TV stations have taken up the message.

Without this help we never would have gotten off the ground. . . . —Sophie Meyers, Volunteer Chairman, Magazines for Asians, Los Angeles.

Real first radio code

EDITOR: As the Greeks used to say, "Even Homer nods once in a while."

So many people refer to Broadcasting as the gospel truth, I thought I would call to your attention one of the few mistakes [CLOSED CIRCUIT, July 31] I have ever seen in your magazine.

The first code was drafted in March 1939 and presented to the NAB at Atlantic City in July or August 1939. It was adopted in spite of Ed Craney (then KGIR Butte, Mont.) and his mimeograph machine. The committee was: Edgar Bill (now deceased; former president, WMBD Peoria); Walter Damm (now retired, formerly WTJW Milwaukee); John Elmer (president, WCAM Baltimore); Edward Klauber (now deceased, former executive vice president, CBS); Niles Trammell (former president, NBC, now president, WCKT (TV)-WCKR Miami); Neville Miller, chairman (former president, NAB), and Edward Kirby, secretary (now director of public relations, USO New York).

Bob Swezey was not active in NAB affairs in those days.

Your inexperienced newsmen were not born back then so there is no reason why they should know.—Neville Miller, Esq., Centerville, Mass. (vacationing).

(W. Miller refers to the item's mention of Robert D. Swezey's chairmanship of the committee which drafted the "first" radio code in 1947. Technically, Mr. Miller is correct. The first code, described by Mr. Miller, had fallen into disuse by the time the 1947 code was adopted.)

Wanted: good manners

EDITOR: Are everyday common manners entirely lacking among broadcasting station executives? For months I have been trying to find work in radio, but although I have ability and training and even some experience, no one is willing to give me a chance. Even worse, most stations ignore letters of application without so much as an acknowledgement. Those that request tapes never return them, nor even acknowledge receipt.

I feel that these people do not realize the bad impression they make on those aspiring to employment in the industry, nor do they realize how they are contributing to the discouragement of possible future hopefuls.—Paul A. Daly, New Haven, Conn.
Take TAE and see how to get more sales tonnage in the port of PITTSBURGH, PA.
‘Television can and is doing the job’

Criticism is the endeavor to find the best—GEORGE SAINTSBURY.

Can anyone truly say that this definition is being applied to the critique of television programming today?

As Mark Antony said in his oration to Caesar, “The good is oft interred.” It’s happened to TV, too.

Television occasionally inspires the “noblest instincts” in its diversified practitioners, from the ablest of admen to the most vocal of broadcasters. Rarely, however, is there a consistency in their accolades. Why not?

Look at Record • For some strange reason, I have not been able to find anyone inclined to research and recount the really good television fare which has been exposed to the American public during recent years.

It would certainly be revealing if broadcasters, both station and network, were to document the superlative educational and entertainment accomplishments since the genesis of commercials in the U.S.

The job, however, would probably be so time-consuming and the lists in each program category so lengthy that it would be impossible to truly represent the medium’s performance. Television should be interested in its accomplishments and should use its own medium to tell the world about it.

During this period of TV’s history the American public has seen firsts of all kinds: glowing historical documentaries; widely diversified educational programs by entire series; beautiful, sensitive, emotionally-stimulating dramatic endeavors; laugh-evoking, tension-relieving comedy sequences, and on and on.

These have been composed of contributions on the part of the many parties that comprise the teams of sponsors, producers, actors, technicians, broadcasters, agencies, all those who really are sincerely dedicated to continue to provide and constantly improve the video fare which has become such an important part of the American way of life.

Critics and ‘Critics’ • Do not misunderstand me. I have no dispute with those who earn their daily beans as professional critics, though a good number of this group are rarely successful “crystal-ballers”; more often they are “hindsight-Hindus.”

I refer primarily to the non-professional critic “who decries but knows not why.” Take some politicians for example—not necessarily typical of most of the dedicated men who are earnestly striving to lead us somewhere in this day of uncertainty—but the ones who know the tricks of exploitation of public opinion. They know well that a caustic comment today regarding alleged abuses in TV—violence, sex, blue material, etc.—will evoke the same public reaction that their predecessors were able to arouse by crying “for shame” at Hollywood and its sinful ways during moviedom’s heyday.

We might also examine the motives of certain proudful individuals associated with our own fine industry. Let’s take certain producers for example, those whose fur may have been ruffled by a network or station, or group of stations or sponsor or advertising agency. They may become vocal, quite articulate and convicining “Don Quixote,” zealously testifying before a congressional committee, purportedly in the public interest but really airing a personal grudge. Move them back to their former pinnacle and they would abhor the thought of such criticism.

Next we find well-known talent who have lost their sponsors and ratings. They sometimes are willing to vilify the industry’s methods and policies without taking into consideration the many complexities of program scheduling and the overwhelming desire of the broadcaster to give his public the best balance of programs possible.

The Inside Job • Then there’s the occasional disgruntled ex-broadcaster who is grudging his own bludgeon. He points to what he thinks are the Machiavellian motivations behind program plans and decisions of the different broadcasting interests. And last, but equally as opportunistic, is the professional advertising man who decries, sometimes from the hallowed halls of the client.

In the main, I think the various mass media strive manfully to adhere to the American principle of fair play. But there is room for improvement.

Why don’t all truly representative media band together for a common goal: to establish a better understanding among ourselves so that we might better convey to the public a clearer representation of our culture, not only via entertainment, but via news, public affairs, education, etc.?

To this end, why not establish a so-called “National Inter-Communications Committee?” It could function as an added arm of public service in this critical time, supported by all media and composed of leaders from each area of endeavor. There can be competition and still be cooperation.

Sell the Positive • Despite the loud wails of questionably-motivated critics, who is there who can say that TV has not already contributed tremendously towards elevating our cultural level? It would be impossible to list here every program from every station and network which in some way has contributed to the public welfare during the past ten years. And by welfare, I define the word not only in an educational and informative vein, but as an entertainment contribution as well.

Television can and is doing the job.

So let’s talk about the good it has done and is doing. Let’s give it the opportunity to do more good by providing it with the tools to do so. Let’s keep government controls to a minimum. The glaring light of public opinion and the alertness of American journalists are the best controls we have.

Broadcasters’ sincere dedication is the best assurance of improvement.

Let’s not apologize. Let’s weigh what we are getting in qualitative video fare against that of the rest of the world and, unlike Mark Antony, say, “Bury the evil and brag about the good.”
News with emphasis on local and regional events. News in depth where news occurs. News with reach across 36 Kentucky and a full 50 Tennessee counties, plus the northern rim of Alabama and a slice of Illinois. Way ahead with all the news that's fit to see. That's WLAC-TV, winner of 4 out of 5 top area news awards in the past 4 years.

Way ahead with news feeds to the network, too. © of course.
Pardon Us... We're on the Grow!

A hole in the ground, a super-structure climbing skyward, new expressway complexes, ribbon cutting ceremonies... these are familiar scenes in Kansas City today. Not since early days has the Kansas City skyline undergone such vast alterations. In the Country Club Plaza alone, five new luxury apartment buildings are currently under construction. This is the largest building volume of its kind at any one time in Kansas City history.

Now, let's take a broader look at the market, from Sales Management's projections for metropolitan Kansas City in 1961:

WILL '62 CARS BE RADIO-TV ACTIVE?

- Acceptance of new models will determine broadcasting volume
- Automakers feel total sales may exceed 1961 by 1.5 million
- Strike threat tends to hold advance radio-tv contracts down

The 1962 model year for U.S. auto makers—starting off unusually early with a fast parade of introductions led by Pontiac and Tempest Sept. 21—may turn out to be one of broadcasting’s brightest in automotive revenues.

This is the long-range view of the optimists among Detroit’s auto and advertising authorities. It is based on expectations of passenger car sales of 7 million units or more, a healthy jump over 1961’s poor showing of only 5.4 million cars.

Routine Buying • For the moment, however, broadcast buying by the auto brands is conservative and routine. This follows the industry’s classic pattern of budgeting on the basis of current sales, with increased spending to come only after new sales catch fire and a small portion is ploughed back to stimulate the sales curve higher. For this reason, automotive billing increases in both spot and network are not expected until later in the fall and after the first of the year.

The auto makers’ long-range view is premised on the theory that there will be no long strike by labor when contracts expire Thursday night and that the Berlin dispute will be contained.

Here is the short-range look at the auto picture:

- Detroit is openly bullish about the sales potential of the new car offerings. Public introductions of the brand regulars have been advanced a week or more over last year. Introductions of the new “senior compacts” next month and various luxury-sports models and the new “compact compact” cars later are calculated to stimulate keen interest early on the part of the consumer and sustain and renew that interest during the year. The chief communicator: Advertising.

Safety Features • Most lines of cars this year will get only exterior trim changes and chief emphasis apart from style apparently will be placed on maintenance-free operation and safety features. The European look will be stronger in some lines.

With the enlarged range of compact offerings and the luxury-sports model or “personal” car trend, Detroit’s fundamental marketing strategy seems to be to have something attractive in style or price for almost anyone who is in the slightest buying mood.

Last week Detroit production lines were turning out new models at top speed to stock dealers’ showrooms for the early announcement dates set this year by nearly all companies. Here’s a view of new Plymouths undergoing final inspection as they come off the line at the company's huge assembly plant in the motor city.
Present radio and television plans of major motor companies for 1962

Here's a company-by-company summary of the present broadcast plans of the major auto brands:

**American Motors Co.**  The first to be successful with the compact, American this season will get even heavier competition from the big three of Detroit than it has in the past two model years. As a result it is expected to review its strategy and launch a counter-offensive. Factory sources reported Rambler is negotiating for additional newcasts on ABC Radio to augment its six-year renewal of participations on weekend Monitor on NBC Radio. Television spot and tv network participations also are being weighed carefully. They have been used before. Rambler already has ordered participations during October on the new CBS-TV Frontier Circus. Geyer, Morey, Maden & Ballard, New York, is agency. Rambler and Ambassador dealers also have been users of radio-tv on the local scene.

**Checker Motors Corp.**  The CAB maker that now is in the consumer market with its Checker Superba and Marathon models is getting its taste of broadcast success as a result of dealer use of radio in Cleveland. Checker Universal Sales, Cleveland, has been using local stations for about three months and response has been good, according to the firm's Chicago agency, Herbert Baker Adv. Checker is considering a tv test in Miami.

**Chrysler Corp.** Under the new presidency of 42-year-old Lynn A. Townsend, the No. 3 of Detroit's big three is working hard to get into battle trim for the fall marketing season after a poor 1961 showing. All Chrysler Corp. models will bow Sept. 29 with exposure on World Series coverage by the NBC radio and tv networks. The World Series buy is part of a $3.5 million sports package which Chrysler picked up after it was dropped by General Motors. It is a co-sponsorship with Gillette. Other parts include all-star baseball games, Blue-Grey, Sugar Bowl and Rose Bowl football games. Chrysler's corporate agency is Leo Burnett Co.

Because of the internal reorganization, a lot of the company's advertising plans may be delayed. Some of the major buys in network tv won't be settled until after the first of the year when a healthy $6 million more is expected to be invested in tv to give Chrysler's sales curve a boost. The company's car divisions, especially Plymouth and Dodge, have been heavy radio users too. Under the new corporate organization, the Plymouth-Valiant division has been merged into the Chrysler division, leaving the company with but two, Chrysler-Plymouth and Dodge.

Plymouth dropped the CBS-TV Garry Moore Show and Dodge gave up ABC-TV Lawrence Welk after many years, feeling the selling impact had worn thin. N. W. Ayer, Philadelphia, has ordered radio spot for Plymouth-Valiant in about 50 markets for three weeks around Sept. 29 announcement time plus another two weeks in November. No tv is planned. Dodge-Dart, through BBDO, plans no radio spot but will use tv ID spots for two weeks around Sept. 29 in possibly 100 markets although it may use only 40 or 50. In previous years Chrysler has spent as much as $4.2 million in national radio spot. Last year the firm spent almost $9 million in tv, all in network except for about $320,000 spent for tv spot.

**Ford Motor Co.**  National billings of this auto major go heavily into network tv, about $1 million worth, with some radio spot. The rest of the spot advertising in both radio and tv is bought by the highly-organized Ford dealer advertising fund and by the Lin-
Making advertising plans to sell an estimated seven million cars next season is keeping Detroit executives busy. At left W. E. Hazard (l), tv and radio director of the Detroit office of J. Walter Thompson talks with John R. Bowers, car advertising manager, Ford Division of Ford. In right photograph Carl Uren (r.) Chevrolet's assistant advertising manager, reviews billing figures with Colin Campbell, executive vice president of Campbell-Ewald Co., Detroit, Chevrolet's agency, General Motors Chevrolet division last year spent $8 million in tv.

War II scarcity. Another view, based wholly on the premise of prosperity, cites the growing proportion of American families who now own two cars, hence a good second-car market.

Another good omen for a rising auto market is the improved auto credit picture. For the past two months the volume of auto credit has continued to increase after a seven-month decline.

- Last but not least, the Detroit experts point out that as far as radio-tv or any advertising is concerned, budgeting is based on previous sale and not expectation. This accounts for the current conservatism, they note, and supports the long-range prospect. If the new cars catch on, budgets will blossom and so will broadcast billings.

While Detroit still may be basically print-oriented many dealers and their

col-Mercury dealer groups. They spend some $7 million in radio alone. J. Walter Thompson Co. represents the Ford Car Division and the Ford Dealer Fund while Kenyon & Eckhardt places for Lincoln-Mercury Division, the L-M dealer account and the Ford corporate institutional account.

Ford institutional has renewed its previous buys of Leonard Bernstein and the New York Philharmonic on CBS-TV and this season will present three Bernstein specials on dates to be set. Ford division (Ford, Falcon, Fairlane, Thunderbird) has renewed quarter sponsorship of NBC-TV Wagon Train, dropped NBC-TV's Ernie Ford and picked up new NBC-TV's Hazel, a Screen Gems package based on the Saturday Evening Post cartoon character. Ford also is quarter sponsor of the National Football League tv package. Both Ford and Ford Tractor are Keystone sponsors.

Lincoln-Mercury Division (Comet, Mercury, Meteor, Continental) has renewed NBC-TV Alfred Hitchcock Presents and is shopping for an alternate sponsor. If it finds one, the budget saving is to go into spot or network specials, according to agency sources.

Station representatives in New York were a bit confused last week as to just what the Ford division plans to do in spot. JWT asked for availability for Ford division for a five-week campaign in radio running mid-September through October, to be selected on a market by market basis, but plans were still up in the air at the end of the week. K&E sent out tv spot availability inquiries for Lincoln-Mercury but then recalled them. K&E said it has plans but isn't quite ready to disclose them.

General Motors Corp. • The nation's No. 1 advertiser in total media billings, GM this year will again place more national broadcast business through its five car divisions than any other auto maker. Only Ford comes close. GM will spend nearly $25 million in tv, mostly network, plus several million in radio network and spot. All GM dealer groups are heavy spenders in broadcast, especially Chevrolet.

At the network level this year in tv, GM expects to use another Danny Kaye Special on CBS-TV this fall but has dropped its $3.5 million sports package shared with Gillette (picked up by Chrysler) and redistributed the funds to the divisions. D. P. Brother & Co. places GM institutional, but some corporate billings flow through divisional agencies too.

Among division network tv plans, Buick (Buick and Special) instead of Bob Hope will Sing Along with Mitch on NBC-TV, placing through McCann-Erickson. Oldsmobile (Oldsmobile and F-85) has dropped Hawaiian Eye and Michael Shayne for CBS-TV's Garry Moore Show which Plymouth gave up at season's end. Olds' agency is D. P. Brother. Pontiac (Pontiac and Temp- est) continues with ABC-TV's Surfside Six through MacManus, John & Adams. Chevrolet (Chevrolet, Corvair, Chevy 11) tears itself away from NBC-TV's Dinah Shore to find new fortunes in the Bonanza color hour on the same network. Chevrolet, through Campbell-Ewald, also continues with Route 66 on CBS-TV and My Three Sons on ABC-TV.

Radio network by GM divisions includes the full 1,100-station network of Keystone. It also has renewed heavy news schedules on both CBS (Lowell Thomas) and NBC. Cadillac through MacManus, John & Adams has bought 335 Keystone stations for the showroom introduction period. Oldsmobile uses Keystone all year but varies the market list.

Television spot business for GM cars
WILL '62 CARS BE RADIO-TV

group associations are very heavy broadcast advertisers and except for the recent recession are the principal local accounts for most stations, both radio and tv. If the 1962 cars sell, dealer buying will expand too and just how much local stations get will depend on how aggressively they go after it.

Broadcasting Busy • National Broadcaster groups will not be idle on the sidelines this fall just waiting for fortune to take her course. They are going to fight harder for a bigger share of the Detroit auto dollar.

The Station Representatives Assn. has organized a new Detroit Chapter and two major spot presentations are planned, one for radio and another for tv.

The Radio Advertising Bureau is continuing its company-by-company campaign of personal presentations and will step up dealer level pitches before introductions in the next few weeks.

Television Bureau of Advertising has scheduled its annual meeting for Detroit this year, Nov. 15-17, and expects otherwise-hard-to-see auto chieftains will turn out to listen to speakers such as John Hay Whitney, whose interests include the Cornithian group of radio-tv stations and the New York Herald Tribune.

Other Problems • But advertising campaigns and their planning are only a part of Detroit's basic problem. With a product to move each year that values out to perhaps $14 billion at wholesale, Detroit's concern about how to spend nearly $250 million in advertising hinges almost entirely on the strategy of a total-marketing concept, this year perhaps more than ever. For 1962 the total-market strategy appears to be to offer Mr. & Mrs. Consumer the most complete price-and-style choice possible within each car line.

Chevrolet is no longer competing just with Ford or Plymouth. Its expanded and diversified range of compact and standard models is competing with itself. Or rather, as auto observers feel, it is expanding its sales opportunity by keeping the prospect and his choice within the Chevy family and preventing him from wandering afield to shop another company's line or to another General Motors division for that matter.

As a result, 1962 may be remembered best for the battle of the compacts. Virtually every standard label in the industry will have its compact cousin this year.

Compact Fairlane • Ford Motor will introduce the senior compact Fairlane between the compact Falcon and the standard Ford. Ford also will have the Meteor to slide in between the Comet and Mercury. GM's new senior compact, first dubbed the Corsair, then called the Nova and now Chevy II to avoid confusion with the compact Corvair, will go in between the Corvair and Chevrolet.

Ford also will come out sometime during the season with a "compact compact" called the Cardinal to compete with Volkswagen and the other "small smalls." But Ford has been having trouble getting its tooling dies made in Europe (Ford plans to make foreign versions of the Cardinal abroad for those markets) and has shifted its orders to U.S. diemakers. Ford could be forced to delay introduction until the 1963 model year.

Detroitors feel that whenever Ford's little car markets and finds any acceptance, GM won't be far behind with its junior version and a prototype has been reported on the proving ground.

Beat the Imports • Auto men are confident the U. S. compacts will continue to beat off the foreign competition. They feel that the strongest selling point for American compacts is the vast domestic dealer-service organization. And this is the kind of a selling point advertising can best get its teeth into, agency spokesmen say. It's a copy theme that's certainly a lot more understandable to the consumer than attempting to explain to him the differences

Present radio and tv plans of major motor companies continued

will be mostly at the dealer level. Only Oldsmobile is presently buying nationally. Its effort is a limited ID campaign Sept. 20-21 in about 33 markets.

In spot radio the GM buying picture is much brighter. Buick will use 83 markets for a radio spot drive two to three weeks around announcement date and may buy more later. Cadillac is a traditional big spender at introduction time and this year will buy spot on some 1,230 stations for three weeks.

Chevrolet plans a heavy spot drive in 150 markets Sept. 18-Oct. 11 and continues year-round campaigns on a few selected key-market stations.

Oldsmobile's radio spot drive will run Sept. 18-Oct. 7 in 27 markets, according to present plans. Pontiac will use a brief four-day saturation flurry in 80-100 markets around its Sept. 21 announcement date.

International-Harvester • This farm and industrial equipment giant is scoring successfully in spot radio with a quarter-hour dealer co-op program in some 100 markets. Young & Rubicam, Chicago, is agency.

Renault Inc. • This French small car import used the PGA Tournament coverage on CBS-TV this past summer to make a national impression but fall plans have not been set apart from continuing dealer group regional radio buys in major marketing areas such as New England, Chicago and California. Renault made strong impact in radio with its Renault "beep beep" horn. Needham, Louis & Brorby, New York, handles both national account and some regional accounts. National Peugeot account is handled by Papert, Koenig, Lois Inc., New York.

Rootes Motors Inc. • Typical of some of the strong regional use of radio-tv by foreign car importers, the Rootes group on the west coast has budgeted $400,000 for advertising this year of which 40 percent will go into broadcast. Rootes' cars include Hillman, Sunbeam, standard-Triumph and luxury compact Humber.

Studebaker-Packard Corp. • Company officials last week said they were so enthusiastic about the response for the small Lark and the luxury Hawk from the talking horse situation comedy program Mr. Ed that they will co-sponsor the half-hour tv show again this next season. Program moves from NBC-TV to new Sunday 5:30 p.m. time on CBS-TV. Some radio spot also is planned.

Volkswagen of America Inc. • This highly successful German import is considering network television for 1962 as a result of its dealer experience in local radio-tv and the $225,000 national spot tv splurge VW itself placed in 1960-61. The national campaign in tv won agency Doyle Dane Bernbach the New York Art Directors Club special award earlier this year for the VW Karmann Ghia commercial. VW's 16 regional dealer groups are spending about $5 million a year in broadcast. They are especially strong in tv in the greater Los Angeles and San Francisco markets. Doyle Dane Bernbach buys for six of these dealer groups.

Volvo Import Inc. • Sweden's successful import gets an 85 percent share of budget plunked into broadcast this year. About $450,000 is going into radio-tv this year in 21 major markets.

Willys Motors Inc. • This Kaiser industries subsidiary intends to increase its network television spending this fall and is putting 95% of its corporate budget into the medium. Family and sports model jeeps, including four-wheel drive models, have been advertised on ABC-TV, Maverick and Hong Kong this season, will get exposure on the new ABC-TV Follow the Sun this fall. Young & Rubicam places for Kaiser.
Radio listeners will be glad to know that at 9:30 A.M. today WINS, New York's outstanding independent station, joined the Mutual Radio Network. This means the big, wide, wonderful world of WINS will now have a Mutual feeling. WINSland's own Lonny Starr, Jack Lacy, Stan Z. Burns, Murray Kaufman, Les Keiter, Jack Lazare, Jim Gordon, Lou Fisher, Brad Phillips and Paul Sherman now share the air with Mutual's famous news personalities such as Bess Myerson, Tony Marvin, Bill Stern, Westbrook Van Voorhis, Leo Durocher, Fulton Lewis, Jr., Bill Costello and many, many more. Now you'll hear everything when you stay tuned to WINS, 1010.

WINS IS YOUR NO. 1 MEDIA BUY IN THE NO. 1 MARKET IN THE U. S.
WILL '62 CARS BE RADIO-TV ACTIVE? continued

among the cars themselves, they note. The burden on advertising this season will be as great to educate as to sell, Detroit experts say, considering the variety of car brands being offered and the range of custom options possible even after a model choice. Thinking varies on how radio and tv can best meet this challenge. But there does seem to be agreement on the need for sound evaluation of ratings and a demand for qualitative analysis of audience composition.

For instance, Gail Smith, director of tv advertising for General Motors and former Proctor & Gamble broadcast executive, expresses himself very forcefully when anyone appears to be talking down the importance of ratings. He feels they are basically honest, reasonably accurate and the best tool available that must be used until the industry comes up with something better.

Mr. Smith also is firm about the marketing significance of audience composition apart from rating quantity. He finds it hard, for example, to be sold on using a station with a high income white collar audience for battery spots although he would place new-car business there. Most batteries are bought by blue collar used car owners, he notes, and from his own personal observations this group generally tunes top forty outlets, not quality music stations.

W. D. (Pete) Moore, advertising director of the Dodge division of Chrysler, hopes that media analysts will devote more attention to the specific marketing needs of the manufacturer instead of vague box-car audience figures.

Robert J. Fisher, director of advertising and sales promotion, Ford Motor Co.'s central office at Dearborn, is aware of how much the increased model diversification "increases the necessity for reaching all degrees of public taste and demand with clarity." He said it requires "sharp commercial focus for clearly positioning each of our entries in the market place. We think we have met the issue, at least in part, by diversifying our television programming and increasing the frequency of our commercials."

Richard E. Forbes, director of corporate advertising for Chrysler, said his company is meeting the diversification challenge by introducing all lines at the same time Sept. 29. Chrysler is co-sponsoring with Gillette the NBC radio and tv network coverage of the World Series. He felt this big splash technique "will be most effective in registering a brand awareness of Chrysler Corp.'s" and in getting prospective customers into showrooms to inspect them.

26 American lines include 400 models

MOST NEW CARS WILL BE UNVEILED THIS YEAR IN LATE SEPTEMBER

More than 400 models of some 26 brands of American-made passenger cars will be fighting for consumer attention in the marketplace this fall and another couple of dozen models of popular foreign imports will be in there too. Only three years ago there were just 18 American-made brands. Detroit quips that the prospective buyer will need a scorecard to know what he is shopping for this season. But it's no joke to the time salesman working overtime to get his share of the automotive billing. In the next few weeks he's expected to brighten up the luncheon chatter with a prospective auto account by rattling off authoritatively his instant knowledge of each new entry, every styling change and all the key selling features of the 1962 line.

Top Secret • It's not easy when Detroit traditionally clutches such highly competitive secrets close to its corporate bosom right up to announcement date. Agencies servicing the accounts often are kept in the dark on key model data and timing of introductions until the last possible moment. Based on the best information available in late August, here's a checklist of the principal models, their corporate genesis, the announcement dates (in parentheses) set or predicted for showroom unveiling to the public and a brief summary of what the experts guess will be done to the cars this year:

New compact compact car

Cardinal • (Late 1961 at earliest; probably not until spring 1962 and possibly not until 1963 model line comes out in fall of 1962). Ford Motor Co. has been having trouble in getting its tooling orders filled abroad and has shifted to American diemakers. Ford's new little car is slated to fight Volkswagen in both size and price. Front-wheel drive, V-4 engine up front, 97½ inch wheelbase. Ford will produce the Cardinal in U. S. and at its plant in Cologne, Germany, for import to U. S. and export to world market. Ford also will make a Cardinal at its plant in

England for sale there. Working name is Archbishop. Still another version for sale in Germany is dubbed Monsignor.

Note—Auto circles are confident General Motors' Chevrolet division won't be caught napping if Ford's Cardinal catches on and will be in market too with its version of a compact compact. GM is said to be proving out a small four-cylinder front-wheel drive prototype now.

Compact cars

Corvair • (Introduction date Sept. 29). GM Chevrolet division's original 1960 entry into the compact field broke U.S. tradition with its rear-end flat engine, rear-mounted transmission and individually sprung rear wheels. Has been second in sales only to Ford's Falcon in its field. Luxury-sport model Monza with bucket seats, introduced last May, has been surprisingly popular. Biggest news for 1962 is line of convertibles, including one hand-operated job with low price tag, but the soft-top may not be introduced until next spring. Otherwise Corvair will look much the same except for front-end cosmetics.

Falcon • (Sept. 28). Sales leader in its field, Ford Motor Co.'s compact was a record-breaker in its initial introduction year 1960. Ford too has been trying out convertible models for Falcon and might spring them this fall. Bold front-end changes hinting of Thunderbird are predicted, plus some of the low-maintenance features of the standard 1961 Fords.

Lark • (Sept. 22). Studebaker-Packard's compact is expected to get rid of its stubby look this year by minor styling changes that include a front-end hint of Mercedes-Benz, the foreign-import which S-P markets here, and an overall continental look. Lark also will have a fully-instrumented dashboard, hot selling point of the company's luxury Hawk, plus semi-bucket seats.

Rambler American • (late in first week of October). American Motors' President George Romney last year said not to expect any major changes in the American for three seasons. So the exterior look won't change much for 1962 except for modification of the much-criticized square-screen grille. Interior passenger convenience improvements are expected (seating, driver vision, luggage room, weather conditioning) plus a new optional automatic clutch.

Valiant • (Sept. 29). Although the compact cousin of Plymouth, this sporty Chrysler Corp. car has been noted for its high-styling relation to the luxury Chrysler 300 line. For 1962, Valiant's third year, it will be even more so styled and overall very European. Full panel instrumentation is planned. Sturdy slant-six engine will be retained, although it may go aluminum.

Large compacts

Buick Special • (Sept. 27). General Motors Buick division's Special is not to be confused with pre-1958 Buicks of that name, it was a new entry last year as a compact. Although GM doesn't like to call it a compact, the trade does; its overall length is under 200 inches. For a look today at the 1962 Special, the experts say go to the nearest dealer and examine the Skylark, the luxury version introduced several months ago and which for 1962 will get a facelifting. The new Special will also offer a new cast iron V-6 engine. Last year's aluminum V-8 continues as optional. Convertible models are due this fall too, including low-priced manual. GM seems intent on making the Special a hot contender as the low-price utility family car, thereby possibly making up some of its losses on its big cars.

Comet • (Sept. 29). Ford Motor Co.'s Lincoln-Mercury division for a long time appeared to be hiding the fact the Comet was the Mercury compact, but this fall it will be clearly called the Mercury Comet, according to informed sources. Minor style changes are in store, including more distinctive grille. Comet has been popular ever since its midseason introduction on St. Patrick's Day 1960, so any future major innovations could come in that manner as a Ford strategy to renew consumer interest later in the usual model year, but this is trade speculation.

Lancer • (Sept. 29). This Chrysler Corp. Dodge compact, sort of a luxury Valiant, suffered some during its introductory period last year because of lack of consumer identification with Dodge, but the tie-in will be much stronger this season. Changes will be limited to new front-end sparkle and more luxurious interiors, including semi-bucket seats up front. All new instrument panel is planned, plus lube-free suspension feature of big Dodge. Lancer sport coupe hardtop offering may give sporty Corvair Monza run for its money.

Lark Cruiser • (Sept. 22). This not-so-compact compact is Studebaker-Packard's luxury version of the smaller Lark. It offers a range of luxury options. Not much change is expected for 1962 apart from following facelifting trend of the Lark toward the continental.

Olds F-85 (Sept. 22). Going into its second year, the F-85 will be the top luxury compact of the General Motors family. Only minor trim changes are predicted, although the sporty Cutlass version introduced last April will possibly get increased emphasis. The F-85 Cutlass, according to reports, may get an exhaust-driven turbo-supercharger to hop its V-8 engine up to nearly 250 horsepower, plus the Borg-Warner four-
John Davenport, WFAA-820's own Aerospace Reporter was sent to Cape Canaveral to cover our astronauts' historic space rides. Within minutes after the network reports, Davenport was giving a Texan's "eye witness account" that delved into many interesting aspects not heretofore reported. But that's the way "Southwest Central" covers the news...specialists for special stories, and on-the-spot whenever possible.

It is just another reason why more of the great news-conscious public stay with WFAA-820 all day! In most instances there are 3 to 4 special reports hourly, in addition to regularly scheduled newscasts. Just imagine what such an audience could mean to you!
speed transmission now featured in the Corvette.

Rambler Classic • (late in first week of October). Major front and rear-end styling changes are in prospect for this American Motors’ car and all semblance of tailfins is gone. Roof style will be sculptured too. New automatic transmission and stronger suspension system to improve the ride also are reported.

Tempest • (Sept. 21). You will have to look at the grille to distinguish between the 1961 Tempest and its new 1962 version. That’s about the most distinctive change in this General Motors Pontiac compact introduced last year and featuring unique four-cylinder front engine with rear transmission. Plushy deluxe convertible called the LeMans will be added to the line. New six cylinder and V-8 engine options are understood in the works but these may not be ready until 1963.

New senior compacts

Chevy II • (Sept. 29). This new General Motors’ car, to be available in a range of models, will fall between the compact Corvair and the new standard Chevrolet Biscayne. It will not be a radical design. Instead it will be quite conservative with soft rounded lines and a front end that looks much like the 1957 Ford. It will have only two headlights, vertical rectangular tail lights. The name has gone through an evolution from Corsair, dropped because of possible confusion with Corvair, to Nova to Chevy II and Chev II. Wheelbase estimates range from 110 inches to 115 inches but overall length of 190 inches appears consistent. Weight: about 2,800 pounds. With comparative extra height and interior spaciousness the total image impact will be similar to that of the 1949-50 Fords and Chevys. New engines will be straight four and six cylinder jobs with a small V-8 possible power option. Major innovation will be a single-leaf spring for rear suspension. A top-of-the-line luxury sport model Chevy II is expected to be brought out later as General Motors’ answer to Ford’s personal Thunderbird.

Fairlane • (Sept. 28). Ford Motor Co.’s senior compact entry into the family-utility market will drop in between the compact Falcon and standard Ford Galaxie. Reports are that the new Fairlane, on 115-inch wheelbase, bears a strong affinity for the present Comet. Although styling is conservative, lines of the Fairlane also are said to resemble pioneer Thunderbird look. Engines expected are the 170-cubic-inch six now optional on Falcon and Comet plus a new lightweight 221-cubic-inch cast iron V-8. Both standard and automatic transmissions will be available. Overall size and weight are expected to be just a bit more than Chevy II, but initially it is believed Fairlane’s model diversification will be less than its GM counterpart.

Meteor • (Nov. 20, earlier if possible). This is the senior-compact for Mer-
NEVER!

Never . . . never . . . never . . . do you hear that kind of music on WJR.

You don't hear gimmick contests, noisy announcers or singing, swinging station breaks, either.

You hear Complete-Range Programming.

Pleasant music—live and recorded, classical and pops, show tunes, folk tunes, choral.

Nine 15-minute newscasts daily, news analyses, discussions, editorials.

Complete sports coverage—two 15-minute sportscasts every day, interviews, play-by-play of Tiger night baseball, college and professional football.

And there's humor, variety, women's programs, farm news, fine arts and . . . well, the list could go on and on.

On WJR you hear programming that, in the mass, appeals to a lot more people. People who buy soap and soup, and new cars and used cars, and pianos and grass seed. All kinds of people with definite ideas about what constitutes good radio.

That's why they listen to WJR. That's why they'll listen and respond to your advertising message on WJR. That's why you'd be wise to make WJR your medium in the Great Lakes area.

**WJR**

**DETOIT**

760 KC  50,000 WATTS

Atlanta • Boston • Chicago • Detroit • Los Angeles

New York • San Francisco

Rock 'n' roll on WJR—never in a million years!
ing packing and possibly permanent coolant. Wide range of engine power options are reported for the 1962 Ford, including a four-speed manual transmission and a big 400-plus horsepower engine.

**Plymouth** (Sept. 29). Because of slow 1961 sales for this standard, Chrysler Corp. reportedly is gambling on a major style change, whittling Plymouth down to a trim Valiant-European look on a 116-inch wheelbase. The all-new car (except engines) will feature a concave mesh grille with a new set of twin headlights seated in deep chrome wells. Engine choices will be the well-established 225-cubic inch slant six, 318-cubic inch V-8 and big 361-cubic inch V-8.

**Medium-price cars**

**Ambassador** (first week of October). Top end of American Motors' Rambler family will be redesigned for 1962 on a shorter wheelbase of 108 inches (formerly 117 inches), same as the Rambler Classic, but it will be longer overall as a result of styling. The Ambassador in a sense becomes a deluxe compact. With the same big 327-cubic inch V-8 engine in the lighter car, the experts predict the Ambassador will become a "hotter" performer popular with the drag strip crowd.

**Buick** (Sept. 27). This basic General Motors line will get only minor changes this year in style (grille and tail variations, bit more chrome) plus some small mechanical innovations. Electra 225 becomes the basic long wheelbase series, four V-8 engines available up to 401-cubic inch 325 horsepower plant.

**Chrysler** (Sept. 29). Conservative styling but with plenty of power seems to be the emphasis for 1962. Tailfins are gone. Front end is almost unchanged. Chrysler's low-end Newport series, some models selling under $3,000, have been strong sellers during the past year and should be pushed even harder this next year. Entirely new lower-priced 300 series will be introduced as replacement for Windsor line between Newport and more luxurious New Yorker, but the big performance 300-H series at the top of the line also continues.

**Dodge Polara** (Sept. 29). This Chrysler Corp. luxury version of the big Dodge is moving out of the medium-price category and becoming a personal luxury car that can compete in the Thunderbird field. In fact its new side profile is said to have the T-bird flair although the "wild" front end will be much like the 1962 Dart, Dodge's compact. Polara will have a 116-inch wheelbase, same as Dart and Plymouth. Polara power plant will be souped up version of Dodge's big 361-cubic inch engine.

**DeSoto** (Sept. 29). Believe it or not, this now-deceased Chrysler Corp. car is rumored about to be reborn as the name for a new line of Chrysler cars being developed under top secrecy.

**Mercury** (first week of October). With its compact Comet and new senior compact Meteor in the market this year, Ford Motor Co.'s Mercury will undergo only slight exterior styling variations this year on its basic 120-inch Monterey wheelbase. Mercury is reported in many respects becoming a glorified Ford, sharing basic Ford chassis and body shell and adding exterior Mercury trim. Last year Mercury assembly was moved onto Ford lines. In 1962 Mercury line cantoned fins are gone. Three big V-8 engines are available, plus the six cylinder plant introduced last year.

**Oldsmobile** (Sept. 22). With its smaller F-85 making a dent in the economy minded portion of its market, GM's Oldsmobile can't look anywhere but up. That's just where it is going in 1962 with sporty roof contours in the 88 and 98 series plus new squared-off Fisher bodies which are a cross between the fully unitized body and the separate frame-body construction. Difference is that the frame will be welded instead of bolted to the body during assembly. Dramatic new grille design is expected and major mechanical changes are reported for Olds this year.

**Pontiac** (Sept. 21). Recent sales improvement in the younger market for this General Motors car is said to have spurred Pontiac designers to push even emphasis on power and performance with a new 428-cubic inch engine. No radical exterior style changes are expected other than a new grille pattern that may be an attention-getter. It's said to be a horizontal-chrome bar version of the oval Edsel design. A new plush Grand Prix hardtop model is expected to be a competitor in the sports-luxury class.

**High-price cars**

**Cadillac** (Sept. 22). The experts had a hard time agreeing on what will happen to the image of General Motors' top luxury car when it is unveiled just a few weeks from now. One school had predicted extensive engineering changes and another saw only minor exterior fact lifting for 1962. Most accurate guessers appear to be the latter. A super-luxury Brougham type model is expected in the line.

**Continental** (Sept. 27). Unlike Cadillac speculation, there seems to be more agreement that few changes over the basic 1961 style will be made in the top luxury offering of Ford Motor. Continental's unusual 24,000-mile warranty and well-promoted handcrafted assembly and testing procedure appear to be winning sales in the quality class.

**Corvette** (early October). There has been some speculation that the new sports-luxury model at the top end of the new senior compact Chevy II might replace Chevrolet's Corvette, but it's not expected for the present. Some features of the Corvette are being introduced in the new Chevy II sportster. For the time being Corvette will introduce only minor cosmetic change in its fiberglass body but a big new V-8 engine. The basic 361-cubic inch V-8 engine will top the present line of five power plants. Horsepower range now runs from 230 to 315 with the present engines.

**Hawk** (mid-October). Studebaker-Packard believes it may have the surprise car of the year with its completely redesigned semi-sport coupe. Described in the trade as a "Continental Thunderbird" with tail end that looks like the European Lancia, the Hawk will continue to feature its fully-instrumented dash and big V-8 engines. Automatic, three-speed manual and four-speed floor mounted manual transmissions also are featured.

**Imperial** (Sept. 29). Top Chrysler Corp. officials believe there will always be people who want a big big luxury car with all the quality refinements possible. So they intend to continue offering them the Imperial even though assembly is being moved onto regular Chrysler lines for economy. Separate body frame construction will be continued however, despite fact other Chrysler lines employ unit construction.

**Thunderbird** (Sept. 29). Last year's major style change in this highly successful personal luxury car by Ford Motor Co. will undergo only slight alteration for 1962. Slight grille and trim switches and that's about it. Plans to convert to front-wheel drive apparently have been postponed.

**Other cars**

International Harvester's new multipurpose family Scout, Willys' family and sports model Jeeps and Checker Motor Co.'s Checker passenger cars are increasing their bids for the consumer market this year. There also are the "affiliated imports" of the American companies: Anglia (Ford), Mercedes-Benz (Studebaker-Packard), Metropolitan (Rambler), Opel (Buick), Simca (Dodge-Dart), Taunus (Lincoln-Mercury) and Vauxhall (Pontiac). Leading imports: Volkswagen, Renault, Volvo, Triumph, Hillman, Sunbeam, Singer, Fiat, Saab, Morris, Austin, Toyota, Porsche, Jaguar, Borgward, Rolls Royce, Alfa-Romeo, Morgan, BMW, NSU Prinz, MG.
WHERE'S GEORGE?

Three name droppers lunch at the Three Seasons. Each orders the same thing, paying $10 apiece in advance. After lunch, however, they complain that the chilled artichoke hearts stuffed with blanched truffle whip were rather tepid. The maître d' cuts the check to $25, sends the waiter back with a $5 refund.

The waiter, fearing he might not get a tip after the truffle rebuffal, gives each man only $1 and pockets the other $2. Thus each man has paid $9, making a total of $27. Add this to the waiter’s $2, and the grand total is only $29. What happened to the other dollar?*

If you can explain this money dilemma, we'll send you an exciting new prize. We're offering several so tell us what you've already won.

*If number dropping has you confused, check ARB, which stoutly maintains WMAL-TV is first in the Washington, D.C. market, 6 PM - Midnight, Monday - Friday. (June '61)

2Announced figures only. League's official paid attendance.
3Denotes league champion.

**PLAYOFF DATA:** Rights to the National Football League championship game and Runnersup Bowl (second place finishers in East and West Divs.) were purchased by NBC-TV earlier this year for $1.23 million, divided over two years. NBC-TV also has rights to the Pro Bowl Game estimated at about $400,000. Rights to the American Football League championship game are included in its package with ABC-TV.
Football gets $12 million from radio-tv
SPONSORS SPEND $20 MILLION FOR RIGHTS TO PRO, COLLEGE GAMES

Football, which recently saw one of its most electrifying financial plays (the NFL-CBS $9.3 million package deal) nullified because of a downfield penalty (violation of the antitrust laws), still figures to make 1961 a banner financial year. But the banner won’t be flying as high as some had hoped and others expected.

Payment for radio-tv rights in 1961 amounts to an estimated $12 million in football team coffers with advertisers shelling out about $20 million to pick up the tab.

Broadcasting will parcel out to the National League some $5 million for its games, including the championship, runner-up and all-star games; miscellaneous highlights and pre and post game shows. The American League brings in about $2 million for similar activities from a smaller schedule (eight teams as compared to 14 in the NFL). (See table, page 40). Also being dealt in for a solid share is the National Collegiate Athletic Assn. (college football) with $3 million and various additional attractions (bowl games, minor leagues, tv specials) dividing about $2 million.

It amounts to an all-time record season, both in rights and in billings, eclipsing both records established last year, but seemingly far off the total anticipated in 1962 when both broadcaster and football officials expect an even higher total.

Judge’s Ruling • The National League’s midsummer night’s dream—each owner fondling a hunk of the $9.3 million pot of gold which was to be provided by CBS—ended abruptly (Broadcasting, July 24) with a federal judge’s ruling slicing the league’s overall television take about $1.2 million in one fell swoop.

The NFL-CBS agreement called for $4,650,000 per season this year and next, with each of the 14 clubs getting about $332,000, a healthy increase for all, save the New York Giants. Last year, it was estimated, the 13 teams averaged about $172,000 for television rights. Green Bay stood to gain the most—about $257,000—but reverting back to last year’s agreement will receive only about $120,000 for combined radio-tv rights, lowest in all pro football.

As one football spokesman put it, “No matter where you turn in that neck of the woods, there’s always the same number of eyes and ears—and not many of each. And that’s what those advertisers are paying for.”

Regional Telecasts • The proposed CBS pact called for the network to televise the NFL’s 98-game schedule on a regional basis with each league city being permitted to view its team on away games only. The blacking out of home games within a 75-mile radius was an idea first formulated by the late Bert Bell, former NFL commissioner, in the early 1950’s when football and television became inseparable partners and the NFL’s yearly attendance began to swell.

The verdict to void the contract, following questioning of its legality by the Justice Dept., came late last month in a decision by Federal Judge Allan K. Grim. “By this agreement” (selling of the pooled television rights in a package), the ruling said, “the member clubs . . . have eliminated competition among themselves in the sale of television rights to their games.

“Clearly, this restricts the individual clubs from determining from which areas the telecasts of their games may be made, since the defendants [the NFL] have by their contract given to CBS the power to determine which games shall be telecast and where.”

1960 Plan • Last year CBS televised the contests of 10 of the 13 teams (Pittsburgh and Baltimore had agreements with NBC and Cleveland with Sports Network Inc.). This year, with all teams reverting to last year’s agreements (most getting slight increases), CBS will telecast some 90 games, including those of the new Minnesota Vikings. The other three contracts remain intact.

Ford Motor Co. (through J. Walter Thompson Co.) spearheads the advertisers with a 25% national purchase on CBS, 25% regional purchases on NBC and Cleveland with Sports Network Inc.). For the 1961, $257,000—true team purchasing, CBS still outpacing its former competitors with its $12 million cash paid to the NFL. But ABC has been more than a financial ally to the American Football League. The network has proved a masterful sales tool for the fledgling loop, selling it to the American public through heavy promotion, new wrinkles and a united effort. Its efforts were successful as AFL ratings climbed noticably during the second half of the season. In 1961, 39 regular season games and the championship tilt will be televised by ABC which will experiment with later starting times for the games.

On 15 Sunday afternoons (Sept. 10 to Dec. 17) two games will be telecast.

Pro football consistently wins high ratings on television. High degree of skill of players, unpredictability of outcome and team loyalty all contribute to winning record audiences for the contests. Satisfied sponsors often stand in line for the privilege of presenting the games.

BROADCASTING, August 28, 1961
ONLY 1 KW AM TRANSMITTER

• FULL ACCESSIBILITY
  All tubes and components accessible through interlocked front and rear doors. No rear or side panels to remove. All components mounted on vertical panels.

• REMOTE CONTROL
  All required meter and control functions terminated at board to the rear. Motors built-in. Relays included for switching crystals, monitoring levels, and power cut-back.

• AUTOMATIC RECYCLING
  Circuit automatically recycles transmitter in event of overload or fault. Assures continuity for remote control operation!

• HEAVY DUTY COMPONENTS
  All components rated well below maximum capability. Modulation transformer designed for distortion-free 30 cycle operation without affecting high frequency response.

FREE INSTALLATION SUPERVISION

No matter how you look at it . . . from its clean-cut exterior styling to the smallest, carefully engineered detail . . . ITA's AM-1000-A offers unique advantages. This 1000 watt transmitter has regulated filament and plate power supplies and uses silicon rectifiers throughout. Single control operation and the need for only three tube types make it easy to operate and maintain. What's more . . . these features are basic to the unit, not options added at extra charge!

Before you buy . . . think first of the ITA AM-1000-A. No other transmitter compares for long-life and dependable operation at low cost. Call your nearest ITA representative today. Or write directly to our main offices in Lansdowne, Pennsylvania.
WITH ALL THESE FEATURES

- **REGULATED POWER SUPPLIES**
  Transformer regulated power supplies can operate with a 15% line variation. Filament regulation extends tube life.

- **SILICON POWER SUPPLIES**
  All power supplies use silicon rectifiers. Silicon rectifiers are included at no extra cost.

- **DUMMY LOAD**
  Built-in load permits pretuning before connection to antenna. Separately cooled, it safely dissipates full transmitter output in excess of 100% modulation continuously.

- **ONLY THREE TUBE TYPES**
  With only three tube types needed... inventories are reduced. Modern, field proven, economical 4-400A tetrodes are used in both PA and modulator stages.
Networks, AAAA, SAG discussing 'wild spots'

Representatives of television networks and a committee of the American Assn. of Advertising Agencies have been meeting with officials of the Screen Actors Guild to try to find a solution to a growing problem relating to performers' commercial fees on network programs which offer time for local sales.

During the past few months, SAG has been insisting that since such a spot commercial is carried within the body of program, even though it is a local cut-away, it merits classification as a local program spot. The performers' rate on local programs is generally higher than for the so-called "wild spot," which is carried during station breaks between programs. SAG claims this rule has been in its contracts since 1955 but concedes it has not been enforced effectively.

The networks and agencies say these commercials are not an integral part of the show and should not carry the local program rate.

It was learned by Broadcasting last week that at least two of the top advertising agencies have instructed their media buyers for the time being not to purchase time on network programs sold locally.

Four still in running for citrus ad account

The number of agencies in the running for the Florida Citrus Commission account has been reduced to four of the original seven with the withdrawal of BBDO and Gardner Adv. (Broadcasting, Aug. 21). Still retaining their candidacy in the competition for the $3 million account are Campbell-Ewald Co., Grant Adv., Lennen & Newell and Benton & Bowles, which has held the account for the past six years. J. Walter Thompson Co. was the first agency to drop out because of company policy. The competitive presentation to the commission by the remaining agencies takes place Oct. 11-12. Chairman Key Scales Jr. called a special meeting of the 12-man group for Aug. 25 to discuss plans. He promised a "thorough and frank" discussion of ground rules and other matters pertaining to the presentation.

Business briefly...

Nuti-Bio Corp., through Stammco Inc., Los Angeles, will sponsor the first 15 minutes of Love That Bob (reruns of the Bob Cummings show) on ABC-TV Mon.-Fri., 11:30 a.m.-12 noon, starting Sept. 4. Budget of approximately $500,000 will be spent for the tv promotion of the company's line of vitamins, minerals and proteins.

Martinson Coffee Co., Div. of Beech-Nut Life Savers Inc., New York, will use spot tv this fall in one of the New York area's most congested advertising campaigns for a regular coffee. It was announced Wednesday (Aug. 23) that Martinson will have approximately 40 one-minute and 20-second spots per week on four New York City tv stations, plus print ad schedules.

Rayco Mfg. Co., New York, will launch a 52-market spot tv drive next month, with frequency ranging from 5-25 announcements per week in each market, for its new line of tires, batteries, brakes and wheel alignment. All Rayco advertisements will be promoted on radio, with 73 stations in 59 markets airing a saturation spot schedule. Agency: Mogul Williams & Saylor, New York.

General Electric Educational Projects, Utica, N. Y., has bought one minute per week of NBC-TV's Watch Mr. Wizard (Sat., 12:30-p.m. EDT) from Sept. 30 to Christmas week. Agency: Young & Rubicam, New York.

Motorola Inc., and John H. Breck Inc. will co-sponsor a CBS-TV two-hour special, The Power and the Glory, Oct. 29 (9-11 p.m., EST). Agencies: Leo Burnett Co., and Reach, McLintock & Co., respectively. [CLOSED CIRCUIT, Aug. 21].

W. A. Sheaffer Pen Co., Chicago, has purchased participation in NBC-TV's Jack Paar Show and The Today Show with heaviest concentration in September, November and December. Agency: BBDO, Chicago.

Agency appointments...

- Aarben Pharmacal Co., Chicago, has named Geyer, Morey, Madden & Ballard, western division, Chicago, as its agency for new product developments to be announced shortly. Norman J. Phelps was appointed creative supervisor of the account and John H. Stilwell, account executive and supervisor. Aarben Pharmacal is a division of The Wander Co., Chicago.

- United Tours Inc. has appointed Grant Adv., New York. Media plans for...

SAN FRANCISCO • OAKLAND
One Jack London Square, Oakland 7, California
Spotmaster Cartridge Tape Equipment—the most field tested, most field proven cartridge equipment available to the industry. This is why our 500 series equipment is becoming the recognized standard for precision, performance and extended reliability. Bill Gumbler, President of WHHM in Memphis says, “Its versatility and low maintenance requirements make it the most reliable of all cartridge tape machines.” With a new heavy duty deck and hysteresis synchronous motor (at no increase in price) it is the simple, straightforward, competent key to pushbutton broadcasting. Its low cost puts it within reach of all stations.

Spots, themes, I.D.'s, news inserts and sound effects are controlled with the touch of a button. No more scratchy transcriptions, no more wrong speeds. The operator simply slips the cartridge into the playback slot, presses a button and the message is on the air instantly—on cue, on time, every time with no fluffs, no Donald Ducks—only the highest quality sound for every client for the run of the contract. When the message is completed, the tape automatically re-queues, ready for a repeat performance or storage.

Spotmaster is available in the BE500 combination recorder-playback model and BE505 companion playback model. Both guaranteed for one year.

New Product
The all new Spotmaster, Model TP-1, Tape Cartridge Winder makes rewinding of old cartridges easy. Old tape is easily replaced with any length you wish. Save money on new cartridges, too! Wind your own with the TP-1! $95.50. Blank cartridges and lubricated tape available at Broadcast Electronics. For further information call, wire or write today.

are not yet definite.
• Gordon Baking Co., Detroit (Silver-cup bread), appoints Grant Adv., Chicago, effective Nov. 10, to handle its advertising and public relations. Principal markets are in Detroit, New York and Chicago. Approximate budget of $500,000 will be aimed primarily at radio, television, trade publications and newspapers.

Rep appointments...
• WQXQ Daytona Beach, Fla.: WTJD Norfolk, WHBG Harrisonburg, and WELK Charlottesville, all Virginia; and the Radio Alabama Network: Hal Walton Assoc., New York.
• WECT-TV Wilmington, N. C.: Select Station Representatives, New York. Select also reports it will become exclusive national rep on or before Nov. 1, of four stations it has previously represented only regionally. The stations are WXEX-TV and WLEE Richmond, Va.; WHIS-AM-TV Bluefield, W. Va., and WTH Baltimore. Select has opened an office in Chicago under Irvin W. Unger. Address is 333 N. Michigan Ave.

C&W recovers some with new account
Cunningham & Walsh Inc., New York, troubled by client defections in recent months, reversed the trend last week and bounced up as the new agency for Salada-Junket Div. of Salada-Shirriff Horsey, an international food company headquartered in Toronto. The switch is effective Sept. 26. The account, estimated at $2 million, has been with Doyle Dane Bernbach, New York, for the last two years.

Salada-Junket produces Salada Tea and Junket Rennet-Custards, Quick Fudge Mix, Freezing Mix, Sherbet Mix and Danish Desserts. C&W is also the agency for a number of other food accounts, including College Inn Food products, Contadina Foods, Kitchens of Sara Lee (cakes), Sunshine Biscuits and Grocery Store Products Co.

Ad plans for Salada-Junket have not been established. C&W had its first orientation meetings with the client last week. The Salada-Junket Div. is located in Woburn, Mass. John W. Colpitts, is advertising manager.

Between January and June of this year, C&W's losses included Texaco, Sears Roebuck, Revell Inc. and Smith Corona, which billed a total of more than $20 million.
Beginning September 3, KTBS-TV, Shreveport, Louisiana becomes an exclusive affiliate of the American Broadcasting Company. KTBS-TV is proud to join the ALL-AMERICAN ABC family which sets the trend for programs Americans prefer. With this new association, KTBS delivers unduplicated network coverage in America's 68th TV market and the only exclusive ABC programming in its coverage area of 326,500 TV homes with 1,504,369 people in 58 counties covering the four states of Louisiana, Texas, Oklahoma and Arkansas.

of successful sales.
Radio's still indomitable, study finds

POLITZ-CHRISTAL SURVEYS ADD PROFILE TO AUDIENCE MEASUREMENT

One of the most solid boosts radio has received from audience research in almost a decade is beginning to emerge from a series of surveys which themselves set new patterns for audience measurement.

The surveys were conducted by Alfred Politz Media Studies, a widely recognized independent research organization, on behalf of five stations represented by the Henry I. Christal Co. They steer clear of the conventional ratings approach to audience measurement and undertake to (1) document the size and nature of radio audiences generally and (2) provide a qualitative as well as quantitative analysis of the audiences of the underneath-stations.

Although detailed breakdowns were still in tabulation last week, these highlights were already evident (respondents in all cases were 15 years of age or older):

- From 98% to 99% of the persons interviewed said they have working radio sets in their homes (Closed Circuit, Aug. 14; for further details also see box on this page). This is approximately 10% more than the much-challenged preliminary estimates given out by the U. S. Census Bureau a month ago (Broadcasting, Aug. 7).
- From 97% to 98% of the people said they listen at some time during an average week, and the majority listen day in and day out. Approximately two-thirds said they tune in seven days a week, and another 15% to 20% listen at least six days out of seven.
- Tune-in is constant from one day to the next. More than nine out of ten listen on any given weekday; on Saturday the figure is about nine out of ten and on Sunday a little more than eight out of ten.
- Not surprisingly, so-called “morning drive time,” from 7 to 9 a.m., gets the biggest tune-in. At least three out of four persons said they listen at some time during this period. But subsequent day-parts—set up to conform to those generally used by advertisers and agencies—also attract audiences whose size and constancy may surprise buyers who insist that their commercials be slotted within the drive-time span.
- In each of the 3 three-hour segments following 7-9 a.m., tune-in was found to be at least on a par with that recorded in this peak two-hour period—that is, within any subsequent three-hour daytime period the audience is equal to and in most cases greater than the total for the two hours between 7 and 9. There is some drop-off after 6 p.m. and more after 8 p.m.; even so, almost one-half said they listen between 8 and 10 p.m. at some time during the week, and one-third reported listening between 10 p.m. and midnight.
- Listening outside the home—in cars and other places—is considerably higher than past research has indicated. The home is still No. 1: more than nine out of ten listen there. But half of the people said they also listen in cars and one-fourth said they listen in other out-of-home locations.
- By sex and age group, listening appears to hew closely to general population patterns. Females dominated by 1% or 2% among the listeners just as they do in the general population in the markets involved; similarly, different age groups were represented among the listeners in approximately the same proportion that they are represented within the total population.
- Respondents’ music preferences run heavily to the popular category, with full orchestrations of the Kostelanetz-Mantovani type getting a slight edge over the limited orchestrations of the Shearing Quintet-Three Sons type. Folk music (country, western, etc.), classical-concert and rock-and-roll followed in that order in most markets.
- In response to the frequently used “rumor of war” research question, seven out of ten persons said they would turn on their radio sets to verify a report that war had broken out. This figure compares with less than one out of ten designating the second most preferred source (television).

Although the studies relate primarily to radio and radio audiences, television received a secondary benefit: from 94% to 98% of the people said their homes were tv-equipped and 14% to 21% said their homes have two or more sets—figures indicating a considerably higher degree of tv accessibility than those issued a few weeks ago by the Census Bureau, which pegged tv saturation at about 89% of all homes.

FM Data. FM did not fare quite so well. From 23% to 33% of the respondents said their homes have fm. This compares with unofficial but widely accepted general industry estimates that one-third of the nation’s homes are fm-equipped.

The Politz-Christal studies are based on more than 1,000 personal interviews in each of the five markets where the sponsoring stations are located. The stations and markets are WGY Schenectady, WBEN Buffalo, WJR Detroit, WTIC Hartford and WTMJ Milwaukee.

The interviews—with one person in each household—were supplemented by listening diaries kept by the individual to show when, where and to what stations he listened throughout one week. The diaries, like the interviews, dealt only with the listening habits of the individual, not those of other members of the household. The individuals were all at least 15 years of age. The survey sample was drawn by generally accepted research techniques to represent the entire coverage area of each station (except coverage areas outside the continental U. S.).

In announcing the study, Christal company officials stressed that it represents a departure from conventional program ratings research in several ways.
4 OUT OF 40 REASONS WHY the GATES BC-TT is chosen by more Class IV stations than any other one kilowatt transmitter manufactured today.  ■ Convenience. Flip one switch to change power and audio level for either local or remote control. ■ Efficiency. You efficiently reduce power to 250 watts by changing the primary voltage of the plate transformer. No power consuming voltage dropping resistors are used. ■ Economy. Longer tube life by hundreds of hours as plate voltage for 250 watts is reduced at both power amplifier and modulator tubes. Saves on utility bills too. ■ Accurate in-built dummy antenna that will not change characteristics at 100% modulation permits FCC required performance proofs without burning midnight oil. Also quick problem isolation when transmission line or antenna loading problems occur.

Let us give you the 36 other reasons why this is the best selling 1KW transmitter in America. Write today for Brochure No. 99 – yours for the asking.
ways and is comparable to ratings systems in none. Among the distinguishing features they cited:

1. The survey’s “universe” is the subscribing station’s comprehensive coverage area, not a city or limited metropolitan area.

2. The study deals with individuals, not households, and hence can be used to develop “reliable breakdowns by sex, age and socio-economic status” which are “vital for a medium as personalized as 1961 radio, particularly with the growth of multiple sets and out-of-home listening.”

3. Listening is measured “wherever it occurs,” to get “the true dimensions of the ‘companion medium.’”

4. The survey samples were far larger than those normally employed for program ratings.

5. Listening data is cumulated for the entire week, with each day divided into nine specific time periods designed to be most useful for advertisers and agencies.

6. The interview-plus-diary technique makes it possible to get qualitative attitude information as well as quantitative data on listening.

**Audience Profiles** • Instead of ratings, the studies will be used to develop “profiles” of the audience of each of the subscribing stations. This information—now being compiled and expected to be ready for distribution shortly—will include for each market details on the kinds and numbers of people who listen to radio generally and to the subscribing station in particular in the course of an average week; places and times of day that this listening occurs, and audience awareness of the qualitative attributes of the subscribing station in terms of programming and service to listeners and to the community at large.

Nor will the information be used as ratings are used: it will be designed to give advertisers and agencies a clearer picture of radio generally and of the subscribing stations specifically, but presentations based on it will not include competitive data directed against other stations.

This preoccupation with de-emphasis of ratings stems from the stations—and the Christal Company’s—long-standing policies against the use of ratings in presentations to agencies and advertisers. It thus pre-dates the recent wave of criticism, led by FCC Chairman Newton Minow and NAB President LeRoy Collins, of so-called over-emphasis on ratings.

Christal officials also said that although the study was planned before the issuance of the so-called Madow Report to Congress on audience-research techniques, its concept was such that most of the major recommendations of the Madow Report could be incorporated in the final report to be issued on the surveys.

The Politz and Christal organizations have been associated in a number of major radio research studies. Probably the best known is one conducted in 1953 which pioneered in the large-scale measurement of “people” rather than “homes” and found that, even in the areas of heaviest TV saturation, radio was regarded as an "indispensable medium" (Broadcasting, July 27, 1953, et seq).

**Nighttime radio has 45 million, RAB says**

A new Radio Advertising Bureau nighttime radio study reveals an average audience of 45 million adults, and, the bureau declares, "The figure would be far higher if projected to cover the average week."

The RAB report, called "An In-Depth Study of Nighttime Radio," is termed the most comprehensive study of nighttime radio in recent years. It is based upon some 2,500 personal interviews among adults of both sexes in 125 U. S. locations.

Among the differences between nighttime radio listeners and non-listeners, pointed out in the report:

Adult listeners of nighttime radio have a higher income than non-listeners; the audience is more heavily male than female, and listeners spend less time with nighttime radio than non-listeners—making them a more difficult target for the nighttime radio advertiser.

The research project showed that 20% of all Americans spend more time at night with radio than with TV—an average of two hours, 22 minutes with radio against one hour, 49 minutes with TV.

The report includes a special set of tables, analyzing age, income, area of residence, sex, family size, employment and the amount of time spent listening to nighttime radio.

**TvQ raises fees Oct. 1**

TvQ, Port Washington, N. Y., qualitative rating service, is increasing its agency-subscriber fees effective Oct. 1. Agencies which sign contracts before that date, however, will enjoy current rates.

Agency clients billing over $20 million annually in network tv time and talent will pay $9,850 if they sign after Oct. 1, as against the present rate of $7,850 for the first year; agencies with $15-$20 million billings will pay $9,350 (against $7,850); those with $10-$15 million billings, $8,850 (against $7,350); agencies with $7.5-$10 million, $8,350 (old rate, $6,850); $5-$7.5 million, $6,850 (against $5,350); and under $5 million, $4,850 (old rate, $3,350).

Videotape expanding to triple capacity

Videotape Productions of New York Inc. is implementing an expansion program involving an expenditure of more than $1 million and covering the trip- ling of studio facilities, a 50 percent increase in personnel, and the purchase of new equipment.

John Lanigan, vice president and general manager of the company, released details of the expansion project today (Aug. 28) and attributed the move to an upswing in business during the past two years. He said that the number of national spot tv advertisers producing taped commercials at the company's facilities had doubled during the past year and now includes more than 50 top advertisers.

The Big Move • The first step in Videotape Productions' expansion effort, Mr. Lanigan said, will be the move to new studios at 67th St. and Columbus Ave. during the weekend of Sept. 15-18. The company has leased the new facilities from NBC and they will provide the organization with 300 percent more space than at its present space at 208 W. 58th St., he reported.

The company's new Videotape Center will have three completely equipped tv studios, each with its own control room. Mr. Lanigan noted that the largest, measuring 70 by 80 feet, has a balcony seating 199 persons. Four of the latest Ampex videotape recorders will be installed at the new plant, he said. Other equipment available to Videotape Productions includes improved Marconi Mark IV camera chains and devices enabling the company to utilize Intersync, an electronic technique which permits instantaneous optical mixing of unrelated pieces of tape.

Personnel will be increased by 50% from 45 to 65 employees, according to Mr. Lanigan. He said most additions will be in production and creative areas.

Busy Year • The decision to expand, he said, was made after "a complete study of the potential of the tape industry," in the past year, he pointed out, videotape productions had serviced many national spot clients in tape, the latest of which include Westinghouse Electric Co., Smith-Corona, Marchant Inc., Lever Bros. Liebmann Breweries, Pan American Coffee Bureau, Bristol-Myers Co., Fedders Corp., Gerber Products Co., Lestoil, Thomas J. Lipton Inc., Goodman's Noodies and El Producto Cigar Co.

The company's study, he added, indicated there would be a large volume of business in tape commercials this year and for the future, and prompted Videotape Productions to launch the move involving additional capital expenditures and increased overhead.

NBC News sales 'best ever'—Durbin

All of the regularly scheduled NBC News programs for the 1961-62 season will be sponsored, and the sponsorship position of the unit's special program is the "best ever," Don Durbin, vice president of NBC-TV network sales, reported last week.

Purchasers of news specials include: Gulf Oil, Purex, the Bell System, Westinghouse, Du Pont, Elgin and Lincoln-Mercury. The list of regularly-scheduled NBC news programs and sponsors:

Tuesday—Chet Huntley Reporting (5:30-6 p.m.), Mutual of Omaha; 1,2,3-Go (6:30-7 p.m.), Quaker Oats and Beech-Nut Life Savers.

Wednesday—David Brinkley's Journal (10:30-11 p.m.), Douglas Fir Plywood Assn. and Pittsburgh Plate Glass.

Friday—Frank McGee's Here and Now (10:30-11 p.m.), Gulf Oil.

Saturday—Update (12-12:30 p.m.), Helena Rubenstein.

Lanin's legacy

"There is no hour of the day and no corner of the land in which these spirited messages cannot be heard," say the notes for a new record album, *Lester Lanin Plays the Madison Avenue Beat.*

Mr. Lanin has arranged 58 commercials as foxtrots, rhumbas and sambas for big band music, making it possible to cha-cha while hearing the virtues of Newport cigarettes, Dust 'n' Wax and Barbasol.

Minute Maid, Snow Crop appoint McCann agencies

The Minute Maid Division of Coca-Cola Co., New York, last week named McCann-Erickson Inc., New York, as agency for its line of frozen, concentrated juices. The billing is estimated at $4 million, of which 75% is in network and spot television.

Minute Maid also announced that McCann-Marschalk has been appointed to handle advertising for its Snow Crop brand of frozen juices, which bills approximately $2 million. Approximately 40% of the budget is in spot television.

Del Wood gets Monarch

Monarch Wine Co., Brooklyn (Manischewitz table wines and other wines under the Monarch label), has appointed Del Wood Assoc. of New York and Hollywood as advertising agency. The barter account was previously with Grant Adv., New York.

In announcing acquisition of the new account, Charles J. Weigert, executive vice president of Del Wood, noted the appointment of Harold Balk, formerly with Guild, Bascom & Bonfigli Inc., New York, to handle the Manischewitz and Monarch business.

Del Wood's billings now are near $6 million, representing both print and broadcast barter advertising for a dozen clients.

Del Wood is reported to have an inventory of several million dollars' worth of time, and Monarch expects to buy as much time as possible out of this inventory. Del Wood gives tv stations films or merchandise in exchange for air time which in turn is sold to advertisers.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television shows for each day of the week Aug. 17-23 as rated by the multi-city Arbitron instant ratings of the American Research Bureau. These ratings are taken in Baltimore, Chicago, Cleveland, Detroit, New York, Philadelphia and Washington.

NOW...Night TV Pickup Without Special Lighting

Broadcast-quality pickup at light levels never before possible with supersensitive RCA-4401V1 image orthicon

"Amazing" is the way broadcasters describe the sensitivity of the RCA-4401V1! This is the image orthicon that enabled many stations to move into profitable new fields of evening programming—such as outdoor pickup of sports, concerts, special events—that previously required costly, complex special lighting! Truly the solution to remote nighttime pickup problems, the 4401V1 actually produces a normal broadcast quality picture with illumination of only 10 footcandles on the subject itself with a lens opening of f/8.

The 4401V1 is but one of the broad RCA family of specialized image orthicons. Others include:

**B & W TELECASTING (3" CAMERA TUBES)**
- 5820A New version of the 5820 for B & W studio and outdoor pickup is destined to be the "standard" of broadcasting.
- 7293A A field-mesh image orthicon having an image section designed to prevent highlight ghosts. Field mesh-design to improve corner focus and prevent porthole effects.

**COLOR TELECASTING (3" CAMERA TUBES)**
- 7513 Features special precision construction and RCA field-mesh design for high quality color and B & W pickup.
- 4415 For studio pickup of color at B & W light level.
- 4416 Set of three tubes consists of two 4415's and one 4416. This has increased blue sensitivity. Both types have advantage offered by precision construction and field-mesh design. Primarily for studio application at light levels from 50 to 200 footcandles.

**TAPE RECORDING (4½" CAMERA TUBES)**
- 7295A A field-mesh image orthicon with high resolution and very high signal-to-noise ratio. For tape and B & W studio use.
- 7389A A superior-quality field-mesh design image orthicon, with extremely high signal-to-noise ratio, for tape and exceptionally high quality B & W studio pickup.

Whatever your station's requirements or special problems, there's a RCA Image Orthicon designed to meet them. For information on specific types, see your local RCA Industrial Tube Distributor.
Commercials in production

Listings include new commercials being made for national or local/regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

Hagan Chemical & Controls Inc. (Calgon), one 60, live, film. Agency: Ketchum, MacLeod & Grove.

U. S. Steel Co. (institutional), one 135, live, film. Agency: BBDO.

P&G plans tv ‘salute’ to dental profession

The Procter & Gamble Co., Cincinnati, has purchased an hour show on CBS-TV Feb. 6 (8:30-9:30 p.m.) through its agency, Benton & Bowles, New York. Commercial time on the show (about six minutes) will be used for messages about Dental Health Week and the program itself will be turned over by P&G to the American Dental Assn.

It’s reported the show in terms of purchase is worth some $350,000 in air time, talent fees and production costs (Henry Fonda, master of ceremonies; theme, the American family; produced in Hollywood by Bud Yorkin and Norman Lauer).

Two announcements on the program will it made note was made available as a “salute” to the dental profession through the courtesy of P&G, “maker of Crest toothpaste.”

ADA Recognition • Crest about a year ago was recognized by ADA as an effective anti-caries dentifrice when used in a program of oral hygiene and regular professional care, is the only toothpaste brand so recognized. An ADA spokesman in Chicago, who confirmed the air-time purchase, emphasized that although ADA had endorsed some of the ingredients used in Crest, the program benefit was to no advantage to P&G or its product and would be devoted to public service.

Also in advertising...

New market • Waterloo, Cedar Rapids and Dubuque, all Iowa; and Rochester and Austin, both Minnesota, are part of a “new, important and burgeoning midwestern market.” This is the gist of a new station study released by Avery-Knodel Inc., New York station representative. Subject of the study is “KOMBO-TV” which comprises KWWL-TV Waterloo-Cedar Rapids, Iowa; and KMTT (TV) Austin, Minn. Both stations, nationally represented by Avery-Knodel, are sold together as one buy, on one rate card and with one billing.

Infant firm • New York and Detroit offices of Marketing Strategy Inc., a new organization in the market and consumer research field, have been opened. Eugene L. Reilly, formerly vice president of Trendex Inc., and Robert W. Bledsoe, associate director of marketing and research at D. P. Brother & Co., are MSI’s officers. The research firm, which plans to open an office in Los Angeles early this winter, is located at 35 W. 53rd St. in New York and at 824 Fisher Bldg. in Detroit.

ABC-TV news show used to promote new movie

An unusual development in the advertising of motion pictures on television was announced last week when Columbia Pictures revealed it will promote a new production, “The Devil At 4 O’Clock,” on ABC-TV’s Evening Report news program (Mon.-Fri., 6-6:15 p.m.). The production will be advertised for one month, starting Sept. 25 on an alternate daily basis. The cost will be approximately $250,000.

Walter Weir, chairman of the executive committee of Donahue & Co., the agency that handled the purchase, said, “This is not the first time a film picture company has employed television to promote its product; however, it is the first time it has co-sponsored a show which brings us a long way from the time, not so many years ago, when Hollywood considered even a 20-second spot a wholly unnecessary payment of tribute to the enemy.”

New tv publicity firm

To provide a more flexible publicity set-up and one more readily adaptable to the changing needs of an advertising agency and its clients, Young & Rubicam, Hollywood, has turned the publicizing of its tv shows over to H. Blake Chatfield and Jean Shanley, who have resigned from the agency to open their own independent public relations and publicity organization on Sept. 1. The pair will handle publicity for Hennessey, Mrs. G. Goes to College, Top Cat and other assignments from Pat Hogan, publicity director, of Y&R Hollywood. They will also handle other non-Y&R clients.

VIP/ Monarch partnership to speed production

A pair of tv commercial production firms located at opposite coasts have formed a partnership for a new service aimed at improving the speed and quality of New York advertising agencies’ production in Hollywood of filmed commercials. Called VIP/ Monarch Inc., the new organization’s parent companies are VIP Productions Inc., New York, and Monarch Films Inc., Hollywood.

Officers of the joint operation are: Edwin T. Kasper, president of VIP Productions, is president; James H. Chapin, president of Monarch, and George Tompkins, executive vice president of VIP, are executive vice presidents of VIP/ Monarch.

54 [BROADCAST ADVERTISING]
Both their hats...

"Now that the unfortunate fifteen-day strike by our 'mechanical employees' is behind us, I want you to know that the prompt, full and impartial news reporting by all media in the Metropolitan area impressed us as responsible journalism at its best. This kind of news coverage that gave the public all the facts promptly made the task easier for those of us who bore the brunt of maintaining a vital public service. WWDC, as usual, had a prominent role in this full and impartial news coverage of the events."

DONALD S. BITTINGER, President
Washington Gas Light Company
Washington, D.C.

...are off to us!

"Local No. 63, International Chemical Workers Union, AFL-CIO, wishes to express its appreciation to you and your very fine staff for services rendered during the strike against the Washington Gas Light Company. We found your staff very courteous, and they handled the news situation very fairly. It is unfortunate when disputes between employer and employee must be placed before the public, but in such cases it is a credit to your industry when it is presented as you have done. Thank you again for your very fair handling of this situation."

FRANCIS J. TEBBS, President
Local Union No. 63, ICWU

...the station that keeps people in mind

We've talked to you in this space before about our editorials. We use them to take a stand on issues that we believe call for comment, after all the facts are in and weighed.

Our newscasts are something else again. Here we let the developments—all the developments—speak for themselves. We don't slant in tone. We don't bury in unprime time. We never pass judgment on events as they are happening. Instead, we pass the news along to our listeners—as full, as fresh and as factual as possible. The letters above indicate that we do a pretty balanced job of it.

Keeping people in mind is a 24-hours-a-day occupation with us. It explains why we're far and away first in Washington, D.C. radio ratings—and the station for you to keep in mind.
**GOVERNMENT**

**WARNING ON HARD LIQUOR**

Magnuson, Pastore say radio-tv must reject such ads or Congress will take remedial steps

Broadcasters were bluntly warned last week to reject hard-liquor advertising or face the consequences of “appropriate legislation.”

The warning came from two senators who have as much to say about broadcasting legislation as anyone on Capitol Hill—Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee, and John O. Pastore (D-R.I.), chairman of the Communications Subcommittee.

Their views were expressed in a letter to NAB President LeRoy Collins. They said they were disturbed by rumors and reports that “certain large distilling companies plan to use broadcast facilities to advertise hard liquor.”

A Philadelphia distiller, Publixer Industries Inc., has already begun an advertising campaign involving radio and tv stations (BROADCASTING, Aug. 21).

The senators recalled that it has been “generally agreed that this type of advertising should not be permitted” and that the industry, “as an indication of its good faith,” adopted provisions in its code barring the acceptance of hard-liquor advertising.

“We applauded the industry for this approach because it was consistent with our view that self regulation is more desirable than legislation.”

**Legislation Will Be Ready** • But, they added, “We stand ready to move ahead with appropriate legislation in the event self-regulation proves to be ineffective.” They also said they will ask the FCC to consider the type of advertising broadcast by a licensee at renewal time.

The letter called on Gov. Collins to relate what steps the industry is taking to abide by its code and to give his view on whether there is any “substance” to the liquor-advertising reports.

There may be, however, little NAB can do, at least as far as the Publixer account is concerned. NAB officials have said that, so far as they know, no NAB members or code subscribers are taking the Publixer business.

Sens. Magnuson and Pastore said it would be “foolhardy” for broadcasters to permit the no-liquor-advertising ban to become meaningless “in these trying times, with criticism of the broadcasting industry mounting—particularly in the programming field.”

The public interest, convenience, and necessity is not being served by beaming hard-liquor advertising into the American home, they said, adding:

“We are well aware that broadcast licensees are all anxiously looking for new sources of revenue, we never believed that they would be so lacking in their sense of public responsibility as to even consider the broadcast of liquor advertising.”

**CBA calls program forms 'unnecessary burden'**

The Community Broadcasters Assn. has told the FCC that the agency's proposed new programming forms will place an “unusual and unnecessary burden” upon CBA members, who operate primarily in small markets with restricted income and personnel.

Robert T. Mason of WMRN Marion, Ohio, president of the association, sent a CBA resolution to the FCC asking that the comment deadline, presently Sept. 7, be extended so that “appropriate negotiations” can be held. CBA said that a modernized renewal form, which will provide the commission with adequate information, can be adopted through the cooperation of the industry and the FCC.

“There is debatable value, debatable legality and substantial question as to the implications involved in the proposed interrogatories...” as presently drafted, CBA said. Community Broadcasters numbers among its members over 200 Class IV stations throughout the country.

**Rep. Michel snipes again at Minow over ch.8 Moline**

Rep. Robert H. Michel (R-Ill.) returned to the attack last week against the FCC's action in the Moline, Ill., ch. 8 case.

The commission voted to instruct the staff to prepare documents making the vhf grant to Moline TV Corp. This has been attacked by other applicants on the grounds that Moline TV Corp. made no study of the needs of the community. Rep. Michel blasted FCC Chairman Newton N. Minow last month for holding that such a study is a requirement in one case, but not in the Moline case (BROADCASTING, July 31). He claimed that Mr. Minow was swung to favoring Moline TV Corp. because of past political association with one of that applicant's principals. Mr. Minow replied by revealing he abstained from voting in this case.

Mr. Michel charged that Mr. Minow should not have even sat on the oral argument.

As part of his statement, Mr. Michel had printed in the Congressional Record the speech of W. Theodore Pierson at the Northwestern U. Law School seminar in Chicago earlier this month (BROADCASTING, Aug. 7). The Illinois congressman pointed out that Mr. Pierson attacked Mr. Minow for his views on the FCC's jurisdiction on programming, even through Thomas N. Dowd, Mr. Pierson's law partner was the attorney for Moline TV Corp.

Mr. Pierson's speech was also reprinted in the Congressional Record by Sen. Jack Miller (R-Iowa).

**Fuqua drops litigation over bid for WNCT (TV)**

A $1 million breach of contract suit by J. B. Fuqua against Carolina Broadcasting System Inc. was withdrawn last week.

Mr. Fuqua claimed he had a contract to buy Carolina Broadcasting's WNCT (TV) Greenville, N. C., and its 30% interest in WECT (TV) Wilmington, N. C., for $2,445,000. Mr. Fuqua originally asked $500,000 damages on the ground that the directors of Carolina Broadcasting failed to submit his offer to their stockholders; when the stockholders rejected this bid, Mr. Fuqua doubled his claim of damages.

A federal judge in Washington, N. C., allowed the suit to be withdrawn with prejudice. This means the action cannot be revived. The court ordered Mr. Fuqua to pay all the costs.

At the present time there are two offers for the Greenville property; one by Roy Parks of Ithaca, N. Y., for over $2.5 million, the other, by Mr. Fuqua, tops that although the figure is not available.

There are no negotiations now underway for the Greenville property, Earl McD. Westbrook, president of Carolina Broadcasting, said last week. He said he didn’t think there would be any negotiations for at least 30 to 60 days.

SECRECY PEEVES PASTORE

Senator sees need for presidential committee to determine how spectrum should be carved up

Congressional frustration at the secrecy in which the military shrouds the use of its share of the broadcast spectrum erupted last week in the person of Sen. John O. Pastore (D-R. I.), chairman of the Senate Communications Subcommittee.

He said a presidential committee should be created with authority to determine what frequencies the military is actually using and whether any can be turned over to non-government use.

He made the recommendation while presiding at a hearing on a proposal (S. J. Res. 32) to create a special five-member commission to study the way the spectrum is allocated between government and non-government users.

At the witness table at the time was Fred C. Alexander, director of telecommunications of the Office of Civil and Defense Mobilization. He had just finished saying that administration of the spectrum is a coordinated effort between OCDM, representing the President, and the FCC, which has authority over the non-government uses of the spectrum.

FCC Unhappy • But the FCC has complained about government secrecy, Sen. Pastore said. “And when we try to find out about government use of the spectrum, the door is slammed in our face—we can’t go any further.”

When Mr. Alexander said the FCC “prefers not to know” about “certain highly classified uses” to which some military frequencies are put, Sen. Pastore said, “shouldn’t there be an independent agency to go into this... which would be helpful to the president, the FCC and Congress?”

He said he thinks it might be proper for the committee to ask the President to consider the appointment of “a public-spirited committee to determine whether the government frequencies are being properly used.”

Many things cannot be discussed publicly, Sen. Pastore acknowledged, “but a definitive answer should be arrived at so we can get optimum use of the spectrum.” He said he would rather have the President than Congress appoint the special committee since the President has the ultimate responsibility.

No Comment • Mr. Alexander declined to comment on Sen. Pastore’s suggestion, declaring that it is a matter for presidential consideration. But another government witness, Francis Colt deWolf, of the State Dept., feels the need for such an independent agency.

Mr. deWolf, who is chief of the department’s telecommunications division, said an overall planning unit, with authority over both the government and non-government aspects of the spectrum, would be helpful.

He also thought the resolution introduced by Sen. Vance Hartke (D-Ind.) to create a five-man commission to make a six-month study of spectrum problems “would not be a bad approach” to the creation of the super unit.

Additional support for the creation of an overall spectrum authority came from Donald C. Beeler, counsel for Aeronautical Radio, Inc., a communications agency of the aviation industry.

Lamb’s Share • He estimated that the FCC’s share of the spectrum “has dwindled to less than 30%,” with the remaining 70% government-controlled.

And about 40% of the spectrum, he said, is “exclusively government and totally withdrawn from citizen use.” He blamed the FCC for not standing up to the demands of the government agencies for spectrum space.

There exists no authority, no agency, and no procedure for determining claims between a government agency and industry for access to the radio spectrum, or for determining the feasibility of shared access by any portion of the radio spectrum, he said.

The aviation industry is bitter over the FCC’s action, taken at the request of the OCDM and its Interdepartmental Radio Advisory Committee, denying the airlines permanent use of the 8800 mc band for dopplers, a new aircraft navigational aid. The decision was announced after the FCC had already begun issuing licenses for airborne dopplers on the 8800 frequency.

Ready for Geneva • Although the various government witnesses generally steered clear of direct comment on Sen. Pastore’s proposal for a spectrum watchdog committee, all agreed unequivocally that the U.S. will be fully prepared for the proposed special International Telecommunications Union conference in Geneva in 1963. The purpose of the conference will be to allocate frequency bands for space activities.

Admiral M. E. Curts, director of telecommunications for the Defense Dept, said he feels the U.S. will be better prepared for the 1963 conference than for any previous international telecommunications meeting.

Philip J. Farley, a special assistant
to the Secretary of State, said the government has not yet decided whether 1963 should be confirmed as the date for the ITU conference. The determining factor will be how well prepared the administration feels it is to make "useful proposals," he said.

The subcommittee, which is also looking into the U. S. space satellite policy, heard a Defense Dept. official urge that all communications systems, including satellites, be considered as instruments of national policy.

Modern Concepts Needed • Dr. Harold Brown, department director of defense research and engineering, said the government should formulate communications policies in the light of 1961 developments.

He also said the Defense Dept. expects to conduct its Project Westford test within the next few weeks. The test involves placing a belt of 500 million tiny metal reflectors in orbit around the earth. Radio signals will be bounced off the reflectors, each one-third the thickness of a human hair and about three quarters of an inch long.

James E. Webb, administrator of the National Aeronautics and Space Administration, outlined the agency's future space communications plans, including the launching of an experimental satellite that will probably be the forerunner of the ultimate space system.

The satellite, being built by Hughes Aircraft Corp. of Culver City, Calif., will be placed in an equatorial orbit 22,300 miles above the earth. The satellite would travel at the same speed as the earth's rotation and, therefore, would appear to hover in one spot. Three such satellites, it is believed, would be able to relay television, telegraph and telephone signals to most of the inhabited regions of the globe.

Negotiating • Mr. Webb said NASA is negotiating a $4 million contract with Hughes to construct three of the satellites.

The Justice Dept. assured the subcommittee, as it has a number of other congressional committees, that it would guard against the domination of the coming space communications system by any one company.

ABC, AMST tangle on comments deadline

ABC suggested to the FCC last week that the Assn. of Maximum Service Telecasters had requested at least six months' extension of the deadline for comments on deintermixture and drop-ins in selected markets for the sole purpose of delay. ABC asked the agency to deny the request.

ABC said it could understand AMST's concern with the overall proceeding on the utilization of uhf and

BROADCASTING, August 28, 1961
HILL SHOWS APATHY AT FTC PLIGHT

Congress seems unlikely to give agency injunction power

Legislation to give the Federal Trade Commission new temporary cease-and-desist powers appears doomed for this session of Congress, at least.

The House Commerce Committee last week held two days of hearings on the proposal, took testimony from only three of the 20 witnesses scheduled to appear, then adjourned the proceedings indefinitely.

And indications were the committee, headed by Rep. Oren Harris (D-Ark.), will not resume the hearings until Jan.

The committee has a heavy schedule for the remainder of this session, and the attitude of the members indicated they were not eager to give the legislation special consideration.

The proposal would empower the FTC to issue temporary cease and desist orders pending completion of proceedings against a company accused of violating federal trade laws. The orders could not be issued until a hearing had been held, but would be backed up by the courts, which would direct compliance. Violators would be subject to contempt of court penalties.

The witnesses who testified were authors of similar bills giving the FTC the temporary cease and desist authority—Reps. Wright Patman (D-Tex.), chairman of the House Select Small Business Committee, James Roosevelt (D-Calif.) and Tom Steed (D-Okla.).

**Time Important** - They argued that unless the FTC is permitted to issue stop orders without waiting for the completion of lengthy proceedings, the "survival" of small business would be jeopardized. The damage of some illegal practices, such as fraudulent advertising campaigns, would be done before the FTC could act, they said.

"A large number of FTC cases are pending from six to ten years," Rep. Roosevelt said. "Small business cannot afford these delays." He said the FTC should have the power to stop clear violations pending final disposition of a complaint.

Committee members, however, while praising the objectives of the legislation, expressed reservations. Rep. John Flynn (D-Ga.) felt the proposals lacked sufficient safeguards for those against whom the FTC might act. And Rep. Samuel L. Devine (R-Ohio) said the FTC, under the legislation, would become "the judge, jury and prosecutor."

One of the witnesses on whom time range out was FTC Chairman Paul Rand Dixon, who has said the commission needs the new authority to do its job of promoting competition and curbing unfair practices.

Opponents of the legislation, such as the Advertising Federation of America, regard the legislation as unconstitutional and unnecessary. The AFA view is that the FTC already has all the weapons it needs to combat unfair practices. The AFA's general counsel, John J. Ryan, was also on the committee's witness list.

**Election legislation approved by Senate**

The Senate Committee on Rules and Administration has approved two pieces of legislation affecting federal political campaigns. One would require fuller disclosure of campaign financing, raise the legal spending ceiling and grant tax credits of up to $10 for political contributions. The other

---

**Grid officials on Hill today**

Four top sports officials will testify before the House Antitrust Subcommittee today (Monday) on legislation that would authorize professional teams to negotiate package TV contracts with the networks.

Witnesses are not expected from the networks, according to a subcommittee aide. NAB will be represented, however, by Vincent T. Wolsiewske, executive vice president-elect. The Justice Dept. is expected to submit a statement.

The witnesses who will testify are Commissioners Pete Rozelle and Joe Foss, of the National and American Football Leagues, respectively; Ford Frick, baseball commissioner; and Walter Byers, executive director of the National Collegiate Athletic Assn.

The bill (HR 8757) was introduced by Subcommittee chairman Emanuel Celler (D-N.Y.), in the aftermath of a court decision voiding the two-year contract the NFL had negotiated with CBS-TV (Broadcasting, July 24).

It would permit professional football, baseball, hockey and basketball leagues to negotiate group contracts without fear of violating the antitrust laws.

A similar bill has been introduced in the Senate by Sen. Estes Kefauver (D-Tenn.), chairman of the Senate Antitrust and Monopoly Subcommittee. According to a report late last week, the Kefauver subcommittee might act on the bill ($2427) without holding any hearings.
The sun produces energy through nuclear fusion—a gigantic hydrogen explosion that has been going on for more than 500 million years. We may duplicate it. Scientists at Princeton University are experimenting with a **Stellerator** to attain controlled nuclear fusion that will produce endless energy from the hydrogen in sea water. The Stellerator is supported by 17 **USS Quality Forgings** that could be made from only one material—a new, non-magnetic Stainless Steel called Tenelon, developed by United States Steel.

Although the Stellerator is strictly experimental, there would be no nuclear programs of any type without steel. The very heart of an atomic generating plant—the reactor vessel—must be steel, whether it's the power plant of a nuclear submarine or a commercial generating station. In addition to the reactor, the power station literally bristles with tons of special steels developed in the laboratories and produced in the mills of United States Steel. If nuclear power is the door to America's future, the key is steel. *America grows with steel.*

**USS and Tenelon are registered trademarks**
(S Res. 141) would put the Senate on record as favoring shorter presidential campaigns. The full disclosure bill would require political committees operating in two or more states to list the name and address of each contributor of $100 or more and report expenditures of $100 or more. The present $3 million ceiling on spending by national committees would be raised to about $14 million for presidential candidates and to about $50,000 and $12,500, respectively, for candidates for senator and representative. The income tax credit would amount to one half the political contribution, up to a $10 maximum.

The resolution, which would have no legal effect, would put the Senate on record as urging the political parties to hold their presidential nominating conventions after Labor Day. National nominating conventions now are held as early as July.

Santa Fe's ch. 2 asked by KOAT-TV

KOAT-TV Albuquerque last week asked the FCC to assign ch. 2 (now at Santa Fe) to Albuquerque or that the two cities be considered a hyphenated market. The ch. 7 station said it is applying for a shift to ch. 2 with transmitter site planned for Santa Fe Crest Mountain, 14 miles northeast of Albuquerque and 43 miles west of Santa Fe. KOAT-TV said its move is occasioned by Thunderbird Entertainment Enterprises' application, which seeks the same transmitter site for Santa Fe. KOAT-TV feels that assigning the site to a Santa Fe outlet would cause unfair competition and asks a hearing on who should be granted the site.

Alfred E. Anscombe, who holds a construction permit for ch. 56 Binghamton, N.Y., asked the FCC to assign ch. 34, now unused in Wilkes Barre, Pa., to Binghamton and indicated he would apply for it.

NAB agrees on stl

The NAB told the FCC last week that it agreed with the commission's proposal to permit broadcasters to use studio-transmitter links for either am, fm or tv audio—notwithstanding present allocations to individual services.

The proposal was issued last month and comments were due Friday Aug. 25.

NAB suggested, however, that the commission spell out multi-program intercity use of a relay channel and specify the fact that am and fm as well as tv could be used on one frequency. This will help many am stations, particularly in remote areas, NAB said, by making economically feasible for them to receive network programs, thus improving their service to the public and reducing operating costs.

THE RUNT AT FEDERAL TROUGH

Broadcasters feel bypassed after defense meeting

Broadcasters who attended the annual Defense Communications Seminar in Washington last week are at home now, still bemused by a couple of federal government projects that leave them feeling they're holding the dirty end of the stick.

Item: The U. S. is planning to spend up to $60 million to subsidize electric power companies in the purchase and installation of tone generators and associated equipment in the NEAR program. NEAR stands for National Emergency Alert Repeater, a device which is plugged into an electric power outlet in the home, factory or office. It is triggered into a loud buzz by a subaudible tone transmitted from electric power stations over power lines.

Item: The Department of Defense has authorized $125,000 for a study of the feasibility of extending the telephone alerting system, now used by the civil defense organization, into other areas of civilian life, including radio and tv stations.

What miffs broadcasters is that they have been spending their own money in the Conelrad and defense emergency network projects, with no financial assistance from any government agency. Broadcasters, it is estimated, have laid out $10 million in the last decade for these projects.

Several suggestions were offered during the meeting of the National Industry Advisory Committee (NIAC) that some plan be inaugurated to permit broadcasters to borrow money at low-interest, long-term financing to purchase needed equipment for the defense programs—including such items as stand-by generators and bomb shelters.

Other problems brought up at the sessions involved accreditation for key station employees so they can reach their transmitter or studio assignments in the event of an emergency, and arrangements for broadcasters to acquire surplus government equipment, available and needed in the Conelrad and defense network activities.

No Censorship • White House News Secretary Pierre Salinger told the broadcasters there was no intent to invoke censorship when President Kennedy suggested that editors weigh more carefully the publication of news affecting the national security. The President made these suggestions last April in speaking to the American Society of Newspaper Editors and the American Newspaper Publishers Assn. conventions.

The meeting also heard reports on transmission standards for the Conelrad attention signal, the national tele-type alerting system, a stand-by script for broadcasting stations, use of standard radio stations for simultaneous broadcast and point-to-point teletype channels.

Other reports were made on the activities of the North American Air Defense Command, Strategic Air Command, Defense Communications Agency, weather warnings to the public, guided missiles, and computer-controlled communication systems.

The two-day meeting was sponsored by NIAC and the FCC. FCC Commissioner Robert T. Bartley, defense commissioner, presided, alternate defense commissioner Robert E. Lee was the second day moderator.

Government briefs...

Anti-destruction measure • The House Judiciary Committee has approved a bill already passed by the Senate to broaden the federal law against destruction of communications facilities. The bill (S 1900) provides penalties of up to $100,000 fine, 10 years imprisonment, or both. The legislation was introduced following the dynamiting of several microwave relay stations in the West earlier this year.

English taught by tv • The U. S. Information Agency will use television to teach English in Latin America, the Near East, Far East and Africa. The agency will start the program, consisting of a series of 26-minute shows, in September. It said the areas selected contain 11 million television sets.
Your daily newspaper is a tribute to Air Express priority service

If tomorrow every syndicated cartoon, column and ad in which AIR EXPRESS played a part were missing from your morning paper, you'd know it instantly. The graphic arts, printing, publishing and advertising industries rank high among AIR EXPRESS users. Their engravers' plates, photos and illustrations—even entire newspapers—get top priority on all 10,000 daily scheduled U.S. airlines flights—first on, first off, first there. And they get door-to-door pickup and delivery, too, by a special 13,000-truck fleet—plus kid-glove handling. And just one phone call arranges everything, at amazingly low cost. So always ... think AIR EXPRESS first!

CALL AIR EXPRESS DIVISION OF R E A EXPRESS • GETS THERE FIRST VIA U.S. SCHEDULED AIRLINES
FCC reorganization plan goes to Kennedy

Two months after the House resoundingly rejected President Kennedy's FCC reorganization plan (BROADCASTING, June 19), Congress last week completed action on its version of how the re-vamping should be done. The measure, which now goes to the President for his signature, is designed to accomplish the President's objectives of streamlining the FCC but is tailored to meet the objections of the plan's opponents.

Final action came on Tuesday (Aug. 22). Without further discussion, the House approved the bill ($2034) first, then sent it to the Senate, which cleared it for the White House. The legislation is a compromise, worked out by a House-Senate conference committee (BROADCASTING, Aug. 21), between slightly different versions passed earlier by the two chambers (BROADCASTING, July 31 and Aug. 7).

It will permit the commission to delegate adjudicatory functions to an individual commissioner or a panel, or to lesser employees, and to exercise discretion in granting review. As a result, say the bill's backers, the commission's work will be speeded up and the commissioners will be able to devote more time to important policy matters.

Missing from the bill is the additional power the President's plan would have given the FCC chairman.

The bill was drafted by the FCC itself after being prodded into action by Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee (BROADCASTING, May 29). Sen. Pastore introduced the bill in the Senate, and later a similar measure was sponsored in the House by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee.

Court backcomes committee ruling on am grant

The U. S. Court of Appeals last week in a 2-1 decision upheld an FCC grant on grounds that the court felt it should not substitute its judgment for that of the commission. Dissenting, Judge Warren E. Burger claimed the FCC had not given sufficient weight to certain factors.

Three companies sought 1320 kc in the same location—WFMD Frederick, Md., for unlimited time at Gettysburg, Pa.; WGET Gettysburg to shift from 1450 kc unlimited to 1320; Price Broadcasters Inc. for a daytime station in Frederick.

The FCC reversed the hearing examiner's initial decision that the need for a second service in Frederick exceeded the need for either a second station at Gettysburg or for improving WGET's facilities. The commission decided it was more important that even a comparatively small number of persons in the Gettysburg area receive a primary nighttime and supplemental daytime service than that a larger number of Frederick residents get additional daytime service. It further found that WGET was superior to WFMD "in virtually every area of standard comparative consideration."

Judge John A. Dananer and Walter M. Bastian felt the FCC had shown "ample basis" for its decision. Judge Burger held that since the FCC chose WGET over WFMD because of the latter's "present inadequacies . . . to provide adequate service to [Frederick]," the FCC exposed the need for another service in Frederick, which was conceded to have a more rapidly expanding population than Gettysburg.

Rep. Walter gives Murrow clean bill

In the book of Rep. Francis E. Walter (D-Pa.), chairman of the House Un-American Activities Committee, there's nothing to link Edward R. Murrow, former CBS newscaster and current U. S. Information Agency director, with Communism.

Rep. Walter said that a check of the records, files and publications of his committee reveals no records on Mr. Murrow. He also said that he does not believe there are sufficient grounds to impeach Chief Justice Warren and that Mrs. Roosevelt, though "sincere and patriotic," had given unwitting aid to "Communist-dominated organizations."

New interest-conflict questioned in Boston

Massachusetts Bay Telecasters last week suggested that the FCC investigate conflict-of-interest questions involving a second stockholder in Greater Boston TV Corp., rival applicant with MBT for Boston's ch. 5.

MBT said Dan Huntington Fenn has gone to work for the executive branch of the government and that Mr. Fenn is public affairs and special events director for Greater Boston and has agreed to buy 2,500 shares of the applicant for $2,500 down plus $22,500 in installments. MBT said Mr. Fenn's activities should be checked in view of the President's conflict-of-interest order.

At last you have a choice when you buy video recording tape. The new one is called Emitape. It was developed in the United Kingdom by EMI, pioneer and developer of the world’s first public TV system. It has been proven in tens of thousands of actual telecasting hours. It was most enthusiastically received at the recent NAB Show. The rigid quality control maintained throughout the Emitape manufacturing process assures you of excellent wearing qualities, edge straightness, signal-to-noise ratio and recording performance.

Dropouts average no more than 20 per minute, including defects of less than 6db amplitude modulation depth, and a time duration of under a few microseconds. Head wear is considerably reduced with Emitape. With most equipment a minimum head life of 150 hours can be expected. Audio head stacks show negligible wear after 500 hours of service. Tape life is also long. The average figure is 100-150 passes.

But get all the facts. Write, wire or call EMI/US Magnetic Tape Division, Los Angeles: 1750 North Vine Street, Hollywood 2-4909. New York City: 317 West 44th Street, Circle 5-3400. (Also available, from the new General Communications Division of EMI/US: a complete line of TV cameras, solid state distribution and switching equipment.) Emitape
McGannon sold on research center idea

BUT HEAD OF PLANNED NAB STUDY UNIT SEES LOTS OF COMPLICATIONS

Where have we been, where are we now and where do we go from here? This epitomizes the approach toward a broadcasting industry research center taken by Donald H. McGannon, president of Westinghouse Broadcasting Co., tapped to be chairman of the NAB’s committee to study the feasibility of such an idea.

Mr. McGannon’s appointment, announced earlier this month (AT DEADLINE, Aug. 14), will be followed this week or next by the names of top flight broadcasters who will serve with him. A meeting of the committee early in September is already scheduled.

Enthusiastic about the idea, Mr. McGannon feels that with the proper cooperation the very essence of radio and tv’s potential can be captured—to the benefit of all broadcasters.

But the approach and details must be worked out carefully and with full understanding of all the implications, Mr. McGannon observed recently. “It’s real

ticklish in some respects. We’ve got to have the right, objective, unbiased study on a number of questions about broadcasting, and we’ve got to be prepared to do something if the studies show we’ve been operating on an erroneous basis.”

Collins’ Idea • The idea of an NAB research center was first broached by NAB President LeRoy Collins in his maiden speech to the association last May.

In calling for a research center, he suggested that it be commissioned to looking into ratings, the influence of editorializing, the broadcasting of judicial proceedings, the maintenance of freedom and responsibility for broadcasters, etc. New techniques in public service programming, the relationships of the broadcaster to the community, the impact of programs on the public, the radio spectrum and the future of radio.

Gov. Collins suggested that the research center be located “in close proximity” to both outstanding research specialists and practical broadcasters, possibly on or near one of the nation’s major university campuses.”

The idea was amplified at the NAB board meeting in June, and it was after the board’s okay that Mr. McGannon was asked by Gov. Collins to head the NAB committee to study its feasibility and implement its establishment if found desirable.

Re-thinking • Some of the problems of the program are not insurmountable, but they will require a shift in industry thinking, it was apparent from Mr. McGannon’s remarks.

For one, most universities and colleges which undertake research for private industry require the right of publication. This can involve a delicate public relations problem unless broadcasters are prepared and understand they are going to get some bad with the good.

Many universities and colleges specialize in certain types of research. This means that the potential of institutions interested in this type of research may be limited, although this may not be particularly difficult.

Dry Run • Before accepting Gov. Collins’ offer to head the committee, Mr. McGannon spent almost a month discussing the idea with broadcasters and a few research specialists. He spoke to about 15 broadcasters, the presidents of the three television networks, and a couple of university professors.

One of these people he spoke to agreed to serve the committee as a consultant; he is Dr. Paul Lazarsfeld of Columbia U., New York. Dr. Lazarsfeld is already a key figure in a number of basic research findings concerning radio and tv and other media.

A survey of possible financing leads Mr. McGannon to believe that the best way is by assessments—either quarterly or annually. NAB members’ dues should not be used for this type of project, he feels.

One of the first projects will be on the methodology of ratings services. This has virtually everyone’s agreement, Mr. McGannon indicated. Care must be taken to make sure that the project is not considered an attack on ratings. The WBC president feels that the purpose of the research investigation should be to upgrade the validity of rating services through an improvement in their methods.

Other possible areas for exploration, according to Mr. McGannon, are the image of the industry, the public’s attitude toward programs (children’s, news, public affairs), television’s exact impact on children and what the public truly wants from radio and tv?

New WNBC-TV rate card realigns rates Sept. 1

A realignment of WNBC-TV New York’s rate structure, effective Sept. 1, has been announced.

The new rate card offers choices that range from a prime two-minute minute for $2,500 to a 10-second ID priced at $25 when purchased on a 25-plan with a consecutive week discount.

The new rate card, No. 22, effective Sept. 1, features (1) A new volume discount plan whereby weekly continuous
discounts can be earned by purchase of announcements in multiples of 6, 12, 18 and 24; (2) A 10% discount on 52-week continuous schedules; (3) a new “Class E” time classification from sign-on to 7:59 a.m. daily and until 5 p.m. Saturdays and Sundays, and from 1:01 a.m. to sign-off daily; (4) reduced cost of daytime local participations, and (5) slightly increased rates for announcements 11 p.m. to midnight.

Taft asks to withdraw public stock offering

Taft Broadcasting Co., Cincinnati, last week asked the Securities & Exchange Commission for permission to withdraw registration of 376,369 shares of common stock (Broadcasting, June 5).

The shares belonged to stockholders, mostly trusts within the Taft and Ingalls families. When the offering was filed at the SEC in May the stock was selling around 24. It has declined to 18 and the stockholders do not want to sell at that price, according to President Hulbert Taft Jr. Offering included about 25% of 1,527,960 shares outstanding.

The Taft stations are WKRC-AM-FM-TV Cincinnati and WTVN-AM-TV Columbus, both Ohio; WBR-C-AM-FM-TV Birmingham, Ala., and WKYT (TV) Lexington, Ky.

**DRY RUN ON FCC’S FORMS**

Proposed program and logging procedures undergoing tests at Georgia radio-tv stations

Field tests of the proposed new FCC program and logging forms will start this week under auspices of the Georgia Assn. of Broadcasters.

The practical side of this new approach to paper work at stations is being tested under GAB auspices by WDEC Americas, Ga., daytimer, which has developed a proposed form designed to meet the requirements laid out in tentative FCC regulations.

Other Georgia stations are conducting similar tests. WCON Cornelia, operating fulltime, will test the WDEC form over the week on a 24-hour basis. WDEC is owned and managed by Charles Smith, GAB treasurer. Tests are being conducted individually by WGAU Athens, operated by H. Randolph Holder, GAB president; WWGS Tifton; WROM Rome; WSFT Thomasville; two television stations, WSB-TV Atlanta, and WTVM (TV) Columbus.

Results of these experiments will be submitted to the South East Radio-Tv Seminar Sept. 15 at the Biltmore Hotel, Atlanta (Broadcasting, Aug. 21).

In addition NAB is planning sponsorship of a series of tests covering different station categories but its list had not been announced at the weekend.

Mr. Smith said WDEC will conduct a stop-watch test for a full seven days. The special program form is 11½ inches wide, split into parallel program and announcement sections with numerical and alphabetical symbols for types of programs and rendition. GAB is paying printing costs plus salaries of extra people used in the test.

Normally his log could be typed in one hour each day, Mr. Smith said, but he estimated the new form would require at least two hours a day. Two sets of logs will be kept to provide basis for comparison.

Presidents of seven state broadcast groups will be represented at the Sept. 15 conference. Vincent T. Wasilewski, executive vice president-elect of NAB, will attend. It was not certain at the weekend whether NAB President LeRoy Collins would be present. North Carolina, Kentucky, Tennessee, South Carolina, Alabama, Mississippi, Georgia and Florida will be represented. James L.
A possum puts tv bugbear into perspective

Coming like a cool summer breeze after the hot blasts of the Senate’s Juvenile Delinquency Subcommittee headed by Sen. Thomas Dodd (D-Conn.), a booklet on children and tv suggests the real solution to guarding children from the perils of television lies in parental guidance.

The booklet, published by the Department of Health, Education & Welfare’s U. S. Children’s Bureau, concludes that the parent’s hand on the tuning knob can do more than program censorship or blackouts of the family tv set.

Pogo’s Primer for Parents (Tv Division), drawn and written by newspaper cartoonist Walt Kelly, treats the subject humorously and lightly. It chides parents who abdicate responsibility by using the tv set as a babysitter and who permit their offspring to pass the saturation point of unsupervised viewing. If parents would share children’s viewing and by explaining programs set them in perspective, they would have no reason to fear the effect of television on their children, the booklet concludes.

HEW Secretary Abraham Ribicoff, who introduced the booklet at a news conference Thursday declared: “Tv viewing comes down to the responsibility of parents.”

The personable possum Pogo, Albert Alligator and the rest of the comic strip crew caper through the booklet’s pages, sugarcoating the philosophical pill to the point where it can be digested by even the most outraged congressman.

Comments the booklet: “It is not necessary to censor. It is necessary to guide. Strong interest in the bizarre by any child deserves a few questions to find out why. The child needs someone to talk to. The overload of some features, monsters, etc., needs relief, not the bigger jolt each time. This prevents the creation of

Howe, WIRA Fort Pierce, Fla., will moderate the meeting. He is NAB director for the association’s fifth district. Other NAB board members in the region have been invited.

NAB and FCC executives met informally Aug. 21 to discuss problems created by the new forms. Taking part in the conference for the FCC were Kenneth A. Cox, chairman, Broadcast Bureau; James Juntila, assistant chief of Broadcast Bureau, and Hy Golden, chairman of the bureau’s economics division. NAB was represented by John F. Meagher, radio vice president; Mr. Wasiakowski and Douglas A. Anello, general counsel.

Six join IMN

Intermountain Network, Salt Lake City, has announced the addition of six new affiliates. They are KBOL Boulder, KFTM Fort Morgan, KVFC Cortez, KDGO Durango, all Colorado; KUTA Blakings - Monticello, Utah; KBRV Soda Springs, Idaho. IMN now has 55 affiliates.

Anthony estate left in confidential trust

Will and seven codicils of the late Earl C. Anthony, owner-president of KFI Los Angeles, filed for probate in that city Aug. 21, left the bulk of his estate in a trust fund, with details confidential.

Personal property, valued at about $100,000 was bequeathed to his only son, Earle Kelly Anthony, under a codicil signed May 6, 1955. Mr. Anthony had created a trust fund into which he had placed all other assets. This codicil, accordingly, made terms of the will and of all the other codicils inoperative.

Signed May 16, 1950, the will had provided not only for his son, but for several friends, relatives and employees. Included, according to the Superior Court probate petition, was Miss Georgiana Williams, his San Francisco secretary who had been left $200 a month providing she did not marry. After provisions for the other individuals, most of the remainder of the estate had been placed in trust for the benefit of the son. Upon his death the proceeds were to be divided equally between the University of California at Berkeley and California Institute of Technology (Caltech). Mr. Anthony, 80, died in San Francisco on Aug. 6.

WQXR-FM begins stereo during early morning

WQXR-FM New York began multiplex stereo broadcasting at 1 a.m. Aug. 24. The station said it is first in the New York area to offer the new service.

The early morning programming is a test run to be broadcast weekdays 1-2 a.m. EDT, until Sept. 7. After that date, the first fm stereo multiplex evening program will be transmitted on WQXR’s new “Adventures in Sound” series to be presented under the sponsorship of Fisher Radio Corp. every Thursday, 10:05-11 p.m.

WLIR (FM) Garden City, N. Y., will begin fm multiplex stereo broad-
an addict. Other child activities siphon off energy, but this energy can be used badly after bad tv exposure. Above all, love the child."

Mrs. Katherine B. Oettinger, chief of the Children's Bureau, states in the preface: "We believe, with Mr. Kelly, that parental selectivity of television fare for children can be a means of broadening their understanding of the world we live in and the culture which is our heritage."

The bureau reports that broadcasters have shown pre-publication interest in obtaining copies of the 28-page pamphlet to distribute as a public service. Copies are available from the Government Printing Office, 20 cents per copy, with a 25% discount on orders of 100 or more.

Putnam calls rally of uhf operators

A rally of uhf television broadcasters is scheduled today (Monday) in Springfield, Mass., with the host, William L. Putnam, who is director of four uhf stations in Massachusetts.

Mr. Putnam, acknowledging he sent invitations to all uhf operators east of the Mississippi River, said last week his purpose is to "capitalize on the FCC's proposals regarding deintermixture. These are the rulemaking notices issued by the FCC early this month proposing to delete the single vhf channel in eight communities (BROADCASTING, Aug. 7).

Alluding to the activities of the Assn. of Maximum Service Telecasters, which is firmly against deintermixture, Mr. Putnam pointedly referred to the AMST meeting in Florida shortly after the FCC announcements. At this meeting the AMST board discussed the commission's proposals—including plans to drop in vhf channels in eight cities at short mileage separations (BROADCASTING, Aug. 14). Mr. Putnam also offered a few trenchant remarks about the congressional activities of vhf operators whose channels are in jeopardy. "We’ve got to get busy to counter these ex parte pressures of politicians on the FCC," Mr. Putnam remarked.

In the last few weeks, the Connecticut congressional delegation, Rep. Carroll W. Kears (R-Conn.) and Rep. Peter M. Mack Jr. (D-III.) have expressed opposition to the FCC's proposed vhf deletions in their states.

Mr. Putnam was uncertain how many uhf broadcasters would attend the meeting, but said he had received about a dozen responses by the middle of last week. Mr. Putnam at one time was chairman of the Committee for Competitive TV, a uhf organization, but the group has not been active in recent years. Mr. Putnam said last week the Springfield meeting has no connection with CCT.

The Putnam stations, under the corporate umbrella of Springfield Televising Broadcasting Co., are WWLP (TV) Springfield, WRLP (TV) Greenfield, WWOR-TV Worcester and a permittee in Pittsfield, all Massachusetts.

Media notes...

TPT expands • TelePromTer Corp., New York, announced last week that it has bought community antenna tv systems in Houghton, Mich., and Johnstown, Pa., for the combined price of approximately $775,000. The number of catv systems owned by TelePromTer is now 11, according to Irving B. Kahn, TPT president.

New office • Hal Walton Assoc., New York, radio station representative, has opened a West Coast office under the management of Guy Biddick. The branch office is at 1046 S. Olive St., Los Angeles. A. J. Polley has been appointed new midwest manager in the Chicago office.

Esquire okay • Esquire Inc., New York, reports it will gross about $23 million in the fiscal year ending March 31, 1962, despite losses resulting from the recent suspension of its Coronet magazine. A. L. Blinder, Esquire president, said last week at a gathering of New York security analysts that the Coronet losses are expected to be made up by gains in the company’s eight other operating divisions, which includes ownership of WQXR Atlanta.

Setting up shop • WOKW Brockton, Mass., began broadcasting July 17 on 1410 kc with 1 kw. President of the new station is Alan C. Tindal and its operating personnel include: Guy B. Farnsworth, general manager; Curtis Hahn, program director; Jack Gibson, news director and Arthur Downer, chief engineer.

News bureau • A second news bureau has been established in Canada by MBS via a news and special programming arrangement with CKWX Vancouver, B. C. This agreement, similar to one made June 1 with CHUM Toronto, also provides for airing of MBS commercials.

Goal exceeded • The Southland Industries Inc. donated use of WOAI-AM-TV San Antonio for a simulcast which raised $134,000 through pledges for an addition to the Cerebral Palsy Center in San Antonio. Such personalities as Johnny Andrews, Peggy King, Jayne Mansfield and her husband, Mickey Hargitay, participated in the campaign. Dennis James acted as master of ceremonies.

KPAL joins ABC Radio

KPAL Palm Springs, Calif., became the 388th affiliate of ABC Radio at its recent network affiliates meeting in New York (see story, page 73). Harry Maizlish owns KPAL, 1450 kc with 250 w.

WASILEWSKI, SWEZEY OK'D
NAB board votes to accept Collins choices;
code trouble brewing in tv liquor campaign plan

Two appointments of top NAB staff
executives have been confirmed by the
NAB board of directors, according to
an unofficial tally. They are:

- Vincent T. Wasilewski, now gov-
 ernment relations vice president, to be
  executive vice president and ranking
  operations head of the association, and
- Robert D. Swezey, a network and
  station executive of long experience, to
  be administrator of the NAB radio and
  television codes.

The appointments for these newly
created offices were submitted to the
board for confirmation Aug. 14
(BROADCASTING, Aug. 14) but no an-
nouncement was made at that time by
the association. NAB President LeRoy
Collins proposed the appointments Aug.
10 to the NAB Advisory Committee,
which voiced its approval.

While NAB said officially it would
have no statement for some time, it
was learned the board tally at the week-
end was heavily in favor of the appoint-
ments. Some of the votes were said to
have included explanatory comments
such as that the new executive vice
president is not a broadcaster as origi-
nally contemplated by the board.

It was believed both new executives
would take office after the Labor Day
holiday. Mr. Wasilewski has remained
in Washington most of August during
the vacation absence of Gov. Collins.
John F. Meagher, radio vice president,
has been in charge during this interval.

Incomplete • Final planning for code
administration will not be complete for
some time. At present two executives
are in charge of the tv code structure—
Edward H. Bronson is director at
Washington headquarters, and Stockton
Helfrich is director at the New York
office. The staff includes Harry Ward,
assistant director in Washington, and
Frank Morris, assistant director at the
West Coast office in Los Angeles.

Jim Gillis is executive assistant in
the Hollywood office, which reports to
Mr. Bronson. Warren Braren is assist-
ant director in New York. Peter Friend,
administrative assistant in Washington,
is in charge of monitoring.

Mr. Swezey has indicated his willing-
ness to take the NAB code post. He is
in Europe now and could not be
reached, but there was not believed to
be any uncertainty about his acceptance
of the assignment.

E. J. Hartenbower, KCMO-TV Kan-
sas City, is chairman of the NAB Tele-
vision Code Review Board.

Charles M. Stone is radio code direc-
tor, stationed in Washington. This code
structure is just a little over a year old;
it went into operation July 1, 1960,
when the old Radio Standards of Prac-
tice setup was converted from a volun-
tary pledge format to the new Radio
Code which has a fee system and pro-
vision for enforcement. It was then
opened to non-NAB members. Cliff
Gill, KEZY Anaheim, Calif., is chair-

Ups and Downs • The radio and tv
codes have operated independently.
Television code enforcement has dealt
seriously with such matters as triple-spot-
ing, indecent costuming, excessive vio-
cence, beer drinking in commercials and
intimate personal products. At one
time a score of stations dropped out of
the tv code because they insisted on ac-
cepting a hemorrhoid account. The tv
code rode out this crisis and now sub-
scriptions are at an all-time peak of
390 stations, the three networks and
22 film affiliates. The radio code has
1,344 subscribers of which 117 are non-
NAB members.

Currently the radio and tv codes are
both confronted with an advertising
campaign by Publicker, a large inde-
pendent distiller (BROADCASTING,
Aug. 21). NAB has found no instances in
which code-subscribing stations have
accepted the business. Last week a
stern warning came from Capitol Hill
on the possibility that liquor advertising
on the air could lead to restrictive legis-
lation.

Appointment of Messrs. Wasilewski
and Swezey leaves one major opening
at the NAB—the tv vice presidency
formerly occupied by Charles H.
Tower, who resigned to accept a top
executive post with Corinthian Stations.
When NAB’s new research project is
set up there will be the problem of se-
lecting a director.

NBC birthday meet Dec. 6-8

NBC will hold its 35th anniversary
celebration Dec. 6-8 in conjunction with
the annual convention of its tv and
radio affiliates in Hollywood.

A highlight of the three-day meet-
ing will be what is described as a major
address by NBC Board Chairman
Robert W. Sarnoff. The program also
will include tv and radio meetings at
convention headquarters in the Beverly
Hilton Hotel. Affiliates will visit
Disneyland and key production centers
where programs for NBC-TV’s 1961-62
schedule are being filmed. Overseas
affiliates and associates of NBC Inter-
national also will attend the convention.

The NBC anniversary dinner will be
held Dec. 7 at the Beverly Hilton.
The new executive vp: a straight thinker with straight approach

The softest-spoken executive around NAB headquarters the last dozen years has been deeply involved in most of the regulatory and intra-industry crises that have confronted the association.

Vince Wasilewski was fresh out of U. of Illinois law school when he joined NAB in 1949. At first he was mostly a book lawyer. But this boyish-looking counsellor began to attract attention through his thoughtful briefs and reports.

Within four years he had become chief attorney of NAB. This job not only brought him in contact with broadcasters and their problems it had a more important angle—he became the association's front man in many of the formal and informal sessions with legislative and regulatory agencies. Besides he was the man behind many of the important decisions made by the board and the association's president, Harold E. Fellows, in the routine execution of NAB functions.

His fetching grin is known to thousands of broadcasters who have dealt with him at close range during NAB committee meetings, annual conventions and fall conferences. These contacts were enhanced by his appointment in 1955 as NAB's government affairs director or chief lobbyist and as government relations vice president in 1960.

In the lobbying role he has developed wide respect on Capitol Hill and around the FCC. His approach is direct, quite in contrast to the popular conception of a Washington lobbyist as a suave and slick hand-shaker who provides refreshments at the Capital's flossiest joints.

He prefers to sit down with a senator or congressman, explaining the association's position and talking over all the angles. In an era when public officials and the public are fed huge literary doses of anti-broadcasting propaganda and rubbish this straight-forward approach is proving effective.

He thus brings to his new NAB post extensive background in the association's basic function—preservation of the free broadcasting system. Most of his experience has been in the lobbying and legal roles. The executive vice presidency will test his administrative ability as he assumes the basic function of serving as a sort of combination managing director, counsellor, lobbyist and traffic cop for operations.

The new code director: an experienced hand for a touchy job

There are two sides to Bob Swezey, the executive—both of them effective. Mostly he's mild and congenial. And then sometimes he isn't. That's when he's working on a problem or project, or when he's annoyed at inefficiency or delay.

He seldom raises his voice, but he has a knack of commanding attention in a group when he chooses to state a case. Backed by legal experience and a discerning mind, he can wrap up a situation in clear though sometimes involved terminology. But usually when he lapses into the jargon of the barrister it's because the subject is complicated and he's doing a thorough job of sorting out the details to put them into perspective.

Sometimes when he's at his mildest, the comments he utters in a familiar, Harvard clipped accent can be devastating. And sometimes when he's actually in a friendly mood, his touch of aloofness can be misinterpreted by those who don't know him well.

The new code administrator approaches the problem with the benefit of extensive background. He was one of the two tv members of the NAB board in the 1949-51 period when the young television industry was concerned over the problems created by violence, extreme costuming, bad taste and similar excesses. The need for a tv code was acute, and he became deeply immersed in the task of drawing up a manual of ideals and methods for tv.

A number of changes have been made in the code since it became effective in 1952 but it is essentially the same document and it reflects the Swezey influence in every paragraph. Besides his major role in writing the code language, he sparked the campaign to get it adopted by the association and then the rest of the industry. He also helped write the radio standards of practice.

In all, he has served eight years as an NAB director, two as vice-chairman of the tv board. He moved from New York network posts into station operation in the late '40s as general manager of WDSU-AM-TV, acquiring a minority stock interest which he sold last year to the Stern family, majority owners. During the last months of the Eisenhower administration he served as consultant to Secretary of Labor Mitchell.

He is a graduate of Harvard law school.

His broadcasting career started in 1939 as the result of a paper on freedom of speech on the air, written while taking post-graduate studies in Washington. He was working in government offices at the time. He sent a copy of the paper to NBC which promptly hired him.
RKO REP SEMINAR
National Sales Division readies for Oct. 1 start

The newly-formed National Sales Division of RKO General Inc. held a indoctrination seminar for its sales staff in New York all last week to prepare for beginning operation Oct. 1.

On that date, the new unit becomes national sales representative for the RKO General-owned stations, including WOR-AM-FM-TV New York, WNAC-AM-TV and WRKO-FM Boston, KJH-AM-FM-TV Los Angeles, CKLW-AM-FM-TV Windsor-Detroit, WHBQ-AM-TV Memphis, KFRC-AM-FM San Francisco, WGMS-AM-FM Washington, D.C., and the Yankee Network. During the week, presentations on film and tape were made to the newly-appointed sales executives, for which they will be selling.

New Sales Executives • Donald F. Quinn, director of national sales, introduced 13 sales executives who have joined the new division.

Radio sales executives and their last affiliations are: Richard J. Kelliher, national sales manager in New York for KJH and KFRC; H. W. (Bud) Simmen, sales manager for Weed Radio Corp.; Thomas J. Green, Jr., account executive of WBIC Bayshore, N. Y.; James H. Fuller, account executive, CBS Radio and Victor E. (Buck) Forker, general manager, WDRC Hartford, Conn.

Television sales executives and their most recent affiliations are: Gordon Lawhead, national sales manager in New York for WHBQ-AM-TV; Gerard N. Molfese, national sales manager in New York for KJH-TV; James V. Marino, account executive, WCBS-TV New York; James A. Gates, national sales manager in New York for WNAC-TV; John G. Fernandez, general sales manager, WNTA-TV New York; Sidney P. Allen, national sales manager in New York for CKLW-AM-TV; Richard P. Colburn, account executive, Blair-TV; and Morton Zimmerman, account executive, WNTA-TV.

Other appointments announced were those of Robert E. Wilke as director of corporate relations, and of Frank G. Boehm as director of research and promotion. Mr. Wilke formerly was manager of national account sales, for Edward Ehrbar Inc., and Mr. Boehm was vice president of research, promotion and advertising for the Adam Young Companies.

Speakers at the seminar last week included Thomas F. O’Neill, board chairman of the General Tire & Rubber Co. (parent company of RKO General); Hathaway Watson, vice president for broadcast operations of RKO General, who discussed broadcast policies and standards, and the sales managers of the company’s radio-TV stations.

The National Sales Division of RKO General is expected to announce shortly the appointment of personnel to branch offices in Chicago, Los Angeles and San Francisco. Additional sales offices may be added later.

RKO General stations currently are being represented by H-R Representatives, Young Television Corp., Robert E. Eastman Co. and Avery-Knold Inc.

Changing hands
ANNOUNCED • The following station sales were reported last week subject to FCC approval:

• KCSJ-AM-TV Pueblo, Colo.: Sold by Bankers Life & Casualty Co. to Metropolitan Television Co. (KOA-AM-FM-TV Denver) for $1,250,000. Metropolitan, which plans to resell KCSI, is owned by Bob Hope. William Grant and others. No changes in KCSI-TV personnel are contemplated, Mr. Grant announced. Jim Croll will remain as station manager. Ralph Radetsky, KOA stations manager has been named executive vice president of Metropolitan as well as general manager of the Denver properties. it was also announced. KCSI operates on 590 kc with 1 kw fulltime. KCSI-TV, which went on the air in 1953, operates on ch. 5. KOA-TV is an NBC-TV affiliate.

• KUAL-TV San Antonio, Tex.: Sold by Raoul A. Cortez and associates to

Clyde Hunt to AMST post

Clyde M. Hunt, vice president for engineering, Post-Newsweek stations (WTOP-TV Washington, WJXT [TV] Jacksonville, Fla., and 46.2% interest in KOGO-TV San Diego), has been named chairman of the technical committee, Assn. of Maximum Service Telecasters. Mr. Hunt succeeds Henry E. Rhea, director of engineering, Triangle Stations. Mr. Rhea will remain as a member of the committee which also includes John H. DeWitt, Jr., WSM-TV Nashville, Tenn.; Thomas E. Howard, WBTV (TV) Charlotte, N. C.; Phillip B. Laeser, WTMJ-TV Milwaukee, Wis.; Carl G. Nopper, WMAR-TV Baltimore, Md., and Orrin W. Towner, WHAS-TV Louisville, Ky.
Spanish International Broadcasting Corp. of Texas for approximately $200,000. Spanish International includes Emilio Azcarraga, Edward J. Noble, Mr. Cortez, with 20% each; Frank F. Fouce, 35% and Julian Kaufman, 5%. Mr. Azcarraga is a Mexico City broadcaster and theatre chain owner; Mr. Noble operates an advertising agency in Mexico City; Mr. Fouce is the owner of a chain of Spanish language theatres in the Los Angeles area, and Mr. Kaufman is general manager of XETV (TV) Tijuana, Mexico. The same group, minus Mr. Cortez, is applying for ch. 34 in Los Angeles. Programming staple is expected to be Latin American TV product. KUAL-TV operates on ch. 41 and went on the air in 1955.

**ABC RADIO GETS TOUGH**

Cancellations for failure to clear cited at meeting

ABC Radio claims it has adopted a tougher policy toward affiliates which fail to give full clearance to network service.

During the past year, 16 stations were "cancelled" and 14 of them replaced, Earl Mullen, ABC Radio's national director of stations, told an affiliates meeting last week in New York. It's reliably reported that Mr. Mullen has 10 more such cancellations on his desk "ready to go out." Mr. Mullen placed the total ABC Radio affiliate lineup at 388, and said ABC Radio has added 66 stations which clear all the network programs.

The New York regional meeting—the first in a series—was presided over by Robert R. Pauley, ABC vice president in charge of ABC Radio. Among the highlights:

- A plan to serve affiliates with Flair, a national program service, on a regional basis as well.
- A favorable sales picture this year.

At the meeting, attended by some 75 station executives, Leonard Goldenson, American Broadcasting-Paramount Theatres president, underscored the opportunity for radio stations to "progress with a top radio network," and pointed to ABC-owned WLS and WABC in Chicago and New York respectively, as stations which have become successful with "strong network backing."

The Flair programming is beginning to bring financial reward, as well as acceptance, the affiliates were informed. The Flair service to start in the fall will feature personalities in programming provided regionally. The method will include individual regional "hook-ups" using one affiliate as the feeding point. While one region obtains the regional

ABC Radio and affiliates held the first of four regional meetings in New York. Shown in this photo are (l. to r.) Roy E. Morgan, WILK Wilkes-Barre, Pa.; Leonard H. Goldenson, AB-PT president; John Murphy, WLW Cincinnati; personality, the rest of the network would carry the national broadcast. (The station receives a special tape including the regional spot and feeds the programming to all other stations on the line as in the broadcasting of "split commercials" in various parts of the country. For example, when ABC broadcast a heavyweight championship bout, Carlings beer sponsored the fight in certain areas while Studebaker took it in other markets.)
Let's you and him fight—off screen

NOW TV VIOLENCE IS FALLING ON THE CUTTING ROOM FLOOR

A self-imposed nationwide effort to lessen "violence" on the television screen is underway. It is principally at work at production studios in Hollywood and network offices in New York.

A Broadcasting check of executives at the networks, advertising agencies and production companies reveals this pattern:

- A conscious policy has been established to stamp out all brutality and violence where they are not essential to the story line, the writer and producer are expected to lessen or "temper" the violence.

It's also revealed that although most close observers of TV programming expect the "anti-violence" movement to reach a peak in the 1962-63 season—and all evidence certainly points that way—he-de-emphasis on the more shocking incidents is already discernible on the TV screen. For example:

- The networks, wherever possible, have been selecting those episodes from series with a minimum of "shock violence" (as it is expressed by some programmers) for summer reruns.
- Network continuity acceptance people are reported by agencies and producers to be on the scene in Hollywood. The networks have always maintained some watch over violence, but the scrutiny has become more intense. As expressed by a programming senior vice president at a New York advertising agency: "They are now doing what they always were supposed to do."

According to authoritative sources, the first signs of a truly overall policy—more "understood" than directed—began last June, a month after the now famous "wasteland" speech of FCC Chairman Newton N. Minow at the NAB convention. But, this information reveals, the industry (particularly the networks) already was actively engaged as early as last spring in a downhill on sex and violence in material being prepared for network exposure in the 1961-62 season.

Sexless Standbys • Portending a possible note for the future—and not just an incidental one—was the report last week that at least two networks (CBS-TV and NBC-TV) were active on the West Coast lining up properties as replacements for the 1961-62 season. They'll be used as needed, of course, and as the word goes, "they are sure to be non-violent."

Starting this fall, as a general thing, there undoubtedly will be fewer killings per episode, fewer and shorter fistfights, probably fewer barroom scenes and less drinking, and quite possibly more plot resolutions accomplished by peaceful means or at least by means short of the death of the villain. If he has to be killed, chances are the workmanship will be good enough to finish him off with one or two shots instead of requiring a fusillade.

Last April, when the new fall schedule was pretty well set, NBC executives went to Hollywood (before FCC Chairman Minow's "wasteland" blast at violence, incidentally) and conferred with the producers of all NBC-TV shows slated to come out of Hollywood this
The NBC group consisted of James A. Stabile, senior staff vice president, representing the NBC-TV network; David Levy, then vice president in charge of network programming, and Ernest Lee Jahncke, Jr., director of standards and practices, representing NBC management.

Some of the highlights of those conferences, although not necessarily representing decisions that NBC had not or would not have taken in comparable circumstances in prior years, reflect some of the problems that face all broadcasters in connection with "violence." For instance:

- The day and hour at which a program is shown can require special care in production. Thus the producers of Tales of Wells Fargo, which is moving to Saturday night, were reminded that there would be more children in the audience than if the show were presented on a school night, and hence extra care should be taken. Friday night is the other "non-school night" that needs special attention for the same reason. In addition, producers of all early-evening programs were reminded that they would be playing to audiences with a high proportion of young people.

- Producers of color programs were admonished not to forget that blood looks awfully bloody when it's seen in color. This applied to such action shows as Bonanza, Wells Fargo and Laraine. Audiences can identify themselves more intimately with shows having contemporary settings than those with period backgrounds. Thus "violence" that might seem natural in a Bonanza or other western setting, or in Macbeth, for that matter, might easily seem overdone in programs portraying contemporary events.

- The "cumulative effect" must be kept in mind. A little violence spread over several shows may seem like much more than it really is to the viewer who watches throughout the evening. Thus the producers of Thriller were reminded that they were moving to a later hour this fall, their show would be back-to-back with 87th Precinct and hence both shows should be especially careful.

The producers—all of whom were described as "most cooperative" in these briefings—also were urged by the NBC officials to work closely with the network from the inception of program ideas, much as agencies work with network authorities in getting clearance on commercials at all stages from the storyboard on. The emphasis here was on the economies of close cooperation: By getting network approval at each stage the risks of extensive re-shooting—even re-writing—are minimized.

The importance of advance clearance was dramatized some time ago when Alfred Hitchcock submitted an idea for a program, to be called "Two Bottles of Relish," in which the central figure would be found not only to have killed his wife, but also to have been eating her body. Fortunately, the idea had not been committed to script when it was submitted—and rejected.

The advantage of clearance also was dramatized—in opposite fashion—when, according to reliable sources, a completed episode of The Lawless Years, a summer series of NBC, was challenged as unsuitable for broadcast. After extensive review and discussion, the episode was thrown out—a $50,000 loss (in this case, by any reckoning the loss was to NBC, since the producer is California National Productions, an NBC subsidiary).

More Of The Same • CBS' position on the overall question of violence is that it simply is following the same standards it has traditionally followed, with no special meetings or orders to intensify this procedure.

"I don't want to sound sanctimonious," said William Tankersley, CBS-TV director of program practices, West Coast, "But we have always insisted that if there is violence, it must be necessary to the script. So we're not doing anything really, that we haven't always done,"

The one exception he made was to note that producers of CBS-TV shows have been advised to use caution in excerpting scenes for promotional use in trailers and teasers. The purpose is to avoid creating the impression, through the selection of such material, that a program contains more violence than it actually does. "If a program has only one bit of violence in it, and if that scene is used for trailers or teasers, viewers could get the impression that the show is full of violence," Mr. Tankersley explained.

Clean-Up in Action • Here are some examples of the toning-down that has been going on:

Target: The Corruptors (new show, ABC-TV. Fri., 10-11 p.m.: (1) The name has been changed from just The Corruptors in an apparent attempt to emphasize that the corruptors are the villains, (2) a sequence from the pilot was deleted after the Senate Committee on Juvenile Delinquency asked for a preview. The deleted portion was reported by those who watched the pilot to have been particularly brutal and unnecessarily devoted to shock violence. Soon after the committee asked for the pilot, ABC-TV is said to have informed the senators that the show was being changed because it did not come up to network standards. The pilot was said to have been filmed by Four Star Television as long ago as last November.

Cain's Hundred (new show, NBC-TV, Tues., 10-11 p.m.): The pilot made on this series, though not intended as a sample of the first show to be slotted, was described as containing a particularly "rough" format, dealing with prostitution and dope and devoting footage to a graphic presentation of a girl undergoing a violent withdrawal from dope. Though this pilot was shown to agencies and advertisers early in the selling season, NBC-TV reportedly in early August (before the series was sold out) substituted rush prints of the introductory films setting the theme of the series as a showcase to potential sponsors. MGM-TV is the producer.

Investigators (new show, CBS-TV, BROADCASTING, August 28, 1961

Fall show criticism parried by Sarnoff

NBC Chairman Robert W. Sarnoff let fly last week at the "very chic current cliche that the early setting of new fall schedules this year means they will contain nothing new or distinguished to meet current charges of sameness and lack of responsibility.

Actually, he said, "the season ahead, as a result of conscientious planning over the long term, is an uncommonly promising one." He said he believed this to be true of television as a whole as well as NBC specifically.

Writing in one of his periodic letters to TV-radio editors, Mr. Sarnoff said it is "naive not to say cockeyed" to think that "we are all simply stuck with" the 1961-62 schedule because it was locked-in earlier than usual.

The early lock-in, he said "reflects a continuing trend toward spending more time, thought and effort on program preparation and actual production in the interest of greater scope and quality. That is why we are not only already planning our 1962-63 schedule but have actually begun development work on some 1963-64 programs."

He cited NBC's new schedule as evidence of freshness that will be seen in TV this year. More than 60% of the NBC fall lineup will consist of new programs that are "the result of planning and development that go back from six months to as much as two years," he asserted.
LET'S YOU AND HIM FIGHT-OFF SCREEN continued

Thurs., 9-10 p.m.: CBS reportedly has been pressuring for a tempering of any violence in this show. One script is in a third rewrite stage. MCA-TV is the packager.

RCA and Eastman Kodak, advertisers on the new Walt Disney Show (NBC-TV, Sun., 7:30-8:30 p.m.) that will be telecast in color next season, have warned Disney people to be careful not to show gory details in the real-life adventure segments.

Similarly Chevrolet is said to have told producer-off Bonanza (an NBC-TV show in the 9-10 p.m. period on Sunday) that violence ought to be avoided. It’s noted that the Chevrolet identity with the light-format of Dinah Shore in the past might be jolted in view of viewers’ minds if the auto maker were suddenly associated, as the sole advertiser, with a show hyped with emphasis on sex and violence.

The Producers’ View • Many producers were reluctant to identify themselves and those who offered opinions were cautious, but the definite impression that emerged was that networks have emphasized to producers that violence must be minimized.

William Dozier, vice president in charge of west coast activities for Screen Gems, stressed that the company’s two action-adventure series, Route 66 and Naked City, are not considered to be “violent.” But he added that SG is “very mindful” of the present atmosphere and is making certain that there will be a “low degree” of violence in upcoming shows.

Tom McDermott, executive vice president, Four Star Television, stated: “Excess violence will not and should not be a part of the television scene. The people buying shows are not apt to buy if they do have violence—the climate today being what is. Four Star to date has had no problem in this area.”

An official of MCA-TV said the company’s producing arm, Revue Productions, has attempted in the past to minimize violence but today is keeping “a closer watch” to make certain that its programs will not contain any sequences that might be termed offensive to viewers or to government officials.

Frank Morris, assistant director of NAB tv code affairs, West Coast, noted that sharper scrutiny of programs by producers extends to syndication as well as network shows. He said there is a marked contrast between programs filmed for the upcoming season and those for previous seasons.

“I think this about face was brought about largely because of first-hand experience that producers, directors and writers have gained in appearing before various congressional committees. I think the net result will be that there will be a better job of characterization, dialogue and plotting on programs to be carried during the upcoming season. The 1962-63 season will offer a better balance and a choice of escapist programming and programming of a more intellectually-stimulating quality,” Mr. Morris said.

Agencies and Writers • Agency officials reported they had been advised by networks and producers that programs would become “less violent” as the season progresses this year. Some executives said that some of the pilots they seen in the spring were “rugged” but they had been assured more recently that excessive violence would be modified in subsequent episodes.

Television script writers reached in Hollywood and New York said the message has filtered down to them that the “line” for 1961-62 and for next year is this: less violence, more characterization and story depth.

Irwin Winehouse and A. Samford Wolf, a team with credits including Peter Gunn, Laramie and Sunset Strip, reported that a script they had finished for NTA’s The Third Man had been rejected because the story editor thought “there was just too much violence in it.” They said they were rewriting the script to indicate that a violent act had occurred without actually showing it.

John Falvo, a Hollywood writer, said he had submitted a script for CBS-TV’s upcoming Investigators series and it had been returned to him for rewriting. He added that the script is now in the third rewrite stage, pointing out that a writer must be skillful enough to indicate conflict but at the same time keep this element in perspective.

Dale Wasserman, a well-known New York tv and motion picture writer, summed up the problem of scenarist in the present atmosphere in this way:

“there is nothing wrong with violence if it is an intrinsic element of a story. The gratifying kind—that is, violence for the sake of violence—is distasteful and dishonest. I hear from some of my Hollywood colleagues that some of the suggestions border on the ridiculous. Right now I’m engaged in writing a script called ‘Dynamite’ for the hour-long Crime of the Century series that is being produced by David Susskind and written under by CBS-TV. Violence is an integral part of the story since it deals with the dynamiting of the Los Angeles Times plant. The network knows the subject of my script, but it will be several weeks before they see the finished work. I don’t anticipate any trouble.”

Ehrlich firm to make live, film tv programs

The formation of Aaron Ehrlich Enterprise, New York, to produce live and film television programs was announced last week by Aaron Ehrlich, president. Temporary headquarters has been established at 211 W. 53d St., New York, N. Y. Telephone is Circle 7-5588.

The first project of the new company is a one-hour special based on the motion picture, “West Side Story.” The program, according to Mr. Ehrlich, will be a “biography of a motion picture, from the time it is conceived until the time it premieres.” He is discussing sponsorship with several advertisers, he said, and hopes to have a sponsor by the time the motion picture premieres on Oct. 18. Two half-hour series the company plans to produce are titled International Airport and Legend, which will dramatize U.S. folk legends.

Mr. Ehrlich, a one-time artist and designer, was associate producer of CBS-TV’s Person to Person program from 1952-60 and for the last year has been a freelance producer-director of CBS-TV’s Garry Moore Show and the Buff Cobb Show on WNTA-TV New York. He is credited with creating many of the visual effects shown on Person to Person.

NEW CONTROLLABLE RE-AMP EXPANDS CONSOLE

AIRFACE P/P (Parallel Pot) Units connected in parallel and fed into a single input channel on existing console provide additional audio controls at low cost. The AIRFACE P/P revolutionary advanced solid-state design furnishes near perfect response and minimum maintenance.

SPECIFICATIONS: gain, 40 DB; input level, -70 to +14 DB. response, 10 to 100,000 cps ± 15 DB; noise, below measurable; distortion, below measurable; im- pedance, input 150/500/600, output 600; power require- ment, 24 VDC & 200 ma; size, 414 X 4 3/4 x 7 1/4 depth with 1/8 inch mounting lip all around front panel; price, turntable P/P $117.50, tape recorder P/P $97.50, power supply $46.25.
Lonesome George picks up a bundle

Gomalco Productions, a partnership owned by George Gobel and David O'Malley, has sold its 50% interest in the Leave it to Beaver television series for $1 million cash to Revue Productions.

Mr. Gobel, presently in New York for rehearsal of his debut at the Eugene O'Neill Theatre, decided, together with Mr. O'Malley, to sell as a result of his Broadway commitment. Gomalco Productions, however, will remain active and plans are going forward for several tv specials.

The Beaver series currently is being filmed for the 1961-62 season. Joe Connelly together with Bob Mosher, creators and writers, retain their interests.

Film sales...

Ripcord (Ziv-UA): Sold to National Tea Co. for WGN-TV Chicago; and Hartz Mountain Productions for WRCV-TV Philadelphia. Also sold to WNAC-TV Boston; WTCI-TV Hartford, Conn.; WJAR-Providence; KSD-TV St. Louis; WFMJ-TV Youngstown; WCHS-TV Charleston, W. Va.; WBOY-TV Clarksburg, W. Va.; KNOX-TV Grand Forks, N. D., and KCND-TV Pembina, N. D.

41 Post-'50 Films (Warner Bros.): Sold to WNBC-TV New York.

Volume I and II Films of the 50's (Seven Arts Associated): Sold to WXEX-TV Richmond-Petersburg, Va. Vol. I is now sold in 104 markets and Vol. II in 39 markets.

Program notes...

'Expediton 13' - WAST (TV) Albany will present every third Monday evening, beginning Oct. 2 through June 11, 1962, a special as part of a series entitled, Expedition 13. The second special, to be shown Oct. 23, "Dorothy in the Land of Oz," is a ballet version of The Wizard of Oz. It is produced by WAST in cooperation with Lillian Sealey and the Tri-City Ballet Guild. "The Two Sisters," "Sleeping Beauty" and "Christmas Night" are among the specials to be presented in the series.

New drama series - The Dispossessed, a drama by Saul LeVitt, based on a true story in the fight for American Indian rights, has been commissioned as the premiere presentation in a series of six original hour-long drama specials to be broadcast on CBS-TV this fall. Westinghouse Electric Corp. is sponsor.

Stages of progress - John Campbell Films, Byram, Conn., has announced that its Progress Report II, featuring the amusement and entertainment aspects of the 1964 N. Y. World's Fair, is now in preparation. Progress Report I, on NBC-TV in April and later distributed nationally by Association Films, had 40 telecasts around the country.

Protect life and property - "Hurricane Disaster Action," a 4½-minute film and recording (b-w, 16mm), is produced by the American Red Cross and offered free to radio and tv stations. The package is available by contacting Red Cross chapters in the Atlantic and Gulf coast areas, which make up the Red Cross hurricane watch network.

New show - Screen Gems has signed Sydney Biddle and Fredrick M. Frank to do a new tv series, Ship's Doctor, starring Victor Jory. Ship's Doctor will be produced by Robert Sparks.

Blue chip package - M&A Alexander Productions has acquired tv rights to 27 feature motion pictures produced between 1953 and 1959 which will be released under the package title of 27 Blue Chips. Stars such as Gina Lollobrigida, Raymond Burr, Anthony Quinn and Lloyd Bridges are featured.

Exclusive distributor - Jim Ameche Productions has appointed Resono Productions as exclusive distributor of the Ameche line of syndicated radio programs. Robert Johnson is head of Resono, which has headquarters in Wichita, Kan.

Large supplier - Jim Ameche Produc-
Kameny sues filmer of Truman tv series

Kameny Film Productions, New York, sued Talent Assoc.-Paramount Ltd. for $1 million in New York Supreme Court last week over a proposed television series featuring former President Harry S. Truman.

The complaint alleges that Kameny originated and created “a unique television program for a half-hour series featuring former President Harry S. Truman in September 1959, first entitled Turning Point and then Mr. Citizen.” The complaint adds that Kameny submitted its program idea on July 28, 1960, to Talent Assoc.-Paramount Ltd. with the understanding that if the program were used, “the Kameny organization would be ‘reasonably compensated.’”

Kameny contends Talent Assoc.-Paramount Ltd. announced on June 6, 1961, its plans to produce a tv program featuring Mr. Truman. The idea and format for the program, the complaint asserts, were the same as had been submitted to Talent Assoc.-Paramount Ltd. a year earlier. Kameny charged that the proposed use by Talent Assoc.-Paramount Ltd. of “the plaintiff’s format and idea is in bad faith and was with full knowledge of the plaintiff’s exclusive right to the program.”

A Kameny official said last week the company has not been compensated by Talent Assoc.-Paramount and added that efforts to reach Talent Assoc. executive by telephone or at their office have been “fruitless.” Kameny also claims credit for creating both the cited series titles.

David Susskind, executive vice president of Talent Assoc.-Paramount Ltd., issued the following statement: “I have never heard of these people. None of my associates has heard of them. Neither Mr. Truman nor any of his associates has heard of them. There has been no submission of an idea so far as I know. This is a crank suit. It is utterly ridiculous.”

Prisoner documentaries offered in syndication

Crime and Punishment, a series of 39 half-hour personal documentaries taped behind prison walls, is now being distributed in syndication by Peter M. Robeck & Co., New York.

The series has already been sold, prior to announcement, to WNEW-TV New York; KTLA (TV) Los Angeles; WTTG (TV) Washington; WFAA-TV Dallas; WTVP-TV Peoria; WTV-P TV Decatur, III.; and KOVR (TV) Stockton, Calif.
KTTV (TV) becomes first signer with TAC

Robert W. Breckner (r), vice president and general manager of KTTV (TV) Los Angeles, completes the arrangements that make his station the first member of Television Affiliates Corp., which will exchange local station informational, educational and cultural programs among all TAC members (Broadcasting, July 31). With Mr. Breckner are (1 seated) Robert Weisberg, vice president, TAC, and Dick Woollen (c) KTTV vice president for programming and film buyer.

IBEW agrees with six Los Angeles indies

CONTRACT CALLS FOR BASIC $10, $7.50 AND $5 RAISE

New three-year agreement, covering technicians and engineers, has been negotiated by IBEW Local 45 with six Los Angeles area independent stations.

Union has been negotiating with the 17 area stations as a group, but singled out some of those with particular problems for individual negotiations and it was expected that several more will have signed the new agreement this week.

Contract with KRKD, KGIL, KBIG, KLAC and KGER calls for a $10 weekly increase the first year and $7.50 per week additional the second year. First six months of the third year, basic pay will be increased $5.00 weekly, with $2.50 per week added for final six months. Vacation time will be increased to four weeks after five years employment at station. Contracts are retroactive to June 30. Agreement with KFWB is $12.50 per week increase the first year with vacation time included.

Strike by AFTRA against KFWB Los Angeles went into its seventh week August 22 when both union and station rejected proposals made during an eleven-hour bargaining session called by Federal Mediator Jules Medoff.

AFTRA said it would accept a two-year contract for KFWB newsmen starting at $200 per week and going to $212.50 weekly for second year. Station's offer was $22.50 weekly pay increase for present employees regardless of how much over scale he now makes. New employees would receive $177.50 per week. Present weekly base scale is $155.

AFTRA, like IBEW began negotiating with the stations as a group but when KFWB refused the union’s demands, a strike was called against it. AFTRA also then refused to negotiate further with the group as long as KFWB was represented in it. The station group in turn refused to eliminate KFWB, with negotiations now at a stalemate.

Meanwhile, AFTRA has filed “strike-breaking” and “conduct prejudicial to the best interests of the union” charges against Gene Weed, former KFWB announcer, now stationed at KEWB. The union alleges he replaced Don French at the Oakland station on July 11 when the strike started and that French, who was expelled from AFTRA on Aug. 4, came to KFWB to replace members now on strike.

Charges will be heard Thursday night (August 31) at an AFTRA board meeting when four other announcers and disc jockeys of KFWB, including Art Nelson, Bobbie Hale, Hal Murray and Jack Colon, previously notified of similar charges by the union, will be heard at the same time.

At early board hearings, five former AFTRA members at KFWB were found guilty of "strikebreaking" charges and fined a total of $25,000 and expelled from the union. AFTRA has ignored resignations and thus far hasn't collected on the imposed fines (Broadcasting, Aug. 7).

CBS-TV, Menotti call off contract

CBS-TV and composer Gian Carlo Menotti have agreed to cancel their contract for a musical work Mr. Menotti prepared especially for the network. The rights have been returned to the author.

Mr. Menotti delivered the work before the arranged deadline of Feb. 1. Gerald J. Leider, director of program sales for CBS-TV said: "We had a difference of opinion about how to proceed—whether to insert music in one place or another."
RCA HOME SET PROFITS UP

Net after taxes is highest since 1950;
sales best since comparable 1957 period

RCA reported Friday (Aug. 25) that January-June this year was the most profitable first half-year period in its home instrument operations since 1950.

While no hard figures were released, President John L. Burns revealed that:

- Profit after taxes in the period for this phase of business was 4% above the first six-month total of 1955, RCA’s previous high in the past decade.
- Total home instrument sales were the best for the period since 1957.
- Color TV receiver profits were 45% ahead of the initial six months of 1960.
- The home instrument operation takes in the development, manufacturing and marketing of color and black-and-white TV receivers, phonographs and radios.

Mr. Burns said the color TV returns were especially significant “since color TV set manufacturing and marketing first turned into a profitable venture in 1959 and then in 1960 reached the seven figure profit level.

“At the same time,” he continued, “black-and-white TV operations also showed a tremendous profit improvement.”

RCA has been in the forefront in color TV set development and manufacturing for past several years. This fall, still other major set manufacturers are entering (or re-entering) color receiver manufacture.

Performance and Economy • W. Walter Watts, RCA group executive vice president, and president and board chairman, RCA Sales Corp., cited improved operating performances as well as economies “resulting from a tighter, more efficient organization” as contributing to “our best showing since the early boom years of black-and-white TV.”

Mr. Watts said that increased sales also could be traced to “advanced styling and performance features” set against “modern business techniques and controls instituted in connection with our recent consolidation of all home instrument production and administration in central Indiana.”

Optimism for the remainder of 1961 continues high. Mr. Watts reported, based on the first half-year showing, initial distributor and dealer orders this summer of the new (1961-62) line of RCA Victor’s TV sets, phonographs and radios, as well as “exceptionally low” inventory levels.

RCA last week also revealed:

- It had introduced a new color TV picture tube with a “glare-proof” window which eliminates much room light reflections.

Amplex first quarter:
$17.4 million sales

William E. Roberts, president of Ampex Corp., Redwood City, Calif., last week announced sales for the first quarter ended July 31, were $17,400,000 compared with $17,751,000 for the previous first quarter. Net income was $71,000 or one cent per share on the 7,575,772 common shares outstanding. This compares with $366,000 and five cents per share for the comparable period last year.

Report indicated a reversal of a loss trend in the third and fourth quarter of the last fiscal year.

First quarter figures for both years are adjusted to include operating results of Telemeter Magnetics which merged with Ampex in December 1960. The first quarter results also include only two months operation of Ampex International, S. A., as final accounting figures will not be available for about three months.

ZENITH COLOR LINE

Quality stressed; deals: s plan November sales start

Zenith Radio Corp.’s new color television line was shown for the first time in Chicago last Wednesday and observers acclaimed the high picture quality for both color and black-and-white operation.

Zenith’s new color line includes ten basic models with prices ranging from $695 to $1,050. Viewer color adjusting controls are reduced to just two.

The chassis employs RCA’s standard color picture tube but the circuitry is exclusively Zenith-developed and features Zenith’s traditional hand-wiring on a horizontal metal base that allows easy access for servicing. Stability of operation with an absolute minimum of color adjusting are features.

The new color line went into commercial production for the first day Wednesday as the sets were being shown to a meeting of Zenith Sales Corp.’s national distributors. Delivery will start to dealers next month and to consumers should be underway by November, Zenith indicated.

No big promotion, advertising or merchandising of the new color line is planned this year, one Zenith source said. The line will be introduced slowly and production output increased gradually.

Internally the set has an exclusive “automatic color level circuit” which compensates for variations in transmission and helps keep color values constant when changing from station to station or from program to program on the same station.

Zenith’s color set features a newly-patented, two-tube system of color demodulation described as the “electronic brain” of the receiver. Zenith said the demodulation system reduces the complexity of usual circuits “and provides an improved, more accurate method of extracting color information from the composite video signal” which is then supplied in “precise balance” to the picture tube “for full color reproduction.”

Broadcasting, August 28, 1961

United Press International
STEREO GIVES FM SOMETHING EXTRA

WESCON delegates hear this, other points on fm stereo

"Fm stereo is the new sound of broadcasting which has given fm something am cannot provide," James Gabbert, co-owner and technical director of KPEN (FM) San Francisco, said Wednesday in an address to the Western Electronic Show and Convention, meeting in the Cow Palace in that city.

At a session on fm stereo, Mr. Gabbert described how KPEN adapted its transmitting equipment to permit the station to commence regular stereo broadcasting service, while continuing with its background music service as well.

"To obtain satisfactory results in multiplexing both stereo and SCA, the transmitter and antenna system must meet certain stringent requirements," he said.

"Every broadcaster has the direct responsibility to his audience to provide the highest possible standard of technical excellence in the transaction of stereo. The sound should be excellent, the production flawless, and the material compatible to the monophonic listener. . . . If properly handled, this new system could easily make fm broadcasting the dominant aural medium in the United States. It is up to each individual broadcaster to make sure that his stereophonic broadcasting meets the highest attainable standards."

The FCC has done its part to insure the highest quality of stereo by setting high standards for this new type of broadcast service and now it is up to the manufacturers and broadcasters to follow through, James E. Barr, assistant chief of the FCC Broadcast Bureau, told the stereo session.

Favorite - The FCC favors stereo, he said, as another feature which will bring fm to the attention of the general public and perhaps increase the distribution of fm receivers in U.S. homes. Fm in its early days failed to achieve the prompt success its developers had anticipated largely because "its lesser virtues were overemphasized and its major virtues were overlooked."

Fm's major virtues, he said, are the fact that its overage pattern is the same day and night and its ability to discriminate between signals even when they are broadcast on the same frequency.

These qualities, Mr. Barr said, make fm important in the modern trend of FCC thinking which calls for the licensing of more local community-type stations the am band cannot accommodate. The 4,000 am stations presently operating include many with small coverage areas and many daytime only stations.

The history of stereo fm and the way the FCC standards were developed were recounted by Harold L. Kassens, chief of aural existing facilities, FCC Broadcast Bureau, in the opening talk of the WESCON stereo session. Although the standards were not issued until April and fm stereo broadcasting has been permitted only since June 1, there are already 10 stations offering regular daily stereo programming and half a dozen more about ready to start this service. RCA has received type acceptance for its stereo broadcasting equipment and another manufacturer is ready to qualify, he said.

"The problems of designing receivers to serve the stereo audience while enabling them to receive monophonic fm broadcasts without deterioration are many, but they can be overcome," Daniel R. von Kecklinghausen, chief research engineer of H. H. Scott Inc., stated in a paper which described both the problems and their solutions.

Stereo fm innovation in new Zenith line

Complete new fm stereo line was introduced by Zenith Radio Corp. in Chicago last week with considerable interest shown by distributors in the new stereo multiplexer model MH910. This $99.95 unit can immediately turn every one of the country's 5 million non-stereo fm sets into a stereo system without a single interconnecting wire, Zenith claimed, emphasizing that it is not an adapter or a converter but a full fm multiplex receiver.

The new MH910 can be placed either to the right or left of the listener's present monaural fm receiver, Zenith explained, and by adjusting special speaker phasing and other controls on the unit it will produce either the left or right stereo channel in such a manner that a full stereo effect is produced in conjunction with the old monaural receiver. Two MH910s can be used for a stereo system also. The unit also will operate as a regular monaural fm receiver. A red indicator light automatically shows when a stereo station is tuned by the set.

Twenty-one other stereo fm receivers also were shown, some including record phonographs. Others were am-fm, combinations and console models in decorator cabinets. Prices range up to $895 for consoles including tv.

Technical topics . . .

New antenna - WBNB-TV Charlotte Amalie, St. Thomas, V. I., has purchased an eight bay antenna from Jampro Antenna Co., Sacramento, Calif.

Record earnings - Adler Electronics, New Rochelle, N. Y., has announced an all-time record for sales and earn-

D. P. Brother
is really plugging in Providence!

Seems like everybody in Providence owns a car and/or a motorboat and/or a power lawn mower. What a market for spark plugs! Just ask the brains at the D. P. Brother Agency in Detroit.

And ask them what radio station they use to spark sales in this area. WICE gets the nod, naturally. WICE is the live wire station, the favorite of people on the go go go. WICE offers the perfect mix of music, news and public service programming.

Got a product you want to plug in Providence? Let WICE help you start a fire with live wire radio.
Ctv planning moves into final stages

10½ HOURS SOLD ON CANADA'S NEW COMMERCIAL NETWORK

Ctv Television Network begins operations across Canada with eight stations late in September or Oct. 1. It is committed to start with 10 hours of programming weekly and in mid-August had sold 10½ hours a week to advertisers, although programs had not been completely set up and the schedule times were still flexible.

As the first competitive television network in Canada, Ctv starts out with the requirement that half its programs must be Canadian or have Canadian content. This has ruled out the easier method of just using imported film shows, and has meant the building of programs in Canada and the purchase of some shows in British Commonwealth countries. These latter shows count as part of the Canadian content requirements of the Board of Broadcast Governors, the regulatory body.

Live Canadian programs are being produced at the eight stations which make up the network, and which own shares in it.

In the far west Chan-Tv Vancouver, B. C., will produce Westcoast, a variety show with participating national sponsors. At Cfcf-Tv Montreal, Que., a musical game, Showdown, will originate. At Cfto-Tv Toronto, Ont., take a chance, quiz which has been used on Canadian radio and British television, will be produced, with Adams Brands Sales Ltd., Toronto (Chiclets and Dentyne) as sponsor through Baker Adv., Ltd., Toronto.

At Cjay-Tv Winnipeg, Man., the quiz Twenty Questions, will originate, sponsored by Procter & Gamble of Canada Ltd., Toronto, through Ronaldu Reynolds & Co., Toronto.

Other Plans • Two public affairs programs are expected to originate at other stations on the network. Similarly a weekly barn-dance type of show is planned from three different locations. Some of these shows will be produced at other stations on the network, including Cich-Tv Halifax, N. S., Cjoh-Tv Ottawa, Ont., Cfcf-Tv Calgary, Alta., and Cfrn Edmonton, Alta.

In addition, Ctv will broadcast the hour-long Sing Along With Mitch from the U. S., the half-hour cartoon U. S. film Top Cat through Screen Gems Ltd., Toronto, U. S. film Rifleman for Procter & Gamble, the Australian film Whiplash for the same sponsor, and one-hour British Broadening Corp. film program Inspector Maigret. Selection of other imported shows has not yet been made.

The initial program schedule is "popular with a degree of balance" according to Michael Hind-Smith, national program director. It will consist of three hours of action and adventure programs, 90 minutes of quiz and game shows, three hours of music and variety programs, a possible one hour of sports, one hour of public affairs, and a half-hour of cartoons. News telecasts are not planned at present.

Delays Buying • The advent of a second network in Canada has delayed final decisions on network and spot programming for the fall and winter months for all national advertising on Canadian television.

Ctv network will not have its own production center, but instead, President Spence Caldwell explained, will use the $33 million of studios and equipment which Canada's eight stations had to install to obtain licenses as second stations in Canada's eight major markets. In addition Ctv will draw on the resources of all the film distributors in Canada and the film production companies within the country. In the past year a number of U. S.
CTV Television Network Ltd., Toronto, Ont., Canada's second TV network, has made a seven year contract with the Bell Telephone Co. of Canada and affiliated provincial telephone systems for a reversible channel microwave network from Halifax to Vancouver. First stage will be ready by September and British film companies and broadcasting production companies have opened Canadian offices and production facilities. Mr. Caldwell hopes to have even more come to Canada.

He has assembled a staff of about 50 top-flight production, programming and sales personnel. These will be the staff of CTV network. They will supervise the production of Canadian programs and commercials, if necessary, from the vast pool of companies in Canada.

**Extension Later** — Because microwave facilities are not yet available for a complete coast-to-coast second television network in Canada, CTV starts off with an initial three-station live network, CFTO-TV Toronto, CJOH-TV Ottawa, and CFCF-TV Montreal. Within 11 months the network will extend from Montreal to Vancouver, and by June 1963 to Halifax.

To facilitate operation of the CTV network when it has some programs which cannot be sent by tape to its various stations, until its own microwave network is ready, CTV has use of the Bell system in the mornings. Programs can be fed to the individual stations live from any of the originating stations in the mornings, taped at the individual stations for later telecasting. When its own microwave network is ready it will be reversible.

Mr. Caldwell will work out final details for the start of the network at a three day session starting today (Aug. 28) at Toronto, with executives of all eight stations, most of the CTV directors and officials of various production companies attending.

A few days later CTV moves its

**CBS News shows get sponsor in Japan**

CBS News programs will debut on Japanese television this month under the sponsorship of Japan Light Metal Works Ltd., reportedly the largest aluminum refinery and manufacturing company in the Orient. The regular once-a-week series will be launched with recent CBS Reports offerings.

The programs will be broadcast over the facilities of the Tokyo Broadcasting System (TBS) which this spring contracted to purchase from CBS Films most of the news and public affairs programming produced by CBS News during the coming season. TBS and the sponsor have titled the new series This Is Your World and have scheduled it in the Tuesday, 10:30-11 p.m. period. Although the contract between CBS Films and TBS does not go into effect

**CAN YOU TAKE A JOKE??**

Well, then I must confess that it's not exactly yours for the taking, but I DO offer—at reasonable rates—a weekly script service consisting of stories, satires, humorous comments on the passing scene—40 separate pieces of various length, designed to put the light touch to your programming. It's the kind of material which, for the past ten years has stood this country boy in good stead in the big city. It would, of course, be EXCLUSIVE to you within your coverage area!

If interested—and I hope you are—write for sample script and details to:

**JACK STERLING**

**BARBTON, INC.**

485 Madison Ave., New York 22, N. Y.
until the fall, Japan Light Metal Works wanted to start the series in the summer. As a result, the company has purchased, for broadcast this month, the CBS News programs from the 1960-61 season. In the fall, This Is Your World will broadcast programs from the coming season's CBS Reports, Twentieth Century, Eye-witness to History and CBS News specials. News specials will be shown in their entirety, but regular 60-minute shows will be edited to 30 minutes.

According to a spokesman for Sekiya & Co., Ltd., CBS Films' sales representative in Japan, the Your World series marks the first sale of foreign public-affairs programming on a weekly basis to a commercial sponsor in Japan.

Meeting set on extra 2%

A joint committee of the Canadian Assn. of Broadcasters and the Canadian Assn. of Advertising Agencies will meet next month at Toronto to discuss a request by advertising agencies for a 2% cash discount in addition to the usual 15% commission payable on advertising placed on radio and television stations. The move for the 2% cash discount was started recently by a small Alberta agency, Natall & Maloney Ltd. of Calgary, which asked Alberta stations for such a discount in lieu of the discount that agencies pay stations only quarterly.

CAB at its annual meeting last March threw out a suggestion for raising advertising agency fees to 17%.

Abroad in brief...

Agencies join • Toronto and Montreal advertising agency Pemberton, Freeman Bennett & Milne has gone into partnership with J. M. Mathes Inc. of New York. New name is Pemberton, Freeman, Mathes & Milne. The company currently bills over $2,000,000.

Firm absorbed • Toronto station representative firm of Ontario Radio Sales has been absorbed by Air-Time Sales Ltd., also of Toronto. ORS manager Mike Mezo has been named a sales rep for Air-Time. CIRH Richmond Hill, Ont., and CJOY Guelph, Ont., ORS owners, have taken their time sales to Air-Time. Third ORS station, CHVC Niagara Falls, Ont., has not announced where it will take its business.

FATES & FORTUNES

North Sacramento St., Orange, Calif.

Canadian sponsors buy 'McCoy's', 'Casey'

ABC Films Inc., New York, last week announced the sale of its U. S. tv network property, The Real McCoy's, to Procter & Gamble of Canada, for 38 Canadian markets. ABC Films, owner of international syndication rights to the 52-episode package, made the sale to the advertiser directly. No agency was involved.

At the same time, the distribution company reported it had sold Ben Casey, hour-long series debuting this fall on ABC-TV, to Ford Motor Co. of Canada Ltd. and Colgate-Palmolive Ltd., on a national selective basis.

The two advertisers are represented by Vickers & Benson Ltd., and Spitzer, Mills & Bates Ltd., respectively.

Radio Eireann's tv starts

Test signals have been put out from the Kippure transmitter of the new Irish tv station, Radio Eireann. These signals, at half power, were seen throughout the Dublin area, and were received as far south as Limerick.

Mr. Benson has been with network since 1948.

THE TRANSISTORIZED

TDA 2 VIDEO/PULSE

DISTRIBUTION AMPLIFIER

This highly efficient and completely transistorized unit replaces all existing vacuum-tube types without alteration of cables. Complete with built-in regulated power supply, the TDA 2 weighs less than 4 pounds, occupies only ¾ inches of panel space, and draws only 4 watts of power! Has 4 independent outputs (internally terminated at 75 ohms).

PRICE: $325.00 each, f.o.b. Nashville. This is less than competitive tube models requiring external power supplies creating better than 100 watts of heat.

Write or wire for descriptive technical data sheet on the TDA 2.

DEATHS

Charles B. Jordan, 51, president and owner of KFDA Amarillo, Tex., died of heart attack at his home in Fort Worth, Tex. Funeral services were held Monday, Aug. 21 in Fort Worth.

William R. Lewis, 68, former advertising and merchandising executive, Maxon Inc., New York, died Aug. 16 at St. Luke's Hospital, New York, following long illness.

Helen Heitt Waller, 47, director of Herald Tribune Forum, died Aug. 22 at Chamonix, France, of internal injuries received from mountain climbing. During World War II, Mrs. Waller joined Paris news staff, NBC, and later went to Madrid for NBC. Mrs. Waller was reportedly first outsider to broadcast from Spain since Spanish Civil War.

Helen Ainsworth, 59, motion picture, TV film producer and program packager, died Aug. 18 at her Hollywood home following long illness. She created and put together Wild Bill Hickok, one of first TV westerns, starring Guy Madison.

FANFARE

Youngsters visit zoo with Yogi and friends

More than 45,000 youngsters and their parents attended WTOL-TV's "Day at the Zoo" event, which spotlighted a live telecast of the day's proceedings on Aug. 15 (2:30-3 p.m.). The Toledo Zoo was officially renamed Jellystone Park (home of Yogi Bear) for a day and youngsters were treated to free movies in the park's indoor theater.

A tie-in was arranged with the Kellogg Co., sponsor of Yogi Bear, Quick Draw McGraw and Huckleberry Hound cartoon series on WTOL-TV, including the setting up of Jellystone express trains and Jellystone Ranger stations. The animal characters were in costume and paraded through the crowd.

Special guests of WTOL-TV were Fred Wilson, sales and promotion field representative for the Leo Burnett Co., agency for Kellogg; Verne Heeren, Gene Malone, Prem Kapur and Art Berla of H-R Television, representative for the station. In addition to the "Day at the Zoo" project, which is in its second year, WTOL-TV works with the zoo management on a year-round basis to stimulate interest through public service announcements and coverage of the zoo's other special events.

WBMD goes Stork-Clubbing

Country music programmer WBMD Baltimore chose the Stork Club in New York for a luncheon presentation earlier this month for agency media and research executives.

The WBMD audience was profiled for the New York group, and the area's country music listening explained. A special Pulse study was revealed. Also taking part in the presentation was Charles Bernard, a founder of Country Music Network (WBMD is a member). Weed is station's representative.

Some 'Gunn-play'

Official Films Inc., New York, is distributing a new promotion piece, in the form of a newspaper titled Gunn World. It capitalizes on a recent spot news development: Al Lanken, southern representative of Official Films, was aboard the Eastern Airlines plane which was when they boarded the boat. The black jack, dice, chuck-a-luck and roulette tables played to a full house all night.

Among black jack participants (above, clockwise): Paul Pheriault, Young & Rubicam; Marty Chapman, Ted Bates; Joan Stark, Grey; Jack Blomstrom, Campbell-Ewald; Bob Lewis, Edward Petry, and professional dealer.

At the evening's end, six prizes were awarded. Winners were Jeanne Tregre, J. Walter Thompson; John Curran, McCann-Erickson; Rachel Newman, Doherty, Clifford, Steers & Shenfield; Bob Rothman, Arkwright Adv., and Enid Cohn, Robert E. Wilson Adv.

Harvey Glascock and his WIP crew delivered a 15-minute sound and slide presentation on the station's personalities, music policies, news, public and community services and merchandising campaigns.

A moonlight cruise with Dame Chance

Some 200 timebuyers and account executives, from 54 new york agencies, were guests of WIP Philadelphia on a Hudson River moonlight cruise, cocktail party, and "gambling" session with stage money, Aug. 21.

Guests tried to increase the "$500" in gambling money they received
hijacked to Havana last month while he was planning a sales trip on behalf of OF's Peter Gunn series. The simulated newspaper treats the incident humorously with references to "Gunn si, Castro, No" and "Cuban Gunn-Man."

Coincidentally, the sample episode Mr. Lanken was carrying on the sales trip was entitled "The Long, Long Ride."

Operation diploma

A "stay-in-school" promotion, staged yesterday (Aug. 27) by WABC New York at the New York Coliseum, opened two weeks of effort to reduce the city's 45% high school drop-out rate. Stars from sports, radio, tv, movies and popular music entertained those youngsters who pledged to finish high school in a short letter to the station.

The "spectacular," co-sponsored by the City's Dept. of Commerce and Public Events, is part of a city-wide stay-in-school campaign. Taped announcements by teenage idols on the value of a high school diploma will be used on WABC and other local stations.

In the 1927 mood

KVOS-AM-FM Bellingham, Wash., turned back the clock last week to 1927 (the year it went on the air) with a long list of promotional activities heralding the change in its call letters to KGMI.

While Charleston dancers flittered away in the streets and old 1927 autos chugged their weary ways, the local citizenry was making the most of the festivities by purchasing items for 1927 prices, an agreement many local merchants made with the station. In turn, they (the merchants) made advertising hay by buying time on KGMI for the going rates in 1927. The station was sold out for a week.

To record Alaskan pioneers

A long-range plan to return the voices of Alaskan pioneers has been started by KNIK-FM Anchorage. Because much of Alaska's history has occurred in recent years, the station says, it is in a position to record the voices of those who made history in the 50th state.

KNIK-FM expects to take big strides toward accomplishing the feat next month at the annual Pioneers Convention. Tapes of the various pioneers are broadcast on the daily At Home with Ruth Briggs show.

$140,000 fanfare

KTLA (TV) Los Angeles, to promote its new fall schedule called "Programming for the Millions," will spend $140,000—divided among all media—and will augment that sum with 600 weekly spots of its own.

The station is buying 4,500 inches of newspaper advertising in four metropolitan papers—Valley Times Today, Hollywood Citizen-News, Pasadena Independent, Long Beach Press Telegram—in addition to 309 bus cards, 90 spots on KRKD Los Angeles, a 30 x 45 foot billboard at Hollywood and Vine Sts. and large-circulation local magazines.

Stars of many of the new shows will appear on ch. 5 during the campaign in person or on video tape.

Drumbeats...

KING's barbers • KING Seattle is collaborating with the barbers in that city in a promotion aimed at a captive male audience. The barbers keep their radios tuned to KING, which every day will salute a number of shops. The custom-
ers in the salved spots will receive free theatre passes, courtesy of the station.

**Potato chip contest** • Lay's Potato Chips, sponsor of *Top Ten Dance Party* on WJBF (TV) Augusta, Ga., is conducting a Turnabout Tunes contest. Old hit records, with part of the chorus backwards, are being played. Viewers are asked to identify the songs and send in answers with a label from Lay's Potato Chips. First prize winner will receive a $100 shopping spree at a local market.

'Tops' in Canada • CTV Television Network Ltd., Toronto, has distributed a card with plastic bottle tops and names of all its eight stations, to advertising agencies and national advertisers throughout Canada. The bottle tops carry the slogan "CTV Tops." Plastic bags with three bottle tops are being left by CTV executives on desks wherever they go on their calls.

**Making deals** • Jay Ward Productions, New York, made merchandising deals with 26 manufacturing companies for tie-ins with the production company's new half-hour animated tv series, *The Bulwinkle Show*, which debuts on NBC-TV Sept. 24. Fifteen of these are toy manufacturers; the rest are clothing, soap and book firms.

**Pity for Phillies** • Hoping to lessen the hangover of the Philadelphia Phillies, fresh from a modern day baseball losing streak of 23 games, WIBG Philadelphia disc jockey Bill Jones offered a clock radio to the local ball player making the most hits in last Tuesday's game.

WIBG's Jerry Stevens countered with an offer of a portable stereo record player to the first Phillies player hitting a home run.

**WGR-TV Week** • To celebrate the 8th anniversary of WGR-TV Buffalo, Mayor Frank Sedita proclaimed Aug. 14-18 as "Channel 2 Week," heaping praise upon the station for its public service to the community during its years on the air.

**Old fashioned fm** • Taking a page of yesteryear, WKLS (FM) Atlanta used an old car and a bevy of pretty girls to tell prospective and current sponsors the fm story in that city. The promotion even got a strong play on WLWA (TV), that city.

Pleasant adult voice with radio experience for nighttime fm good music station. Ca-

pable of doing some play by play sports and also opportunity for comedy. Send photo and resumes which will be returned. Box 797G, BROADCASTING.

You may never have breathed the pure, dry air of El Paso in your life. But, from the first word you utter through a KIZZ microphone, you will be the most talked-about personality ever to appear on the radio in West Texas. You will not have to spend half a lifetime building a name for yourself. You have already built a name for yourself. We have been giving you an advantage, build-up and more, and you will step right in and capture the audience that is waiting for you. If all this sounds in-

triguing to you, if you have imagination, initiative and the ability to operate a fast board for a major-market CBS affiliate, if you have an unusual delivery, if you can handle a little pressure and use your own head at the same time, send us a tape and intrigue us as we have intrigued you. Do the tape as you did for yourself. Sell yourself to us. If you are a trained announcer, an alcholic or a drifter, do not bother to reply. We are looking for a solid man whom we can depend on. If you have engineering or sales inclinations, so much the better, but these qualifications are not essential. We will give you a complete production setup, you will send your boss a rush offer based on the selling job you do, and you will be prepared to join us within 30 days. Address your tape and/or letter to Me and Norman, P. O. Box 3566, El Paso, Texas.

Equipment

1 kw uhf transmitter, filterplexer, harmonic filter, dummy load, freq, and mod. monitor, 600 ft. H. $35. Lin. amplifier, stat, amp, patch gear, equipment racks. H. Evans, Ed. TV, WTTH, 1410 N.E. 2nd Avenue, Miami, Florida.

INSTRUCTIONS

FCC first phone license preparation by correspondence. First Class, E. H. Franco, Grantham Schools are located in Hollywood, Seat of the Kansas City, Kansas. Write for our free 40-page brochure, Grantham School of Electronics, 3123 Gilham Road, Kansas City 8, Missouri.

Be prepared, First class F.C.C. license in six weeks. Top quality theory and laboratory training. Elkins Radio License School of Atlanta, 1129 Spring St., N.W., Atlanta, Georgia.

f.c.c first class license in six weeks or less. This is the Hollywood school. Highest success percentage in the nation. Last year eight hours a day, five day week. License guaranteed for tuition of $330.00. No add-on charge for added time if needed. Pathfinder, 2564 Hollywood Blvd., Hollywood, California. Classes September 18 and October 30.

Elkins Radio LICENSE School of Chicago—Six weeks quality instruction in broadcasting laboratories and theory, leading to FCC First Class License, 14 East Jackson St., Chicago 4, Illinois.

Announcing program, console operation. Twelve weeks intensive, practical training. Finest, most modern equipment available. G. I. approved. Elkins School of Broadcasting, 2863 Inwood Road, Dallas 55, Texas.

BUSINESS OPPORTUNITY

General Steel and Concrete Construction Co. Station builders, all outside plant work from tower to ground system, to transmitter building. New equipment high quality used equipment. Some financing arranged. Insured, full bonding. Tower maintenance, painting, BUY-tension, bulb changing, etc. 2, 4, 6, 8, 10 years contracts available. Low rates, $4-6425, F.O. Box 802, Watertown, So. Dak.

MISCELLANEOUS

25,000 professional comedy lines, routines, adventures, fashioned to best glide audience. Special monthly topical service featuring delay comment, introductions. Free catalog. Orben Comedy Books, Hewlett, N.Y.
Help Wanted—Announcers

UNDERSTANDING

We would like to increase our viewers' understanding of what is taking place in the world today. At present, most of the time of our 16-man news staff is devoted to local and regional news coverage; we want to bring meaning to the world news outside our coverage area.

We need a man with carefully developed thought processes, who understands world events and who can bring them into focus for our one million viewers surrounding California's Capital City.

If you believe you are this man, write us in detail, including whatever information you believe we shall need to form a preliminary judgment. Based upon your letter, we shall make further inquiries leading to a personal interview.

Box 658G, BROADCASTING

Help Wanted—Sales

Executive sales, for unique syndication; never offered before—yet with notable record of distinguished accomplishment. Are you aware of today's problems in broadcasting? Could you handle—at the executive level what can pay you healthy 5-figure income—with security? If your record warrants responsibility of successful sales rep task, . . . tell us about yourself—by confidence.

Box 803G, BROADCASTING

NORTHERN VIRGINIA'S
Leading country music station, 40 miles from Washington, D. C., needs top salesman. Proven men name their own price. No drifters. Call or write Bill Montgomery or Ed Matheny, BZCW, Warrenton, Virginia. Phone 347-1450.

RADIO SALES

Men capable of earning $30,000 to $40,000 per annum required by rapidly expanding singing commercial firm.

Men to assist radio stations throughout the country in presenting our revolutionary plan to local merchants.

Only men with strong radio or advertising creative sales background will be interviewed. Car required for extensive travel.

Box 818G, BROADCASTING

Help Wanted—(Cont'd)

TOP 10 MARKET TOP RATED STATION PERSONALITY

Bright, mature, class, personality wanted for one of the nation's top radio stations. Must have extensive experience in large markets as personality. We are not "hard" top 40, therefore, we are looking for a man who is capable of developing rapport with his audience in an intelligent and refined manner. Send tape, picture, resume, plus salary required to Box 784G, BROADCASTING.

FOR SALE

Equipment

Ideal to replace costly wire program circuits for AM, FM, and TV broadcasting. Eliminate second party—YOU maintain full control over link. U.H.F. antennas included. Leasing terms available.

KADAS-TV (Hanford, Calif.)—Granted assign-
How much health did you buy today?

Family likes and dislikes often dictate food purchases. If good nutrition were the deciding factor, our meals would surely pay off in better physical and mental health—less fatigue, more energy and increased resistance to certain illnesses.

To provide good meals for good health, serve a wide variety of foods—meat, milk, vegetables, fruits, bread and cereals. However, three things need watching.

1. At every meal serve a food rich in protein. Children need it for growth; adults for the body's upkeep. Best sources are meat, fish, poultry, eggs, milk, cheese and ice cream.

Some pointers on protein: Less costly cuts of meat are as nourishing as higher priced cuts. Beans, peas, lentils and certain cereals are also rich in protein.

Everyone needs milk for both protein and calcium. Three to four glasses daily for children and teenagers. Two glasses or its equivalent in other foods for adults. Dry skim milk is excellent for soups, custards and milk drinks.

2. Serve a green or yellow vegetable every day. They supply some of the most essential vitamins and minerals.

3. Serve a vitamin C food every day. This vitamin can't be stored in the body. Citrus fruits—fresh, frozen or canned—and tomato juice, or fresh or canned tomatoes are good sources.

Most of us could improve our eating habits—especially teenagers. Many teenage health problems—poor teeth, blemished complexions, fatigue and overweight—might be avoided with more basic foods and less sweet and fatty foods.

Advice on planning varied, well-balanced meals is given in the Metropolitan Life booklet, Food for the Family.
OUR RESPECTS to Robert Joseph Stefan, vice president, BBDO, Hollywood

If you start at the bottom running, the only way to go is up

Get in on the ground floor. Take any job, no matter how menial, that will get you into the field in which you believe your future lies. Once there, don’t be a clock watcher. Keep your nose to the grindstone; do well whatever task is given you. But be sure to keep an eye out for any chance to advance.

Traditionally, those maxims are the sort of advice that oldsters are prone to pass on to the coming generation. Equally traditionally, young listeners take them with salty skepticism.

Yet the formula set forth in the old saws does work. Take Robert Joseph Stefan, vice president of Batten, Barton, Durstine & Osborn and general manager of the agency’s Hollywood office. In the fall of 1947 Bud Stefan (whose childhood nickname still sticks) wanted to get into the brand new field of television. His first approach was to write some tv scripts, but in those days west coast tv was done ad lib and he found no takers. His persistance, however, appealed to the program director at W6XYZ Los Angeles (now KTLA) and he offered Bud a job in television—at $42.50 a week as a member of the stage crew.

Bud pushed dollys, operated the boom, pulled cable on remotes, became assistant stage manager, then stage manager. KTLA, as it had now become, was on the air seven nights a week. Bud was on the job seven nights a week. But he wanted to write, so when a child talent school, Rubens Musical Workshop, wanted to use tv as a showcase for its young performers, Bud came up with a script in which a young girl fell asleep, dreaming stories that unfolded in musical comedy style with an all-juvenile cast. Sandy Dreams made its debut in June 1948 and Bud wrote and directed 208 consecutive half-hour shows.

Be Funny • A couple of months after the inception of Sandy Dreams, Bud, in one of his capacities as stage manager was rehearsing a commercial for a Sears, Roebuck ice cream freezer. Explaining to the announcer how he wanted the line “so easy a child can operate it” demonstrated, Bud got to clowning. He pretended the handle would not turn. He pushed it, shook it, climbed up on the table and wrestled with it until the manager’s voice came from the control room: “OK, so you’re funny. You go on Friday night. And be as funny then as you just were.”

So Yer Ole Buddy began. It was a series of Benchley-like answers to questions about television and how it works, each program fading out with the explainer hopelessly lost in the explanation. For 3½ years Bud was writer, producer, star. And he was funny enough for the readers of Tele-Views, West Coast fan magazine, to vote Yer Ole Buddy the top tv comedy show of 1949 and Bud top West Coast comic.

The success of Yer Ole Buddy got Bud a running role (as Milton, the delivery boy) on Fibber McGee & Molly, “probably the only actor to get a part on radio through tv,” he says. Fibber was broadcast Tuesday evenings. To do the show, Bud arranged for that night off from KTLA and he filled after-broadcast hours by teaching a class in tv writing and directing at the School of Radio Technique.

In June 1952, Bud decided it was time to leave KTLA. The problem was where to go. One station wanted him as a performer, another as a producer, and he had a third offer to write for the Bob Hope Show. Bud called Wayne Tiss, then head of BBDO Hollywood, whose client, My-T-Fine Deserts, sponsored Sandy Dreams. Mr. Tiss listened to the story and when Bud asked, “What should I do?” he replied, “Come to work at BBDO.” “But I don’t know anything about advertising.” Bud explained. “We do,” Mr. Tiss replied. “We need you for your knowledge of television.

Nine Years, No Answers • So Bud joined BBDO as tv production supervisor on June 15, 1952, “I thought I’d stay there about a year, which I figured was the time it would take to find out where tv was going.” Today, more than nine years later, he is still looking for an answer. But there’s been no question as to where he was going. In 1957 he was promoted to head of tv production and assistant to Mr. Tiss. In February 1959, when Mr. Tiss was transferred to BBDO’s Chicago office, Mr. Stefan succeeded him as office manager and two months later became a vice president of the agency.

Born Oct. 18, 1921, in San Francisco, Bud at 9 moved with his family to Galt, a small town in Northern California.

At the College (now University) of the Pacific in Stockton, Calif., Bud majored in drama, appearing in 21 stage productions, and wrote and acted in many radio shows produced by the students and broadcast on KGW Stockton. In January 1942 he enlisted in the Navy, but with other upperclassmen was ordered to finish his schooling, which he financed by working the swing shift in a shipyard. Two days after graduation, in June 1943, he was on a troop train bound for New York and the U. S. Naval Reserve Midshipman’s School on the Columbia U. campus. Here Bud wrote, produced and starred in the class show, “my first Broadway production and it doesn’t matter that it was put on in Columbia’s McMillan Theatre at 116th and Broadway instead of at 42nd Street. It was still Broadway.”

Overseas • For the next three years overseas, Bud was officer-in-charge of an LCT which was in the initial assault waves of the D-Day invasion of Normandy and, after crossing two oceans piggy back on an LST, he was dropped off in Korea and participated in the occupation of North China. In June 1946, Lt. (j.g) Stefan got his discharge in San Francisco and headed for Hollywood. He put in a year of graduate work in radio at USC, wrote some documentary programs for KFWB and in 1947 started sweeping that ground floor in television.

Bud Stefan lives in a Hollywood apartment, collects stereo albums of musical comedy scores and goes to the Rams’ home games, but his real hobby is his job in television. He is regional director of the American Guild Guidance Foundation, and is active in the Hollywood Ad Club, United Community Fund, the Regional Boy Scouts Committee and the Pacific Assoc. (advisory board of his alma mater). He belongs to the Academy of Television Arts & Sciences, Writers Guild of America, Directors Guild of America. One thing more: in nine years with BBDO, he has yet to take a vacation.
Politics cut to size

The importance of radio and television as distributors of political intelligence has been recognized by the Senate Committee on Rules and Administration in reporting out a “sense of the Senate” resolution that would cut the time of presidential campaigns.

The resolution was introduced last May by Sen. Kenneth B. Keating (R-N.Y.). It suggests that the nominating conventions be postponed to early September (the 1960 conventions were held in July). Although radio and television are not identified by name, they are the reason for the resolution. Modern communications, the resolution says, make long campaigning unnecessary.

Coincidentally, an article expanding on this proposal appears in the September issue of McCall’s magazine. Carrying the byline of Robert Sarnoff, NBC board chairman, the article makes a persuasive argument for shorter campaigns.

In the four months or more that campaigns have run in recent times, voters can get bored, candidates can exhaust themselves and campaign costs can be inflated. Mr. Sarnoff’s points are good, and we hope the Senate and the political parties will be influenced to take appropriate action.

But the Senate resolution that the rules committee has reported out omits one essential reference. Broadcasting was able to carry the Great Debates and accord an unprecedented amount of other coverage to the 1960 presidential campaigns because of the temporary suspension of Sec. 315, the political broadcasting law, in its application to the presidential and vice presidential races. Unless Sec. 315 is permanently removed, broadcasting cannot do the job again.

We have advocated total repeal of the section and we still do. At worst, the Senate and the House ought to vote its suspension for coverage of candidates for the Presidency, Vice Presidency, the Senate and the House. A bill to that effect has been introduced by Sen. John Pastore (D-R.I.). It ought to be an inseparable companion to the Senate resolution on shorter campaigns.

Radio: near perfect

If for no other reason, the Alfred Politz radio studies reported elsewhere in this issue deserve radio-wide gratitude for providing a timely answer to the short-changing given radio by the U. S. Census Bureau a few weeks ago.

In comprehensive surveys of five major markets Politz found that 98 to 99% of the adults live in homes equipped with working-order radios. This near-perfect statistic is far removed from the 91% figure put out by the Census Bureau on the basis of returns that are admittedly incomplete and also open to challenge on other grounds (Broadcasting, Aug. 7).

But the answer to the Census Bureau is only an incidental by-product of the Politz studies, which were in work long before the bureau’s questionable estimates appeared. The underwriters, five stations represented by the Henry I. Christal Co., commissioned the studies last January.

Details of the findings are still being correlated, but enough has emerged to raise the eyebrows of cynics—including those among advertisers and audiences—who have been inclined to write off radio, or, at best, have seriously underestimated the attraction it holds for millions.

Those who have thought that early-morning was radio’s prime time will be surprised to discover that actually radio’s audience holds at fairly constant levels from 7 o’clock in the morning until 8 at night. And even after 8 p.m., in television’s two-hour peak period, up to 45% or more of the adult population tunes to radio. Out-of-home listening is shown to be even more extensive than anybody had thought.

Politz and the Christal company and its represented stations have a long history of association in radio research. A Politz study underwritten by Christal stations in 1953 was hailed as “a landmark” and distributed widely through NAB and RAB. It was credited with both attracting new money to radio and saving old. The latest Politz-Christal collaboration deserves both commendation and best wishes for a repeat performance.

The business

The first issue of the new Show Business Illustrated contained an unexcelled, if unintentional, display of the dilemma facing most magazines in their editorial coverage of television.

In its first issue the new book carried two articles about television, both of them critical in the extreme. In its listing of top features scheduled for its second issue, the five leading items were about tv. Thus does the modern magazine hate television while embracing it as a necessary ingredient to attract readership.

One of the two tv pieces in the first issue was written by Alexander King, a waspish frequenter of the Jack Paar program, and the other by Drew Pearson, who detests tv because he cannot get a television network to distribute his stuff.

Mr. King concluded that television was in utter ruin. The only program that earned his commendation was, you will be surprised to hear, the Jack Paar show.

Mr. Pearson’s piece was a stitching-together of several old columns adding up to the contention that broadcasting operates a hot lobby in Washington. Mr. Pearson also read dark meanings into the fact that 10 senators and 13 congressmen have holdings of one kind or another in radio or television stations. It is not because he lifted all his information on congressional ownerships from Broadcasting magazine, without acknowledgement, that we speak unkindly of him here.

For its second issue Show Business Illustrated promised these pieces on tv: a special preview of the new season, a report on David Susskind, an interview with Newton Minow, an article about Mitch Miller’s sing-along show and a photo story on a Japanese program that brings “sex to videoland.”

Well, maybe that’s what sells magazines.
"Hey Charlie, Lend A Hand . . ." Charlie Harville, WFMY-TV sports director, is a next neighbor to the folks in some 466,640 TV households. Next neighbor to the Little Leaguer in Winston-Salem, to the elderly teacher in High Point (". . . he's a High Point boy, you know"), to the factory worker in Danville. Next neighbor to folks of all ages in over 100 cities and towns in the prosperous Piedmont. His persuasiveness comes in part from his participation in community affairs throughout the nation's 44th television market. A guest appearance at the Rotary dinner in Asheboro, a beauty contest in Reidsville, the high school boosters' club in Thomasville. The Charlie Harville habit is such a part of Piedmont living, even small town papers spell his name right . . . and often.

Remarks by Mr. Roy Jordan, Chairman of the Special Station Achievement Award Committee:

Phoenix Chapter NATAS

"Having been associated with electronics practically all of my life, and very closely with radio and television, prior to moving to this wonderful Valley of the Sun, being asked to participate in your program tonight, was like an exciting message from home. I'm sincerely grateful to the Academy, and particularly to my good friend Ray Boley, for the honor of acting as Chairman of the Committee to determine the recipient of the "Special Station Achievement Award" for 1960.

The four members of my Committee were especially well qualified inasmuch as the total scope of their interest and knowledge encompasses the pertinent area of civic, educational, religious, political, business and promotional endeavor. Because our viewers do not have copies of the printed programs in which the Committee's names are listed, let me name them, and at the same time, add my personal thanks to them for their cooperation.

Mr. Roy Jordan, Manager of Advertising and Sales Promotion, General Electric Company, Computer Division.

Mr. Frank Haze Burch, Attorney, and President of the Phoenix Union High School's Board of Education.

Mr. George V. Christie, Phoenix's Man of the Year for 1960 and Manager of the Phoenix Office of the U. S. Department of Commerce.

The Honorable Robert Pickrell, Attorney General of the State of Arizona.

Rabbi Albert Plotkin, Temple Beth Israel of Phoenix.

Our Committee met repeatedly to concentrate on the entries. We combed the presentations word by word. Our final decision was most difficult to arrive at because all of the accomplishments of all the stations were so outstandingly fine.
Tv weathered recession with flying colors, financial reports show ................. 25
South Carolinians in uproar over FCC’s plan to make Columbia all-uhf ............ 48

Foley Square curtain

When FCC's hearings on programming resume Sept. 26 at Foley Square Court House in New York, Network Study staff hopes to have as many as 30 advertiser witnesses lined up to testify on network programming and packaging practices. Ashbrook Bryant, head of Network Study staff, and James Tierney, attorney, last week were interviewing prospective witnesses, looking toward seven or eight days of hearings. After completion of this testimony, final round will be interrogation of network witnesses.

What is expected to be final phase of FCC's network inquiry, which began over five years ago, is unfinished business in connection with option time. Having asked Court of Appeals to rule on further consideration, FCC has scheduled reargument for Oct. 26 (Broadcasting, May 8). Whatever way commission finally follows, case is bound to head back in courst, through appeal either by networks if option time is banned, or by KTTV (TV) Los Angeles, if option time is continued.

3D for tv?

Reports circulating through Wall St. say Cinerama Camera Corp., subsidiary of Cinerama Inc., has developed camera lens that takes three-dimensional pictures and also has tv camera application. Three-D still camera reportedly will be put on market this fall. Several large tv equipment manufacturers reportedly have put in bids for rights. Cinerama officials do not deny story, but say comment must come from President Nicholas Rossini, expected back shortly from Europe.

New status in vhf fight

Big fight against deintermixture to all-uhf in eight markets is expected to go into next year by virtue of FCC's action last Friday (page 10) granting two-month extension from Oct. 2 for answers to its rulemaking order of last July 26. But battle against sub-standard drop-ins of vhs in another eight markets will go forward because FCC, with particularity, excluded them from postponement action. While deintermixture extension runs only until Dec. 2, time needed for reply comments, plus upcoming holiday season, augurs for delay until after first of year.

New Congress then will be in session and there's sentiment in both Houses directed particularly against deintermixture. Opposition also has developed against drop-ins but this hasn't crystallized because (1) primary heat has been against deletion of vhs and (2) drop-in problem is more technical and complex. It's clear FCC's intent is to move ahead full tilt on drop-ins. Assn. of Maximum Service Telecasters, backed by others affected, had sought six-month extension for both deintermixture and drop-in actions.

NAB overhaul

Special seven-man board committee assigned task of drafting new association district and director structure will meet late in month, probably about 20th. Goal is smaller board and fewer districts. Board finance committee will meet at same time.

No FCC pay boost

Proposed pay increase for FCC members isn't going anywhere in this session of Congress. Sen. Olin D. Johnston, chairman of committee considering pay raise bill (S 2307) is proving stumbling block, for unannounced reasons. Aide to Sen. Johnston's Post Office and Civil Service Committee said no action is expected this session on bill to increase commissioners' salary from $20,000 to $22,000, and chairman's, from $20,500 to $22,400.

NBC's special spree

Though network groups are cutting back on specials in 1961-62 season, reduction won't be evident before first of year. In last quarter of 1961 NBC-TV alone has now scheduled 59 specials, as many as in same period last year and possibly more. But they'll run more heavily to news-public affairs, dividing about half-and-half between "informational" and "entertainment." Virtually all will be one-hour or longer.

Worst-kept secret

NAB President Collins formally will announce this week that Vincent T. Wasilewski has been picked as executive vice president and Robert D. Swezey as radio-tv vice president-code administrator (Broadcasting, Aug. 14, 28).

Westinghouse, GE outlook

Will FCC, in considering renewals of Westinghouse and General Electric station licenses, hold parent companies accountable because of anti-trust violations and punishment meted out in price-rigging of government bids on heavy industrial equipment? There's been no determination by FCC but prospects are that no punitive action, which could involve revocation proceedings, will ensue.

Reasoning, at staff level, is that broadcast entities are far removed from activities of giant parent companies so that character aspects couldn't readily be imposed. Moreover, Westinghouse operates its stations through wholly-owned subsidiary (GE operates its only broadcast stations—WGY, WGFM (FM) and WRGB (TV) Schenectady—as division of parent company). Added factor: Court, in imposing sentences and fines on parent companies, did not specifically allude to broadcast operations whereas, under law, it could have imposed sanctions.

$20 billion Pan-Am push

Even though hemispheric conference in Uruguay last month passed resolution recommending special meeting of all inter-American information media to back $20-billion Alliance for Progress project, move isn't likely until council of Organization of American States implements action. Just when council may move isn't certain. Resolution calls for special meeting of radio, tv, newspapers and magazines, to inform and mobilize public in Western Hemisphere on aims and methods of Alliance program.

Fan mail

Newton Minow has finally found tv program he likes—though it hasn't yet been put to test of his actual viewing. After reading Broadcasting story (Aug. 21) about Let Me Speak to the Manager on WFAA-TV Dallas, FCC chairman wrote Mike Shapiro, general manager, calling it "constructive step in helping a station to better serve its community." Program, half-hour Sunday evenings, features Mr. Shapiro answering questions viewers send in.

WSJ Sunday 'family' paper

If Wall Street Journal, now published five times from seven locations, decides on national Sunday newspaper, it will not be business paper but rather home and family journal, departing from its present format. Presumably radio-tv would figure prominently among features.
After threats, charges and countercharges, firings and rehirings, the Miami City Commission on July 25, 1961, passed Miami's first minimum housing code, only eight days after WCKT's second New Force documentary on slums, "MIAMI CONDEMNED PLUS 65."

WCKT telecast that City Commission session from 8:30 to 10:00 AM to complete its all-inclusive coverage of a crucial local conflict. It was a world premiere... the Miami City Commission had never been televised live before. WCKT repeated the entire session by video tape the same night at 10:00 PM.

THIS IS RESPONSIBILITY — the kind reported in WCKT's illustrated service accounting for 1960 — a copy of which is yours for the asking.

At WCKT, Responsibility means citizenship and showmanship... the New Force in South Florida.

Advertising on WKZO-TV is the fastest way to make contact with the most consumers in the big Kalamazoo-Grand Rapids market.

WKZO-TV delivers more homes than Station B in 77.5% of all quarter hours surveyed, Sunday through Saturday, Noon-Midnight (NSI—Feb. 20-March 19, 1961).

What's more, Kalamazoo alone is predicted to show the greatest increase in personal income and retail sales of any city in the U. S. between now and 1965.

Get in the swim in Kalamazoo-Grand Rapids and Greater Western Michigan with WKZO-TV. And if you want all the rest of outstate Michigan worth having, add WWTV, Cadillac-Traverse City, to your WKZO-TV schedule.

L&M's $18 million moves to Thompson

In what was believed to be largest account switch thus far in 1961, Liggett & Myers Tobacco Co., New York, announced last Friday (Sept. 1) that it has appointed J. Walter Thompson Co., New York, as agency for L&M filter cigarettes, with an estimated billing of $17.18 million annually. JWT replaces Dancer-Fitzgerald-Sample Inc., New York, as agency for brand. Effective date is about Dec. 1.

Move places all Liggett & Myers brands at Thompson because company transferred its Chesterfield, Duke and Oasis brands from McCann-Erickson, New York, to JWT last spring, effective last month (BROADCASTING, May 22). These brands bill approximately $10 million.

No reason was given for latest account move and spokesman for Liggett & Myers and D-F-S declined to comment on development. Reports circulated that advertiser's action was prompted by two considerations—declining sales of Liggett & Myers brands in 1960 and 1961 while competitors gained, and company's desire to consolidate all of its advertising under one roof.

L&M filters is expected to spend approximately $7 million in TV in 1961. According to Television Bureau of Advertising, gross billing of brand in network and spot TV was about $7 million and figures for the first six months of this year show company spent approximately $3.5 million in TV. Brand is advertised heavily on spot radio but no figures are available.

Thompson has had its ups and downs this year. Agency lost $16 million Joseph Schlitz brewing business to Leo Burnett and Elgin National Watch Co. account ($1.5 million) to McCann-Marschalk. Its acquisition of all of Liggett & Myers business (about $27 million), plus Congoleum-Nairn ($3.1 million) and Pittsburgh Plate Glass ($2.5 million) place gains well ahead of losses.

D-F-S had relatively serene year until L&M filter move. L&M accounts for about 18% of D-F-S total billing of some $95 million.

Filmways plans six more

Filmways Inc., New York, is announcing today (Sept. 4) that company plans to produce at least six television shows in addition to two series previously announced in association with Embassy Pictures. Martin Ranshoffer, Filmways board chairman, said Paul Henning, producer-writer of Bob Cummings Show for five years, has been signed to create and produce one series. They will be produced in Hollywood and Europe.

Washington State group blasts program forms

"Rigid controls" imposed by proposed FCC programming forms amount to "government censorship," Washington State Assn. of Broadcasters charged Sept. 1 in statement to FCC on behalf of its 60 radio-tv members (early FCC form story page 59).

Commission can intimidate broadcasters into conforming to government imposed standards by threatening to revoke licenses, statement said.

Ronald A. Murphy, WSAB president-counsel, said statement was approved by association's board and is part of running fight to preserve program freedom from attempts at government controls.

He said FCC should recognize four basic freedoms of broadcaster: to think first of serving community needs; to plan and continue to search out new areas of programming; to make living or earn a profit; to exercise own judgment and be fairly judged thereon.

This and salary, too

What television can mean in "fringe benefits" to outsiders is dramatized in prospects held out for New York Yankees' stars Roger Maris and Mickey Mantle if one or both break Babe Ruth's homerun record. Frank Scott, their business agent, predicts they may reach $25,000 apiece from guest appearances within 30 days if either succeeds—and 10 times that amount of long-range benefits through testimonials, commercials, etc.

One or two big-show guest appearances currently are in negotiation whether they break Ruth's record or not. Even if only one succeeds they'll probably be billed as a team, and their current asking price—$15,000 per joint appearance—undoubtedly would be jacked up. Long-term benefits thus could overshadow their current baseball pay of $75,000 for Mantle, $40,000 for Maris.

Tax court disallows affiliation writeoff

Network affiliation contracts cannot be depreciated by broadcasters, U.S. Tax Court has held in famed Westinghouse 1953 purchase of WPTZ (TV) Philadelphia. Ruling is expected to have impact on major multi-million station transfers.

Court ruled affiliation contracts have indeterminate life—and thus cannot be specified for term which would permit depreciation.

In buying Philco's ch. 3 in 1953, Westinghouse allocated $5 million of $8.5 million purchase price to network affiliation (NBC). Westinghouse set up 55-month depreciation schedule—based on (estimated) two renewals of 24 months each, plus seven months contract had to run when station was purchased.

Cost to Westinghouse is expected to run almost $1 million which will have to be paid as taxes for 1953 and 1954.

Impact of ruling has been discounted in advance, James W. Blackburn, Westinghouse station broker, said, because IRS attitude was known. Effect will be, Mr. Blackburn estimated, that purchasers of stations involving multi-million dollar prices will have to wait longer to get their money out.

In subsidiary ruling, Tax Judge Russell E. Train said Westinghouse's effort to amortize spot advertising contracts also could not be approved because Westinghouse bought all assets of going concern and did not segregate each spot contract and put price on it. Spot contracts court said, were part of mass asset and life of mass asset cannot be determined.

Westinghouse officials are pondering question of further appeal.

Miami review plea opposed

Oppositions to request by National Airlines for Supreme Court review of Miami ch. 10 case (BROADCASTING, Aug. 14) were filed Friday by L. B. Wilson Inc. and FCC-Justice Dept.

Both said National Airlines had raised no substantial issues warranting Supreme Court review. Both also stated that National Airlines' attempt to embroil Wilson in ex parte charges is fallacious; examiner, FCC and court held Wilson was untarred with off-record brush.

Kennedy signs FCC bill

President Kennedy on Friday signed FCC reorganization bill. New law gives
Ed Winton named president of The Connie B. Gay Broadcasting Corp. and four other companies owned by parent organization. He succeeds Connie B. Gay who remains board chairman. Mr. Winton began his broadcasting career as air personality. He worked for KLIF Dallas and KELP El Paso, becoming general manager of latter station. He joined Mr. Gay's company three years ago and will continue to operate from firm's executive offices in The Wisconsin Building in Washington. He has been serving as vp and general manager of C.B.G. Corp. Connie B. Gay stations are: WQMR Silver Spring, Md.; WGAY-FM Washington; WTCR Ashland, Ky., and WFTC Kinston, N. C.

Albert P. Kirvin, general sales manager for last five years at KYW-TV Cleveland, appointed vp and general manager of Metropolitan Broadcasting's newly purchased KMBC-TV Kansas City. Mr. Kirvin entered broadcasting as account executive at KYW, then in Philadelphia, in 1951. Three years later he moved over to KYW's tv affiliate, WPTZ(TV) Philadelphia. Both stations were owned by Westinghouse Broadcasting, which transferred KYW call letters to its Cleveland stations in 1956. Metropolitan Broadcasting is division of Metromedia Inc., N. Y. David Croninger, radio sales manager for WNEW New York's Detroit office, named vp and general manager of KMBC Kansas City.

Marvin Roslin named research director of Young-TV, New York station representative. Stanley Feinblatt named to similar post and Roger Sheldon to midwestern sales manager of its radio counterpart, Adam Young Inc. All three appointments effective immediately. Mr. Roslin has served in Young-TV research for past three years, before that was timebuyer at Ted Bates. Mr. Feinblatt, in Young-TV research and merchandising for three years, formerly was assistant tv producer for C. L. Miller Co. for two years. Mr. Sheldon, for last three years tv salesman for Young organization, previously was in sales at KFMB-FM San Diego, KFMI (FM) Los Angeles and KGIL San Fernando.

Philip D'Antoni, manager of eastern sales division of Mutual, appointed general sales manager of network. He assumed post vacated recently by Frank Rogler, who has returned to Thermofax division of Minnesota Mining & Mfg Co., MBS' parent company. Mr. D'Antoni joined Mutual in 1958 as eastern sales manager and account executive. Earlier, he had been sales executive with Weed Radio Corp., station representative, in 1952-58 and member of CBS-TV's research and sales development staff. Mr. D'Antoni is credited with having brought Philco Corp., Walker Mfg Co., Monroe Auto Equipment Co. and Pinspotter Div., American Machine & Foundry Co. into network radio via Mutual.

For other personnel changes of the week see FATES & FORTUNES

next season for lack of adequate advertiser interest. This year games are only partially sponsored (by Falstaff Brewing). Network telecasts of games, blacked out within 50-mile radius of major league cities, have been on CBS since 1955. In past they have always had two or more sponsors.

RCA dividend 25 cents

RCA Friday (Sept. 1) announced quarterly dividend of 25 cents per share on common stock, payable Oct. 23 to holders of record on Sept. 15. Board also announced dividend of 87 1/2 cents per share on cumulative preferred stock for period Oct. 1 to Dec. 31, payable Jan. 2, 1962, to holders of record at close of business Dec. 4.

Board on Friday also elected daughter of first RCA board chairman as a director. She is Mrs. Everett Needham Case, wife of Colgate U. President and daughter of Owen D. Young, RCA chairman in 1919. Mrs. Case succeeds Mrs. Douglas Horton, who resigned.

Bartell ams become unit of Macfadden

Bartell Broadcasting Co.'s four radio outlets will become division of Macfadden Publications Inc. under merger plan to be submitted to stockholders of three companies involved. Process Lithographers Inc., New York, also will be Macfadden division.

Gerald A. Bartell, president of Macfadden and Bartell, and S. Roskin, president of Process, jointly announced Friday (Sept. 1) that both Bartell and Process will be operated as wholly-owned Macfadden divisions, with no changes in management or personnel. Bartell bought working control of Macfadden last February for $1.5 million (BROADCASTING, Feb. 13). Mr. Bartell said: "This is the first time all these components of communications—broadcasting, pay-tv, publishing, printing and world distributors of periodicals and books—have been welded together into a coordinated corporate structure." Macfadden, Bartell and Process each acquired interest in Teleglobe Pay-tv System Inc., in April, and Macfadden and Teleglobe will form company to operate commercial test of Teleglobe in major market to be approved by FCC.

Bartell Broadcasting owns WOKY Milwaukee, WADO New York, KYA San Francisco, and KCBQ San Diego.

Bartell principals have ownership-management interests in three Caribbean tv stations, not involved in merger: Tele-Haiti, Port Au Prince, Haiti, and Tele-Curacao and Tele-Aruba (under construction), both Dutch West Indies islands.

Meanwhile, Bartell's WOKY announced resignation of Leonard A. Schindler as general manager, and appointment of Mrs. Rosa Evans, Mr. Bartell's sister, as acting manager.

New date on uhf plan filings

FCC Friday extended deadline for comments on overall uhf proceeding and on eight deintermixture rulemakings. Comments now due Dec. 1; replies due Jan. 1, 1962.

Action was taken by acting Chairman Robert T. Bartley, who reserved action on petitions for extension of time on vhf drop-ins in eight cities. It's assumed full commission will tackle question of extension on drop-ins, which has been vigorously protested.
HANG THE CITY POPULATION!

The Charlotte TV MARKET is First in the Southeast with 651,300 Homes*

We'd be the first to admit that it stretches the imagination to hang a city population of more than two-hundred thousand—but hang the city population when counting necks in the entire Charlotte Television Market!

The real kicker is that WBTV delivers 55.3% more TV Homes than Charlotte Station “B”!!

Meeting of the Bored

If you doubt that the bored are meeting tonight, spend a few hours in front of your own TV set. Afterward, try to remember who was selling what and who was sponsoring whom.

At N. W. Ayer & Son we recommend this exercise. It has helped us to produce commercials that make for happier meetings of our clients’ boards.

The commercial is the payoff....N. W. AYER & SON. INC.
DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

SEPTEMBER

*Sept. 6—Washington chapter of Academy of Television Arts & Sciences, membership cocktail party. Sheraton Park Hotel, Washington, D. C.

Sept. 11—Space communications panel by Washington section, Institute of Radio Engineers and American Institute of Electrical Engineers, Dr. John Pierce, Bell Labs.; Dr. Einer W. Engstrom, RCA; Dr. Herbert Trotter Jr., General Telephone & Electronics Labs.; and Richard P. Gifford, GE. Moderator: Edward W. Hines, FCC. Natural History Museum, Washington, D. C., 8 p.m.

Sept. 15—South East Radio-TV Seminar, sponsored by Georgia Assn. of Broadcasters, to discuss various facets of broadcasting, including program form proposals, government encroachment, NAB leadership, etc. Biltmore Hotel, Atlanta.

Sept. 15—Reply comments due on FCC rule change requiring broadcast announcement of financial interest held by station management or employees in products or services promoted on air (pluggola).

Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and other Common Carrier for leased-line telegraph services.

Sept. 15—Comments due on proposed FCC rulemaking limiting grants of vhf translator stations, whereby stations could cover unserved areas rather than simply extend an existing station’s coverage area.

Sept. 18—Reply comments due on FCC rulemaking on revised program forms.

Sept. 18—Reply comments due on FCC rulemaking on new method and time period for keeping station logs.

Sept. 22—Radio & Television Executives Society, newsmaker luncheon, Hotel Roosevelt, N. Y. FCC Chairman Newton M. Minow is speaker.

Sept. 22—Advertising Federation of America, 10th district convention. Hotel Mayo, Tulsa.

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention. Buena Vista Beach Hotel & Motel, Biloxi, Miss.

Sept. 29—Minnesota Broadcasters Assn., annual convention. Speakers include NAB President Leroy Collins and FCC Commissioner White F. Bartley. Leamington Hotel, Minneapolis.

OCTOBER

Oct. 2—Deadline for comments on FCC’s proposal to delete single vhf and substitute uhf channel to make community all-uhf in following cities: Binghamton, N. Y. (Doc. 14243); Champaign-Urbana, Ill. (Doc. 14244); Columbus, S. C. (Doc. 14245); Erie, Pa. (Doc. 14246); Hartford, Conn. (Doc. 14247); Madison, Wis. (Doc. 14248); Montgomery, Ala. (Doc. 14249); Rockford, Ill. (Doc. 14250).

Oct. 2—Deadline for comments on FCC’s proposal to add additional vhf channel at below minimum mileage spacing to following cities: Baton Rouge, La. (Doc. 14251); Birmingham, Ala. (Doc. 14252); Charlotte, N. C. (Doc. 14253); Dayton, Ohio (Doc. 14254); Jacksonville, Fla. (Doc. 14255); Johnstown, Pa. (Doc. 14256); Knoxville, Tenn. (Doc. 14257); Oklahoma City, Okla. (Doc. 14258).

Oct. 2—Deadline for comments on FCC’s proposal to expand use of uhf band, including dual uhf-uhf operation, reserved pools of uhf channels for existing operating vhf stations, abolition of uhf allocation, relaxation of technical rules for uhf stations, uhf grants without a hearing, etc. (Doc. 14259).

Oct. 2—New deadline for comments on FCC rulemaking on new program reporting forms and logging requirements, extended from Sept. 7.

*Oct. 2—Canadian Electronic Conference of Institute of Radio Engineers. Toronto, Ont.

Oct. 2-6—Society of Motion Picture & Television Engineers, 90th convention. Theme will be “Integration of Motion Picture and Electronic Systems.” C. Loren Graham, RAB management conferences

Sept. 7-8 Haddonfield, N. J.

Sept. 11-12 White Sulphur Springs, W. Va.

Sept. 15-19 Sea Island, Ga.

Sept. 21-22 Dallas.

Sept. 23-29 Des Moines, I11.

September Publication
$4.00 per copy

How it began

EDITOR: Isn't Broadcasting carrying modesty a bit too far these days? Or are you unaware that yours was the first publication to print a valid solution to the "paper jungle" mess attendant upon the billing and affidavitting for spot commercials?

Within three weeks, two organizations have announced plans to centralize billing procedures for stations and agencies [BROADCASTING, Aug. 7 & 21]...

It was back on Nov. 23, 1959, that Broadcasting published a Monday Memo written by Norman Cohen of Mogul Williams & Saylor, now secretary of MW&S. In it Mr. Cohen advanced his ideas for centralizing and automating the costly and time-wasting paperwork in spot buying and selling . . .—Arthur W. Perez, Director of Public Relations, Mogul Williams & Saylor Inc., New York.

Everyone's advantage

EDITOR: We have been amazed at the widespread interest and response created by your article [BROADCASTING, July 10] on our fall Zonolite campaigns. Telephone and mail inquiries have been pouring in from representatives of stations throughout our area for details on our 1961 campaign.

Articles like this prove to your readers what exceptional opportunities for business there are for the local station when it joins a manufacturer's national campaign. We feel that you are doing your readers a great service by reporting of this type and that it will result to everyone's advantage . . .—Harvey W. Steiff, Vice President, Western Mineral Products Co., Minneapolis.

Best commercials

EDITOR: I would like to draw the attention of automobile manufacturers to the fact that these (automobile) commercials [LEAD STORY, Aug. 28] ranked the highest in our recent survey [PROGRAMMING, July 31].—Peter Goeler, President, National Audience Board, New York.

Collins critic

EDITOR: . . . I endorse every word of your editorial, "Collins conundrum" [EDITORIALS, Aug. 21], and completely agree with you that it is a matter of utmost importance that the NAB engage a veteran broadcaster for executive vice president.

I also am very disillusioned with the performance of Gov. Collins . . . It is about time somebody stands up and lets it be known that radio stations throughout the country have developed new services which were undreamed of 10 years ago and that they are rendering community services far beyond the call of duty.

I would even go so far as to say that the NAB should have the guts to stand up and question whether broadcasters should not be given, by act of Congress, rights similar to those given to all other businesses whose resources once upon a time belonged to the government. Years ago every tree, every blade of grass, every ounce of petroleum and every pound of mineral belonged to the government and, therefore, to the people.

Arrangements have been made over the last century and a half whereby natural resources were turned over to private enterprise and this is what has made America great.

It is rather unfortunate that at this crucial moment the president of the NAB sees fit to take a noncommittal stand . . . It seems to me that [he] is remiss in his duty because right now he should be traveling . . . from coast to coast to exhort . . . the state organizations and consult with them . . .—Egmont Sonderling, President, WOPA-AM-FM Oak Park, Ill.

Chicago revisited

EDITOR: Yesterday I finished poring over the voluminous stories you carried [GOVERNMENT, Aug. 7] about the law school symposium [on broadcast regulation and responsibility] . . . With your sanction we intend to lift pieces of your work for the October issue of the Alumni News magazine which will carry a roundup picture story on the symposium.—Bill Bennett, Department of Development, Northwestern U., Evanston, Ill.

[Permission granted.]

Same impression

EDITOR: CONGRATULATIONS ON YOUR EDITORIAL [EDITORIALS, Aug. 28] REGARDING FIRST ISSUE OF "SHOW BUSINESS" MAGAZINE. I GOT THE SAME IMPRESSION YOU PUT INTO YOUR USUALLY DESCRIPTIVE WORDAGE.—EDWIN K. WHEELER, GENERAL MANAGER, WWJ-AM-FM-TV DETROIT.

Texas market story

EDITOR: . . . A highly outstanding story on Texas. You captured the picture on the broadest possible front. We have circulated the Aug. 21 issue of Broadcasting to our clients . . . a conscientious, accurate and enlightening cover-

age of our area as well as the entire state.—Joseph Kelley, Partner, Adcraft Adv. Agency, Corpus Christi.

EDITOR: . . . One of the best articles I have ever read on our state. . . . refreshing after . . . the many articles on Texas written in a sarcastic vein, although attempting to point out the heavy economic growth.—Tol Ware, Vice President, Amarillo National Bank, Amarillo.

EDITOR: . . . An excellent report on Texas done in very good taste. This is unusual for outside reporting on Texas and some of the individuals who live here.—Jack C. Vaughn, Chairman of the Board, Trigg-Vaughn Stations, Dallas.

EDITOR: . . . Magnificent. Your facts are straight. . . . a very accurate picture of Texas and Dallas.—Hal Dawson Jr., Dallas Chamber of Commerce.

EDITOR: While recognizing your space limitations on your treatment of Texas' Spanish-language market, we feel you were much too casual about it. . . . There are 1½ million Mexican-Americans in Texas. . . . It would seem case studies would be the most effective way of judging all media. . . . The Mexican-American, regardless of whether or not he is bilingual, is most effectively persuaded in his own language. . . . There are three Spanish-language stations in San Antonio, two in Corpus Christi and several serving the Rio Grande Valley and El Paso.—Arthur Gordon, Vice President, National Time Sales, New York.

EDITOR: . . . The finest in-depth general study I've read. However, in my opinion not enough attention was paid to the broadcast pioneers in this state.

A note of added interest . . . FM is missing from many of the top markets in the U.S. Yet in the twin cities of Odessa-Midland there are three in operation and one cp granted—all independents. . . . —Roy A. Eilser, General Manager, KQIP (FM) Odessa.

EDITOR: Enjoyed your special report on Texas . . .

You will no doubt get many letters from Texans. . . . Of course, here in Los Angeles, we will naturally take a very casual, lofty, superior, and tolerant view of the entire Texas matter, since their population, building and economic expansion claims can't begin to compare with ours—and even Arizona leads them percentage-wise.—Red Blanchard, KNX Los Angeles.

[Reprints of BROADCASTING's special Texas market story are available at 20 cents per copy or $20 per hundred, plus expression or mailing charges.]
Japan offers ready-made radio-tv markets to the U.S. advertiser

I am often disappointed by the lack of news and publicity in the U.S. about Japanese advertising in general and Japanese broadcasting in particular even though Americans have been instrumental in many ways in bringing about the phenomenal growth of the borrowing business in Japan. I also wonder why more Americans are not giving deep thought to the Japanese market when that country is currently engaged in reducing its trade barriers against imports from the U.S. and other countries.

The 1960 advertising volume in Japan totaled $500 million, an increase of 23.6% over 1959. Of this figure, 21.5% went into television and 10% into radio for a combined spending of nearly $160 million.

To Americans accustomed to figures reaching the multi-million-dollar level, this may be insignificant, but to the Japanese who have seen its growth from literally nothing in 1951 to its present size, it is encouraging and inspiring.

**Commercial Advent** — For nearly three decades, until some time after World War II, Japan's radio was monopolized by the government-owned NHK (Japan Broadcasting Corp.) during which commercial radio was banned. In 1951, I had the pleasure of working with Japanese business leaders to establish commercial broadcasting.

Today more than 15 million registered and 20 million unregistered radio sets tune to 110 commercial stations and the national government-sponsored NHK network. Telecasting began with less than 800 sets in all Japan in February 1953, as of August 1961, over seven million sets were registered and we estimate that there are eight million sets in the country. There are now 67 commercial television stations, plus 78 government-owned stations, of which 11 are educational.

Most tv sets in Japan are 14 inches and sell from $100 to $170. This equals about two months pay for the average Japanese and can be paid by the installment system, so sets continue to sell at a very brisk pace. Through a national microwave network, tv waves cover 85% of the country, and the government is preparing reallocations for a secondary channel plan, which should extend coverage to 95%.

In the strict sense of the term, there is no commercial radio or television network, but a nationwide hookup is often effected on the basis of sponsor requirements. But most local stations prefer to hook up with one or more Tokyo stations and to a lesser extent with stations based in Osaka. Station hookups or sponsor networks are affected through the national microwave setup, video-tape or film distribution.

Television broadcast hours vary slightly. In general, weekday broadcasting hours are 7:59 a.m., 11 a.m.-5 p.m. and 5:30 p.m.-12 midnight — averaging 14 hours daily. On Saturdays and Sundays, this increases to 17 hours. Most programs are 30 minutes, but 45-minute and 60-minute programs are increasing.

**Quality** — The quality of Japanese programs is generally very high when the price and time factors are considered. Kabuki shows, Broadway-type musicals and other shows are carried frequently on the commercial tv stations.

Japanese films usually receive high ratings, and although they amount to only a little over 16% of the total programming, they are heavily concentrated in prime time segments. Emphasis on American films will continue to increase, particularly with the gradual lifting of import barriers. U.S. tv films continue to command top billing because major Japanese film producers have not yet joined with the television industry to produce high quality tv films and because there has been a multifold increase in production expenditures to advertisers.

In the commercials, the soft-sell approach predominates; the hard-sell variety, while on the increase, tends to antagonize the audience. Some are so soft and indirect that one often wonders who the sponsor is and what he is trying to sell.

Most Japanese tv commercials are 30 seconds or 60 seconds in length. 30-second spots dominate in station breaks. For some reason 20-second spots have not caught on, but 10-second and 5-second IDs are quite popular.

**Scarcity** — Prime time is next to impossible to secure, and when it is available, the key station often dictates the station lineup. Advertisers who desire favorable time segments on any tv station must establish seniority over the years and must work through strong advertising agencies. Also, prime station breaks are usually sold out for long periods; it is necessary to be alert to see that one does not miss a sudden shift among the established sponsors.

In 1951 when commercial radio went on the air, Dentsu Adv. Ltd. was forced into establishing a radio audience rating service; again when commercial television began operations, Dentsu went into the field of television audience ratings. Through the years, Dentsu's audience ratings have become accepted in the Japanese advertising industry as the medium for judging and evaluating tv programs.

The future of television in Japan is very bright as sets continue to increase and new stations are successfully launched. Several key stations also have been experimenting with color broadcasting during the past few years and color set owners in the metropolitan areas of Tokyo and Osaka get a regular fare of color programs averaging over three hours daily. While color sets are few in number and set prices almost prohibitive, the major stations are going ahead with color plans.

Since black-and-white television established itself in Japan so successfully even in the initial stage through use of sets located in public spots, and in restaurants and cafes, many television executives feel they can succeed just as well with color sets, using the same methods. At any rate, color tv has Japanese advertising's attention today.

Hideo Yoshida, whose singular pioneer role in Japanese advertising is frequently paralleled with Albert Lasker's leadership in the U.S., entered Dentsu Adv. in 1958 upon graduation from Tokyo U., where he studied economics. He became president of Dentsu in 1947. It was primarily through his perseverance, with support from the U.S. occupation force in Japan after World War II, that the Japanese government permitted commercial radio to start in 1951 and commercial tv in 1953.
The nostalgia that was the 20's comes vitally alive...more glorious than ever!
Razz-Ma-Tazz...15 memory-igniting vocal and ensemble jingles that relive a fantastic era...when B. Boop, R. Vallee, A. When your television dollars are looking for the network and the time period that will deliver the biggest and most responsive national audience, remember this:

In the critical matter of half-hour by half-hour ratings, ABC-TV showed its popular appeal with 21 out of 51 firsts...more firsts, that is to say, than Net Y or Net Z.*

The percentages are riding with you on ABC-TV. Take a look at the latest National Nielsen, see how the lookers, coast-to-coast-wise, are spending their looking-time.

TELEVISION PASSES RECESSION TEST

- Economic downturn fails to halt rising curve of medium
- Second quarter rally puts '61 spot billings even with '60
- FCC figures show network, spot with 7% gain in last year

Television is now emerging from its third and most severe economic recession test in 10 years with its sales still moving upward.

Two reports last week buttressed the rising optimism evident during the past few weeks on a wave of accelerating sales for fall and winter. Together the reports show that television weathered the general economic downturn of 1959-60 with its sales curve intact and still rising—the only major medium to do so.

- FCC's official report for 1960 showed national spot and network sales wound up the year 7% ahead of the total for 1959, even though the general economy was in a slide through most of the last half of 1960.
- Television Bureau of Advertising estimates for the first half of the current year showed the 1960 advances had been slowed but not stopped by the general downturn, which hit bottom in the first quarter of 1961. Spot billings, off 2.1% in the first quarter, rallied in the second and wound up the first six months about 1% below the 1960 level. Network billings, which rose 6.2% in the first quarter, climbed 8.2% in the second and 7.5% for the six-month period. Total national billing rose 3.7% for the six months.

On this track record through the rocky recession period there appeared little doubt that, barring war or other unpredictable catastrophe, television would wind up 1961 with another record in national sales. The networks' fall sales have been running ahead of last year's pace (Broadcasting, Aug. 7, et seq) and spot sales, picking up noticeably in recent weeks, are expected to continue these gains and prove stronger in the fourth quarter.

TvB foresees total network billings of about $735 million for the year, a gain of about 8% over 1960, and spot billings of at least $625 million, a 2% rise. These estimates represent gross time billings, before commissions and discounts.

Although there are no authoritative figures on the current condition of local television sales, there is nothing to indicate a local pattern materially different from that shown for national. The FCC figures for 1960 showed local business performing at about the same percentage level of increase—7.6%—as network and spot.

Good Track Record • Television's record in the face of general economic decline was seen as especially heartening in relation to the sales of rival media, none of which gained or even held even in the first half of this year as compared to the same period a year ago. TV's major competitors did advance in 1960 as compared to 1959, although in most cases at lower percentage levels than television.

Media Records estimated gross national advertising expenditures for newspaper space in 1960 at $782,149,000, up 1.2% from 1959. Leading National Advertisers put the comparable figure for magazines at $853,581,000, up 9%. There were no comparable estimates on radio's gross, but McCann-Erickson estimated net expenditures for radio time and talent at $668,000,000, a gain of 1.8%.

In the first half of 1961, however, the print media took a tumble and radio also slipped behind its totals for the same period of 1960. Magazine revenues were estimated at $419 million, a drop of 4%, and newspaper lineage was down 6.8%. Although there were no official estimates on net-

Uhf makes profit—$300,000 for 72 stations

Uhf television moved into the black ink column for the first time in its eight-year life in 1960. Total income for the chs. 14 to 83 stations amounted to $300,000.

In previous years, uhf stations as a group showed losses of $500,000 in 1959, $2.2 million in 1958, and $3.5 million in 1957.

Last year, the FCC's 1960 financial report on tv showed, half of the 72 uhf stations operating for the full year ended with a profit, while the other half showed losses.

Other highlights of uhf's financial muscle in 1960:
- Two uhf stations made profits before federal income taxes of between $200,000 and $400,000. Most, 19 of them, had profits of less than $50,000.
- The same number, 19, had losses of less than $50,000—and again two uhf operators sustained losses of between $200,000 and $400,000.
- Eighteen uhf stations reported total revenues in the $200,000-$400,000 class—with half of these announcing a profit, while the other half reported a loss. Thirteen uhf stations had total revenues of less than $100,000 for the year (of which 10 sustained losses), while 12 uhf outlets reported total revenues of between $400,000 and $600,000 (again with half showing a profit and half a loss).

*Data is not available for one station which operated full year and is not counted in these figures.

**There were two stations which operated during 1960 but which ceased before Dec. 31, 1960. These are not counted.
**TELEVISION PASSES RECESSION TEST continued**

Work radio, its total billings were generally acknowledged to have been hard hit in the first quarter but to be recovered steadily in the second. The latest estimates on spot radio indicate that while business rallied strongly in the second quarter and full-year totals probably will be better than last year's, billings in the first half were still 4.7% below those for the same 1960 period (see story page 37).

**Important Index - Definitive figures on TV's performance through the 1960-61 slump had been awaited somewhat more nervously than in preceding recessions because this was the first since television reached its apparent leveling-off point in terms of both tv homes and tv stations. In the 1953-54 slump, the first after it became a major advertising vehicle, television was still growing rapidly and its sales climb scarcely wavered. In the 1957-58 downturn tv's rate of growth had already slowed perceptibly and its sales, too, though they continued to advance moderately.**

The question in the 1959-60 downturn—apparently answered in the negative—was whether television had now reached a point where it might be more vulnerable, like its print competitors, in times of general economic rough sledding.

TVB's second-quarter spot sales report—prepared for TVB by N. C. Horaborough Co.—indicated that despite spot's rocky start in the first three months, sales in the second quarter pulled even with and even exceeded by a fraction (0.04%) the total for the pre-recession second quarter of 1960.

The 1961 second-quarter total was put by TVB-Robin at $594,000, representing reports from 338 stations. The 0.04% gain was figured on the basis of 314 stations which submitted reports for the second quarters of both years.

**Rally Builds Total**

The second-quarter rally brought the spot total for the first six months to $311.9 million as compared to $315.2 million for the same period of 1960. Network gross sales meanwhile approximated $182.5 million in the first quarter and $18.4 million in the second for a first-half total of $363.9 million, as against $336.3 million during the first half of 1960.

Procter & Gamble again paced the spot tv field in the second quarter with gross billings of $16.4 million followed by Colgate-Palmolive with $4.7 million and Lever with almost $4.3 million (see list of top 100, page 32).

Newcomers to the top 100 spot advertisers were Phillips-Van Heusen Corp. with $428,000; Cities Service with $388,500; Pure Oil with $379,900 and California Spray Chemical Corp. with $354,500.

Four of the six principal product classifications showed gains over the second quarter of 1960. The cosmetics and toiletries group was up $16.7 million, or 1.7%; ale, beer and wines with $14.8 million were about 10.4%; household laundry products with almost $13 million were up 8.5% and confections and soft drinks at $9.7 million were up 10.1%. Declines...
were registered by household cleaners, cleaners, polishes and waxes, off 10.1% to $8.6 million, and tobacco products, off 2.6% to $8.3 million (for complete category list see page 32).

The Portland figures represent gross expenditures for time only, before commissions and discounts, while FCC’s figures represent expenditures for time after the volume discounts.

**Spot by Markets** • Although total spot revenues in 1960 climbed by 8.3% over comparable 1959 income, the changes were spotty when time sales are analyzed market by market (see table above).

In the number one tv market, New York, spot revenues leaped upward from 1959’s take by over $5.7 million. In Los Angeles, however, the number two tv market showed spot revenues slipped by $500,000.

Actually spot income went up in most of the top tv markets in 1960. Spot jumped by over $2.6 million in Chicago and by $2.2 million in Philadelphia.

It moved up by $1 million or more in Cleveland, St. Louis and Hartford-New Haven-New Britain-Waterbury, Conn.

In some 15 other cities, however, besides Los Angeles, spot fell below the 1959 income from this category of time sales.

These were Pittsburgh, Oklahoma City, Omaha, Green Bay, Little Rock, Wichita, Evansville, El Paso, South Bend-Elkhart, Albuquerque, Paducah-Cape Girardeau-Harrisburg (Ill.), Youngstown, Rochester-Austin (Minn.), Mason City (Iowa), Las Vegas-Henderson (Nev.), Cedar Rapids-Waterloo (Iowa) and Wichita.

**Top Cities** • Still the lead city, New York tv stations took in almost $75.5 million in total broadcast revenues in 1960. Compared to $69.5 million in 1959. Network time sales revenues dipped by over $400,000 but spot and local moved up, by $5.7 million and $1.5 million respectively.

Los Angeles, remaining in second place for total tv revenues, accounted for $45.4 million, which was a slippage of $200,000 compared to 1959's total revenues of $45.6 million. Network

**Near bullseye**

**BROADCASTING**'s estimates of 1960 television time sales—published more than six-months before the FCC report—were virtually on the button.

For the Perspectve 1961 issue (Feb. 20), Broadcasting estimated total time sales at $1,146.3 million. The FCC’s final, official figures for total time sales was $1,146.6 million, a difference of two hundredths of a percent.

Sale of network time was figured at $462.2 million; the FCC reported this amounted to $471.6— a difference of 2%. Sale of national non-network time was estimated at $469.7 million; the FCC reported this category at $459.2 million—2% high for the estimate. Local time sales were estimated at $206.9 million; the FCC’s report showed $215.8 million for this category—a difference of 4% between the estimate and actual official figures.

Sales were up by $381,000 and local rose by $509,000, but spot fell back by $532,000.

Chicago, in show position, took in $41 million, compared to $38.8 million in 1959. Network slipped by $151,000, but spot shot up by $2.6 million and local revenues moved ahead by $273,000.

Even the tail-enders in tv markets showed a substantial gain, for its size, in total revenues. Las Vegas-Henderson, Nev., accounted for $1.2 million in total revenues in 1960, compared to $1.1 million in 1959. Network income rose by $27,000; spot sank by $20,000 and local revenues moved upward by $90,000.

**Dips in Cities**

With all the upbeat in revenues, there were surprising evidences of slippage in other categories of times sales aside from spot revenue.

Local income dipped by $167,000 in Detroit. In Pittsburgh network revenues slid $205,000, in addition to the spot dip of $55,000. Local revenues softened by $49,000 in St. Louis.

Network revenues fell below the previous year in Washington, Dallas-Fort Worth, Kansas City, Rochester (N.Y.) and Richmond-Petersburg.

Local income slid in Cincinnati, Baltimore, Kansas City, Houston-Galveston, Atlanta, Denver, New Orleans, Rochester (N.Y.), Knoxville, Spokane, Amarillo and Chattanooga.

**Upward Move**

Television’s revenues and profits continued to move up in 1960 notwithstanding business conditions that were still generally soft following the 1959-1960 recession.

Total revenues for the three tv networks and 530 stations last year inched up to $1,268.6 million, up 9% over 1959’s $1,163.9 million, according to the FCC’s annual financial report on tv issued last week.

Profits, before federal income tax, sales were up by $381,000 and local rose by $509,000, but spot fell back by $532,000.

**Network-station financial picture, 1960**

BROADCASTING, September 4, 1961
There was a time when agriculture dominated Central Iowa’s economy. But it’s not true today. Central Iowa—the area served by WHO-TV—is one of America’s most diversified markets.

Take Des Moines for example. Its population has grown 17% in 10 years. The city has 300 factories manufacturing 1,000 different products PLUS 44 insurance company home offices with $7.4 billion of insurance in force. Yet Des Moines is only one of 48 towns and cities in WHO-TV’s primary coverage area.

Today, more than half the $2.5 billion income in Central Iowa comes from sources other than agriculture, but farm incomes average $14,700 per year.

Your PGW Colonel has all the facts on WHO-TV—the one station best equipped to give you a good share of Central Iowa’s bustling, balanced economy.

NOTE: Excludes 7 satellite stations whose financial data are included with their parent station.

rode to a new high—to $244.1 million, up 9.8% over 1959's $222.3 million.

In both cases the rise was less than in the previous reporting period. Total revenues in 1959 jumped by 13% over those of 1958, and 1959 profits were 29.3% over 1958's.

**Median Figures**

- Included for the first time in the FCC's report is a table showing median revenues and median profits and losses for three major groupings of the nation's markets.

In markets which had three or more tv stations operating, the median revenue for 269 stations was $1,240,000; the median profit for 218 of these stations reporting black ink operations was $310,000 and the median loss for 51 red ink operations was $61,000.

For those markets where only two stations were operating, 136 stations had median revenues of $684,000, with 117 reporting a median profit at $130,000 and 19 reporting a median loss of $42,000.

In markets with only a single tv station, median revenues for 116 outlets was $215,000, with 65 stations having a median profit of $44,000 and 51 having a median loss of $36,000.

The median figure means that there are just as many stations reporting revenues, profits or losses above the median figure as below.

Other highlights of the FCC report:
- Advertisers bought 5.8% more network time in 1960 than in 1959—revenues from the sale of network time totaled $471.6 million in 1960 compared to $445.8 million in 1959.
- Time sales to national and regional advertisers (spot) moved up 8.3%—$459.2 million in 1960 compared to $424.2 million in 1959.
- Local time sales moved up 7.6%—$215.8 million in 1960 compared to $200.6 million in 1959.
- Total time sales for the second year went over $1 billion—$1,146.6 million, up 6.5% over 1959's $1,076.6 million.
- The three tv networks and their 15 owned stations took in $640.7 million, up 11.2% over 1959. Expenses went up 11.7% to $545.5 million, and profits before federal income tax were up 8.3% to $95.2 million.
- Network operation accounted for 57.2% of the total revenues of the three networks and their 15 owned stations ($640.7 million), but only 35.3% of the total profits ($95.2 million).
- The 93 pre-freeze tv stations, all vhf, accounted for 23.9% of total industry revenues as compared to their 1959 share of 25.0%. Total revenues of these "grandfather" stations totaled $303.2 million compared to $291.2 million in 1959, and profits hit $98.5 million compared to $93.1 million in 1959.
- The 422 post-freeze stations reported total revenues of $324.7 million, representing 25.6% of total industry revenues, virtually the same ratio as in 1959. Of the 422 post freeze tv stations, 346 were vhf.
- Of the 507 tv stations operating for the full 1960 year, 389 reported a profit. Of the 107 pre-freeze stations, 99 reported a profit. Among the 328 post-freeze vhf stations, 254 reported a profit.
- As a combined group, 81.1% of all vhf stations reported profits, compared to 78.5% in this category in 1959.
- Reporting profits of over $1 million before federal income tax were 67 stations, compared to 65 reporting this sum in profits for 1959.
- Of the total revenues taken in by tv stations and networks in 1960, 75% ($951.9 million) was derived from the sale of time, and 25% ($316.7 million)...

*NIELSEN 4-WEEK SURVEY  MAR. 6-APRIL 2, 1961

CHANNEL "B"
GROSS BILLINGS CONTINUE CLIMB PAST $160.5 MILLION MARK

Tv spot billings in the second quarter rose .04% over the like quarter a year ago, Television Bureau of Advertising is announcing today (Sept. 4).

Total gross billings of $160,599,000 for the second quarter are based on the reporting of 338 stations. The aforementioned .04% change is based on the 314 stations that reported in both the second quarter of 1960 and 1961.

Hartz plans 10 markets for four Ziv-UA series

In what was said to be its first regular use of syndicated tv film programs, Hartz Mountain Products (bird food), New York, has signed to sponsor four Ziv-United Artists series in ten major markets, starting this fall. Hartz, through George H. Hartman Adv., Chicago, will sponsor more than one of the programs in each market.

The stations that will carry the programs are WPIX (TV) New York, WGN-TV and WBBK (TV) Chicago, KTLA (TV) Los Angeles, KRON (TV) San Francisco, CKLW-TV Windsor-Detroit, WHDH-TV Boston, WEWS (TV) Cleveland, WRCV-TV Philadelphia, KDKA-TV Pittsburgh and WTCN-TV Minneapolis-St. Paul. The series involved are Ripcord, Everglades, Troubleshooters and Adventures at Scott Island.
“WARNER’S ‘FILMS OF THE 50’s’ PUT US BACK INTO FEATURE FILM PROGRAMMING”

says Ben Berentson, Station Manager, WGN-TV, Chicago, Ill.

“For about two years there was such a dearth of good properties available to us, we stayed completely away from features.

“But when we saw the successful track record of Vol. I telecasts around the country, and looked over the equally fine balance of TV attractions in Vol. II, we knew we had the quality we needed to put us back in the feature film business, profitably.

“Advertisers seem to agree. On August 1 we were 75% sold on our first programmed series using ‘Films of the 50’s’, slated for September . . . sold with no special promotion or sales effort!”
STEREO Package...from RCA

RCA offers a complete line of FM Stereo Broadcasting Equipment, making it easy to meet all your needs from one reliable source. For your studio there are turntables with stereo pickups and dual preamps, stereo tape recorders, dual channel console; for your transmitting plant there are stereo generators, a full choice of FM transmitters and antennas. This is a complete package of "matched" equipments—all designed to work together in a stereo system, and all built to the same high quality RCA standards.

Stations already equipped with a post-war model RCA FM Transmitter can begin stereo programming at once—merely by adding the stereo generator—plus the necessary audio equipment.

Designed by forward thinking RCA engineers this stereo generator was the only equipment available when FM stereo broadcasting was authorized. The RCA stereo generator is FCC type approved and is now "on the air" at a number of FM stations.

RCA Stereo Equipment has been engineered to provide many years of dependable operation while producing the highest quality FM signals. And, you get unparalleled RCA service both before and after the sale. For additional information about the complete line, call your RCA Broadcast Representative. Or write to RCA, Dept. Z-22, Building 15-5, Camden, N.J.
FOR YOUR TRANSMITTER PLANT...

Now...‘One Stop’ Shopping

...for your complete FM

Here’s the Complete Package:

FM TRANSMITTERS FOR STEREO
A complete range of transmitter power is available—1, 5, 10, 20, 25 and 50 kw. Each is designed to accommodate the new stereo signals and an RCA multiplex subchannel. All these FM Transmitters are built to the same high performance and dependability standards which characterize all RCA transmitters.

STEREO GENERATOR—TYPE BTS-1
Heart of the new stereo system is this double side-band generator. Fully transistorized, the BTS-1 provides full fidelity frequency response over the entire audio range. The generator produces a double-side-band, suppressed-carrier AM signal for transmission of one of the stereo channels.

TURNTABLE EQUIPMENT FOR STEREO
The standard RCA Turntables, such as the 16-inch BQ-2 or the 12-inch BQ-51 are recommended for stereo operation. Use them for excellence of performance with the new RCA stereo pickup cartridge, lightweight tone arm and dual preamplifiers.

STEREO CONTROL CENTER
NEW BC-7 DUAL CHANNEL CONSOLE
Provides complete stereo (or monophonic) mixing, switching, monitoring, and cue/talk-back. All-transistor design—with plug-in amplifiers for ease of servicing; assures long-life even under continuous service. Dual controls may be “ganged” for stereo operation.

NEW RT-21 TAPE RECORDER FOR STEREO TAPE
High fidelity performance combined with operator-oriented controls make this the most flexible stereophonic recorder available. Features include: Easy speed change, interlocked record operation, ease of threading, and variable speed cue. Has two module amplifiers for stereo recording and reproduction.
WGAL-TV, a pioneer station, introduced television to a sizeable area of Pennsylvania. Since its inception in 1949, WGAL-TV has firmly maintained its pioneering principles by being constantly alert to new and better ways of serving viewers throughout its coverage area.
Spot radio rallies in second quarter

SRA THINKS CHANCES GOOD FOR A BETTER YEAR THAN 1960

The spot radio business, listless during the first quarter of the year, perked up during the second, encouraging sales officials to predict that its 1961 full-year total will exceed 1960's.

Estimates being released today (Sept. 4) by Station Representatives Assn. put national spot radio's second-quarter gross time sales at $49,320,000.

This was still 1.9% below the figure for the same period a year ago but represented a strong rally after the 7.9% decline noted in the first quarter.

These figures, compiled for SRA by the independent accounting firm of Price Waterhouse & Co., brought national spot radio's estimated gross time sales for the first half of 1961 to $89,644,000, or 4.7% below the $94,060,000 reported for the first half of 1960.

SRA Managing Director Lawrence Webb said the second-quarter rally, coupled with current signs of continuing gains, left him confident that "the loss" figure of $4,416,000 as it now stands will show up on the black side of the ledger when final figures are in for the year.

Ever-Present Evils • He attributed the first-half lag to several factors, some of which he said stem from practices that will always keep spot radio short of its maximum potential, even in the best of boom-times, unless stations voluntarily eliminate them. The "most bothersome" of these, he said, is the dual-rate system under which many stations offer one rate to local advertisers and another to national advertisers.

"It is a well-known fact," Mr. Webb said, "that a lot of nationally spent spot radio dollars continue to wind up in the 'local sales' classification, because a number of national advertisers are able to make a better buy through dealer or broker setups that are able to garner a 'local' rate."

He said that "while a growing number of stations report they have only one rate subject to the regular 15% agency commission, 75% of the commercial radio stations continue to use separate national and local rates." SRA is conducting a continuing campaign to promote single-rate systems that make no distinction between local and national business.

Mr. Webb said another complication for spot radio is that agencies are confused and embarrassed by "the number of radio stations with single rates where agency commissions do not apply."

Out of the Dark • Barter deals also were singled out as drawbacks to spot billings: "Such deals represent a lot of spot radio dollars, and they never show up in the right sales columns. When stations put an end to such shenanigans and return to a code of ethics that will enable an advertiser to buy radio at the published rate with full confidence that he is not being discriminated against in favor of a fast-buck artist, you will see a decided gain in national spot dollar volume," Mr. Webb asserted.

In support of his prediction that spot radio billings will continue to gain despite such "detering factors," the SRA executive cited more than a score of national advertisers which he said are currently allocating sizeable chunks of their advertising budgets to spot radio for the rest of 1961.

He said this group includes such new-to-radio advertisers as Dennisons Foods, Owens Yacht Co. and Dulaney Foods, in addition to such experienced radio users as Burlington Hosiery, Ford Motor, Best Foods, Hills Brothers Coffee, Noxzema, Nescafe, Prestone, Zerez, Campbell Soups, Mueller's Macaroni, Esso, Shell Oil, Betty Crocker Foods, Ocean Spray Cranberries, Q-Tips, Rem Cough Medicine, 666 Cold Remedies, John Hancock Life Insurance and Eastern Airlines.

Mr. Webb said spot radio's list of customers is being gradually expanded through intensive sales efforts utilizing tailor-made presentations to show prospects not only what radio can do generally, but what it can do to solve their own individual problems specifically.

Business briefly...

Procter & Gamble Co., Cincinnati, has bought Hollywood: The Golden Years, story of the era of silent films, to be presented Nov. 29 on NBC-TV (7:30-8:30 p.m. EST). Agency: Benton & Bowles, N. Y.

Union Carbide Corp., N.Y., through William Esty Co., Hollywood, will sponsor College Football Kickoff, a new ABC-TV series of 13 programs each covering a different phase of college football. The series, to be presented immediately preceding NCAA Football, will begin Sept. 16 (Sat., 4:45 p.m. EDT).

Hazel Bishop Inc., N.Y., has bought...

'Old West' lures viewers to Barbecued Beans

The lure of the Old West is still strong in the modern American heart, as any TV rating chart will testify.

A part of that lure comes from the open-air cooking of the range, the barbecued-beef-and-beans fare of the cowboys has been translated through the years into today's cookouts, which still feature beef-and-beans as a major attraction.

Three in One • So, when Campbell Soup Co. came up with a new product, a blending of California pink beans, Great Northern beans and Baby Limas with a mild but tangy tomato sauce into Campbell's Barbecue Beans, the company and its agency, Needham, Louis & Brody, Chicago, decided to capitalize on this common denominator between the Old West and Modern America, east or west.

The result was a series of TV spots that show Campbell's Barbecue Beans being eaten with equal enjoyment by cowboys who look like real cowboys in a western setting that looks like the real West and by a typical American family of today. The goal was to establish an empathy with the viewers that could cause them to capture a little bit of the West for themselves by purchasing it in a 16-ounce red and white can, generally for 19 cents or two for 37.

A four-month test—July through October 1960—was conducted in four widely separated markets—Scanton-Wilkes Barre, Pa.; Jacksonville, Fla.; St. Louis, Mo., and San Diego, Calif. The TV spots—two one-minute commercials and two 30-second condensations of them—were tested in the daytime, with 10-15 showings per market per week for seven weeks, and in the evening, with three-five showings per market per week for 12 weeks.

Hal Kaufman, senior writer of N.I. & B Chicago, wrote the script and the original music for the TV spots, which are unusual in that all have the same sound track. They were recorded in New York by western singer Ken Carson, although the visual approach varies with each of the two one-minute commercials and their 30-second condensations. Willis J. Davis, producer and senior TV art director of N.I. & B Hollywood, served as art director and agency producer for the spots, which were produced by Jack Denove Productions in Hollywood. Mr. Davis and Jack Denove jointly did the casting for the spots, to insure that the characters were truly western and not motion picture or drugstore cowboys.

How It's Done • A typical spot, "Line Shack/Backyard Barbecue," opens with a cowboy on horseback galloping up to a line shack where a second horse is grazing and a second cowboy stands at the door, waving his partner in with a wooden spoon as Ken Carson sings, to guitar accompaniment, "Now this is the story of the new Barbecue Beans, the newest beans in town." The camera shows the interior of the cabin, with a pot of beans bubbling on the stove, then cuts to a closeup of the pot as the cowboy stirs the beans, while the singer continues, "with a fresh-off-the-open-fire flavor, a flavor that wins hands down." The cowboys taste the beans, show their enjoyment and dig in in earnest as the song goes on: "New Barbecue Beans from the Campbell folks, nothin' like 'em ever before. There's three kinds of beans in barbecue sauce. Get 'em now at your favorite store."

Following a description of the product with its three kinds of beans, the spot shows a backyard barbecue

"biggest TV saturation campaign" in its history: 100 stations in the top 44 markets, using 60- and 20-second spots from Sept. 20 to Nov. 15. Agency: North Adv., N.Y.

Helene Curtis Industries, Chicago, has expanded its fall participation buys on NBC-TV to include the Dick Powell Show Tues. 9-10 p.m. and Saturday Night at the Movies Sat. 9-11 p.m. for toiletries products not yet identified. Firm earlier bought part of 87th Precinct Mon. 9-10 p.m. Agency: Edward H. Weiss & Co., Chicago.

Also in advertising... PR chosen • Studebaker-Packard Corp., South Bend, Ind., has retained Sydney S. Baron Public Relations Corp., New York, with Murray Snyder, former Assistant Secretary of Defense for Public Affairs as account executive. S-P's advertising agency is Doyle Dane Bernbach, New York.

"Winning the peace..." • Benton & Bowles, N.Y., has prepared a fall drive for the USO with, "Winning the peace is a lonely battle," as the theme. The appeal will be sent on TV and heard from approximately 3,200 radio stations and the four networks.

ARF report • The Advertising Research Foundation has released to its members a report entitled, "A Comparison of Estimates from the Nights-at-Home Formula with Estimates from Six Calls." It is the first report to be completed in ARF's current series of methods research studies, a program launched to evaluate and develop better techniques of advertising measurement.

Eastward Ho! • Tele-Tape Productions Inc. is moving its headquarters from Chicago to New York this month. The company, which operates a mobile tape production unit, has been retained as basic supplier of mobile facilities to Video Tape Productions of New York. Tele-Tape has operated mobile units on location shooting in the Midwest, Florida and along the eastern seaboard in the production of commercials and shows, including the forthcoming Kukla and Ollie show on NBC-TV. New York headquarters address to be announced shortly.

Music mixer • Music Makers Inc., N.Y., reports it has developed a process called Tele-Mix, a form of closed-circuit television, which permits agency producers to view on a TV screen the way music is mixed into TV commercials for their
with a modern American family enjoying the "three kinds of beans in barbecue sauce" because "Campbell's makes 'em and that makes 'em good," and dissolves to a flash finish with the Campbell Kids pushing a can as they carol "new, new barbecue, new Campbell's Barbecue Beans.

Audience reaction to the four-market test campaign was immediate and emphatic and Campbell's Barbecue Beans were put into national distribution without delay. Announcement to the public across the country was made on the CBS-TV special "Thanksgiving Day Parade Jubilee." In December, the barbecue beans commercials appeared on ABC-TV's Donna Reed Show and CBS-TV's Lassie, plus daytime spots on seven ABC-TV programs. Beginning in April the spots also were carried by Walt Disney Presents and Silents Please, both on ABC-TV. And the sound tracks of the TV commercials were used as radio commercials for an April-July campaign in six major markets in the Southwest and Pacific Coast areas.

First In Beans - "Campbell's will not divulge specific sales figures," Edward W. Hobler, vice president and account supervisor on the account at N L & B Chicago, said last week, "but the addition of Barbecue Beans to Pork and Beans and Beans and Franks has made Campbell's the leader in the bean field across the nation. And television can take the credit, for this is virtually the only advertising that has been used for this new product. The fact that we moved so swiftly from the test campaign into full national advertising shows how effective tv was at the start, and it's been just as successful since then."

New tv spots, with even more emphasis on the western outdoor life and the way Barbecue Beans fit into it, will be used this fall on Campbell's tv network programs, Donna Reed on ABC-TV and Father of the Bride on CBS-TV.

clients. The process is said to expedite and improve the method of mixing music with a finished commercial.

Non-filters gain in survey - Television Advertising Representatives Inc., N.Y., covered seven product categories in its latest brand comparison survey conducted last March in the firm's eight tv markets. The survey revealed that non-filter cigarette smoking is on the up-grade, but like the other categories, there were wide market-to-market differences. Besides cigarettes, the brand comparisons cover beer and ale, cold remedies, gasoline, headache remedies, hot cereal and margarine.

Agency appointments...

- Harwell-Kilgore Corp., Bolivar, Tenn., appoints Frank B. Sawdun Inc., N.Y., to handle its advertising. Spot radio and tv will be used for H-K's toys and housewares.

A 30-10 split of the 40-second ID time

THAT'S THE COMBINATION RECOMMENDED BY TVAR

A major tv rep company last week announced its stand on how it feels advertisers should split the new 40-second prime-time station breaks that go into effect this fall. Television Advertising Representatives Inc., New York, went on record as favoring a "30-10" combination for national spot tv advertisers.

TVaR offers its formula as a solution to "some confusion" about the new 40-second adjacency with respect to length of spots and pricing for various lengths of station-break announcements. TVaR claims the network plan gives "additional practical opportunities."

TVaR notes "four standard formulas" for filling 40-second station breaks: one 40-second announcement, two 20-second announcements, a 30- and a 10-second announcement and a 20- and a 10-second announcement, plus a 10-second information service filler (news, weather, etc.). The rep firm adds that a fifth possibility has been suggested—a 40-second "sponsored program" of capsule news or weather reports, with the advertiser getting opening and closing billboards and a 20-second commercial.

Up until now, TVaR explains, national spot tv advertisers who required more than a 10-second ID to tell their story were limited, for the most part, to either 20-second station breaks or 60-second participations in network spot carriers. Regional spot tv advertisers requiring more than 10 seconds have generally had only one choice—20-second breaks.

Why 30-10 Formula Works - TVaR reports that 30-second station-break spots have been available, but on a "realistic basis" the demand for 30's and 10's have relegated 30's to the "least attractive times."

What TVaR recommends is greater emphasis on the 30-10 station break, a formula which it claims is the most flexible and efficient way to fill the 40-second break. Five reasons are given: "The thirties can sell products and services, give advertisers more sales impact,
These NBC-TV, WTOP-TV, 12-piece CBS-TV, Selling three Gunsmoke 21.9 Parsons 27 commercial. What's Concentration the 16 CBS-TV 22 18.0 used thing." dash work no month. "Many advertisers have consistently used 30's back-to-back in network carriers" (Armour's Dial soap and Dash dog food, for example). TVAR concludes that "certainly a dominant 30 next to a 10 can be used even more effectively."

TVAR, which represents the five Westinghouse broadcasting tv stations, in addition to WTOP-TV Washington, WBTV (TV) Charlotte and WJXT (TV) Jacksonville, Fla., does not include specific prices in its booklet.

Nifty back to school in 50 more tv markets

NOTEBOOK ADVERTISER SEEKING NEW YOUTH AGE GROUP

A blossoming advertiser in spot television—St. Regis Paper Co. (Nifty notebooks), New York—is coming in strong this week on a nationwide basis with the opening of schools across the country.

St. Regis, through its agency, Cunningham & Walsh, New York, will be on more than 200 tv stations in some 150 markets throughout the country. The campaigns have been timed to begin individually with the start of school in each locality.

To time the advertiser's starting dates, the agency's media department and station representatives worked together in gathering information on the exact school opening dates.

Last year, the product was introduced nationally—after appropriate testing in selected markets—in more than 100 markets. Thus the spot business has been increased substantially. Another change is the advertiser's attempt to reach for the 12-17 age group. The previous drive had been key on potential users in the elementary grades. Buying has been in the 4:30-7 p.m. time period, including placement in the early children's shows and in action strips which appeal to teen-agers.

The Nifty commercials (for school binders, fillers and a new binder product) are one minute in length. To heighten the appeal of the commercials for the youngsters the advertiser hopes to reach, the agency produced messages which are light and entertaining, using dancers, choral group and a cheer-leading theme (see picture).

Employed in the commercials: the June Taylor dancers; Biever & Stein, New York, for background music; a choral group of six; and a 12-piece band. Farkas Films Inc., New York, produced the films.

The June Taylor dancers spell out the "Nifty" name for young viewers in this scene from the filmed spot commercial. The cheer-leading theme is used to heighten appeal to the teenage audience.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television shows for each day of the week Aug. 24-30 as rated by the multi-city Arbitron instant ratings of the American Research Bureau. These ratings are taken in Baltimore, Chicago, Cleveland, Detroit, New York, Philadelphia and Washington.

Subcommittees to plan RTES seminar sessions

Planning for the 1961-62 season of Radio & Television Executives Society's Timebuying & Selling Seminar was started last week with the appointment of three subcommittees by Erwin Ephron, A. C. Nielsen Co., seminar chairman. A change from luncheon to a late afternoon "classroom" format is being considered for this year's series of training sessions (Closed Circuit, Aug. 28).

Chairmen named for the subcommittees are: Cris Rashbaum, Harrington, Righter & Parsons (programming); Roger Bumstead, MacManus, John & Adams (registration), and Harold Meden, Franznck-Menden Inc. (press and promotion). Other committee members:

Program: Mr. Bumstead; Robert Liddel, Compton Adv.; Al Petcavage, Doyle Dane Bernbach; Maurie Webster, CBS Radio Spot Sales; Sam Vitt, Doherty, Clifford, Steers & Shenfield.

Registration: Stanley Belchick, Belchick Productions; Lee Gaynor, Friendly Group; Jack Gross, American Research Bureau; Irwin Spiegel, TVAR; Thomas White, Avery-Knodel.

Press and Promotion Committee: Messrs. Bumstead and Rashbaum; Dale Clark, National Audience Board; Eph Lewis, Media/Scope; Mr. Rashbaum.

Philly agencies merge; Mallis named president

The consolidation of Adams & Cooper, Philadelphia, with George L. Mallis Inc., advertising and marketing agency, that city, was announced last week by George L. Mallis, president of the combined firms. The new firm will continue to operate as George L. Mallis Inc. Robert E. Adams, formerly president of Adams & Cooper, becomes a vice president in the new operation.

BROADCASTING, September 4, 1961
*B. C. Remedy knows spot television “did the trick” for sales headaches — Why? Because, spot is the most flexible medium for building greater and greater sales. B. C. like all other spot users can call their shots — Whatever market, whatever time of day or night, whatever station they choose. Whenever additional effort is needed spot is there fast, matching advertising effort with sales potential but with no waste circulation.

Your HR man can tell you many more reasons why and how spot television can “do the trick” for your sales headaches. Call your HR man, you’ll be glad you did.

LIQUOR AD BATTLE? WHAT BATTLE?
Publicker 'amazed' at 'silence' on radio-tv campaign

The battle over the return of hard liquor advertising to radio and television has failed to affect, or even reach, the advertiser whose activities touched off the controversy.

John J. Schwed, advertising manager of Publicker Industries Inc., a Philadelphia distiller, said last week his company has heard "from nobody" since it began placing two separate test campaigns on broadcast media for its Old Hickory bourbon and Philadelphia White Label whiskey (BROADCASTING, Aug. 21). Mr. Schwed said he was "amazed at the silence" that greeted the move.

A spokesman for Ellington & Co., New York, agency for Old Hickory bourbon, said there have been "no defections from the ranks" since news of the advertising campaign broke. The campaign started Aug. 5 with between 50 to 60 stations, including two tv stations, carrying the 20-second, 30-second and one-minute spots.

The agency executive indicated that the campaign is "proceeding as planned" and that Ellington & Co. is "not concerned with the furor in Washington." The agency is hopeful, he said, of adding more stations to its line-up. Some stations, he said, were hesitant to accept the spots at this time because their FCC licenses are up for renewal.

From another source it was learned Ellington has been successful in adding at least one new station to its original list. WNTA New York began broadcasting the spots on Aug. 28. The station is not an NAB code member or subscriber.

A representative for Al Paul Lefton, Philadelphia, agency for Continental Distilling Co., a Publicker subsidiary and producer of Philadelphia White Label whiskey, said that five to seven stations stopped spots for the brand when the story broke last month. But, four additional stations have subsequently been found to fill the breach, he said. The stations that cancelled the spots, it was indicated, did so on the advice of legal counsel. It's estimated that the spots for the whiskey brand, all 30-second ones, have been running in more than 20 radio markets since Aug. 5.

When news of the two test campaigns reached Capitol Hill last month the denunciations were loud and clear. Sen. Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee, and Sen. John O. Pastore (D-R.I.), chairman of the Communications Subcommittee, warned broadcasters to desist from accepting the hard liquor advertising or face "appropriate legislation." (BROADCASTING, Aug. 28). NAB officials replied that to their knowledge no NAB members or code subscribers were carrying the liquor commercials. Meanwhile, Publicker—which says...
ON APRIL 5, 1961, in a steel and glass skyscraper overlooking a major U.S. metropolitan city, a meeting was held to discuss the purchase of a new five kilowatt AM transmitter. The main points in consideration were economical operation, quality sound and industry acceptance. Each five kilowatt transmitter on the market was thoroughly evaluated, with only the Gates BC-5P-2 meeting all the stringent requirements. These progressive broadcasters found that the modern Triode power tubes in the Gates transmitter reduced operating costs, and that overall average power consumption was as low as could be found. Their analysis also revealed that the BC-5P-2's combination of very low distortion and wide response produced the truest quality sound. Finally, no other five kilowatt AM transmitter could equal the acceptance of the BC-5P-2. This is the world's number one best seller in the five kilowatt field. The decision was made. A new Gates BC-5P-2 transmitter is now in operation at this top rated station giving day-in and day-out trouble-free performance. Let us tell you more about the Leadership Five. Write today for Brochure No. 94 – yours for the asking.
ON TELEVISION these pictures told the story of Berlin as no other pictures did---and they were AP EXCLUSIVES

By Photographer Peter Leibing of Contipress Agency for Bild-Zeitung, Hamburg; and The Associated Press
For television stations subscribing to AP Photofax, these two dramatic pictures — more than any others — told the story of divided Berlin. They moved rapidly — and exclusively — over AP picture circuits while the news still was hot. The impact on viewers was tremendous.

One of these pictures is of an East German soldier leaping Communist barbed wire into the freedom of West Berlin. The other is of an East German couple being turned back by Communist border guards.

On the Berlin crisis — as every day, from anywhere — the best spot news pictures move fastest into TV stations via AP Photofax for instant use while the news still is hot. For the best newscasts, and the quality which sponsors expect, why be satisfied with less than the best?
Tv propels kiddies to the Bosco shelf

One of television's more individualistic advertisers is Corn Products Co.'s Bosco milk amplifier. In 1961, approximately 99% of its nearly $2 million ad budget will go to sponsorship of children's programs in key metropolitan areas, supplemented by a network "umbrella" on CBS-TV's *Dennis The Menace.*

Where possible, the buying formula in each market aims for frequency and impact. As explained last week by a media executive at Bosco's agency, Donahue & Coe: "We buy for vertical impact. We buy into all available top-rated shows in a market to get Bosco announcements in consecutive time periods, starting at 4:30 p.m., for example, straight through to 6:30 or 7 p.m. We also buy programs for horizontal exclusivity: that is, we go into shows at the same time period on two or more stations to achieve 100% unduplicated audience."

Bosco climbed to prominence in the fortified chocolate syrup field through a carefully guided tv plan. In fact, tv has been considered the obvious media choice since the product's introduction nearly a decade ago. But, as one agency executive pointed out: "It's not so much a question of choice as it is the way we employ the medium. Many youngsters in our tv audiences cannot read, and that coupled with the demise of children's programs on radio makes tv the only medium available for reaching our young customers."

The Bosco formula is described as "a concentration of effort in the areas of prime potential, with schedules tailored to deliver maximum reach and frequency and with efficiency. We don't buy by the numbers, but we don't frown on them either. Buying decisions are based on the program's track record, the program host and his reputation, the time period and the rating. A choice is made after preparing and comparing a breakdown of these qualifications for every available children's show in a market."

**Age Group Important** - The Bosco tv audience is primarily the 4-10 age group. For the advertising to be effective there are considerations unique to the age group. Repetition is a key to greater sales. Many of the youngsters are not old enough to read the label on the jar. It's important then that the Bosco jar be prominently displayed during every announcement, usually delivered by the m.c. of the show. Repetition of such phrases as "I love Bosco, you will too" is necessary because the youngsters' attention is easily diverted and their memory short.

"You have to keep telling them, Monday through Friday," the media official emphasizes, "so that by Saturday morning when mothers take their children along to the supermarket the 'skirt-tuggers' will take a jar of Bosco off the shelf and put it in the grocery cart."

A Bosco program buy is "just the beginning" as far as the agency is concerned. Close contact is maintained with every station, show and m.c. as long as the buy is in effect. Confidence is put in the m.c.'s ability to deliver the commercial without benefit of prepared copy, although he or she is usually supplied with product fact sheets and sample scripts.

The followup work also includes tape checks of the m.c.'s commercial handling and unannounced field trips by agency media personnel to the stations. These "inspectors" check on the use of correct props, delivery style, and during each visit they talk with the talent, watch the show to see if it's handled in good taste, and exchange suggestions. There are talks, too, with the station managers about new programs, merchandising and promotional opportunities, such as tying-in with special events in the markets. The field that all of its spots have been carefully edited for good taste and stress the quality of the product rather than the joys of drinking—scheduled a series of public service spots to replace its usual messages over the Labor Day weekend (Sept. 2-4). The holiday weekend commercials asked listeners to drive carefully and reminded them that driving and drinking do not mix. The copy suggested that "moderation" be the guide. The product line was mentioned only as a signature for the commercials.

$2.8 million paid NFL teams by broadcasters

The National Football League last week revised its estimates of the revenue each of its 14 teams receive from radio and television in the wake of Broadcasting's annual football report (Broadcasting, Aug. 28).

From Jim Kencel, NFL director of public relations, come these "official unofficial" estimates: Baltimore, $340,000; Chicago, $200,000; Cleveland, $220,000; Dallas, $125,000; Detroit, $160,000; Green Bay, $120,000; Los Angeles, $250,000; Minnesota, $130,000; New York, $250,000; Philadelphia, $180,000; Pittsburgh, $300,000; San Francisco, $200,000; St. Louis, $150,000; Washington, $250,000. The new total is $2.875 million.

WBAL-AM-FM Baltimore will carry the Colts' games on radio with the fm purchase a specific buy and not a bonus. Earlier it was incorrectly reported that the games would be carried on WFBF. Sponsoring the Baltimore games will be the National Brewing Co., American Oil and the Baltimore Dodge Dealers.

Sponsorship of the Pittsburgh Steelers' games is shared by Duquesne Brewing Co., Marlboro Cigarettes and American Oil.

Still not announced is the radio station that will carry the games of the New York Titans of the American Football League. (See story on legislation affecting pro football page 54.)

**RAB expands offices**

All principal departments of Radio Advertising Bureau, New York, will be consolidated in new headquarters offices in mid-September. The bureau has leased the eighth floor of 655 Madison Ave., giving more floor space than the present quarters at 460 Park Ave. and 120 E. 36th St.

Kevin Sweeney, RAB president, said the move does not end RAB's search for a building of its own, and that an on-the-spot study of possible sites will be made in New York early this fall by RAB's finance committee headed by...
Jim Stewart of WBKB (TV) Chicago's "Jim Stewart Show" is typical of the major market children's shows in which Bosco milk supplement concentrates its advertising.

trips are said to be welcomed by the stations because the personal interest makes them feel they are not just order houses.

Harold Krelstein, of the Plough stations. Meanwhile, at 655 Madison, the bureau will expand its tape, slide and data-gathering facilities.

Heavy buying viewers

CBS-TV Stations Division last week introduced a new study that relates the incidence of product consumption to tv viewing in a given market.

The new report, entitled "Prime Prospects," specifically deals with Los Angeles, where CBS-TV owns KNXT (TV). The study attempts to answer the question of how well the station reaches consumers who do the heavy buying in the market. The bulk of the study is based on a comprehensive American Research Bureau questionnaire which categorizes 41 high-consumption products, classifying the users into "light," "medium" and "heavy."

Los Angeles was selected for the study because it is a seven-station market (New York and Los Angeles, in which CBS-TV has stations, also are the largest markets in the U. S.). The study will be seen this week at agency offices in both these cities and probably in Chicago later.
Carolinians rebel on deintermixture

GROUP OPPOSES THREAT TO WIS-TV CH. 10; UHF OPERATORS MEET

The battle on deintermixture moved in new directions last week.

A group of South Carolinians, batting to save ch. 10 Columbia from being lost to the state, asked the FCC to withdraw the deintermixture proposal which would, if adopted, force WIS-TV in the state capital to move to uhf.

At the same time, uhf broadcasters gathered for the first time since the commission's deintermixture proposals (Broadcasting, July 31) in Springfield, Mass., and agreed to try to rally support for the FCC's ideas as best they can.

Opening Gun • In a unique and potentially explosive document, the citizens and government of South Carolina fired a broadside at the FCC—the opening of what may be a knockdown battle against deintermixing Columbia, the capital of the state.

The FCC proposes to delete ch. 10 from the city and substitute a uhf channel.

Presented to the FCC on Friday was a petition filed by 75 South Carolina national legislators, state officials and representatives of business and community life asking that the commission rescind its proposal to delete ch. 10 (WIS-TV) from Columbia and substitute a uhf channel in its place.

The approach was made on two counts:

Columbia does not meet either of the commission's two criteria for deintermixture—it is neither substantially converted to uhf nor would the city be free of outside uhf signals.

And, the mass petition said, if the FCC doesn't believe this, hold a hearing in Columbia and let the public tell its story.

Thomson wants FCC to hold deintermixture

Rep. Vern Thomson (R-Wis.) has introduced a resolution asking the FCC to delay its deintermixture plans at least until the commission completes its impending uhf study and reports to Congress.

In a statement accompanying the resolution (HR 450) the Congresswoman also blasted the FCC for its "grossly inconsistent if not misleading position" in requesting $2 million for the uhf study it will begin shortly in New York.

Rep. Thomson, a member of the House Commerce Committee, which has jurisdiction over the FCC, recalled that the commission sought the appropriation on the ground the study is essential to a conclusive determination of the role uhf could play in solving the TV allocations problem.

Yet, he added, even though the commission is not scheduled to complete its study until January 1963, it has already proposed deleting uhf channels from eight markets and shifting the affected stations to uhf bands (Broadcasting, July 31).

Rep. Thomson said he introduced the resolution because of a "flood" of mail from constituents protesting the proposed elimination of one of the eight uhf channels, ch. 3 in Madison (WISC-TV).

Loss of the channel would deprive "tens of thousands of people" in south central Wisconsin of their only reliable television service, he said.

Since no major metropolitan area with as many as five or seven uhf channels would lose even one, he added, "this is nothing less than an outright discrimination against the rural and agricultural citizens of Wisconsin."

In moving ahead with its deintermixture plans before the study findings are in, he said, the commission is either taking action without the necessary technical data, or it "has misled this House into an appropriation which it did not need, was not entitled to, and is now wasting."

If adopted, the resolution would merely express the "sense of the House" and carry no legal weight. But it is unlikely the commission would ignore the expressed wishes of the House.
'What's in the wind?'

'New gains ahead for KIOA, Des Moines.'

Why? because they're going with Blair?*

Partly, plus other things.

Like what?

Like record corn-income, Iowa's biggest in years.

So what else?

Iowa factory output is even bigger than corn.

Which means?

Personal income in KIOArea up 5% (over $5600.)

Where does KIOA come in?

Comes in all over Iowa, with 10,000 watts at 940, best frequency in Des Moines, giving 24-hour service custom-gear'd to specific needs of this productive agri-urban market.

* Effective September 13, 1961, another major area-station, KIOA-Des Moines, appoints John Blair and Company as National Representative
UHF operators meeting in Springfield, at the invitation of William L. Putnam, president of Springfield Television Broadcasting Co., formulated plans for supporting the FCC's proposals to deintermix eight markets by deleting the single VHF channel now there. In the picture above UHF operators are (l to r): Robert Stough, WSBATV York, Pa.; Harold Thomas, WATR-TV Waterbury, Conn.; Bernie Berk, WAKR-TV Akron, Ohio; Larry Turet, WXIX-TV Milwaukee; John English, WSEE-TV Erie, Pa.; John Fergie, WRLP (TV) Greenfield, Mass.; William L. Putnam, WWLP (TV) Springfield, Mass.; Ed Stafa, WINR-TV Binghamton, N.Y.; Roger Putnam, chairman of Springfield Television; Bob Bray, WHNB-TV New Britain, Conn., and Don Burton, WLBC-TV Muncie, Ind.

to 68% in 1960 for Lexington County, the petition noted.

Up the CCT • A UHF organization, the Committee for Competitive Television, quiescent for the last few years, showed signs of life last week—and among these were a resurgence of the combativeness that made CCT a fighting pro-UHF organization less than five years ago.

The renewed tremors arose at a special meeting of 11 representatives of nine UHF station groups in Springfield, Mass., on Aug. 28. The meeting had been called by William L. Putnam, president of four UHF stations in Massachusetts (Broadcasting, Aug. 28).

The informal meeting, lasting from lunch through dinner, ended with no written resolutions, but a consensus among those present that support must be drummed up in behalf of the FCC's proposal to deintermix eight markets by deleting the single VHF there and substituting a UHF channel to make them all UHF areas.

Stressed was the need for a "grass roots" approach to support the FCC's proposals. The UHF operators present agreed to increase their individual activities toward this end through approaches to legislators and the public.

Mr. Putnam charged that VHF stations "were using the identical political pressure tactics they used to defeat a similar deintermix proposal several years ago."

"The might of the V's may not be on our side," he said, "but we have the recommendations and backing of the most unbiased and most qualified group of experts in the industry to determine the merits of deintermix, the staff of the FCC."

Another UHF operator, John English, WSEE-TV Erie, Pa., expressed the belief that the approach of the Assn. of Maximum Service Telecasters was "hysterical."

"We've got a very simple story to tell," he said. "The FCC is the expert in this field, and it knows what it is doing."

Liaison Activities • There was some discussion of establishing a more formal organization to battle for deintermix, but the final resolution was an agreement to maintain informal liaison with each other and to engage in individual contacts with the public and congressional and state representatives to tell them the UHF side of the story.

It was agreed that CCT would file comments with the FCC in support of the deintermix proposals.

Plans were also made to hold regional meetings of UHF operators during the next weeks, but no dates or places were set.

Mr. Putnam sent out invitations to all UHF-only operators east of the Mississippi River. One of those present said Mr. Putnam was heartened by the number of broadcasters who took the trouble to come to Springfield. The Putnam stations are WWLP (TV) Springfield, WRLP (TV) Greenfield, WWOR (TV) Worcester, and WBEC-TW Pittsfield, all Massachusetts.

Senate favors cutting presidential campaigns

Senate Aug. 25 approved by voice vote the resolution (S Res. 141) calling for shorter presidential campaigns. Resolution, introduced by Sen. Kenneth Keating (R-N.Y.), puts the Senate on record as favoring holding presidential nominating conventions after Labor Day in election years.

The resolution cites the candidates' ability to reach voters by television and radio and modern transportation as justification for shorter campaigns.

Senate Majority Leader Mike Mansfield (D-Mont.) described the Keating proposal as an excellent one. But some senators said adoption of the resolution is meaningless since it merely expresses "sense of the Senate" and it has no legal effect.

Evangeline asks to withdraw

Evangeline Broadcasting Co., one of three applicants for ch. 3 Lafayette, La., last week asked to withdraw citing FCC grants at Baton Rouge and Port Arthur-Beaumont (Tex.), which it
feels provide coverage and competition in the market.
Morgan Murphy, half-owner of Evangeline, has applied to buy KXLY-AM-FM-TV Spokane, Wash., and is selling his interest in Evangeline to George Thomas, who owns the other half.

The remaining applicants for ch. 3 are KTAG Assoc. and Acadian Television Corp.

**Jacksonville case restudied this week**

A 1956 FCC grant, said to have been influenced by off-the-record contacts, will be re-examined this week by the commission. The agency reopened the record last year on its own motion to explore ex parte charges developed during hearings before the House Legislative Oversight Subcommittee in the Jacksonville, Fla., ch. 12 grant (BROADCASTING, Aug. 8, 1960).

The channel was granted to Florida-Georgia TV Co. (WFGA-TV) by a 4-2 FCC vote reversing the hearing examiner's initial decision. Other applicants were the City of Jacksonville (WJAX) and Jacksonville Broadcasting Co. (WPDQ). In the House hearings testimony was presented to show that former Commissioner Richard A. Mack had sought advice from a party outside the case and was contacted on behalf of two of the applicants, WFGA-TV and WJAX.

The case will be reopened Sept. 6 in Washington before Chief Hearing Examiner James D. Cunningham. Witnesses set for the first week include Francis Conroy, Miles H. Draper and Dillon Kennedy. Mr. Conroy was described in the House hearings as a Jacksonville attorney and "an old friend" of Commissioner Mack whom the commissioner telephoned on two occasions for advice on the case before the final decision. Mr. Draper is a Tampa attorney, who allegedly made representations on behalf of the City of Jacksonville. Mr. Draper also was a friend of Commissioner Mack, according to testimony. Mr. Kennedy is a Jacksonville city commissioner.

**Delinquency hearings**

The Senate Juvenile Delinquency Subcommittee will resume hearings Thursday and Friday on a possible connection between tv crime and violence and the rising youth crime rate. The subcommittee did not announce the names of witnesses, but an aide said they would be drawn from the broadcast industry.

---

**why ATC is the most widely used tape magazine system in broadcasting**

If price was the only factor involved in the manufacture of an Automatic Tape Control system, most of our problems would be solved. But because ATC magazine-loaded tape units must produce high fidelity playback in conjunction with the finest broadcast equipment made, we have refused to make any concessions in materials and components just to meet a price. The ATC is an engineer's delight. High quality, heavy-duty construction is evident throughout. All electrical components are conservatively rated for long life and marked for easy identification. All components and wiring are easily accessible for efficient preventative maintenance. Modular construction eliminates costly downtime. High performance vacuum tube circuitry assures reliable operation to +65° C. ATC delivers a frequency response of ±2 db from 70 to 12,000 cps; ±4 db from 50 to 15,000 cps. Signal-to-noise ratio is 55 db, and wow and flutter is under 0.2% rms. AUTOMATIC TAPE CONTROL, INC., introduced the original Automatic Tape Control system in 1958. Formerly distributed exclusively by Collins Radio Company, the ATC system is now in use in over 600 radio and TV stations. More than 4,000 units have been manufactured, installed and proved under actual "on-the-air" conditions. For complete information and illustrated brochure, write, wire or phone collect today.

BROADCASTING, September 4, 1961

51
WHO MAKES THE BIG AGENCY DECISIONS

SO IMPORTANT TO YOU?

Here's a discovery to ponder. Recently the A. C. Nielsen Company — world's largest marketing research organization — queried executives at the country's 50 biggest television and radio agencies. (Collectively, the Top 50 agencies spend nearly 1½ billion dollars of all broadcast advertising money invested annually. Their individual TV-radio billings range from approximately $125,000,000 to $6,500,000 a year.)

These are pretty important people. Nearly three-quarters of them are media directors, assistant or associate media directors, media supervisors and media buyers. Others are account executives and group supervisors (7%); V.P.'s in charge of TV-radio, or TV-radio directors (4%); top management executives (5%); research or other functions (12%).

One of the things Nielsen wanted to find out is this:

To what degree do these individuals play an influencing part in the selection of (1) MEDIA, (2) MARKETS, and (3) STATIONS?

For how they answered, see the facing page...
Men and women who make important decisions like those are important to YOU, too! Which is why we think you should also know what they told Nielsen about their responsiveness to the four principal business publications in the TV-radio field. Here, briefly, is the box-score:

1) For broadcast media news and information, Broadcasting is read by more of them than any of the others.

2) For reporting of current trade events, Broadcasting is preferred 2-to-1 over the next-best — and 70% over the other three combined.

3) They express the most confidence in Broadcasting—86% more than for the next-best magazine.

4) They consider the most useful publication to be Broadcasting — by a 21% margin over the second-best (143% over the other two combined).

5) For your advertising, they recommend — to best reach them — that you use Broadcasting (which outscores the second-best magazine by 42%, the rest of the field by 185%).

6) Your advertising is likely to have the most impact on them, they say, when it appears in Broadcasting. They rank Broadcasting decisively ahead of the nearest competitor by 57% — and 80% ahead of the two stragglers combined.

Executives whose livelihood depends upon making decisions aren't likely to make them lightly or without sound reasons. It stands to equally sound reason that when YOU make decisions about where to run your own advertising, the advice of your own best prospects is the safest guide you can follow!
JUSTICE THROWS A BLOCK

NAB also opposes bill favoring pro ball package rights, but Rep. Celler’s hopeful of getting it to House floor

Legislation that would enable the National Football League and other sports leagues to sell the tv rights for their games to the networks in a package ran into Justice Dept. opposition last week.

The department’s antitrust chief, Lee Loewingr, said enactment of the bill (HR 8757) “is contrary to the established policy of the American free-enterprise system . . . would carve out a broad exemption to the antitrust laws . . . [and] would place in the hands of a few private persons tremendous power over a popular and lucrative business.”

Indications were, however, that Rep. Emanuel Celler (D-N.Y.), author of the bill, would push for its enactment at this session of Congress. After a hearing by the House Antitrust Subcommittee, which he heads, Rep. Celler said he hopes to get the bill to the House floor as soon as possible.

At the hearing, NAB opposed the bill on grounds similar to those of the Justice Dept. Support came from representatives of professional football and baseball. A spokesman for the National Collegiate Athletic Assn. went along with the proposal, but asked for an amendment to protect college football gates from pro football telecasts.

The bill was introduced as a result of a decision of a Federal District Court in Philadelphia, which voided an NFL-CBS-TV contract. The pact would have paid the league $9.3 million for the 1961 and 1962 seasons. The decision was based on an antitrust decree issued by the same court in 1953.

No overriding Needs • Mr. Loewingr, who presented the Justice Dept.’s views in a letter to Rep. Celler after the hearing, said exemptions from antitrust laws are traditionally limited to situations where “overriding public policy considerations are present.” But no such public need or benefit has been demonstrated to warrant the proposed exemption, he said.

He noted that in 1960 CBS paid $1.5 million for the right to televise 80% of the NFL games while under the voided contract, the network would have paid $4,650,000 for all league games in 1961. “Thus,” he added, “to acquire the remaining 20% of the games and hold exclusive telecasting rights . . . CBS was willing to pay 200% of the price” it paid in 1960. “This, to us, is a striking example of the evils of monopoly.”

The effect of the bill in the future, when eight or 10 television stations may cover one area, must be considered, he said. The bill could prevent most of these stations from televising sports contests, he asserted, for it would permit one network to tie up the games of two or more leagues.

Mr. Loewingr said the NFL members’ contracts in 1960 do not indicate “any deficiency in negotiating talent on the part of the clubs . . . Even a team which lost all its games, the Dallas Cowboys, sold its television rights for $150,000, a large sum of money.”

“Our position,” he said, “is that no legislation is necessary—that present law provides adequate safeguards for considerations of organized sports’ legitimate interests.”

NAB’s position was presented by Vincent T. Wasilewski, executive vice president-elect, who acknowledged that the bill is “a matter of controversy” within the industry. He said ABC, which has a package-tv contract with the American Football League, supports the bill, while NBC opposes it. He said CBS has not taken a public stand.

Antitrust Laws Should Prevail • But NAB’s view, he said, is that telecasting of sports contests should remain subject to governmental supervision through the operation of the antitrust laws. He said enactment of the Celler bill would result in fewer sports telecasts.

If only one network is permitted to broadcast a league’s games, “the possibility of two networks telecasting different games of the same league in the same area” would be eliminated, he said. And to make the package contract effective he added, “the league would have to preclude individual clubs” from making their own tv arrangements.

“We believe that no blank check should be given to professional sports which allow them to arbitrarily black out from the airwaves, through concerted activity, the telecasting and broadcasting of games which have such great public appeal,” he said.

He also discounted the reason given by the NFL for desiring a package tv contract—that this was the only means of providing all league members, weak as well as strong, with adequate tv revenue. He quoted an article in the Aug. 28 Broadcasting, which put the total NFL radio-tv revenue for 1961 at $3.5 million. (See story, page 46.)

An amendment proposed by the subcommittee to tighten up the bill failed to win Mr. Wasilewski’s support for the bill. It would specify that the bill does not permit tv blackouts, except for arrangements not to telecast another game into the home area of a team when it’s playing at home. Mr. Loewingr suggested a similar amendment in the event the bill is approved by the subcommittee. Mr. Wasilewski said the change would improve the bill—but not enough to alter NAB’s opposition to it.

NFL’s Position • In urging passage of the bill, NFL Commissioner Pete Rozelle said that unless the league is permitted to sell its tv rights as a pack-
Personal interviews in a minimum of 2,000,000 different homes each year provide a wealth of data for informed broadcast-buying and product-marketing decisions.

age, only a limited number of NFL teams will be seen on television in 1962, when current contracts will have expired. The networks are interested only in the stronger teams, he said.

This will mean, he added, that the league’s tv revenues will be reduced, and its efforts to maintain a balance among its members will be hindered. He said only four of the 13 teams in the league last year (there are now 14) would have made a profit without television money.

Mr. Rozelle said the NFL is the only sports league “singed out for prohibitions on joint television contracts.” Other leagues, he observed, “including the directly competing American Football League, continue to enjoy the stability of single network television contracts without challenge” by the Justice Dept.

The NFL head argued that members of a professional football league cannot be considered competitors in a business sense, since no club wants to put any of the others out of business. The league feels it’s as important for the Green Bay Packers, representing a community of 63,000, to receive as much tv income as the New York Giants, located in an area of 8,000,000 people, he said.

Mr. Rozelle endorsed a proposed amendment that would require competitive bidding for a league’s tv rights. He explained that CBS got the league contract by negotiation rather than bid because it already had contracts with a majority of the clubs for the 1961 season.

Amendment Requested • Joe Foss, commissioner of the American Football League, generally supported the bill, but asked that language be added to prevent a league from tying up more than one network and thus being able to kill off a competing league. Mr. Rozelle earlier approved this proposal.

One of Mr. Foss’s major concerns in favoring passage of the bill was that its enactment would protect the AFL from the possibility of a Justice Dept. antitrust suit. He said that while the AFL-ABC pact is similar to the NFL-CBS agreement, its provisions are sufficiently different to bring it within the law. But, he said, the league didn’t want to pay $100,000 in legal fees to prove this point in court if the Justice Dept. should decide to bring suit.

William R. Reed, Commissioner of the Big 10 Conference, and chairman of the NCAA’s legislative committee, said college football is not opposed to the bill. But he asked for an amendment that would prohibit professional football telecasts on days other than Sunday, the customary game day for pro football.

Commissioners Rozelle and Foss said professional football had avoided competing with college football for 35 years, and would do nothing to damage the pro teams’ major source of talent. Both, however, declined to endorse the proposed amendment, contending that pro teams might in the future want to play their games on some day other than Sunday.

Baseball Commissioner Ford Frick also appeared in support of the bill, which applies to baseball, hockey and basketball, as well as football.

U. S. drops charges against Richard Mack

The U. S. Justice Dept. last week finally let former FCC Commissioner Richard A. Mack off the hook. Charges that he conspired with Miami lawyer Thurman A. Whiteside to throw the grant of ch. 10 Miami to National Airlines were dropped in Washington District Court on motion of Justice Dept. Attorney Oliver Dibble. Judge Alexander Holtzoff granted the dismissal.

Mr. Dibble said the government’s case was destroyed when Mr. Whiteside was acquitted of the charge in October 1960. The pair had been tried together in 1958 but the jury could not reach a decision. In 1960, Mr. Mack was declared too ill to stand trial.

The charges against Messrs. Mack and Whiteside stemmed from hearings before the House Legislative Oversight Committee in which it was alleged Mr. Mack had received favors from the lawyer in exchange for voting in favor of National Airlines. Mr. Mack resigned from the commission but denied wrongdoing.

Mr. Whiteside committed suicide last May.

Satellite-to-set tv seen by AEC member

Communications satellites beaming television signals directly to home receivers around the world are a possibility within this decade, according to Atomic Energy Commissioner Robert E. Wilson.

He told the Research Subcommittee of the Joint Congressional Atomic Energy Committee last week that the key to this achievement is in the compact, nuclear-powered transmitting systems being developed by the ABC.

Direct satellite-to-receiver transmission would require about 150 kw per channel to cover the entire hemisphere, he said. But a simpler nuclear-powered satellite relay system would require only about 1 kw and could be ready in about two or three years, he said.

Long to Hear FCC • In another space communications development last week, Sen. Russell B. Long (D-La.) announced he will call the FCC to testify before his Small Business Subcommittee on a private-industry group’s proposals for the creation of a privately owned space communications system.

The group, an ad hoc committee of 10 international common carriers, is scheduled to submit its recommendations to the FCC Oct. 13. Sen. Long set Oct. 17 for the hearing by his Anti-monopoly Subcommittee, which has already held hearings on U.S. satellite communications policy.

Sen. Long has said he’s afraid the FCC’s creation of an ad hoc committee will lead to monopoly control of the new communications system.

Conelrad tests slated

The new Conelrad alert system utilizing the press teletype facilities of AP and UPI will be tested each morning at 9:30 a.m. EST during the month of September at all participating stations, FCC Defense Commissioner Robert T. Barnby announced last week.

The teletype alerting system will supplement the former plan of alert by telephone. Any inquiries from broadcast stations should be addressed to the FCC coordinating engineer in the station’s Conelrad area. Beginning Oct. 1, further tests will be conducted twice weekly, on Saturdays at 9:30 a.m. EST and on Sundays at 8:30 a.m. EST.
Etv group appeals FCC tv proposals

Educational tv interests last week appealed to the U. S. Court of Appeals to give them relief from “arbitrary and capricious” decisions of the FCC to add commercial tv channels, instead of educational channels, in Rochester, N. Y., and Johnstown, Pa. (CLOSED CIRCUIT, Aug. 28).

At a Wednesday news conference in Washington, Norman Jorgensen, attorney for Joint Council on Educational Broadcasting, said the court petition might be the opening gun in a campaign to get greater FCC consideration for educational channels. He said this was the first time JCEB has carried its arguments to court.

The FCC Aug. 3 made final rule-making to add ch. 3 to Rochester on a commercial basis and the same day instituted rulemaking to add ch. 3 to Johnstown. In the former case the commission denied the petition of the Rochester Area Educational tv Assn. to reserve ch. 13 for education; in the latter the request of Penn State U. to assign ch. 3 to State College, Pa., for etv.

The educators’ appeals cited an alleged inconsistency between the FCC’s drop-in decisions and the policy the agency expressed in its Sixth Report and Order (1952) in which it said it planned to reserve a vhf channel for etv in communities having three or more vhf channels. JCEB said the commercial grants were not in the public interest because viewers would not be offered a diversity of program fare. The FCC decisions were characterized in the petitions as “unlawful, unfair and discriminatory, an abuse of discretion.”

FAA will lend an ear to FCC on antenna farms

The Federal Aviation Agency will not establish antenna farms if the FCC tells that agency that such a grouping would interfere with the FCC’s statutory responsibility, FAA Administrator Najeeb E. Halaby announced last week. The FAA’s proposal that it set up such antenna farms met with vehement broadcaster disapproval in hearings held before that agency Jan. 10.

The FAA last week made final rules on what constitutes an air hazard and exempted structures less than 20 feet high. The air agency said it considers itself the final authority on the air hazard question but added “our findings should not be construed to prejudice the exercise by the commission of its statutory jurisdiction particularly its authority to determine whether a construction permit for such a structure should be issued.” The FAA warned that this statement should not be interpreted as a conclusion to jurisdictional problems that might arise in the future. It pointed out that any party dissatisfied with a decision by either agency always has recourse of taking the action to the courts.

USIA funds approved without Javits increase

The Senate last week passed an appropriations bill providing $138.9 million for the U. S. Information Agency after rejecting efforts of Sen. Jacob K. Javits (R-N.Y.) to increase the figure by $6,377,289.

The bill, containing $762 million for the State, Justice and Judiciary Departments and related agencies, now goes to a conference for reconciliation with a House-passed bill of $751,300,050.

The House bill contained $134.8 million for the USIA.

One of Sen. Javits’ amendments would have boosted the USIA appropriation by $4.3 million in an effort to strengthen the agency’s overall program. The other would have restored $2 million cut from a fund used to guarantee publishers a return on the books they produce for the agency.

THOSE LOGGING TROUBLES

Operations snarl reported as Georgia stations try dry run of FCC’s proposed record keeping

Judging by first field tests, practical station operation under terms of proposed new FCC logging and program forms will involve headaches for staff and management.

Last week WDEC Americus, Ga., under auspices of the Georgia Assn. of Broadcasters, began a dry-run experiment with logging forms it designed in an effort to meet the proposed commission requirements. WCON Cornelia, Ga., was to start similar tests over the weekend on all-day scheduling. WDEC is a daytimer. WGUA Athens, Ga., is analyzing results of tests it has conducted.

NAB is planning a series of mid-September logging tests.

Jack Williams, GAB executive secretary, said the association-sponsored South East Radio-Tv Seminar, to be held Sept. 15 at the Biltmore Hotel, Atlanta, has attracted wide interest. Two NAB board members have indicated plans to attend. They are Dwight W. Martin, WDSU-TV New Orleans, chairman of the NAB TV Board, and Robert F. Wright, WTKO-TV Meridian, Miss. Julian F. Haas, Crosett, Ariz., will attend as president of Arkansas Broadcasters Assn. At least eight other associations will participate.

Charles Smith, WDEC owner-manager and GAB treasurer, reported to the association after three days that the new FCC logging form (BROADCASTING, Aug. 21) had developed trouble at the station. He said, “Our logging is under way. We began Sunday with nobody logging but the man on duty. It was found impossible for him to keep up and our programming degenerated.

“We have two people on duty throughout the day keeping a log. The man on the board is doing as much as he can. We are inking in blank spaces he leaves as a comparison with what he should have done under the program regulations and what he is able to do.”

Primary Objectives • GAB said its first experiments involved the cost of printing forms designed to meet FCC’s proposed requirements and the cost of additional personnel. Further tests will seek to determine if a small station can sustain the burden over a period of time.

NAB last week was completing work on two series of logging forms designed to test the FCC’s requirements. It was printing two types of forms for field tests. The first form is designed to provide all the information the Commission wants. The second is a simplified revision based on NAB’s concept of what stations should provide. In the second form, provision is made for station certification of policies. This would eliminate some of the details involved in the first form.

Three tv and six radio stations will conduct the NAB field tests. They will use the first form Sept. 11, 12 and 13; the second form Sept. 14, 15 and 16. The three tv stations will represent small, medium and large market stations. The radio selection is representative of network, independent, fulltime and daytime stations. All involve geographical separation.

Last week KSEI Pocatello, Idaho, told the FCC the proposed new forms are burdensome, useless and contain implications of censorship. It predicted the procedure will impose hardships on stations using combo personnel.

KCOP Los Angeles, told the FCC promotion announcements are a public service and should not be classified as spot announcements. Network stations make a better surface appearance, KCOP said, because many of the commercials are an integral part of network programs whereas many independent programs are spot carriers and are shown as such on the forms.

This language in the proposed FCC forms was causing industry concern last week:

“Commercial or noncommercial announcements or commercial continuity broadcast within or between programs (including station breaks) shall be counted as interruptions to programming. Consecutive commercial and/or noncommercial announcements shall be considered a single interruption.”

The paragraph was considered one of the biggest stumbling blocks.

The FCC is almost totally off base in presuming to even analyze programming, claims Luther W. Martin, president of the Show Me Broadcasting Co. (KTTR Rolla, Mo.) in comments to that agency on its proposed revised programming form.

Questioning even the commission’s right to delve deeply into a licensee’s financial affairs, Mr. Martin claimed the FCC’s statutory reason for existence is engineering overseeing to prevent “veritable electronic anarchy.”

Though he questions the FCC’s con-
Movie men appeal ruling in Arkansas pay tv case

Two movie exhibitors took pot shots at pay tv last week while an Arkansas court was weighing an appeal to set aside a damaging state Public Service Commission ruling against the movie men. The Aug. 16 ruling directed the Southwestern Bell Telephone & Telegraph Co. to provide rates and lines for a closed circuit toll system in Little Rock, Ark. to be run by Midwest Video Corp., an affiliate of International Telephone Co.

The movie exhibitors, J. T. Hitt, president of the Independent Theatre Owners of Arkansas Inc., and Robin Wightman, Little Rock manager for Rowley United Theatres, said they don’t believe pay tv can hurt them, but they are against it in principle. Mr. Hitt said pay tv will make viewers pay for what they now see free, and will “dilute the quality of present free tv programs.” He labeled the commission’s decision as “wrong, as far as the interests of the people are concerned,” and expressed the hope that the “courts will see it differently.”

Mr. Wightman said the people of Little Rock don’t want pay tv and that two years ago “thousands” of them signed petitions against it and were joined by “many more thousands throughout the state.” He claimed the Arkansas commission “does not have jurisdiction over pay tv in Little Rock”; that this is a matter for the FCC.

The exhibitors’ organizations, Independent Theatre Owners of Arkansas Inc., a state affiliate of the Theatre Owners of America; and Rowley United Theatres, together with the latter’s subsidiary, United Theatres Corp., appealed the Public Service Commission ruling with a brief submitted in the Circuit Court of Pulaski County, Ark., on Aug. 24.

In their appeal, the exhibitors contended the commission had no jurisdiction or authority in the matter, that pay tv is not in the public interest, and that the commission’s finding and order is not in “sufficient detail” to enable the courts to determine the contested issues or how and why the decision was made.

The date for the court hearing on the appeal has not been set.

AFTRA members ask $1.2 million damages

Damages of $1.2 million are claimed in a suit against Crowell-Collier Broadcasting Corp., licensee of KFWB Los Angeles, filed in Los Angeles Superior Court Aug. 29 by American Federation of Television & Radio Artists on behalf of six striking AFTRA members.

The suit claims the six—Joe Yocam, Cleve Hermann, Gary Owens, Elliot Field, Ted Quillin and Earl McDaniel—suffered defamation of character and invasion of the right of privacy from a printed handbill “produced and distributed” by KFWB at the picket line and other sources.

The suit filed by AFTRA counsel David Zickind seeks $100,000 general damages and $100,000 punitive damages for each AFTRA member.

Charges of unfair labor practices were filed with the National Labor Relations Board against AFTRA last week by three more KFWB advertisers. Charges of Secondary boycott practices were made by May Co. department store, Midway Motors Inc. and Downtown Ford Sales. Charges were filed previously by Seaboard Finance Co. The advertisers’ suits resulted from AFTRA’s distribution of handbills criti-
Gen. Sarnoff reminisces about his sentimental journeys

The Vice President and U.S. senators don't often turn out en masse to honor a private citizen. But Vice President Lyndon Johnson and 32 senators did last week, for RCA Board Chairman David Sarnoff. The occasion was his 55th anniversary in communications and electronics.

Gen. Sarnoff received a scroll, signed by all those attending a luncheon Wednesday in Washington, commemorating his "dedicated service and outstanding contributions to the advancement of communications."

The RCA executive, who came to the U.S. from Russia at the age of nine as a third-class ship's passenger, acknowledged the tribute in a voice slightly husky. "There are times," he said, "when the tongue is a little dry and the mind a little overwhelmed." In the language of his trade, he said, "It makes for poor transmission." He said he was "deeply moved and profoundly grateful."

The luncheon was sponsored by five senators. In the picture they are (l to r) George D. Aiken (R-Vt.), Warren Magnuson (D-Wash.), Jacob K. Javits (R-N.Y.), John O. Pastore (D-R.I.), and Kenneth B. Keating (R-N.Y.), shown with Gen. Sarnoff and Vice President Johnson.

During the day, Sens. Aiken, Javits, and Magnuson, Thomas H. Kuchel (R-Calif.), who also attended the luncheon, praised Gen. Sarnoff in speeches on the Senate floor.

Four Trips • Gen. Sarnoff told the senators his trip from New York to Washington last week would take its place in his memory alongside three earlier journeys that to him "symbolize the meaning, the spirit and the opportunities of America."

The first was his journey to America from Russia 61 years ago when he was unable to speak or understand a word of English.

The second was another Atlantic crossing in 1909, when he was 18. By that time he had become a Marconi wireless operator and sailed aboard ocean-going ships as an officer. "I had a first-class cabin to myself, and wore a uniform with gold braid ... and mingled with the first-class passengers," he said.

The third trip was in 1929, when he sailed to Paris as an assistant to Owen D. Young, chairman of the U. S. Reparations Commission, assigned to settle remaining World War I debts and problems.

He said he remembered, while traveling with Mr. Young and other members of the commission, of his own humble arrival in the U. S. from Russia.

"But there are more opportunities for young people today than when I arrived," he said. "No boy need weep with Alexander because there are no more worlds to conquer."

cizing them for using KFWB facilities. Claude McCue, APTRA executive secretary, said some disc jockeys named in the suit are not involved in the negotiations over wages for KFWB musicians, but joined the picket line to help their fellow staff members.

WATE gets NLRB cease order

WATE Knoxville, Tenn., was ordered by the National Labor Relations Board Sept. 2 to cease upon request its alleged refusal to execute a written agreement reached with Local 760, International Brotherhood of Electrical Workers. If no such request is made by IBEW, WATE is directed to cease what was construed as refusal to bargain with the union and is ordered not to interfere with any employee or the union in collective bargaining. NLRB's decision upheld an examiner's recommendation.

Fm stereo pioneers find the going rough

SETMAKERS WON'T BUY TIME, TWO OUTLETS COMPLAIN

Fm stereo is facing storm warnings. Last week two stations which embraced the new multiplex medium in the summer indicated they are running into trouble.

- WUPY (FM) Boston indicated it is ready to give up the stereo ghost.
- WKF (FM) Chicago is preparing to cut down the amount of time it devotes to stereo.

Harvey Sheldon, president of WUPY, said he plans to cease stereo because fm set makers who have pledged undying loyalty to the stereo medium are buying newspaper space instead.

Frank S. Kovas, WKF, said he too is having trouble with stereo because timebuyers aren't buying stereo time.

Mr. Sheldon said WUPY spent $10,000 tooling up and broadcasting stereo, using RCA equipment. The station has broadcast stereo 24 hours daily for over a month, he added.

Mr. Kovas said WKF had only one stereo manufacturer, Crosby Teletronics, sponsoring stereo time. He added that Bell Sound, Columbus, Ohio, indicated it plans to buy time.

"We've had a lot of promises but very little money," Mr. Kovas said. The station plans to curtail its four-hour daily stereo service during September unless sponsors appear.

Next year, he said, the station plans to license manufacture of a new and revolutionary stereo system which he described as compatible with all existing fm receivers. WKF built its own stereo transmitting gear, obtaining FCC type approval.
Cowles makes stock available to public

Cowles Magazines & Broadcasting Inc. filed with the Securities & Exchange Commission last week to offer 350,000 shares of common stock for public sale on an all-or-none basis. Proceeds from the issue will be used in part to expand Cowles’ broadcasting and publishing holdings, the statement said.

The company, which publishes Look magazine, owns KRNT-TM-TV Des Moines, Iowa. It also puts out a weekly newsletter, The Insider’s Newsletter, and owns 93.2% of the Puerto Rico company publishing the English-language San Juan Star.

Board Chairman and President Gardner Cowles owns 30.9% of the 2,300-326 shares of common stock outstanding and The Des Moines Register & Tribune Co. owns 17.3%.

Other publishing and radio-tv interests held by the Cowles family are not owned by CMKB and are not included in the stock statement.

Fetzer gives tower to National Music Camp

A 450-foot radio-tv tower has been donated to the National Music Camp, Interlochen, Mich., by Fetzer Television Inc., operator of WWTV (TV) Cadillac, Mich.

According to Dr. Joseph Maddy, president and founder of the camp, the tower would be erected to support the transmitting antenna of a new stereo fm educational radio station which will broadcast year-round. The camp operates only in the summer.

Fetzer Television is a subsidiary of Fetzer Broadcasting Co. (WKZO-AM-TV Kalamazoo; WJEF-AM-FM Grand Rapids; WWTV [TV] Cadillac, all Michigan, and KOLN-TV Lincoln, Neb.).

Tv code review unit interprets changes

Two technical interpretations covering the NAB Television Code language dealing with billboard announcements in prime time have been issued by the Tv Code Review Board.

E. K. Hartenbower of KCMO-TV Kansas City, code board chairman, said the interpretations were made because of inquiries about the board’s June 14 reclassification of billboards as commercials for computing allowable time for commercial material, a reversal of past policy.

The new classification is effective Oct. 29. Under “Time Standards for Advertising Copy,” the board made this clarifying statement “In prime time billboards as so defined shall be in-

Cake eaters at the Mutual-WINS ‘wedding’

Mutual and WINS New York celebrated the start of the station’s affiliation with the network last Monday (Aug. 28) with a party. The center of attraction was a five-tiered cake served to guests, including several hundred agency account executives and media buyers. Lining up for a serving of the “wedding” cake are (l to r) Raymond Herzog, vice president of Minnesota Mining & Mfg. Co., MBS parent organization; Ted Steele, WINS general manager; Robert F. Hurleigh, Mutual president; Victor C. Diehm, owner of the Diehm radio stations and chairman of the Mutual Affiliates Advisory Committee and J. Elroy McCaw, president of Gotham Broadcasting Corp., owner of WINS.

NO ONE ELSE CAN MAKE THAT STATEMENT!

Before you buy television in the Pacific Northwest, consider this one basic fact: Only KTNT-TV in this area includes five major cities of Western Washington within its “A” contour, and KTNT-TV’s tower is ideally located to beam a clear signal to all of this major market.

Ask your WEED TELEVISION man about dozens of other reasons you should include KTNT-TV in your advertising plans.

BROADCASTING, September 4, 1961
Letting the public know, too

The Connecticut Assn. of Broadcasters announced last week it had decided to “editorialize”—that is, make public the positions it takes—on major issues involving radio-tv. Putting the decision into effect immediately, CAB President Sydney E. Byrnes of WADS Ansonia announced some of the organization’s recent stands.

These included (1) a letter to NAB President LeRoy Collins expressing “concern” over FCC’s proposed changes in application forms and logging requirements, and requesting that CAB be represented at forthcoming sessions between FCC and industry representatives; (2) another letter to Gov. Collins expressing “surprise” at learning through business publications that NAB was abandoning the Voice of Democracy contests, and reporting that Connecticut broadcasters intend to proceed with a new state-wide contest along similar lines; (3) a letter to Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, supporting Gov. Collins’ position on Rep. Harris’ bill to reorganize the FCC (HR-7333); and (4) endorsement of a similar and yet somewhat different Senate bill (S-2034) to reorganize FCC. The Senate bill has been passed by both Houses of Congress and has been sent to the White House for President Kennedy’s signature, which would make it law.

cluded in the four minutes allocated to non-program material within a program.” The language of paragraph 8, defining billboards, was construed to mean “all segments of the broadcast day.”

The board also clarified language covering programs of less than a half-hour as follows: “In prime time, as defined in the above-described amendments, programs of less than one half-hour shall be considered to be a part of the half-hour period and may share the four-minute non-program material allocation. Thus, two quarter-hour programs would have two minutes each of non-program material. One station break between programs as described in the amendment shall be permissible within the half-hour period.”

Media notes...

New agency • WHLO Akron-Canton, Ohio, has appointed Taylor-Jessop, Akron, as its advertising agency.

NBC wins laurels • The National Urban League will honor NBC Radio with a citation for its Image Minorities series today (Sept. 4) at the league’s conference in Dayton, Ohio. Albert L. Capstaff, vice president, radio network programs, under whose supervision the series was developed, will accept the citation. The four-week series dealing with the history, problems and ambitions of minority groups in America, was broadcast on NBC Radio during the summer of 1959.

New location • Jack Masla & Co. Inc., N. Y., station rep, has moved to 575 Madison Ave. New phone number is Plaza 2-6450.

MBS affiliates • Four radio stations are scheduled to join MBS today (Sept. 4). They are WAUX Waukesha, Wis., WFMF Flint, WKHM Jackson and WJAN Ishpeming, all in Michigan. WKMF is owned by Knorr Broadcasting Corp. and WKHM by a Knorr subsidiary, Jackson Broadcasting & TV Corp. WAUX is co-owned by Mig Figi and Charles E. Williams. WJAN

is owned and operated by Tri-City Broadcaster Inc.

Goodwill contribution • Travelers Broadcasting Service Corp., WTIC-AM-FM-TV Hartford, Conn., has made a $30,000 gift to the Connecticut Educational Television Corp. In informing the etv organization of the contribution, WTIC also offered to discuss the possible location of transmitter facilities for Hartford’s new educational station on property owned by WTIC.

Bowling lanes • WTVN (TV) Columbus, Ohio, has started construction of a two-lane bowling facility complete with studio audience seating. The project is expected to be completed this month. The station will begin telecasting local bowling events this fall.

Award • Cecil Harrell, prominent New Mexico farm reporter, and KOB Albuquerque, N. M., were presented with service citations by the New Mexico Cattle Growers Assn. and the New Mexico Wool Growers Inc. for "service to the livestock industry by someone not directly in the industry." Mr. Harrell conducts a daily farm program on KOB.
SAN JUAN BUY
Columbia Pictures
expanding tv holdings

Columbia Pictures Corp. is ready to
take its second step into tv station
ownership it has become known last
week when it was reported that its subsidiary,
Screens Gems Inc., New York, had
just about completed negotiations to
purchase WAPA-TV San Juan, P. R.,
for $1.8 million.

Formal announcement of the trans-
action was expected soon, after lawyers
approved the contract terms.
The purchase includes a one-third
ownership in WOLE-TV Aguadilla,
P. R.

Columbia's station ownership ex-
pansion is said to be connected with the
Screen Gems' plans to broaden its
production facilities in foreign coun-
tries. The tv program syndicate firm
recently completed arrangements to
produce programs in Canada and is ex-
pected to utilize WAPA-TV studios to
create programs for the Latin American
market.

The negotiations handled by R. C.
Crisler & Co., have been conducted
with the Winston-Salem Broadcasting
Co. and the Goar Mestre family. Win-
ston-Salem owns 80% and the Mestre's
20% of WAPA-TV. Winston-Salem is
the licensee of WTOB and now dark
WTOB-TV in that North Carolina city
and also is an applicant for ch. 8 there
(Owns WSN and holds a permit for ch.
42 in Birmingham, and KHTH
Houston. It also owns 33/4% of
WOLE-TV. This interest is included in
the Screen Gems transaction.

Columbia Pictures owns KCPX-AM-
tv Salt Lake City, Utah, which it
bought from Time-Life in 1959 for $3.1
million.

Norman Louvau, vice president and
general manager of the Salt Lake sta-
tions, is slated to become general man-
ager of the Puerto Rico tv outlets once
the formal takeover is accomplished,
following FCC approval.

WAPA-TV began operating in 1954
on ch. 4. Winston-Salem interests
bought their 80% interest in 1957 for
$360,000. WOLE-TV on ch. 12 went
on the air last year.

Changing hands
ANNOUNCED • The following station
sales were reported last week subject to
FCC approval:
• WAPA-TV San Juan, P. R.: Nego-
tiations near completion for sale by
Winston-Salem Broadcasting Co. and
Goar Mestre family to Columbia Pic-
tures' subsidiary Screen Gems Inc., New
York tv program syndication firm, for
$1.8 million. Transaction includes one-
third interest in WOLE-TV Aguadilla.
See separate story, this page.

• KWBA Baytown, Tex.: Sold by De-
Witt Landis, C. O. Kendrick and David
Welley to John H. Hicks Jr. and Ed-
ward L. Francis for $200,000. Messrs.
Hicks and Francis own KOLE Port
Arthur and WTAW Bryan-College Sta-
tion, both Texas. Upon FCC approval,
George Breeding, formerly with KOLE
Port Arthur, will become vice president
and general manager of KWBA. The
Baytown station is on 1360 kc with
1 kw fulltime.

WFTL study classifies
audience by occupations

A technique to determine radio audi-
ence composition, developed by Walt
Dunn, president of WFTL Fort Lauder-
dale, Fla., employs write-in contests
coupled with real estate and city direc-
tory information.
The contest respondents supply their
names and addresses. The contest pro-
motion is designed to reach a typical
cross-section of the audience. The
homes of respondents are checked
against the records of the local board of
realtors, for classification into four
brackets of home values. From the city
directory and real estate information,
WFTL classifies the audience by occu-
pations. For example, the 24-hour audi-
ence composition was found to be execu-
tive-proprietor 26%, white collar 51%
blue collar 16% and service 7%.

"An advantage of this method is the
completely random sampling of listeners
through the coverage area," Mr. Dunn
said. "The occupational study made with
the city directory was under the pre-
sumption the Fort Lauderdale residents
responding to the contest would be typi-
cal of the metropolitan area. With varia-
tions the method can be used by any
station to determine who its listeners are
and what they prefer in programming."

Radio holds lead
Radio's daily audience has ex-
ceeded tv's for the seventh
straight week, according to Sind-
linger and Co. surveys as reported
last week by the Radio Advertising
Bureau. Sindlinger research
shows that for the week ended
Aug. 11, radio out-pulled tv by
more than six million people, 93,-
585,000 to 87,380,000. Radio's
most popular time during the
seven-week period, from June 30
through August 11, was the week
of July 7 when it won an audi-
ence of more than 96 million,
compared to tv's 86.4 million
viewers, RAB reported.

64 (THE MEDIA)
KTTV (TV) covers anti-communist rally

KTTV (TV) Los Angeles pre-empted its prime time programming four nights last week to present complete coverage of the evening sessions of the Southern California School of Anti-Communism from the Los Angeles Memorial Sports Arena. More than 11 hours of key night programming gave way to the Monday-through-Thursday telecasts.

The series was sponsored by the Richfield Oil Corp. as a public service (through Hixson & Jorgensen). No "sell" commercials were presented.

KTTV reported its switchboard was swamped with calls through the week. Of the 600 daily calls, only 13 to 15 objected to the telecasts, most disapproving the cancellation of favorite shows, KTTV said, although a few accused the telecasts of being "fascist" inspired.

The series received thorough press coverage and Mayor Samuel Yorty congratulated the station. The Los Angeles city council commended KTTV and Richfield.

Sponsored by a committee of 3,000 leading Southern California citizens, the week-long anti-communism school was the largest single demonstration of anti-communism ever held in the area, KTTV reported.

KTTV also made last-minute arrangements for the appearance of Rep. Walter Judd (R-Minn.) by large-screen closed circuit television. Rep. Judd, scheduled as the featured speaker Thursday night, was detained in the capital. KTTV arranged with WMAL-TV Washington to originate a special pickup of Rep. Judd which was fed over ABC-TV lines to the Los Angeles arena.

New rep firm in Boston

New England Spot Sales and George C. Bingham, formerly of the Boston office of Walker-Kawalt Co., last week announced the formation of a new station representative firm, retaining the name New England Spot Sales.

In the new operation, Mr. Bingham becomes president and Charles Bell Jr., with the previous firm is appointed vice president. The new firm will continue to service the properties previously represented by the individual firms.

The rep will make its headquarters at 100 Boylston St., Boston. Telephones: Hubbard 2-4370 and Hancock 6-2920.

WTVI (TV) to start Sept. 10

WTVI (TV) (ch. 19) Fort Pierce, Fla., is scheduled to begin operating Sunday (Sept. 10). It is owned by Atlantic Broadcasting, September 4, 1951.
PROGRAMMING

‘International Hour’ was success—Jones

CBS-OWNED OUTLETS CONTINUE SERIES NEXT YEAR

An experiment in programming tv shows produced overseas as a showcase series in this country apparently has proved itself to the five tv stations owned by CBS.

This past summer—starting in New York on WCBS-TV June 14, and on other dates in other cities—the *International Hour* (running for a period of 12 weeks) highlighted specially selected foreign programs for daytime viewing.

Mrle S. Jones, president of the CBS Television Stations Division, last week said the program series appears to be successful and will continue next summer.

At one time, all five of the CBS-TV stations—WCBS-TV, KNXT (TV) Los Angeles, WCAU-TV Philadelphia, WBMM-TV Chicago and KMOX-TV St. Louis—telecast one of the programs in prime time, pre-emptying the network’s *GunSlinger* at 9-10 p.m. The episode was the taped “Sir Thomas Beecham Presents Lollipops,” initially set by most of the stations for a Sunday daytime hour.

The shift to prime time was made to assure the program a “wider viewing audience.”

Shows Continue - Mr. Jones (who appeared on tv at both the beginning and end of the series) revealed that CBS stations have discussed carrying an *International Hour* festival block of 4-5 hours in a single day or at night (perhaps overlapping from the afternoon into early non-prime-time evening periods). The festival would feature new programs on the stations before the start of the fall season.

In the meantime, the CBS stations division is looking ahead to the time when an hour may be set aside weekly on a year-round basis for foreign tv programming. For this, however, the stations would need to set up a system on a really international basis: programs released from foreign countries would be shown on the stations, and the division would act as a clearing house, bicycling the shows to the various countries participating.

As it is established now, the *Hour* is part of an exchange program. Each of the contributing countries in return for its participation was provided with *The American Musical Theatre* produced at WCBS-TV in New York.

Among the contributions this year: three programs from the Canadian Broadcasting Corp.: “Pineapple Poll,” a ballet performed by the National Ballet of Canada, the Beecham program, and “Music in the Walls,” an original tv drama; a one-hour original tv drama, “Outpost,” from the Australian Broadcasting Commission; a one-hour presentation featuring the NHK Symphony Orchestra from NHK (Japanese government broadcasting firm); a murder mystery and another play from AssociatedRediffusion (England), and various programs from Sweden, Denmark and Mexico.

Overseas Soundings - The idea of the new one-hour show originated from talks between Mr. Jones and overseas broadcast executives during the former’s trip abroad last November. (At that time, he asked Australians whether they would be interested in receiving a program series such as *Musical Theatre*, and received an enthusiastic “yes”).

As for *International Hour*, Mr. Jones notes that both the Dept. of State and the U. S. Information Agency feel the series promotes international understanding and good will.

And while the series certainly is not among the top-ranking shows on the stations, it is arousing sharp interest ad building certain audience segments, Mr. Jones said. As for the eventual outcome of the international exchange programming, Mr. Jones looks hopefully toward the time when the programs can be sponsored—thus assuring them stability on the airwaves in this country.

Storer unit acquires ‘Men of Destiny’ series

Storer Programs Inc., Storer Broadcasting Co.’s newly formed program distributing and producing subsidiary, has acquired sole ownership and distribution rights to Men of Destiny, a tv series held by Pathe News, producer of the series, and Windsor Productions of New York. The series has never been shown on television.

The series on the lives and times of outstanding personalities who helped shape political, cultural, social, military and scientific patterns of the world today will be made available to stations on an exclusive city-by-city basis and may be purchased as a library item as well as a program-by-program series.

*Men of Destiny* features Bob Considine as program host. Among the 130 famous people whose careers are described are former President Eisenhower, Nikita Khrushchev, Adolph Hitler, Babe Ruth, Charles Lindbergh, Charles De Gaulle, Theodore Roosevelt, Ty Cobb and Lou Gehrig.

Storer Programs also owns and distributes the tv series titled *Divorce Court*.

NTA announces exchange of $1 million in notes

National Telefilm Assoc. New York, announced last week that the 750 holders of approximately $1.4 million outstanding 6% sinking fund subordinated notes of NTA are now being offered an opportunity to exchange up to $1 million of the old notes for equal amounts of a new issue of 6 1/2% notes.

The exchange of notes will be conducted through Sept. 15 by the corporate trust division of Bankers Trust Co., New York.

Leonard Davis, NTA chairman, said the new notes, unlike the old ones, may be converted to NTA common stock at the rate of $2.50 for each share of stock in exchange for each note. The new notes also are senior to $4,628,747 of notes due Aug. 1, 1975, which were issued by NTA to National Theatres & Television Inc., largest shareholder in NTA. The old notes are subordinate to NTA’s indebtedness to N&T.

United Press International news produces!
NCAA games to run Sept. 16 to Dec. 2

National Collegiate Athletic Assn. football telecasts will begin Saturday, Sept. 16, on ABC-TV. Ending Dec. 2, the 13 telecast dates involve 35 colleges in a total of 23 games. On eight of the dates, one game will be presented nationally and on five Saturdays three games will be aired regionally — an increase of one regional date over last year.

The complete schedule follows:

Sept. 16—Pittsburgh at Miami
Sept. 23—Arkansas vs. Mississippi at Jackson, Miss.
Sept. 30—Oklahoma at Notre Dame
Oct. 7—Iowa at Southern California (If San Francisco Giants are in the World Series, another game will be selected for telecasting)
Oct. 14—Michigan State at Michigan
Oct. 21—Syracuse at Penn State; Tennessee at Alabama; So. California at California
Oct. 28—Ohio State at Wisconsin
Nov. 4—Dartmouth at Yale; Michigan State at Minnesota; Missouri at Colorado.
Nov. 11—Minnesota at Iowa; LSU at North Carolina; Wyoming at New Mexico.
Nov. 18—Oklahoma vs. Army at New York City; Illinois at Wisconsin; North Carolina at Duke.
Nov. 23—Texas at Texas A&M
Nov. 25—Syracuse at Boston College; Ohio State at Michigan; Washington State at Washington.

‘Planet Earth’ series taken by seven stations

The National Academy of Sciences, Washington, announced last week the availability of Planet Earth, a series of 13 films dealing with man’s physical environments from the core of the earth to cosmic space.

Already seven stations—KNXT (TV) Los Angeles, WCAU-TV Philadelphia, WMAL-TV Washington, WHDH-TV Boston, KMOK-TV St. Louis, KPRC-TV Houston, WBEN-TV Buffalo—are showing or have made definite commitments for its showing. Cost for the series varies according to the market. Paul Kramer, National Academy, who is in charge of its distribution, said that a major market station could secure the series for about $4,500. A plan is being worked out for smaller stations to obtain it on a rental basis.

The film is 27 minutes in length and is available either in color or black and white.

More information concerning Planet Earth is available by writing to Paul Kramer, National Academy of Sciences, 2101 Constitution Ave., Washington, D.C. Telephone: Executive 3-8100.

20th-Fox dividend comes from studio sale

Thanks to income from the sale of some studio property, Twentieth Century-Fox Film Corp. stockholders still have something to smile about.

The motion picture and tv film maker reported last week a substantial decline in operating income (due to unprofitable production activities), although its net income was higher than during a like period last year. Fox’s operating income was $12,326 for the first six months of 1961, as compared to $2,628,576 during the first half of 1960. A $25.7 million sale of studio property saved company stockholders from a completely dividendless period. As it was, Fox announced that for the first time it’s switching to a 2% semi-annual stock dividend, payable in March and September, rather than the policy of 40-cent quarterly cash payments on common shares in effect since 1954. The new policy will remain until production income increases, authorities said.

Jayark files to offer $432,500 stock issue

Jayark Films Corp., New York, is seeking public funds to finance the production of two tv series, Hollywood Hist-O-Rama (a series featuring short clips from famous movies) and Laurel & Hardy (cartoon versions of the movie team’s adventures).

The company last week filed at the Securities & Exchange Commission a plan to offer 72,000 shares of common stock, 22,000 shares being sold by the present holders. Jayark estimates the issue will bring in $432,500 to finance the series.

Jayark, which finances but does not produce tv series, is primarily engaged in distributing tv series and motion pictures in the U. S. and abroad. In its SEC filing, Jayark claims that one or more of its series were on television in each of 168 markets during August. In addition to Bozo the Clown and Cartoon Storybook series, Jayark leases 57 movies—50 post-1950 features and 7 pre-1950.

Jayark’s recent growth is reflected in

**War is Hell**

But the buying climate in the growing Greenville-Washington Market is HEAVENLY. WITN and WNCT dominate this market’s 4 huge military installations and their 110,000 service folks. Bear this in mind when you plan your next campaign strategy. Avails and details are yours for the asking.

"ONE OF THE TOP 100 MARKETS"
Well over 1,000,000 Population — Set Count 200,000
its most recent financial statement: net profit for the year ended May 31, 1961, was $175,252 (60 cents per share) against $77,852 (27 cents per share) for the comparable 1960 period. Film rentals for 1961 were $1,175,632 compared with $1,105,212 for 1960 and gross profit was $737,953 in 1961 and $565,539 in 1960.

The company's capitalization is approximately $2 million. There are 290,000 shares of common stock outstanding, of which President Reuben R. Kaufman and his wife own 219,125 shares. The Kaufmans are selling 14,500 of their shares in the current issue.

Mr. Kaufman drew an annual salary of $31,200 in 1961; under his contract this sum increased to $41,600 Sept. 1 and goes to $52,000 Aug. 31, 1965.

CBS-TV sets new Webb series

Jack Webb and Mike Meshekoff, partners in the tv Dragnet series, for which they filmed 175 segments, have signed a co-production deal with CBS-TV for their Mark VII Production Co. to produce a new hour-long anthology series, True, to be based on stories from True magazine.

The pilot will be produced in November at Republic Studios where Mark VII is headquartered. Mr. Webb will be star and director and he will narrate and Mr. Meshekoff will be producer.

**FOUR STAR ENTERS SYNDICATION, LIVE**

Buys 'McCoy,' 'Daddy' rights, signs deal for live tv

Four Star Television, a major producer of tv network first-run film series, is expanding into syndication and live programming. In two moves last week, the Hollywood company purchased the outstanding stock of Marterto Productions Inc., owned by Danny Thomas and his wife, and formed an association with Merrill Heatter and Robert Quigley to create, and produce live tv shows.

The Marterto stock purchase for "well in excess of $1 million," includes the 90 half-hour films of the Danny Thomas show, Make Room for Daddy (ABC-TV and CBS-TV) and less than 50% production interest in future episodes of The Real McCoys (ABC-TV) and in the 146 half-hour films of the comedy series already shown. There is no indication Four Star will have any rights to future episodes of the Danny Thomas program. Neither will the company have any interest in the Danny Thomas-owned Marterto Enterprises which controls The Andy Griffith Show (CBS-TV) and two new fall entries, The Joey Bishop Show (NBC-TV) and The Dick Van Dyke Show (CBS-TV).

Four Star currently is forming its own sales staff to handle the sale or syndication of its stockpile of McCoys and Daddy films. The production company also has a substantial backlog of its former network programs, which could conceivably be put into syndication.

Four Star's move into live tv production ensued from its acquisition of Heatter Quigley Enterprises and Heatter Quigley Productions Inc., New York. Mr. Heatter and Mr. Quigley currently are responsible for two live CBS-TV afternoon game shows, Video Village and Double Exposure. On Sept. 30 a children's version of the former—Video Village Jr.—becomes a Saturday entry on CBS-TV. Messrs. Quigley and Heatter will be based at Four Star's Hollywood offices and will create taped

*Percentage of viewers familiar with a show who consider it "one of my favorites."
and live programs for both daytime and nighttime scheduling.

Four Star President Dick Powell and Executive Vice President Thomas J. McDermott said the moves are part of the production company's diversification plans which will extend into all areas of tv programming. Besides the Danny Thomas program and The Real McCoys, Four Star will have six film series on network tv this coming season. They are: The Dick Powell Show (NBC-TV), Captain of Detectives (NBC-TV), Mrs. G. Goes to College (CBS-TV), The Rifleman (ABC-TV), Rawhide (CBS-TV), and Targets the Corruptors (ABC-TV).

Film sales...

Films of the 50's Vol. II (Seven Arts Associated): Sold to WTJW (TV) Miami; WLOS-TV Asheville, N.C.; and WWL-TV New Orleans. Now in 43 markets.

191 Looney Tune Cartoons (Seven Arts Associated): Sold to KBAK-TV Bakersfield, Calif., and KCPC-TV Salt Lake City, Utah. Now in 11 markets.

Program notes...

Office switch • Film Producers' Assn. of New York has moved its offices to 165 W. 46th St., zone 36. New phone is Circle 5-2545.

All about presidents • Portrait of a President, a series of 15-minute radio interviews with foreign heads of state, is being taped by International Broadcasting System, N.Y., for U.S. syndication. IBS said stations in 25 markets have agreed to carry the package, which is being offered for sponsorship as public relations promotion to companies doing business in the countries represented.

Extend production • The British Broadcasting Co. has announced that it will film another 39 episodes of The Third Man, adventure series syndicated in the U.S. by NTA. Budweiser Beer, sponsor of the show in about 150 markets, will also sponsor the new films.

Radio rights acquired • Al Petker/Personality Scope Co., Beverly Hills, Calif., has acquired world-wide radio rights to Ripley's Believe It or Not from Ripley Enterprises, New York, and will start production within the next couple of weeks with the five-minute, five day per week recorded show. Art Baker will narrate. Believe It or Not will be produced as the fifth in the Petker Celebrity Five series.

Dividend • Trans-Lux Corp., N.Y., has declared a 10 cent per share regular quarterly dividend to be paid Sept. 29 to stockholders of record as of Sept. 15.

Travel films • A series of 26 black and white travel films designed for television has been released by Peak Productions Ltd., Phoenix, Ariz. The series, entitled, Faraway Places, features outstanding scenic films of more than 50 foreign countries. Distribution is being handled by the Danley Distributing Co., that city.

A Look At America • "The Plight of Pepito," an episode portraying the problems of the Cuban exiles in south Florida recently shown on FYI Report on WTJW (TV) Miami, has been selected for showing on WTTG (TV) Washington's A Look At America series. The WTTG series features outstanding public affair programs produced by various U. S. tv stations. (BROADCASTING, May 29).

Firm founded • Actor Jack Lemmon has joined forces with producer-directors Blake Edwards and Richard Quine and talent executive Max Arnow in the formation of Artists & Production Associates to produce motion pictures and television shows. The new firm will headquarter at 650 N. Bronson Ave., Los Angeles. Telephone: Hollywood 6-3111.

Expansion • Don Howard Personnel Inc., New York, has opened a new branch at 274 Madison Ave., with one department dealing exclusively in radio-television executive and personnel placement. The department is under Bill Ashworth, formerly with United Artists Associated and Storer Broadcasting Co. and before that with WDVA Danville and WSLS Roanoke, both Virginia. The branch will include specialists in advertising, publishing, travel and industrial sales placements as well as all areas of radio-television broadcasting, selling, production and distribution. Telephone: Lexington 2-8300.

NORAD visit • ABC News' Issues & Answers will take its cameras into the nerve center of NORAD (North American Air Defense Command) for a special documentary report on Sun., Sept. 10 (ABC-TV, 3-3:30 p.m. EDT; ABC Radio, 8:30-8:55 p.m.).

Password is . . . • Password, a new daytime game program testing guest celebrities and members of the audience on their word skill, makes its debut on CBS-TV Mon., Oct. 2 (Mon.-Fri., 2-2:30 p.m. EDT). Host will be Allen Ludden.
Big color tv rise seen by RCA’s Burns

A prediction that the color television industry will reach $200 million in revenue in 1962 was made by John L. Burns, RCA president, last Wednesday (Aug. 30).

Mr. Burns, who spoke at a dinner given in his honor by RCA dealers in Los Angeles, said this total, which includes set sales, servicing and broadcast revenues, should rise to $4.3 billion by 1970. He added that the anticipated $3.2 billion volume of black-and-white business by 1970 means “a total industry figure amounting to $7.5 billion.”

For many dealers and distributors, he said, color has overtaken and topped the dollar volume for black-and-white. He said color tv in 1960 reached more than $100 million, a level attained in six years.

Speaking on the same program, W. Walter Watts, RCA group executive vice president and president and board chairman of the RCA Sales Corp., told dealers they have three advantages in selling color tv receivers this fall: “a proven, highly reliable receiver; a real, hard-hitting advertising and promotion campaign and a greatly expanded color schedule.”

Don Durgin, NBC vice president for television sales, outlined the television network’s color plans for the 1961-62 season. He said NBC-TV will program more than 40 hours a week in color, starting in September, and that the prime-time color schedule for 1961 represents a 62% increase over last year.

Mr. Durgin announced that special “color nights” will be held on Oct. 4, Nov. 1 and Dec. 6 with 3½ hours of color programs will be telecast on each night, permitting tv dealers to offer in-store and home demonstrations on these dates.

CBS Radio places NetALERT in service

CBS Radio’s two-year development of NetALERT, a new system of signaling between a radio network and its affiliates, was climaxd last week when system, first announced and demonstrated at last year’s convention of CBS Radio Affiliates (Broadcasting, Oct. 3, 1960), went into effect Sept. 1.

It was developed for CBS Radio by CBS Labs and all the network’s 206 affiliated stations in continental U. S. have installed the equipment. NetALERT reportedly makes it possible for stations, on or off the air, to be instantaneously alert to receive news bulletins, on-the-scene news coverage, and national emergency announcements. In addition, the system is said to be capable of alerting key station personnel in their homes when the stations are off the air.

De Forest’s widow seeks royalties on inventions

Efforts to recover royalties on some of the more than 100 patents granted the late Dr. Lee De Forest are being made by Los Angeles attorney Morris Levine on behalf of the inventor’s widow, former actress Marie Mosquini. Dr. De Forest, 86, died at his Hollywood home on June 30 (Broadcasting, July 10). His will showed his income limited to a $1,200 check received monthly from Bell Telephone Laboratories for which he was a consultant.

The attorney said he is looking into the possibility of recovering something on the various inventions, but it will take time to explore just what the contract rights are. The inventor of the three-element vacuum tube which made possible the development of radio and tv broadcasting, Dr. De Forest sold, leased or optioned rights to some of his best inventions at sometimes ridiculous prices, according to Mr. Levine.

EIA’s Sprague urges quota on imports

Electronic imports from Japan have a direct bearing on unemployment in the U. S., Robert C. Sprague, Sprague Electric Co. board chairman, has informed Congress.

In a statement filed last week with a House subcommittee on employment, Mr. Sprague urged some sort of quota system for imports on a sector-by-sector basis. Unemployment attributable to foreign competition has been largely local and restricted to companies, most of them small, which have been “hardest hit by imports from low wage countries,” Mr. Sprague reported. The belief that American technology can be counted to overcome low-wage foreign imports is erroneous today, he added, because Japanese electronic manufacturing is highly modern and automated—with wage scales one-fifth those in the United States.

The Sprague statement was submitted in behalf of Electronic Industries Assn. Mr. Sprague is chairman of EIA’s Imports Committee.

Moon provers to carry tv

Tv cameras will be included in four additional Ranger rockets so pictures of moon-impacts can be transmitted back to earth, the National Aeronautics & Space Administration said last week in reporting that the current unmanned moon-landing project has been increased from five probe vehicles to nine. The tv equipment will be designed for “high resolution” televi-

sion, it was announced, although the extent was not indicated. The negotiations are with RCA's Astro-Electronics Division. The tv-carrying Rangers are expected to crash on the moon and the tv pictures will enable scientists on earth to watch the landing before the rocket and its cameras are smashed by the landing impact. Later Rangers will carry devices to slow down descents to permit "soft" landings. The moon probes are scheduled for late in the 1960s or early in the 1970s.

ITA's uhf translator uses Klystron tubes

ITA Electronics Corp., Lansdowne, Pa., last week announced a new line of uhf television transmitters emphasizing simplicity by use of the Klystron power amplifier.

Single Klystron tubes are used in the 15-kw and 30-kw transmitter while two 30-kw amplifiers are combined to produce a 60-kw transmitter.

According to ITA, deliveries can be expected to start early in 1962; several of the first production units are scheduled for shipment to existing uhf stations. The prices for the new units: $99,500 for 15 kw; $139,000 for 30 kw; $179,000 for 60 kw.

Technical topics...

Four-day event • The National Electronic Parts Distributors Show for 1962 has been expanded to a four-day event and will be held at Chicago's Conrad-Hilton Hotel next May 21-24, it was announced last week by Kenneth C. Prince, manager of Electronic Industry Show Corp. Major format change includes first day devoted exclusively to manufacturer-distributor conferences. Warren Stuart, Belden Mfg. Co., Chicago, has been elected president of the show for next year.

Tv home theatre • Kane-Mark Corp., N.Y., is national sales representative for a tv receiver which projects a 38x54-inch picture on a home movie screen. Called "Telemara," it's made by Saba Electronic Corp. of West Germany and is selling at $1,000. The unit is on rollers and has remote control. It also will be demonstrated at "Electrical City, U.S.A." Electrical appliances consumer exposition at New York's Coliseum, Oct. 21-29.

Static starter • To protect sensitive microphones in television studios and on movie sets from motor start and stop noises, the static starter, a new motor starter, has been developed by the Westinghouse Electric Corp., New York, with no moving parts. The silent feature was accomplished with a Westinghouse-developed, silicon-controlled rectifier as the main power switch.

'Studio One' bulb • Westinghouse Electric Corp., one-time sponsor of CBS-TV's Studio One, has introduced the Studio One camera light, which employs a "sealed beam type" bulb, for use in photography and television studios. The bulb is said to produce approximately the brightness of the bar light, which consists of four standard 300 w flood lamps. Manufacturer's suggested list price for the camera gun is $21.95 with replacement bulbs set at $5.45.

New transmitter • Collins Radio Co., Cedar Rapids, Iowa, has announced that its recently-introduced 1000/500/250 w 20V-3 am transmitter is being installed at KSJM Silkeston, Mo.; KVET Austin, Tex.; WLBC Muncie, Ind., and WMFJ Daytona Beach, Fla.

Diode tester • The Micromodular Components Div. of Ling-Tempco Electronics, Anaheim, Calif., announces the availability of a new diode tester, providing, according to the company, speed, reliability, simplicity, and economy. Test factors include breakdown voltage, noise, stability, reverse leakage, zener impedance and breakdown characteristics. The bench model is 16.75 x 21.5 x 19.5 inches. It is priced at $1,425 and is available 30-60 days after receipt of the order.

Report available • Research report on problems encountered in mounting fm antennas on various supporting structures and their resulting radiation patterns is being offered free on request by Collins Radio Co., Cedar Rapids, Iowa. Paper was prepared by John B. Caraway, president of Electronic Research Inc., Evansville, Ind., and William A. Kennedy, head of Collins antenna department.

INTERNATIONAL

CANADIAN AD CONTENT

CAB brief says many stations would lose money under presently-proposed narrow restrictions

How much advertising content Canadian stations should be allowed was a major problem discussed at the public hearings of the Board of Broadcast Governors at Ottawa which started Aug. 22. The BBG is revising radio regulations and wants stations to be limited to 20% advertising content over the day, with maximum of 30% in any one hour.

Canadian Assn. of Broadcasters said in a brief that such daily regulation would mean losses for many stations, and suggested that the yardstick be one week.

"We suggest that the limit for any one day be set at 25% with the clock hour maximum remaining at 30%. Thus the weekly advertising content would not exceed the ceiling that the BBG now is prepared to authorize. Yet, stations would be better able to accept casual business and meet the heavier demands of certain periods."

CAB explained that Thursdays and Fridays are the heaviest shopping days in most areas, and that advertisers concentrate more of their radio activity in this period. The brief also pointed to the flexibility of radio advertising, and that after advertisers use radio to move perishable merchandise quickly, to boost a slow day during a sales event, to meet unexpected competitive activity, to stimulate buying during special seasons, and for several other reasons. Emphasized was the placing of radio advertising the day and even the hour of the broadcast. Under a daily requirement such as outlined by the BBG, much advertising could not be taken and elaborate bookkeeping would have to be set up to determine quickly if last minute advertising could be carried.

Daytimers • CAB also pointed out that the proposed regulations made no special provisions for daytime stations. During certain seasons these can operate ten hours or less daily. With a number of such daytime stations in small markets, the CAB suggested that no additional restrictions be placed on them insofar as hourly advertising percentage is concerned.

The proposed BBG radio regulations include provisions for quarter-hour, half-hour and one-hour programs. CAB said radio's format has changed drastically with the advent of television and there are only a few sources of such program material available in North America today. To bring back the former days of radio programming was felt to be "nostalgic nonsense." People will not listen to programs of a type they can see on television, the CAB explained. And for Canadian stations
in small communities to be required to produce such programs with live or Canadian talent would be impossible. Such talent is only available in the larger centers. The CAB is working on a program exchange which will make Canadian content programs available between member stations.

Noting that broadcasting gets the most attention as regards advertising abuses which are common to other advertising media, CAB asked those in authority to remember that regulations cannot require an advertiser to sponsor programs if he prefers spot announcements, that audiences can’t be required by law to listen to programs of value, that housewives can’t be regulated into a shopping pattern that would make each day of the week equally attractive to advertisers.

The brief also reported on the work of Canadian stations in promoting Canadian programs and talent over the past year and their help in leading young Canadians into careers in broadcasting.

The BBG also heard from labor organizations and talent groups, the former asking for even stricter regulations on advertising content, and the latter presenting differing opinions as to French and English-language talent development. The French-language talent group felt not enough Canadian talent is being employed, the English-language group appealed for cooperation between stations and talent groups rather than government regulations for the development of Canadian talent.

Canadian Broadcasting Corp.’s President Al Ouimet said CBC generally approves the proposed regulations, but he asked clarification on some technical points and the limitation of temporary networks to 30 days.

<thead>
<tr>
<th>Overseas tv sets</th>
</tr>
</thead>
<tbody>
<tr>
<td>The number of television sets in operation outside the U.S. has exceeded 50 million, John G. McCarthy, president of Television Program Export Assn., announced last week. He noted that this figure is within three million of the 53 million sets currently in use in the U.S.</td>
</tr>
</tbody>
</table>

Among the markets making up the total of 50 million, Mr. McCarthy said, are: United Kingdom, approximately 12 million; Japan, 8 million; West Germany, 4.8 million; Canada, 4 million; Italy, 2.5 million; France, 2 million; Scandinavia, 1.6 million; Brazil, 1.2 million; Australia, 1.2 million, and the U.S.S.R., 8 million.

<table>
<thead>
<tr>
<th>Sponsor restriction up for BBG airing</th>
</tr>
</thead>
<tbody>
<tr>
<td>A requirement that sponsors of imported television programs also use an equal amount of Canadian-produced programs was proposed by Dr. Andrew Stewart, chairman of the Board of Broadcast Governors, at the Ottawa public hearings on Aug. 22. Dr. Stewart said the BBG will meet with national advertisers and advertising agencies on the subject during September.</td>
</tr>
</tbody>
</table>

Dr. Stewart also hinted at possible penalties for Canadian advertisers who use U.S. border television stations when Canadian stations are available. He hinted at this when Lloyd Moffat, president of CKY Winnipeg, being questioned on his application for an fm station license, pointed to plans of KCND-TV Pembina, N. D., to invade the Winnipeg market with its newly increased power. Mr. Moffat said there are already six radio and three television stations in the Winnipeg area to compete for the Winnipeg advertising dollar. Dr. Stewart asked him if he thought Canadian advertisers using U.S. border stations should be penalized through disqualification of their advertising expenditures under income tax law. This was suggested recently by the Royal Commission of Publications in the magazine field. Mr. Moffat said he had not thought about the problem in this way. |

Requiring network advertisers to buy equal shares of imported and Canadian-produced programs has been a policy of the Canadian Broadcasting Corp. since the advent of Canadian television in 1952. The entry of a second Canadian television network, CTV Television Network this fall, and ensuing competition for advertisers, has forced the CBC to accept more imported sponsored programs without an equal number of Canadian-produced sponsored shows. CTV Network has gone after Canadian advertisers on the same basis of one import and one Canadian show to meet the BBG requirement of 55% Canadian program content on its overall network offering. A number of Canadian advertisers and their agencies have held out against this policy this year.

<tr>
<th>Fremantle to expand to foreign programs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fremantle Inc., New York, which has specialized in selling American tv programs in foreign markets, is expanding into another area by distributing shows produced abroad to markets throughout the world.</td>
</tr>
</tbody>
</table>

Paul Talbot, Fremantle president, reported last week that the company embarked on its project experimentally a few months ago and that results have been “highly satisfactory.” Fremantle now is distributing, in various countries, programs produced in Britain, Canada, Italy and Australia, and hopes to obtain marketable tv productions from other nations.

Programs from Britain handled by Fremantle are Born, the Little Drummer, a 15-minute children’s show; The Flying Doctor, a half-hour adventure series; Time to Remember, an informational show, and various 1-hour and 1½-hour dramas. Australian shows are Animal Parade, a 15-minute show featuring unusual animals in Australia; The Winifred Atwell Show, a musical program: The Terrific Adventures of the Terrible Ten, a boy’s adventure series. RCMP, a series on the exploits of the Royal Canadian Mounted Police. Italian programs are The Story of a Dog, a series dramatizing various breeds of dog, and a one-hour series on Italy’s Opera Buffa (comic opera) on which Fremantle is co-producer.

Mr. Talbot said some of these programs already have been sold in other countries and indicated a few may be offered in the U.S. through another distributor (Fremantle does not distribute in the U.S.). He added that officials at Fremantle’s branch offices in Britain, Canada, Italy, Australia and Mexico are evaluating local programs for possible distribution in other countries.

In September, AB-PT, an Italian subsidiary of the Fremantle Group, will be busy with a new show, The Passion of Christ, a dramatic television presentation directed by an Italian who worked on The Passion of the Christ for the Italian Vatican, and a new program, The Hundred Year War, a historical series based on the history of England, France and Italy. |
700 RKO films sold to Latin-American firm

Television Industries Inc., New York, last week completed the sale of more than 700 RKO feature films to a Latin-American organization, Fall River Investment S. A., for an initial sum of approximately $1 million plus a share of the gross revenues in perpetuity. The transaction covers television, theatrical and other non-theatrical rights to the features in South and Central America.

Basil Estreich, Television Industries president, expressed the belief that this agreement represented “the largest sale of motion pictures ever made for Latin American television distribution under a single agreement.” He noted that the RKO library was acquired by Television Industries in 1955 for slightly more than $14 million.

The South American group involved in the transaction is headed by George Caputo, a motion picture producer and distributor. Arnold C. Stream, general counsel of Tv Industries, represented the company in the negotiations.

CBC reveals merger plan for two radio networks

The consolidation of the Canadian Broadcasting Corp.’s Trans-Canada and Dominion radio networks into one big network is now being planned, CBC president J. Alphonse Ouimet told the Board of Broadcast Governors at Ottawa on Aug. 22.

The merged network will consist of about 80 radio stations across Canada. At present the two networks have more stations, the Trans-Canada network presenting daytime and evening programs, the Dominion network mostly daytime lighter programs. Trans-Canada network consists of all CBC radio stations plus independent stations, the Dominion network of only one CBC station, CJBC Toronto, and 39 independent stations.

The plans call for implementation of the merged network to start in the fall of 1962. Meetings with affiliates have been held in eastern Canada towards this end, and are continuing in other parts of the country.

U. S. imports planned by new Brazilian firm

Formation of S.A. Distribuidora E Importadora De Films (SADIF), Sao Paulo, Brazil, was announced last week by N. Borgerth Ferreira, president.

While immediate plans call for SADIF merely to import and distribute tv and motion picture films in Brazil, the firm is planning its own tv production center that likely will be in opera-

Not even razor ads

On the heels of drastic currency curtailment, Fidel Castro's Cuban government last week announced that all commercials will henceforth be eliminated from Cuban radio and tv programs. The medium employed for the announcement was the government-controlled Prensa Libre.

tion by next summer.

SADIF is represented in the U. S. by Nathan Braunstein, Screen Arts Sales Co., New York. Mr. Braunstein also acts as SADIF's purchasing agent. Agreements already have been reached to import major film series from Official Films, Cinema Vue Corp., Flamingo Telesales and MPA-TV, all New York.

Japanese council sets tv commercials festival

Japan's first television commercial festival is planned for Oct. 17, to commemorate the 10th anniversary of the start of commercial broadcasting in that country.

The festival, to be held at the Dai-

ichi Life Insurance Hall in Tokyo, is under the sponsorship of the Allied Commercial Council (composed of the Japan Advertisers' Assn., Japanese Assn. of Advertising Agencies, Japan Federation of Station Representatives and the National Assn. of Commercial Broadcasters of Japan).

The council will award prizes to outstanding commercials aired from Aug. 1954, when commercial telecasting started in Japan, to July of this year. An added attraction will be a contest among singers of tv commercials.

Canadian court allows photo coverage access

A precedent was set for Ontario courts Aug. 23 at Cooksville, a suburb of Toronto, when Magistrate R. I. Blain ruled that television and newspaper cameras could record the proceedings during the preliminary trial of six men on charges of assault with bodily harm to two off-duty Toronto Township police officers. Crown attorney Heb Metcalf explained to newsmen after court that photos were authorized as “a matter of public interest and it was felt no bias would result to the accused as long as there was no interruption of the proceedings and no flashes were used.”

ALLIED FIELDS

Philip Von Ladau, western division sales manager for national services, A. C. Nielsen Co., Menlo Park, Calif., elected vp. Donald McGlathery, media service sales manager, also elected vp.

PROGRAMMING

Harold L. Hackett, recently president of Bill Sturm Studios, New York, appointed vp in charge of national and syndication sales for Programs for Television Inc., New York. He succeeds Michael M. Sillerman, who has resigned. Mr. Hackett was president of Official Films Inc., New York, for seven years until 1960. He will work closely with Everett Rosenthal, PFT executive vp, on tv programming and other projects.

Will Thomas, northwest sales manager for NBC-TV Films, named executive vp of Telecast Productions Inc., Los Angeles, and director of syndication sales for firm's Globel Zobel travel series.

John L. Thompson, member of production services department, ABC-TV Hollywood, named assistant tv network production coordinator. William Car ruthers, formerly coordinator on Seven Keys series assigned to Steve Allen Show.

Edgar Peterson, former producer on CBS-TV Climax series, signed as producer-writer of new Jack Douglas Productions documentary series, Keystone, being produced for Ziv-UA Documentaries project.

Alan Neuman joins Arnold Michaels Productions, New York, as producer-director of Adlai Stevenson Reports, new public affairs tv series on ABC-TV.

EQUIPMENT & ENGINEERING

Merle W. Kremer, vp and general manager, parts division, Sylvania Electric Products, Warren, Pa., additionally named vp, electronics tube division, New York. Mr. Kremer succeeds Matthew D. Burns, who was named assistant to Gene K. Beare, Sylvania's president, in corporate and interdivisional activities. Gordon, Fullerton, general manager, picture tube operations, appointed vp of operations.

Raymond H. Herzog and Harry Heltzer elected vps of Minnesota Mining & Manufacturing Co. Mr. Herzog, who has been with company since 1941, assumes overall responsibility for printing products division. Mr. Heltzer, with company for 28 years, is placed in charge of all activities of National Advertising Co., wholly owned 3M outdoor advertising subsidiary.

Frank M. Folsom, chairman, executive committee, RCA board of directors, New York, elected to board of Schenley Industries, that city.

INTERNATIONAL

G. S. Redmond, general manager of CHNS Halifax, N. S., joins government department of Nova Scotia travel bureau, as director.

Rai Purdy, formerly program director of CFTO-TV Toronto, forms his own tv production firm at Vancouver, B. C.

M. L. Thomas, formerly of All-Canada Radio and Television Ltd., Toronto, appointed sales and promotion manager of recently-formed Radio Sales Bureau, that city.

DEATHS

Harry Sadenwater, 67, assistant to vp of Radio Engineering Labs, Long Island City, N. Y., died Tuesday Aug. 29 after two-month illness. He was previously with RCA and General Electric. At latter company, he was engineer in charge of developing WGY Schenectady, N. Y., KGO Oakland, Calif., and KOA Denver. In 1919, he was radio operator on navy seaplane NC-1, one of three planes with which Navy sought to make first trans-Atlantic flight, from Newfoundland to Azores.

Louis R. Wasey, 77, died Aug. 26 at his home in East Hampton, Long Island, after long illness. Mr. Wasey, who retired as board chairman of Erwin Wasey & Co. advertising agency, had been an officer of Barbasol, Musteroles and Olive Tablet companies.

Charles W. Fairbanks, 53, died Aug. 22 in Santa Barbara, Calif. Mr. Fairbanks was member of board of WIBC Indianapolis, Ind.

BUY MAINE
...in DEPTH!

42% of Maine's 1960 population was located in Bangor's coverage area.

Approximately 41% of the total television homes in Maine (according to ARB) can be found in these nine counties.

41% of Maine's total 1960 retail sales for the twelve months ending June 30th was credited to the nine counties in Bangor's coverage area.

These nine counties accounted for 39% of the state's total income.

Bangor's home county (Penobscot) had the largest increase in urban population, 1960 vs. 1950 (+: 37.2%). Penobscot County evidenced a 17.5% increase in income (1960 vs. 1950). This increment was larger than that recorded for any other Maine county.

NBC for Eastern Maine...
TIO’s presentation goes to 150 sponsors

Television Information Office, New York, last week sent to its 150 sponsors two sections of a four-part slide-illustrated presentation describing the functions and objectives of U. S. commercial tv. TIO sponsors are to use the presentation to inform local community groups about the industry’s operations, accomplishments and problems. The project is also designed for station employees’ indoctrination programs.

The two sections are called “Dimensions” and “In the Public Interest.” The others are entitled “Programming” and “Advertising.” Each section will take approximately 25 minutes to present, and each is packaged in a separate kit which contains script, 2 x 2 color slides, background material and illustrated reproductions of the script to be distributed among audiences. In the last few months the “In the Public Interest” section has been previewed at the NAB Convention, in April, and at various broadcasters’ state association meetings.

Two-way approach

Members of the WFBM-TV Indianapolis sales staff are selling their local retail accounts on the air now as well as on the street. The station has video taped spot announcements by the salesmen directed at their retail prospects, telling them that by advertising on WFBM-TV “you can talk to hundreds of thousands rather than one individual.” The salesmen invite the retailers to phone them at the stations.

Selling in unison

The rapid growth and future development of the Tidewater area (Norfolk-Newport News, Va.) last week were shown in a special documentary program, “Picture of Progress,” by Norfolk’s three television stations.

Combining their efforts in a uniform theme to sell the Tidewater market and its potential, WVEC-TV, WAVY-TV and WTAR-TV joined up to produce that city’s first simulcast. Part of the report was a show within a show—a film shown last spring to some 2,500 leading business executives in various major markets entitled, “America’s Most Misunderstood Market.”

BPA lends hand to 64 schools

“Operation Treasure Hunt” will be the first step of the Broadcast Promotion Assn. in extending its cooperation to the 64 members of the Assn. for Professional Broadcasting Education, according to John F. Hurlbut, the association’s president.

In the operation, BPA members are asked to search their stock rooms for overages of recently published promotion materials, ranging from ad reprints and direct mail, to presentations and on-the-air promotions. The material will be sent to Clark Grant, WOOD-AM-TV Grand Rapids, Mich., who is in charge of the overall project. Mr. Grant will package the materials for distribution among the participating colleges.

BPA members will be assigned colleges for continued mailing list distribution of station, network and organization promotion materials to be used as classroom examples of current promotion. Additionally, promotion managers located near member colleges will offer their services to lecture on broadcast promotion.

WTMJ and Charlie tie up Milwaukee

WTMJ Milwaukee has discovered you can get plenty of mileage out of neckties—garish ones that went out with zoot suits and spats, that is.

With Cliff (Charlie Weaver) Arquette to appear as a featured attraction of the Wisconsin State Fair, WTMJ asked listeners to send in their loudest and most bedraggled ties—typical of those Mr. Arquette wears. The person who submitted the winning tie (the one the judges felt was the wildest) would receive a variety of prizes, including 25 new ties (subdued ones), dinner with Mr. Arquette and four WTMJ personalities and tickets to the fair.

To add a little spice the station produced a contest within a contest, pitting...
(on one team) its morning show and its farm show against a team composed of its afternoon show and the weather show, with the losers attending the dinner with Mr. Arquette as waiters.

The stunt drew more than 9,000 ties.

**Dual celebration at KTAL (TV)**

NBC executives and stars and government officials will be in Shreveport, La., tomorrow (Sept. 5) for a 24-hour celebration marking the affiliation of ch. 5 KTAL (TV) there with NBC. The occasion also observes the station's move from Texarkana, Tex., to Shreveport. KTAL was to begin regularly scheduled NBC-TV programming yesterday.

Representing NBC will be Robert W. Sarnoff, board chairman; David C. Adams, senior executive vice president; Tom Knodle, vice president, station relations, and Malcolm Laing, station relations regional manager. Rep. Oren Harris (D-Ark.), chairman of the House Interstate & Foreign Commerce Committee, and the governors of Louisiana, Texas and Arkansas have been invited to attend.

NBC stars expected at the KTAL festivities include Joe Garagolzi, announcer on Major League Baseball; and Jack Linkletter, host of Here's Hollywood. The day will be climax'd by dinner with station executives, including Walter E. Hussman, president, and Walter M. Windsor, general manager.

**Everyone in on the act**

Radio advertising may have scored a first in Michigan with every am station in the state—103 of them—urging listeners to attend the annual State Fair in Detroit from Sept. 1-10. Veteran advertising and station representative personnel contend it was the first time in the 112 year history of the fair that all the state's am facilities were involved. The state-wide purchase was worked out between the Dick Frederick Agency (agency for the fair) and Michigan Spot Sales, both Detroit. In the photo Dick Frederick (agency head) plays a happy tune for (1 to r) Wendell Parmelle, Broadcast Time Sales; Arthur J. Underwood Jr., The Katz Agency; Dan Bowen, Gill-Perna; Larry Gentile, The Bolling Co.; Stuart Mackie, Avery-Knodel; Charles J. Sitta, Michigan Spot Sales; Christopher Gentile, Larry Gentile Assoc.; James A. Brown, Venard, Rintoul & McConnell; Bernard Pearse, Pearse Sales.

Announcer, negro, magnetic personality, plenty of drive, tape available. Box 932G, BROADCASTING.

Attention: Hawaii, Florida, and Gulf coast. Top flight announcer, 1st class engineer. 12 years experience in engineering announcing and maintenance. Will move after 2 weeks notice. Box 933G, BROADCASTING.

You aren’t real. After six years radio—almost two with a major chain—I’m convinced in younger years I made many mistakes, not radio men. If you can prove yourself worthy of everything I have, Top rated dj in major market when the rest of my station is third; masters in psychology, experience, marriage, family, etc. Need an operation; news, production, special events, some sports and tv, but primarily a dj. I can rock, swing, glide or bounce, adult or teen. My show takes listening and my listeners listen—buy! I’m not cheap but I deliver. If you are real radio, in a major market, believe in cooperation and refuse to sacrifice long term benefits for short term gains, . . . Then I know you don’t exist— but if you do, I don’t care if you don’t hire me—just renew my faith in the medium. Apply now, Box 904G, BROADCASTING.

Announcer want to settle down . . . not a floater or a prima donna. Top flight production. Married, right sound. Box 906G, BROADCASTING.

Beginning fm network dj in nation’s capital wants to move into am. Graduate of professional college. Experience. Box 908G, BROADCASTING.

Have first phone and anxious to learn announcing. Decent voice and high IQ. Will relocate. Must be ready mature, no drifter. Keith Balfour, 8239 Stefani Dr., Dallas, Texas. Interested? Write Box 840G, N. Gordan, Burns, Oregon, or call 4621.

Dieting and Weight Watching Are Big Issues To Americans
Mass Media Show Sharp Gain in Importance As Sources Of Information On Dieting

Weight Control Is Major Diet Reason
Over 17 percent of all Americans 15 years of age and over are on special diets of one kind or another, and the mass media are, by far, the leading source of information on dieting. These are two of the conclusions drawn from a study of the dieting habits of the American people done by Universal Marketing Research for the American Dairy Association. The interviewing was done in May and June, 1961.

The study indicates that 7 percent of all Americans 15 and over are on special diets to lose weight, that another 27 percent of us don’t diet but watch what we eat in order not to gain weight. Compared with similar studies made in 1955 and 1959, there has been an increase in the number of men dieting or watching their food intake to lose or to control weight. The survey indicates that 5 percent of the men diet to lose weight, compared with 10 percent of the women. While 20 percent of the men watch what they eat, 34 percent of the women keep an eye on their food intake to avoid gaining weight.

Other reasons for special diets include control of blood pressure, heart disease, ulcers, digestive problems of one kind or another, to gain weight. Losing weight is the prime reason for dieting, out-distancing the next major reason 3 to 1.

Millions of People Look for Advice
Boiling all these percentages down into people, the indication is that over 8 million people are on special diets to lose weight, while there are more than 40 million people who are either dieting to lose weight or are busy watching their food intake to avoid gaining weight. This truly becomes a mass market.

It is also interesting to note that this is generally a young market too. Among those 15-19 years of age, 9 percent claim to be on actual weight reducing diets while another 19 percent don’t diet but do watch their weight to avoid gaining. Considering that in this age bracket most of the dieting is done by girls, this is a relatively high percentage. Among those 20 to 34 years of age, 7 percent are dieting, another 27 percent watching their food intake. Among the 35-54 year olds, 8 percent say they actually are dieting to lose weight, 27 percent watching. Those 55 and over apparently don’t diet quite as much since only 6 percent claim to be on weight reducing diets, although 27 percent are still watching their weight—indicating that weight control truly is a lifelong process.

The research study indicates weight controllers de-
OUR RESPECTS to Harry Keeton Renfro, vice president, D'Arcy Adv., St. Louis

Stations and reps find the willingness to listen mutual

No one quite remembers the last time Harry Renfro closed his office door. It happens so infrequently that even the sign painter put the name on the door inside out so visitors can read it correctly.

No other clue could reveal so much about the warm personality of the man who is vice president and radio-television manager of the St. Louis office of D'Arcy Adv., except perhaps the comments of salesmen for stations and station representatives who are always welcomed through that door and who use it often.

They respect Mr. Renfro's business talents too. They acknowledge he works hard to get the best buys possible for D'Arcy clients, but they are well aware of the dignity and mutual understanding in which the buying is done. Mr. Renfro's years of experience at station staff and management levels before his role as agency executive is the foundation for this mutual confidence.

**Budweiser. Plus.** Mr. Renfro currently supervises the buying of some $7 million worth of broadcast time placed by the agency's St. Louis office. Budweiser beer tops the account list, but others important in the radio-tv field include Butternut coffee, Laclede Gas Co., Krey Packing Co., Banquet Canning Co., Milnot Co. (milk compounds) and Reardon Co. (paints). The schedules at present cover 782 radio stations in 396 markets and 287 tv stations in 214 markets.

Not every agency executive can deliver a "give-em-hell" speech to a group of broadcasters and leave his audience cheering. Mr. Renfro does every time in a while. And the broadcasters cheer because they know his remarks are more an encouragement or spur to better programming and selling than any kind of negative criticism. His talks are like a football coach's between-halves locker room pep talk. He spots the weak points and problems, suggests the solutions and inspires his listeners to go out and fight.

"I know and respect the problems of the stations and representatives and they know I respect them," Mr. Renfro says. "This helps very much in our relationships and it certainly helps when we have a tough buying problem of our own to solve. They help me, too."

**St. Louis Booster.** Mr. Renfro also has been a big booster for St. Louis as an important national advertising market. He has been active in getting station representatives to establish branch offices in St. Louis and now almost every big rep is there. He is working hard to help organize a St. Louis chapter of the national Academy of Television Arts and Sciences. The purpose is to define more clearly the true image of tv to the public as much as to the profession itself.

Mr. Renfro believes stations can best serve their listeners—as well as D'Arcy clients—by becoming completely involved in their own community and its affairs, by developing news instead of merely reporting it and by making decisions on format policy and programming (including music selection) a top management function, carefully thought out in advance and not delegated to the staff.

Similarly, the on-the-air personality who can serve his station, listeners and sponsors best is that individual who makes an effort to be educated, civic minded and personally responsible, not a mere glamour symbol without root in his community.

Mr. Renfro demands the same integrity in advertising itself. The consumer's desires and emotions must be aroused and colorful language, attractive claims and catchy copy lines may be employed. But these must be presented in an area of sincerity and believability, Mr. Renfro feels. "The advantages and benefits from buying the product must be presented attractively, but it must be remembered that an appeal to the emotions of your listeners is important so long as it is consistent with truth and does not mislead the listener."

The D'Arcy executive feels strongly that any advertising which misleads is detrimental to everyone—advertiser, agency, station and the public—and cannot succeed.

**Born to Broadcast.** One of Mr. Renfro's recollections from early youth is the miracle of the crystal set. His career goal from the start was to take out the business end of a microphone and he'd sit in a corner at home for hours "announcing" from magazine stories or anything else that was a handy script.

Born in St. Louis March 19, 1915, he attended public school and high school there, excelling in sports, especially swimming and football. Mr. Renfro started at St. Louis U. but his parttime chores for WEW and KWK there soon became fulltime work. He announced for WIL too and when KXOK St. Louis went on the air Sept. 19, 1938, his was the first voice to be heard. During his first two years at KXOK he did 3,000 dance band remotes, which he believes to be a record. Then he expanded into programming, news and sales.

After Pacific duty with the Marines during World War II (as a lieutenant in naval combat intelligence) Mr. Renfro returned to KXOK and in 1947 was made assistant general manager. During this period he helped form the Missouri Broadcasters Assn. and was chairman of the St. Louis station committee on joint labor negotiation. Later he served with NAB's employer-employee relations committee.

Korea and the Marines took Mr. Renfro away from KXOK in 1950-51 but he returned to become deeply involved in the Falstaff radio networks for the St. Louis Cardinals and Browns. It was this experience which took him to D'Arcy in 1953 as radio-tv manager responsible for organizing Budweiser's radio-television networks for the Car.Calls.

**Innovations.** His idea for pooling line facilities with other agencies and sponsors evolved into Sports Network, Inc., which he helped organize.

Another Renfro venture, first tried last season and renewed this year, was to buy every tv market for NTA's half-hour package, The Third Man. Those markets Budweiser can't use are resold to others.

Mr. Renfro was elected a vice president of D'Arcy in June 1960. The Renfros (he married Margaret Lydon of KXOK in 1940) live in suburban Glen-dale. Their daughter Patti, 8, is a swimmer, too.
EDITORIALS

Balance sheet

WHEN FCC Chairman Newton Minow told the NAB convention last May that television was so rich it could afford to blow all kinds of money on culture, 118 stations must have wondered if they were in the same business he was talking about. That is the number of stations that lost money in 1960, the FCC's own financial reports for that year have now shown.

It is true, as Mr. Minow said, that all television networks and stations as a group showed a 1960 profit before federal income taxes of 19.2% on total revenues. It is also true, as Mr. Minow did not say, that 118 stations (23.3% of all those reporting on a full year's operation) showed losses. Not everybody in television is getting rich.

A comprehensive presentation of the FCC's 1960 financial report appears elsewhere in this issue, and it is worth perusal by anyone who wishes to draw any conclusions about television's economics. Like any business comprising many individual companies, television broadcasting cannot be accurately described by generalities. A study of the parts is the only study that is truly meaningful.

The commonest generality that has been drawn about tv is that it is big business. The facts show otherwise. In 1960 nearly 60% of all stations took in revenues of less than $1 million each. There are grocery stores that do a bigger volume.

This is not to say that television is unhealthy or that the networks and the majority of stations are unable to afford the kind of program experimentation and development that is needed for orderly growth. It is to say, however, that none of the components of television broadcasting is so surfeited with profits that it can squander money wittingly.

You don't fight City Hall

SEVERAL years ago (in 1957) we published a series of editorials on liquor advertising on the air. Our thesis was that if it is legal to make and sell liquor, it is legal to advertise it in all media. And we said it would be legal to advertise on the air "under appropriate self-restraint."

The roof caved in on us. We received about a dozen telephone calls and about a dozen letters approving our position. We received another dozen phone calls and more than 3,000 letters objecting to it. Most of the mail came from a letter writing campaign conducted by the Baptist clergy.

Liquor advertising on the air is in the news again. A Philadelphia distiller, Publicker Industries Inc., several weeks ago launched a campaign on radio and tv. Some 50 stations, we understand, expressed willingness to carry the spots. NAB said none was a subscriber to either the radio or tv codes.

Then the shooting started. Senators Magnuson (D-Wash.) and Pastore (D-R.I.), the most important members of the Senate Commerce Committee where communications are concerned, warned stations to reject this advertising or invite "appropriate legislation." NAB President LeRoy Collins promptly concurred and promised "prompt and decisive" action against any NAB code subscriber violating the liquor advertising ban.

We do not now advocate the acceptance of liquor advertising. Nor do we recede from our position that such advertising is entirely legal.

Four years ago there was relative quiescence. This was prior to the quiz-rigging and the payola disclosures. Advertisers had developed techniques that made acceptable such hitherto taboo items as bras and foundation garments and even toilet tissues. There was reason to believe that brand-name liquor advertising, spotted in late evening hours, would be acceptable and yield revenue that was going then as it is now to newspapers, magazines and billboards.

Only the blind or the deaf would say that today's climate is appropriate for acceptance of liquor advertising on the air. It would be imprudent economically and politically to campaign for it. Beer and wine advertising, which spells the difference between profit and loss for many smaller stations, could be adversely affected. You don't fight City Hall—or Congress.

For fun or funds

TIME permitting, it might be worthwhile to divert attention briefly from the absorbing competition between Mickey Mantle and Roger Maris for the homerun championship long enough to consider a basic problem affecting the practical, or financial, side of athletics.

Here the public interest becomes directly involved through the effort of the astute promoters of sports contests to obtain exemption from the antitrust laws. This attempt is being made through legislation that would allow sports leagues to sign single, package contracts with sponsors, agencies or networks for broadcast rights to all of a league's games.

On the surface this legislation would appear to offer a simplified and practical way to resolve what currently is a complicated routine of contracts and payments. Unfortunately, as the NAB pointed out during House Judiciary Committee hearings last week, the House bill would have a result not in the public interest—less sports broadcasting.

Despite all the noble professions by those who promote professional sports events the basic thought behind their pleadings is simple—more money from broadcast rights. For example, a 1961 package deal could net the National Football League $4.6 million against $3 million under separate tv contracts. But the evil lies in the fact that the House bill would legalize suppression of telecasts. For example, Baltimore would not be allowed to sponsor a league game in Washington when the Redskins are playing away; and with both professional football leagues having package deals, only two stations in a three- or four-station television market could carry football on a Sunday.

Put simply, sports promoters operating business enterprises for profit are asking to be classified by law as benevolent public servants exempted, because of their largesse, from the harsh requirements of antitrust laws.

The legislation should not be passed. It's as reasonable to apply the protective mantle of antitrust laws to sports promotions as to other kinds.

"It's a new idea for pay tv. If you don't like the show, punch the no-sale button and get your buck back!"

Only KPRC-TV?

Yes, only KPRC-TV. Because only KPRC-TV has CH-2, most effective selling agent put in television. Thousands rely on KPRC-TV and only KPRC-TV to stimulate sales. Only KPRC-TV—the station for people who like results.
Get active response in the bonus Canadian Market, too! WGR-TV brings your message to well over half-a-million TV homes in the active Toronto-Southern Ontario "middle third of Canada"—in addition to over 648,000 TV homes served in Western New York and Northern Pennsylvania. To sell Buffalo, get active with WGR-TV.
What makes Samantha run?

Community Club Awards, that's what. Samantha and 100,000 other Baltimore clubwomen eagerly buy the products of CCA-participating advertisers on W-I-T-H and amass mountains of proofs-of-purchase in competition for the $10,000 W-I-T-H gives away each 13 weeks to women's clubs to spend as they like for worthy projects.

$190,000 is the total cash W-I-T-H has distributed through CCA, and if you think this isn't a powerful incentive, you should see the millions of bottle-caps, box-tops, labels and sales slips we collect.

Let us show you how we can increase your sales. You'll find it refreshing to hear about a merchandising plan that really works. Write, phone or wire today.
HOW TO SPOT AN EXPERT

Two management experts are called in to streamline a large, over-organized firm. Their efforts to save steps, however, bog down in a disagreement over where to relocate the men’s rest room.

Disturbed, the firm’s “Committee for the Preservation of Peaceful Personnel” resolves the deadlock with a contest. The expert who solves a certain problem first, shall have his rest room plan installed.

The experts were simply asked to join the nine spots shown above with four straight connecting lines.* However, it took them both so long to solve this problem that the firm’s “Committee for Evaluating the Efficiency of Management Experts” fired them on the spot.

If you can find the solution, send it in and win an exciting new prize. We’re offering several, so tell us what you’ve already won.

Puzzle adapted from “Mathematical Puzzles of Sam Loyd,”

*To make sure your spots connect, place them on WMAL-TV, the station first in the Washington, D. C. market, 6 P.M.-Midnight, Monday-Friday. (June ’61 ARB)
A new television structure of revolutionary design is scheduled for completion in November to mark the 7th anniversary of our founding. It will be a lasting symbol of our creative dedication to the area we serve, and a fitting evidence of the public approval of our efforts in their behalf.

Electronic buyer

Time salesmen got cold shudders last week from report that major agency was about to automate their business. Report said Dancer-Fitzgerald-Sample planned to load its electronic computer equipment with 12 months of rating information on TV stations and thus be able to pick stations for its campaigns by merely feeding availabilities lists into machine, punching couple of buttons and making up campaign lists from whatever computer says are best ratings buys. "It could be the closest approach to pure numbers buying anybody's ever seen, and the agency wouldn't even need to talk to us if it didn't want to," said one salesman. But check with DFS officials brought word that report was premature and probably exaggerated: They said they're using electronic equipment in billing and bookkeeping and, like many another agency, are considering its possibility for other uses including buying and research applications, but that they've reached no decisions on these new possibilities yet.

Presidential special

Three U. S. Presidents—Kennedy, Eisenhower and Truman—will participate in duPont Special on NBC-TV, Oct. 8 (10-11 p.m. EDT) titiled "The USO Wherever You Go." Former Presidents Eisenhower and Truman already have been filmed at their respective homes and last Friday arrangements were being made for Kennedy filming at White House. Program will include past talent and clips of wartime USO films, according to Col. Ed Kirby, USO director of public relations, former head of Army's radio-tv branch and former NAB public relations director (1938-41).

Talent participation will be something more than "walk-ons" it's understood. Among those scheduled to participate are Jack Benny, Joe E. Brown, Bing Crosby, Bob Hope, Lena Hore, Danny Kaye, Frances Langford, Merle Oberon, Dick Powell, Debbie Reynolds and Danny Thomas. In addition, other stars from U. S. shows in 1961 will be picked up overseas. Clips from wartime USO films will include Irving Berlin, Gary Cooper, Marlene Dietrich, Al Jolson, Kay Kyser, Marilyn Monroe and Dinah Shore.

Civil suit against MCA

This week, possibly today (Monday), Justice Dept. will file civil suit in Los Angeles court seeking to require MCA and its vice president, Taft Schreiber, to appear and testify publicly before FCC Network Study investigation. In two appearances before commission, Mr. Schreiber refused to submit MCA records under subpoena or to testify (BROADCASTING, March 13).

To apply or not to apply

One effect of FCC's three months postponement of its deintermixture and all-vhf rulemaking project from Oct. 2 to Jan. 8 (for reply comments) will be to give all vhf licensees, including networks, breather to ponder whether they will apply for parallel uhf assignments to be thrown open in their markets. Vhf licensees are confronted with this vexing choice: If they don't apply, choice uhf availabilities may be snapped up by others; if they do apply, they load themselves with additional expense and, at same time, give impetus to all-out move to uhf before results of $2 million experiments in New York are known.

Among networks, it's generally expected that ABC will go for dual uhf-vhf operation, in some measure feeling it's committed to this course. CBS and NBC, however, reportedly are still evaluating pros and cons in preliminary stage only. One official said all uhf is least likely in major markets where networks have owned stations and that they probably will let FCC decide to shift to uhf before any move is made to start dual operations.

Bypass major issues

Most major items of controversial nature on FCC meeting agenda last week were passed over in first commission session in over month. Among these was question of whether to renew licenses of General Electric and Westinghouse stations in face of criminal antitrust convictions of parent companies and executives. Before FCC are conflicting documents which (1) recommend hearing on character qualifications (submitted by general counsel) and (2) Broadcast Bureau position that licenses should be renewed (CLOSED CIRCUIT, Sept. 4).

Also passed over was controversial proposal calling for FCC to charge fees for its services, designed to recoup entire congressional appropriation for agency operations (BROADCASTING, July 10). Under normal procedure, both cases will be back on agenda for Sept. 20 meeting.

Bernard to Syracuse

Joe Bernard, recently resigned vice president and general manager of ch. 2 KTVI (TV) St. Louis, accepts position as vice president-general manager of W. R. G. Baker Radio & Television Corp., prospective applicant for recently allocated ch. 9 in Syracuse. Company, established by late W. R. G. Baker, former G.E. electronics executive and former president of Electronic Industries Assn., was created to seek third vhf in market. Dr. Baker's widow is stockholder and director, along with number of prominent Syracuse, including T. Frank Dolan, attorney and businessman; Leonard Market, manufacturer; Dan Casey, advertising agency executive, and Robert N. Growes, realtor. Veterans Broadcasting Co. (VVET-AM-TV Rochester) already has filed for ch. 9 and other applications are expected. Mr. Bernard, prior to joining KTVI in 1957, was vice president and general manager of WGR-AM-TV Buffalo and has deep roots in Empire state.

Considerable increased activity among Washington attorneys and engineers has been triggered by FCC's action proposing sub-standard drop-ins in eight markets, as well as provision for new vhf's in Rochester and Syracuse. In addition to newcomers, numerous old-line broadcasters in both radio and tv are in process of preparing applications for new available assignments (besides two New York cities, sub-standard drop-ins are provided for in Baton Rouge, La.; Birmingham, Ala., Charlotte, N. C.; Dayton, Ohio; Jacksonville, Fla.; Johnstown, Pa.; Knoxville, Tenn. and Oklahoma City, Okla.).

Streamlined press relations

Awaiting FCC members when they returned to their desks following August recess were recommendations of special consultant Mike Connolly for improving dissemination of commission information to public. Mr. Connolly studied information operations of other government agencies before making overall recommendations for new commission procedures. He favors broadcasting information specialist to follow and report on more important cases and news conferences by FCC members. Connolly recommendations have not been taken up officially by FCC but informal discussions are underway. If adopted, plan would result in radical changes in present commission public information practices.

BROADCASTING, September 11, 1961
WPIX-11 has a “corner” on the kiddy market. During the late afternoon and early evening hours when children dominate TV viewing, WPIX-11 dominates all competition seven days a week. Every year the biggest new children’s show is fed into the most fabulous back-to-back lineup of children’s shows in television. This year it’s DICK TRACY. No other station comes close in delivering the tremendous New York children’s market of more than three million youngsters.
Paar parries Senate in Berlin tv taping

Use of troops in taping his show at touchy Berlin border crossing was defended by Jack Paar Friday in trans-Atlantic telephone conversation with NBC officials.

Taping incident caused uproar in official Washington and Defense Dept. ordered investigation, White House expressed concern, and Senators denounced action in scorching speeches. NBC said Mr. Paar reported that taping of show, to be presented Tuesday night, was done “with the full cooperation and permission of the U.S. Army.” At conclusion of taping, Mr. Paar told NBC, he was thanked by officers in charge for way he handled presentation, particularly for including close-ups, so that families of men could see them on television.

But in Washington, Defense Dept. said Army has been asked to explain presence of seven officers and 50 enlisted men at Friedrichstrasse crossing during taping. Arthur Sylvester, assistant defense secretary for public affairs, said that with charges of provocative incidents involved in dangerous Berlin situation, it was “naive, to say the least,” for Army to let Communists watch filming of entertainment-type show.

Double Strength • Mr. Paar told NBC that presence of more than normal complement of men resulted from fact guard was being changed. Thus, relieving and retiring units were involved, plus other military personnel attracted by curiosity, according to Mr. Paar.

Senate Majority Leader Mike Mansfield (D-Mont.) led denunciations in Senate, declaring that what is transpiring in Berlin “is a tv spectacular. It has overtones of profound tragedy and should not be made a game.”

Sen. Hubert Humphrey (D-Minn.) said use of troops is “intolerable and should not be done.”

Sen. Bourke B. Hickenlooper (R-Iowa), of Senate Foreign Relations Committee, said he was “utterly shocked” and that all those involved “should be condemned.”

Use of troops for such activities said Sen. Leverett Saltonstall (R-Mass.) might lead to “a shooting scene.”

Sen. Jacob Javits (R-N.Y.) bucked trend of Senate speeches. He said Senators should be patient and get facts from Pentagon inquiry before expressing views.

MGA to rejoin AFM; fund change planned

Musicians Guild of America, formed three years ago by group of Hollywood musicians in protest against trust fund policies of American Federation of Musicians, will be dissolved and its members reinstated in AFM, according to agreement negotiated by Herman Kenin, AFM president, and Cecil Read, MGA president.

International executive board of AFM has approved pact and MGA board is expected to approve shortly. Agreement calls for AFM to seek to negotiate changes in its existing phonograph record agreements so that 50% of money now payable to Music Performance Trust Funds will be paid to individual musicians who contribute to making records.

AFM also affirms its policy of seeking residual or re-use payments for recording musicians in all other fields. AFM will grant full, uninterrupted membership rights to musicians who were expelled or otherwise disciplined for MGA activities, and all fines are nullified.

All instrumentalists employed under AFM contract jurisdiction will have right to ratify union’s contracts. AFM will establish committee on recording musicians in Los Angeles not later than April 1, 1962, to give advice on bargaining proposals and negotiations and on other matters.

WVUE (TV) gets ch. 12

Initial decision proposing to grant ch. 12 New Orleans to Coastal TV Co. was adopted by FCC Friday (Sept. 8). Coastal had merged with former competing applicant, Supreme Broadcasting Co. (Broadcasting, June 26) and two firms have been jointly operating WVUE (TV) New Orleans on ch. 13 on temporary basis.

Severeid to New York

CBS News correspondent Eric Severeid will return to U.S. this month for assignments at network’s New York headquarters. Mr. Severeid will work on CBS Reports and on various special programs on CBS Radio and CBS-TV. He had been in London since 1959, and had worked on CBS Reports program on Brazil.

Ch. 12 role confined to paperwork—Kays

At FCC’s Jacksonville ch. 12 hearing Friday (see page 70), Washington lawyer Harlan L. Kays Jr., associate of Tampa attorney Miles H. Draper, testified he was paid some $2,400 for doing job which applicant’s attorney of record could have accomplished at no extra charge.

Mr. Kays said he was under impression that he and Mr. Draper were retained by City of Jacksonville, losing applicant for ch. 12 in 1955-56 comparative hearing. He said he had not practiced before FCC and that Mr. Draper, friend of former Commissioner Richard A. Mack, told him Mr. Mack “would get him off on right foot.” Mr. Kays denied discussing merits of case with Mr. Mack or telling him he represented city.

Mr. Kays said he was not retained to do political missionary work. He said he told Mr. Draper, “I know you know the big boys and I don’t.” Mr. Kays said he understood Jacksonville City Commissioner J. Dillon Kennedy had retained Mr. Draper on behalf of city but “didn’t want us to take an active part until after the initial decision.”

Defines Role • Mr. Kays claimed his only role in proceedings was to watch for FCC documents pertaining to case and get dates of oral arguments or conferences. When asked by Hearing Examiner James D. Cunningham if he knew pertinent documents are automatically supplied by the FCC to interested parties, Mr. Kays admitted he did.

Directly contradicting Mr. Draper’s earlier testimony, Mr. Kays said he reported “8 or 9 times” on his FCC activities to Mr. Draper. At close of his testimony, attorney Kays made state-
WEEK'S HEADLINERS

Richard G. Cummins, former creative director of Erwin Wasey, Ruthrauff & Ryan, New York, appointed to new post of vp and creative director of central division of EWR&R with headquarters in Chicago, effective immediately. Central division includes Pittsburgh and Houston offices in addition to Chicago. For past two years Mr. Cummins has been with Aitkin-Kynett, Philadelphia advertising agency. Mr. Cummins will be responsible for supervising and coordinating all creative activities, including art, copy and radio-tv copywriting.

Oliver A. Unger, formerly president and board chairman of National Telefilm Assoc., has joined Home Enter-

tainment Co. as executive vp and member of board. He will supervise programming for wired pay tv system which he has developed and is ready to franchise. As NTA president, Mr. Unger pioneered in bringing feature films to television.

John T. Reynolds has been appointed newly created position of vp and general manager, network programs, Hollywood, CBS-TV. Mr. Reynolds, who had been vp, administration, Hollywood, will now supervise and coordinate all west coast creative and operating departments. Before joining network, he was vp and general manager of KJH-TV Los Angeles.

For other personnel changes of the week see FATES & FORTUNES

ment attacking FCC counsel and denying any wrongdoing.

Also called Friday was William M. Madison, Jacksonville city attorney, who testified there were no entries in minutes of city council meetings mentioning Mr. Draper in any way as attorney for city applicant. After Friday session, hearing was adjourned to Oct. 11, when testimony will be taken concerning alleged off-the-record contacts on behalf of winning applicant Florida-Georgia TV Inc. (WFGA-TV). Third applicant, Jacksonville Broadcasting Co., has not been accused of improper conduct.

FCC revises ethics code

Members of FCC last week dusted off cobwebs from September 1954 code of ethics covering commission staffers and made several editorial changes. Major change reportedly was deletion of language telling employes how to act during strictly social engagements. Commissioners themselves do not come under provisions of code but are guided by administrative order of President.

Spartanburg case resumes

Chief FCC Hearing Examiner James D. Cunningham Friday (Sept. 8) scheduled Sept. 20 as date for new hearing in court-remanded grant of ch. 7 Spartanburg, S. C., to Spartanburg Radio-

casting Co. (WSPA-TV). Case has been before FCC and courts many times (BROADCASTING, July 31) on protest of ch. 40 WAIM-TV Anderson, S. C. Latest hearing was ordered by court because ex parte charges against WSPA-TV were not explored in previous hearing.

WHDH-TV asks for uhf under new FCC proposal

WHDH-AM-FM-TV Boston Friday asked FCC to accept application for ch. 26 in that city to repeat simultaneously programs of ch. 5 (WHDH-TV). Station said it is filing now to obtain priority if FCC adopts proposal to permit uhf-uhf dual operation and free assignment of uhf channels (BROADCASTING, July 31).

WHDH said it's requesting no waiver of current FCC rules which "clearly would require denial because ch. 26 is not currently assigned to Boston" and because of existing FCC rules forbidding duopoly.

WHDH said application should be accepted for filing on FCC's announced "first come, first served" policy or else "would-be first-comers" will be discouraged by starting simultaneously with later comers.

Station estimates construction cost of ch. 26 outlet at $347,563; first year's operating cost of $45,000 and first year's revenue: None.

'CBS Reports' opener to feature Eisenhower

Former President Dwight D. Eisenhower will be star and subject of opening CBS Reports program of season, Oct. 12 (10-11 p.m.). Filmed hour will have Mr. Eisenhower discussing ups and downs of his administration. It will be first of series of such programs CBS-TV will present on former Chief Executive, announced last May (AT DEADLINE, May 8).

FCC renews WNEW-TV despite Minow dissent

Over dissent of Chairman Newton Minow, FCC Friday (Sept. 8) announced license renewal had been granted to Metromedia Inc.'s WNEW-

TV New York without prejudice to final decision in Orlando, Fla., ch. 9 ex parte case. John W. Kluge, Metromedia president, formerly was principal owner of Mid-Florida Ty (WORZ-TV), winning ch. 9 applicant, which has been accused of making off-the-record contacts during pendency of Or-

lando case (BROADCASTING, June 5). Chairman Minow said license should not be renewed until Orlando case is resolved.

WENY, KCUB sales among 14 approved

FCC approved 14 station sales in first meeting since August recess, announced Friday. Among them:

- WENY Elmira, N. Y.: Sold by Genesee Newspapers to WENY Inc. for $240,000 and agreement not to compete. WENY Inc. is headed by D. M. Simmons and associates who also have interest in WMMB Melbourne, WOND Pleasantville and WOSJ-FM Atlantic City, all New Jersey.
- KCUB Tucson, Ariz.: Sold by Ralph R. Boffard to Oscar J. Dodek and Maxwell M. Marvin for $225,000 plus $25,000 for consultancy and agreement not to compete. Messrs. Dodek and Marvin own KABQ Albuquerque, N. M. Chairman Minow and Commissioner Lee voted to send letter concerning ex-

cessive spot announcements.

Business briefly...

Curtis Publishing Co., Philadelphia, has started radio-tv drive for its revamped Saturday Evening Post. One-minute announcements on all four radio networks and prime time spot tv commercials in about 30 markets will be used each Tues., Wed. and Thurs. Agency: BBDO, N. Y.

Westclox Division, General Time Corp., N. Y., has begun four-month spot radio drive on 220 stations in 90 markets. Agency: Hicks & Greist, N. Y.

BROADCASTING, September 11, 1961
A calendar of important meetings and events in the field of communications

**DATEBOOK**

**SEPTEMBER**

Sept. 11—Space communications panel by Washington sections of Institute of Radio Engineers and American Institute of Electrical Engineers, Dr. John Pierce, Bell Labs.; Dr. Elmer W. Engstrom, RCA; Dr. Herbert Trotter Jr., General Telephone & Electronics Labs., and Richard P. Gifford, GE, Moderator: Edward W. Allen, FCC, Natural History Museum, Washington, D. C., 8 p.m.

Sept. 15—South East Radio-TV Seminar, sponsored by Georgia Assn. of Broadcasters, to discuss various problems facing broadcasters, including program farm proposals, government encroachment, NAB leadership, etc. Biltmore Hotel, Atlanta.

Sept. 15—Reply comments due on FCC rule change requiring broadcast announcement of financial interest held by station management or employees in products or services promoted on air (plugola).

Sept. 15—Deadline for comments on FCC proposal to grant rate increases to AT&T and Western Union for leased-line telegraph services.

Sept. 15—Comments due on proposed FCC ruling making limiting grants of vhf translator stations only to those which would cover unserved areas rather than simply extend an existing station's coverage area.

Sept. 22—Radio & Television Executives Society, newsmaker luncheon, Daniel Roosevelt, N. Y. FCC Chairman, Newn Moninow is speaker.

Sept. 22—Advertising Federation of America, 10th district convention. Hotel Mayo, Tulsa.

Sept. 24-26—Louisiana Broadcasters, annual convention at Jena Vista Beach Hotel & Motel, Biloxi, Miss.

Sept. 26—Resumption of FCC hearing on network programming practices, Federal Court House, Foley Square, New York City.

*Sept. 28-29—Tennessee Assn. of Broadcasters, Read House, Chattanooga. Speakers include FCC Commissioner Rosel H. Hyde; Vincent T. Wasilewski, NAB executive vice president-elect; Mark Ballman, McCann-Erickson, Atlanta; Tommy Martin, Mutual Life Insurance Co. of New York; Ben Parson, WJAC-TV, Johnstown, Pa.; and Edwin H. Jones, WJAC-TV, Johnstown, Pa.

Sept. 29—Minnesota Broadcasters Assn., annual convention. Speakers include NAB President Lefty Collins and FCC Commissioner Robert T. Bartley. Leamington Hotel, Minneapolis.

OCTOBER

Oct. 2—Deadline for comments on FCC's proposal to add additional vhf channel at below minimum mileage spacing to following cities: Baton Rouge, La. (Doc. 14233); Birmingham, Ala. (Doc. 14234); Charlotte, N. C. (Doc. 14234); Dayton, Ohio (Doc. 14234); Jacksonville, Fla. (Doc. 14235); Johnstown, Pa. (Doc. 14235); Knoxville, Tenn. (Doc. 14237); Oklahoma City, Okla. (Doc. 14231).

Oct. 2—New deadline for comments on FCC rulemaking on new program reporting forms and logging requirements, extended from Sept. 7.

Oct. 2-4—Canadian Electronic Conference of Institute of Radio Engineers, Toronto, Ont.

Oct. 2-6—Society of Motion Picture & Television Engineers, 92th convention. Theme will be "Integration of Motion Picture and Electronic Systems." C. Loren Graham, Eastman-Kodak, is program chairman. Among topics to be discussed: Subscription tv, tv equipment and techniques and tv recording. Lake Placid Club, Lake Placid, N. Y.

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

Oct. 6—Comments due on FCC's reopened option-time rulemaking. Reply comments will not be accepted.

Oct. 8-10—Advertising Federation of America, 7th district convention. Jackson, Miss.

Oct. 8-18—International seminar on instruc-
AN IMPROVED VERSION OF A PROVEN FAVORITE

For years telecasters have known and relied on the RCA-5762. Now the 5762A combines the rugged dependability of the original with important improvements.

The 5762A is unilaterally interchangeable with the 5762/7C24. Its entirely new grid design and grid characteristics make it ideal for both TV and FM. Its maximum plate dissipation is 4 Kw and it can be used at the highest VHF channel. The synchronizing-level power output is 6.35 Kw with less than 1 Kw of driving signal.

The new type retains the highly efficient radiator of its predecessor; the thoriated tungsten filament for economical power consumption; the complete shielding between filament leads and plate; the low grid-to-plate capacitance; and the high perveance. It is a worthy successor to one of the most respected tubes in broadcasting.

Also from RCA...

A NEW GENERATION OF BROADCAST VETERANS

Every familiar RCA broadcast tube has been steadily improved over the years. Each of the types below, manufactured for years, are in service in hundreds of transmitters. Today's improved versions represent the best transmitting tube investment the broadcaster has ever been able to make.

All Cincinnati is talking about the joint press conference which WCKY Total News and Information arranged and broadcast between bitter enemies James Hoffa, International General President of the Teamsters Union, and James Luken, leader of 4 Cincinnati Teamster locals which have broken away from the Teamsters. Hoffa visited Cincinnati August 27th in an attempt to rally the rest of the Teamster locals and to prevent further revolts. WCKY persuaded Hoffa and Luken to appear face to face on the Sunday afternoon press conference. ■ We opened the conference to all reporters who wished to attend. Over 40 representatives of radio and TV stations, newspapers and magazines accepted our invitation, among them the New York Times, the Detroit Press, the Dayton Daily News, KWK St. Louis, WIP Philadelphia, WOSU Columbus, UPI, AP, Mutual, NBC-TV, CBS-TV, Life Magazine and all the other Cincinnati radio and TV stations and newspapers. The broadcast ran an exciting 40 minutes of questions, answers, give and take between Luken and Hoffa. ■ Favorable comment poured into our WCKY switchboard after the broadcast from Cincinnatians who are vitally interested in such public discussions. No wonder WCKY is Cincinnati’s most talked about news station! You talk to your AM Radio salesman about WCKY!

To reach people, a station needs more than a transmitter. It can not treat people as though the public were a cipher. Only those stations which program with a due regard for the needs of the people, are truly important to people. How well we have succeeded is perhaps best indicated by this fact: each of our radio and television stations commands the allegiance of the most responsive audience in its coverage area. People listen. People watch. People know.
they felt the needle in 6

(all 6 ABC owned radio stations started a

ABC acts to produce action! Every month a major public service effort on ABC owned radio stations reaches out to six of the nation's largest metropolitan areas—New York, Chicago, Pittsburgh, Detroit, Los Angeles and San Francisco. Each month a new stimulus to community action springs from each city's most stimulating station. Recently a polio vaccination campaign on ABC stations was spearheaded by appeals from such "local" talent as Eleanor Roosevelt and Henry Fonda in New York, John Wayne and Red Buttons in Los Angeles, Pie Traynor and David MacDonald in Pittsburgh. The
result: action! The anti-polio drive is just the beginning. Month after month these public service projects will reach ever-larger audiences in six of the nation's largest markets. This is the kind of living radio that produces community action. This is the kind of living radio that produces action for the sponsor who knows where to find it — on ABC owned radio stations!

Enjoyable

EDITOR: I enjoy Broadcasting. It's a good book and the reporting and make-up are excellent. Your comprehensive market features are very well done. You can be very proud of the very fine list of institutional advertisers you have.—M. Anthony Mattes, Manager Advertising Department, Standard Oil Co. of California, San Francisco.

Doubly worthwhile

EDITOR: I have had some nice letters and comments about the article [MONDAY MEMO, Aug. 28] which make it doubly worthwhile. As a long-time media reader of Broadcasting, I have always admired the thoroughness of your treatment of the industry.—James W. Beach, Foote, Cone & Belding, Chicago.

Minow file

EDITOR: I am interested in completing my personal files on the current status of the FCC's role in the regulation of broadcasting. I should very much appreciate it if you would send me clippings of your major 1961 editorial statements on government regulations of broadcasters' programming, particularly as it concerns the celebrated speech of Newton Minow—E. Patrick Healy, Director of Media Relations and Planning, Young & Rubicam, San Francisco. [The editorials have been dispatched.]

Politz survey

EDITOR: WBEN would like your permission to reprint your fine article on the Politz Radio Survey (BROADCASTING, Aug. 28). We will give credit to Broadcasting on each copy.

We will . . . distribute them around the time our salesmen make slide and tape presentations to prospective local advertisers.—Joe A. Haeffner, Promotion Manager, WBEN-AM-FM-TV Buffalo, N. Y.

[Permission granted, with proper credit to Broadcasting.]

Texas market story

EDITOR: . . . I think the issue boosting Texas was well written and gives several towns wide publicity. But whoever wrote it failed to get out of Waco. It is merely stated that Fort Hood is 46 miles away; actually, Fort Hood joins Killeen, with 23,000 population. KLEN serves more than 63,000 people within a ten-mile area. I really enjoy reading your magazine.—A. W. Stewart, President, KLEN Killeen, Tex.

Outsider

EDITOR: I am 24 and have an honors degree from Liverpool University in politics and economics. I have only one ambition and that is a career in broadcasting on the current affairs side. As it is impossible to enter broadcasting in Britain because the BBC selects only Oxford and Cambridge men in limited numbers, I am anxious to try my luck in the U. S.—and am ready to come over now.

I visited the U.S.A. in 1959 as a vacation student and did broadcasts at WNAG Grenada, Miss., and WSOC Charlotte, N. C. I have journalistic experience and have made many tapes in Europe and Britain. I have been a professional interviewer recruiting students for industry since graduating in 1960.

Broadcasting manners

EDITOR: It did my heart good to read "Wanted: good manners" [OPEN MIKE,

From 6 a.m. to 12 midnight, Sunday through Saturday, WGN reaches more Midwest homes in the average quarter-hour than any other Chicago station. (Chicago Nielsen Station Index, June-July, 1961, report.)

63,400 homes reached in the average quarter-hour—a 30 per cent increase over previous report.

From this clear-cut and indisputable first position we salute all media buyers with a job to do in the nation's second largest market!

**BOOK NOTES**

Television in the Public Interest, by A. William Bluem, John F. Cox & Gene McPherson, Hastings House, 190 pp; $6.95

Tips and detailed instructions on how to prepare public service announcements and programs for TV are provided here by three specialists in the field. Mr. Bluem is director of television programming for the TV-radio center of Syracuse U.; Mr. Cox is television coordinator of the National Education Assn., and Mr. McPherson is production director of WBNs-TV Columbus, Ohio.

The authors outline the correct public relations approach to induce commercial stations to carry public service spots—"Don't bring the FCC with you," they caution, "a station is not required to carry all public service material submitted to it. . . . A station would certainly resent any implication that it had to be forced to have a public conscience."

Technical skills, such as preparing scripts, using film, tapes and slides and proper on-camera conduct, are covered thoroughly. The text book is illustrated with drawings and photographs.

A good TV commercial has drama, realism in right mixture

If anything characterizes our attitude toward corporate messages, it is that we prefer to think of them as "stories of chemistry" rather than as "commercials." A story implies a plot with beginning, middle and end, and all the other elements of a successful dramatic show. Most of our successful commercials have these ingredients. We try to have commercials revolve around a problem important to the viewer; then we solve the problem as it would be solved in any dramatic work.

In looking to create a better public understanding of du Pont and its activities, we frequently tell our story in terms of a product. We begin the creative task by considering how this product can be related to the self-interests of the viewer. Since many of our products serve the viewer in a form he can readily recognize, this is often a difficult job.

Judging by research studies, one of our most successful commercials opens on an apartment house fire, with the sound of sirens to make the viewer look up from his evening paper. Then we introduce a man who escaped the fire and show his anguish as he learns of an elderly neighbor who has died. Quickly, we establish his character as he resolves to design a fire alarm that will prevent such tragedies, as he struggles to find a fool-proof power source to keep the warning horn blowing.

Suspense • In this two-minute film, we create suspense as he tries and fails, until with the aid of du Pont research he succeeds in developing a successful warning device. The end of our story, shows du Pont "Freon" propellant solving the inventor's problem and contributing to safety.

Added to the dramatic elements of the basic story, based on fact, are such things as well-written, properly-delivered narration, quality production, good taste and authenticity. The combination in this instance produced a commercial that conveyed our message about research and technical service.

From extensive research studies, these and other guide posts or principles have been developed, tested and verified. We believe generally that when they are applied, a commercial has an advantage in its bid for success. Still there is always the inevitable commercial with inspired writing and superb pictures that makes a hit with viewers even though it violates all the principles.

Our creative people know that such elements as intelligibility, demonstration, the "you" approach, and a compelling initial signal enhance a commercial's chance of success. In fact, analysis of our commercials in light of such qualities allows our research consultants to predict with reasonable accuracy what viewers will learn.

And yet we have found through our own experience that even talented people, by oversight or by design, occasionally omit important principles. We have evidence to indicate that there's a reduction in effectiveness when they do.

It is our feeling that interesting, informative and believable commercials can accomplish the same ends as techniques which are overly repetitive, loud, or border on the annoying. Du Pont commercials are designed to be intriguing, factual presentations of subjects of significance to viewers.

Agency Talent • To make them so, we rely on the creative talents of our agency and our own commercial supervisor and on the judgment and taste of our five-man TV section, plus the specialized knowledge and experience of technical, legal and public relations advisors. Accuracy and honesty are prime requirements.

Laboratory scenes, for example, are staged with such care that we've never had a scientist complain about their authenticity. Whenever a dramatic demonstration has been in conflict with technical accuracy, it has had to give way. Whenever a copy line has implied more than a product can perform, it has been challenged and deleted. Whenever a product point seems to disparage someone else's product, it's restated to stand on its own merits.

The policy on product points got a severe test recently while we were demonstrating some anti-freeze protection. We wanted to show a radiator boiling over. To avoid associating the demonstration with a particular make of car, we sought—and found—a rebuilt car that had features of several makes but could be identified with none.

Real People, Places • We've found that real people and places add to the believability—and acceptability—of our commercials. We've used retired employees, research chemists, county judges and government scientists on camera. Their performances make up in reality what they lack in acting ability and we plant to continue using real people on screen where they can be most effective. We've shot footage in plants and laboratories, on farms and in the deserts and mountains.

By following our principles, we have been able to measurably increase the effectiveness of corporate commercials. For example, during the four-year tenure of Show of the Month (CBS-TV), the application of these principles resulted in a significant increase in the percentage of viewers who could prove they had seen the commercials. In the last two years of the series, it is estimated each commercial attracted and held nearly one million more viewers than during the first two years.

Lest creative people be concerned that we believe in writing commercials by formula, we should point out that our final principle is, "Don't be afraid to break a rule." We want to plot new directions continually and to try new commercial techniques, and we will study and evaluate new ideas with the hope of verifying other principles which might help us write more effective commercials.

There's no pat formula for effective commercials. We don't even want to find one, for in so doing we might lose the really great story that breaks all the rules. But not even the most sensitive creative person can object to an occasional reminder of basic principles.

Charles E. Crowley, as manager of television for E. I. du Pont de Nemours & Co., is active in both du Pont's TV commercial and programming activities. He joined du Pont 12 years ago and was initially associated with the company's Atlantic City exhibition. He later supervised men's wear advertising for the textile fibers division. A graduate of Syracuse U., Mr. Crowley served as a captain in the U. S. Air Force during World War II.

Thank you, Commander Shepard and Captain Grissom. Not for the quote, of course – just for the idea. Seems we have a problem of pinpointing the location of the Crown Stations for some of our advertising friends in New York, Boston, Philadelphia, Cleveland, Detroit, Chicago, etc. So just for the record: We operate the three most enterprising broadcast operations in Portland, Seattle, and Spokane (TV, AM, and FM). Together, we cover 75% of your customers in the Pacific Northwest. There is one further item that needs clarification. Strange as it seems, there are still a few time buyers around who continue to think of the Pacific Northwest as the end of the line. Indians, loggers, dance-hall girls, bewhiskered prospectors and all that stuff. Sort of an authentic Gaslight Club. We wish to correct that impression. Most of the Indians we know are now selling mutual funds, building 707 jets, or designing atomic reactors. The sons and daughters of the loggers and the dance-hall girls are either erecting new apartment houses or speculating in soy bean futures. And honestly,
we haven't seen a man with a beard since the last time we visited San Francisco. 

The truth is the Pacific Northwest is jumping. We're even jumping ahead of New York with an internationally recognized Fair—the Seattle World's Fair—starting next spring. We have 4,000,000 people making more money than ever before. We've become the second largest and second richest market in the West. Second only to California, of course, and they're second to nobody (as you may have heard). One last word. Our major claim to fame is that we serve them. Know a more beautiful way to sell?

there is nothing harder to stop than a trend

ABC-TV, with 8 out of the top 15 shows, again shows the way in audience ratings.*

Where program popularity counts most... in the markets where they can watch all 3 networks... most homes continue to watch ABC. The latest 24-Market Nielsen also records some leading reasons for ABC's popular victory: Adventures in Paradise, The Untouchables, Naked City, My Three Sons, 77 Sunset Strip, Lawman, The Flintstones, The Rebel... 8 shows, that is, in the top 15. More shows, that is, than Nets Y & Z combined. More grist for the trendmill.

ABC Television

*Source: Nielsen 24 Market TV Report, Average Audience, week ending August 20. All commercial programs, Monday through Sunday, 6:30-11:00 P.M.
WHAT COULD REPLACE OPTION TIME?

- CBS-TV's new compensation plan might set the pattern
- Networks would need stronger position with affiliates
- Agencies might become potent force in station programming

New patterns are beginning to take shape in the relationships between television networks and their affiliates and may be propelled into reality by decisions to be reached in the next few months.

The result may, in turn, produce changes in the buying habits of advertisers and lead to more widespread involvement of agencies in the programming decisions of stations.

The speed with which the new outlines take form will depend primarily on what FCC does in its pending option-time case. But FCC's impending action is not the only energizer at work. The whole question of network program clearances, already a multi-million-dollar problem for the networks, is becoming more difficult for both networks and advertisers and is therefore commanding more time and thought in search of fresh solutions.

If option time is abolished, then obviously the traditional network-affiliate relationship will move into a totally new era to be governed by a totally new set of values. If option time is wholly or partly retained, a new set of approaches will probably evolve gradually from the networks in an effort to increase their importance to their affiliates and thus solidify the access at least partially assured them by option time.

Odds Stacked * These views, although not unanimously held, reflect the consensus of representatives of both extremes in the debate over the importance or unimportance of option time in the networking economy. It is also their consensus that the odds are higher than 50-50 that FCC's decision will go heavily against option time.

This opinion is a seemingly realistic extension of the sequence of events in which (1) FCC ordered option time cut from three to two and a half hours per day-part (Broadcasting, Sept. 19, 1960) (2) The networks did not appeal this decision but opponents of option time did, on the ground that it is not only improper but illegal, and (3) FCC asked the court to return the case without decision, so that the commission could have a fresh look at it.

This look is now coming up. FCC has set Oct. 6 as deadline for filing comments and Nov. 3 for oral argument. The networks indicated last week that they would not let pass this opportunity to marshal as strong a case as they can make in opposition to critics—notably KTTV (TV) Los Angeles and the Justice Dept.—who contend that option time violates antitrust law and must therefore be abolished. The networks will renew their contention—which FCC itself recognized while cutting the amount of option time by a half-hour—that networking is in the public interest and that option time is essential to successful networking.

New Patterns * Apart from the option-time question, some new patterns in the affiliate-network relationship already are at least vaguely visible. The clearest to emerge thus far is CBS-TV's new station-compensation plan, which instead of a flat rate offers a higher level of payment for clearances beyond a certain number of hours (Broadcasting, May 8).

Critics have charged that the plan was designed to circumvent the cutback in option time, and FCC is investigating it along with other non-standard contracts of all networks. CBS officials deny the plan was intended to be a substitute for option time but acknowledge that its end result may incidentally run in that direction.

Authorities at the other networks will not say that they might introduce similar plans, and some officials contend it would be both ineffectual and unnecessary to do so, but observers generally feel that if the plan passes muster with FCC and also with CBS-TV affiliates, then eventually its principles will be reflected in affiliation contracts offered by ABC and NBC.

CBS-TV Plan * The plan as developed by CBS-TV eliminates the stand-

---

Plan for CBS New York

Construction of CBS headquarters building may be delayed by death Sept. 1 of its architect, Eero Saarinen. Mr. Saarinen had completed model (pictured at right), and he and associates were at work on final drawings. He conceived structure without interior supports to provide unobstructed floor space. Exterior would be faced with granite that would weather to charcoal gray. Site is on New York's Sixth Avenue between 52nd and 53rd Streets.
ard system of paying affiliates 30% of their gross rates for each so-called "converted hour" of commercial programming that they clear (after the first free hours). Instead, the plan pays 10% for each hour up to a certain level—about three-fifths of all commercial orders—and 60% of their rates for each hour cleared after that.

The dollar importance of clearances was emphasized by CBS-TV when it first detailed its new plan last spring. Officials said non-clearance of CBS-TV commercial orders during the first quarter of this year ran at a rate which, if projected over the full year, would mean $15 million in unrealized business for CBS-TV. Uncleared orders during that quarter, according to officials, were 61% higher than in the same period of 1960.

At that time CBS-TV had been having an especially difficult clearance problem on morning programs, which officials say has since been substantially cleared up, but reports from all three networks and from a number of advertisers say that the general clearance problem—especially on nighttime shows—is becoming worse instead of better.

**Closer Affiliate Relations**

There are differing views on what the networks would or might do to shore up clearances if option time were eliminated entirely or substantially. It appears generally agreed, however, that one of their first moves would be to step up the already-steady tempo of their station-relations activities in terms of more personal visits and even more frequent telephone and postal liaison with affiliates.

Agencies also would probably find themselves engaged more heavily in evangelistic work directly with stations. Agency executives already appear frequently on network closed-circuit appeals to improve clearances and in some cases go themselves or send their own emissaries to woo affiliates who are reluctant to clear their programs. Whether option time is killed or kept, the prevalent belief appears to be that both network and agency intervention at the station level is more apt to increase than diminish over the next few years.

This personal evangelism would be designed to minimize the so-called "checkerboarding" effect which many network authorities insist would become rampant if option time were abolished. Their contention is that especially in prime-time periods many stations would substitute local or national spot programs which yield them a better financial return, either moving the corresponding network shows into less desirable hours or rejecting them outright. Thus, according to this argument, advertisers could not be assured of reaching the audiences they were trying to reach and in addition would lose the benefits of high-rated adjacent shows.

**New Buying Plans**

If this argument should prove true to an extreme degree then the corollary contention is that the advertisers would over haul their current buying practices, redirecting great chunks of their budgets into spot television or other media.

At the opposite extreme is the viewpoint, shared privately by some network authorities, that the non-option of option time would have no real effect on networks, advertisers or affiliates. This contention is based on the reasoning that clearance problems exist even within option time—most spectacularly in the area of public-affairs programming—and that therefore option time does not solve anything that strong programming can't solve better.

Those who take this tack argue that non-clearance stems essentially from one of four causes:

1. Desire to substitute special local-interest programs on a one-time basis: local election returns, local sports events, civic ceremonies and the like. This form of non-clearance within option time is specifically provided for in FCC rules and, while it runs into a lot of money for the networks, it is understandable and there's nothing the networks can do about it in any case.

2. Inadequate allocations: Three networks trying to get their programs into markets that have only two stations. This is obviously impossible to do on a live-feed basis. FCC recently took steps to clear up this problem in most of the major markets which still lack a third station, but the new stations remain to be built and in the meantime the competition for clearances is bitter and is apt to remain so.

3. Station avarice: This typically shows itself when a station pleads "public interest" in rejecting a prime-time network program and then substitutes a syndicated series which, sold on a local or national spot basis, brings a higher financial yield than network shows return. Some authorities contend this practice is growing because an increasing number of station managers are getting over-rides or other commission arrangements in their employment contracts and thus are exceptionally sensitive to their stations' profit-and-loss sheets.

4. Rejection of network offerings on grounds that they are too violent, lacking in taste or for other reasons are unsuitable for broadcast: This is seen as a relatively insignificant factor in the overall clearance problem. Said one official: "Not many stations have this sort of irascible insanity."

**Financial Incentive Plan**

The possibility of solving clearance problems by holding out a bigger financial carrot to stations—unless it's a carrot too big for the networks themselves to swallow—also is discounted by a number of authorities. Their argument is that escalator compensation arrangements, somewhat akin to CBS-TV's new plan but working up to an approximate 50-50 split of the net billings, were standard features of radio network affiliation contracts for many years and yet did little or nothing to stem the tide when it turned against network radio.

On this reasoning—which obviously is not shared by CBS-TV officials—who those who question the advantages of the escalator system of compensation get back to their argument that it is the quality and appeal of network programming that will always be the deciding factor in selling programs both to advertisers and to affiliates.

The timing of network orders—whether the networks get their schedules set and tentatively sold in time to seek clearances before affiliates have made other commitments—also bears on the problem, as does the volume of non-network programming that is available to stations. This latter factor is cited by both those who think that option time is essential to insure clearance and those who think it isn't.

There are those who argue that the diminishing volume of production for syndication is creating a scarcity of first-run material which, with or without option time, leaves affiliates more than

32 (BROADCASTING ADVERTISING)
Above are stills from two Lionel commercials prepared by Grey Adv. Still on the left shows a boy "blow mold- ing" a globe from the toy firm's plastics kit. A young- sterd and his dad (right) run a set of Lionel's HO trains.

**TV PREVIEW**

Lionel Corp.'s toy and train divi- sion, New York, which, it says, will spend just under $1 million (time costs) in tv between early October and the week before Christmas, has made a series of eight one-minute and three 20-second commercials for the holiday-season drive.

Lionel, which reports it invested about half that amount in tv last year, is planning to use 75 markets in the U. S. and eight in Canada, as well as half of NBC-TV's **Thanksgiving Day Parade** Nov. 23. Lionel's agen- cy, Grey Adv., New York, now in the midst of setting up the spot drive, is trying to get spots on children's shows (4-7 p.m.).

Jacques Zucaire, Lionel's toy and train division advertising director, noted last week, "Lionel is well aware of the dubious publicity accorded the toy industry concerning exaggerated commercials. This year's Lionel commercials were very carefully prepared to assure compliance with the NAB Code which seriously frowns on un- realistic glorification of toys. Our trains and science sets will do all that our tv commercials claim they will do."

The eight commercials, made at Transfilm-Caravel and Eastern Films studios in New York, include one for each of eight Lionel products—fam- ous inventor series, weather station, plastics kit, electronics engineering, HO trains, satellite launching car, minute man rocket launcher, and sheriff and outlaw and gold bullion car.

ever dependent on their networks not only for news, information and big entertainment shows, but also for virtually all network offerings.

Others contend that the volume of syndicated programming is greater than ever—because of the growing number of off-network shows now being offered through syndication—and that therefore affiliates would program more of this syndicated material and clear less network programming if option time didn't exist.

There is general agreement that affiliates currently are clearing—and being asked to clear—more network material than option-time rules now require. On the average day each network is feeding some 9 to 10 hours, of which 7 and a half are in option time.

To get as much clearance as possible, some inducements are built in—for example, local cut-ins for station sale with- in NBC-TV's **Today** and **Jack Paar Show** (not included in the foregoing estimate of total network hours), and **Gunsmoke** reruns which CBS-TV is offering this fall under the title of **Marshal Dillon** and which the affiliates are free to sell locally or in national spot. There is some speculation that this sort of arrangement may become more prevalent as an extra incentive to affiliates as the drive for clearances continues, whether option time continues or not.

**CHRYSLER CONFIRMS AD BUDGET BOOST**

**NBC-TV special among plans revealed at junket for newsmen**

The long-range prospect of increased broadcast billings from Chrysler Corp. appeared good last week as company executives confirmed earlier reports of plans to step up overall advertising effort, including new network tv spending after the first of the year (BROAD- CASTING, Aug. 28).

Details aren't yet set, except that Chrysler plans an NBC-TV one-hour special in February featuring scenes from current top Broadway shows.

The public introduction date of all Chrysler Corp. cars has been advanced one day to Sept. 28 and the firm's 84 models in the Valiant, Lancer, Ply- mouth, Dart, Dodge Polara 500, Chrysler and Imperial lines will be pro- moted through Chrysler's co-sponsor- ship with Gillette of the World Series on NBC-TV. The baseball buy is part of the firm's $3.5 million sports pack- age that also includes football and other special events. Leo Burnett Co., Chicago, is agency for the corporate account.

N. W. Ayer, Philadelphia, is buying a major market radio spot campaign this fall to build dealer showroom traf- fic for Plymouth-Valiant. BBDO, Detroit, is buying tv spots for Dodge and Dart, and Young & Rubicam, New York, is buying tv spot for Chrysler.

Lynn A. Townsend, Chrysler's new
Detroit SRA meeting

Premiere meeting of the newly organized Detroit chapter of the Station Representatives Assn. will feature Gail Smith, director of television advertising for General Motors. The date is Sept. 25, the day before he appears in New York to testify before the FCC. The new SRA chapter will meet at Detroit’s University Club and all key agency and client contacts, particularly those in broadcast decision-making positions in the auto market, will be invited to attend. Charles Fritz, vice president in charge of the Blair offices in Detroit and president of the new SRA chapter will preside.

Business has been so good...

NORMAN, CRAIG & KUMMEL REVAMPS MEDIA DEPARTMENT

Business at Norman, Craig & Kummel, New York, the nation’s 29th largest advertising agency, has been so good this year that last week it restructured its media department better to service its growing list of clients.

The department was reorganized into three separate buying groups, with each group responsible on distinct accounts for the purchase of print, broadcast and outdoor media. Formerly NC&K’s media structure was divided separately into print, outdoor and broadcast sections.

A spokesman for NC&K said the realignment was motivated by the agency’s “recent expanding volume of business.” In the past nine months Norman, Craig & Kummel has obtained Colgate-Palmolive’s Ajax account (from McCann-Erickson) with billings of $3 million; Schick Inc. account (from Benton & Bowles) with billings of $3 million and the Wash N’ Dri account of the Unexcellled Chemical Corp. (from Warwick & Legler) with billings believed to be about $1 million. During the same period the agency lost only the Ronson Corp. account for the company’s lighters and accessories (to Doyle Dane Bernbach), which billed $3 million, and the Speidel Corp. account (to McCann-Marschall) billing about $1.5 million a year. These shifts reportedly resulted in a net gain of at least $2.5 million to the current rate of annual billing for the agency, which in 1960 was about $33 million (of which $16.7 million, or some 47%, was in broadcasting).

Indications are that this year the agency is putting more of its total billings into broadcast.

The media department change also involved several personnel shifts. Eugene Stamler, NC&K’s vice president in charge of the print buying section, was named head of overall media relations.

Henry Halpern, who had been acting media director, relinquished his media responsibilities but continues as marketing and research director and vice president.

Murray Roffis, who for the past seven years has been a media supervisor at McCann-Erickson, was appointed assistant vice president and media director of the agency. Mr. Roffis was previously media buyer at both Compton and Maxon. He will head one of three newly-created buying groups. The other two buying groups are headed by Sheldon Boden, an assistant vice president and formerly chief timebuyer for the agency, and George Coleman, also an assistant vice president and formerly in charge of media services. Norman, Craig & Kummel clients coming under the jurisdiction of Mr. Roffis include Colgate-Palmolive; Mr. Boden will be responsible for the Chesebrough-Pond’s Co., among other advertisers, and Mr. Coleman will handle media buys for Schenley Industries Inc., as well as several other agency clients.

Miss Stamler, though not involved with any of the individual media buying groups, continues on the Maiden Form Brassiere Co. and Chanel Inc. accounts.

In still another move, the agency announced that it had formed a separate media research department specifically to facilitate media buys. Bruce Erickson was named manager of the new department.

Also in advertising...

Car market analysis • Westinghouse Broadcasting Co., New York, in the first of a series of marketing analysis reports planned for the coming months on various product categories, has released an automotive report to agencies and their clients. The study, which was originally conducted by The Pulse Inc. for its May 1961 TV Profile, has been retabulated and extended to show how much was spent for new cars, including trade-in value. Among the major findings in the studies: one out of two families never buys a new car, and the top fourth in total income buys almost one-half of all cars costing $3,000 or more.

Agencies join • Consolidation of Leonard & Preston Adv. with Warren & Ltizenberger, both Davenport, Iowa, was announced in a joint statement by the two agencies last week. In the merger, Sam Preston, formerly of Leonard & Preston, becomes a partner in the new firm.

New affiliation • Co-ordinated Marketing Inc., New York, and their subsidiary Co-ordinated Public Relations Associates, whose total billings are over $8 million, have affiliated with Bergenholtz & Arnesen, Copenhagen, and Centrum Fur Absatzforderung (center for marketing), Zurich.

Bowling presentation • Radio Advertising Bureau, New York, in a presentation aimed at bowling lane proprietors, reports that in 1961, more than 27 million Americans will spend over $1 billion in bowling alleys. In a previous RAB survey of local business, more than 40% of the stations responding reported revenue from bowling lane proprietors.
WAY OFF BROADWAY

Along Castleton Avenue in Staten Island, River Road in Red Bank and Bradley Street in Westport, these are the shows that are drawing bigger audiences than all the Broadway and Off-Broadway theatres put together.

In the entire New York area—where show biz is the most—the radio station that presents the most (and virtually the only) show business as usual is WCBS Radio. National headliners such as Arthur Godfrey, Art Linkletter, Garry Moore, Bing Crosby and Rosemary Clooney appear with New York's favorite local stars.

Around town, the "crack" of dawn has come to mean another Sterling witticism as The Jack Sterling Show opens the bill from 6-10 am for the 12th straight year.

Following the all-star CBS Radio Network line-up, Allen Gray opens the matinee with the New York company of the Housewives' Protective League. This is the famous "program that sponsors the stars." Very big at the box office and the supermarket cash register.

For the rest of the afternoon, Bob Dixon, Martha Wright and Kenneth Banghart are At Your Service. Fashion, food, news, Dimension 'n' traffic, weather and stock market reports. The new and exciting around town—concerts, restaurants, theatre, movies, sports events. Interesting guests. Fascinating talk.

Late Flash—just sit back—Carol Burnett and Richard Hayes starting in the fall in an early evening program of music and comedy.

Even further off Broadway—in Boston, Chicago, St. Louis, Philadelphia, Los Angeles and San Francisco, to be precise—the other CBS Owned Radio Stations, too, are oases of adult entertainment. This live show business is another example of the kind of idea radio that makes these stations outstanding in their areas. Another reason why audiences applaud and sponsors find that there's big business in show business on

N.Y.'s Spot Share Drops

SRA report shows it's still top originator of business, but Chicago and L.A. show big gains

New York, spot broadcasting's top market in originating the business, continues to be No. 1 but it is placing a slightly smaller share of it.

On the other hand, Chicago, which continues as No. 2 market in the U.S. originating national spot either for radio or tv, is gaining heavily in radio, and is ever so slightly ahead of its percentage last year in tv.

Both cities remain comfortably ahead of third-place Los Angeles, though that city is gaining rapidly in originating both radio and tv spot business.

New York agencies now account for 53.5% of the spot radio volume, a considerable drop from last year's 59%. Tv volume moved down from 62.5% to 61.11%. Runnerup Chicago moved up from 18% to 23.4% in radio and from 18.5% to 18.6% in television.

A detailed summary including the top 10 advertising centers in which radio and tv spot originate was made possible by Station Representatives Assn. which is releasing a compilation today (Sept. 11).

SRA earlier reported that national spot radio's estimated gross time sales for the first half of 1961 totaled $89,644,000, a 4.7% decline from the first half of 1960 (BROADCASTING, Sept. 4).

The growth of Los Angeles as an advertising center is reflected in SRA's spot buying report. Radio spot placement emanating there rose from a 3.4% share of all business placed in the U.S. in 1960 to 5.5% this year. The tv spot share was up from 3.5% to 4.25%.

Other compilations by market: San Francisco, up from 3.4% to 4.35% in radio, 3.63% to 4.8% in tv; Detroit, down from 5.8% to 5.72% in radio, up from 1.6% to 1.77% in tv; St. Louis, down from 3.5% to 2.19% in radio, down from 2.8% to 2.57% in tv; Atlanta, down from 3.0% to 2.18% in radio, up from 1.7% to 2.5% in tv; Dallas-Ft. Worth, down from 1.3% to 1.26% in radio but up from 1.2% to 1.57% in tv; Boston, up slightly to 0.47% from 0.4% in radio, and from 0.3% to 1.1% in tv; Philadelphia, down from 1% to 0.8% in radio, but up from 1% to 1.5% in tv.

All other national advertising centers combined placed less of the U.S. radio spot share (down from 1.2% to 0.34%) and similarly of tv (down from 2.1% to 0.4%).

Spot tv rates leveling off

Spot tv rates in general have gone up this year, but their rate of increase is smaller than in previous years, a survey of rate trends made by The Katz Agency revealed last week. The station representative based its conclusion on a study made of key rates for a sample of 50 major market tv stations, which have been used for similar analyses since 1955.

Among the Katz findings:

- The average increase for daytime minutes on a one-time basis between July 1960 and July 1961 was 2.4%, compared with an 11% increase for the same spot buys between July 1959 and July 1960.
- Rates for 12-plan daytime minutes went up an average 1.3%, compared to a 12.3% average increase in 1960 over 1959.
- Base rates for nighttime half-hours showed an average increase of 2% this year, or 5.6% less of an increase than occurred in 1960 when base rates for the same time periods moved up 7.6% over 1959.

N.Y. seminar to analyze means of using research

The use of research in making advertising decisions will be discussed by Advertising Research Foundation members at their annual conference Oct. 3 at New York's Hotel Commodore.

Among the scheduled speakers: Alfred A. Whittaker, vice president and director of advertising, Bristol-Meyers Co.; Clark Leavitt, creative research supervisor, Leo Burnett; David B. McCall, senior vice president and copy chief, Ogilvy, Benson & Mather; Arthur Hull Hayes, president, CBS Radio, and Edward Gudeman, Undesecretary of Commerce (keynote address).

Also to speak: John D. Henry, manager, market research department, Procter & Gamble; Harry V. Roberts, professor of statistics, U. of Chicago; Alfred N. Watson, vice president, marketing services, U.S. Rubber; George H. Brown, director, marketing research office, Ford Motor Co.
"WHIO-TV REPORTS"

WINS CIVIL DEFENSE AWARD

We wish civil defense weren't necessary. Unfortunately, it is. Since this is so, WHIO does what it can to promote awareness—and what it has done has produced award-winning recognition.

WHIO-TV received a special award—one of four given nationally from the International Association of Public Information Officers for Civil Defense. This award was given "WHIO-TV REPORTS," a weekly public affairs program, for a series of discussions on civil defense presented during 1960. The coverage included "CIVIL DEFENSE IN ACTION," "RADIOACTIVE FALL-OUT," "FALLOUT SHELTERS," and "NORAD, AMERICA'S WARNING SYSTEM." WHIO Radio, too, won honors for its efforts in behalf of civil defense.

WHIO remains keenly aware of its responsibility, and will continue to keep Dayton area listeners and viewers fully informed on all events of vital local, national, and international interest.

James M. Cox (right), president of WHIO-TV and WHIO Radio, accepts the special Civil Defense award from Rob Roy Begland, Governor of the International Association of Public Information Officers.

Here, Mr. Cox (left), accepts the special Ohio State award for the promotion of Civil Defense on WHIO Radio from Thane Duray, Deputy Director of the Ohio OCDM.

Ask George P. Hollingbery for details of the role played by WHIO-TV, WHIO-AM, and WHIO-FM, in this, Ohio's 3rd, and the Nation's 34th market.

Radio opens doors for insurance agents

DOES BIG JOB FOR NORTHERN, WHERE OTHER MEDIA FAILED

It took Northwestern National Life Insurance Co. (NWNL), Minneapolis, 25 years to discover radio—and that was purely by chance. Now, 16 months later, Northwestern is not merely one of 111 Northwesterns in the Minneapolis phone book, it is the Northwestern and the proof is in its till.

Moreover, it took radio just three weeks to prove its effectiveness—create an image for NWNL, send sales booming and project "Frank Carling" into the region's most popular insurance salesman—to the surprise and delight of Northwestern National.

The switch to radio was long in coming. In fact, it was NWNL's last resort in attempting to spread its message, hitherto apparently unspeakable as relatively few people knew where the company's home office was despite the fact that the agency (in terms of assets) is the largest in Minnesota. Northwestern's previous failures in print media and the various radio successes of BBDO, Minneapolis (its agency) with other clients, finally inspired the move.

Along with radio's magic in telling Northwestern's story was BBDO's maneuver in devising a series of humorous spots, a reversal of the usual stuffy, hard sell associated with insurance advertising. The minute commercials feature Frank Carling, a fictional insurance salesman, and a gang of peevish youngsters he is apt to encounter while making his rounds.

Saturation - The radio endeavor became reality in May of 1960 with the launching of a six week saturation experiment in the Minneapolis-St. Paul area. The plan called for 177 spots per week, the bulk (more than 50%) being aired by WCCO. According to Kenneth K. Wunsch, director of advertising and public relations for NWNL, the schedule could have been cut in half and the same impact achieved. Today NWNL spends about 70% of its ad budget on spot radio.

NWNL has altered its course of action since those early days when Frank Carling was popping up all over the Twin Cities. Today WCCO airs only 12 spots a week and the schedule number being shared by other stations in the area. But its operation has gone regional with Frank Carling and the gang spreading their comical antics (and Northwestern's image) as far west as the state of Washington and as far south as Arkansas.

Here's the rundown of the stations airing the commercials: WCCO, KSTP, KRSI, WTCN, WLOL, WMIN, all Minneapolis-St. Paul; KPK, KAKE, KWBB, all Wichita, Kan.; KWBW Hutchinson, Kan.; KARK, KTHS, KLRA, all Little Rock, Ark.; KGVO, KYSS, both Missoula, Mont.; Wabay, WIPG, both Green Bay, Wis.; KALE Richland, KORD Pasco, KEPR Pasco-Kennewick-Richland, all Washington, and about 20 smaller markets placed by NWNL's branch offices in those communities. A spokesman for BBDO said the next major market for the appearance of Frank Carling would be Honolulu where Northwestern is planning a heavy sales pitch in the next couple of months, the firm has offices in 30 of the 50 states.

Measuring Frank Carling's success can be a difficult chore and the drum-beaters don't readily do it. But they are quick to point out the following reports and allow any conclusions to be drawn:

- Frank Carling was nominated for the presidency of the Little Rock, Ark., Junior Chamber of Commerce—and almost won.
- An NWNL agent posing as Frank Carling invaded Watertown, S. D. (about 200 miles from Minneapolis), received the red carpet treatment from a number of families and made an "astounding" amount of sales.
- Mason Adams, the New York actor who portrays Frank Carling, in a recent trip to NWNL headquarters, was so convincing in the role that he has a standing offer to join the firm whenever he wants.
- For the first time in 15 years NWNL appeared at the Minnesota State Fair (which ended last week), using a Frank Carling theme, and attracted 15,000 people who were interested in insurance.

And the list continues with each tale seemingly outdoing the previous one.

Frank Carling was created by Brad Morrison, a New York free lance writer-producer (now with BBDO, Minneapolis). Chuck Goldstein Productions, New York, recorded the commercials under the supervision of BBDO's Duane Zimmerman. A total of 25 spots have been recorded, each running 55 seconds with the remaining five seconds being devoted to a live tag identifying a local NWNL agent in a given community.

The culmination of the Frank Carling successes came earlier this year when it was selected by Radio Advertising Bureau as the outstanding regional radio commercial of 1960.

Here's Frank Carling in action, a typical telephone bout with a member of theKP.

Kevin Sweeney (l), president of RAB, presents to John S. Pillsbury Jr. (c), president of Northwestern National Life Insurance Co., and Bob Chaney, vice president in charge of BBDO, Minneapolis (now headquartered in the agency's New York office), plaques for the Frank Carling commercial, selected by RAB as the outstanding regional radio commercial of 1960.
Every important food chain in Fargo uses big time on WDAY-TV — on a year-round basis!

This does more than confirm the judgment of the large national advertisers who use WDAY-TV. Because these big local advertisers don’t have to depend on ratings, coverage maps or other printed material that may or may not tell the whole story of any station’s effectiveness. These local advertisers know their market and its preferences. They just simply can’t be wrong.

PGW has all the facts. Ask your Colonel!

Tommy (a child): "Hello."
Frank Carling (insurance salesman): "This is Frank Carling of NWNL."
Tommy: "Of what?"
Carling: "Of Northwestern National Life."
Tommy: "Oh, why didn’t you say so?"
Carling: "I did."
Tommy: "No, you said NWNL."
Carling: "Yes. That's what we call the company."
Tommy: "Why?"
Carling: "Er . . . ah . . . easier to remember. Like an abbreviation, sort of."
Tommy: "Oh?"
Carling: "Like the word percent. See, what I want to tell your Dad is that he can save four cents out of every dollar on his NWNL premiums by paying them in advance."
Tommy: "Yeah . . ."
Carling: "So instead of four cents on every dollar, we shorten it up and say four per cent, right?"
Tommy: "But how come you call it NWNL instead of Northwestern National Life?"
Carling: "Look, can I just talk to your Dad?"
Tommy: "Sure, I'll call him . . . Hey, J. B., F. C., of NWNL wants to talk to you about saving four P. C."

RIVAL COMMERCIALS

Study analyzes cross-effect of adjacent placements

How much effectiveness—if any—does a commercial lose if a commercial for a rival brand precedes or follows it?

The emergence of participating spot announcements on network and local programs prompted several advertisers to engage Schwerin Research Corp. to conduct three studies in this area. Schwerin released its findings last week and reached these conclusions: A commercial becomes less effective in relationship to the amount and nearness of the competition it encounters; a strong commercial appears to be hurt less than a weaker one, in adjacency situations; a commercial is hurt less if it precedes rather than follows a rival commercial.

In one study, SRC tested four different brands of a household cleaning product by exposing its test audience to all four commercials in a row without intervening entertainment. Subsequently each of them was shown separately as a participating spot in a 30-minute control show with two other commercials for unrelated products. The results indicated that the strongest commercial, when tested alone, had a 37% loss in effectiveness when it battled the other three; the second strongest commercial suffered a 69% loss; the third lost 100% of its effectiveness, and the fourth, ineffective at the outset, remained that way.

The second study involved the testing of commercials for three makes of an appliance, first singly and in a 30-minute control program and then all together in the same show. Schwerin reported that the strongest commercial suffered a 39% loss in effectiveness. The other two, which initially had been substantially weaker than the first but had been about even with each other, suffered 97% and 100% loss in effectiveness, according to SRC.

The third study explored the question of preceding or following a rival commercial. Two brands of a drug product were tested, first singly and then together in a control show. When the stronger of a two was placed first in a show, it lost only 22% of its effectiveness but lost 43% when it was placed second. The weaker of the two commercials lost virtually all of its effectiveness when it was placed into contention with the stronger commercial in the control show, SRC reported.

Commercials in production

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

P&G HOLDS TOP TV SPOT
Lever, American Home Products place, show in totals for second quarter gross time billing compilations

Procter & Gamble, Lever Bros. and American Home Products were the top ranking network tv advertisers in gross time billing in the second quarter of 1961. Television Bureau of Advertising, New York, also will report today (Sept. 11) that the three giant advertisers also led the list of network advertisers for the month of June.

Leading brands on network tv in the second quarter were Anacin tablets at $2,608,938, Crest toothpaste at $2,154,038, and Winston cigarettes at $2,137,269. These three brands also took top spending positions in the brand listing for June.

In the product category, building materials, equipment and fixtures was an outstanding example among 20 of a total of 28 classifications to show first-half spending increases over the same period a year ago. Gross time billings of building materials network advertisers rose from $1,442,115 in the first half of 1960 to $2,488,140 in the same period of 1961, an increase of 72.5%.

Leading brands advertised in the building materials classification during 1960's first half were duPont paints with billings of $1,447,734; Pittsburgh Plate Glass paints and windows, $645,346, and DeVeoe and Reynolds Paint at $130,364.

TvB's second quarter report on tv spot billing was previously released (BROADCASTING, Sept. 4).

27 YEARS AGO ON WBNS RADIO

The FBI ended John Dillinger's career in crime outside a Chicago theatre in 1934. His dramatic finale as well as his daring bank robberies and incredible jail breaks were accurately passed along to Central Ohio by its favorite radio station, WBNS.

Newscasts in those days were sponsored by the Ohio Fuel Gas Company as part of its program for good community relations.

Now, 324 consecutive months later, Ohio Fuel continues to be a good neighbor with indefatigable Chet Long as the town crier.

This client-station loyalty is solid proof that the home town advertisers who hear their dollars at work also know the wisdom of putting WBNS Radio at the top of their radio advertising budget. John Blair & Company will be happy to fill you in.

WBNS
COLUMBUS, OHIO
Represented by John Blair & Company
Colorful prelude to the 1961 All-American Soap Box Derby at Akron, Ohio, on August 20 was the Parade of Champions which included the 152 champions and more than 2,500 persons.

Along with more than 50,000 boys around the world who competed in the 1961 All-American Soap Box Derby, Chevrolet says “Thanks 50,000 times over” to all the Derby sponsors. The All-American theme under which the boys competed in 1961 was “Champions from the Start”—one that fits the sponsors, too, in their continuing efforts in behalf of the Derby. The pleasure of being associated with you in 1961 could be equalled only by the opportunity of working with you again in 1962 on the “greatest amateur racing event in the world.”

THANKS
—to all the champs
behind the champs!

Jack Izard, Chevrolet advertising manager, awards Oil Can Trophy to Winner George Maharis. Looking on are Eddy Arnold, Martin Milner, Peter Brown.

Here’s the big moment of the 1961 All-American as Winner Richard Dawson finishes ahead of the Ft. Lauderdale, Fla., and Huntington, W. Va., cars.

K. E. Staley, Chevrolet general sales manager, awards first place $5,000 scholarship to Richard Dawson of Wichita, Kansas, 24th All-American Winner.

BROADCASTING, September 11, 1961
Sweeney calls for ‘above-par’ selling

With above-par selling, radio has its “best chance” of the past decade during the next 14 months. The medium can add $55-60 million annually in new local business and nearly $30 million in new national spot and network business.

That was the message delivered last week by Radio Advertising Bureau President Kevin B. Sweeney to 50 station managers attending the opening of RAB’s 1961 management conferences at Haddonfield, N. J.

The gains, Mr. Sweeney said, can come by the 1963 budget-making time next year “if we sell consistently enough and intelligently enough.”

Mr. Sweeney noted an RAB survey of agency media directors made a month ago, saying “in this survey are the clues to the kind of selling it will take to carve the entire $30 million out of television even if we don’t hack a cent out of print media.” The questionnaires, he found, contain a “virtual blueprint to the kind of information. All we have to do is to present it.”

The broadcasters were told it was only “our own apathy” that was preventing them from obtaining a “much larger share of the retailer dollar for 1962.” Most (some 85%) of the local gains can be had from retailers, Mr. Sweeney said at the first of a scheduled eight meetings.

Business briefly ...

Aarben Pharmacal Co., Division of Wander Co., Chicago, will use spot radio in its introduction of a new product, “Getric” decongestant, in an extensive test campaign throughout the midwest, starting Sept. 17. The number of radio markets is undetermined, but in the Chicago area, the drive will be spearheaded by Paul Gibson, star of CBS-WBBM Housewives Protective League Shows. Agency: Geyer, Morey, Madden & Ballard Inc., western division, Chicago.

Bonomo Candy Div., Gold Medal Candy Co., Brooklyn, which has used tv spot consistently in the past for “Bonomo Turkish Taffy,” will use network tv for the first time this fall. The product will be promoted on ABC-TV’s new Saturday morning children’s show, On Your Mark, starting Sept. 23. Commercials will be aired live by program host Sonny Fox. In addition to the 88-station network lineup, a tv spot drive of one-minute films and live commercials starts this month in major eastern markets. Agency: Mogul, Williams & Saylor Inc., N. Y.

Roman Products, New York, kicks off regional radio and tv campaign on 6 tv and 5 radio stations in N. Y., Boston, and Philadelphia Sept. 17, for its pizza, ravioli and manicotti. Agency: Smith/Greenland Inc., N. Y.

Strohmeyer & Arpe, New York, for its Marie Elisabeth sardines and Re Umberto olive oil, will begin a 20-week spot tv campaign in N. Y. area Sept. 18. Agency: Sanders, Lowen & Alexander Adv., N. Y.

Derby Foods Inc., Chicago, has purchased sponsorship in International Showtime, new NBC-TV show which begins Sept. 15 (Friday, 7:30-8:30 p.m. EDT). Agency: McCann-Erickson, Chicago.

Airequipit Manufacturing Co., New Rochelle, N. Y., has bought participations in NBC-TV’s Jack Paar Show (Mon.-Fri., 11:15 p.m.-1 a.m. NYT) for its Superba Slide Projectors from now until Christmas. Agency: Sudler & Hennessy, N. Y.

Mohawk Carpet Mills, New York, has bought Home for the Holidays, a musical variety show to be presented on
3 FIRMS INVEST $1,000,000 EACH IN ADVERTISING

How will they profit from it?

Let us take three theoretical competitors. Each is dealing with a narrowing profit margin. Each needs to make his advertising pay. And each one’s budget is the same.

The first competitor believes in a marketing type of advertising agency. He thinks the advertising will take care of itself if all the marketing factors are right.

The second competitor believes in a highly creative type of advertising agency. He thinks the marketing factors will take care of themselves if the advertising is brilliant.

The third competitor believes in an agency which is highly creative in its advertising...

...and in its marketing advice, media selection, research, publicity, promotions, packaging, show selections.

It is entirely possible that any one of the three will get value, and profit, from his budget.

But—in these days of the profit squeeze, isn’t it likely that the third competitor will get the most?

TV PREVIEW

This is the musical comedy commercial which Mars Inc. will use once on its Oct. 19 one-hour special on ABC-TV and then give away free to all other candy manufacturers for their own use in tv. The one-minute commercial took three weeks to produce in Hollywood and will be distributed to the candy industry through the National Confectioners Assn.

Jack Denove directed for Don Zabel, who produced for Needham, Louis & Brorby, Chicago, Mars Inc.

Astor opens rep office

N. Arthur Astor has announced he is opening offices to handle national sales for the Foster Group stations (KPRO Riverside, KREO Indio, KYOR Blythe, KROP Brawley, all California).

Prior to handling national sales for the Foster stations, Mr. Astor was Los Angeles manager of Headley-Reed. The new office is located at 6332 Hollywood Blvd. Telephone: Hollywood 6-4251.

Studebaker-Packard agency

Studebaker-Packard Corp., South Bend, Ind., has retained Sydney S. Baron Public Relations Corp., New York, with Murray Snyder, former Assistant Secretary of Defense for Public Affairs as account executive (Broadcasting, Sept. 4). S-P’s advertising agency is D’Arcy Adv., not Doyle Dane Bernbach as erroneously reported last issue.

The second battle of Atlanta looms

WASILEWSKI, COX, TO ATTEND SOUTH EAST RADIO-TV SEMINAR

Representatives of the NAB and FCC—will be on hand Sept. 15 in Atlanta to hear a down-to-earth discussion of the FCC's program logging proposals—as well as what is expected to be a no-holds-barred session on the FCC's intrusion into radio and TV programming and the position of NAB on these matters. This is the South East Radio-TV Seminar, sponsored by the Georgia Assn. of Broadcasters (BROADCASTING, Aug. 14 et seq.).

Representing NAB at the burgeoning conference will be Vincent T. Wasilewski, newly named executive vice president of NAB. Representing the FCC will be Kenneth A. Cox, chief of the commission's Broadcast Bureau.

Both are being exhorted to visit a couple of the Georgia stations which ran week-long tests based on the FCC's proposal to require additional information on programming. They are expected to accede to these suggestions.

The SE RTS meeting, originally limited to state association chairmen in the seven southeastern states, was later opened to all state chairmen. Last Thursday, GAB officials decided to throw the meeting open to all broadcasters who desire to attend.

More than 50 acceptances have already been received, Jack Williams, GAB executive secretary, reported last week. These include 15 from Georgia alone, and more than 35 from outside the state.

GAB plans to record the entire proceedings, Mr. Williams stated, and a transcript of the day's meeting will be available upon request. A fee will be charged to cover the cost of reporting the meeting.

Four Georgia stations completed their dry run of the proposed new program logging requirements. The most gentle of their reactions were expressed in terms like "cumbersome," "unnecessary," and "burdensome."

**NAB Tests** Eleven NAB member stations begin today (Sept. 11) a six-day test of the FCC's proposed programming logs.

The NAB-designed logs are divided into two parts—the first is being used for the first three days of the test; the second, the last three days.

The first, NAB told stations, is drawn up in "literal" compliance with the commission's proposals; the second reflects some of the modifications which have been suggested to ease the burden on broadcasters.

The forms were hammered out over the last 10 days by the NAB staff, primarily by Mr. Wasilewski and Douglas A. Anello, chief counsel.

The eleven test stations comprise three TV outlets and seven radio stations. The TV stations represent large, medium and small markets; one being in the east, the other two in western states. All of the stations are network affiliated.

The radio stations also cover the three categories of stations separated geographically.

NAB officials refused to divulge the names of the stations for fear they would be besieged by inquiries.

Accompanying the two log sheets was a 7-page memorandum of instructions. These included a run-down of the differences between present logging practices and the suggested new ones.

**Georgia Reaction** A BROADCASTING check with the four Georgia stations used as guinea pigs in testing the effectiveness of the FCC's proposals, elicited these comments:

"Either we keep up our programming broadcast standards, or we log. This is the considered opinion of Charles C. Smith, WDEC Americus, Ga., after a week of a dry run on the FCC proposed logging program requirements.

"Some of the requirements are patently ridiculous," Mr. Smith observed last week. "They get right down to..."
ANYBODY REMEMBER THE HIT PARADE?

When there was real excitement about which tune would be "number one across the nation"?

Today, single records lack that excitement.

We know you're not out to sell music, but music is basic to your business.

What can we do about it?

Warner Bros. Records this week introduces to all members of the radio industry a revolutionary new concept in singles. We call it the:

SINGLE

What "Plus 2" means is this. Customers get a standard single with one important difference: four selections for the price of two.

WHAT DOES THIS MEAN TO RADIO?

Excitement in singles records sales means excitement about radio programming. If you feel, as we do, that the "Plus 2" concept will benefit everyone, then we encourage you to join with us in promoting this excitement.

Variety in programming. Each "Plus 2" Oldie has been edited to approximately 1:15 playing time, compared to 2:15 for the new selections. Mixing an ever-increasing library of short "Oldies" with new hit material will mean a new variety in listening, plus more and different selections played in the same unit of air time.

Better spacing of commercials. Double-spotting will not be needed as often by mixing "Oldies" with new hits.

For example:

BEFORE "PLUS 2" SINGLES:
8 Regular Singles (2:15) = 18:00
with
8 Double Spots (2:00) = 16:00
Total Playing Time: 34:00

8 SONGS + 8 SPOTS
11 SONGS + 8 SPOTS

WITH "PLUS 2" SINGLES:
4 Regular Singles (2:15) = 9:00
with
4 Double Spots (2:00) = 8:00
plus
6 "Oldies" (1:15) = 7:30
with
6 Single Spots (1:00) = 6:00
plus
1 "Oldie" = 1:15
with
1 Double Spot = 2:00
Total Playing Time: 33:45

Warner Bros. Records is behind the "PLUS 2" concept 100%... with ads, promotion, merchandising aids. We're in for the long-term push. We invite... we urge all members of the radio industry to join with us in promoting the "four songs for the price of two" concept to stimulate singles sales and radio excitement.

The "PLUS 2" Single can bring back those breathless Hit Parade days, with excitement plus about radio programming.

But we need your help.

JAMES B. CONKLING, President
WARNER BROS. RECORDS, INC.

Mr. Smith said.

"Why must off time be logged?" Mr. Smith asked. "It's obvious that when a program or spot or announcement starts, the preceding one has ended."

Why log station IDs?, was another question asked by Mr. Smith. This is a station's bread and butter; its call letters are the one thing any station operator is going to put on regularly and often.

No Need • "Some of these logging requirements are totally unnecessary, others are absolutely asinine." These are the sentiments of H. Randolph Holder, WGAV Athens, Ga., and president of the Georgia Assn. of Broadcasters.

"If one man must maintain this log, he cannot maintain program quality and I would think that broadcast quality is primary," Mr. Holder declared.

The requirements, he said, are cumbersome, complicated, burdensome and unnecessary. Some listings are superfluous, he added, like having to log non-commercial announcements and commercial announcements. Obviously if one type is identified, all the others belong in the second category, Mr. Holder commented.

Mr. Holder, whose 250 w fulltime station ran its test Aug. 20-26, ventured the opinion that the FCC undoubtedly can get the information it seeks without all the cumbersome machinery of handwritten listings. He also expressed the view that smaller stations should be exempted from all or the greater part of the logging requirements. "If this goes into effect without significant changes, we are going to have to hire an extra man to handle it. We run 20 hours a day; this means it will cost us $8,372 a year," he said.

During the WGAV test, all four announcers were required to keep the test log. "We found," Mr. Holder said, "that most of them were just about 60% complete. It couldn't be otherwise without deteriorating the standards of broadcast program quality."

"There are some things we like," Mr. Holder concluded. "These are the long-needed changes in program classifications for modern radio—like sports and public affairs as new categories."

Quality Down • John Foster, WCON Cornelia (250 w full time) reported on Thursday that programming quality had deteriorated by 50% with his test still having two days to run.

"We started on Sunday and one announcer could handle it all right," Mr. Foster explained. "On Monday, however, when we were back to normal, the board man on duty kept it up until noon at which time he gave up in disgust. I had to put another announcer in to maintain the log."

"Yesterday I was giving my regular newscast and I had to cut the mike off for a number of seconds just so that I could complete the log. We had nothing but dead air for a time."

Mr. Foster feels that the proposed logging requirements are "not practicable at all."

Not only will it be necessary to hire an additional man, Mr. Foster stated, but a lot of the information doesn't seem to be necessary at all. "I don't see why we can't leave out entertainment entirely. Obviously the programming between announcements or news or discussion is entertainment," he said.

No Give • The lack of flexibility in handling logging was the complaint of Charles E. Dow, 1 kw daytimer WROM Rome, Ga., who ran his own version of what he deduced was the FCC's requirements Aug. 20-26.

"We have a program which is basically music, running from 9 a.m. to noon. It is in this program that we run announcements about local civic groups—PTA meetings, garden club showings, civic association campaigns, etc. Just when these announcements are made cannot be scheduled; they even come in during the program. The man on the board cannot take the time to log them properly, particularly when an on-off listing is required."

One man could handle this logging,
Will he “measure up” in his school work, too?

“Chin up! Shoulders back! Stand tall!”
“You're a big boy now—ready for school.”

What about your youngster? Even though he may appear to be in tip-top condition—like the one shown here—it is a sensible idea to have his health checked before school opens.

Your child’s doctor will be alert to problems—both physical and emotional—that could interfere with your youngster’s school progress. For example, he might have some slight and unsuspected defects of his eyes or ears which, if attended to now, could prevent difficulty later on.

And when you see the doctor, you can talk with him about your child’s health habits. If, for instance, he skips or barely eats breakfast, he will have a poor start for his day’s work at school.

Now’s the time to make sure, too, about your child’s protection against the communicable or “catching” diseases. Are his immunizations up-to-date against polio, diphtheria, whooping cough, tetanus and smallpox? Protection against influenza is also given to some children.

A preschool check-up could make the difference between a good or a disappointing year at school—for children who are entering as well as those who are returning to school.

To supplement your doctor’s advice, Metropolitan Life will send you its informative booklet, ABC’s of Childhood Disease.

Mr. Doss surmised, "if he had nothing else to do."

The proposed requirements should be revised, the WROM general manager said. Some things seem wholly unnecessary, he added, like identifying commercial announcements for businesses in which the owner or owners of a station have interests. This is already on file at the FCC. Another is the need for identifying local news items in a newscast.

Mr. Doss reported that he had to put on a second man to help maintain the logs.

The cost runs two ways, he concluded. There is the cost of a program man spending more time on paperwork and less time on programming; or there is the need to hire an additional man. This would cost WROM another $4,000—$5,000 a year. That's a pretty substantial piece of change for a station my size.

State groups hear about editorializing

Two state broadcaster associations heard words of wisdom and warning concerning the use of broadcast editorials. The Arkansas and Mississippi associations were addressed, respectively, by Ted Rand, manager of KDRS Paragould, Ark., and A. Louis Read, vice president and general manager of WDSU-AM-TV New Orleans.

"Editorials," Mr. Read said, "may eventually put broadcasters into an intimate relationship with public issues which could enlighten and elevate the whole industry and fill the dangerous gap left in our public debate by the trend toward newspaper monopolies."

He added that some stations are trying to get into the editorial swim without getting wet, wading in knee-deep with occasional editorials or with weekly editorials.

Mr. Read urged the Mississippi broadcasters to consider going beyond news and into opinion—only if certain conditions can be met, mainly having the right kind of news operation.

"Editorials cannot be done well, and probably should not be done at all, unless someone can spend three to four hours, at least, on editorial research and writing," he commented. "If the news director cannot see his way to handling this additional work day after day, and if the station management is not sold on editorial possibilities to the extent of hiring another man, then I would say to forget it. A hastily-researched, hastily-written editorial benefits no one," he added.

Establishing an editorial broadcast at a regular hour every day is a step along the road to "trivia" according to Mr. Rand.

In a speech before an Arkansas Broadcasters Assn. meeting, Mr. Rand said, "Editorializing for the sake of editorializing appears foolish to me. It robs you of the Sunday punch you need for editorials of purpose." Instead of daily editorial, he prefers a daily five-minute program which "sometimes" carries editorial opinion, properly labelled. On other days, the broadcast consists of in-depth features, book reviews, reviews of speeches, opinions of others and even eulogies.

"Broadcast an editorial every day," he said, "and you can be sure that
The Third World War BEGAN IN 1848

"The future is with us, for we are confidently marching forward long the only correct path, the path charted for us by our teacher, great Lenin."

— N. S. Khrushchev, Report of the Central Committee, 20th Congress, CPSU

Karl Marx, the theoretician, wrote the Communist Manifesto in 1848. But it took Lenin, the man of action, to breathe life into Marx’s words... and thus set in motion Communism’s confiscations of human liberty.

Lenin’s action plan for world conquest is cloaked today by Communism’s monotonous surface cant of “peaceful coexistence.”

Lenin said:

“As long as capitalism and socialism exist, we cannot live in peace; in the end, one or the other will triumph—a funeral dirge will be sung either over the Soviet Republic or over world capitalism.”

And...

“...force alone can settle the great problems of political liberty and class struggle, and it is our business to prepare and organize this force and to use it actively, not only for defensive purposes, but also for the purpose of attack...”

“Lenin meant what he said without equivocation. What he said, what he believed, and what he practiced, in my opinion, constitute 'Leninism.' And I, for one, find no reason to doubt the word of Nikita S. Khrushchev when he asserts that the injunctions of Lenin must be the guide to all Communist activity.”

— J. Edgar Hoover
Director, Federal Bureau of Investigation

We can answer the Communist Line only if we know what it is. Through these ads, and the prime time announcements on WKY Radio and Television, we’re telling a few facts about Communism.

Maybe this isn’t the way to sell time on a radio and television station. But then in Russia there isn’t any time to sell. The government owns it all.
people sooner or later will say, 'There goes that smart s.o.b. from the radio station, again.'"

**Collins names members of NAB research group**

The first meeting of NAB's special committee on research will take place in New York on Sept. 18 and 19, it was announced last week coincident with the naming of members of the full committee.

Don McGannon, president of Westinghouse Broadcasting Co., was named chairman of the committee last month (Broadcasting, Aug. 28). Members of the committee, who will study the feasibility of establishing an NAB research and training center, as named by NAB President LeRoy Collins last week:

Julius Barnathan, ABC Television; Hugh M. Beville Jr., NBC; George C. Hatch, KALL Salt Lake City; John P. Cowden, CBS; Daniel W. Kops, WAVZ New Haven, Conn., and WTRY Troy, N. Y.; Irving Lichtenstein, MBS; Richard B. Rawls, KPHO-AM-FM-TV Phoenix, Ariz., and Willard Schroeder, WOOD-AM-TV Grand Rapids, Mich.

The idea of establishing a research center was first broached by Gov. Collins at the NAB convention last April. He expanded his ideas at the NAB board meeting in June and received authority to set up a committee to study the idea. Among the subjects which ought to be studied, according to Gov. Collins, are ratings, editorializing, judicial proceedings coverage, the maintenance of freedom and responsibility for broadcasters, new techniques in public affairs programming, the relationship of the broadcaster to the community, the radio spectrum and the future of radio.

**Shea announces group to handle ASCAP talks**

A broadcaster executive committee was announced last week to handle the coming tv industry negotiations with ASCAP on licensing agreements.

The announcement was made by Hamilton Shea, chairman of the All-Industry Television Station Music License Negotiating Committee. On the committee with Mr. Shea are John McCoy, Storer Broadcasting Co.; Alan Hartnick, Metromedia; Clifford Kirtland, Transcontinent Television; Charles Tower, Corinthian Broadcasting; William Grant, KOA-TV Denver, and Robert Smith, WCYB-TV Bristol, Va.

The negotiation committee, Mr. Shea said, will meet in the next two weeks with the all-industry committee's legal firm to draw up a schedule of discussion points for the negotiations. He noted the makeup of the committee includes "some of the outstanding legal and financial talent in the broadcasting industry." Messrs. McCoy, Grant and Hartnick are attorneys; Messrs. Kirtland, Shea and Tower have extensive financial and controller management backgrounds, and Mr. Smith, in addition to being an attorney has experience in smaller markets.

**'Instant cash payments' to media start**

Geyer, Morey, Madden & Ballard's introduction of sight drafts for "instant cash payment" to media [Broadcasting, July 10] recently got off to a $35-million start. That's the total (when validated) of the sight draft envelopes being inspected above by George B. Arnold Jr. (1), assistant treasurer, and William G. Carmody, secretary and assistant treasurer. The drafts were mailed to more than 1,000 newspapers, radio and tv stations which will use them on a monthly basis, and in effect, pay themselves net amounts due for advertising placed by the agency for its clients. GMM&B plans to widen the prompt payment plan to cover all media on its clients' schedules. The First National City Bank of New York is the agency's bank on the new system.
FIRST-RUN FILMS FOR FIRST-CLASS VIEWING!

New First-Run feature purchases augment vast WMAR-TV library!

WMAR-TV is now the only Baltimore station offering late evening films nightly, Monday through Saturday!

First-Run "Big Movie of the Week" on Saturday nights has consistently had the largest audience of any feature film in Baltimore. Now, in addition, WMAR-TV is presenting, on Friday nights, another First-Run series, "Films of the 50's" (premiered Friday, September 8th). "Channel 2 Theatre," a long-time Monday through Thursday night feature also offers many First-Run films. Don Bruchey (photo) is host.

The recently purchased SEVEN ARTS package with such films as "The High and the Mighty", starring John Wayne and Robert Stack; "Hondo", starring Wayne and James Arness; "A Star is Born", starring Judy Garland—plus selected NTA titles—"Viva Zapata", with Marlon Brando; "12 O'Clock High", with Gregory Peck, and "Prince of Foxes", with Tyrone Power will run on Fridays and Saturdays. Many First-Run films from other top packages will be shown Mondays through Thursdays.

This is VIEWMANSHIP at its best . . . First-Run films for First-Class selling in the nation's 12th market!

Salant asks for repeal of Sec. 315 restraints

If television is freed from the restrictions of Section 315 of the Communications Act, the medium can go forward to fulfill its "enormous potential" in the field of politics, Richard A. Salant, president, CBS News Division, told the annual meeting of the American Political Science Assn. in St. Louis last Thursday (Sept. 7).

He asserted that television has "barely begun to play the full and responsible role of which it is capable" in political broadcasting because of Section 315. He reminded his audience that the well-known joint appearances during the 1960 presidential campaign were made possible because the provisions of Section 315 were suspended temporarily.

"Television's contribution to the 1960 campaign was only a beginning," Mr. Salant declared. "Much is left to be done. Section 315 must be repealed — so that these new techniques can be continued, improved and applied to all levels of elective offices. And broadcasters must sharpen their techniques — experiment with more direct debate, with less confusing formats, and with other kinds of program types."

Mr. Salant explained that in the 1960 campaign, CBS Radio and CBS-TV contributed time with a monetary value of more than $2 million to major candidates. He added:

"The clearest and most direct protection, then, against the dangers of a purchase of an election by obliterative purchase of television time is repeal of Section 315 — thus assuring all significant candidates free time in quantities apparently beyond their desires."

Broadcasters praised for heart fund help

Radio and tv stations aired a total of 320,000 appeals in support of the heart fund drive early in the year, according to partial data collected by the American Heart Assn. In addition the campaign was supported nationally by networks and their advertisers through 270 tv and 464 radio network appeals.

In a letter to John F. Meagher, NAB radio vice president, Rome A. Betts, executive director of AHA, expressed "deep gratitude to the nation's broadcasters who, in contributing to and stimulating medical progress, perform a public service of first magnitude."

Mr. Betts said the industry "reflects a vigorous sense of community responsibility which we feel is characteristic of men and women in broadcasting."

Triangle renews Blair rep contract

A long term renewal of the national representation contract between the Triangle stations and the John Blair Companies was announced jointly last week by Roger Clipp, vice president and general manager of the Triangle Broadcast Div., and John Blair, head of the representative organization.

Under the terms of the contract, Blair-TV will continue to represent WFIG-TV Philadelphia; WHC-TV Hartford-New Haven, Conn.; WFBG-TV Altoona, Pa.; WNBV-TV Binghamton, N. Y., and KFRE-TV Fresno, Calif. National representation of WLYH-TV Lebanon, Pa., will continue to be handled by Blair Television Associates.

In radio, John Blair & Co. will continue representing WFIG Philadelphia, WNBV Binghamton and KFRE Fresno. The Blair organizations have represented the Triangle Stations since 1954.

Outstanding Exclusive Broadcast Properties

This is a profitable fulltime property in a medium size market. Station has outstanding local acceptance, 29% down and balance over 7 years.

Powerful daytimer with fulltime possibilities in a rich, secondary market. Excellent real estate and good earnings. All cash required.

Single station market daytimer near a medium metropolitan area. Combined operation. Grossing over $60,000. Needs an owner-operator. 29% down.

NetALERT gets workout

CBS Radio's new NetALERT system got its first operational workout last Tuesday (Sept. 5) when it was used to flash news bulletins about nuclear testing. The first bulletin at 12:24 p.m. was a special report from Moscow by Marvin Kalb, CBS newsman; the second bulletin followed shortly with a report from George Herman, CBS
Six Montana stations form radio network

Announcement was made last week of the formation of the Silver Dollar Radio Network, composed of six Montana stations with a single rate card and a single billing.

Joseph Sample, Billings, heads the new group which includes KOOK Billings, KBMN Bozeman, KXLF Butte, KFBB Great Falls, KCAP Helena and KGVO Missoula. Other officers are Dale Moore, KGVO, vice president, and W. C. (Bud) Blanchette, KFBF, secretary. Bettye Zuck, formerly traffic manager of the Cowboy Network, has been appointed general manager of the Silver Dollar Network with headquarters in Billings.

George P. Hollingbery Co. has been appointed national rep for the new network with Art Moore & Assoc. handling sales in the Northwest.

Witty: tv affects grades

Heavy television viewing "significantly lowers school grades" of elementary students but does not affect reading or hobbies, Dr. Paul Witty, professor of education at Northwestern U., told a meeting of the American Psychological Assn. in New York. Dr. Witty, who said he has spent 11 years in continuous study of tv viewing habits of children in the Chicago area, said viewing has "levelled off" to 21 hours per week for average elementary school pupils; 20 hours for parents; 14 hours for high school students and 12 hours for teachers.

Magazine-backed study tosses curve at day tv

Women under 50 years of age, and those living in "better" income households show a comparative lack of interest in daytime tv, according to a survey conducted by C. E. Hooper for McCall's and The Ladies' Home Journal.

Covering four daily daytime tv programs—As the World Turns, The Guiding Light, The Edge of Night (all CBS-TV), and Concentration (NBC-TV)—the study included 2,042 housewives selected at random from telephone listings in 79 U. S. cities.

An analysis of each of the four programs showed more than 80% of the women interviewed did not see any one of the five telecasts of a particular program "last week." The frequent viewers, those who saw a specific show five times "last week," accounted for only 8% of those quizzed.

News White House correspondent.

NetALERT becomes operative when a technician in CBS Radio’s central control in New York interrupts regular programs by dialing NetALERT signal four, which indicates that an important news bulletin is about to be fed to all affiliated stations (Broadcasting, Sept. 4).

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• WPTV (TV) West Palm Beach, Fla: Sold by John H. Phipps to Scripps-Howard Radio Inc. for $2 million cash. Sale is contingent on FCC approving also change in antenna height and site. Scripps-Howard Radio Inc. owns WEWS (TV) Cleveland, WCPO-AM-TV Cincinnati, WNOX Knoxville and through Memphis Commercial-Appeal and Press-Scimitar WMC, WMCF (FM) and WMCT (TV) in that city. WPTV, on ch. 5, began operating in 1954. Broker was R. C. Crisler & Co.

• WTTC Towanda, Pa.: Sold by Victor Michael, T. Justin Myers and Leroy Hopkins to Clifford S. Brown and Harry M. Brown, father and son, for $75,000. The senior Mr. Brown is a theatre owner in Kane, Pa.; Harry M. Brown is news director of WFRM Coudersport, Pa. Mr. Michael retains his interest in WMLP Milton, Pa. WTTC is a 500 w daytimer on 1550 kc. Broker was Blackburn & Co.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 110).

• WMEG Eau Gallie, Fla.: Sold by Victoria C. Martin, A. V. Chatterton and Thomas Cary to Charles E. Verner and Wallis R. Kinney for $150,000 plus agreement not to compete for eight years within 50 miles. This is first transfer involving outright change of ownership approved by the FCC’s Broadcast Bureau under its new, delegated authority.

New southwest rep firm

Creation of a new southwest regional station representative, Air Media Time Sales Inc., Dallas, was announced last week by Wells Bruen, president of the new company.

Mr. Bruen, formerly with George P. Hollingbery Co., said the firm already has obtained commitments from a number of stations. The list will be released at a later date.

The new firm is located at 3810 Inwood, Suite 114, Dallas.
Local radio gets catv advertising budgets

NCTA STUDY SHOWS $1 MILLION ANNUAL EXPENDITURE

Over $1 million is spent yearly on local radio stations throughout the country by community antenna systems advertising their services. The figures are based on a survey by the National Community Television Assn. among its members. NCTA asked how much each spends weekly on radio advertising. Of the 93 replies received from the 475 members of the organization (a return of 19.5%), 27 said they do not advertise on the air, but 66 said they use radio and spend, in the aggregate, $2,300 a week. The average weekly expenditure in radio for these 66 is $35 per week.

Counting about 800 catv systems operating in the country, and deducting 240 as representing the percentage not using radio, the $35 weekly average can be counted as commercial time buying by the remaining 560 catv systems.

Three catv systems told NCTA they spent a total of $1,350 in television itself during the past six months.

Community antenna systems bring tv to subscribers by picking up video signals off the air and conducting them to customers' homes via coaxial cable lines. Monthly charges for this service run $3.50 to $9; some systems also bill for installation.

Program Sponsors: Most of the advertising by catv companies are spot promotions for the service, but a significant number sponsor full programs. For the most part these are high school (and in several instances the local junior college) football, basketball and hockey matches. News and weather shows are also sponsored by some cable companies. In many instances the antenna company underwrites the cost of public service spots (Red Cross, Community Chest, Chamber of Commerce, etc.).

One of the most interesting uses of radio by cable companies is that on KCLS Flaggast, Ariz., by the Flaggast TV & Cable Co. By telephone from its own office at 3:45 p.m. Mondays through Fridays, the catv company broadcasts a 10-minute program of recommended evening tv viewing from Phoenix. The time is donated by KCLS as a public service program. The Flaggast catv system carries the four Phoenix tv stations. It serves over 4,000 subscribers.

Other ventures, involving the catv system and local radio station:
- West Virginia U. basketball tournaments during the last two years have been carried by WTRF-TV Wheeling, W. Va., sponsored by catv systems in Clarksburg, Fairmont, Elkins, Weston and other cities of north central West Virginia.
- Live telecasts, originated in the catv studio by KIUN Pecos, Tex., every afternoon presenting local news, weather, sports and panel discussions have been transmitted by the Pecos Cable Television Co. in that city.
- Local news is covered for tv stations (about 50-60 miles distant) by the Panther Valley Television Co. in Lansford, Pa. News "as it happens" is immediately passed on to the tv stations. This is usually the first report received and is used on local area telecasts.
- KLEA Lovington, N. M., a daytime-only station, uses one of the Lovington Antenna Co.'s channels for nighttime, audio-only broadcasts of local news, sports, bingo games and elections. The catv system supplies a video camera for studio presentations originated at the radio station and used mainly in conjunction with local charity drives, Chamber of Commerce fund campaigns and other items of local interest.
- In Farmington, N. M., the Farmington Community TV works with KNDE-AM-FM there in getting stereo to its customers. KNDE stations broadcast stereo by using the am and fm outlets for separate audio channels. By feeding KNDE-FM through one of the catv channels, Farmington cable customers can receive the fm stereo signal on their tv sets, and get the other stereo channel on their am sets off the air.

H-L files counterclaim against Stubblefield

Hamilton-Landin & Assoc., station brokers, filed a counterclaim against one-time associate, William T. Stubblefield, last week in U. S. District Court in the District of Columbia.

The firm also denied allegations made by Mr. Stubblefield in his civil suit against Hamilton-Landin and Ray V. Hamilton, its principal, seeking commissions and wages totaling over $53,000 plus an undetermined amount for commissions (BROADCASTING, Aug. 14).

In its counterclaim, Hamilton-Landin asserts that Mr. Stubblefield used corporate funds for his private accounts. It also alleges that Mr. Stubblefield breached a provision in his contract forbidding him to engage in station brokerage business for a period of time. The station broker firm asks the court to assess "exemplary" damages against Mr. Stubblefield of $100,000 plus actual damages or, in the alternative, 2½% of $10.3 million for breach of contract. The $10.3 million represents the amount of business in the firm at the time Mr. Stubblefield left. The contract provides a 2½% penalty of this amount for violating the ban on competing.

Mr. Stubblefield was with Hamilton-Landin from September 1957 to October 1958. He now owns and manages WAGE Leesburg, Va.

KFOX, AFTRA sign pact; KFWB strike continues

There was no change last week in the strike of the American Federation of Television & Radio Artists against KFWB Los Angeles, which begins its third month today (Sept. 11). Both sides expressed their willingness to meet and consider any reasonable proposal, but there was no meeting nor any new proposal. The AFTRA pickets continued their march in front of KFWB's studio doors.

However, AFTRA did announce that it had signed a new contract with KFOX Long Beach, the first agreement to be completed with any of the 17 Los Angeles area independent radio stations whose contracts with AFTRA expired last April 30. The new KFOX contract is a two-year deal, calling for weekly increases for staff announcers of $17.50 over the two-year period, $10 the first year and an additional $7.50 the second,
News from the far corners of the world

..filmed with AU R I C O N 16mm Filmagnetic Cameras and SOUN D C R A F T Magna-Stripe raw stock!

News-gathering services all over the world bring Talking-Pictures with "Living Sound" to America's 45 million television screens—filmed with the incomparable Auricon Filmagnetic Camera and Soundcraft's Oscar-winning Magna-Stripe raw stock. Magna-Stripe, Soundcraft's exclusive method of putting magnetic stripes on film, is unaffected by photo developing processes.

Using Auricon Filmagnetic Cameras loaded with Magna-Stripe raw stock, you get highest picture quality and all the advantages of magnetic tape—with no signal loss in transfer from the original to the final print! If it's news you're after, or the production of commercial and industrial sound-films, use Auricon Filmagnetic Cameras and Soundcraft Magna-Stripe raw stock—for high-fidelity results in single-system filming!

'Do it yourself' for White House handyman

William R. McAndrew, executive vice president, NBC News, who wrote the opening chapter of the book, explained last week that the book's purpose is "to extract the issues that make the difference between a free society and a slave one, and to re-emphasize the directions to be followed by the Kennedy Administration to keep the world alive and free." He said the book is the work of men trained to report and evaluate.

A preface to the book is written by Robert E. Kintner, NBC president. Chapters on overseas areas are by the following correspondents: John Chancellor, Joseph C. Harsh, John Rich, Irving R. Levine, Edwin Newman, Welles &gen, Cecil Brown, James Robinson and Wilson Hall. Sander Vanocur wrote the final chapter which concerns President Kennedy's plans to deal with problems posed in the book's preceding chapters.

with the initial raise retroactive to May 1.

The contract also provides for two weeks' additional termination pay, double-time pay for work on Christmas or New Years, restrictions on employment of part-time announcers to two days a week and gives AFTRA members the right to respect picket lines of other unions whose strikes against the station have been sanctioned by the Los Angeles County Federation of Labor and approved by the national AFTRA. This is a new clause for AFTRA and a most important one, according to Claude McCue, executive secretary of the Los Angeles AFTRA local. It will be mandatory in all future AFTRA contracts, he said.

Gittleson organizes sales-promotion firm

Broadcast House Enterprises Inc., offering sales and promotion services to radio and tv stations, has been established with home offices in Manchester, N. H. Norman Gittleson, a broadcasting executive of 15 years, heads the new organization.

Plans are now underway to open branch offices in New York, Chicago, Atlanta, Dallas, Los Angeles, San Francisco and Toronto.

The firm's first promotion, "Number's Up," tested in Omaha and Lincoln, both Nebraska, already has been sold to 19 stations. They are: KQTV Fort Dodge, KBIZ Ottumwa, KROS Clinton, KCRG Cedar Rapids, KJOA Des Moines, all Iowa; KTOP Topeka, KWBW Hutchinson, KELO Wichita, all Kansas; WQUA Moline, WRRR Rockford, both Illinois; KTLN Denver, WYNS Colorado Springs, KTUX Pueblo, all Colorado; KBBN Omaha, KLMS Lincoln, both Nebraska; WERC Erie, Pa.; KGWA Enid, Okla.; WHEN Syracuse; KUSN St. Joseph, Mo.

Broadcast House Enterprises is located at 45 Market St., Manchester. Telephone: NA 7-7669.

Catv outfit registers offering with SEC

Multiple-catv system owner H&B American Corp. last week filed with the Securities & Exchange Commission to register $2,575,000 of 6% sinking fund debentures due 1973 and 12-year warrants to purchase 206,000 shares of common stock. The debtentures and warrants will be offered in exchange for $2,575,294 of 3% outstanding 10-year notes due 1964.

The company is engaged almost totally in the catv industry. A few years ago it had highly diversified interests; H&B still retains a home barbeque equipment manufacturing division but has announced its intention of selling it. H&B operates 26 catv systems in Alabama, Arizona, California, Idaho, Iowa, Maine, Montana, New Jersey, New Mexico, Washington and Canada. It plans to acquire eight other systems in New Jersey, Florida and California. H&B also furnishes tv signals to its own and other systems by means of microwave relay.

Monthly rates to subscribers vary from $3.50 to $7. Connection charges are $9.95 to $141. Most H&B subscribers receive five channels, though systems vary from three to seven channels.

The company showed gross operating income on its catv holdings of $1,312,987 for the nine months ending April 30, 1961, but showed net loss of $89,856. H&B stock is listed on the American Stock Exchange; it has shown a high of 64% and a low of 14% in the first half of 1961.

Corporate officers and directors own 16% of the outstanding stock. David E. Bright is board chairman and president.
KALEIDOSCOPIC! Dixieland jazz, Picasso, glass blowing, photojournalism, set design, modern music—"Montage" has many faces. The range of subjects covered on this weekly public affairs program is inexhaustible, as "Montage" takes its viewers on expertly-guided tours of the fascinating world of the arts...with particular attention to the local scene. Sometimes startling, always entertaining, during its three years on the air "Montage" has won two annual awards from the Ohio State University Institute for Education by Radio-Television. Too, the series has won a devoted following among St. Louis audiences, who month after month, year after year, find their favorite television programs—information and entertainment—on CBS Owned KMOX-TV CHANNEL 4, ST. LOUIS
KSET goes into publishing business

KSET El Paso, Tex., may be forgiven if it cares to boast about the extent of its coverage. The station has gone into the newspaper business with the establishment of its own publishing company.

The publishing business, too, has brought with it changes in KSET's rate card, which now lists a column for space rates. Available to KSET advertisers, too, is a package plan whereby they can get newspaper space in addition to radio time for a single price.

Currently KSET (the Sun Publishing Co.) prints the international El Correo, distributed in El Paso and Juarez, and one (El Sol) of five suburban shoppers it plans to have in operation soon.

Media reports...

13 for Mutual • Nineteen new affiliates have joined Mutual, according to MBS stations vice president Charles W. Godwin. New affiliates are: WIVY Jacksonville, Fla.; WSTN St. Augustine, Fla.; WKID Champaign-Urbana, III.; KJUD St. Johns, Mich.; KDET Center, Tex.; KMIN Grants, N. M.; KYOR Blythe, KPRO Riverside, KROP Brawley and KREO Indio-Palm Springs, all in California, and KVNI Coeur D'Alene, KWAL Wallace and KSPT Sandpoint, all in Idaho.

Edison awards • Nominations are open for the Thomas Alva Edison Foundation National Radio & Television Station Awards for Serving Youth in 1961. The awards give recognition to a local radio and tv station which have distinguished records of program service to youth. Each winning station receives an Edison scroll, and a $1,000 scholarship award to an outstanding local high school senior. Nominations are made by national civic organizations cooperating with the Edison Foundation.

Negro programming • WWRL New York effective Monday, Oct. 2, will devote its full 24-hour broadcast day, Monday through Friday, to serve Negro audiences in metropolitan New York and New Jersey. Weekend programming will continue to serve Spanish, German, Czechoslovakian and Greek speaking New Yorkers.

Radiothon • Thanks to the financial efforts of KORL Honolulu, the Hawaiian Little League team was able to participate in the Little League World Series at Williamsport, Pa. J. Akuhead Pupule started a radiothon on his early morning program, reaching the goal of $5,000, four hours later.

Colorcasting • KRTV (TV) Denver, an ABC-TV affiliate, will begin telecasting in color today, Sept. 11, says president and owner, John C. Mullins. In addition to a six-night-a-week schedule of color movies, much local programming and extensive use of color on local commercials is planned. The station's color equipment is estimated at $100,000.

Editorizing award • C. E. Peacoek, news director of WWGP Sanford, N. C., was presented with a resolution which was unanimously passed by the Lee County board of commissioners. The citation praised him and the station for displaying a high degree of civic responsibility and initiative by presenting constructive criticism of issues facing the people through the use of on-air editorializing.

Award • WTTG (TV) Washington has been named winner of the Mass Media Award by the 10 Washington area chapters of the American Assn. of University Women for its Shakespearean series, An Age of Kings. It was the first time since the award was established in 1952 that a series not locally produced was judged the winner.

Scholarship • The Maryland-D.C. Broadcasters Assn. has established a $500 scholarship at American U., Washington, D. C., for a student to be selected on the basis of scholastic rating, interest in broadcasting and need. The announcement was made by Mrs. Virginia F. Pate, WASA Havre de Grace, Md., chairman of the group's education committee.

Station on wheels • WWLP (TV) Springfield, Mass., has acquired a new mobile tv and video tape cruiser which it calls "a tv station on wheels." Built at a cost of $125,000, the new mobile unit is equipped with three tv cameras, portable video tape equipment, an audio and microwave relay, a 100-foot portable tower, lighting and audio equipment.

Advertisers honored • WBAL-TV Baltimore, in a continuing effort to increase the quality of its programming, has awarded 18 special citations to advertisers who have sponsored information, educational, cultural, religious and other programs which it feels serve the interests of the community.

Seven Sisters fund • WIP Philadelphia has raised $5,270.41 for its "Seven Sisters" fund. The money will go to the seven Schaefer girls, whose mother died in childbirth and whose father was killed recently in an automobile accident.

It's official now: Wasilewski, exec vp

Vincent T. Wasilewski, 39, was named executive vice president of NAB last week. The announcement, widely reported earlier (BROADCASTING, Aug. 14, 28), was officially made by NAB President LeRoy Collins last Thursday.

At same time Gov. Collins announced the appointment of Robert D. Swezey as director of Tc Code Authority (see page 66).

Now vice president in charge of government affairs, Mr. Wasilewski has been with the NAB for 12 years. He was graduated from the U. of Illinois and joined NAB's legal staff in 1949. He became chief counsel in 1953, government relations manager in 1955 and vice president last year. He holds a B.S. degree in political science and a Doctor of Jurisprudence degree. He is a member of the American Bar Assn., American Judicature Society and

Swezey: The codes are affirmative, not negative

Robert D. Swezey, whose broadcast roots go back to the old Blue Network, is the new director of the NAB Code Authority—and he's got some ideas that he hopes may improve TV programming.

The new code director—named officially by NAB President LeRoy Collins last week but whose appointment had been reported for weeks before (BROADCASTING, Aug. 14)—feels that the NAB codes were established to accomplish an affirmative good, not just as a list of "shall nots."

And he ought to know what he's talking about. Mr. Swezey, 54, a pioneer broadcaster who joined NBC in 1939 and who was general counsel of the Blue Network when it split off from NBC in 1942, helped write an earlier version of the radio code and the TV code. He was chairman of the NAB committees which drafted the two codes—the revised radio code at Atlantic City in 1947 and the TV code in Washington in 1952.

"The first thing I'm going to do," he said last week, "is to familiarize myself with all the details of the codes. After all a lot has happened since they were inaugurated, and I've been way from broadcasting for the last two years."

Mr. Swezey was executive vice president and general manager of the Mutual Broadcasting System in the post World War II days. From 1948 to 1960 he was executive vice president, general manager and part owner of WDSU-AM-TV New Orleans. He served as a special assistant to Secretary of Labor James P. Mitchell during the last year of the Eisenhower administration. At present he is a consultant and a director of a helicopter company.

"After he reads all the code material, he explained, including minutes of the code review boards, he plans to meet individually with each member of the code staff. "After that," he said, "we'll have our big staff meeting and get to work."

The TV code staff at present numbers seven: Edward H. Bronson is director of Washington headquarters, with Harry Ward as assistant director and Peter Friend in charge of monitoring; Stockton Helffrich is director of the New York code office, with Warren Braren as assistant director; Frank Morris is assistant director in Los Angeles, with Jim Gillis as executive assistant. E. K. Hartenbower, KCBO-TV Kansas City, is chairman of the TV Code Review Board.

The radio code, revised last year, is under the direction of Charles M. Stone, stationed in Washington. Cliff Gill, KEZY Anaheim, Calif., is chairman of the Radio Code Review Board.

In discussing his philosophy, Mr. Swezey begged off being too concrete, because, as he said, "you've got to give me time to catch up."

His primary attitude, he explained, will be to try to make the code authority an affirmative structure, "not just against things."

"So many of the 'problems' are relatively minor. We tend to get lost in trivia," he explained.

"Of course," he added, "there are a lot of practical problems. But these can be handled in the light of intelligent self-interest. For instance take this outcry about violence on children's programming. Nobody wants to contaminate a child's mind; maybe we can work with broadcasters and advertisers to put something better, something finer on for the youngsters. After all, this structure is in the codes now; children's programs should uplift as well as entertain."

This affirmative injunction is inherent throughout both codes, Mr. Swezey pointed out. It is his intention to try to approach code administration in this light, rather than in a negative way.

"Don't misunderstand me," he warned, "we're going to move slowly. We're going to try to find out precisely where the problems are. How bad is it? If there are bad spots (and no one can deny there are some) we're going to find out where it is wrong."

"I don't want to sound like an apologist for the industry, but we've got to consider that TV is one of the mass media. After all, how good are the movies today? Newspapers? Not very, to be honest about it."

Mr. Swezey is a graduate of Harvard U. and its law school. He was an NAB board member and chairman of the TV board during his years in the industry.

His contract with NAB is for two years. Although his salary was not disclosed, it's understood to rank second to Gov. Collins. The NAB president gets $75,000 a year plus an expense allowance. Mr. Swezey will report directly to Gov. Collins. The five-man code review boards will act on appeals. They will also recommend changes in the codes.

The new code director will assume his NAB office Oct. 15. He hopes to attend the NAB regional meetings in Salt Lake City and San Francisco.

In announcing the appointment, Gov. Collins said:

"We are particularly fortunate to obtain the services of Mr. Swezey. Nothing is more important to the future of broadcasting than a strong and effective self-regulating code operation, and I am confident he will bring to this new office his competence, dedication and recognition which will enable it to achieve that stronger and more effective status."

the Federal Communications Bar Assn. He is an Air Force veteran of World War II.

Mr. Wasilewski will serve as chief administrative officer under Gov. Collins and will be his adviser on all matters and will act for the president in Gov. Collins' absence.

Gov. Collins said, in announcing the appointment:

... I am proud to have Mr. Wasilewski as our executive officer. His knowledge of the headquarters staff and his dedication in the work of NAB is outstanding. His conspicuous competence in the area of government relations, his intimate understanding of the broad range of practical problems confronting broadcasters, his fine leadership qualities—all will prove especially helpful in our future work."

66 (THE MEDIA) BROADCASTING, September 11, 1961
PBC is proud to be in Broadcasting

Broadcasting is the industry that in one evening brought Shakespeare to more people than had ever before participated in this experience. Broadcasting has often made a magnificent contribution in the areas of public discussion, and personalities from all over the world have been brought to its microphones and cameras. This is the industry that presents great orchestras, fine plays, great entertainment, play-by-play accounts of exciting athletic contests, outstanding news events the moment they happen, invaluable assistance in emergencies, and a thousand other programs which are enlightening, desirable, and which offer new hope amidst the sometimes tawdry and cheap aspects of American life.

Broadcasting is an industry with great power and potential for good. (Taken from comments by Herbert E. Evans, President, Peoples Broadcasting Corporation, to Federal Communications Commission.)

Indoctrination seminar for the sales staff of the new National Sales Division of RKO General Inc. was addressed by an array of speakers that included Thomas F. O'Neil (above), board chairman of General Tire & Rubber Co. (BROADCASTING, Aug. 28).

The new unit, which goes into operation Oct. 1, will be national sales representative for the RKO-General owned stations that include WOR-AM-FM-TV New York, WNAC-AM-TV and WRKO (FM) Boston, KJH-AM-FM-TV Los Angeles, CKLW-AM-TV Windsor-Detroit, WHBQ-AM-TV Memphis, KFRC-AM-FM San Francisco, WGM-AM-FM Washington and the Yankee Network.

RADIO NEWS

L. A. study shows constant service

“There are but a few fleeting periods of not more than a few minutes when news is not available to radio listeners in Los Angeles County,” So states Ernest Kreiling in an analysis of the news and public affairs programming of the county’s 24 am radio stations prepared as a thesis in the Dept. of Telecommunications of the U. of Southern California.

On the average, these stations devote one-eighth of their time between 6 a.m. and midnight to news and public affairs programming, Mr. Kreiling reports. During the daytime hours, the five- and 10-minute periods without news are between 15 and 25 minutes after the hour, 25 to 15 minutes before the hour and 15 to five minutes before the hour. At most other times, news is available from a number of stations and at 5 and at 6 p.m. listeners can choose among 13 stations for news. The frequency and length of newscasts diminish after 7 p.m. “It remains for the listeners to determine for themselves whether this represents too little news, too much or just enough,” he comments.

Public affairs programming represents only 1.3% of the 6 a.m.-midnight time during the week, in contrast to the 12.2% devoted to news and is distributed 64.2% weekdays, 35.8% weekends, a smaller concentration on weekends than might have been anticipated. The public affairs weekday programming comes mostly from KNX, CBS-owned Los Angeles station whose schedule includes Story Line, several hours of public affairs programming each afternoon, and KFJ, independent station programmed for Negro listeners, which carries more than the average of this type of program. KGBS, also above average, airs most of its public affairs programming on weekends.

There is wide variation in the amount of time devoted to news and public affairs programming by the Los Angeles stations, Mr. Kreiling reports. The three network stations allocate an average of 25.3% of their schedules to news, versus 10.1% for the independents, and 3.0% to public affairs, versus 1.1% for the non-network stations. The more powerful stations tend to devote more time to news and public affairs than the medium or low-powered stations, with individual variations within each group. Overall, 17 of the 24 stations fall below the average, which achieves its level largely through the network outlets and through KGBS, KFJ, KFOX and KLAC.
REPORTED THE TRADE PRESS IN MARCH 1959: "A new working tool to make spot announcement handling as simple as push-button technology will permit." The attention was focused on the new Gates Spot Tape Recorder, soon to be called the greatest boon to broadcasters since the invention of the microphone. Now, two years later, more than 500 stations from coast to coast have one or more Spot Tape Recorders in operation. Just look at the application: On one tape 13" wide are 101 announcements up to 90 seconds duration each. You simply move the index lever to the spot your log calls for, push the play button and let Spot Tape do the rest, including automatic rewind and perfect cue for split-second airing of the next spot. Let us tell you more about the exclusive Gates Spot Tape Recorder. Write today for Brochure No. 73 – yours for the asking.
JACKSONVILLE CH. 12 CASE

Reopened to find if there were any off-the-record contacts with commissioners in original grant

Testimony in the FCC's reopened inquiry into whether its original grant of ch. 12 Jacksonville, Fla., had been influenced by off-the-record contacts with commissioners made the case "curiouser and curiouser" as Alice In Wonderland put it.

For example, a partner in a Jacksonville engineering firm gave a Jacksonville city commissioner $5,000 to pay a Tampa lawyer for services in gaining a grant for the city, one of the applicants for the channel. Yet the commissioner claimed he had never engaged that lawyer's services and has never reimbursed the engineer for the $5,000. So testified J. Dillon Kennedy, city commissioner in charge of utilities and the city's radio station WIAJ.

The lawyer, Miles H. Draper, said the $5,000 fee was "to neutralize any political influence" exercised by one of the competing parties, Jacksonville Broadcasting Co. Mr. Draper said he had found no such influence. He roundly denied the suggestion of FCC Counsel Hilbur Slosberg that the $5,000 fee was paid so that he would exert influence on his friends at the FCC, notably former Commissioner Richard A. Mack, whom Mr. Draper referred to as "an old friend." Mr. Draper said he gave roughly half the fee to Harlan L. Kays Jr., a Washington, D.C., associate, for keeping him apprised of any developments in the case. When Mr. Slosberg asked if Mr. Draper couldn't have gotten the same information free from the FCC secretary's office, Mr. Draper said he probably could have. When asked if he preferred to pay Mr. Kays $2,500 for the service, Mr. Draper said he did.

Mr. Draper testified that he had discussed his testimony with Mr. Kays, slated to be a Friday witness, on Thursday. He said he told the Washington lawyer that FCC counsel was trying to learn why they were paid such a large fee for so little work. He volunteered: "You must understand that for a person to be able to walk into certain offices in the city of Washington, there are years of activity," and "not everyone can do this" and be well received and gain information.

Mrs. Annette E. Hutterly, chief of the FCC Minutes Div., testified to the agency history of the case. The hearing examiner's initial decision, issued April 4, 1955, favored Jacksonville Broadcasting Corp. Oral argument was held in February 1956 and on Aug. 29, 1956, the commission voted to grant the channel to Florida-Georgia Television Co. The vote: Commissioners Hyde, Mack, Lee and Doerfer voted to grant the channel to Florida-Georgia; Commissioner Craven abstained, and Commissioner Bartley and Chairman McConnaughey voted for Jacksonville Broadcasting.

Another Old Friend • One of the issues before Chief Hearing Examiner James D. Cunningham is to determine whether any commissioner voted on the original grant who should have disqualified himself. Francis P. Conroy, a Jacksonville lawyer unconnected with any applicant, said he had been a friend of Commissioner Mack since high school days. Mr. Mack called him to ask his opinion of the three applicants before the final decision, Mr. Conroy said, but he was unable to give him any information. Mr. Conroy told Commissioner Mack he knew principals of two of the applicants, Florida-Georgia TV and Jacksonville Broadcasting Corp., and that those companies had the reputation of being financially sound.

Mr. Kennedy, Jacksonville city commissioner, testified that he had told Mr. Draper he was "interested" in whether political influence was a factor in getting an FCC grant. He also told Mr. Draper of his interest in the city of Jacksonville getting ch. 12 in February 1955, Mr. Kennedy said. (An attorney representing the city at the hearing announced that Jacksonville no longer wished to be an applicant and was participating in the hearing at the request of the FCC.)

Mr. Kennedy claimed that at no time did he ask Mr. Draper to take any action in behalf of the city of the FCC and that when Mr. Draper billed him for $5,000 for services it came as a total surprise and that he had no idea why the fee was charged.

Mr. Kennedy said he did not answer Mr. Draper's request for $5,000 but went to "my best friend" George B. Hills, of the engineering firm representing Jacksonville's application, for advice. Mr. Hills advised Mr. Kennedy to pay and said he would put up the money, Mr. Kennedy testified. Examiner Cunningham asked Mr. Kennedy if Mr. Hills had been reimbursed; Mr. Kennedy said no and explained Mr. Hills had given the money to him as a gesture of friendship.

"Favorable & Sympathetic" • Mr. Draper gave the engineering firm receipts for the $5,000 and sent a letter explaining that his fee was "in no way contingent on the result." Mr. Draper was paid after the decision which denied the city of Jacksonville. The lawyer's letter said, "We created a favorable and sympathetic response, but there was one factor which we were unable to overcome which I can only relate to you in person and not in a letter. We thought, for a time, we had overcome this factor but apparently we had not."

Questioned by Mr. Slosberg, Mr. Draper said the "favorable and sympathetic response" was created with the lawyer's friends at the White House and the Republican National Committee, not at the FCC. He said he had ascertained from Republican National Chairman Leonard Hall that tv grants were not influenced by politics and that no Jacksonville applicant had approached the committee. He said he got similar information from sources in the White House which he did not specify.

Mr. Draper said the "factor we were unable to overcome was an FCC policy, against granting licenses to municipalities because management was liable to change on the outcome of elec-

OLD NEW ORLEANS FAVORITE

1 lb. Lump Crabmeat
1 lb. Cooked Shrimp
1 lb. Cooked Lobster Meat
1/2 cup Chopped Shallots
1/2 cup Chopped Mushrooms
1/2 lb. Butter
2 cups White Wine
1 cup Cream
4 Egg Yolks
Cognac

Favorite Pancake Recipe

Saute' shellfish ingredients with 1/4 lb. butter for five minutes. Saute' shallots and mushrooms with 1/4 lb. of butter until shallots are soft, then add white wine and cook for five minutes. Add to this mixture cream and cook until simmer. Remove from fire and add egg yolks. Flambe-baste shellfish mixture with cognac and combine 1/2 of shallots and mushroom sauce. Prepare 12 crepes (use favorite pancake recipe and thin slightly) and fill each with shellfish mixture, roll, and serve at once covered with remaining sauce. Superb serving for six.

Prepared at Masson's Beach House by Chef de Cuisine Ernest Masson

WWL-TV... new New Orleans Favorite

ENTERTAINMENT PLUS is the key to New Orleans television... and the ENTERTAINMENT PLUS station in New Orleans is WWL-TV.

Here are two outstanding SHOWS, each a PLUS, presented on WWL-TV. Each day of the week Hap Glaudi, the premiere sports authority in New Orleans, brings to sports fans throughout the WWL-TV viewing area sports reporting in depth. His highlights of the latest sports events and hard-hitting opinions about the sporting world grab the attention of every viewer.

Another ENTERTAINMENT PLUS feature of WWL-TV is its wonderful 6 p.m. programming. 6 p.m. on WWL-TV Monday through Friday means the most exciting series of programs in town. • Yancy Derringer on Monday continues to merit one of the strongest ratings in the area. • Tuesday finds the population watching Official Detective. • This Navy town watches Silent Service on Wednesday. • Arthur Jones, local big game hunter, presents his highly-rated Wild Cargo program each Thursday. • Last, but not least, is Man Without A Gun seen on Friday.

These are but a few of the ENTERTAINMENT PLUS FEATURES on WWL-TV. Get the complete story from Katz, and then sell your product on the ENTERTAINMENT PLUS station in New Orleans.

WWL-TV

NEW ORLEANS

Represented Nationally by Katz

BROADCASTING, September 11, 1961
his Washington associate Mr. Kays to Commissioner Rosel H. Hyde and had attempted to introduce him to Commissioner Mack. He said he had not instructed Mr. Kays to approach either commissioner on the merits of the Jacksonville case.

Mr. Draper’s testimony conflicted with that of Mr. Kennedy on whether the latter had retained the lawyer to perform services on behalf of the city of Jacksonville’s tv application. Mr. Draper held there had been a definite commitment for him to look into “political influence” by other applicants in exchange for $5,000. He said Mr. Kennedy had met him at the Jacksonville depot in September 1955, told him to “go ahead” in behalf of the city’s application and promised him $2,500 the following month, the balance by year’s end.

According to testimony by both Mr. Draper and Mr. Kennedy, the city commissioners paid the lawyer $2,500 cash in March 1956, the money supplied by Mr. Hills, after several requests for payment by Mr. Draper. The Hills firm gave Mr. Draper a check for $2,500 in October 1956. Receipts for both payments were sent by Mr. Draper to the engineering firm.

National Airlines seeks Supreme Court stay

National Airlines last week asked the U. S. Supreme Court to stay the FCC’s order voiding its license for ch. 10 Miami and the request was immediately opposed by L. B. Wilson Inc., holder of an FCC permit to substitute for the present ch. 10 cp.

The request to the Supreme Court was filed by National Airlines after the U. S. Court of Appeals for the District of Columbia on Sept. 1 denied a request for a stay. This order was issued without a decision. The same court last July upheld the FCC’s ruling voiding the 1957 grant of ch. 10 to National Airlines’ subsidiary, Public Service Television Inc., and disqualifying all applicants except L. B. Wilson Inc. because they engaged in off-record talks with FCC commissioners. The commission, in issuing the new grant to L. B. Wilson Inc., specified that its first license term would be for four months. National Airlines has asked the Supreme Court to review this appeals court decision.

Pending a ruling on the stay request by a Supreme Court justice (the court is now in recess, but a single justice is available to act on motions and petitions), the FCC does not plan to act, it was ascertained. If the Supreme Court denies the stay, it is presumed the commission will then order National Airlines’ WPST-TV Miami off the air so that L. B. Wilson can commence broadcasting. It is assumed that National Airlines will be given a couple of weeks grace. L. B. Wilson Inc. has built its station and is prepared to begin operating immediately after it receives the green light from the FCC.

FCC’s plan could stunt fm growth—WHFS (FM)

The FCC’s plan to revamp the fm spectrum may bring about the end of fm’s growth. WHFS (FM) Bethesda, Md., cautioned in comments on that rulemaking (Broadcasting, July 3).

The station offered a counterproposal which would establish different fm station classifications and new mileage separation standards. WHFS feels the FCC separation standards are unnecessarily high and will prevent the authorization of more than a few new stations except in sparsely populated areas. The station said its plan would clear up the existing cases of interference and, at the same time, expand coverage to areas now underserved. The WHFS plan specifies frequencies and power to be authorized in each classification of fm station.

Commenting on the same FCC proposal, Jampro Antenna Co. submitted an engineering statement favoring the use of directional fm antennas in certain applications.
A Word* About the Duluth-Superior Market

or the Superior-Duluth Market, as the Case May Be, and It Is;
or WMT's First Cousin Sounds Off.**

As the westermost terminus of the Great Lakes—St. Lawrence Seaway shipping route, Duluth-Superior is a major international market and port now in the midst of prosperous activity expected (even by non-WBC'ers) to continue. This is hardly calculated to cause dancing in the streets of Manhattan, Chicago, and other hip megalopolises but it thrills us to the depths of our southermost terminus. We figure a little of the thrill may rub off on time buyers.

One Sieur DuLhut built a trading post hereabouts in 1678; people came to enjoy pelt pelf, scenery and skiing; before you knew it they were listening to WABC. Meanwhile iron ore from the Mesabi flowed east, coal flowed west; grain flowed in all directions; the military built; flour mills bloomed; drydocks, paper mills and timber grew. We looked up one day and there was a $52 million weekly industrial payroll, which is nicer to meet coming than going.

We never did understand how they count these things, but there are 294 wholesale establishments hereabouts doing more than $312 million worth of business a year. The farm market is responsible for another $97½ million. When it gets down to big numbers, though, we shine in the grain dept. During the Seaway's first season over 86 million tons of grain were exported.

We're the second market in Minnesota (those other Twins top us). Cross the river and we're the second market in Wisconsin (Milwaukee, you know). Makes us kind of proud: second in two different states. Not many metro markets can make that claim, especially on Lake Superior.

No advt. of this type would be complete without a few ratings pratings. We have the largest share of audience (Pulse, Nov, '60) weekday mornings, weekday afternoons, weekday average, and Sunday afternoon. Weekday evenings? Tied for first.

We became WMT's cousin recently, thanks to the exchange of some stuff you put on the tambourine, and the approval of the FCC. As far as we know it hasn't had any bad effects, and we think it looks nice in our sig.

SOME ANSWERS FOR DODD

Juvenile Delinquency subcommittee subpoenas
Kintner, Levy for special executive session

Robert E. Kintner, NBC president, and David Levy, the network's former vice president for television programming, were summoned to Washington under subpoena last week to testify in closed-door hearings before the Senate Juvenile Delinquency Subcommittee.

Subcommittee Chairman Thomas Dodd (D-Conn.) said the executive sessions were held "in the interest of fairness," in an effort "to get all the facts." It was the first time the subcommittee had gone behind closed doors since June when it began its current inquiry into the effect of television crime and violence on juvenile delinquency.

Mr. Kintner, who testified on Thursday, referred all questions about his testimony to Sen. Dodd. Mr. Levy, who was reassigned to other duties from his position as TV network vice president in July (Broadcasting, July 10), appeared on Wednesday. He could not be reached for comment.

Sen. Dodd declined to shed much light on the proceedings. But, in answer to a question, he said it was "reasonable to assume" the subcommittee was pursuing questions raised by the testimony of previous witnesses who had mentioned the NBC executives.

Tors' Testimony • Ivan Tors, a Ziv-US producer, mentioned both men in telling the subcommittee, on June 8, of what he said were NBC's efforts to inject more sex and violence in the Man and the Challenge series he produced for the network two years ago.

Mr. Tors said he was informed that Mr. Levy wanted more sex and violence in the program, and that Mr. Levy was receiving his instructions from Mr. Kintner. This information was passed on by Joseph Daley, of Doyle, Dane, Bernbach, which represented one of the sponsors, Mr. Tors said.

Messrs. Kintner and Levy were also mentioned in various memoranda dealing with Challenge, which were read into the record on July 28. In a May 19, 1959 memo from Ziv-UA executive Joseph W. Bailey to John L. Sinn, company president, the term "Kintner edict" is used. Sen. Dodd at the time defined this as a call for more sex and violence.

The memo also observed that "without further word from Dave Levy we cannot ignore what has been told to us with respect to the injection of sex and violence into the series."

In another memo, Richard Dorso of Ziv-UA wrote Mr. Levy that "the two major story facets to be stressed in the new concept of Challenge are sex and violence." Sen. Dodd said at the hearing the memo was a confirmation of a prior conversation between the two men.

After the subcommittee's session with Mr. Kintner, Sen. Dodd said there will be more closed-door hearings, which "would probably" be followed by open hearings.

The subcommittee had intended to hold public hearings last week. But before any witness list was announced, plans were changed and the subcommittee went into the closed sessions, which were not previously announced.

KWK revocation hearing opens today

A formal hearing in the FCC's license revocation action against KWK St. Louis begins today (Monday) in that city at the U. S. Court House and Custom House before Hearing Examiner Forrest L. McClennning.

The commission has challenged KWK Radio Inc.'s qualifications as a licensee because of alleged fraudulent contests (Broadcasting, Nov. 7, 1960). At issue are the conduct of station "treasure hunts" and "Bonus Club" contests. Complaints from KWK listeners made it appear that KWK was "perpetrating a fraud on its listeners," the FCC charged in its revocation order.

Thomas Fitzpatrick, assistant chief of the FCC hearing division who is trying the KWK case for the government, said the first witness will be a representative of the St. Louis Better Business Bureau. He is expected to testify that the BBB local publication had warned its readers about troubles KWK vacation contest winners had had with the airline involved. Also, the FCC plans to call at least two women contest winners to recount their personal difficulties.

Other witnesses for the government will include four women whose names were called on the KWK Bonus Club contest and who were unable to contact the station within a required one minute because the KWK telephone was busy. Other witnesses will include KWK officers and personnel and an official of the airline. The FCC and KWK have agreed upon a stipulation of facts on the conduct of the Bonus Club contest which will be made a part of the record.

There is a possibility the hearing will be recessed after the FCC presents its case to allow KWK attorney Robert Booth time to complete the defense. Mr. Booth fought several unsuccessful procedural battles with the commission.
RCA TV Microwave Spans 136 Miles in a Single Hop!

New TVM-1B Equipment Carries TV Signals
Over Great Salt Lake To KID-TV, Idaho Falls

Engineered by RCA specialists, this single-hop Microwave system transmits TV programs from a 9000-ft. mountain peak near Salt Lake City...traveling across the length of Great Salt Lake, and through a mountain pass to the receiving point in Idaho, 136 miles away. From there the programs are distributed via another RCA Microwave link, 89 miles long, to station KID-TV in Idaho Falls.

"We're getting the kind of superior performance and reliability that one might expect from short-hop studio-to-transmitter links," reports Carroll Secrist, KID-TV Chief Engineer. "The new TVM-1B equipment has been in operation since January 1961. A series of measurements recently made indicate: video signal-to-noise ratio (PP/RMS) ... 64db; audio signal-to-noise ratio ... greater than 65db. Propagational reliability, conservatively estimated at 99.9 percent, is approaching 99.99 percent."

RCA's new TVM-1B Microwave Relay equipment is designed for maximum performance with reliability and economy in transmission of television programs in black-and-white and color. This superiority of performance and reliability is being proved daily in over 700 TVM systems now in use.

A new RCA TVM-1B Microwave system for your installation may be counted on to accomplish impressive results. Be sure to consult your RCA representative on your microwave plans. Or write to RCA, Broadcast and Television Equipment, Department ZB-22, Building 15-5, Camden, N. J.

seeking a bill of particulars and has been promised time to prepare his case if the commission counsel springs any "surprises."

KWK is owned by A. M. Spleeris, president, and associates. They purchased the station in 1958 and also own WEMP-AM-FM Milwaukee.

**TEXAS TAX PROBLEMS**

**Law exempts tv tape, film but would tax radio tapes**

The Texas Assn. of Broadcasters is seeking to get state officials to equalize sales tax provisions so that radio and TV are treated alike. TAB officials have asked the state comptroller to issue a ruling bringing radio broadcast tapes under the same ruling as television film, and the state attorney general to rule similarly. Failing this, Texas broadcasters plan to ask the legislature to amend the law.

The difference on payment of the sales tax between TV film or video tape and aural tape arises, TAB reported last week to its members, because the tax statute specifically exempted film and video tape.

This was discussed Aug. 31 by a group of TAB broadcasters and Robert S. Calvert, state comptroller.

In the broadcasters’ group were Jim Hairgrove, president of TAB (KBRZ Freeport), Bonner McLane, TAB executive secretary; Bill Deason, KVET Austin, J. C. Kellam, KTBC-AM-TV Austin and attorney Ed Clark; Clyde Rembert, KRLD-AM-FM-TV Dallas and attorney Bob Clark, and TAB legal counsel Larry Jones.

In its report, TAB made these observations following the conference with the state tax officials:

For Television *“1. There is no tax on your time sales; this is part of your service to the customer; 2. leased films and film shows will be taxed, but this tax is specifically set up to be paid by the lessor companies and is specifically banned from being passed on to you; 3. all raw film and/or video tapes purchased by you will be taxed to you by your supplier since you, under this law, are the ultimate consumer; 4. you may not pass on the tax to your customers under §3 above; 5. film and/or video tapes made for a customer where he, the customer, retains ownership—as in the case of a political candidate who has a series of commercials made by your station for his use on other stations—must be handled in one of two ways: a. if you break down your charges to him into services and film and/or video-tape cost, you must tax him for the film and/or video-tape materials charge you made; b. if you make a lump-sum charge to him and list it simply as film service production or some other similar ‘service’ charge, you do not have to charge the tax since you are performing a service, the bulk of which is due to your manpower and equipment, with the film and/or video tape representing only a minute portion of your charge; and also you have paid tax on it as the consumer.”*

6. Where you do charge the sales tax to a buyer (example: a customer who wants a film print of his commercial to take with him and you charge him, breaking down the charge into film and service costs), you are allowed to tax the buyer, and this difference between what he, the buyer, pays and what tax you paid for the film originally, must then be reported and paid to the state; on the forms to be provided from the comptroller’s office there will be a specific place for such credits to be listed and credited against your tax; basis for this reasoning is that the same item cannot be taxed twice under this law.”

For Radio *“1. All raw audio-tape purchased by you must have a sales tax charged to you and paid by you which cannot be passed on direct to the customer; 2. music libraries and other such rental-lease arrangements will be taxed on a “usage” basis—and you, the station, will have to pay the 2% tax on the monthly fee charged to you; 3. the same ruling on audio tapes resold to outsiders applies as in numbers 5 and 6 under television.”

For Both *“All equipment purchases from tubers to consoles will be taxed, and this tax will be charged to you by your supplier.”*

**Landis resigns**

James M. Landis, President Kennedy’s adviser on regulatory agencies and an acknowledged draftsman of the White House’s reorganization bills {the FCC’s was defeated by the Congress}, resigned as of Sept. 1, it became known last week. The White House announced his resignation at the same time Mr. Landis was named a co-respondent in a divorce suit filed by public relations consultant Joseph A. Todd. Mrs. Todd was Mr. Landis’ secretary at the White House.

**Medal for Kaye**

Five resolutions have been introduced in Congress—four in the House, one in the Senate—calling on the President to issue a gold medal to entertainer Danny Kaye for “the humanitarian work” he has performed for the United Nations Children’s Fund, including appearances on film and TV.

BROADCASTING, September 11, 1961
Uhf's urge reconsideration of drop-in plan

PETITIONS FIND FAULT WITH COMMISSIONS PROPOSAL

The have-nots (those who haven't vhf channels) were heard at the FCC last week in a dozen petitions for reconsideration of the FCC's announced plan to add vhf channels in 11 cities and delete single v's from eight interconnected markets (BROADCASTING, July 31).

The parties seeking a new audience had similar petitions denied when the commission announced the cities it planned to deintermix and add additional v's. In so doing, the commission had announced criteria it considered for cities meeting vhf drop-in requirements and last week's petitioners felt they were better qualified than the "haves."

Most unique of the petitions was that of ch. 67 WNOK-TV Columbia, which objected to FCC plans to delete ch. 10 (WIS-TV) from that market and make it all vhf (BROADCASTING, Sept. 4). WNOK-TV said that the better solution would be to add ch. 8 to Columbia instead of making the market all u. Such a move would comply with the FCC's announced criteria except that Columbia is not one of the nation's top 75 markets, WNOK-TV pointed out.

This criterion is "unlawful," WNOK-TV maintained, because the FCC failed to take into account the many factual and legally pertinent factors with respect to Columbia "which are at least as important as the unexplained and unjustified selections of communities on the basis of 'television economics' and ranking."

The commission ignored these facts, the uhf outlet said: (1) even if ch. 10 is shifted a u still cannot compete in Columbia because of 10 surrounding vhf signals; (2) the importance of Columbia as the state capital; (3) that it is the largest city in the state, and (4) a 1960 resolution by the state assembly asking that a second vhf be assigned to Columbia.

Cardinal Point • Ch. 49 WAKR-TV Akron, Ohio, charged that the FCC overlooked a "cardinal point" in dismissing the station's petition to assign ch. 12 there. Akron is "unique" among the top 75 markets in that it is the only city in that group which could utilize a vhf and meet all of the FCC's announced criteria, WAKR-TV said.

Of the top 75 markets, 62 have at least one vhf; five fail to meet the announced reduced mileage separations (120 mile co-channel, 40 mile adjacent), and in five others a vhf would have an adverse effect upon established u's, the petitioner said.

San Bernardino-Riverside, Calif., would conflict with international agreements and Canton, Ohio, has never had an operating uhf. Thus, WAKR-TV said, Akron is unique and should get ch. 12. The station said it has continued operations in spite of heavy losses because each year it hoped the FCC would recognize WAKR-TV's "inequitable allocation and rectify" the situation.

The following uhf stations or individuals also sought reconsideration of the FCC's denial of petitions which would:

• Assign ch. 8 to Milwaukee—requested by ch. 18 WXIX-TV. WXIX-TV said that limiting drop-ins to markets which have only two v's (Milwaukee has three operating, plus WXIX-TV) is gearing tv to a "three-network economy" which has failed to adequately meet the needs of the public.

• Add ch. 5 to Toledo, Ohio—requested by KUTV (TV) Salt Lake City which said it planned to apply for the vhf in Toledo. This would require shifting ch. 12 (WICU-TV) from Erie, Pa., which was proposed in the rulemaking, to Cleveland for ch. 5 (WEWS [TV]).

• Assign ch. 5 to Jackson, Miss.—requested by John M. McLendon.

• Shift ch. 11 from Alpena to Saginaw-Flint-Bay City, all Michigan—requested by Lake Huron Broadcasting Co., licensee of ch. 57 WNWX-TV Saginaw and ch. 11 WLPA (TV) Alpena.

• Assign ch. 3 to Portland, Me.—requested by Leon P. Gorman. Ch. 10 KLKF-TV Lafayette, La., objected to the proposed assignment of ch. 11 to Baton Rouge, La., at less than the normal adjacent channel separations. WVUE (TV) New Orleans, operating temporarily on ch. 13, asked for reconsideration of the FCC's failure to designate New Orleans as qualifying for a short separation. WVUE is the sole remaining applicant for ch. 12 there but has been able to find a transmitter site only 161.88 miles from ch. 12 WJTV (TV) Jackson.

The commission has finalized rulemaking adding ch. 13 to Grand Rapids, Mich., which requires ch. 13 WWTV (TV) Cadillac, Mich., to shift to ch. 9. WWTV said such a "severe modification" of its license should not be required if there is a possibility it is not necessary. If present mileage separations are not maintained, then WWTV said it would not have to shift to ch. 9 at an expense of $146,410. Thereafter, the station said, FCC should specify a site for the ch. 13 Grand Rapids operation.

The deadline for commenting on rulemaking which would delete single
"Well, we decided one thing, anyhow:
we include Charleston-Huntington and WSAZ-TELEVISION."

In the 72-county, 4-state Charleston-Huntington market, WSAZ-TELEVISION is the only television station seen everywhere. No other single television station even approaches this exclusive coverage. Reason? The market was created by WSAZ-TELEVISION, through its power and programming. Pick Charleston-Huntington and WSAZ-TELEVISION...reach two million people earning $4 billion a year in the heart of the "American Ruhr" region of the great Ohio Valley. Your Katz Agency man can tell you more about this newest Goodwill Station, and why it belongs on your must-buy list.

vhf channels from Madison, Wis.; Rockford, Ill.; Hartford, Conn.; Erie, Pa.; Binghamton, N. Y.; Champaign, Ill.; Columbia, S. C., and Montgomery, Ala., has been extended from Oct. 2 to Dec. 4 with replies due Jan. 8, 1962 (BROADCASTING, Sept. 4). And last week, the FCC made the same dates applicable for comments on companion rulemaking to drop-in vhfs in Oklahoma City, Jostown, Pa.; Baton Rouge; Dayton, Ohio; Jacksonville, Fla.; Birmingham, Ala.; Knoxville, Tenn., and Charlotte, N. C.

In another deintermixture hassle, William L. Putnam, owner of three New England uhf stations (WWLP TV Springfield, WRLP TV Greenfield and WWOR TV Worcester, all Massachusetts), charged that WTIC-TV ch. 3 Hartford, slated to be converted to uhf, "falsely reported" over its facilities that 250,000 people would lose tv service if ch. 3 is deleted. Mr. Putnam said he would present WWLP's financial statements at that time if Mr. DeWitt would reveal those of WTIC-TV.

Mr. Putnam said WTIC-TV replied that the offer was "unacceptable" and that WTIC-TV's only reference to deintermixture had been on a newscast, not an editorial. Mr. Putnam called this "irresponsible journalism" and wrote the FCC to suggest that such broadcasts might be grounds for disqualification of further WTIC-TV pleadings.

A WTIC-TV spokesman said a reply to Mr. Putnam's charges is being prepared.

Plans to ease program form drudgery

COMMENTS POUR IN TO FCC DESPITE NEW DEADLINES

Although the deadline for filing comments in the FCC's revised program reporting and logging rulemaking has been extended to Oct. 2 (BROADCASTING, Aug. 21), interested parties continued last week to submit their views early.

Station Representatives Assn. filed a 62-page document which painstakingly discussed each of the proposed questions and submitted proposed amendments applying the criteria of relevance, clarity and ease of execution for applicants. SRA said that it has attempted to show the commission that much duplication can be avoided, that several questions which yield information of only marginal utility to the FCC but which are extremely burdensome to the respondent can be deleted entirely.

"We make these proposals in the earnest belief that they will reduce the very heavy burden of the original questionnaire without sacrifice of information needed by the commission properly to discharge its responsibilities," SRA said. On an overall basis, the association said, it does not question the FCC's authority to ask for programming information which is reasonably related to the operation of a station in the public interest.

SRA said that the requirement that any announcement which refers to the name of any business must be classified as commercial is "unduly rigid." Data obtained from estimates of population, principal types of business and other area classifications will not serve a useful purpose and should be deleted, SRA said.

The Texas Assn. of Broadcasters joined SRA in a request that the FCC not exclude religious music from a religious programming classification as the proposed forms would do. Also, TAB said, station promotions actually are a public service and should not be catalogued as commercial spots.

Asking an applicant to compare its past vs. future programming places a burden on him which properly should rest with the FCC, the Texas association said. "We would like to suggest that the FCC, in keeping with its authority, attempt to help broadcasters better serve the public with fewer burdensome reports and details rather than continuing to increase the number of reports and unnecessary forms," the association stated in hitting as "almost impossible" some of the other questions.

Literal Restrictions • The Tennessee Assn. of Broadcasters said that the form, "would—through literal interpretation—restrict the broadcasters to an extent that would destroy much of the inspiration that has given the operators of radio and tv stations the initiative to provide the public with its finest hours of listening and viewing." The Tennesseee broadcasters expressed greatest concern over the requirements that stations properly serve minority interests and controversial issues. "More often than not minority interests are on the other end of the controversy—interest that may be infinitesimal in the eyes of the public at large," the broadcasters said.

Through the imposition of narrowly conceived forms, the FCC would impose rigid controls on programming amounting to government censorship, the Washington State Assn. of Broadcasters charged in comments filed last week. By threatening revocation, the commission can intimidate broadcasters to conform to government imposed standards of programming. WSAB continued.

KPST Preston, Idaho, as did the comments of the state associations, hit the companion logging requirements as a further drain on stations financially and a burden impossible for small stations to bear.

Celler sports bill okayed in subcommittee
BUT LITTLE CHANCE FOR FINAL ACTION THIS SESSION

The House Antitrust Subcommittee last week approved legislation that would validate the package television contract negotiated last spring by the National Football League and CBS-TV, and others like it. The NFL contract was voided by a federal court on antitrust grounds in July (BROADCASTING, July 24).

Approval of the bill came despite strong opposition from the Justice Dept. and the NAB (BROADCASTING, Sept. 4). But the subcommittee added a section in an effort to meet some of their objections.

The new provision would prohibit blackouts of pro football games except for agreements among the clubs and the network involved not to telecast another game into the home area of a team when it is playing at home.

The subcommittee adopted another amendment, requested by the National Collegiate Athletic Assn., to protect the gate at college football games. The amendment specifies that a package TV contract may not permit the telecasting of a pro game into a college town on those Saturday afternoons, during the regular football season, when the team is playing at home.

The bill, which applies to professional baseball, basketball and hockey, as well as football, was reintroduced, with the amendments, as a new bill (HR 9096) Thursday, by Subcommittee Chairman Emanuel Celler (D-N.Y.), original sponsor of the legislation.

Senate Bill Pending • A similar Senate bill (S 2427), introduced by Sen. Estes Kefauver (D-Tenn.), is now before the Senate Judiciary Committee. The chance of any sports TV legislation being enacted in this session, however, is diminishing, as Congress appears headed for adjournment within the next two weeks.

The subcommittee action followed a public appeal by ABC, which has a contract with the American Football League, for enactment of the Celler bill.

Thomas W. Moore, ABC vice president in charge of network programming, said the court decision voiding the NFL-CBS-TV pact endangers ABC's ability to maintain its agreement with the AFL.

He noted that NBC is now able to get back into the NFL TV picture, picking up the rights to two of the league's teams. CBS, reverting to last year's contract, will televise the games of 11 teams, while the remaining team, Cleveland, is tied up with Sports Network Inc. "We're hurt by the fact that NFL teams are once more in a two-station market," Mr. Moore said, "and our chances of successfully presenting the AFL games under such a situation are hurt. I don't believe that three games on television on a Sunday afternoon would be feasible, and that is what is happening in some areas."

Unless legislation is passed to enable the NFL to sign a package contract with CBS, he said, "our ability to pay and continue television of AFL games in 1962 is almost impossible." The league's eight members will get about $200,000 each from the network this year.

FCC sets new rulemaking on ch 2 Springfield

Following a mandate from the U. S. Court of Appeals in Washington, the FCC last week decided to institute a new rulemaking proceeding looking toward shifting ch. 2 from Springfield, Ill., to St. Louis. Comments are due Oct. 16.

Actually, ch. 2 has been in St. Louis since 1957 with former ch. 36 KTVI (TV) operating on the facility under special authorization. The shift and subsequent assignment of the uhf facility to KTVI were the subject of ex parte hearings both by the House Legislative Oversight Subcommittee and the FCC.

Following the re听得, the commission proposed to reopen the original rulemaking record to give interested parties an opportunity to reply to representations not made on the public record. In returning the case to the commission, however, the court ruled that this would not be sufficient and that the agency must start fresh with a brand new proceeding (BROADCASTING, July 31).

KTVI will be permitted to continue operating on ch. 2 in St. Louis during the pending rulemaking seeking a final disposition of the channel. It was shifted from Springfield in the very first group of deintermixture actions.

Still seeking ch. 2 for Springfield is Sangamon Valley Telecasting Corp., an original but losing applicant for the facility in the Illinois city. The winning applicant, WMAY Springfield, consented to the deletion and was assigned a uhf channel instead, which since has been deleted.

White House vetoes Hill satellite plea

The White House politely turned aside last week a suggestion from 35 congressmen that a decision on ownership and control of the U.S. communications satellite system be deferred until the system is fully operational.

A White House memorandum, sent to Rep. Emanuel Celler (D-N.Y.), said such a delay "is not possible" since "development of a fully operational system will probably require a decade or more."

Rep. Celler is the leader of a group of 31 House members and three senators who wrote the President last month urging the delay and recommending also that ownership of the system be opened to all communications carriers, domestic as well as international, and to equipment manufacturers (AT DEADLINE, Aug. 28).

The FCC, in accordance with a presidential policy statement, has set up an ad hoc committee of 10 international common carriers to develop a plan for private ownership of the satellite system.

The memorandum was sent to Rep. Celler by Lawrence F. O'Brien, special assistant to the President for congressional relations. In an accompanying letter, he said the congressmen's statement had been directed to executive department officials involved in communications satellite policy.

Although the memorandum said a decision on ownership could not be delayed until the system is operational, it agrees with the congressmen's view that a decision should not be made "at this time and that present commitments
Get the total WWJ STORY from your PGW Colonel
should not be allowed to delay the sys-
tem’s development.”

It also notes that the system is still in
the preliminary stages—“both as to tech-
nology and as to ownership.” And it adds
that if the ad hoc committee does not
device a satisfactory plan, “a differ-
ent approach will have to be taken.”

Meanwhile, the memorandum said,
the consultation with Congress, inter-
ested parties in this country and with
foreign nations, which has been under-
way, will continue.

TRANSLATOR COMMENT
Some are for, some against
proposed FCC rulemaking
Comments received by the FCC last
week were about evenly divided for
and against pending rulemaking which
would place rigid restrictions on the
use of vhf translators by tv stations to
extend their coverage area. Deadline
for comments has been extended from
this Friday (Sept. 15) to Oct. 20.

NAB, generally speaking, favored
the rulemaking but recommended that
a strict prohibition be included to pro-
hit a translator from duplicating the
programming of a second station al-
ready serving the same area. The
association said that the FCC should
require translator applicants to specify
their programming plans to make sure
no duplication would result. The only
justification for allowing translators in
areas already served by a tv station
would be to provide additional pro-
gramming choices, NAB said.

Multiple-station owners Westing-
house Broadcasting Co. and Triangle
Publications Inc. took an opposite view
from NAB. WBC said the rules would
be unfair to licensees in mountainous
terrain as opposed to stations in flat
terrain. Stations should be entitled to
make further capital investments to
overcome handicaps created by terrain
factors, Westinghouse said.

Triangle felt the proposed rules are
“unduly restrictive” and exceed the
limits needed to prevent misuse of vhf
translators owned by mother stations.
Duplication of existing stations should
not be a factor considered, Triangle
maintained, in granting translators so
that a station could fill in white areas
in its predicted coverage area.

The beach resort cities of Rehoboth
and Lewes, Del., said that stations
should be permitted to construct vhf
translators which would extend their
signals beyond the normal coverage
area. Rehoboth-Lewes pointed out that
WTOP-TV Washington has filed for a
vhf translator to serve the beach areas
and that this would be the best way for
the permanent and summer residents
to get satisfactory tv service.

Ch. 13 WLVA-TV Lynchburg, Va.,
also registered opposition to the pro-
posed rules which would prevent that
station from securing a vhf translator
to serve Roanoke with its ABC pro-
grams. WLVA-TV pointed out that a
natural mountain range shields Roa-
noke, which is within its normal cover-
age area, from its signal and that the
only solution is a vhf translator.

WORA-TV Mayaguez, P. R., in
favoring the proposal, charged that
WAPA-TV San Juan has “tried to . . .
corrupt the existing rules” through the
use of vhf translators. Uhf KMJ-TV
Fresno, Calif., KVOA-TV Tucson,
Ariz., and the Staunton, Va., Video
Corp. also favored the proposed rules.

Money not everything,
Tedescos tell FCC
Victor and Nicholas Tedesco last
week told the FCC that “trafficking”
consists of operating and trading in
stations with the sole aim of turning a
profit, without consideration of the pub-
lic interest. The brothers contended that
although they have bought and sold
several stations in the past 13 years,
they have always run them with com-
monwealth welfare as a paramount con-
consideration.

The Tedescos’ application to buy
WMIN Minneapolis from William F.
Johns was set for hearing in July by the
FCC on charges of possible trafficking
(BROADCASTING, July 31). As evidence
of their public service the Tedescos
attached to their pleading for FCC
grant-without-hearing some 100 letters
of gratitude from civic and charitable
organizations thanking Tedesco stations
for airing announcements and promot-
ing worthy causes.

Tedesco Inc, currently owns KWKY
Des Moines, WIXX New Richmond,
Wis., KFNF Shenandoah, Iowa and
KCUED Red Wing, Minn. (sale to a third
party is pending FCC approval). The
company also has applied to buy KBLO
Hot Springs, Ark., WREN Wisconsin
Rapids, Wis., and a new am station in
Chisholm, Wis.

FCC stands pat
on Florida ch. 6 case
Refusing to heed charges of “deliber-
ate submission of seriously misleading
information,” the FCC last week de-
clined to reopen the record or defer
final decision in the grant of ch. 6
Perriere-South Miami, Fla., to South
Florida Amusement Co. The charges
were made by Coral TV Corp., one of
the losing applicants (BROADCASTING,
May 8). On March 15, 1961, the
commission directed its staff to prepare
a document to make the South Florida
grant final.

Coral claimed South Florida had
deliberately concealed program logs of
WBUF-TV Buffalo, N. Y., a station
South Florida principals operated sev-
eral years ago.

Commissioner John S. Cross dis-
sented.

Rep. Gross criticizes
Pogo primer on tv
The Health, Education and Welfare
Dept.’s well-publicized Pogo’s Primer
for Parents (Tv Division) (BROAD-
CASTING, Aug. 28), drew a sour notice from
Rep. H. R. Gross (R-Iowa), on the
floor of the House. He called the pub-
lication, with illustrations and text by
cartoonist Walt Kelly, “idiotic.” If that’s
all HEW’s Children’s Bureau has to do,
Rep. Gross said, “it’s time for a house-
cleaning.”

The booklet was defended, however,
by Rep. Iris F. Bitch (D-Ga.), whose
district includes the great Okefenokee
Swamp (home to Pogo and his friends).
She said if Rep. Gross didn’t want the
50 copies of the booklet to which he
was entitled, she would be glad to have
them. And television producers, she
added, would be well advised to star
Pogo in a television program. They
“could create nothing so entertaining
and so good for the morals of young
and old as a Pogo program,” she said.
SPECIAL PULSE QUALITATIVE STUDY OF SAN DIEGO RADIO, SHOWS......

1. KFMB reaches more different adults daily than any other station.

2. KFMB’s audience listens more attentively, has more travel cards, credit cards and charge accounts.

3. KFMB is the adults’ first choice for news and for fuller details of bulletins and flashes.

4. KFMB would be chosen if San Diego adults could have only one station.

5. KFMB reaches both men and women equally, all income groups, all educational levels.

Ask your Petry man for the full brochure which shows why this great station moves more merchandise.

How Do You Measure Television?

On the bias, obviously. But whose? That of nose-counters who equate big numbers with stature? That of tv critics who prefer to kill audiences instead of bad guys? Or something in between?

One yardstick we suggest: the distance from a station to its community. Corinthian has always believed that local programming is the shortest distance to its viewers.

A look back at highlights of the past season's local affairs programming—*in prime time*—is informative: In Tulsa, a candid study of a local John Birch Society leader and a report on "Tornado Alley." In Houston, a look at emergency hospital procedures and a teenage spectacular. In Sacramento, Civil Defense and a full hour non-clinical approach to VD problems. In Indianapolis, a report on flood control and a study of Indiana highways. In Fort Wayne, the work of a school for the mentally retarded and a program with the Fort Wayne Philharmonic.

Enlightened sponsors are discovering the value of such programming—but, sponsored or not, Corinthian stations are continuing these local efforts on a monthly basis in prime evening time.

When the instrument is Corinthian television, twenty-one inches reaches from station to community—and from seller to buyer.
FCC LAXITY ON RACE NEWS CHARGED

Senate rackets investigators differ on FCC's duty

Senate rackets investigators, whose gambling inquiry has been making headlines, last week criticized the FCC's policy on the broadcasting of horse-race information.

But since the criticism was based on conflicting points of view, it probably won't help the commission revise its policy. Sen. John L. McClellan (D-Ark.), chairman of the Permanent Investigations Subcommittee, indicated he feels the FCC isn't tough enough; Sens. Karl E. Mundt (R-S. D.) and Carl T. Curtis (R-Neb.) fear commission policing of horse race news presents the danger of censorship.

At the same hearing, a subcommittee staff member testified that his check of radio stations between New York and Virginia found 17 stations which broadcast horse race news fast enough to satisfy bookies—or did until recently.

Dee W. Pincock, the FCC's assistant general counsel, told the subcommittee the commission has no set rules on the broadcasting of horse-race information. But, he added, if a station carries information "too specialized to be of general news interest," the commission investigates to determine whether the news could be of interest to gamblers.

Complaints Only — He also said the commission acts only on complaints—and has received only seven of this type since Jan. 1, 1957.

Sen. McClellan said he couldn't understand why the commission doesn't promulgate a hard and fast rule on horse-race information—one stations could be required to follow. He was not impressed by Mr. Pincock's assertion that the FCC considers each case on its merits, taking into account a variety of factors.

Sen. McClellan also was critical of the FCC's practice of monitoring a station after first giving notice that it is the object of a complaint. "That's like warning a place you're going to raid it," he said.

But Sens. Curtis and Mundt thought Congress should state in legislation precisely what is legal instead of relying on the judgment of commission members as to what constitutes proper programming.

"I have grave doubts that we can cure the problem [of horse-race gambling] by attacking it at the [point of] dissemination of information," Sen. Mundt said. "That's close to censorship."

But he scolded FCC Chairman Newton N. Minow for not paying as much attention to "real life crime" as to crime on tv. He was referring to what he regards as laxity by the FCC in examining the qualifications of applicants for special service radio stations.

Irwin Langenbacher, the staff investigator who made the survey of race-result broadcasting by east coast stations, said 17 broadcast results 15 to 30 minutes after a race. Previous testimony indicated that results information within 30 minutes of a race is helpful to gamblers.

Stations identified by Mr. Langenbacher as making such broadcasts are: WAQE Towson, Md.; WILK Ashbury Park, N. J.; WTEL and WCAM, both Camden, N. J.; WILM Wilmington, Del., and WABW Annapolis, Md. He said WTEL officials told him Wednesday they were dropping race results that day because of "a lessening in public interest." He said the Annapolis station discontinued spot horse race news six months ago.

Two other stations—WHEC and WBBF, both Rochester, N. Y.—also were mentioned in the hearing. Sen. McClellan disclosed that a Rochester high school teacher had written to FCC Chairman Minow, complaining that the horse-race information carried by the two stations were apparently inciting some of her students from wealthy families to gamble.

Mr. Pincock said both stations dropped the programs when the FCC notified them of the complaint.

CBS wants holdup on certain fm cases

CBS asked the FCC last week to suspend all hearings and grants on fm applications which are contrary to proposed new fm rules pending final disposition of that rulemaking (Broadcasting, July 3). The network pointed out that it presently is protesting three fm applications (Des Plaines, Ill.; Palo Alto, Calif., and San Jose, Calif.) which have been set for hearing and all of which, if granted, would be prohibited under the proposed rules.

There are about 10 fm applications so affected, CBS said, and no worthwhile purpose would be served by causing the parties and government to spend the time and money involved prior to a final disposition of the rulemaking. The tenor of the FCC's proposal "clearly indicates a serious doubt . . . that the rules presently in force and effect promote the public interest," the network said. Comments in the rulemaking presently are due Nov. 10 with replies to be filed by Dec. 11.

STATIONS

BROADCASTING, September 11, 1961
Meyner hits again at WNTA-TV sale

Ramping Robert Meyner, governor of New Jersey, threw a follow-up punch last week at the proposed sale of WNTA-TV Newkark-New York to educational interests. In a petition co-signed by some two dozen New Jersey officeholders, Gov. Meyner said the sale violates the Communications Act, the Sherman Antitrust Act and the Constitution of the United States. Last July in response to the FCC’s inquiry into methods to bring an educational tv channel to New York and Los Angeles, the governor accused the FCC of employing “obviously questionable tactics” (BROADCASTING, July 10). Last week he threatened to take the sale to court if the FCC approves it.

The contract between National Telefilm Assoc. and Educational Television for the Metropolitan Area Inc. specifies the deal must be completed by Dec. 1. Litigation could delay and thereby thwart consummation.

Gov. Meyner told the FCC that WNTA-TV has only $500,000 in real assets and that the $6.2 million sale price constitutes trafficking and “an obvious fraud upon the viewing public.”

The three tv networks (which own New York stations) are putting up $500,000 each toward the purchase price and independents, WOR-TV and WNEW-TV, $250,000 each. Although this arrangement reportedly met the approval of the Justice Dept., Gov. Meyner brands it a violation of antitrust laws.

The sale violates the Constitution, according to Gov. Meyner, by allowing control of ch. 13 to fall into the hands of the Board of Regents of New York. Each state should have control of its own educational activities, according to the Constitution, he stated.

Gov. Meyner repeated his July charges that the sale is a base attempt to deprive New Jersey of its only commercial vhf outlet. The Communications Act, he said assures equitable distribution of facilities.

Gov. Meyner also questioned the financial qualifications of the New York educational group to operate the station.

KGMS sale to Capitol hit by Broadcast Bureau

The $600,000 sale of KGMS Sacramento, Calif, to Capitol Broadcasting Co. should not be approved because of excessive overlap of three stations which would be commonly owned and for the failure of Capitol to determine the Sacramento programming needs.

So recommended the FCC’s Broadcast Bureau in proposed findings to a hearing examiner. Capitol principals A. J. Kirsik (51.1%), Theodore Wolf (29%), A. Judson Sturtevant Jr. (10%) and Herbert W. Dustin (9.9%) also have interests in KFAX San Francisco and KFIV Modesto, Calif.

The bureau said that approval of the sale would not be in the public interest since 102,866 persons residing in an area of 3,644 sq. miles would receive primary service from two or more of the commonly-owned stations. Also, the bureau charged, Capitol made a “meager showing” of its programming plans for KGMS during a July hearing on the transfer and demonstrated an unfamiliarity with the needs of Sacramento.

Examiner postpones hearing on KWTX-TV

Edward Kenehan, counsel for The LBJ Co., last week asked Hearing Examiner Asher H. Ende to postpone a hearing scheduled by the FCC on increase of power and antenna height for LBJ Co’s KWTX-TV Waco, Tex., until the commission passes on the station’s request for reconsideration.

Mr. Kenehan pointed out the FCC set the application for hearing on a 4-3 vote (BROADCASTING, July 31) and said he thought the petition would persuade one or more commissioner to change his vote. He said “We feel we can establish conclusively that there is no control of KWTX-TV by KTBC-TV Austin.” The FCC set as a hearing issue whether the increased power of KWTX-TV would cause a duopoly situation by overlapping the Austin station’s coverage area. The LBJ Co. (of which Mrs. Lyndon B. [Lady Bird] Johnson is board chairman and president) owns 29% of KWTX-TV and controls KTBC-TV. The company has applied to sell KRGV-TV Weslaco, Tex.

Examiner Ende said he would post-pone the hearing until after the commission act on the LBJ Co. petition for reconsideration.

Kennedy backs FTC plan for injunctive power

The Federal Trade Commission, which is in an uphill fight to gain new cease-and-desist powers from Congress, has received a helping hand from President Kennedy.

He wrote a letter to House Commerce Committee Chairman Oren Harris [D-Ark.] stating that the FTC needs the new authority to do a more effective job of protecting the small businessman.

At issue are several House bills which would enable the FTC to call a temporary halt to trade practices challenged by the FTC as unfair while such cases are still pending before the agency.

The Kennedy letter was dispatched after Commerce Committee members, during a hearing last month, criticized the bills on the ground they do not provide enough protection for companies against which the FTC might act (BROADCASTING, Aug. 28).

The President gave the bills his “strong support,” noting the FTC has no power to halt illegal practices until a case has been completed. “As a consequence,” he added, “small businessmen who are so often the target of discriminatory and monopolistic activities are often irreparably injured or destroyed long before the lengthy process of adjudication has been completed.”

KERO-TV wins concession

KERO-TV Bakersfield, Calif., won a concession from the FCC last week in a battle to prevent a shift of the station from ch. 10 to ch. 23 or 45 in the FCC’s proposed deintermixture of that market. KERO-TV several months ago petitioned the FCC to make available to it financial figures on Bakersfield tv stations referred to by Broadcast Bureau attorneys. The FCC, last week, said KERO-TV may inspect revenue figures but not other financial form replies or underlying workpapers.

A MIRAGE, SAYS WCKT
FCC erred on ch. 7 reversal, charges Miami applicant

Charging that the FCC has “purported to grant a mirage . . . as unlawful as it is contrary to the public interest,” WCKT (TV) Miami (ch. 7) last week petitioned the commission to reconsider its decision vacating the grant to Biscayne TV Corp., the WCKT licensee (Broadcasting, July 31).

In its July decision, the FCC dis-qualified WCKT, East Coast TV Corp. and South Florida TV Corp. and awarded ch. 7 to the remaining appli- cants, Sunbeam TV Corp. Sunbeam was the only applicant the FCC did not find guilty of off-the-record con- tacts with and attempts to influence the commission. The decision, however, will not become effective until further order.

WCKT said last week the com- mission grant to Sunbeam is unlawful because: (1) the decision is not a valid revocation of WCKT’s permit, since the station was denied due process; (2) character qualifications cannot be isolated from all other factors in reaching a comparative decision; (3) WCKT cannot be denied or Sunbeam granted on any basis since only two com- missioners who voted in the July decision heard the original oral argument on the merits.

(4) Sunbeam deliberately concealed material facts from the commission “which reflects so adversely on its character as to require comparative evalu- ation of its qualifications to operate the station it seeks; (5) the decision is inherently deficient in that facts of vital decisional significance were omitted and the conclusions were not supported by the record as a whole, and (6) assuming for the sake of argument that the decision is legally sound, the disqualification of WCKT is arbitrary and capricious.

Isolated Acts - The FCC, WCKT said, has decided certain “isolated acts” involving WCKT principals are to be con- trolled in a determination of the applicant’s character. WCKT argued that it is entitled to a full hearing on its character qualifications and that the commission erred in its decision. “The commission’s July 26 decision would deny Biscayne (WCKT) rights which are not denied to those convicted of criminal violations, to communists or to those who have sworn falsely or otherwise made misrepresentations to the commission,” the applicant stated.

Further, WCKT continued, the Sunbeam application has been abandoned and no longer resembles the original application. Of the 11 original Sun- beam officers and directors, only one (Sidney D. Ansins) remains and he no longer is president, WCKT said. Sun- beam has made no effort to relate the true facts to the commission, the petition charged.

On the present record, the com- mission cannot find that Sunbeam is finan- cially or technically qualified, WCKT maintained, and pointed out that Sun- beam’s proposed antenna site is now a housing development.

The Miami ch. 10 case (in which the FCC voided a grant to National Airlines [WPST-TV] and disqualified two of three remaining applicants) had an “unfairly damning effect . . . upon this proceeding with vital distinguishing characteristics wholly ignored to the gross prejudice of WCKT, the Biscayne argued. “The tarring of Biscayne with the brush of ch. 10 not only is violative of due process; it is unconscionable from the standpoint of the penalty as- sessed for the conduct involved.”

Biscayne asked that the July decision be vacated “as incomplete, unsup- ported by the record as a whole and arbitrary” and that a new evidentiary hearing be conducted, preferably be- fore the commission en banc.

Hill group probing runaway production

A House subcommittee began an in- quiry late last week to determine whether public hearings are warranted on runaway film productions, and im- ports of musical movie sound tracks and television commercials.

Rep. John H. Dent (D-Pa.), chair- man of the House Subcommittee on the Impact of Imports and Exports on American Employment, was scheduled to begin two days of talks Friday with officials of the movie industry and affected unions.

The production of U. S. movies and musical sound tracks abroad has long been a sore point with American actors and musicians.

Unions ask FCC to stay Rochester tv shifts

Two labor organizations last week asked the FCC to reconsider and stay the agency’s approval of a realignment of tv station ownership in Rochester, N. Y. (Broadcasting, Aug. 7). Peti- tioning for reconsideration were the National Assn. of Broadcast Employes & Technicians and the American Federa- tion of TV & Radio Artists.

The commission approved without a hearing (and in so doing dismissed pro- tests by NABET and AFTRA) a $6.5 million deal whereby ch. 10 Rochester shartimers WVET-TV (Veterans Broadcasting Co.) and WHEC-TV (owned by Gannett newspapers) pur-
We're living in a needing, buying, growing America—a
time for new and improved products and services—the
creation of new jobs. More than ever, a businessman with
an idea, with the urge for something better will move ahead
with our expanding economy.

But after the idea, what follows can be a costly period
of research and development. Not necessarily—if you use
the immense 9-billion-dollar fund of research and patent
information that's available at your U.S. Department of
Commerce. Think of the saving—in time and money.

For example: there are reports on extensive research by
your Government in new products and processes. A trans-
lation of data on inventions and discoveries abroad—infor-
mation on over 3 million patents—a fortune in patents
owned by your Government. All this is yours—for your use
and your benefit.

Take advantage of the many ways in which your business
can grow. In developing new products and services. In the
lucrative foreign markets. In new U.S. markets. In attract-
ing new industry to your local community. Just phone or
write the U.S. Department of Commerce Office of Field
Services in your city, or Washington 25, D.C. Your
U.S. Department of Commerce is always ready to
help you grow with America!

NOW'S THE TIME TO GET GROWING IN A GROWING AMERICA!
chased ch. 5 WROC-TV. WVET-TV then was to release its rights to ch. 10 and operate on ch. 8, in lieu of ch. 5 which has been shifted to Syracuse, N. Y.

NABET-AFTRA charged that the three parties involved entered into an agreement proposing to abrogate contractual rights of the two unions without prior consultation with the labor groups. Since approval of the transaction, they said, an official of one of the stations has told NABET that the broadcasters now would be even less disposed to make concessions to NABET.

The FCC erred in dismissing the earlier protests on the grounds the union-stations controversy is a private matter and not subject to FCC jurisdiction, the latest petition argued. NABET and AFTRA also again attacked an alleged concentration of control over mass media in the Rochester area by Gannett. Commissioners Newton Minow and Robert Bartley dissented to the sale approval on the concentration issue.

PROGRAMMING

MGM-TV SETS LIVE, TAPE-D TV SERIES

Anger signed to issue two new programs to start in 1962

MGM-TV has joined the growing list of major tv-film-series producers moving into live and tape production.

The company said last week it has arranged with Harry Anger to develop and produce two new properties for tv: Crazy Club, a comedy revue to be made as a series of either half-hour or one-hour shows, and You Don’t Say, a half-hour audience participation game show, to be produced live or on tape in New York. Both properties will be ready for network tv presentation by January 1962.

A typical Crazy Club program will consist of a group of three- to five-minute comedy acts linked together by a name host. The game show will offer prizes and feature two or three professional personalities as well as members of the audience. No casts have been chosen for either program.

Mr. Anger, who until about six months ago was vice president in charge of television for General Artists Corp., and formerly was executive producer of the Perry Como Show, created the new programs and will be in charge of production. He will not be on the MGM-TV staff, but will have office space in the company’s New York headquarters.

MGM-TV is financing the programs and subsequently will be the selling agent for them. If taped, they probably will be produced at the MGM Telestudios, now being used to tape commercials. MGM-TV bought the video tape studios from National Telefilm Assoc. last May.

MGM-TV, which will have four film series (National Velvet, Cain’s 100, and Dr. Kildare on NBC-TV, and Father of the Bride on CBS-TV) on the networks this season, said the move into the live and tape production field is part of its general diversification plans.

Earlier two other major producers of filmed tv series also announced diversification in the same direction. Screen Gems Inc., New York, said it had retained Herbert Sussan Enterprises, New York, to develop 1-hour and 1½-hour live and tape tv projects for this season, and that it had entered a co-production agreement with Aladan Productions, New York, headed by Dan Enright and Alfred Crown, to develop live dramatic and panel shows (Broadcasting, Feb. 20, 27). Last month Four Star Television, Hollywood, acquired Heatter Quigley Enterprises and Heatter Quigley Productions Inc., New York, to create taped and live programs for both daytime and nighttime scheduling (Broadcasting, Sept. 4).

MGM-TV, which has been busily expanding its international sales operations of late, made a move on the domestic front last week. The company announced the opening of a Chicago sales office and the appointment of Ed Montanus as central division tv sales manager.

Mr. Montanus, who was central division manager for NBC Films and its predecessor company, California National Productions, for the past six years, will head MGM-TV’s first Chicago office, which will be in the Prudential Bldg.

MGM-TV previously had serviced midwest clients from New York headquarters. The company also maintains sales offices in Toronto, Hollywood and Paris.

The expansion of MGM-TV’s sales operations is in keeping with the company’s generally improved tv prospects for the coming season. The film company is currently syndicating its first package of 30 post-’48 motion picture features and will probably soon market a second post-’48 package of films. Also for the first time, MGM-TV has several off-network return shows which it will likely put into syndication.

Trans-Lux stock registered with SEC

Trans-Lux Corp., which produces and distributes tv series among numerous other activities, filed with the Securities & Exchange Commission last week to offer the public 250,000 shares of common stock. Another 100,000 shares to be sold by Harry Brandt, a principal in Trans-Lux, were also registered.

Trans-Lux listed tv series for which it is negotiating, either to produce or distribute—366 2½-minute weather shorts, 104 5-minute children’s programs about “a certain well publicized chimpanzee personality,” and 26 half-hour programs, tentatively titled Personality Profile, about unusual avocations of celebrities.

In addition to the tv series, Trans-Lux produces vertical broad type news ticker projection equipment, which it leases, closed-circuit tv systems for stock market quotations and operates nine movie theatres, all of which it leases. Its tv series currently in distribution include Felix the Cat (cartoon series), educational and informational programs (some in collaboration with the Encyclopaedia Britannica). For the year ended Dec. 31, 1960 Trans-Lux showed gross operating income of $6,490,091, an operating profit of $982,905 and net income of $502,217 or 86c per share of common outstanding stock.

Tv film distributor files for stock sale

A distributor of British feature films to television with additional tv-series interests is expanding and last week filed with the Securities & Exchange Commission to register 150,000 shares of common stock for public sale.

Programs for Television Inc. (PTI), New York, has a library of 38 J. Arthur Rank movies, 25 of which have been shown theatrically in the U.S. It has leased some of the features to NBC for national showing and some on a regional basis to Lone Star Beer and Gordon Potato Chips. PTI has distribution rights to the tv series, Main Event, which features horse-games played on bumpers introduced by film personalities; the company financed production of this series at a cost of $487,500. At the end of May, 27 half-hour segments were complete and 12 more were in production. PTI also distributes 78 15-minute episodes of Art Linkletter & The Kids on a 40%-of-profits arrangement.

PTI purchased exclusive distribution rights to the 38 films for $1 million. Pay tv rights are not included. It holds the franchise on 35 of the films through April 1967, with shorter terms on the
Research is the key word which links the objectives of the leading audience measurement service and the world's largest independent data processing firm.

To ARB clients, this alliance of objectives and resources promises an expansion of research services to meet every television audience measurement need of the '60's...and beyond.
other three pictures.
Proceeds of the stock issue will be applied to certain loans and the balance used to finance production of more tv series, according to the registration statement.

For the year ended May 31, 1961, PTI grossed $1,183,671 from distribution and time income for a net income of $44,929 or 18c per share of common stock. Common stock is held primarily by Leonard Loewintham, president; Everett Rosenthal, executive vice president, and Samuel Schulman, a director, 29% each. In addition to certain indebtedness the company has 250,000 shares of common stock outstanding. Mr. Loe- winthan drew a salary of $38,526 in fiscal 1960 and Mr. Rosenthal earned $33,564. Both officers have agreed that for a one year period beginning Sept. 1, 1961, they will not draw more than $30,000 salary each.

SAG VS. TALENT AGENT:
Union says no more waivers for television production

Screen Actors Guild has notified talent agents that from the first of next year they can no longer act as producers of theatrical or tv films and at the same time continue to represent performers belonging to SAG.

After Dec. 31, 1961, SAG stated Thursday in submitting to the Artist's Managers Guild its demands for a new contract to replace the one expiring on that date, the talent union will no longer grant or renew waivers of its talent agency regulations permitting an agent to be a producer as well. Agents presently holding production waivers will be allowed a six-month extension from Jan. 1, 1962, to terminate their production activities, but after that date if the agent continues its production activities, its agency franchise from SAG will automatically be surrendered, the talent union said.

"Since 1952," the SAG proposal opens, "MCA Artists Ltd. and a number of other agents have been granted waivers of those provisions of the agency regulations which prohibit production activities. These waivers, granted in the early days of television film production, were designed to encourage and promote tv film production and employment in a depressed motion picture industry. In more recent years, additional waivers were granted agents because failure to do so would have been discriminatory. This policy cannot be continued, for it inevitably opens wide the door to such waivers to any and all applicants without limit. None of the waivers granted by the guild were designed or intended to be permanent. The waivers have served their purpose; the reasons for their creation no longer exist."

Although MCA, through its ownership of Revue Productions, has been the largest and most consistent talent agency to take advantage of the SAG production waiver, it is by no means the only agency to do so, a SAG spokesman explained. He listed Famous Artists (Charles Feldman), Mitchell J. Hamilburgy, Frank Cooper, Art Rush, James J. Saphier, Ashley-Steiner Corp., General Artists Corp., John E. Gibbs & Co., Lester Salkow, Jerome Hellman Assoc. and Orsatti Co., as using or having used these waivers. He added that some of these agencies have not been in production for several years and some never entered production or got beyond the stage of making a pilot which was not sold and never became a series.

The new contract provisions proposed by SAG would also forbid an agent from financing or guaranteeing the financing of any motion picture production for either theatre or tv exhibition. Package show representation, says SAG, "shall not include casting, negotiating or drafting actor employment contracts, acting as payroll department, handling of claims or disputes under actors' collective bargaining agreements or similar services."

Performers shall not pay commissions on tv residual or commercial reuse fees which would reduce their net compensation below SAG minimums, nor on payments made to actors for meal penalties, rest period violations, travel or living expenses, interest on delinquent payments or penalties for late payments, SAG proposes. Nor shall commission be payable on money collected by SAG and distributed to actors for the release of theatrical motion picture to television.

Are specials only for special viewers?

A tv program that's a "special" in format may not be special at all in attracting a mass audience. In fact there's statistical evidence now that an informational special (which is usually low-rated even when presented as a regular network program) brings the entire index down when lumped with its entertainment counterpart.

Specifically, a new Nielsen study of the 96 network tv specials of all types telecast from October 1960 to April 1961 finds:

- Specials of all types last season got an Nielsen average audience of 17.2 compared to an average audience of 18.6 for regular programs. Without news and documentary programs included, however, specials last season gained a 19.6 average audience. The study also showed that specials had little or no variation in ratings from month-to-month; the range in ratings for specials was greater, some receiving an average audience rating of over 25.0 and some a rating under 15.0 with no middle ground for this program type.

- The Nielsen study during this same period last season also measured popularity of the various types of shows and touched on audiences of pre-empted programs. It showed:
  - Variety shows were the most popular types of specials last season, followed by general drama and documentaries. Regular programming follows this same pattern of program popularity.
  - The rating of the pre-empted shows has a direct effect upon the ratings of the special that's doing the pre-empting. In addition the performance of the special and the performance of the program usually filling the time slot show a high degree of similarity.

KIVA (TV) polls viewers for program preferences

The management of KIVA (TV) Yuma, Ariz., thinks it knows what its audience wants in prime television fare this season and that the chances for carrying it are good.

In a recent survey, KIVA distributed...
HERE TODAY AND MORE TOMORROW—
ATOMIC ELECTRIC POWER

It happened so smoothly that many people aren't aware of it even now.

But today, in many parts of the nation, atomic electric power is cooking meals... heating, lighting, cooling... supplying power for jobs and businesses.

Investor-owned electric light and power companies are already operating 5 atomic electric plants. They are spread across the country from New England to California. Still more are to come.

These new atomic plants result from research and development programs carried on by the investor-owned electric power industry—many independent companies that plan and function on a nationwide scale. Many companies work together in operating each of the plants, so that all can learn more about the best ways of turning atomic energy into electric power.

But the investor-owned electric light and power companies realize that atomic electric power, even in today’s useful stage, is by no means the ultimate answer to America’s future need for electricity.

They are studying techniques for producing and distributing power even newer than today’s methods. For example:

- **The thermoelectric generator**—provides current through heated semi-conductor metals.
- **Magneto-hydrodynamics**—generates current when fiery fuel shoots through a magnet.
- **The fuel cell**—produces electricity from low-cost fuels.
- **Ever higher-voltage transmission**—new lines and facilities for greater capacity than even today’s electric “expressways.”

Each method may some day play a part in supplying the tremendous amount of additional power America will need for new homes, new jobs and new businesses.

It is only natural that the more than 300 investor-owned electric companies explore every possible source of greater electric strength for the nation. Power is their responsibility. Their skill and resources have made this the world’s greatest electric nation. They can supply all the additional electric power Americans will call for.

**Investor-Owned Electric Light and Power Companies | Keep America Powerful**

Broadcasting, September 11, 1961
KMOX keeps building on ‘At Your Service’

At Your Service, an all-discussion-and-information program which KMOX St. Louis started a year and a half ago, now occupies 37 hours of the station’s broadcast week and is still growing.

The newest feature to be added is “Ask the Clergy,” in which religious leaders of all faiths answer telephone questions from listeners. The show is presented during prime weekday time.

Another feature with a similar audience-questions format, which the station says to be markedly successful, is “Ask Your Doctor,” in which questions from listeners are answered in different fields of medicine each day by American Medical Assn. specialists in those fields. Still another is “Sounding Board,” on which listeners get a chance to talk to a variety of guests ranging from Eleanor Roosevelt and Arnold Toynbee to Charles Taft and Jackie Robinson. Hosts for this feature are

Jack Buck and Professor Roy McCarthey.

News, public affairs and editorial comment also are included in At Your Service. The program starts at noon with 15 minutes of hard news broadcast by Rex Davis, KMOX’s news director. At 12:15 “Strictly Editorial” follows, with Mr. Davis reading and commenting on editorials from newspapers throughout the country. This is followed by “Open Line,” where listeners phone in questions and comments.

Also presented at intervals during the day’s seven hours of At Your Service are varied features including sports and comedy sketches.

KMOX says that representatives from stations as far away as Canada have visited to observe the program first-hand, as well as representatives from more than a dozen American cities. The station says it has also received inquiries from Germany, Japan, Mexico and the Netherlands Antilles.

The proposed program schedules for the 1961-62 season to viewers who were asked to select the shows they prefer. KIVA, which is in a single station market, schedules programs from all three networks in efforts to comply with preferences as shown by the survey.

Leading the viewers’ choices are Bonanza, Reel Mccoy, Wagon Train, Untouchables and 77 Sunset Strip. All but Wagon Train already are shown on KIVA.

Program notes...

Add and switch • When WOR-TV New York adds a new film series, International Preview, to its weekly schedule Sept. 26, The Big Preview, a carry-over film feature, will move from Tue., 9-11 p.m. NYT, to Sunday, same time. International Preview, a series of award-winning foreign films, will be presented in the Tuesday time slot.

State Dept. film • The employment division of the U. S. Dept. of State this week is sending to all television stations a one-minute public-affairs film dealing with the recruitment of clerical and secretarial help for U. S. embassies and consulates abroad. The film is the first TV venture undertaken by the State Dept.’s employment division.

 Fallout protection • The Office of Civil & Defense Mobilization, Battle Creek, Mich., has begun distribution to all TV stations of its Television Package No. 5. Consisting of six releases, the package is distributed with the intention that the stations present the releases one-a-month, over a six month period. “The Sky is Falling,” first release, consists of (1) Letter to the program director. (2) One-minute animated color film spot. (3) Two 2x2 slides (duplicates). (4) Slide copy.

Continental returns • Renzo Cesana (The Continental) returned to television with an early afternoon talk show aimed at glorifying women when KTLA (TV) Los Angeles premiered Ladies! The Continental, last month. During the early years of network tv, Renzo, as The Continental, was said to have charmed female viewers from coast-to-coast with his charm and sensitivity. Now, instead of inviting his female viewers to visit him by television or in his apartment to talk of love, he will present female guests in person to discuss subjects more temporal.

Officials' view • At long last the football official will have a chance to present his side of various gridiron issues with the emergence of The Official Point of View, a new 15 minute show, premiering on WFAA-TV Dallas Saturday, Sept. 16 prior to the first NCAA football telecast. The discussion program will be carried on a nine-station Texas network including KLTV (TV) Tyler; KSDY-TV Wichita Falls; KVII (TV) Amarillo; KSTAR-TV Houston; KBMT (TV) Beaumont; KGBT-TV Harlingen; WOAI-TV San Antonio; KTBC-TV Austin.

Turns co-ed • Follow-Up, a nightly news feature of WNB-F-TV Birmingham,
SPECIAL EFFECTS: **1001** special reasons why your commercials should
be on **SCOTCH® BRAND** Live-Action Video Tape!

There is nothing new about special optical effects in TV. What is new... excitingly new in video-taping special effects on "SCOTCH® brand Video Tape is the instantaneous speed, ease and economy with which tape does the whole bag-of-tricks... does 90 per cent of them merely by pushing a button! No waiting for days, weeks, while lab work and processing laboriously create an "effect." On video tape you create electronically, instantaneously. And "1001" is just a number—in creative hands there is no limit!

By pushbutton and an electronic special-effects generator you can create thousands of variations... wipes, dissolves, fade-outs... you can matte a person or product from one scene into an entirely different one... combine several images of the same person on the screen... introduce pixie or giant characters with normal-size people... do split-screen "before and afters," or a montage of different scenes... combine photographs, miniature sets, drawings, cartoons, movies, with live or tape scenes... produce pop-on overlay effects, faces, product labels... do limited animation of titles, cartoons, as well as smoothly integrating film animation with tape... create rain, snow, fire, smoke, even dream sequences—you name it!

*And special effects are just the dressing on the salad. Basic video tape advantages for black and white and color, include: (1) new picture quality, "real-life" presence, (2) immediate playback that eliminates errors... provides "how're we doing?" feedback, (3) time and money savings.*

*Get the tape story!* Next TV storyboard you produce, take to your local video tape house for analysis—and a bid that will surprise you. No cost or obligation. FREE ILLUSTRATED BOOKLET: "Techniques of Editing Video Tape"—a sampling of ideas used by video tape editors in building shows from tapes, splicing and special effects. Send to: 3M Company, St. Paul 6, Minn.

ton, N. Y., and a segment of the station's concept of total news reporting, is now being produced on the campus of Cornell U. Working with the Cornell News Bureau, the station video-tapes five-minute programs in which professors from various fields present their commentary on national and world events and explain the significance of the people, places and events currently in the news.

Hour of news • What is reported to be the first daily one-hour television news program in the Los Angeles area will premiere on KNXT (TV), Oct. 2. The Big News will be presented Monday through Friday at 6:30 p.m., PDT, with CBS-TV's 15-minute Douglas Edwards with the News concluding the hour. Features include special events, human interest, sports, weather, and special reports.

Mission accomplished • Gotham Recording Corp., New York, has completed the first 13 programs of its radio series, The World of Folk Music, with Burl Ives. Produced for the Social Security Administration, the show will be distributed through more than 600 Social Security offices around the country.

New documentary • Perspective on Greatness, a new, hour-long documentary series of 13 shows, will debut on WOW-TV, New York this fall. The series, which will profile a different famous figure each week, is produced by Hearst Metrotone Productions, using the Hearst film files.

 Syndicated radio show • A new syndicated radio feature entitled Out of the Mouths of Babes, is being produced by Troubadour Productions Inc., New York. The three-to-five-minute programs will be available in packages of either five or 10 shows per week. The shows feature interviews with young children and their reactions to unusual and humorous subjects.

Paar in Berlin • Jack Paar, currently on business-vacation trip in Europe, will tape three full-hour segments of his NBC-TV show in Berlin (to be broadcast during the Paar shows of Sept. 12, 13 and 14).

Another for 1962-63 • MGM-TV and BBC-TV are planning to co-produce a series of 39 half-hour adventure programs called Zero One. The series, which is targeted for the 1962-63 season, is scheduled to be filmed in MGM's Elstree Studios in England beginning this fall. The programs will deal with a fictional security organization that protects all major airlines. The two tv companies hope to show the series in both England and the U.S.

Peace Corps closeup • NBC-TV will offer a look at a Peace Corps group preparing for and beginning an assignment in Tanganyika, British East Africa, in an NBC News special colorcast Dec. 15 (Fri., 9:30-10:30 p.m., EST). The report is one of three news specials which will be sponsored by the Elgin National Watch Co., Elgin, Illinois.

Christmas in Sept. • The Jo Stafford Show Specials, a series of hour-long programs which Independent Television Corp. is producing in Europe for possible syndication in this country, finished taping its Christmas show on Friday Sept. 1. The program was staged in London's Westminster Abbey and featured Miss Stafford performing with the Westminster Choir. It's said to be the first time commercial tv cameras were ever permitted inside the famous Abbey.

Sideline rooters • The League of Women Voters of the U.S., Washington, D.C., has sent a memorandum to all local and state league presidents urging them to help get NBC-TV's new Continental Classroom course in American government "off to a flying start." The league's major objectives are: Encourage stations to carry the course; help interest colleges and universities to offer it for credit; get people to enroll in the course, to listen to all lectures, or to listen to certain selected lectures, and form discussion groups or other activities to make the course "more meaningful." The program will start Sept. 25 (Mon.-Fri. 6:30-7 a.m., local time).

Eye on fashion • WNBC-TV New York presented the latest fashion creations of Italy and France, together with their American line-by-line counterparts, on Fashion is News: Dateline Rome, Sept. 10 (11:15-11:45 p.m., EDT). Sponsored by Alitalia Airlines and produced in

*Percentage of viewers familiar with a show who consider it “one of my favorites.”

KGO-TV has offered it to KVIE (TV) Sacramento, an etv outlet for that part of the state.

**Receives award • KHOU-TV Houston-Galveston, a Corinthian station, was awarded the Texas Bar Assn’s annual journalism award for its public affairs documentary, “So You’re About to Have an Accident.” The program deals with the rights of citizens involved in traffic accidents as related to police, ambulance, court, hospital and insurance interests. The program was prepared by Bob Levy, staff news writer at KHOU-TV.**

**Pulse says influence of N.Y. critics declines**

The Pulse Inc. has handed bad news to New York’s tv columnists: A study which would seem to indicate the writers’ popularity and influence are on the wane.

Pulse, in a report on a study in Metropolitan New York last May, revealed that of the 75% of viewers who read the columnists’ news and reviews of tv programs, only 28% do so regularly. This is a considerable decline from the 50% found in a similar Pulse study in 1958.

Laurence Roslow, Pulse associate di-

**NEWSPAPERS THAT MEAN BUSINESS IN SAN DIEGO!**

Gasoline service station sales in San Diego County reached $95,482,000 last year — a total which placed the market 2nd in California, 13th in the entire nation. Two metropolitan newspapers — The San Diego Union and Evening Tribune — help to accelerate sales. Combined daily circulation exceeds 200,000 (228,437 ABC 9/30/60). Family readership (evening-and-Sunday combination) is 83%, according to Facts Consolidated.

"The Ring of Truth" • Copley Newspapers

The San Diego Union

BROADCASTING, September 11, 1961
ractor, also noted a decline in the degree of reader influence among the area’s tv critics. He said that three years ago 54% of respondents admitted that reviews governed their viewing choices. But only 30% acknowledged similar reliance in the new study. And even this group, he said, takes the columnists’ advice with half the regularity (11% in 1961 vs. 22.7% in 1958).

Only in the area of reviews of tv specials has a high level of viewer interest been maintained over the three-year period—54% in 1961 vs. 54.7% in 1958.

**NET shows scheduled for prime-time tv**

The National Educational Television & Radio Center, New York, announced last week that its 52 tv station affiliates have agreed to carry various outstanding NET programs in prime time on Monday, Wednesday, and Friday. John F. White, NETRC president, noted that this is the first time stations have set aside prime time periods for exceptional NET series, chosen from the 10 hours of programs each station receives weekly from the center. In the past, stations used the programs at their discretion.

On Monday evenings, stations will present documentaries, including the _Interet_ series (shows from Britain, the United States, Canada and France) and _Prospects of Mankind_, a discussion series, with Mrs. Eleanor Roosevelt as moderator and hostess. On Wednesday evenings, stations will carry “Significant Persons” programs (examples: Richard Rodgers comparing his experiences in working with Lorenz Hart and Oscar Hammerstein II, and Edward Albee reacting to a rehearsal of a scene from one of his plays). NET stations will teletecast _Festival of the Arts_, productions of operas, dramas and concerts, on Friday evenings. Humble Oil & Refining Corp. is underwriting the national distribution of the _Festival_ series at a cost of more than $200,000.

Mr. White voiced the belief that the prime time project is “an important step toward the long range goal—a live network of interconnected educational stations.”

Most NET programs are produced on tape.

**Sillerman’s new shop**

Michael M. Sillerman, who resigned recently as executive vice president in charge of sales at Programs for Television Inc., New York, has formed a specialized program and sales consultancy business. His office will be at 1270 Ave. of the Americas, New York, N. Y. Telephone is Circle 7-7660.
Four Star to produce educational films

Four Star Television, extending scope of its activity to include the production of educational films, has negotiated an alliance with National Astro Laboratories, Pasadena. The television production company will have an integrated interest with one of the country's leading measurement standards laboratories. Four Star President Dick Powell announced Sept. 6.

He revealed that Executive Vice President Thomas J. McDermott had been researching the educational field for more than a year before Four Star decided definitely to engage in production for that market.

National Astro Laboratories is currently developing technical training "packaged programs" for all branches of the military service and prime contractors to the military. NAL President Michael Rothbart, at conclusion of the negotiations, declared that "Four Star's reputation for quality production, personnel and facilities, in every way highly qualifies them to engage in the business of producing the high level type of film needed as part of the technical training package called for in all stages of our missile development program."

New tv film process to feature the Marxes

A half-hour film comedy series, tentatively titled The Marx Brothers, will be produced in the new Tri-Cinemation process for the 1962-63 season, Jerome Hyams, vice president and general manager of Screen Gems, announced last week.

Through this new animated art form, to which Screen Gems has exclusive rights, Groucho, Chico and Harpo Marx will be represented visually by life-like figures that will move and look like the Marx brothers themselves. SG is preparing the series for network presentation. Actual production will be by DHB Inc., with which SG concluded a co-production agreement several weeks ago (BROADCASTING, Sept. 4).

Networks extend G-T shows

Goodson-Todman Productions Inc., New York, reports that options on two of its tv game shows have been extended by the networks. The programs are Say When and Number Please.

NBC-TV's Say When, which started in January, is seen Monday through Friday, 10-10:30 a.m. and ABC-TV's Number Please, which started in July, is currently in the Monday through Friday, 12:30-1 p.m. period, but will shift to 2-2:30 p.m. Oct. 2.

Markets paying more for quality film—Reed

Official Films Inc., New York, finds in an analysis that medium-size television markets currently are paying better prices than ever for quality syndicated programs. Seymour Reed, president, reports price increases range 5-15%, depending on market size.

Mr. Reed, in releasing OF’s analysis last week, explained the price rise as the result of two factors—a dearth of quality syndicated programs attributable to a general reduction in program production, and “the rock-bottom prices these markets had been paying, which were not at all realistic.” He said the differential being paid by medium-size markets will help to stabilize the syndication industry.

Official last week also reported that 12 new stations have bought its Peter Gunn, Mr. Lucky, Yancy Derringer and Wire Service off-network series, raising the number of total markets sold on these programs to 43. Latest stations to sign are: KIRO-TV Seattle; KMBC-TV Kansas City; KCPX-TV Salt Lake City; KTRK-TV Houston; KONO-TV San Antonio; WKRG-TV Mobile; WBRZ (TV) Baton Rouge; KFRE-TV Fresno; KERO-TV Bakersfield; WSJS-TV Winston-Salem; KPTV (TV) Portland, Ore., and WLBT (TV) Jackson, Miss.

Zoorama' goes national

Zoorama, a series featuring the San Diego Zoo, will get national television exposure this fall with the addition of 11 stations worked out through the facilities of CBS Films. Joining KFMB-TV San Diego (originating station and creator of the series in 1955) are stations in Miami, New York, Hartford, Schenectady, Norfolk, Denver, Salt Lake City, Phoenix, Los Angeles, Seattle and Portland, Ore.

In the photo, George Whitney, vice president and general manager of KFMB-TV holds a certificate of recognition presented by the San Diego Convention and Tourist Bureau for outstanding local television achievement on Zoorama. At left is Howard Chernoff, president of the convention bureau and of the San Diego Zoo and formerly manager of KFMB.

EQUIPMENT & ENGINEERING

Jerrold buys TACO for $2.7 million

Jerrold Electronics Corp., Philadelphia, has acquired Technical Appliance Corp., Sherburne, N. Y., for $2.7 million. The acquisition, Jerrold’s second major one of the year, was announced in New York last week. TACO’s 1960 sales were approximately $3 million. It manufactures radio and tv antennas for consumer, industrial and military use.

In February, Jerrold joined with the Harman-Kardon Inc., Plainview, L. I., through the exchange of stock at a ratio of one share of Jerrold for 1.8 shares of Harman-Kardon stock. For the fiscal year ended Feb. 28, Jerrold reported gross income of approximately $12 million, including operating revenues from sales and services for Harman-Kardon during the fiscal year 1960-61.

Sidney Harman, president of Jerrold Electronics, said the $2.7 million for TACO will be paid over the next four years in installments. He emphasized the 27-year-old antenna manufacturer has never failed to report a profit to stockholders.

Present TACO management will remain intact, Mr. Harman said. Herbert H. Brown is president, and Tore Lundahl is executive vice president. Both are founders of the company.

CBS shuts down semi-conductor plant

CBS Electronics has discontinued its semiconductor operations, it was disclosed last week along with the revelation that it has reached agreement on terms for Raytheon to purchase the real estate, physical facilities and certain inventories at the Lowell, Mass., plant.

The CBS Electronics Division of CBS Inc. also has set up a special personnel unit to assist employees in finding new positions. There are an estimated 600 factory and 250 white collar people involved. Raytheon also will assist the employees in finding jobs at its own plants nearby. When CBS Electronics closed its Danvers, Mass., operation last June, the division set up a special personnel unit that placed all of the people affected. Raytheon will start operating the Lowell facilities after the purchase is consummated (at about mid-October). Currently CBS Electronics is primarily in defense work.

Technical topics...

New microwave series • Collins Radio Co., Cedar Rapids, Iowa, has announced a new series of microwave transmitters and receivers for video relaying over long, multi-hop distances, as well as for wideband data transmission and high density communications. The systems operate in the 6-8,000 mc and the 11-15,000 mc bands, Transmitter outputs in the 6-8 kmc band are 100 milli-
watts and 1 w; in the 11-15 kc, 50 milliwatts and 500 milliwatts. The new receiver has a baseband frequency response of plus or minus .5 db, and covers the range from 50 cps to 8 mc. Providing ideal color tv transmission characteristics is a delay equalization circuit in the receiver, correcting phase differential in the video signals.

Curriculum guide • RCA's Communications Products Dept. has published a curriculum guide to assist administrators of secondary schools in establishing electronics training programs. The book may be obtained from RCA electronic training products distributors or by writing to RCA Audio Products, Meadow Lands, Pa. Price is $2.

Small stereo recorder • A compact, lightweight stereo tape recorder and playback system which can record from any source, add to existing recordings and play stereo tapes has been developed by Pentron Electronics, Chicago. The “Pentron 880” weighs 28 pounds and sells for $369.95 with microphone, connecting cables, a reel of blank tape and a take-up reel.

Equalizer • A phase and gain equalizer, Model VCE1, for use in video circuits to correct for differential phase and gain errors in color tv systems or sync compression and white stretching in monochrome circuits is now available from American Microwave & Television Corp., San Carlos, Calif., at a cost of $185.

Compact unit • A new microphone, for use by “man-in-the-street” radio-tv interviewers, was introduced last week by RCA. In use, the compact unit attaches by cable to a telephone line for feeding the program to the studio. A miniature earphone plug enables the announcer both to hear telephone cues from the studio and to monitor the microphone's output.

---

**ITC in ten months profits $1.1 million**

During the 10-month period ending April 30, 1961, Independent Television Corp. earned a net profit (after amortization and taxes) of $1,118,682.50. The British tv film production company did not disclose its net earnings or gross income for the period.

The profits figures were included in a financial report ITC made to its parent company, Associated TeleVision Ltd., in London. The report covered a 10-month period, rather than 12 months, so that ITC's fiscal year will correspond to ATV's fiscal year of May 1-April 30.

The financial audit was the first one ITC has ever made public. The company was taken over by ATV early last year. Among its properties are *Best of The Post: Broken Arrow, Jeff's Collie, Brave Stallion, Interpol Calling and Danger Man.*

Among other disclosures in the report: gross sales through April 30, 1961, of all ITC properties total $50,216,-760.06, and net profits in May and June 1961 exceeded net profits of the corresponding months of 1960 by 21.7%. The company said it could not translate the percentage of increase during the two month period into dollar and cents figures, and said the gross sales figures do not include sales made on its two new television series, *Supercar* and *Whiplash.*

**Ontario premier opposes cameras in courtrooms**

Ontario Premier Leslie Frost declared himself very much opposed to television or press photographers being allowed in Ontario courts. He stated at Toronto on Aug. 31 that “it could be a very great mistake in the British system of justice. In my view the inquisitions conducted on television in the U. S. are a travesty.”

Television and press cameras were permitted in a suburban Toronto courtroom late in August, and a tv camera was permitted to film proceedings in a judicial inquiry in Mimico, suburban Toronto, earlier this summer.

The premier gave no indication that he intends to take any action as a result of these two precedent-setting cases. Ontario Attorney General Kelso Roberts has turned the whole question over to his advisory committee.

**NBC converter to help exchanges**

Television standards converter, which adapts tv tapes made abroad to U. S. standards, has been placed into operation by NBC, William H. Trewarthen, vice president, operations and engineering, announced last week. The converter, he said, will “open up South American and European markets to U. S. television and vice versa.” CBS-TV has adopted the use of a

**STEREO 3-CHANNEL CONSOLE**

ITA's stereo 3-channel console is your best buy for broadcasting and recording. Two channels used for stereo—the third for duplicate AM service. Quality features include 35 inputs at all levels...ultra-linear gain controls...remote control and automation provisions...3 independent channels...cues, monitor, AGC and talk-back amplifiers built-in.

ITA...for the best in quality broadcast equipment.
similar converter and ABC-TV reported last spring it hopes to place such a device into operation later this year.

U. S. tv uses a picture of 525 lines, compared to 405 lines in Britain, 625 lines in Western Europe and 819 lines in France.

**Abroad in brief...**

**Overseas offices** • ABC Films Inc., New York, has opened five new sales offices to cover various European markets. The Great Britain Division, in London, will be under the direction of Don Angel. The Northern European Division, headed by Mrs. Margaret Jansson in Paris, will have sub-offices in Frankfurt, Germany, and in Stockholm, Sweden. Hugo Lodrini, in Rome, will direct the Southern European Division.

**USIA selects** • *The Plight of Pepito*, produced by WTVJ (TV) Miami, Fla., has been selected by the United States Information Agency for television programming on its facilities in Central and South America. The film is a report on the problems of Cuban exiles in south Florida, prepared with the intention of creating understanding in their behalf.

**Reps appointed** • CKEY Toronto, Ont., appoints All-Canada Radio and Television Ltd., as exclusive representative in Canada and Weed & Co., in the United States.

**16 join RSB** • Sixteen Canadian radio stations have signed up with the recently-formed Radio Sales Bureau, Toronto, Ont. Applications for membership went out last month, and are being received almost by return mail. The first 16 stations are mainly from the provinces of Ontario and Saskatchewan, with a few from the Atlantic coast provinces. Radio Sales Bureau has opened its headquarters at 321 Bloor St., East Toronto 5, Ont., with Bud Hoffman as president.

**Agency named** • CKEY Toronto, Ont., has appointed Goodis, Goldberg, Dair Ltd., Toronto, as its advertising agency. Station plans a new campaign in daily newspapers and trade papers under its new ownership.

**Rising rates** • Advertising rates for the entire West German and West Berlin vhf network during 7-8 p.m. will be increased about 15% effective January 1, 1962. New rates for 60 seconds during this period will be DM 54,300 or about $13,575. It is expected that there will be about 6 million registered tv sets in use when the new rates go into effect. Regional networks also are expected to increase their rates.

**BBG PLANS CLOSER MONITORING**

Will keep tabs on Canadian program content of stations

The Canadian Board of Broadcast Governors is hiring six more station log examiners, an economist and researchers to monitor radio stations with greater efficiency. Bernard Goulet, one of the three permanent governors, told the Atlantic Assn. of Broadcasters at its annual meeting at St. Andrews-by-the-Sea, New Brunswick, late in August.

He stated that recently one Canadian station almost lost its license when monitoring by the BBG showed false log entries.

Mr. Goulet also told the broadcasters of the four Atlantic coast provinces that the BBG will likely accept the recommendations of the Canadian Assn. of Broadcasters (BROADCASTING, Sept. 4) to compute advertising content on radio stations on a weekly basis. BBG had proposed in new radio regulations discussed at an Aug. 22 BBG public hearing that daily advertising content be 20%, with a 30% hourly limit. CAB had asked for a weekly average of 20% with a daily limit for any one day at 25% and a hourly limit of 30%.

Decisions on the regulations will be announced at the October meeting of BBG at Montreal, Que., Mr. Goulet stated, and said that “most of what the CAB has asked for will be granted. We are sincerely trying to help you within the letter of the law dictated by Parliaiment.”

T. H. Fenety, CFNB Fredericton, N.B., was elected president of AAB succeeding T. H. Tonner, CHSJ St. John, N.B., who was elected radio director of AAB on the CAB board. Marvin Nathenson, CJCB-AM-TV Sydney, N.S., was elected first vice president; J. Macleod, CKBB Bridgewater, N.S., second vice president, and Bob Wallace, CKMR Newcastle, N.B., secretary-treasurer.
FATES & FORTUNES

BROADCAST ADVERTISING

John T. McLoughlin, president, Mead Johnson Labs Div., Mead Johnson & Co., Evansville, Ind., succeeds Richard D. Waters as president and general manager, Vick Chemical Co. Div., Richardson-Merrill, New York, and Ernest P. Zobian, vp, Vick Chemical Co. Div., named executive vp. Mr. Waters was recently named executive vp, Richardson-Merrill.

Herbert Y. Gunter, creative supervisor of tv commercials for Norman, Craig & Kimmel, New York, named vp and director of copy. Mr. Gunter will be responsible for coordinating and supervising all of agency’s creative departments.

Sam S. Baker, account supervisor, Donahue & Coe, New York, appointed vp. He joined D&C in 1955 and was formerly president of Kieszewetter, Baker, Hagedorn & Smith, New York.

H. Gordon Scowcroft, marketing vp, United Fruit Co., New York, elected marketing vp of special products division, Lever Bros., that city.

Den Reebel, director of pr and advertising for Pittsburgh’s Mesta Machine Co. and Kennametal Inc., joins Hickox advertising agency in Cleveland as executive vp.

Harry M. Johnson named vp of Campbell-Mithun, Minneapolis-based advertising agency. Mr. Johnson, who has been with the agency for past 17 years, will now concentrate on creative media planning and development of media personnel.

John R. Morris, manager of public information, Campbell Soup Co., Camden, N. J., appointed assistant to vp, marketing.

Jane M. Sarin, account executive for Eldridge Inc., Trenton, N. J., advertising agency, elected vp.

William P. Dunham, group product manager for General Foods, named president of Premium Advertising Assn. of America. Mr. Dunham, who will headquarter in New York, succeeds Gordon C. Bowen.

Robert B. Sabin, marketing executive, Erwin Wasey, Ruthrauff & Ryan, Los Angeles, appointed advertising and sales promotion manager for Eldon Toys, Ungar Soldering Tools & Toys, and Eldon Fiberglass Products, Eldon Industries, Hawthorne, Calif.

Samuel R. Guard, formerly assistant director of research at Marplan, research division of McCann-Erickson, Chicago, to North Adv. there as creative research director.

Milton J. Stephan elected vp of Bozell & Jacobs, Omaha advertising and pr agency. Terie Hardcastle, formerly in commercial tv production in England and later with CHAN-TV Vancouver, ap-

FANFARE

Storer stations aid area swimming champs

Storer Broadcasting Co. radio stations, in their support of the President's Physical Fitness for Youth campaign, are supporting the U.S. Women's Swimming Team by helping defray the travel costs of the girls from the areas covered by Storer stations.

The girls were selected by the AAU on the strength of their performances in the national AAU championships last month. Each Storer radio station pledged to help defray the travel costs of at least one girl from its area, provided she qualified in the AAU meet for the European trip. Girls from three Storer station areas qualified.

Storer radio stations are WIBG Philadelphia; KGBS Los Angeles; WGBS Miami; WJW Cleveland; WBK Detroit; WSPD Toledo and WWVA Wheeling, W. Va.

Gold bricking for profit

To inform listeners of its new “golden sound,” KIOA Des Moines, Iowa, embarked on a two week promotion highlighting the venture with “gold” bricks that could be turned in to the station for gold prizes (gold cigarette lighters, cuff links, gold radios, etc.).

Promo spots asking “Do You Have The Golden Touch?” started things rolling. The station planted 200 gold bricks around the city with a sticker on one side telling finders to bring them to KIOA studios for gold prizes. All but 17 were found.

Twin Cities sounds

To illustrate the scope of its news and features, WTCN Minneapolis-St. Paul conducted a mystery sound contest, composed of various sounds heard throughout the area in the course of a day. Some 70 different sounds were used, attracting 8,000 phone calls. Station officials were so impressed with the results they are planning a new and larger contest, this time to promote the station’s music format. Prizes will range from theater passes to a new car.

Fm stations combine to stage big jazz show

A small family style picnic planned by WBMI-FM Meriden, Conn., has developed into one of the biggest fm promotions in the area with the emergence of a five-station fm network and 14 groups of entertainers combining for a jazz-folk song spectacular scheduled for Sept. 16.

The 6½ hour show is being promoted on 17 New England fm stations by use of tapes and live announcements. Participating stations (WBMI-FM; WRNW [FM] Mt. Kisco, N. Y.; WIZZ [FM] Bridgeport, Conn.; WGHF [FM] Brookfield, Conn.; WLNA-FM Peekskill, N. Y.) are sending their respective jazz hosts to share the m.c. duties. They also are exchanging promotional tapes with each host plugging his own portion of the show.

‘Operation Snowball’ to push second-set sales

The test promotion plan partly underwritten by Corning Glass Works to enlarge the second-tv set market, called “Operation Snowball” in the trade, has been set for Kansas City Sept. 15- Oct. 1. Advertising in all media, including local radio-tv stations, will be used in the $40,000 promotion. Also cooperating in the promotion is the Kansas City chapter of the National Appliance and Radio-Television Dealers Assn. Underwriters in addition to Corning include Kansas City Power & Light Co. and seven local distributors.
DEATHS

Ernest M. Walker, 56, director of research at Hicks & Greist, New York advertising agency, and former broadcasting executive, died on business trip in Louisville, Ky. Mr. Walker had been with agency for past five years and before that was head of central division of ABC network.

Eugene A. Tighe, 64, died Aug. 31 in Jefferson Hospital, Philadelphia. Mr. Tighe was president and treasurer of Dorland advertising agency in Atlantic City, N. J.

Grayson Headley, 46, owner and general manager of WNNT Warsaw, Va., died Aug. 31 at Washington Hospital Center, Washington, D. C., after long illness.

Mrs. Beatrice Irwin Victor, 50, vp of Jay Victor & Assoc., advertising and pr firm, Newark, N. J., died Aug. 30 at Upper Montclair, N. J., following long illness. Mrs. Victor had been associated in firm with her husband, Jay Victor, for last twelve years, and previously had collaborated with him in writing of radio dramas and commercials.

Carl Beseler, engineer on staff of WCKY Cincinnati, died in Christ Hospital, that city.

Lee Wholesale Co. (Zenith), Continental Electric Co. (Westinghouse), Sears Roebuck & Co. (Silvertone), Wilson Distributing Co. (Philco), RCA Victor, Magnavox and General Electric. Distributors and dealers also plan additional second-set promotions of their own using paid advertising in various media. Store traffic will be further stimulated by the give-away of 40 portables. An "Operation Snowball" test in a Boston suburb last April boosted set sales by 71%.

Drumbeats...

Appreciation day • KQV Pittsburgh claims an attendance of 60,000 persons at its second annual Appreciation Day at the city’s Westview Park. The shindig started with a giant record hop and ended with an all star outdoor stage show, featuring such personalities as Frankie Avalon, Freddy Cannon and others. The station also claims that “at least 150,000 other people” listened to the show on radio or watched it on WQED-TV, Pittsburgh’s educational tv outlet. Proceeds from rides at the park were turned over to the KQV station.

Dare • When a theatre owner in Panama City, Fla., dared anyone in town to take a voyage to the bottom of the sea (Gulf of Mexico in this case) in conjunction with the promotion of a movie of the same name, he got more than he bargained for. John Roberts, a disc jockey on WDLF, that city, went him one better and broadcast his show from under the sea by the use of a hydrophone tied in to the two-way radio of the station’s cabin cruiser, Miss Dixie.

Subscriber session • WBAI (FM) New York, listener-supported station, will hold a “get-together party” for its subscribers and their friends at a Greenwich Village night spot on Sept.

25. The get-together is being planned to bring some of the subscribers together and at the same time to raise additional revenue to help support the non-commercial Pacifica Foundation outlet.

A new aid for tv weathercasters

A parade of television babies may be leading weathercasters out of an impending programming storm—how to give the weather report without throwing in such interesting tid bits as the barometric pressure in Verkhoyansk, Siberia, or ad-libbing heavy dews into expected tidal waves.

Comes now on the scene babies—82 little characters (see photos) designed to keep announcers reading the official forecast without fear of losing viewer interest. They are Weather Tots, a 185-film package of 15 second sequences, produced by Video Varieties, Pittsburgh, available on an exclusive basis.

The babies depict various weather conditions in their moods, expressions and activities. They are seen in 13 general weather categories ranging from hot to cold and smog to windy.

Stations that have already purchased Weather Tots: WLWA (TV) Atlanta; WANE-TV Ft. Wayne, Ind.; WLWI (TV) Indianapolis; KFDX-TV Wichita Falls, Tex.; WLWD (TV) Dayton, Ohio; WIMA-TV Lima, Ohio; WTOL-TV Toledo; WJAC-TV Johnstown, Pa.; WKST-TV Youngstown, Ohio.
FOR THE RECORD

STATION AUTHORIZATIONS, APPLICATIONS

As compiled by Broadcasting Aug. 31 through Sept. 6. Includes data on new stations, changes in existing stations, ownership changes, hearing cases, rules & standards changes, routine roundup.

A report of nutrition teaching in elementary textbooks

Leading educators believe that nutrition education should start in the early grades. A good three-quarters of both principals and teachers who think their students do not get three balanced meals say breakfast is most apt to be neglected.* A recent study made by educational consultants found in 34 elementary health textbooks that among other breakfasts, a basic cereal breakfast appeared in the majority of textbooks examined. The majority of textbooks examined included breakfast teaching ideas based on the Iowa Breakfast Studies.** The Iowa Breakfast Study of School Boys demonstrated that students worked better and the majority of them had a definitely better attitude and a better scholastic record when a good breakfast was eaten.

Tv’s biggest problem is ‘people’

Few broadcasting executives can point to a single incident that stimulated their careers, but Dick Pack traces his 30-year span back to the age of 15 when he won a contest on WOR New York.

Westinghouse Broadcasting Co.’s vice president for programming was a Brooklyn high school lad when his prize-winning conclusion to an unfinished radio story won him a book autographed by its author, Laurie Erskine, creator of Renfro of the Mounted stories, who was the program’s host. And the event won him to the medium.

Last week Mr. Pack recalled how he won the contest on WOR’s Macy’s Boys Club Show. “I realized the contest was a satire so I wrote a satirical ending to it.” Out of that rewarding introduction to radio he got a part-time job working after school in Macy’s public relations department—“my first exposure to publicity.” He also got small parts in the Macy radio show and “went to a lot of auditions before I convinced myself that I was not an actor.”

While still in high school, and until his junior year at New York U., Mr. Pack could offer the “best 2 dates in town” as “New York’s youngest drama critic.” He reviewed the new plays for WBNX New York, a station in the Bronx. “I was on the third-night list for 2 review tickets, many restaurants served steak dinners for 75 cents, and the subway cost only 5 cents.”

All About Radio • Following his graduation in 1938 from NYU, Mr. Pack joined WNYC New York, the city-owned station, as continuity and publicity director. It was his first full-time job. The important thing about growing up in radio during the ‘30s, he feels, was the opportunity to learn every job. He’s against people becoming specialists too quickly, which he says happens in radio and tv today.

The biggest problem facing television, he thinks, is “people.” “Where are tomorrow’s executives coming from?” There used to be no limitations in radio because there were always people who could suggest ways to do things when others had no ideas. Thus, the medium stayed alive and vigorous.

One of Mr. Pack’s proudest achievements was at WNYC. He created American Music Festival for broadcast in the period between Lincoln’s and Washington’s birthdays. Started in 1939, the programs of serious and popular music are still an annual event at WNYC.

WOR called again in late 1940, where, at 26, Mr. Pack became director of publicity and was a member of its program planning board. Except for 2½ years in the Air Force he was with WOR until late 1947, then went to WNEW New York as program manager.

Documentary Innovator • A native New Yorker (born Nov. 22, 1915), Richard Morris Pack was assigned to New York’s Mitchell Field for his wartime service. He rose to the rank of sergeant in the First Air Force, for which he produced hundreds of radio shows. He worked at developing documentary programs, which he had first started at WNYC with a series of recorded “actuality” reports on various city departments. He was among the first broadcasters to recognize the dramatic value of airing the actual voices of people involved in the news.

In the years 1947-52, Mr. Pack obtained a basic grounding in music and news formats at WNEW, where he also produced several award-winning programs. He won an Ohio State U. first award for his Boris Karloff’s Treasure Chest, a children’s d.j. show. Also at WNEW, Mr. Pack produced and directed a new program called Telephone Newsreel, which featured beeper phone reports from news sources all over the country. He pioneered, too, in the use of the jingle technique for traffic and weather service announcements.

Mr. Pack moved to NBC in February 1952 as director of programs and operations for WNBC and WNBT (TV) (now WNBC-AM-TV), where he was responsible for some 60 hours a week of local, live tv programming and more than 8 hours weekly of radio programming.

Distinctive Post • Westinghouse appointed Mr. Pack its national program manager in June 1954. He was elected vice president on Dec. 1, 1955. He has the distinction of being the only person to fill this programming position at WBC, which claims to be the first station group to create an executive programming position. He is in charge of station formula concepts, policy, philosophy—anything that helps stimulate program leadership for WBC stations (WBZ-AM-TV Boston; KDKA-AM-TV Pittsburgh; KYW-AM-TV Cleveland; KPIX [TV] San Francisco; WIZ-TV Baltimore; KEX Portland, Ore.; WOWO Ft. Wayne, and WIND Chicago).

He says the position requires him to keep up with, or ahead of, radio trends. He’s most keen about building up news programs. Among his efforts to expedite WBC news coverage was the establishment of news bureaus in Washington and Europe. He has originated group projects in the past and more are presently in the works. This fall, Mr. Pack is serving as executive producer of a new children’s series for WBC’s tv outlets. Titled Adventures in Number and Space, produced in cooperation with Columbia U.’s Teachers College, the half-hour educational shows will guide viewers into mathematics-for-enjoyment. (The multi-award-winning Reading Out Loud series was one of his major group projects.) A second coming WBC series this fall will star Bergen Evans in English for Americans. The 56-hour E.F.A. series will be a basic course in English writing and speech.

Over-all supervision of WBC Productions Inc.’s one-hour PM East and half-hour PM West, a twin series of late-night programs currently carried by 13 tv stations, is another major responsibility.

High on his list of wishes for an ideal way to train broadcasters is an all-broadcast school of journalism. Today’s journalism schools, he charges, do not train people for either today’s or tomorrow’s form of broadcasting. Mr. Pack taught several years at NYU’s annual radio-tv workshop. In 1957 he conceived WBC’s public service conferences for broadcasters, an annual series which won a Peabody award.

He married the former Laura Lipkin, of Bayonne, N. J., in 1940. She continues her career as a psychiatric social worker. Mr. and Mrs. Pack live in Great Neck, L. I., with their two children, Judy 13, and Robert 11.

Color blind

UNLESS something dramatic happens to make a basic change in its configuration, the U. S. television system may be said to have reached a plateau of development.

The number of stations on the air next year will approximate the number now on the air.

The number of time periods available for sale, and the prices that can be charged for them, will not be spectacularly bigger than the availabilities and rates now in effect.

The total audience will at best be fractionally larger than today's audience.

Unless, as we say, something dramatic happens to give a new kick to television's curves, television is destined from now on to adhere to a growth pattern that is tied to the growth pattern of the general economy.

Television, we suggest, does not have to settle for that. It has available a force that could propel it to new heights.

The force is color television.

It is a force that has been deliberately ignored by two of the three networks and all but a handful of stations. It can no longer be ignored. The self-interest of all broadcasters requires a complete swing to color broadcasting.

A swing to color would not immediately increase the number of stations or networks or the number of time periods available for sale.

It could increase—by dramatic degree—the public enthusiasm for television and the effectiveness of television advertising. The natural result of those two developments would be an increase in advertising revenue.

Color still has technical and economic problems. Color sets are more complicated and more costly than black-and-white sets. Those problems are being licked as manufacturers apply their production and research brains to them.

The entry of several major set makers—in addition to the pioneering RCA—into the color set market this fall promises to bring about an early solution to the equipment problems.

The biggest problem that remains is the problem of color promotion. That problem can be licked only if broadcasters begin broadcasting in color and on a scale that will force viewers to buy color sets.

If broadcasters continue to remain aloof from color operations they will be conceding more and more advantage to other advertising media. Magazines are getting more colorful each week, and newspapers are beginning to learn how to print color. Billboards, car cards and direct mail use color as a basic ingredient of their appeal.

It seems illogical that television, the most modern communications medium, should still restrict itself to pictures shot in tones that Matthew Brady could reproduce 100 years ago.

Last woes of summer

THE summer hiatus is over. Broadcasters, advertisers, agencies, producers and artists are all back on the job. So is government.

For broadcasters it was a fitful summer. Business uncertainties bothered them. But the FCC worried them more.

Advertisers and their agencies interested in broadcasting as a primary means of marketing their products and services worried too. Their concern, however, transcended the FCC as they collided with the tougher New Frontier version of the Federal Trade Commission which, like the FCC, wants broadened authority and which has tinkered with their business to the point of driving them to distraction.

The prognosis for business generally is good. The econo-
mists tell us the recession is over and that 1961-62 should be the biggest year for business yet. Advertisers know that for most of their products television and radio can outperform the older media at less cost.

But, as we said, advertisers have their own troubles. If government continues to rant about programming quality—the programs advertisers find most productive—they will be less anxious to continue on the air. A few already may have elected to sit it out for a while.

Without increased revenue broadcasters will be hard put to underwrite the added expense of quality programming appealing to minorities so insistently demanded by government oracles, whose extra-legal anti-free enterprise meddling is hurting rather than helping the economy the administration is so anxious to stimulate.

On the embattled Washington front, broadcasters, both radio and tv, face unprecedented problems. For the small radio broadcaster the biggest problem, aside from his fight for survival, is the FCC's proposed new program renewal forms. The magnitude of paper work involved in the new forms, if invoked, could bankrupt smaller stations, operating with staffs of a half-dozen and with combo men at the controls. This is totally aside from the censorship implications.

For the television broadcasters there are the vexing problems associated with deintermixture and the over-zealous crusade of an apparent FCC majority toward a premature move to an all-uhf system before it has been ascertained whether uhf can do the job.

These are just a few of the troubles confronting broadcasters after eight months under the New Frontier. There are others, inherited from the Eisenhower administration, such as the FCC's gestapo-like Complaints & Compliance Division.

And there is the enigma of their own trade association—the NAB—which under its new executive direction has caused some members to wonder whether there are two FCCs in Washington.

If any lesson has been learned in these past harrowing eight months it is that the station owners, if they are to use and breathe the free air, must act for themselves. Many of them are doing it through their state associations. They are learning that they must get to know and work with their elected representatives in Congress. Congress will adjourn in the next week or so. Broadcasters will have the opportunity to indoctrinate their duly elected congressmen and senators at home, the Washington climate permitting.

"I thought you preferred radio—where your imagination could paint the scene more vividly than reality!"

Everybody’s doing it

Not one, not two, not three, but four firms now are interested in setting up industry-wide spot tv billing service, long-time dream of radio-tv salesmen and many buyers, but no more than that till two months ago. Newest entry is United Media Inc., headed by veteran in tv field. UMI figures service will be less than 15% of current billings handled, and as its incentive first reps to sign may get interest in company. Services already announced: Broadcast Clearing House (Broadcasting, Aug. 7) and Broadcast Billing Co. (Broadcasting, Aug. 21).

Another firm, composed of ex-Remington-Rand systems experts and CEIR, parent company of American Research Bureau (Closed Circuit, July 24), expected to announce shortly.

Paar and Susskind complaints

FCC was besieged last week with complaints about Jack Paar Berlin incident (Editorial page 90) from members of Congress, others in public life and public. Stock answer, it’s understood, was that FCC had no direct jurisdiction over programming. Chairman Minow reportedly passed down word that such interference with individual programs would be in forbidden censorship area.

FCC also was at receiving end of complaints from viewers on David Susskind “Open End” (Sunday, Sept. 10) which included Joe E. Lewis, Toots Shor and Jackie Gleason, among others. Some letters expressed suspicion that one or more participants were in various stages of inebriation.

Regrill for Kintner

Both Robert E. Kintner, NBC president, and Walter Scott, NBC-TV executive vice president, expected to testify before Senate Juvenile Delinquency Subcommittee’s closed door executive session sometime this week (see story, page 52). Scheduled to appear last Friday two NBC executives were given reprieve when hearing was postponed by Subcommittee Chairman Thomas Dodd (D-Conn.). Mr. Kintner appeared before committee Sept. 7 but refused comment on line of questioning. Earlier witness says committee is “painstakingly objective” in its pursuit of source of sex and violence in tv programs. While records and films are still being subpoenaed most material is either from current programs or those scheduled for airing this season.

To ‘Barrow’ a phrase

FCC’s Network Study staff, plus certain commissioners, are represented as feeling that CBS-TV’s option time incentive plan, whereby compensation accelerates in ratio to clearances, is “worse than the existing option time rule” now under consideration for revision or abolition. Staff director Roscoe Barrow, who conducted original network inquiry three years ago, returned to FCC this summer on consulting basis and is reported particularly over-wrought.

Trend to twenties

Patterns are varying, but popularity of 20-second announcements seems to be running higher than generally expected in april. tv’s adjustment to prime-time 40-second station breaks which go into effect this fall. Some of this extra 20-second business appears to represent shifting of money that formerly went into less choice periods, but extent to which it’s happening is pointed out by agency buyers who say they’re beginning to get cancellations of firm 10-second orders which stations suddenly say they accepted through clerical error—an explanation usually taken to mean 20-second orders came in after 10s were confirmed.

If it goes far enough this trend could seriously affect strategy of advertisers who’ve traditionally built campaigns around 10-second IDs. Some salesmen find 40-second wage breaking down round this way. Most high-rated stations that will accept two 20s are getting them; rest are going with usual 20-10 pattern—plus 10-second promo.

Westinghouse-GE Renewals

Outlook for renewal of licenses of Westinghouse and General Electric stations (Closed Circuit, Sept. 4) is favorable although FCC last week took no definitive action. There was animated discussion of Law Department proposal that hearing be held to determine corporate responsibility in light of antitrust convictions of officials of both companies in heavy industrial equipment, as well as of Broadcast Bureau’s recommendation that since neither court nor Department of Justice saw need of punitive action, renewals should be automatic. Instructions were issued for draft decisions although there was discussion of proviso whereby licensees would be asked to file letters of explanation so that future policy could be written.

There was no 4-3 vote as reported in story planted with Washington gossip columnist. All members reserved judgment until such time as proposed opinion is brought before it—possibly in time for meeting next week.

Bias charges

Senate Watchdog Subcommittee may hold hearings this fall on new complaints of alleged broadcaster bias in airing political news and presenting candidates. Subcommittee, set up to police industry in connection with liberalization of equal-time provisions of Communications Act, held hearings in March on broadcasters’ performance during 1960 presidential campaign (Broadcasting, April 3). But, said informed source, subcommittee has been getting complaints “right along” about alleged unfairness of broadcasters in local and state campaigns. Chairman Ralph Yarborough (D-Tex.), therefore, will consult with subcommittee members on need for new hearings.

CCBS to fight breakdowns

Clear Channel Broadcasting Service will resist FCC’s action last week breaking down 13 am clear channels in every available forum on ground that result would be to degrade essential service to rural and remote listeners. By coincidence, group met on very day of decision (last Thursday) in Nashville at call of Chairman Edwin W. Craig (WSM) and announced intention of soon appointing new full-time director of CCBS in Washington.

Post has been vacant since resignation of Gayle Gupton late last year. All 12 member stations were represented at meeting.

Late switch

Last-minute counter-programming decision said to be reason underlying CBS-TV’s sudden switch of Red Skelton and Ichabod and Me. Skelton had six-year hold on 9:30-10 p.m. slot Tuesdays, but other networks set new hour-long programs (New Breed on ABC-TV and Dick Powell on NBC-TV) starting at 9 p.m. Re-evaluation of lineup by CBS-TV advertiser (S. C. Johnson) and agency (Foote, Cone & Belding) concluded that Ichabod may be weaker of two programs to set pace for hour leading into Garry Moore Show at 10 p.m., which all feel will hold its own.
and because people are different in different markets... Storer programming is different! We put together a flexible format to fit the needs of each community... making it local in every respect. Result? WJW-TV now rates first* in Cleveland from sign-on to sign-off. WJBK-TV Detroit has the highest* share in any four station market... Further evidence that Storer quality-controlled, local programming is liked, watched and listened to. Storer Television Sales, Inc. has up-to-the-minute availabilities. Important Stations in Important Markets.

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO
Published every Monday, 53rd issue (Yearbook Number) published in September by Broadcasting Publications Inc. Second-class postage paid at Washington, D.C.

Subscription prices: Annual subscription for 52 weekly issues $7.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for Canada and $4.00 for all other countries. Subscriber's occupancy required. Regular issues 33 cents per copy, Yearbook Number $4.00 per copy.

Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1733 DeSales St., N.W., Washington 6, D. C. On changes, please include both old and new addresses plus address label from front of magazine.
Leave your radio tuned to WINS and you get the news first, fast and foremost every hour and half hour. Not just local or national, but the whole wide world. Berlin, Leopoldville, Moscow, Bangkok—wherever headlines are made, hear them direct with the speed of sound. How do we do it? WINSland's own great news staff plus MUTUAL RADIO's 34 staunch representatives on-the-spot around the world. And for advertisers, the news is always good. Examples? A rating no other N. Y. station delivers. An average of over 13% of all listeners in the N. Y. metropolitan area from 6:00 A.M. to Midnight.* A market second to none. Over 17 million people whose annual purchases equal those of the next 3 markets combined. No wonder WINS is the way advertisers really make news in New York.

*Pulse, July 1961, New York 18 County Area
Log revision may lift station burden—Cox

ATLANTA MEETING HEARS FCC PLANS FOR CHANGES

Important changes in proposed logging rules for stations to remove much of burden from station personnel are being considered by FCC staff, South East Radio-TV Seminar was told Friday at Atlanta meeting (story page 57).

Kenneth Cox, chief of FCC's Broadcast Bureau, informed 100 broadcasters that commission had been giving careful study to practical operating problems of stations. He indicated bureau will recommend revisions in proposed rules to simplify personnel requirements on basis of dry-run tests conducted by stations for Georgia Assn. of Broadcasters, as well as other station tests.

Representatives of nine-state broadcaster associations attended seminar, held under GAB auspices. H. Randolph Holder, WGAAU Athens, presided as GAB president. James Howe, WIRA Ft. Pierce, Fla., moderated question-answer session. He is NAB board member for southeastern district. Mutual network was represented by Victor C. Diehm, WAZL Hazleton, Pa., chairman of Mutual Affiliates Advisory Committee.

Mr. Holder said his staff missed more than a thousand log entries during test week and estimated proposed routine would cost minimum of $5,300 yearly. He said it was absolutely impossible for personnel to keep accurate and complete log. He urged elimination of "off-time entries."

Mr. Cox was accompanied by H. H. Goldin, FCC economist, and James G. Jumilla, assistant Broadcast Bureau chief. He said serious attention will be given to:

- Elimination of "off-time" entries in most cases.
- More liberal provisions for both pre-logging and rules for log entries at actual moment of broadcast.
- Simplified procedure for various types of log entries for public service, commercial and station call-letter announcements.
- Elimination of complete logging during network time, except for listing of on-network and off-network times.
- Definition of "local news" as any newsworthy national or local network.
- Provision for use of symbols and footnotes where approximate time specifications are adequate, and removal of split second requirements for many log entries.

Mr. Cox said FCC's "public interest, convenience and necessity" requirement, laid down by congress, is "delightfully vague" so commission is trying to find out what station is going to do and what it has done, since it lacks funds as well as desire to operate a program monitoring service, Mr. Cox said.

State broadcaster association president adopted resolution noting willingness of FCC personnel at meeting to discuss both radio and tv station problems. Second resolution asked FCC and industry aid in establishing defense networks in every state and stressed need for NAB and stations to keep public informed of serious civil defense problems.

KWK president tells Treasure Hunt story

KWK St. Louis president A. M. Spheeris told FCC hearing examiner Friday that in approving two Treasure Hunt contests in summer of 1960 he always "assumed" former manager William L. Jones Jr. had bid prizes before clues were aired. When issue arose after second contest, he said he repeatedly was told they were hidden at contest start.

In earlier testimony at revocation hearing, KWK sales manager Don Hamel said Mr. Jones ordered him to hide prizes morning they were found and to hide truth from both KWK officials and FCC (story, page 44). KWK counsel noted station told FCC truth earlier this year after it was learned from Mr. Hamel.

Mr. Spheeris also testified to circumstances in fall of 1958 in switch of Mr. Jones from WEMP Milwaukee sales staff to KWK sales management and to general managership in December that year. He said at first he exercised "close supervision" over Mr. Jones but that latter seemed to progress and gain knowledge and was given more discretion.

Mr. Spheeris said Mr. Jones was instructed to consult with him on financial matters, hiring and firing, changes of program material and "all matters of promotion, taste and propriety." As to Bonus Club contest, Mr. Spheeris said he told Mr. Jones it must be honest and fair. He said he did not then anticipate any problem of listeners being unable to reach special KWK phone but when this did come up he said he told Mr. Jones to investigate and report. Mr. Jones did.

Mr. Spheeris said he also investigated personally and learned to his satisfaction then that "very seldom" was phone tied up during Bonus Club period and "very seldom" were listeners unable to get through. He said he instructed staff through Mr. Jones that they were not to use discretion and award prizes if there was "any reasonable doubt" in favor of contestant. Hearing continues today (Monday) in St. Louis.

Ziv-UA unperturbed

Ziv-United Artists announced last Friday (Sept. 15) it is currently spending $10 million on new series and has earmarked $2 million to prepare additional series. Though trend toward off-network syndication of programs (see story page 19) has reduced number of first-run production series this season, Ziv-UA is leader with three series—Everglades, Ripcord and King of Diamonds—already released to stations. Ziv-UA also is producing two documentary-type programs "keyhole" and Story of. . . Other new programs are in varying stages of development, according to Richard Dorso, Ziv-UA vice president in charge of new programming.

Salant to CBS Inc. board

Richard S. Salant, president, CBS News division of CBS Inc., was elected to CBS board of directors. Mr. Salant, who served as chairman of CBS News executive committee, was elected president. CBS News division on Feb. 6, 1961, following an association with network that began in July, 1952. He joined CBS as vp and general executive, and also had served as member of CBS editorial board for five years.

Wailes marriage revealed

Lee B. Wailes, executive vice president-planning and finance, Storer Broadcasting Co., left Miami last Friday for delayed three-week honeymoon to West Coast after having married Mrs. Naomi P. Combs of Miami on June 30. No previous announcement had been made of marriage, second for each. They will reside in Hallandale, Miami Beach suburb.

more AT DEADLINE page 10
William Esty gets Chesbrough-Pond lines

In two actions on Friday (Sept. 15) Chesbrough-Pond Inc. moved to consolidate some of its many product lines under one agency roof. Toilet requisites company appointed William Esty Co. to handle its Pertussin cough syrup and medicated vaporizer products, Seaforth men’s toiletries line, Actin cough syrup brand, and Odo-Ro-No deodorants. Last-named product was formerly at Ellington & Co., while other brands had been with Compton Advertising. Appointment is effective Jan. 1, 1962.

Combined product lines involved in shift were believed to have billed almost $2 million last year. Two Pertussin brands spent more than $600,000 in spot and national tv, while Actin and Seaforth products totaled little more than $20,000 in spot tv expenditures only. Last year Odo-Ro-No was not tv advertiser.

Chesbrough spokesman said moves are necessitated by need for consolidation and because conflict of interests was present at Compton. Alberto-Culver and Procter & Gamble accounts, both Chesbrough competitors, are handled by Compton.

Toiletries company’s other products are spread among three other agencies (Esty also handles Chesbrough’s Vaseline petroleum jelly account). J. Walter Thompson has Pond’s and Matchabelli; Norman, Craig & Kummel handles line of men’s toiletries and Doherty, Clifford, Steers & Shenfield has advertising responsibility for company’s Northam Warren Division (Cutex).

Mobil Oil ad plans announced by Bates

Ted Bates & Co., which has had Mobil Oil Co. account since July, has announced advertising details. Campaign drive reportedly to bill more than $4 million through last quarter of year, is built around introduction of Mega-tane, novel gasoline rating system, and two new gasoline products, premium and special.

Mobil’s last-quarter spending includes $3.2 million of $12 million (commissioned billings $7 million) annual advertising budget in heavy schedule of participating spots on total of 21 ABC and CBS-TV shows (BROADCASTING, Aug. 21).

Plans also call for $850,000-plus print campaign in some 300 newspapers in all but seven states across country. Mobil’s advertising billings had been in virtual deep freeze until now. Account shifted from Compton after Mobil advertising manager read book by Rosser Reeves, board chairman of Bates, stressing importance of

The way out

Here’s money-raisin gambit for non-commercial stations: Sell print advertising. WBAI (FM) New York, which is supported by subscribers, plans to open pages of its “folio” program log listing to advertisers in move to help defray expenses. WBAI, which is owned by Pacifica Foundation and has offices and studios at 30 E. 39th St., is headed by John F. Dame, formerly vice president, CBS News, as general manager.

“unique selling proposition (BROADCASTING, March 6).

Philco-Ford merger won’t change tv plans

Philco Broadcasting Corp. will continue to prosecute its application for ch. 3 Philadelphia (now held by NBC’s WRCV-TV) if parent Philco Corp. stockholders approve proposed acquisition of company by Ford Motor Co., according to letter received by FCC Friday (Sept. 15).

James Skinner Jr., president of Philco Broadcasting, said application would be amended to show new ownership if $100 million deal goes through. Philco stockholders are scheduled to vote in late November on whether to accept offer of one share of Ford stock for 4½ shares of Philco. Philadelphia radio-tv appliance and electronics firm would become division of Ford automobile corporate structure.

Ford shares closed at 99, up one-fourth, on stock exchange last Thursday, first full day after deal was announced.

WMIN seller denies station trafficking

Franklin Broadcasting Co. Friday asked FCC to approve its sale of WMIN Minneapolis to Tedesco Inc. without hearing or else dismiss the application and leave Franklin free to sell station sometime in future.

Sale of WMIN for $200,000 was set for hearing by FCC in question of whether both buyer and seller were trafficking in broadcast properties (BROADCASTING, July 31).

Franklin, owned primarily by William F. Johns Sr., and family, denied it has ever trafficked, said many transfers have been within family. It pointed out profit was made on only two sales and that only two stations were held less than three years. Family has had interests in some 23 stations over past 25 years, sometimes minority holdings.

Tedesco Inc. has already filed for reconsideration of FCC hearing order and also denied trafficking charge (BROADCASTING, Sept. 4).

New rate plan costly for radio-tv, says AT&T

AT&T told FCC Friday new rate schedule proposed in FCC initial decision of July 14 would increase rates of leased wire services to press and radio-tv stations by 19%. AT&T criticized FCC proposal as “unsound” and said it would “work great hardships on many customers.” Company submitted new rates that would stem from FCC-proposed tariff setup in all categories and pointed out AT&T is doing so merely to comply with FCC request and will not put rates into effect unless they are extensively modified.

FCC urged to ignore WCKT (TV) ch. 7 plea

FCC general counsel’s office Friday advised commissioners to ignore plea by WCKT (TV) Miami (ch. 7) to reconsider decision to vacate grant to WCKT. Counsel said arguments in plea had been previously directed to FCC and “properly rejected” and that new arguments are not grounds for reconsideration of FCC’s action (BROADCASTING, Sept. 11).

Sunbeam Tv Corp., only applicant found free of attempts to influence FCC by off-record contacts, replied to WCKT charges by denying it had made material changes in its proposal for ch. 7 or concealed material facts from FCC.

*ARB MARKET REPORT MARCH, 1961
The 1961 WJR-Alfred Politz Study offers a completely new approach in radio research. It so well equips WJR sales representatives to pinpoint customers for your products that we warn you in advance—they’re bound to get a bit aggressive. But let them. You’ll find that as they apply this new kind of radio research to your specific advertising objectives, you’ll be able to reach logical prospects. Prospects who buy soap and soup, new cars and used cars, pianos and grass seed. All kinds of people who buy all kinds of products.

This study is of radio listening in general and of WJR listening specifically. It comprehensively covers a 100-county four-state area, and gives an accurate up-to-date picture of the area, of its radio listening habits, of listener reaction to WJR programming. The study is of individuals, not households. All data refers to listeners aged 15 and over. This method makes it possible to reliably report breakdowns by age, sex and socio-economic status. It defines extent of education and whether listeners are home owners or not.

The study compiles the total weekly cumulative audience of WJR and of 174 other radio stations mentioned. It breaks down overall radio listeners and WJR listeners by time of day, day of week, by age, by sex, by socio-economic status, and by where they listen to radio.

Equally important to advertisers, the 1961 WJR-Politz Study points up listeners’ preference for WJR’s news, sports news-scores summaries, sports play-by-play, farm programs, traffic conditions, news reporting accuracy, homemaker programs, farm news and market reports, weather forecasts, all-around helpfulness, public spirit, and listeners’ attitudes toward the kind of advertising WJR carries.
An unusual point covered by the WJR-Politz Study is a profile of the types of music listeners prefer according to their age and sex. The music categories rated by listeners include popular music with full orchestration, popular music with small orchestration, folk music, classical music, fine music, and rock 'n' roll.

You've been fairly warned that WJR sales representatives will be not just enthused, but aggressive—and with good reason. So hear them out for your own good and for that of your sales curve as they apply the 1961 WJR-Alfred Politz Study specifically to your products and to your prospects. It will give you a revealing new look at the lucrative Detroit-Great Lakes area, served best by WJR.

We believe you'll find the WJR-Politz Study extremely helpful. So give us or the people at Henry I. Christal a call—and hear the story out. You owe it to yourself—because WJR is continuing to help advertisers toward well-grounded radio research with this completely new look at radio listeners in the Detroit-Great Lakes area.
DATEBOOK

A calendar of important meetings and events in the field of communications.

*Indicates first or revised listing.

SEPTEMBER

*Sept. 19—Advertising Club of New Orleans, 50th anniversary luncheon. 12 noon, Monteleone Hotel, New Orleans.

Sept. 24-26—Louisiana Assn. of Broadcasters, annual convention, Buena Vista Beach Hotel & Motel, Biloxi, Miss.

Sept. 28-29—Tennessee Assn. of Broadcasters, Red House, Chattanooga. Speakers include FCC Commissioner Rosel H. Hyde; Vincent T. Washlewski, NAB executive vice president; Mark Ballman, McCann-Erickson, Atlanta; Tommy Martin, Mutual Life Insurance Co. of New York; Ben Sanders, KICD Spencer, Iowa; Elmo Ellis, program director, WSBI Atlanta; Charles Lamb, publisher, The Music Reporter; Gov. Buford Ellington, Tenn.

Sept. 29—Minnesota Broadcasters Assn., annual convention. Speakers include NAB President LeRoy Collins and FCC Commissioner Robert T. Bartley. Leamington Hotel, Minneapolis.

NAB fall conferences

Oct. 9—Hotel Adolphus, Dallas.
Oct. 13—Hotel Jefferson, St. Louis.
Oct. 16—Hotel Utah, Salt Lake City.
Oct. 20—Sheraton Palace, San Francisco

Nov. 10—Somerset Hotel, Boston.
Nov. 13—Pittsburgh Hilton, Pittsburgh.
Nov. 15—Hotel Leamington, Minneapolis.
Nov. 20—Robert Meyer Hotel, Jackson-\n
ville, Fla.

RAB management conferences

OCTOBER

Oct. 2—Deadline for comments on FCC's proposal to add additional vhf channel at below minimum mileage spacing to following cities: Baton Rouge, La. (Doc. 14233); Birmingham, Ala. (Doc. 14236); Charlotte, N. C. (Doc. 14238); Dayton, Ohio (Doc. 14324); Jacksonville, Fla. (Doc. 14235); Johnstown, Pa. (Doc. 14232); Knoxville, Tenn. (Doc. 14237); Oklahoma City, Okla. (Doc. 14231).

Oct. 2—New deadline for comments in FCC rulemaking on new program reporting forms and logging requirements, extended from Sept. 7.
*Oct. 2-3—New Jersey Broadcasters Assn., Colony Motel, Atlantic City. FCC Commissioner Robert T. Bartley will speak at Oct. 2 dinner; Howard H. Bell, NAB vice president, will address opening luncheon.

Oct. 2-4—Canadian Electronic Conference of Institute of Radio Engineers, Toronto, Ont.

Oct. 2-6—Society of Motion Picture & Television Engineers, 90th convention. Theme will be "Integration of Motion Picture and Electronic Systems." C. Loren Graham, Eastman-Kodak, is program chairman. Among topics to be discussed: Subscription tv, television equipment and techniques and tv recording, Lake Placid Club, Lake Placid, N. Y.

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

*Oct. 6—New deadline for comments on FCC rulemaking to deter tv stations from establishing translators for sole purpose of increasing their coverage area.

Oct. 6—Comments due on FCC's reopened option-time rulemaking. Reply comments will not be accepted.

Oct. 8-10—Advertising Federation of America, 7th district convention. Jackson, Miss.

Oct. 8-18—International seminar on instructional television, sponsored by Purdue U. in cooperation with UNESCO and the U.S. National Commission for UNESCO. Dr. Warren F. Seibert, Purdue professor, is seminar director; James S. Miles, Purdue Televison Unit, is associate director. Purdue U., Lafayette, Ind.

14
OPEN MIKE®

Renfro respects

EDITOR: What a well-deserved tribute to Harry Renfro [OUR RESPECTS, Sept. 4]!

Truly it has always been my experience to find Mr. Renfro's office door open, and I believe his attitude toward media salesmen is reflected throughout the entire D'Arcy organization.

—Charles P. LeMieux Jr., V.P.-Director of Sales, Communications Industries Corp., New York.

Chiquita correction

EDITOR: . . . The item "Chiquita back to TV" [AT DEADLINE, Aug. 28] contains a slight error. The agency is not Grey but BBDO. The BBDO account supervisor for United Fruit tells me that there are no definite plans for returning the Chiquita Banana jingle to the TV spot in the immediate future, though it's entirely possible BBDO might start promoting Chiquita via TV spots before this year ends. —Richard M. Detwiler, Manager, Public Relations, BBDO, New York.

[BROADCASTING's information about Chiquita's return to TV came from a United Fruit Co. executive, the mention of the wrong agency was a mistake on the part of the writer.]

Plus one decade

EDITOR: A small correction. The warm and pleasant Peabody-RTES association lasted, not 4 years as you twice mentioned in your book [PROGRAMMING, Aug. 14; AT DEADLINE, Aug. 7], but 14 years. . . —Claude Barrere, Executive Director, Radio and Television Executives Society, New York.

[The wrong number appeared originally April 24 in BROADCASTING's coverage of the Peabody Awards. It presumably resulted from a typographical error and was perpetuated by reporters who used the original story for background in writing for the subsequent issues.]

Texas market story

EDITOR: . . . Liked your handling of the Texas market story [SPECIAL REPORT, Aug. 21], particularly the El Paso picture as well as Amarillo and Odessa. It is the first time anyone has taken the trouble to investigate and enumerate the Mexican market characteristics. —Bernie Bracher, Program Director, KROD-TV El Paso.

[Reprints of BROADCASTING's special Texas market story are available at 20 cents per copy or $20 per hundred, plus express or mailing charges.]
MONDAY MEMO

from WILLIAM C. CHAMBLISS, Space Technology Laboratories

Would individual licensing make advertising more respectable?

It is a rare experience these days to pick up a trade journal without reading about some new attack on the conduct of the advertising group. And these assaults occasionally find their way into the daily press and into periodicals not directly related to advertising. It matters not that these adverse utterances are largely undocumented generalizations.

Even advertising people appear to recognize that they are viewed with something less than widespread favor, for it has been announced that the American Assn. of Advertising Agencies has retained Hill & Knowlton to conduct a public relations campaign in behalf of advertising.

What Is an Ad Man? • A fundamental weakness in the position of advertising people is that there is literally no definition of their capabilities or their standards of ethics. There is no definable meaning of the term “advertising man.” Anyone can so designate himself and feel free from the peril of effective challenge. If a complete ignoramus or downright crook alleges that he is an “advertising man” it is impossible to point to an enforceable minimal level of competence or conduct against which the claimant can be measured and found wanting.

This is a pretty sad situation for a group which claims (and I think quite correctly) that its influence upon the lives of our people constitutes a significant factor in the health of our national economy. But the apparent growing, if unsupported, belief that its effect upon the health of the economy may be that of a disease could well result in some radical, unrealistic and dangerous statutory and regulatory actions.

Of course, we can point to various attempts to standardize practices in the advertising business. There is, for example, the Four-A Copy Code which has been in existence more than three decades. But can we, in pointing to that and other documents, say at the same time that they are absolutely binding upon advertising people? Obviously not.

Hence, being unenforceable, they are without meaning as a warranty to the user or the recipient of advertising matter. And without such a demonstrated warranty, I find it difficult to believe that a public relations campaign can be convincing.

It would appear self-evident that whatever reformation or formal codification of competence and ethics is necessary should come from within the advertising community itself. There is still time for this to be accomplished. But the shortening of that time span is dramatically demonstrated by the rash of proposed legislation designed to affect the practice of advertising. In one state legislature there are over forty bills pending which bear on advertising.

I suggest that the advertising people themselves establish a requirement that any person who, for hire, engages in counseling another on the formulation and execution of advertising be required to possess a certification from an appropriate authority that he is professionally competent and enforceably subject to an established code of conduct.

Professional Standards • To be eligible for such certification, I recommend that he be required to demonstrate, by examination conducted by a professional qualification board, his competence and his character. Specifically, I suggest these procedures:

I. Demonstrate by written examination: a. literacy, b. capability of communicating accurately, c. knowledge of the mechanics of advertising creation, d. knowledge of advertising, business practices, e. knowledge of media requirements, f. knowledge of the law relating to mass communication, specifically in these areas: (1) libel and slander, (2) copyright, (3) right of privacy, (4) misappropriation of ideas, (5) unfair competition, (6) contempt.

II. Demonstrate by personal record and by personal interview with a character committee: a. good moral character, b. knowledge of ethics of the advertising profession in these areas: (1) counsel/client relationships, (2) counsel/media relationships, (3) counsel/professional relations.

III. Undertake by oath to uphold and defend the U. S. Constitution.

Groundless Fears • In discussions concerning the general proposition that advertising people should establish enforceable minimal standards of competence and conduct, I have encountered expressions of fear at my proposal that this be accomplished by the legislative creation of a licensing authority. Arguments range from concern that a state licensing procedure would curb freedom of expression to the belief that “you cannot license the practice of an art.”

It is relevant to point out that doctors, lawyers and architects, to mention a few professions, have not been restrained in their freedom of expression by the requirement that they qualify for licenses to practice. And in all of those professions art is a major ingredient.

Enforcement by means other than licensing, if it were effective, would be a nice thing. But I have yet to hear how it could be accomplished. Black lists, secondary boycotts and combinations in restraint of competition are viewed with disfavor by the law. For a trade association to undertake to put an individual out of business for failing to conform to its extra-legal code would be to invite the punitive consideration of the courts.

There is also a fear, sometimes overtly expressed, that the establishment of enforceable standards might deprive a lot of people of their jobs. Standards formulated by persons outside the advertising business might well be so unrealistic as to deprive qualified people of their means of livelihood. But I profess a faith in our own people to devise standards which would protect the qualified advertising man and realistically protect the public, including clients, from the unqualified, conscienceless poseur.

Stanislaus County is an important market in California's great Central Valley. It is the 9th county in the entire United States in total farm income. Also, it is the first county on the Pacific Coast and 18th in the United States in retail sales per household — $5,107.00 per household. (Sales Management 5-10-61)

Stanislaus County is part of the area covered by Bee-line station KBEE, Modesto. In fact all the important California Central Valley and Western Nevada markets are sold on the Bee-line stations. And Beeline Radio delivers more of their radio homes than any other combination of stations, at the lowest cost per thousand. (Nielsen Coverage Service Report #2, SR&D)

PROGRAM SOURCES DRYING UP?

 Networks prime new-program source as syndicating slows
 Off-network reruns fill remaining slots on most stations
 We’re ‘freezing the wasteland’ is one manager’s comment

Television may be working itself down a dead-end street that leads nowhere but to total programming by the networks.

The time already is approaching when stations will be dependent on the networks for virtually all new programming except what the stations produce themselves.

* Production of programs for first-run syndication has virtually collapsed.

* The once-rich supply of theatrical movies is within a few years of exhaustion by most calculations.

* The big new source of station programming is off-network shows—those that have completed their network runs and have been released for syndication. They are currently being released in a torrent almost matching the deluge of pre-1948 movies which swept into television in the early 1950s.

* This combination of events means that more and more of the programs on tv throughout the U.S. will be either live network feeds or re-issues of shows that have had network exposure.

Most stations welcome the off-network shows as eagerly as they once greeted the old movies—possibly more so, because the off-network programs have a track record of network performance on which their impact with audiences can be judged.

Most also agree that much of this off-network material will get audiences to match, locally, those they achieved during their network runs. In many markets they have never been seen before because the network on which they appeared had no outlet there, and in these markets they will be “first run” in every sense. Even in the market where they were seen in network runs they will reach audiences who missed the network showing or who, even if they saw the network performance, have demonstrated before that they will tune in for a second, third or even further exposure.

It is at this point that opinion begins to divide sharply.

One Viewpoint • Many stations contend that off-network shows are an indefinitely continuing source—that by the time those currently being offered have run their course, a fresh batch will have been built up out of current or still-unreleased network series and that these will fill the gaps created as the existing supply wears out.

Others contend that it is mathematically impossible for this situation to continue indefinitely. These sources argue that, unlike the old movies, off-network shows have already been seen by millions of viewers not once but in many cases several times, through network re-runs, and hence in syndication may not be expected to have as long a viewing life, on the average, as the average old movie did.

This school also argues that although the supply of network programs available for off-network showing is only

Minow moves on clears despite Harris plea for more time

The clear channel deliberations of the past 16 years came to a final decision by the FCC last week.

Action was taken just one week after the commission had received a “request” from Rep. Oren Harris’ (D-Ark.) House Commerce Committee that no final determination be made until Congress could act on pending legislation which would prohibit the agency from doing just what it now has done.

On a 5-1-1 vote, the commission decided to duplicate 13 Class 1-A clear channels (with 1030 kc added as a 25th Class 1-A) in widely scattered—and specified—areas.

The House Commerce request was sent to the commission Sept. 7 with only one dissenting vote from approximately 30 committee members. In moving ahead, the commission theorized that Congress still would have plenty of time to reverse the FCC action through legislation before actual duplicated service begins on any of the affected clear channels. Rep. John Dingell (D-Mich.), a member of the committee and prime mover of the status quo request, described the action as “rather brazen,” however. (See page 36.)
Off-network programs in 1961

The number of off-network programs released to television in 1961 is 28, while only seven first-run syndication TV series were made available during the year.

The off-network shows by company are:

- Official Films Inc.: Peter Gunn, Yancy Derringer, Mr. Lucky, Wire Service and Du Pont Theatre.
- ABC Films Inc.: Wyatt Earp, One Step Beyond, Casper the Friendly Ghost, Band Company and Consult Dr. Brothers.
- CBS Films: December Bride, Wanted: Dead or Alive, and Angel.
- MCA-TV: Staccato, Cimarron City, Overland Trail, Riverboat, and Suspicion.
- Wrather Corp.’s Telesynd: The Lone Ranger.
- MGM-TV: The Islanders and Asphal Jungle.
- NBC Films: Groucho Marx Show and The Deputy.

The seven first-run series by company are Ziv-United Artist—King of Diamonds, Ripecord and Everglades; Independent Television Corp. Whiplash; Screen Gems Inc.—Shannon; Filmaster Inc.—The Beachcomber and TV Marketers—The Adventures of The Sea Hawk.

PROGRAM SOURCES DRYING UP? continued

beginning to be tapped, the current off-network offers are drawn from a four- or five-year accumulation and will have to be replenished—if TV’s experience with old movies is any clue—long before another comparable stockpile can be accumulated. Many off-network shows are “striped” in daily showings, which can consume as much footage in one year as the series originally got in five on the network.

Repeated Wasteland • Some of those who voiced concern over the far-reaching off-network trend were fearful also for other reasons. “If we have a wasteland in television programming now,” said one station executive, “then what we’re doing is freezing the wasteland for a long time to come.” Another put the same thought in this way: “What we’re doing is perpetuating the ‘wasteness’ in television programming and stretching it out over a longer period of time. If a western is taken off the network and put into syndication and then is replaced on the network by a new western, what you have is summer reruns 40 times over.”

There appeared to be little disagreement that, in any case, new sources of programming are needed to offset the in-breeding effect of wholesale transfer of old network series to syndication. A movement in that direction already is apparent, on a modest scale.

The consensus is that in the future more and more programming will (or must) emanate from (1) local production; (2) syndication of locally produced programs; (3) foreign imports, and (4) group station efforts.

Of these four sources, the import of foreign-made films is not expected to take up much slack in the near future, although programmers are hopeful for its long-term possibilities. Local production currently accounts for about 12 1/2% of the average station’s weekly output—slightly less in the case of network affiliates but close to almost 30% in the case of independents—and there appears to be a slowly growing trend in this direction, and also in cooperative group activity.

Syndication Failure • The virtual breakdown in new production for syndication is attributed primarily to economics. Production costs are such—$40,000 to $50,000 minimum per episode—that in order to recoup their investment producers must charge prices that stations can afford to pay only if they can slot the programs in choice time periods. And choice periods appear to be the exception rather than the rule because of the heavy volume of network programs fed and carried in evening hours.

One multiple-station operator put it this way: "This fall, the networks will have practically a solid hold on everything from 7:15 p.m. till 11 p.m. Where would we put a first-run syndication show even if we bought it?"

He saw an urgent need not only for more local production—by all stations, regardless—but also for an opening up of more choice time for syndicated shows, either by voluntary action of the networks or by the FCC, and for an overall reappraisal of attitudes toward programming.

Better and Better • A major part of television’s problem, he contended, is its feeling—and the public’s feeling—that every day’s programming must be better than what was offered the day before. This “what-do-we-do-for-an-encore?” complex, he reasoned, not only imposes unrealistic pressures on programmers but is self-destructive because it brings disappointment to viewers when television fails in obviously impossible attempts to make everything better than whatever went before.

He maintained that the networks, as increasingly prime sources of both network and syndication programming, must reappraise their ideas of “where they want this business to go, in terms of program content.” Realistically, he felt, the nature of programming must “drop back a bit” from the heady, fast-paced qualities and find a “middle course” which will appeal to and serve the public without piling one extreme on another.

Whatever the reasons for the cutback in first-run syndication production, it has been drastic—from 29 new syndicated shows in 1956 to not more than seven this year. The big market for independent producers now is in programming to sell to the networks, although they say they can quickly go back to wide-scale production for syndication whenever the demand exists for it.

Still Pull Audience • Station executives told Broadcasting that off-network programs are bought and scheduled because (1) They can still garner a rating because many viewers have not seen all the episodes during the network run; (2) Their price is approximately one-third less than for an average first-run program and (3) They can be slated in prime time during their initial station exposure and subsequently scheduled in other periods or used as a daytime strip for second, third and fourth runs (stations obtain rights to multiple runs for these programs).

Seymour Reed, president of Official Films, summed up the views of many leading distributors when he commented: “It is true that our business goes in cycles and at present the economies of television dictates the widespread use of off-network programs. We know from our own experience with Peter Gunn, Wire Service, Yancy Derringer and Mr. Lucky that stations find them excellent vehicles. Many viewers have not seen them before and their production and star values have gained acceptance for them by local and national advertisers. We look for this type of program to continue for several years, at least.”

Not Only Method • “This does not mean that off-network is the only route to take to satisfy the programming needs of stations. I personally believe there will be more and more independent productions, which stress entertainment as well as information, that will find a place in TV. At Official we have just completed the first episode of our new half-hour Biography series, co-produced with David L. Wolper, which has had tre-
mendous interest from advertisers and will be offered to stations by January."

Sam Cook Diggles, administrative vice president of CBS Films, expressed the view that off-network programs can continue to be released "almost indefinitely." He conceded that some of these programs may alienate some audiences and may fall by the wayside, but he noted that there are many popular network programs that could fill the void. He reported that many station executives have asked him: "When are you going to release I love Lucy and Perry Mason to stations?" He believes that each year there will be a substantial number of off-network shows that can be spun off for local station use.

Dislikes Trend • A distributor who deplores the trend toward off-network programs is Richard Carlton, vice president in charge of sales for Trans-Lux Television Corp. But Mr. Carlton acknowledged that such shows are popular and attract audiences that have not seen them earlier. His objection, he said, is that constant repetition of these programs tends to eliminate "excitement, originality and experimentation" from the medium and ultimately can have "a long-range, deleterious effect" on tv. He noted that Trans-Lux, through its Television Affiliates Corp., hopes to bring "something new" to tv, starting next January, when the first of a group of 40 programs of a cultural-information nature, produced by local stations, will be distributed to TAC members.

The local television stations hold the key to the question of program supply, according to William J. Kaland, national program manager of the Westinghouse Broadcasting Co. He believes this has been a recurring question in broadcasting and adds: "Too many local stations have ignored the development of their own program staffs. They are forever looking to Hollywood or New York, to the networks, to every source except their own natural resource, the program staff. A competent program department at a local station can do things that no remote producer can ever do: It can produce strong local programs because the people know their own market. This takes effort, but broadcasting has always been a business of effort. It may cost money, but broadcasting finds a way to make it pay."

Trend Growing • Several distributors and station executives voiced the belief their will be a growing trend toward so-called "off-station" programs offered for syndication. Westinghouse Broadcasting for example, recently launched an ambitious undertaking, its 90-minute PM East and PM West programs, which have also been sold to seven stations outside the WBC group of five tv outlets. Other stations that have offered their programs for sales to other outlets include WNTA (TV) New York, WPIX (TV) New York, KCOV (TV) Los Angeles, WNEW-TV New York, KTMA (TV), KHJ-TV and KTTV (TV) Los Angeles and Corinthian Broadcasting Corp. Other stations, from time to time, have offered special programs they produced to other outlets.

Bennett Korn, executive vice president, television, Metropolitan Broadcasting, stressed that the independent station, such as his company's WNEW-TV and WITG (TV) Washington, must be alert to the availability of programming from all sources since they have so much time to fill. His formula is to blend off-network with re-run and locally produced programs, and, in the latter connection, noted that WNEW-TV has had "wonderful acceptance" by other stations from its syndication of Open End and A Way of Thinking and its various special programs. He challenged the notion that programming sources are being restricted, pointed out that outlets now have access to network, off-network, off-station and independently-produced programs.

Some station officials mentioned that first-run syndication programs could make a comeback if costs could be reduced. Several pointed out that the approach used on The Beachcomber, new series produced by Filmaster, which helped reduce burdensome distribution expenditures which run about 35% of production expenses.

Series Sold First • Station executives noted that on The Beachcomber, before

Hi-Yo to syndication for Silver

A perennial of both television and radio, The Lone Ranger, is headed for off-network syndication. The Wrather Corp. announced last week it has formed a new division, Telesynd, to distribute to stations 104 half-hour episodes of the more than 200 filmed programs owned by Wrather.

The tv program series has been shown on various tv networks since 1949 and currently is being shown on both NBC-TV and CBS-TV. It will end its network cycles late this month. The radio program began on WXYZ Detroit in 1933 and had a long run.

Jack Wrather Jr., president of the Wrather Corp., announced that the company's new division will be managed by Hardie Friedberg, who formerly was general sales manager of Independent Television Corp., New York, and its predecessor companies for eight years. Mr. Wrather stated that the syndication of The Lone Ranger should "accrue substantial income to the corporation in its current fiscal year, while the timeliness of the series represents a long-range income potential for the company."

full-scale production started, TV Stations Inc., a film buying organization that represents more than 100 stations, lined up commitments from about 50 stations. In essence, this series was presold. A similar cooperative effort by other stations conceivably could result in bringing other first-run tv film series into the marketplace.

A spokesman for Screen Gems Inc. said SG "stands ready" to produce first-run programs, when and if there is a market. The company, he observed, brought out Shannon for 1961-62 and has other programs "waiting in the wings." He was reluctant to predict the future course of programming, commenting: "Television is such a volatile industry. Who can write history in advance?"

Lew Klein, program director of WFIL-TV Philadelphia, discounted the idea that programming sources will "dry up" once the market for first-run films and syndicate programs becomes exhausted. He indicated there will be a steady—if reduced—acceptance of networks programs in the future, but contended that programs will come from stations, independent producers and even from foreign sources. He thinks television, like motion pictures, will call "the best" of programming from abroad, and noted that such organizations as the BBC-TV and Granada TV already are making overtures toward U.S. television stations.

All Depends • Though distributors and station officials seemed to hold high hopes for off-network programs, they acknowledged that a continuance of the trend depends on their acceptance in tv markets throughout the country this year. Preliminary sales reports show that some of the product released several months ago including Official's four series and MCA-TV's four hour-long programs, have been sold in about 50 and 70 markets respectively. For the first time a large volume of such programs will be competing with one another for audience popularity.

Television officials agree the track record they chalk up promises to have a significant effect on the course of television programming over the next few years.

One television station executive, who castigated off-network programs for lowering many tv stations to the status of "second-run and third-run outlets," raised this question: "With the present climate in Washington, what excuse can a station have if it carries the violent off-network programs? And there are a lot of them."

He said stations have blamed networks for providing them with "violent" network programs, and added: "But what excuse could they give if the FCC asks why they are carrying "violent" programs in local time?"

Food-grocery tv buying keeps booming
SIX-MONTH BILLINGS MORE THAN DOUBLE ANY OTHER CATEGORY
National tv advertisers spent $156,829,230 in gross time billings in the
first six months of this year for food

and grocery products. This was the top
product category for the period, the
total representing a gain in food and
grocery billing of 8.3% over the six
months a year ago.

Runnerup was cosmetics

and

toi-

with first-half-year billings of
$72,279,095, an increase of less than
1% (.04 percent). Third highest billing was scored by advertisers of drug
products: $65.9 million compared to
$63.2 million in first-half 1960. Advertisers of tobacco products declined some
$4.5 million in the period.

BROADCASTING, September

18, 1961


“Charlotte's WSOC-TV... an important advertising entity in its area” – Bren Baldwin, K&E

WSOC-TV's modern facilities serve an area of nearly 3 million people with the Carolinas' finest programming. A continuing promotion and publicity program builds audience bonuses for both station and advertiser. In addition, WSOC-TV gives vigorous merchandising support that expands product distribution and multiplies sales. Schedule WSOC-TV. It is one of the great area stations of the nation.

WSOC and WSOC-TV are associated with WSB and WSB-TV, Atlanta, WHIO and WHIO-TV, Dayton

BROADCASTING, September 18, 1961
Agency appointments...

- Harwyn Publishing Corp., New York, has appointed Grant Adv., that city, to handle advertising of its "Art Linkletter's Picture Encyclopedia for Boys & Girls." Billing will be in excess of $500,000.

- The Dairy Council of California has appointed the McCarty Co. with offices in both San Francisco and Los Angeles, two major milk sales areas in California, to handle advertising and sales promotion of milk and dairy by-products. Herb C. Brown, vp of the agency in Los Angeles, will be account supervisor. Sherwood Armstrong, San Francisco, will be account executive for the northern part of the state: Byron Fellows, Los Angeles, will serve in a similar capacity for southern California.

New Oklahoma agency

Formation of the Burke-Jordan Agency, advertising-public relations firm with offices in Oklahoma City and Norman, Okla., was announced last week. Principals include Joe E. Burke, who has headed his own Norman agency since 1959, and Warren (Doc) Jordan, formerly account executive for the Beals Adv. Agency, Oklahoma City. Norman headquarters of Burke-Jordan are in the Insurance Building, telephone Jefferson 6-0040; Oklahoma City office is at 1300 N. Broadway, telephone Central 6-0050.

Fones forms agency

Jack Scott Fones Inc., a new public relations-publicity agency, has begun operations in New York, John Scott Fones, founder and president, announced last week.

Mr. Fones, previously handled publicity for Ben Sonnenberg, N. Y., personally supervising Philip Morris, Lipton Tea, Chesebrough-Pond, Greyhound and other major accounts. Philip A. Williams III has been named vice president of the new organization. He has held executive positions with ABC-TV Films, United Artists and Ziv Television Programs Inc.
A THRILLING HALF-HOUR SERVICE FEATURE

A flash of green, the roar of 28 racing engines and drivers of the world's most powerful sports cars are off the starting grid in the 14th Annual Watkins Glen Grand Prix. AND now for the first time anywhere... the Triangle Stations are producing a 30-minute TV film of this thrilling classic... offering for your local audiences the pulse-pounding, "here and now" excitement that makes sports car racing one of America's leading attractions.

The film will bring viewers right to trackside... capture the colorful pageantry of America's oldest road race... present the race in split second narrative with NEWS IMPACT. Get this dynamic service feature exclusively for your market—first come, first served—it's sure to bring top ratings and top revenues. Filmed in color, and black and white, the races are scheduled for September 22-23 and prints will be available in late October. Write, wire or phone today for costs.

The Triangle Stations are producers of the racing film: SEBRING, THE 12 HOUR GRIND. This widely acclaimed program was broadcast by stations from New York to Hawaii. Share of audience as high as 34%!

PUBLIC TASTE MOLDS TV

NL&B Harper fires back at criticism that tv has failed to serve public interest

"Television programming reflects more than it affects public taste," cautioned Paul C. Harper Jr., president of Needham, Louis & Brorby, Chicago, in an address before the Ad Club of Washington last week.

"People," he said, "are still interested in what they always have been—laughter, an occasional tear, the thrill of the chase and plenty of reassurance that other people have problems just like theirs." He compared William S. Hart, western hero of 30 years ago, with James Arness of Gunsmoke and Shakespeare's Falstaff of 300 years ago with the clowning of Red Skelton.

"To most people television is a source of entertainment and nothing else. These are the things they look for when they turn on the set. The only basic change is that people are more entertained today than they were 50 years ago."

The agency president attacked the fact that television has been criticized as not serving in the public interest; that the public has no choice—conventional entertainment or nothing. From September 1960 to Aug. 31, 1961, he pointed out, the three networks devoted (in prime time) 281 hours (combined time) to informational, educational and news programming, an average of 55 minutes every night, seven days a week, all year long. These programs, explained Mr. Harper, drew an audience of only 17% of the families who had their sets on.

"The public was given a choice—and it chose entertainment," he added. This is not to imply, he emphasized, that television programming is perfect and cannot be improved upon. Rather he indicated that changes in certain areas are necessary—but must be made within the commercial context.

"They [changes] cannot be made by treating the stations and the networks as if they had no stockholders, as though they were alone responsible for the cultural level of the country. They cannot be made without recognizing the staggering creative requirements of television," Mr. Harper charged.

He called tv the "most intrusive" of the mass media, the "most controversial" and the "most vulnerable," saying that most of the controversy is being conducted in a vacuum with no reference to the basic choice involved. He advised the critics to review three basic concepts in television—costs, risks and talent availability—before suggesting any drastic changes in current network programming policies.

Specifically, Mr. Harper suggested these improvements:

- Better production values. Tighten the standards of writing, acting and producing. Offer more skillfully plotted scripts, better characterization, better casting and acting and better camera work. It pays off. He cited the audience loyalty of Wagon Train, Jack Benny and The Real McCoys as three widely different programming types that have exemplified this theory.

- More creativity. Resort to less frenzied duplication of existing formats and open the doors to new programming ideas such as Candid Camera and The Flintstones.

- Encourage young talent at the local level. Here every station—indeed, an independent, affiliated or network owned and operated—has an opportunity and a responsibility to raise the levels of creativity and craftsmanship. The testing ground of the fledglings often cannot be at the network level. The cost and risks are too great. New talent should begin at the local level; rewards may be slow in coming but it seems to be the only way to meet the insatiable demand for entertainment—and at the same time maintain standards.

- Confine crime shows to late evening hours. Revert back to the rule of radio days when all such programming was placed at 9 p.m. or later.

In his summation, Mr. Harper reminded the critics that if television is to survive, it cannot get too far ahead of popular taste, and there is evidence in certain areas that it is ahead rather than behind in this respect.

Pick-a-Pair success

Budweiser Beer's "Pick-a-Pair" promotion in June and July, which was heavily supported by radio and tv advertising (Broadcasting, March 20), proved even more successful this year than before, Anheuser-Busch Inc., St. Louis, has announced. Over 20 million Budweiser 12-ounce can six-packs were sold during the campaign, the sponsor said, an increase of more than one million six-packs over the same period of 1960. Adding in six-packs of other size containers, total sales this year hit a record high of 30.2 million six-packs, Anheuser-Busch said. Agency is D'Arcy Adv., St. Louis.

NEW SALES APPROACH

Two-man teams to cover agencies for radio rep

An expansion of Broadcast Time Sales, radio station representative, and the introduction of a new system of selling agencies were announced last week by BTS officials.

The expansion, announced by President Carl L. Schuele, includes larger quarters for the New York-based firm's Philadelphia and Detroit offices, the appointment of a new manager in Detroit, and the addition of two salesmen and an office manager in the New York headquarters.

The new system of selling agencies, a team operation which concentrates on both time-buyers and the decision-makers at higher agency levels, is designed to attract new business for radio and was described by Executive Vice President Mort Bassett as probably the first of its kind—in method of operation—among national representation firms.

Mr. Bassett described the system thus:

"Effective immediately, each of the major agencies will have double coverage and service by BTS. The BTS sales staff has been redesigned on a team basis, each consisting of two salesmen—one with a minimum of 10 years experience, an officer of the company, and the other an account executive with years of experience working with timebuyers. Both team members work closely with the buyers, insuring maximum effectiveness so far as presentations and service are concerned. In addition, this new system enables a greater degree of in-depth selling at all levels within the agencies by a seasoned creative sales

Prime example of program leadership by alert management, enabling creative talent continually to build new vision into Television on stations represented by BLAIR-TV
Week after week since April 11, America has watched . . . and wondered . . . and winced!

Wined at the villainy laid bare once again, during the trial of Adolf Eichmann.

Little of importance can be added to the words already poured forth regarding that villainy. But for the record of Television itself, it is important to note that the comprehensive courtroom coverage was brought to America through the enterprise of W-TEN’s parent organization, Capital Cities Broadcasting Corporation.

By calling on the combined staffs of its stations, Capital Cities sent a team of pro’s to Jerusalem. News-director Marc Edwards of W-TEN had the effective cooperation of Mort Blender from WPRO-TV and Jack Williams of WTVD. Chosen as executive producer was Milton Fruchtman, veteran director of special-events network telecasts.

Logistics presented many problems. Including cameras, microphones, mobile remote trucks, power-units, cable, tape and control-room facilities, more than $200,000 was required in equipment alone. And more than six million miles were covered by planes of EL Al Airlines in flying session-tapes to the U.S.

So day-by-day as the drama unfolded, millions of Americans sat-on in an event of great historical significance. As one close observer of television summed it up: “Capital Cities deserves full credit for a major achievement—a service of incalculable value to Israel, to America, and to Humanity itself.”

To Blair-TV, alert human-interest programming by great stations like those of Capital Cities, is a constant source of inspiration. We are proud to serve more than a score of such stations in national sales.

Commercials in production

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager, and approximate cost of commercial.

RUDOLF BING
General Manager

METROPOLITAN OPERA

KWTV
OKLAHOMA CITY

KWTV·OKLAHOMA CITY Represented nationally by Edward Petry & Company, Inc.
Advertising an advertising medium to advertising people is a bit like selling soap to P & G. It takes something really special. That's why a recent study by A. C. Nielsen — world's largest marketing research organization — among executives responsible for major media, market and station decisions at the 50 biggest TV and radio advertising agencies has some significant news for you.

Among other questions, Nielsen asked them —

"To best reach you, which publication would you recommend a station to use for its advertising?"

The answers, predominantly, were apportioned among four business publications which concern themselves with both broadcast media, or with television alone.

**Broadcasting** scored 42% ahead of publication "B" — and 185% ahead of "C" and "D" combined:
THE HARD WAY?

Conclusive as that is, look what happened when Nielsen asked this follow-up question—

"In which publication would a station's advertisement be likely to have the most impact on you?"

Here, Broadcasting gets 57% more preference than publication "B" — and 80% more than "C" and "D" combined:

<table>
<thead>
<tr>
<th>Publication</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;B&quot;</td>
</tr>
<tr>
<td>&quot;C&quot;</td>
</tr>
<tr>
<td>&quot;D&quot;</td>
</tr>
</tbody>
</table>

These are no little margins — particularly when you consider they represent the expert opinion of important decision-makers at the "Top 50" agencies investing nearly 1½ billion dollars of their clients' money in TV and radio annually. What's more, the same Nielsen survey shows that these advertising leaders place Broadcasting first (1) in readership for broadcast media news and information; (2) in their preference for reports of current trade events; (3) as the publication in which they have most confidence; and (4) as the publication they find most useful.

This is the kind of ideal editorial climate wherein top agency people (as well as the important advertisers who are their clients) are most likely to be reached, most effectively, by your advertising messages. In fact, they say so themselves.

WHY NOT DO THINGS THE EASY WAY? Take the advice of your own best prospects. Tell them your sales story via the well-studied pages of Broadcasting.

NOTE: Of Broadcasting's guaranteed 26,000 circulation, approximately one out of every three copies goes to an agency or advertiser reader each week. And the bulk of Broadcasting's 8,868 agency advertiser distribution (unlike that of publications "B", "C" or "D") is paid circulation, verified by the Audit Bureau of Circulations. Only Broadcasting, among these four TV and radio business journals, qualifies for ABC membership.
Bell & Howell will "stick with public-service broadcasting." That's the promise of Charles H. Percy, board chairman of the photographic equipment company, who said last week that Bell & Howell has signed a contract with ABC-TV to continue its sponsorship of Close-Up! through 1963.

Mr. Percy, who addressed the Sales Executives Club of New York last Tuesday (Sept. 12), said: "We have found that the answer to the economic welfare of the company and the general welfare of the country are not at all reconcilable.

"Effective business communication is a transaction that involves the whole man. . . . Bell & Howell will continue to serve both the economic and social interests of people because we believe our customers are whole persons—not half and half."

Referring to Bell & Howell's tv public-service programming philosophy, Mr. Percy said the company's marketing management has had a "major voice in delineating some rather unorthodox and perhaps bold concepts in connection with correlating our own self-interest with the interest of the American public at large." Over the past two to three years, he stated Bell & Howell has invested virtually all of its ad budget in public-affairs programs covering such issues as integration, the missile gap, racial discrimination, birth control, communism in Latin America, and "feather-bedding."

**Good For Sales** • Mr. Percy emphasized that the company's studies have shown the "substantial direct effect" of this programming on sales of its products, "and we have no evidence of any negative effect on sales."

He told the executives, representing scores of major U.S. companies, that "one task that American business can undertake is the support of all types of responsible media that inform and enlighten and help us as a people to take a more responsible position on the burning issues of the day."

In spite of the "smaller audiences" for "serious" tv programming, "and however attractive the siren song of escape entertainment," Mr. Percy declared the task must be tackled.

**Closed Circuit Preview** • ABC News last Wednesday (Sept. 13) presented a special closed circuit program over 100 tv stations which previewed the coming season of Close-Up! Affiliates were shown excerpts from "Walk in My Shoes," scheduled as the season premiere tomorrow (Sept. 19, 10-11 p.m. EDT), and clips from three other shows now in production.

Part of the preview program was the presentation of an award to Bell & Howell. The Chicago Council on Foreign Relations Award was given to the company for its contribution to world understanding through sponsorship of Close-Up! Mr. Percy and Peter G. Peterson, president of Bell & Howell, accepted the award from Robert B. Wilcox, president of the Chicago organization (see picture).
The preferred stations in this "preferred city" are KRNT Radio and TV, leaders in ratings, leaders in community service ... leaders in the billing parade. Our share of local television business in this major 3-station market has always averaged nearly 80%; our local radio business has always been way ahead in a 6-station market.

Most folks don’t realize this about Des Moines — we’re 36th in the FCC list of markets according to appropriation of national spot TV revenue. The same sources prove that Iowa’s capital and largest city is a good radio market, too.

You know you’re right when you buy these most unusual stations, KRNT Radio and TV, the stations people believe in and depend upon. And you know you’re buying at the same low rate as everyone else when you deal with these responsible stations.

Buy “the live ones” — KRNT Radio and TV, Cowles stations ably represented by The Katz Agency.

KRNT
RADIO AND TV — Des Moines

FCC turns deaf ear to Hill on clears

MAKES FINAL DECISION DESPITE HARRIS REQUEST TO DELAY ACTION

Ignoring a near-unanimous "urgent request" from a congressional committee to postpone a final decision in the clear-channel case, the FCC last week terminated the 16-year-old proceeding by breaking down 13 of the 27 Class I-A frequencies.

The action taken on a 5-1-1 vote, identical to announced staff instructions issued last spring (BROADCASTING, June 19), it becomes effective Oct. 30. Commissioner Robert E. Lee issued a strong dissent while Commissioner John S. Cross dissented in part and concurred in part.

Last week's decision was labeled "rather brazen" by one member of the House Commerce Committee. It came just one week after the committee (with only one dissenting vote) had asked the FCC not to decide the clear-channel case until "the expiration of a reasonable time after the reconvening of the Congress in January 1962."

In a painstakingly, carefully drafted 42-page decision, the commission detailed the considerations used in selecting the 13 clear channels to be duplicated. Concrete criteria were listed which applicants applying for the newly-opened frequencies must meet.

"The net result of the action we take today is to open the way for additional nighttime primary service to the public, especially in those areas where such service is needed, within the same time holding to a minimum any loss of existing services to the listening public," the commission said. In addition, the commission served notice that the 10 remaining clear channels without nighttime duplication (two of the 12 actually already accommodate two fulltime stations) face a possible breakdown in the future.

The Chosen Few • Following are the 13 clear channels which will be duplicated, stations presently occupying the frequencies and the states where Class II unlimited time stations may be located:

670 kc; WMAQ Chicago in Idaho.
720 kc; WGN Chicago in Nevada or Idaho.
750 kc; WSU Atlanta (to go to KFQD Anchorage, Alaska, which was required to shift from Mexican clear 730 kc).
760 kc; WJR Detroit (KFMB San Diego shifting from Mexican clear 540 kc).
780 kc; WBBM Chicago in Nevada.
880 kc; WCBS New York in North Dakota, South Dakota or Nebraska.
890 kc; WLS Chicago in Utah.
1020 kc; KDKA Pittsburgh in New Mexico.
1030 kc: WBZ Boston in Wyoming.
1100 kc; KYW Cleveland in Colorado.
1210 kc; KMOX St. Louis in California or Oregon.
1180 kc; WHAM Rochester, N. Y., in Montana.
1210 kc; WCAU Philadelphia in Kansas, Nebraska or Oklahoma.

The action does not affect assignments on the remaining 12 clear channels, to wit:
640 kc KFI Los Angeles.
650 kc WSM Nashville.
660 kc WBNC New York (presently duplicated by KFAR Fairbanks, Alaska).
700 kc WLW Cincinnati.
770 kc WABC New York (presently sharing with KOB Albuquerque, N. M.).
820 kc sharetime WBAP-WFAA Ft. Worth-Dallas.
830 kc WCCO Minneapolis.

On the Hill • Rep. Oren Harris (D-Ark.), at the direction of the Commerce Committee of which he is chairman, wrote the commission Sept. 7 asking that no action be taken in the clear-channel case until the committee could hold hearings on several pending bills which would prohibit a breakdown of the clear channels. The committee action was taken the previous day at an executive meeting with only one of approximately 30 congressmen present expressing disapproval.

"A great deal of interest was expressed by members of the committee," Rep. Harris told the FCC. "In view of the fact that proposed legislation would be in conflict with an order in Docket 6741 [clear channel], under preparation by direction of the commission in accordance with its public notice of June 13, 1961, the commission is urgently requested to defer final action until the committee and the Congress have had a reasonable opportunity to consider the pending legislation."

"It would be my purpose to schedule committee consideration of it early in the next session. The cooperation of the commission would be greatly appreciated," Rep. Harris concluded.

Rep. John Dingell, one of the prime movers behind the committee request, described the FCC decision as "rather brazen. It is a clear disregard of a request from Congress." He charged the commission action provides for additional stations which are not needed and which will result in less service to rural areas.

Rep. Harris refused to comment on the decision, the committee request or a letter to him from the FCC hand delivered last Thursday (Sept. 14) explaining the action. Late Thursday he said that he had not seen the commission letter but said the clear-channel decision would not affect plans of the committee to hold hearings in January. In fact, he said he expected there would be an "urgency" for hearings.

Congress Can Reverse • In its communication to Rep. Harris, the FCC explained that the instant case had been on the dockets for 16 years and that, in effect, the commission's decision already had been announced. The commission felt that it would be in the public interest to finalize the staff instructions notwithstanding the directive from the committee. Such a move, it was pointed out, would not prevent congressional action reversing the decision since it would be many months before a station could begin operating on one of the newly available clear.

Four bills are pending before the committee, including one by Rep. Dingell, providing that no more than one
Sell those big-buying young adults with BREAKFAST CLUB, FLAIR, SPORTS and SPECIAL EVENTS on ABC Radio. You'll sell those younger families with more mouths to feed . . . more needs to fill. Minow’s friend in the White House

HE’S ARTHUR SCHLESINGER JR., OUTSpoken CRITIC OF TV

One of President Kennedy’s close advisers has gone on record with severe criticism of television and recommendations for tighter government control.

He is Arthur Schlesinger Jr., special assistant to the President. A 43-year-old Harvard professor who won the Pulitzer Prize in history in 1945 for his The Age of Jackson, Dr. Schlesinger has strong views on tv. They’ve just been published in Daedalus, the Journal of the American Academy of Arts & Sciences, as part of a record of talks given in June 1960 at a two-day conference on Problems of Mass Culture and Mass Media at the Tamiment Institute in Pennsylvania’s Pocono mountains.

If the present FCC administration’s policies on tv were not formulated by Dr. Schlesinger, they certainly coincide with his views:
- Television has been on a downward spiral since 1954.
- Networks should be licensed as well as stations.
- The government has a responsibility to set standards for programming.
- Licensees might be required to “stipulate” in their applications on such subjects as (1) full control over programming, (2) allocation of stated time periods for cultural and educational programs, the discussion of public issues, local live origination; (3) an agreement on limitations on advertising, and (4) the allocation of free time during presidential campaigns.
- Licenses should be renewed annually.

Speech Writer • There have been rumors that Dr. Schlesinger acted as advisor in the preparation of the now famed “vast wasteland” speech that FCC chairman Newton Minow delivered to the NAB convention last May.

Not so, says Dr. Schlesinger. “I had nothing to do with Mr. Minow’s speech,” he said the other day. “Mr. Minow did send over an advance copy and I thought it was very good.”

He and Mr. Minow are good friends, Dr. Schlesinger explained. They became acquainted during the 1952 presidential campaign when both worked in behalf of Adlai Stevenson, Mr. Minow’s former law partner.

“I see Mr. Minow often,” the Harvard historian said, “but it’s purely social. Don’t misunderstand, now, I’m all for Newt Minow.” Dr. Schlesinger emphasized that his White House assignments do not include broadcasting or communications.

His interest in television, he maintains, is that of disappointment in seeing its great potentialities unrealized.

There are a number of methods that can be used to reverse this trend, he said in his essay of a year ago. For one the FCC can spell out standards:
“Major stipulation would be the assumption by the networks and stations of full control over programming—which means that sponsors and advertising agencies would no longer influence the content of programs. Other media live off advertisements without letting advertising agencies and sponsors dictate and censor content as they do in television. So long as television permits this, it will be fourth rate. We should go over to the British and Canadian systems, in which the advertiser purchases time on the air as he purchases space in a newspaper, and has to leave editorial matters alone.”

This is not censorship, Dr. Schlesinger argued.

A New Authority • A revitalized FCC could not by itself accomplish this revision of tv fare without public support. Dr. Schlesinger commended in his Tamiment essay. This would have to be organized—through a National Citizens’ Advisory Council or a National Broadcasting Authority. The latter might be financed by fees charged for licenses, he suggested.

In an odd approach to educational tv, Dr. Schlesinger expresses fulltime station may be authorized on the Class 1-A frequencies. One commissioner said the FCC faced a “damned if you do, damned if you don’t” situation. Several times in recent years the FCC has been criticized in Congress for its failure to resolve “one way or the other” the clear-channel case.

The commission said that it would not act on any application for fulltime stations under the new rules until 90 days after it had been received. Applications will be accepted after Oct. 30 which means that Congress will be in session before any grant could possibly be made. Adding to this timetable will be time allowed for petitions for reconsideration, a virtual certainty, and court appeals.

Somewhat ironically, in refusing to increase the power of the clears above 50 kw at this time the FCC referred to a June 1938 Senate resolution against such an action as “due consideration.”

Specific Conditions • The new full-time Class II stations will be required to operate with a minimum of 10 kw at night using directional antennas. At least 25% of the area or 25% of the population to be served must not receive nighttime primary service from any other station. Additionally, the new rules provide safeguards against undue mutual interference or prohibited overlap from applications on adjacent facilities (within 30 kc of the clear channel involved).

A review of the abundant record makes it “convincingly clear that it would be undesirable to set in motion the simultaneous reallocation of all the Class 1-A clear channels,” the commission said. “The enormity of the consequent administrative burden alone would further glut our license processing and hearing resources and delay not only the achievement of improved service on the clear channels, but additionally delay our strenuous efforts to reduce the excessive and persistent backlog of pending standard broadcast applications.”

Also, the commission said, the present course will give it an opportunity to review and evaluate “as we go along the effectiveness of such reallocations as we herein adopt for some of the channels.” The commission then will have the advantage of such effectiveness in further action toward breaking down the remaining clears, it was stated.

Basic considerations, the FCC continued, “strongly underscore the desirability of breaking down some of the clear channels. To break them all down at this time would be ‘in one stroke crystallize a particular pattern of clear-channel usage which would at least limit and at worst frustrate the future possibilities for employing other techniques of clear-channel utilization,’ the commission said. Cited also was the proposal to allow powers in excess of 50 kw.

“We thus leave open and unprejudiced the question of whether, and if so...
a little disappointment that "public energy which might have gone into establishing general standards was diverted into setting up separate facilities for educational tv."

Government-owned channels might be another way of establishing competition in the area of quality programming, the White House aide suggested in his 1960 discussion. Fuller use of the uhf band could mean more facilities and thus permit the diversification of programming needed to appeal to many audiences, he said.

Dr. Schlesinger implied some skepticism over industry self-regulation:

"... If television cannot clean its own house and develop a sense of responsibility commensurate with its influence, we are bound to come to a government network... If the industry will not undertake to do itself what is necessary to stop the drift into hopeless mediocrity (and, far from showing any signs of doing its leaders deny the reality of the problem and even justify the present state of things by pompous talk about 'cultural democracy'), then it must expect public intervention."

Does the White House adviser watch television? What are his favorite programs?

Dr. Schlesinger smiled in reply: No, he doesn't watch TV much, never has. Recently, however, he has been seeing some good, old movies; that's all there is on the screen when he gets home from his White House duties late at night.

how, the public interest would be served by changing the rules affecting the use of the 12 Class 1-A channels now left in status quo," the commission said. "At such time as further developments, including progress under the changes we now adopt, provide needed additional light on the question we will give further consideration to how best utilize the 12 clear channels not now disturbed."

Basic Considerations  Eight basic criteria were used by the commission in selecting the 13 channels to be duplicated. They included: (1) location of white areas needing service; (2) possibilities for providing a primary nighttime service in those white areas at sufficient distance to protect the existing station; (3) protection to existing co-channel daytime and adjacent-channel stations; (4) interference to stations in bordering countries; (5) avoidance of adjacent channel interference among new unlimited time stations assigned to the Class 1-A clear channels; (6) location of white areas beyond the reach of possible new stations; (7) existing and improved additional skywave services, and (8) the location of Class 1-A stations so situated as to indicate that they would be best adapted to the provision of additional and improved skywave service.

"We conclude that the proper balance between immediate objectives and possible future goals..." can be best achieved by breaking down immediately the 13 channels, the commission said. Here are the reasons the FCC selected the specific channels to be doubled in nighttime service: 880 kc (WCBS New York), 1020 kc (KDKA Pittsburgh), 1030 kc (WBZ Boston), 1100 kc (KYY Cleveland), 1180 kc (WHAM Rochester) and 1210 kc (WCAU Philadelphia) are located at or near the eastern or northern boundaries of the U.S. and "thereby afford maximum opportunity for assignment of the limited time stations in the West..."

Class 1-A stations on 670 kc (WMAQ), 720 kc (WGN), 780 kc (WBBM) and 890 kc (WLS) all are located in Chicago and "still offer useful opportunity for assignment...in the far West." KMOX St. Louis (1120 kc) was chosen because the potential of the channel for providing improved skywave service is considerably limited in all directions because of adjacent channel operations. The remaining frequencies, 750 kc (WSB Atlanta) and 760 kc (WJR Detroit) were chosen to provide new assignments for KFQD Anchorage and KFMB San Diego. Both stations were required to shift from present frequencies (KFMB on 540 kc and KFQD on 730 kc) because of the U.S.-Mexico broadcast treaty.

Specific States  The commission designated specific states where applications would be accepted to cut down delay in getting the new stations on the air and to protect existing co-channel and adjacent-channel stations. Preference will be given to applicants proposing to offer a first nighttime primary service to the largest white area, the commission said.

The new stations will be required to protect the daytime operation of existing Class 1-A stations; nighttime operation within the 0.5 mv/m, 50% skywave field and existing stations of other classes on or adjacent channels. All applications which do not meet standards established by the FCC will be returned, the agency said.

Applications for the new Class II assignments will be processed immediately—ahead of applications in the regular processing line, the commission said. It is "unquestionable that the public interest will be served by proceeding along the least possible delay rather than requiring applicants for the new service to wait until "many hundreds of more routine" nature have been disposed of, the FCC stated.

The FCC will, however, impose a 90-day waiting period following the filing of an application so that opposing parties may file. In placing a prohibition on new daytime grants on Class 1-A clear, the FCC said it has been concerned for some time with the overcrowding of the standard broadcast spectrum without a corresponding gain in service. Under the present circumstances, the commission announced that it would dismiss all pending applications for new daytime stations on the clear channels which could seriously impair future optimum use of these channels.

In addition, processing of applications for new stations on adjacent frequencies to the 12 status quo clears will be deferred and requests for power increases and changes from daytime to unlimited operation on these frequencies will be closely scrutinized for possible effect on future use of the 12 clear channels, the FCC said. Such applications which might conflict with a new Class II station on one of the 13 clears will not be granted until the location and facilities of the Class II operation has been determined. If a conflict then exists, the application would be set for hearing to determine if interference or overlap with the Class II would be in the public interest.

The "freeze" on grants which might conflict with changes in the 12 remaining one-service clear channels will be maintained until Sept. 1, 1964. By that date, the FCC said it "is expected that we will be able to decide the future use of the 12 Class 1-A channels now left in status quo." In the interim, the FCC found it necessary to defer the processing of all applications for new or changed facilities on these frequencies.

An exception was made for 1230 kc and 1240 kc, both Class IV channels, with applications in those bands to be processed and granted during the general freeze.

Related Pleadings Denied  In reaching its final decision, the FCC denied numerous related pleadings, including a request that specific channels be allocated for educational radio. Many other individual requests were denied which, the FCC said, had the reverse effect of that sought in the proceeding, i.e., increased service in areas already receiving multiple radio signals.

The instant proceeding began in February 1945, when the FCC instituted Docket 6741 on 11 issues of wide scope. Testimony was taken during extended hearings in 1946-47 embracing an "encyclopedic variety of approaches." In late 1947, the daytime skywave proceeding was made a part of the clear channel docket. The sky-
wave proceeding later was severed in 1953 and terminated with a final decision in 1959.

In 1958 the FCC issued rulemaking proposing to duplicate 12 of the clear channels (Broadcasting, April 28, 1958) and in December of the same year announced staff instructions proposing to duplicate all of the then 24 Class I-A clear channels (Broadcasting, Dec. 15, 1958). The commissioners were split for many months on whether to break down all, some or none of the frequencies and the case was argued in many executive meetings without a decision being reached. The instant action represents a "considerable compromise" of formerly widely divergent views of individual commissioners, it was pointed out.

Lee, Cross Dissent • Commissioner Lee plumped for adoption of his plan permitting Class I-A clears to increase power to 750 kw. The stations involved would have been given a year to apply for the super power after which each channel would be duplicated by unlimited time Class II stations which would protect the dominant outlet. "This solution appears to me to offer the most substantive improvement in standard broadcast service with a minimum of gimmicks and causes for delay," Commissioner Lee said.

He charged that the majority decision imposes a freeze on 53 channels to permit expedited action on 11 prospective applications, "each one being so highly limited by interference that it can be expected to render nighttime primary service to but scant populations. I submit that the commission's offer of special processing rules to bring new service to less than 1% of the area in the U. S. without such service is hardly the decision the country has been awaiting for the last 16 years. Had the commission deliberately swept the clear channel proceeding under the rug, it could not have done so more effectively."

Also, the commissioner said, the FCC's method of picking the 13 channels to be duplicated is strained and inconsistent. "I submit that it [decision] imposes an unwarranted freeze to foster 11 peanut whistles which may never be constructed," Commissioner Lee said. "Little else is accomplished."

Commissioner Cross said it is "unfortunate" that, after 16 years of consideration, the public has been offered only a "half-solution." He said the basis for selecting the channels to be duplicated will never be understood by the public and therefore the FCC will be subjected to criticism that it acted arbitrarily. The reasons for duplicating 13 channels are just as valid for duplicating the remaining 12, Commissioner Cross maintained.

HILL UNIT PROBING ‘RUNAWAY’ FILMING

A House labor subcommittee is expected to announce a decision soon on whether to hold hearings on "runaway" tv and movie film productions.

Subcommittee Chairman John H. Dent (D-Pa.) returned to Washington early last week from two days of talks in Hollywood with officials of actors' and musicians' unions and with movie industry representatives.

He said the unions are concerned about the economic hardship they say foreign productions of U. S. tv and movie films are causing their members. The movie people, he added, say such productions are necessary because of the high domestic costs.

Rep. Dent found that actors and musicians unions are becoming as worried about the overseas productions of television films as they have long been about the foreign production of theatrical films.

Musicians expressed considerable concern about the scoring of television soundtracks abroad. Phil Fisher, a representative of the American Federation of Musicians, told the congressman that "over 60%" of the tv films shown in the U. S. are scored abroad. He asked for legislation to protect American musicians from the competition of foreign-made recordings.

Rep. Dent talked with four top movie industry officials in Hollywood—Charles Boren, West Coast vice president of the Motion Picture Assn. of America; Y. Frank Freeman, executive vice president of Paramount Pictures, and president of the Motion Pictures Producers Assn.; Walter M. Mirisch, head of the independent Mirisch Co.; and George Seaton, partner in Seaton-Perlberg Productions.

Rep. Dent noted that his subcommittee—on the Impact of Imports and Exports on American Employment—has never looked into the problem of "runaway" film productions. If it does now, he said, hearings may be held in both Los Angeles and Washington. A decision on hearings will be made after he confers with subcommittee members.

Meanwhile, a bill was introduced last week that would go part of the way toward meeting the requests of musicians worried about imports of foreign recordings. The bill (HR 9198), sponsored by Rep. Emanuel Celler (D-N.Y.), would require that music recorded abroad and used for background of U. S. television or radio shows or commercials be identified as reproduced in a foreign country.
No other 5 kw AM transmitter matches ITA for quality features that are basic to the unit. It's the most compact 5 kw AM transmitter ever designed...yet, it remains fully accessible. Your best choice for efficiency and economy—check this line-up of features—AM's best 5 kw buy!

Compromise reached on new USIA budget

Congress last week completed action on a compromise appropriations bill that would provide the U.S. Information Agency with $136.55 million to carry on its radio, television and other world-wide propaganda activities during the fiscal year that began July 1, 1961.

The total is about $2 million more than the House had originally voted for the agency and some $2 million less than the Senate had approved. The administration had requested $151.48 million for USIA.

But even before the two chambers had finished their work on the regular money bill, the House Appropriations Committee approved a supplemental proposal that would increase USIA funds for fiscal 1962 by $4.75 million.

The bulk of the new funds—$3.25 million—would be used for building a radio relay station on the Isle of Rhodes in the eastern Mediterranean to replace the Coast Guard ship Courier.

The remainder—$1.5 million—would help the agency beef up its Voice of America radio and television activities in Latin America and Southeast Asia. USIA had asked $3.611 million for the radio relay station and $1.975 million for the increased radio and television activities.

"Courier" Replacement • The agency has long wanted to replace its Courier facility with a land-based station, but was unable, until this year, to negotiate the necessary agreements with the Greek government.

USIA officials feel the land-based station will have a stronger signal in the Near and Middle East than the Courier’s, and will cost less to operate.

WPST-TV reprieve pends Supreme Court ruling

Chief Justice Earl Warren last week granted National Airlines a stay of the FCC’s order which would have forced its ch. 10 WPST-TV Miami off the air. The stay was given last Monday and runs to Oct. 16, presumably to permit the U.S. Supreme Court to rule on National Airlines’ petition for writ of certiorari. National Airlines asked the Supreme Court to review an appeals court decision of last July upholding the FCC’s 1960 order.

The Supreme Court returns for its October term Oct. 2 and usually acts on certiorari requests within three weeks.

National Airlines’ request for a stay to the Supreme Court came after the U.S. Court of Appeals in the District of Columbia denied a similar request.

In its 1960 order the commission voided the 1957 grant of Miami ch. 10 to National Airlines because principals of the winning applicant had contacted former Commissioner Richard A. Mack off the record. The FCC issued a permit to L. B. Wilson Inc., the only one of the four original applicants found not involved in ex parte activities. L. B. Wilson is awaiting an official go-ahead from the FCC to go on the air. This is being held in abeyance until the Supreme Court rules on the request for review.

Baltimore am grant set aside by FCC

The FCC last week set aside an am grant made at Baltimore last Jan. 9 and sent it back to the hearing examiner to find whether agreements—resulting in the withdrawals of two former applicants for mutually exclusive frequencies—were entirely on the up and up.

The grant last January was to Radio Americana Inc. (formerly Caba Broadcasting Co.). The FCC wants to know whether Radio Americana and two former applicants—Rossmoyne Corp. (for an am in Lebanon, Pa.) and Catonsville Broadcasting Co. (for an am in Catonsville, Md.)—made agreements for withdrawal of Rossmoyne and Catonsville and for substitution of Radio Americana as applicant in place of Caba Broadcasting because all honestly believed the Baltimore applicant had the best chance of winning or because they were motivated by personal gain.

The FCC also wants the examiner to determine if there are any prospective applicants in Lebanon or Catonsville who would be prevented from establishing a new service by a grant in Baltimore.

A petition for comparative consideration, filed by Lebanon Valley Broadcasting Co., a former applicant for an am in Lebanon, was denied last week. Commissioners Rosel H. Hyde, Robert E. Lee and John S. Cross dissented.

FCC survey starts

A special management survey of the FCC by the consultant firm of Booz, Allen & Hamilton, Washington and Chicago, began in earnest last week. Following a Tuesday (Sept. 12) meeting with FCC Chairman Newton N. Minow, a painstaking scrutiny of all the commission offices, practices and procedures was started and will continue throughout the remainder of the year.

A team of up to six experts will be combing the FCC closets to determine how effectively the agency is operating. The $60,000-plus study is under the supervision of, and financed by, the Budget Bureau. It is one of several such surveys being made of government agencies.
Your product is in the Western New York spotlight when you spot your sales effort on WBEN-TV.

WBEN-TV, with its high tower and maximum power, delivers a 15-county area in Western New York and Northeastern Pennsylvania, plus a bonus audience of over 2,000,000 people living on the Canadian Niagara Peninsula.

And you get more than coverage. You get impact! For Channel 4—Buffalo, is the television pioneer of the area—with 13 years of audience loyalty to its credit, over a decade of leadership in audience preference.

KWK's Hamel tells why he lied

RECOUNTS EVENTS THAT LED TO HIS TELLING FCC TRUE STORY

Don Lee Hamel, general sales manager of KWK St. Louis, testified before an FCC hearing examiner Thursday afternoon that he personally hid the prize capsules in the station's two Treasure Hunt contests last year only hours before they were found.

He said he did this under orders from former KWK General Manager William L. Jones Jr. and that up until the day before in each instance he did not know that Mr. Jones still had not hidden the prizes, although he "suspected it" in the second contest.

Mr. Hamel testified that under orders from Mr. Jones he also repeatedly lied about the true facts to KWK principals, KWK counsel and FCC investigators. He said he was "clearly told" by Mr. Jones "not to make myself available" to the KWK owners or the FCC should they seek to question him about the Treasure Hunt prizes.

The hiding of the prizes is a chief issue raised by the FCC in its November 1960 order to show cause why the KWK license should not be revoked (BROADCASTING, Nov. 7, 1960). The hearing began in St. Louis Monday and is to continue this week. Mr. Jones is expected to be called by the FCC to testify. Also involved in the hearing is the former Bonus Club contest aired by KWK.

Decided to Tell • Mr. Hamel testified that it was not until early this year that he realized the seriousness of the matter and decided "the truth had to be known." Up until then and after the FCC order was issued he said Mr. Jones "continually minimized the entire situation."

He said Mr. Jones coached him before meeting with FCC investigators to be sure their stories were alike and said Mr. Jones was "aggravated" over discrepancies.

Mr. Hamel testified that early this year he also had decided to resign because he didn't want to work for Mr. Jones any more. He explained there were problems working with local agencies and advertisers because of the "image" created by Mr. Jones.

Mr. Hamel said that after a KWK board meeting the night of March 28, while drinking and talking with KWK President Andrew M. Spreeis at the Sheraton Jefferson Hotel's Gas House Room in St. Louis, he ended up by telling the truth about the Treasure Hunt contest. Mr. Hamel said it appeared Mr. Spreeis was "shocked" and kept repeating "you're kidding."

He said the next time he told the true story was to KWK counsel just a few days before the May 15 board meeting and he repeated the truth to the board. He testified he also decided to go to Washington and tell the FCC.

KWK Told FCC, Too • KWK counsel earlier had told the hearing that KWK promptly told the FCC too when it learned the facts.

Mr. Hamel said subsequently Mr. Jones became "very friendly" and told him during a coffee break that FCC has a "file" on general managers but not sales managers. Mr. Hamel said Mr. Jones said he hoped to have his own station some day and suggested that Mr. Hamel assume the blame to keep his record clear. Mr. Hamel said he told Mr. Jones it was a "good idea" just so he could get away from Mr. Jones.

Mr. Hamel said the KWK principals never advised him about his testimony except to tell the truth. He said he has no assurance he will still have a job at KWK.

Earlier in the week, two major holiday prize winners in the Bonus Club contest the station ran told about their "unhappy" travel experiences but related that later KWK reimbursed them for extra personal expenses or made a cash settlement.

In both instances KWK voluntarily had awarded them the prizes even though all conditions of the contest had not been completely fulfilled.

Busy Line • Six other local listeners testified about their inability to get through to the special KWK phone number within the required 60-second time limit when their Bonus Club numbers were broadcast. Of these, one admitted he engaged in "penny-ante pilfering" by registering in the contest with four different names even though he understood the rules said only one registration number was allowed and he already had received one prize.

Another of the six learned on the witness stand he could not get a telephone number by merely hanging on the line while the busy signal was buzzing, expecting an automatic connection when it is clear. A third testified she won a $2,000 settlement against KWK in a jury trial. She said she filed suit over her failure to win an automobile because she claimed the busy Bonus Club phone prevented her from being received in time.

Former KWK employees testified that the special phone line was clearly under orders not to be used for outgoing calls and to their best recollection it was not so used during the hourly Bonus Club contests. The FCC's revocation order alleged that the Bonus Club line was busy approximately one-half the time on regular station business.

Three-Thousand Winners • Stipulation entered in the record and agreed to by both KWK and FCC counsel said that in the 95 weeks that the Bonus Club was on the air more than 10,260 numbers were broadcast. KWK officials told newsmen at the hearing that over 3,000 people won prizes, including 23 holiday trips. The stipulation also said KWK got the idea for the Bonus Club from the success of similar contests by two other St. Louis stations and one in Milwaukee but not WEMP Milwaukee which is under the same ownership as KWK. WEMP is not involved in the St. Louis case.

The stipulation showed that KWK Radio Inc., licensee of KWK, is a wholly owned subsidiary of Milwaukee Broadcasting Co., licensee of WEMP. The parent firm includes Andrew M. Spreeis, president and 23.42% owner; Hugh K. Boice, Jr., vice president, general manager of WEMP, 16.23%; John C. Gagliano, treasurer, commercial manager of WEMP, 18.02%; Thomas

Little public interest

During the FCC's revocation proceeding involving KWK St. Louis, the hearing room was generally empty of spectators except for participants and news reporters. Among the few who were there, a few radio and TV stations carried brief reports on regular newscasts. Occasionally a witness would remain in the room after testifying to listen to others.

KWK itself covered the hearing and sent a periodic news report to advertisers and agencies. KWK emphasized the purpose was "not to argue the case for KWK in any forum other than the hearing room at this time. It is simply to provide for those upon whom our economy depends plain and factual information which will incline them in all fairness to accord to the station the right to due process and suspension of judgment that are essentials of American freedom.

"We are confident that fairness will prevail when the record is complete."
T. Dyson, assistant secretary, assistant commercial manager of WEMP, 14.41% and Suzann E. Cleveland, secretary-treasurer, comptroller of WEMP, 9.01%. The officers hold the same corporate titles at KWK. Also stockholders in Milwaukee Broadcasting are Rolland E. Paske, WEMP chief engineer, 5.4%; Earl W. Gillespie Jr., WEMP sports director, 4.5%, and Mrs. Robert Lafollette Jr., 9.01%.

The stipulation said the contract of William L. Jones Jr. as general manager of KWK was terminated by the board May 15, 1961.

The stipulation said that in the spring of 1960 Mr. Jones became concerned "over the continued failure of the station to achieve high audience survey ratings and the business which flows from such ratings" and he suggested the Treasure Hunt contest. It again was noted other stations in St. Louis and elsewhere had had success with treasure hunts.

According to the plan, the stipulation said, Mr. Jones was to hide the prize and he alone would know its hiding place. Two Treasure Hunts were held in the summer of 1960. The Bonus Club ended May 8 of this year. Mr. Jones is expected to be called to the witness stand by the FCC during the hearing.

KWK Protest • FCC Hearing Examiners Forest L. McClennan opened the KWK hearing Monday at the U. S. Court House in St. Louis over the station's continuing protests that the inquiry and order were unlawful. KWK counsel Robert M. Booth Jr. in his opening remarks reaffirmed the station's position that the commission had violated both the Administrative Procedures Act and the due process guarantee of the U. S. Constitution when it repeatedly refused to provide KWK with a bill of particulars on complaints about the contests and when it refused to give the station an opportunity to comply with the commission's requirements before the show cause order was issued.

Mr. Booth at various times said for the record that KWK was being unfairly "surprised" by the last minute disclosure of witnesses and certain exhibits presented by the FCC Broadcast Bureau. The FCC earlier had ruled that KWK would be allowed ample recess after the Broadcast Bureau case to prepare its defense, but KWK contends this procedure also is unlawful. The FCC's case is being presented by Thomas B. Fitzpatrick, assistant chief of the Broadcast Bureau hearing division, and Morton Berfield.

In his opening remarks Mr. Booth pointed out that KWK "has bent over backwards" in cooperating with the commission and when it learned that Treasure Hunt prizes were not hidden

Principals and counsel of KWK St. Louis discuss issues raised during the FCC revocation hearing last week in St. Louis. Standing (l to r): Andrew M. Spheeris, KWK president; Hugh K. Boice Jr., KWK vice president, and John C. Gagliano, KWK treasurer. Seated (l to r): Gerald Smith, St. Louis attorney for KWK, and the station's Washington counsel, Robert M. Booth Jr. and Jack P. Blume. The hearing began last Monday.

in Hawaii all expenses paid" but subsequently all she got were airline tickets for two plus hotel rooms for six days. She said KWK manager Jones told her the tape was destroyed and she was "too poor" to make such a trip anyway.

Mrs. Varble related she and her son finally started on the trip but were bumped off the nonscheduled plane in California to make way for revenue passengers. They returned to St. Louis by bus. KWK later settled with her for $3,000 when it learned how the trip turned out. She testified her lawyer got $1,000 of the sum.

Mrs. Alice Stranz testified her husband's Bonus Club number was broadcast, she responded and KWK awarded her the multiple prizes even though the registrant personally was supposed to phone. She won a minst stake, wristwatch, trading stamps and an all expenses trip for two to Las Vegas. She described disappointment over the stolen watch though KWK made amends.

Stuck In Las Vegas • Mrs. Stranz said she and her husband were refused their flight back to St. Louis because it was already full and they came back later on another plane after KWK manager Jones who happened to be there too, gave them part of the fare. KWK later reimbursed them for the rest, Mrs. Stranz said.

Gordan Eggers, who had been St. Louis manager for Transcontinental Airlines Agency Inc., testified about the half-cash half trade-out advertising
From both England and America, here is the new systems and equipment—much of it solid-state.
Now in one integrated line: everything in the video-audio spectrum from cameras and monitors through solid-state terminal equipment, switching, distribution and studio intercom systems to mobile vans and video recording tape—including just about all the components in between. And, all of highest quality. Some from England’s EMI Electronics, Ltd., one of the world’s largest electronics companies and developer of the first public TV system. More from our own manufacturing plant, the recently acquired General Communications facility of Fort Atkinson, Wis., a highly regarded developer of solid-state systems. We offer planning and design service, too, as well as 24-hour availability of parts and service. For details, write, phone or wire. Los Angeles 28, California: 1750 No. Vine Street, HO 2-4909. New York 36, New York: 315 W. 44th Street, CI 5-1216.

EMI/US General Communications Division
contract with KWK. He said prize winners were told in a letter the terms were “space as available,” and employees were to do advise them. He said the majority of such trips went as scheduled. Mr. Eggers said the TCA contract was with KWK and therefore TCA had no responsibility to the due-bill passengers.

The former TCA manager said he actually got more complaints from the Better Business Bureau about revenue passenger problems: he said other stations and media had used trade-out with TCA at St. Louis in addition to KWK.

Charles R. Thurber, trade practice consultant of the Better Business Bureau, said routine alerts about TCA had been sent to KWK. He could not say whether some contest complaints might properly have concerned other local stations and other promotions. He did testify however that his letter to the FCC, in reply to inquiry from the commission, was not a complaint and only contained unverified “information” from his file.

House Judiciary blesses sports-package tv bill

Legislation that would legalize such contracts as the recently outlawed National Football League-CBS-TV package agreement continued to move through Congress last week, winning the approval of the House Judiciary Committee.

The bill (HR 9096), sponsored by Committee Chairman Emanuel Celler (D-N.Y.), is designed to offset a federal court ruling that the two-year, $9.3 million NFL-CBS television contract signed last spring violates a previous antitrust decree. The bill specifically permits professional football, baseball, basketball and hockey leagues to enter into package tv deals without danger of violating antitrust laws.

In approving the bill, the committee broadened one of its provisions designed to protect college football from the effects of professional football telecasts. It would prohibit telecasts under package contracts on Friday nights, Saturdays and Saturday nights from the second Friday in September until the second Saturday in December. Originally, the proposed prohibition applied only to Saturday afternoons between mid-September and mid-November.

WGMA sale cancelled

Time ran out last week on the proposed sale of WGMA Hollywood, Fla., after the transaction was held up last spring pending resolution of the station’s license-renewal troubles. The FCC dismissed its order setting the $265,000 sale for hearing when the deadline passed for implementing the contract and application was withdrawn.

Meanwhile, the WGMA renewal hearing, scheduled for Oct. 17, is to be rescheduled at a prehearing conference Sept. 21. The proposed station sale to Kingsley H. Murphy Jr. and Carroll E. Crawford (Broadcasting, April 17) was held up by the FCC and its license renewal set for hearing for an investigation of the character qualifications of one of its owners, Daniel Enright, who was implicated in the 1959 TV quiz scandals.

MURROW LOOKS AT TV
Says medium is failing in information function

Edward R. Murrow, longtime CBS commentator and now director of the U.S. Information Agency, last week mourned the failure of television to uplift the American electorate to new levels of political awareness.

Yet, he said, it is not entirely television’s fault: “Television by itself,” he said in a speech to the Poor Richard Club of Philadelphia, “does not usher in the democratic millennium, and its inability to do so is not its own peculiar failure. It is due to the unwillingness of men and women, even in as highly developed a democracy as our own, to take more trouble to govern themselves better.”

In a totalitarian state, Mr. Murrow said, television will be directed to distract or entertain the people—not to teach them self-government—for “an oppressed people will surely need to be distracted if they are to be ruled by a despot.”

“Is it not, then, ironic,” said Mr. Murrow, “that we in the United States who ask so much entertainment from television, so much escapism, so much insulation from reality, are not having such programs imposed upon us by force?”

Yet those who control television, he said, have the duty “to use it as a sound mirror to reflect conditions as they are. . . . Television must find a little more time to remind us of our inheritance, and it must find more time for the dissenters, the heretics, the minority spokesmen who may be tomorrow’s majority.”

Wider Circulation • Television, said Mr. Murrow, offers no guarantee against the seizure of power by demagogues. “It merely provides them with wider and more intimate, more immediate circulation,” he said.

The probability is that television will neither save nor destroy the nation, said Mr. Murrow. “It will, however, play an increasingly large role in our lives, and it may come to influence us greatly. The issue, I would suggest, is not so much what television does to us; it is rather what we do with television.”
RECREATION EXPLOSION

When the new American isn't hard at work, he's busy having fun. He's off to skin dive or play golf or water ski—or to do any of a thousand-and-one other things. He likes his leisure lively.

He doesn't care how far he has to go to find his favorite recreation. His car takes care of that. He just packs up his family and gear—and goes.

At the American Oil Company, we're known for petroleum products and service that help put more pleasure in his going. Our company was formed from three great regional petroleum companies who know what motorists in their areas need and want.

And we are always looking for new ways to improve our products and service. The output of our refineries is precisely planned by electronic computers. They help us tailor the gasoline to fit exactly the climate and altitude of every part of the country. These computers make the right decisions with a speed and accuracy totally impractical by any other known method.

You expect more from American—and you get it!

AMERICAN OIL COMPANY
SUMMIT MEETING ON FORMS

FCC schedules conference with broadcasters who conducted tests of proposed program logs

The FCC thinks it would be "useful and constructive" to talk with broadcasters about what they learned from field tests of program logs held at several radio and tv stations last week under NAB auspices (see story page 51).

The agency accordingly agreed last week to a request by the NAB for a conference-type discussion of the stations' findings and scheduled a public session for that purpose Oct. 6 at 2 p.m. in the FCC's meeting room in Washington.

The FCC's agreement to such a meeting as part of its proceeding on proposed rulemaking to change station program logs was announced Thursday by Chairman Newton N. Minow, who said the broadcast industry participants are to be selected by the NAB. Representatives of the NAB and of the FCC also were to meet last Friday in Atlanta to discuss the program log tests and the FCC's other activities in the field of radio and tv programming (Broadcasting, Sept. 11).

Mr. Minow made the announcement of the Oct. 6 meeting in a letter to Gov. LeRoy Collins, NAB president, in answer to Gov. Collins' letter requesting such a session. The NAB president said the association feels an informal, oral discussion of the program log tests is desirable, even though the NAB will make a formal filing by Oct. 2 (the deadline for comments) on its findings.

Broadcasters' Side Gov. Collins in his letter said NAB contemplates that the presentation to the FCC will be made by a number of active broadcasters "broadly representative" of the several segments of the industry. No prepared statements or representation by counsel are planned, Gov. Collins said, since broadcasters want to give first-hand accounts of their experiences with the test log and to express their concern about the burdens and handicaps they anticipate if the FCC proposals are adopted. Gov. Collins said NAB thinks three hours will be long enough for the meeting.

Among comments filed up to last week on the rulemaking proposals:

Magie Number KREX-AM-FM-TV Grand Junction and KREY-TV Mon-trose, both Colorado: Rex G. Howell, president, said he feels the emphasis on the number of spots raises the question of whether there is "some magic number" which would meet the FCC approval. If there is, that's censorship, he said. The licensee should be responsible for determining the number of spots and types of programs and conditions vary too much for the FCC to set rigid standards, he said. He thought the FCC ought to set up a voluntary plan where-by the licensee submits, in narrative form, all data he thinks is pertinent.

KCID Caldwell, Idaho: Clair B. Hull, president, said he doesn't understand what can be proved by requiring a station to report on a selected week. Any report a station makes on community needs would be "superfluous," since the station must be on its toes or it won't survive. The reduction of talks with community leaders to written form would be an unending job, he thought.

Empty Real International Good Music Inc.: This licensee—KGMI-FM Bellingham and KGMJ (FM) Seattle, both Washington; KGMG (FM) Portland, Ore.; and KBAY-FM San Francisco, KFMU (FM) Los Angeles, KFMW (FM) San Bernardino, KTSF (FM) San Diego, all California—thought reports on how complaints are handled would be an "empty" ritual because the test of a licensee's response to such situations is "his performance."

IGM felt "selected week" logging should be optional, so that a licensee could make an additional showing for this period if he felt the "composite week" report did not do him justice.

United Press International: The news service objected to proposed classification of wire news copy as "recorded," saying this would be an unrealistic description. The proposal would classify a news report in the same category as rock and roll, though the difference is "manifest," UP said. A reading of wire service copy, even verbatim, is no more "recorded" than is the reading of the script of a play, the news service said.

KWTX-TV to ask FCC to reconsider order

KWTX-TV Waco, Tex., plans to file this week a petition for reconsideration of the FCC's hearing order on the station's application to increase power from 107 kw to 225 kw and increase antenna height from 520 ft. to 1,140 ft.

The station will maintain that LBJ Co., which owns 29% of KWTX-TV, does not exercise control, an issue questioned by the FCC. A hearing was ordered to determine whether LBJ's KTBC-TV Austin and the Waco station are under common ownership, among other issues (Broadcasting, July 31). Majority owner of LBJ Co. is Mrs. Lyndon B. Johnson, wife of the Vice President of the U. S.

LBJ Co., which is not a party to the hearing, is represented legally by the Washington firm of Cohn & Marks and not Edward Kenahan, as reported a week ago (Broadcasting, Sept. 11). Mr. Kenahan's firm, Spearman & Rober-son, represents KWTX-TV.

Rochester tv stations reply to appeal on sale

No injury to the public would result from a $6.5 million ownership realignment deal, three Rochester, N. Y., television stations told the FCC last week. On the contrary, injury would result if the deal is not consummated.

This was the reply by WROC-TV, WVET-TV and WHEC-TV to a petition filed by the American Federation of TV & Radio Artists and the National Assn. of Broadcast Employees & Technicians for a stay of the commission's consent to the deal (Broadcasting, Sept. 11). The two unions had claimed in the petition the deal sought to obscure their contractual rights without prior consultation. Already approved by the FCC without a hearing, the transaction involves the purchase of WROC-TV ch. 5 by ch. 10 shareholders WVET-TV (Veterans Bstg. Co.) and WHEC-TV (Gannett newspapers). WVET-TV would then relinquish ch. 10 and take over ch. 8.

In replying to NABET and AFTRA, the three stations claimed that possible injury to union members—a maximum of 23, the stations said—who would be affected by the deal is far outweighed by inconvenience to the public if the stay from Federal court is granted. The three stations also pointed out that the 16 NABET members would receive seven to eight weeks' severance pay as well as cash payments for unused vacations, and the seven AFTRA members would get at least two weeks' pay plus vaca-tion money.

AFTRA and NABET previously had been denied a stay by a U. S. court in New York.

Closing of the $6.5 million transaction was postponed last week pending the outcome of the stay request.

Additional power given to Opinions & Reviews

One of the major due-process stumbling blocks within the FCC was corrected last week when the agency announced that henceforth its Office of Opinions & Reviews would be permitted to make recommendations to the commission on adjudicatory matters.

The past divergences of the commission from its own recommendations by public Law 87-192 (FCC reorganization) (Broadcasting, Sept. 4). In addition, the FCC now is free to ask
for and receive advice from its general counsel and chief engineer, both formerly prohibited under separation of function requirements.

In the past, the Opinions & Reviews office has been required to ask the FCC for instructions without presenting recommendations. This has necessitated the placing of items on the meeting agenda two separate times when in many instances one could be made to suffice. Donald Berkemeyer is chief of the office.

FCC Chairman Newton N. Minow said last week that other administrative changes made possible under the reorganization bill still are under consideration within the commission. Among other changes, the new law permits boards of commissioners to make decisions rather than requiring all seven members to act on each case.

**DRUG AD CLAIMS**

Ribicoff backs proposed law requiring manufacturer proof

Secretary Abraham A. Ribicoff of the Dept. of Health, Education & Welfare, last week gave administration support to a bill that would tighten up drug-advertising regulations.

He said drug manufacturers should—as the bill (S 1552) would require—prove their products are effective before being permitted to market them. Present law requires only that drugs be proven safe.

Secretary Ribicoff, who testified before the Senate Antitrust Subcommittee, said he didn't feel a new drug should have to be proven "better" than another already on the market. But a manufacturer should be required to prove his claims are factual, he insisted.

The Welfare Secretary criticized drug manufacturers' "extravagant advertising and promotional campaigns" on two counts. He said the claims made are not always "accurate or wholly truthful" and that the campaign's cost contributes to an "unreasonably" high price charged the consumer for many drugs that are essential to "maintenance of health and even life itself."

**ITU treaty gets committee okay**

The Senate Foreign Relations Committee has approved the International Telecommunications Convention, which went into force last Jan. 1 for the 35 countries that had ratified it. The treaty, an extension of a previous agreement, constitutes the bylaws for the International Telecommunication Union, which serves to coordinate all forms of communications activities of member nations. The treaty, which has 97 signatures, was signed in Geneva in 1959.

**FCC TO GET NAB LOG TEST RESULTS**

Completion due over past weekend, analyses due this week

The field testing of two NAB versions of station logs was to be completed by last weekend, and results are to be analyzed this week for submission to the FCC.

The NAB logs (Broadcasting, Sept. 11) are designed (1) to meet the full specifications the FCC has proposed for revised logs, and (2) to supply what NAB hopes will be adequate information for Commission needs.

Both NAB and FCC representatives took part in an industry conference on logging forms, scheduled Sept. 15 in Atlanta. It was titled South East Radio-Tv Seminar and was under sponsorship of the Georgia Assn. of Broadcasters (see story, page 57).

Representing the FCC were Kenneth A. Cox, chief of the Broadcast Bureau, and H. H. Goldin, chief of the Economics Division. NAB sent Vincent T. Wasilewski, executive vice president, and Douglas A. Anello, general counsel.

NAB selected cross-sections of radio and tv operations for its dry run of the

**WMCT/ MEMPHIS** features more local interest programs than all other Memphis TV stations combined!

In fact, locally-produced programs that serve the community's needs and interests have been a major effort of WMCT for over twelve years. Here are a few.

1. Mid-South Today — the area's only daily television farm information program.
2. Your Esso Reporter — Memphis' top rated television news cast for over nine years.
3. Looney Zoo — the most popular children's show in the Memphis market.
4. News Specials — the largest TV news staff in the Mid-South prepares special programs on local events.
7. Sports — golf, bowling, and other leading sports action is covered by WMCT's mobile unit.
8. Pride of the Southland — amateur talent show seen every Saturday morning.
9. TV Chapel (Religion) — live religious program featuring a different church each week.
10. Remotes — on-the-scene live coverage of important Mid-South events.

*If it's of interest to the Mid-South, it's of interest to WMCT*

**BROADCASTING, September 18, 1961**
two forms. The association has been in touch with the FCC in its efforts to develop logging forms that won’t prove heavy burdens on stations.

Tests Last Week • The NAB No. 1 form, designed to meet all the proposed Commission requirements, was used the first three days of last week (Sept. 11-13) by the test stations. Its simplified No. 2 form was used the last three days of the week.

Among stations taking part are: Radio — WMAR-TV Baltimore; WTVL Waterville, Me., and WABI Bangor, Me. TV stations: WTVL-TV Great Falls, Mt.; KXLF-TV Missoula, Mont.; WWDC Washington, D.C.; WIBW-TV Topeka, Kan.

NAB’s No. 2 form eliminates logging of all call-letter announcements except the statutory half-hour announcement. A basic change that would effect major relief in the apparently burdensome logging requirements centers around the “announcement times” entries. NAB has removed the commercial continuity entry in favor of a general statement of station policy in handling commercials (adherence to NAB codes, for example).

Stations would still log on-and-off times for spot announcements and non-commercial announcements. But it would not be necessary to log every piece of commercial continuity in commercial programs.

Finer Points • A practical problem involved in commercial logging arose the first day of the NAB tests. A test station found itself involved in the problem of logging commercials in an informal interview program originating in a store. For example, suppose a customer being interviewed happens to mention an item bought at the store. Is this a commercial and must it be separately logged? And how about personality programs? Must a stop watch be used, requiring extra personnel?

In NAB’s No. 1 form a separate line is required for every change in program content. A five-minute program might require as many as eight or nine entries, in some cases. The number of entries will be sharply reduced in the No. 2 forms, NAB felt as the testing of No. 1 form was completed Wednesday.

A basic problem in the whole logging confusion arises because FCC’s present logging forms do not provide all the information needed by stations to fill out license renewal applications, according to some broadcasters. As a result, large numbers of renewal applications have been based on estimates rather than precise figures on programming, it was indicated.

No Pin-pointing • NAB’s No. 2 form eliminates the need for log entries of network commercial continuity and it is based on the feeling there is no need for stop-watch accuracy for individual commercial messages. And NAB feels there is no need to measure accurately the amount of local news in each newscast. This local news entry is eliminated in form No. 2.

Dodd to keep door shut a little longer
CITES NEED TO UNTANGLE CONFLICTING TESTIMONY

The Senate Juvenile Delinquency Subcommittee, which has taken its television inquiry behind closed doors (BROADCASTING, Sept. 11) intends to keep the hearings private for another two or three weeks. The purpose, Subcommittee Chairman Thomas Dodd (D-Conn.) said last week, is to give him an opportunity to try to unravel, in private, what he considers a tangle of conflicting testimony given the subcommittee since public hearings began in June.

The subcommittee, which is investigating the effects, if any, of television crime and violence on juvenile delinquency, has been directing a major share of its attention to pinpointing responsibility for the amount of sex and violence on television.

And although no one connected with the subcommittee will discuss the closed sessions, Sen. Dodd made clear that this is the question under study.

The subcommittee first went out of sight two weeks ago when it took testimony on successive days from David Levy, NBC’s former vice president in charge of programming, and Robert E. Kintner, NBC president. Additional closed sessions were held on Sept. 8 and 11, but the names of witnesses were not disclosed. Further executive sessions will “probably” be held this week, according to Sen. Dodd.

He said the subcommittee intends to resume open hearings at a later date. But in the meantime, he said, he wants to “resolve conflicts” in testimony given the subcommittee. He said there were “several” such conflicts and that the subcommittee is trying to get at the facts by hearing “all sides.”

Who’s Responsible? • In this connection he implied that serious accusations about responsibility for excessive sex and violence on television have been—or are expected to be—made in the closed sessions. “People want these hearings public,” he said. “But I want them to be factual. I want every aspect checked in advance.”

Sen. Dodd would not specify the
Get the high quality you require with the new General Electric
GL-8093 Image Orthicon

GL-8093/ZL-7803—3-inch image orthicon specifically designed with video taping in mind. *This one has it!* High signal-to-noise ratio (peak-to-peak signal vs. [RMS] noise—min. 38, av. 50) and improved definition you need for critical video tape recording. Yet, it is competitively priced with standard camera tubes. Key to its high signal-to-noise ratio is an improved target-mesh assembly in the scanning section which improves your picture quality... provides sharp transition from black to white without white edges. This also improves flatness of field and corner resolution—helps prevent distortion.

The GL-8093 is especially recommended for critical video tape recording work, such as found in network centers and tape production centers. Its good definition and improved signal-to-noise ratio are important features where numerous copies are made from an original tape, as in many educational programs, and for those productions where you can’t settle for less than top quality.

The GL-8093 will save you set-up time—reduce the need for compromise between sharpest focus and minimum background blemishes. It is interchangeable with the 5820, 5820A, 7293, 7293A and 7513. Try this new G-E image orthicon in your own cameras. You’ll like the difference it makes in your video tape recording work.

For more information, call your General Electric tube distributor or write for descriptive literature, ETR-2801, to General Electric Company, Room 7246B, Owensboro, Ky.

the FCC public but the intermixture in Rep.
itson, average members; and some producers, to complete the circle, have blamed the networks.
The closed sessions weren't prompted exclusively by the testimony given conflicts in testimony that concerned him. But during the public hearings, network officials have blamed tv writers for the amount of sex and violence in their shows; the writers have blamed producers; and some producers, to complete the circle, have blamed the networks.

The inquiry is being urged most forcefully by members—both Democrats and Republicans—whose states are affected by the FCC's proposal to delete vhf channels from eight markets and shift the stations involved to uhf bands (Broadcasting, July 31).

Prominent among those calling for the hearings are Reps. Peter F. Mack Jr. (D-Ill.) and William L. Springer (R-Ill.), two veteran members of the commerce committee. Both are primarily concerned with the proposed loss of ch. 3 at Champaign, Ill.

Two freshmen legislators are also behind the move—Reps. Vern Thomson (R-Wis.) and Abner Sibal (R-Conn.). Rep. Thomson, who has protested the proposed deletion of ch. 3 from Madison, Wis., has introduced a resolution (H Res 450) asking the FCC to delay its deintermixture plans pending the completion of its $2 million uhf study in New York. (Broadcasting, Sept. 4.), Rep. Sibal has joined with the seven other members of his state's delegation in opposing the removal of ch. 3 from Hartford (Broadcasting, Aug. 21).

No decision on the form or scope of the proposed hearings has been made, but Rep. Springer feels the whole deintermixture problem should be examined. There are so many questions of public policy involved, he said, that Congress has the "duty" to review the FCC proposal to determine if it is in the public interest.

Among those who would be expected to testify at the hearings are officials of the stations affected by the deintermixture plan, as well as viewers whose television service might be curtailed or eliminated. Rep. Springer predicted a number of bills dealing with deintermixture would be introduced, and said he expects to offer one himself. These, as well as Rep. Thomson's resolution, could be considered at the proposed hearings, he said.

The FCC, which has extended its deadline for filing proceedings in the deintermixture proposal to Jan. 2 (At Deadline, Sept. 4), will probably take several months to arrive at its final decision. This would give the committee ample time to hold hearings.

KDB, WKKO granted short-term renewals

The alleged failure of two stations to live up to their programming proposals was cited by the FCC last week in granting the two licensees renewals for less than the normal three-year period.

KDB Santa Barbara, Calif., received a license renewal to Dec. 1, 1962, and WKKO Cocoa, Fla., to Sept. 1, 1962, and both stations were told their past actions fall short of the degree of responsibility to the public the "commission has a right to expect of its licensees." The KDB application has been pending nearly two years and, the commission admonished, the renewal granted is considered the equivalent of a short-term renewal.

The commission charged that KDB's programming during the past license period was "inconsistent" with proposals made in a July 1959 application for sale and that subsequent statements by the licensee, KDB Broadcasting Co., raised questions whether KDB intended to carry the programming listed. There are "disparities" between proposed and actual live programs and commercial spots in the 1959 renewal application and in the transfer application, the commission said.

Commissioners Rosel H. Hyde and T. A. Craven dissented to sending the FCC letter to KDB explaining the short-term renewal.

Percentage Troubles * In censuring WKKO, the commission compared programming proposals contained in a 1959 application for approval of the sale of the station to WKKO Radio Inc. with actual composite week pro-

gramming listed in the station's pending renewal application. According to the FCC, these percentages were proposed by the present licensee at the time of the sale:

Live, 14%; entertainment, 70%; religious, 6%; agricultural, 1%; educational, 2%; news, 17%; discussion, 2%; talks, 2%; with 944 commercial spots during an 84-hour week. WKKO's renewal application listed the following actual performances, the commission said: Live, 6.6%; entertainment, 82.9%; religious, 0.6%; agricultural, 0.0%; educational, 0.0%; news, 11.5%; discussion, 0.0%; talks, 3.4%; civic, 1.6%, with 1,461 commercial spots.

After an earlier commission inquiry, WKKO in March amended its application to include proposed religious, agricultural and discussion programs and to reduce the number of spots from 1,461 to 1,170 weekly. The commission said the station's actual programming, when compared with representations made when the present licensee acquired WKKO, "falls short" of the performance expected.

In letters to both KDB and WKKO, the commission cited its policy-making decision in the KORD Pasco, Wash., case (Broadcasting, July 17).

-EQUIPMENT & ENGINEERING-
STEREO AT HI-FI SHOW
Immediate future will spell success or failure for it

Controversy over the uncertain future of an infant medium—stereophonic broadcasting—dominated the 11th annual High Fidelity Music Show which opened in New York on Sept. 14 and concluded yesterday (Sept. 17).

The some 125 exhibitors, who showed more than $6 million worth of the latest advances in fm, hi-fi and stereo equipment to more than 30,000 visitors, apparently are all agreed on one thing: that the four-month old multiplex stereo broadcast industry (multiplex stereo broadcasting was approved by the FCC in April and stations were allowed to start using the system on June 1) (Broadcasting, April 24) is entering its make or break stage. On most other issues suspicions and recriminations reigned free.

A spokesman for WNCN (FM) New York, one of four metropolitan New York fm stations broadcasting on an irregular basis from the Hi-Fi Show, told Broadcasting that stereo manufacturers big and small will have to give more advertising support to stereo programs if they want the industry to thrive. WNCN (FM) currently is broadcasting only monaurally, but hopes to do some stereocasts before the end of the year.

The Future • A Broadcasting survey of about a dozen exhibitors at the

Check this equipment against any other for compactness, efficiency, reliability, design and low maintenance requirements—and you will see why the SPOTMASTER Cartridge Tape Recorder is the recognized standard of the industry. And why not? It is the most field tested and field proven cartridge equipment manufactured anywhere. Just insert a cartridge, push a button and your spot is on the air, instantly—on cue, on time, every time with no fluffs—only the highest quality sound for every client. New heavy duty deck with hysteresis synchronous motor, at no increase in cost. SPOTMASTER is available in the BE500 combination recorder-playback model and BE505 companion playback model. For further information wire or write today.

SOLD NATIONALLY BY

BROADCAST ELECTRONICS INC.
8802 Brookville Road, Silver Spring, Maryland, Dial 708-4983

BROADCASTING, September 18, 1961
show, indicated that all the stereo component producers are convinced that the future of the new industry, in varying degrees, will affect the future of them all. With the exception of one prominent component producer, all said they're now advertising on at least one of the 50 or so stereo shows programmed by the approximately 20 stations currently engaged in fm stereocasts, and that their participations are likely to increase with the advent of more stereo outlets. But the exhibitors were unanimous in the belief that they are too small to subsidize a comparatively expensive and demanding medium like stereo. They say that the bulk of advertising billings for the prodigy's growth (development they would love to see) will have to come from the big electronics industries manufacturers such as General Electric or RCA. Other likely beneficiaries for the orphaned industry, they feel, are those heavy-budgeted advertisers whose products would sound extra inviting when described via the majestic tones of stereo.

Among exhibitors canvassed, H. H. Scott Inc., Maynard, Mass., which exhibited a wideband fm multiplex adapter ($99.95) and a new wideband stereo fm multiplex tuner ($199.95), said that it is all for supporting stereocasts with ample advertising billings, and is in deed doing so. The component manufacturer currently is sponsoring a half-hour a week on WQXR-FM New York, three half-hours on WDHA (FM) Dover, N. J., 200 spots a week on WLIR (FM) Garden City, N. Y., and has similar campaigns started or contemplated in every major city in the country where stereocasts are carried. Sherwood Electronic Labs, Chicago, which exhibited an fm multiplex stereo 64-watt receiver ($299.50) and an fm multiplex self-powered adapter ($69.50), said it is doing some advertising on stereocasts as part of co-operative deals with its dealers. Included among the stereo programs it sponsors are ones on WJBR (FM) Wilmington, Del., WFKM (FM) Chicago, and WFLN-FM Philadelphia.

Fisher Radio Corp., Long Island City, N. Y., which exhibited a 65-watt fm stereo multiplex receiver ($359.50) and MPX-100 stereo adapter ($89.50), said it is represented on stereo programs of KFMU (FM) Los Angeles, WFKM (FM) Chicago, WQXR-FM New York, and WDHA (FM) Dover, N. J.

Bogen-Presto, a division of the Siegler Corp., Paramus, N. J., which exhibited a multiplex fm stereo adapter ($69.50), among other products, said it is "highly in favor" of advertising on stereocasts and hopes to advertise more than it has, as more stations program stereo shows.

A Dissent McIntosh Lab Inc., Binghamton, N. Y., which will be showing its fm stereo multiplex equipment for the first time next month, but which exhibited other products, is not interested in stereocasts. The company currently is not advertising on any stereo program. "Why should we subsidize a radio station?" the manufacturers' representative asked when questioned at the show, "Besides we manufacture fine equipment," he asserted, "and a radio station can't duplicate the sound we give our customers."

**Fm stereo complaints aired at EIA meet**

Highlights of last week's Electronic Industries Assn.'s fall meeting in New York included a retort to complaints from fm stations that equipment manufacturers haven't been supporting their efforts to launch stereo broadcasts.

Others were: the approval of an advertising code to be followed voluntarily by radio-tv-phonograph manufacturers, distributors and dealers, and the appointment of an advertising agency to handle an informational program at the grass roots level to seek support for protective legislation against the flow of electronic imports.

A high priority subject at the EIA radio section's meeting: how to make radio listeners aware of the life-like music available on fm stereo. The group decided an EIA-sponsored national promotional campaign would not be considered until fm stereo itself is nationwide. It's believed that stations devoted to such broadcasting will be too "spotty" to warrant a campaign at least during the next few months.

In answer to station complaints about lack of advertising and promotional support, the committee agreed that for the time being where stations do a "first-rate programming job" there will be little trouble selling time. The station progress report included enthusiastic approval of the way KPEN (FM) San Francisco is handling its stereo operation (see page 66).

The EIA's consumer products division approved plans to go ahead with the compilation of an advertising code designed basically for the protection of consumers.

The parts division of the EIA has named Henry J. Kaufman Assoc., Washington, D. C., to prepare material aimed at informing small U. S. electronics manufacturers of the dangers to their business from the increased importing of foreign equipment.
Burdensome logs could hurt tv quality

THAT'S OPINION TESTERS GIVE SOUTH EAST RADIO-TV SEMINAR

Dry-run logging by two Georgia television stations has demonstrated that the FCC's proposed overhaul of logging and renewal regulations will prove burdensome and affect the quality of programming, the South East Radio-TV Seminar was told Friday at Atlanta.

Reports of these tests, completed Thursday, were presented to the opening session of SERTS Friday morning as approximately 100 broadcasters from states east of the Rockies assembled to discuss the affect of the new FCC proposals (story on NAB logging tests page 51).

Marcus Bartlett, WSB-TV Atlanta, and Frank Ragsdale, WTVM (TV) Columbus, Ga., described the problems they encountered in their efforts to learn the practical impact of the FCC proposals. WSB-TV used its existing logging forms; WTVM used a form developed after three weeks of study.

Training Needed • WSB-TV found right at the start that it faced a problem in training personnel to keep accurate logs. After a week of testing the station still had trouble interpreting some of the FCC's requirements.

Mr. Bartlett said more time is consumed keeping log on four- or five-second items than the event itself. WSB-TV's experience, which was based on use of its normal logging forms, suggested it is unnecessary to log both starting and ending time. "The next item usually begins immediately following the last item," he said.

The audio man at WSB-TV normally keeps the tv log. During the trial run he was unable to keep the log and handle his audio work normally. "One or the other had to suffer," Mr. Bartlett explained.

Entries Tripled • This basic conclusion came out of WSB-TV's experience, he said: "The proposed requirements necessitate approximately three to three-and-one-half times as many individual entries as our present log."

In the case of network shows, a literal interpretation would require separate entries for audio and video for closing credits on video and the "stay tuned for the next program" audio announcements.

Mr. Ragsdale said his tests showed the absurdity of the FCC's requirement for both on-and-off log entries. He said his staff felt the time-consuming logs would lead program personnel to follow rigid time patterns in their programs. Newscasts, they believed, would eventually adhere to fixed local-national-inter-

national time segments regardless of the relative importance of news developments at time of broadcast. FCC's proposal calls for logging of local news in newscasts.

At WAVM three fulltime announcers keep logs. In the test they kept both normal operating sheets and test logs. WTVM's experience suggested the mass of paper work would lead to curtailment of public-service announcements because so many on-and-off entries are required. The staff couldn't see any purpose in logging on-and-off entries for each spot in a commercial program. Because of the logging, it was noted, some scheduled program material was lost.

TULSA'S

Finest

NEWS DEPARTMENT

KVOO-TV is the ONLY Oklahoma television station to receive the 1960 United Press International Broadcaster's Award. Another reason why KVOO-TV is Tulsa's finest station.
CBS Radio's Hayes sees black ink ahead

Black ink, not red ink, will dominate talk of the CBS Radio network's financial position when the CBS Radio Affiliates Assn. meets in New York today (Sept. 18) and tomorrow in its eighth annual convention.

CBS Radio President Arthur Hull Hayes is slated to tell the 175 to 200 affiliates on hand that, despite rocky going during the general recession that marked the first half of this year, a bounce-back in sales since then virtually assures that the network will not operate at a loss during 1961's second half.

Mr. Hayes also is hopeful that this gradually rising curve will continue into 1962 and beyond, based on an apparent reawakening advertiser interest in network radio.

This optimistic outlook contrasts sharply with the red-ink reports that have consistently marked the accountings of network operations at CBS Radio conventions during the past few years. Although the CBS Radio division as a whole—including owned stations and CBS Radio Spot Sales—has never failed to show a profit, the network part of the operation has lost money since the early 1950s when the rise of television sent all radio networks into a slide that only in the last year or so has begun to bottom out.

PCP • Results of the Program Consolidation Plan, to which the network attributes much of its success in stemming its losses, also will be presented to the affiliates. Under PCP the network cut back on its entertainment programming, increased its news and information broadcasts and introduced a new station-compensation plan in which payments for clearances are made in programs which the stations may sell locally.

Mr. Hayes' report, dealing with major areas of network activity and network-affiliate relationships, will be the keynote of the network's presentation during the two-day meeting, to be held at the Waldorf-Astoria starting at 10 a.m. today (Sept. 18).

Dr. Frank Stanton, CBS Inc. president, will address the luncheon session tomorrow.

John S. Hayes, WTOP Washington, is chairman of the affiliates association, and J. Frank Jarman, WDNC Durham, N. C., is convention chairman. Officials foresaw a record or near-record attendance, based on advance registration of 171 representatives of 116 affiliated stations as of early last week.

New officers, executive committee members and convention commitsenees will be named and take office at the Tuesday luncheon.
Are you moving, too?

Monday, September 18, Videotape Productions of New York, Inc. moves into America's great new Videotape Center at 101 West 67th Street, New York City

Videotape* is really on the move—and for a very good reason! The rapid succession of recent technological advances in Videotape has been moving more and more creative advertising people and their clients from film to Videotape. To accommodate this trend we are tripling our size and operation, moving into our great new multi-studio complex—Videotape Center. The electronic compatibility of Videotape and the television system, the reason for the vastly superior picture and sound quality of Videotape, has won more and more decision makers in advertising to tape as an improvement over the limitations of film for television. Certainly Videotape has come a long, long way from its early days, not so long ago, when it was the fast, inexpensive way to put your stand-up commercial on television. It is still fast, still less costly. But today both these reasons are secondary to the real importance of Videotape. As a growing advertising medium, the television commercial is necessarily linked with the growing technology, electronics and flexibility of Videotape. The newest and most original means of exploring the selling powers of television are happening on Videotape—at Videotape Center. Day by day more advertisers are finding this out. People concerned with investing the television advertising dollar are moving to the top-notch creative personnel and facilities at Videotape Center. These people are moving ahead with the industry. Are you moving, too?

Visit our great new Videotape Center, 101 West 67th Street, New York • Telephone: TR 3-5800
Radio-tv keeps date with Hurricane Carla

CREDITED WITH PREVENTING HEAVY LOSS OF LIFE

A KTRK-TV Houston tv camera-
man volunteered to swim across storm-
tossed Galveston Bay to get his
films of flooded Galveston Island to
the mainland so they could be shown
on the station. He was forbidden to
do so, and was told no one would meet
him on shore to keep him from mak-
ing the attempt.

A KHOU-TV Houston engineer
climbed a 75-ft. pole in gale-force winds
to replace the hook in a tv microwave
dish which had gone out because of the
drenching rain.

These are two of the many hair-raising
incidents which newsmen and cam-
eramen of Houston tv stations under-
grew during the 72-hours of Hurricane
Carla.

All radio and tv in the Texas coast
area went on 24-hour transmission dur-
ing the approach of the first 1961 hur-
rricane to hit the United States and
during its devastating strike at the Gulf
Coast region.

Special commendations for broad-
casters in the area were issued Wednes-
day by Secretary of Commerce Luther
H. Hodges and Defense Mobilization
Director Frank B. Ellis.

Secretary Hodges referred to Gulf
Coast broadcasters’ “invaluable service”
in relaying the storm warnings issued
by the Commerce Department’s Weather
Bureau. These, he said, “had much to
do with preventing heavy loss of
life. Once again broadcasters have made
a lasting contribution to the well-
fare and safety of the nation.”

Mr. Ellis said advance warning by
radio and tv broadcasters were “an out-
standing example of public service in
the interest of orderly evacuation from
the Texas coast. The achievement dem-
onstrates capacity and preparedness.”

Radio Towers Down • Only four
radio towers were reported toppled by
the roaring hurricane winds. These
were KINE Kingsville, KUNO Corpus
Christi, KCOH Houston and KHUL (FM)
Houston. Despite the intensity of
Carla’s wind, up to 175 miles per
hour peak, no tv towers were reported
damaged to the FCC as of week’s end.

Highlights of the hectic three days:

• KHOU-TV Houston, acting on a
hunch, on Friday set up a tv camera
in the Weather Bureau station in Gal-
veston and fed live telecasts through-
out the emergency period. An eight-
man crew, headed by KHOU-TV News
Director Dan Rather kept up a three-
day vigil as Carla roared in from the
Gulf of Mexico.

At one point when the video went
out, the Weather Bureau crew contin-
ued transmitting audio over a telephone
line to the studio where charts and
maps were used to keep up audio-vis-
ual presentation of official Weather Bu-
reau bulletins and advisories. The
Weather Bureau chief actually cor-
rected the studio crew when necessary
over a broadcast line, watching the sta-
tion visuals on a monitor at the Weath-
er Bureau station.

James C. Richdale, station manager,
estimated 85% of regular programs
were preempted by hurricane reports.
Program Manager B. Calvin Jones re-
ferred to programs as “filler” between
news reports.

• KPRC-AM-TV Houston was on
the air continuously for 113 hours, be-
ginning 72 hours before Carla smashed
ashore. Marshalling 21 newsmen and
cameramen, stations covered the Texas
coast from Port Arthur to Corpus
Christi, a 190 mile crescent.

KPRC used its own radar and
meteorologist to broadcast the course
of the hurricane. The stations had a
plane covering the area from Port
Arthur to Freeport. Two men were on
Galveston Island, reporting continuous-
ly to KPRC by telephone.

KPRC’s Newsreel division during a
72 hour period processed more than 8,000 ft. of film in 26 different processing runs.

From the very first warning of approaching hurricane, KPRC Radio served as key station in the 40-odd station Gulf Coast Hurricane Warning Network, organized in 1954.

When power failed at the KTRK-TV Houston transmitter site, the station maintained broadcast operation through use of an emergency, standby generator for 60 hours during that outlet's four-day crisis operations. The station received civil defense authorization to ferry additional fuel to the transmitter site when its supply ran low.

From Sept. 8 to Sept. 12, KTRK-TV telecast 100 news bulletins, weather advisories, public-service emergency announcements—and transmitted film coverage of the storm's approach and its aftermath from 10 seconds up to 20 minute segments. All this along with 14 regular newscasts adding up to six and a half hours of telecast time.

The station went on continuous operation beginning at 6:20 a.m. Sunday and remained on the air until 1 a.m. Tuesday.

National Feeds • Network tv coverage of the destructive storm began Sunday as the storm's center edged toward the Galveston area. By then the intensity prompted ABC-TV to rush a special 15-minute news segment into its regularly scheduled Editors Choice program (10:30-11 p.m.).

CBS-TV broadcast a special report on Sunday, too, from 11:15-11:40 p.m.

A second special was presented Monday in the same time period.

NBC-TV presented a Gulf News Special Sunday from 10:30-11 p.m. Extensive storm coverage continued throughout the duration of the storm on regular news shows, including the Huntley-Brinkley Report.

Warning about liquor from NAB code head

Charles M. Stone, director of the NAB's Radio Code, last week warned radio and television stations against accepting hard-liquor advertising.

Mr. Stone, noting recent reports (Broadcasting, Sept. 4) that a distiller planned to use broadcast facilities to advertise hard liquor, pointed out that the broadcasting industry, acting through the NAB codes, has held consistently that such advertising is contrary to the best interests of radio and television. He spoke before the Michigan State Broadcasters Assn. at Hidden Valley, Mich.

He also reminded the group that Sen. Warren G. Magnusen (D-Wash.), chairman of the Senate Commerce Committee and Sen. John O. Pastore (D-R.I.), chairman of the Communications Subcommittee, said in a recent letter to NAB President LeRoy Collins that they would consider legislation to ban such advertising if the industry's efforts at self-regulation were ineffective.

Census shows Utah has tv in 88% of homes

Eighty-eight percent of 212,683 of the 241,532 occupied dwellings in Utah had one or more tv sets in April 1960, according to an analysis of the 1960 U. S. Census. Of the total homes, 192,795 or 79% have one tv set and another 19,888 or 8% have two or more sets.

The census shows 223,104 Utah homes or 92% have one or more radio sets. Of the total homes, 128,942 or 54% have one radio and another 94,162 or 39% have two or more radios.

Salt Lake County, largest in the state, had 85,973 homes with one tv set and another 12,223 with two or more tv sets. Only 9,811 homes in the county reported no tv set. The county had 54,389 homes with one radio plus 45,500 who reported two or more sets.

VITAL STATISTICS OF THE NEW LINCOLN-LAND

(Sales Management, May 10, 1961)

Population: 888,200

Total Homes: 275,800

Effective Buying Income: $1,519,268,000

Urban Population: 371,000

Rural Population: 517,200

TV Homes: 237,900

Retail Sales: $1,124,130,000

KOLN-TV/KGIN-TV

COVERS LINCOLN-LAND—NEBRASKA'S OTHER BIG MARKET

Avery-Knodel, Inc., Exclusive National Representative
Here's the Complete Package:

**FM TRANSMITTERS FOR STEREO**
A complete range of transmitter power is available — 1, 5, 10, 20, 25 and 50 kw. Each is designed to accommodate the new stereo signals and an RCA multiplex subchannel. All these FM Transmitters are built to the same high performance and dependability standards which characterize all RCA transmitters.

**STEREO GENERATOR—TYPE BTS-1**
Heart of the new stereo system is this double sideband generator. Fully transistorized, the BTS-1 provides full fidelity frequency response over the entire audio range. The generator produces a double-sideband, suppressed-carrier AM signal for transmission of one of the stereo channels.

**TURNTABLE EQUIPMENT FOR STEREO**
The standard RCA Turntables, such as the 16-inch BQ-2 or the 12-inch BQ-51 are recommended for stereo operation. Use them for excellence of performance with the new RCA stereo pickup cartridge, lightweight tone arm and dual preamplifiers.

**STEREO CONTROL CENTER**
NEW BC-7 DUAL CHANNEL CONSOLETT
Provides complete stereo (or monophonic) mixing, switching, monitoring, and cue/talk-back. All-transistor design—with plug-in amplifiers for ease of servicing; assures long-life even under continuous service. Dual controls may be "ganged" for stereo operation.

**NEW RT-21 TAPE RECORDER FOR STEREO TAPE**
High fidelity performance combined with operator-oriented controls make this the most flexible stereophonic recorder available. Features include: Easy speed change, interlocked record operation, ease of threading, and variable speed cue. Has two module amplifiers for stereo recording and reproduction.
FOR YOUR STUDIOS...

Stereo Package...from RCA

RCA offers a complete line of FM Stereo Broadcasting Equipment, making it easy to meet all your needs from one reliable source. For your studio there are turntables with stereo pickups and dual preamps, stereo tape recorders, dual channel consolettes; for your transmitting plant there are stereo generators, a full choice of FM transmitters and antennas. This is a complete package of “matched” equipment—all designed to work together in a stereo system, and all built to the same high quality RCA standards.

Stations already equipped with a post-war model RCA FM Transmitter can begin stereo programming at once—merely by adding the stereo generator—plus the necessary audio equipment.

Designed by forward thinking RCA engineers this stereo generator was the only equipment available when FM stereo broadcasting was authorized. The RCA stereo generator is FCC type approved and is now “on the air” at a number of FM stations.

RCA Stereo Equipment has been engineered to provide many years of dependable operation while producing the highest quality FM signals. And, you get unparalleled RCA service both before and after the sale. For additional information about the complete line, call your RCA Broadcast Representative. Or write to RCA, Dept. ZC-22, Building 18-5, Camden, N.J.

The Most Trusted Name in Broadcasting
STATE GROUP WOULD DROP CONELRAD

West Virginia broadcasters would form new alerting system

The abandonment of Conelrad as an alerting system in the event of a national emergency and substitution of a state-wide network utilizing the communications facilities of the state police and of the roads commission which would be tied into commercial broadcasting stations in the state is the goal of the West Virginia Broadcasters Assn. and State Civil Defense.

At its annual meeting Sept. 8-10 at White Sulphur Springs, W. Va., the association approved immediate steps to memorialize the state legislature at its next session in January to approve a $250,000 budget for the alerting system. The action followed a discussion at which it was concluded that Conelrad is obsolete since it was premised on possible use of broadcast transmission as homing beacons by enemy bombers. In this nuclear age, it was pointed out, attack would come by nuclear devices guided to predetermined targets.

Col. M. L. Zickefoose, deputy director of civil defense for West Virginia, agreed that Conelrad, even with the recently developed plan for an fm back-up network and use of the press associations automatic printer service for emergency transmissions, would be inadequate in the nuclear age. By utilizing state police and road commission communications tied into commercial stations to which the public habitually tunes, the chances of survival for public, government and industry would be enhanced, he said. He outlined steps being taken to develop fall-out shelters throughout the state as part of the national civil defense effort.

WSB Success • Elmo Ellis, program coordinator of the Cox Radio Stations (WSB Atlanta, WHIO Dayton and WSOC Charlotte) urged radio stations to maintain their individuality and not operate on a strict formula basis. He outlined the success achieved by WSB in using ingenuity in its programming and in exploring community needs.

In a panel discussion, Eula Reggin, manager of radio and television of the Ralph H. Jones Agency, Cincinnati, said that time-buying no longer is a matter of “buying by the numbers.” She urged managers to make up their minds as to what they want to be and then “be it.” Buyers, she said, should not have to scrounge to get rate and coverage data. “Get your rate structure set and stick to it.” In so doing stations temporarily “may lose an account or two to the rate-cutters but they will come back.”

Franklin C. Snyder, vice president-general manager of WTAE (TV) Pittsburgh, said that as a consequence of the Washington crusade for higher level programming, television broadcasting are taking a “harder look” at their operations. There will be more live productions geared to community needs, he said, pointing out that more stations are reserving prime time for themselves.

FCC Sincerity • Thomas H. Wall, of Dow, Lohnes and Albertson, Washington communications law firm, said he feels the FCC is “really sincere” in its drive toward programming improvement and station responsibilities. He urged stations to examine painstakingly the proposed new renewal form and logging requirements and then tell the FCC of the hardships and inequities that would be imposed.

At its concluding business session Friday was Sol Taishoff, BROADCASTING and Television magazines. His subject was the FCC and the NAB under the New Frontier.

Mel Burke, WTIP Charleston, and John Carr, WDNE Elkins, were nominated for the association’s presidency, the winner to take office next January. Election for all offices will be by mail ballot: John C. Shott, WHKS-TV Bluefield, incumbent president who presided at the two-day meeting, automatically becomes a member of the board upon relinquishing the presidency.

Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• KWG Stockton, Calif.: Sold by KMO Inc. to Roland B. Vaile and associates for $200,000. Mr. Vaile is former general manager of KTOO Las Vegas. The buying group includes Los Angeles tv performers and staffers John Jacobs, Steve Dunne, Martin N. Hill and Ray Rowan, among others. KWG is on 1230 kc and operates with 1 kw daytime, 250 w night. Broker was Edwin Tornberg & Co.

• KLMR Lamar, Colo.: Sold by Ralph Eaton and associates to Douglas D. Kahle for $158,000. Mr. Kahle owns KWIN Medford, Ore., and is associated with the Edwin Tornberg & Co., station broker, which handled the transaction. KLMR is on 920 kc with 1 kw daytime and 500 w nighttime.

Talks stalled again in KFWB strike

Negotiations between the American Federation of Television & Radio Artists and KFWB Los Angeles aimed at ending the 10-week-old strike of the union against the station were on again-off again last week. AFTRA proposed a three-year contract for the KFWB newscasters, starting at $200 a week, going to $210 the second year and to $220 the third. KFWB rejected this as no reduction from the union's pre-strike demands and stood pat on its own offer of $170, $177.50 and $185. AFTRA broke off the talks, charging KFWB management with refusing to bargain in good faith.

AFTRA meanwhile signed new contracts with three more independent Los Angeles area radio stations: KDAY Santa Monica and Spanish-language stations KALI San Gabriel and KWKW Pasadena. The KDAY contract runs for two years, calling for a $5-a-week increase for staff announcers the first year, with future wages to be negotiated at the end of that time. The KALI and KWKW agreements are three-year pacts, calling for $15 increases for announcers over that period. All three contracts are retroactive to May.

Paar's Berlin episode called 'sad, puerile'

The well-publicized, controversial tv show that Jack Paar taped earlier this month on the Berlin border, was telecast by NBC-TV to American viewers last week. It proved to be only slightly less provocative in its aftermath than it had been in its birth. Early reports of the show caused a furor in official Washington circles and were widely greeted with bi-partisan disapproval (At Deadline, Sept. 11).

The border footage, which was shown on Sept. 12 as a 52-minute segment of Mr. Paar's regularly scheduled late-night variety and talk program, was shot at Friedrichstrasse, one of the three crossing points between West and East Berlin. Comedienne Peggy Cass joined Mr. Paar in what amounted to an entertainer's view of a world crisis.

Among other goings on, Mr. Paar and Miss Cass exchanged banter, pointed out local points of interest, glared at communist photographers, and policemen standing on the other side of the crossing point, and interviewed U. S. military personnel stationed in the area.

The show received mostly condemnation from tv critics, with opinions ranging from "puerility" to "sad." NBC-TV officials refused to comment except to say that the Berlin border footage had not been edited to delete anything that might have been considered provocative or in bad taste.

Washington was relatively calm following the show. "About all you can say was that it was typically Jack Paar," Sen. Jacob K. Javits (R-N.Y.) said, in commenting on the program. He said he saw "nothing fatal" in the show, but added, "I don't think anything so sensitive should be handled in this manner."

Sen. Mike Mansfield (D-Mont.). Senate majority leader, has expressed dismay following first reports of the taping incident at the touchy border crossing. But when asked if he watched the program, he replied:

"No—lord, no! The incident is closed as far as I am concerned."

But the program did uncover at least one unexpected Paar defender.

David Lawrence, syndicated Washington columnist for the New York Herald Tribune, gave the Paar Berlin show an unequivocal rave in his daily column which was under a lead sentence that asked—"What was all the hullabaloo about?" Mr. Lawrence went on to say that "actually, the show did more to enlighten the American people about the unhumble acts of the communists . . . than may have been obtained from reading some of the fragmentary news accounts over a series of days."

Mr. Paar took up his own defense on his next night's show, also taped in Berlin, but this time in friendlier studio surroundings. In an approximate 15-minute review of his latest imbroglio, Mr. Paar said in part that he thought it was a good show, the Berlin situation was "less tense" than "hysterical headlines" in this country indicate, and that senators who had denounced his actions were misled by an exaggerated newspaper report.

NAB changes schedule of its fall conferences

NAB has revamped its annual Fall Conference schedule by setting the opening session Monday, Oct. 9, in Dallas. This fits into the schedule of the Texas Assn. of Broadcasters, which meets Oct. 10-11. Both meetings will be held at the Adolphus Hotel, Dallas.

Originally NAB had planned its southwestern conference for Oct. 12-13 at the Sheraton-Dallas. TAB then set its Oct. 10-11 schedule. But NAB overhauled its schedule to provide one-day instead of two-day meetings, rescheduling its southwestern session to Oct. 16 at the Sheraton-Dallas.

This brought complaints from TAB so the NAB shifted to Oct. 9, permitting Texas broadcasters to attend both meetings during one trip to Dallas.

"NO BROKERS, PLEASE!"

... is no insurance of saving money when buying or selling a radio or television station.

Unless, of course, you are an expert on station values, tax laws and negotiations. Your insurance of knowledgeable dealings comes through working with someone who is.

We immodestly recommend . . .

KPEN's happier experience with stereo FM
CITES SELLOUT IN WAKE OF OTHER GLOOMY REPORTS

KPEN (FM) San Francisco has signed "enough new business to pay for our stereo installation costs two times over," according to James Gabbert and Gary M. Gielow, co-general managers. They cited the station's stereo success in response to an article "Rough Going for Stereo" in the Sept. 4 Broadcasting.

KPEN started stereo Aug. 10 with 50 hours of programming per week, or 40% of the total schedule. "Our prime evening time between 6 p.m. and 10:30 p.m. is essentially SRO," the co-managers said. "In just one month, high-fidelity representatives report the sale of over 3,000 multiplex units in this area, approximately one-half million dollars in home receivers.

Extensive promotion was given the station's multiplex stereo, including newspaper ads, signs for dealers, a dinner and a huge billboard. Over 1,000 on-the-air announcements were carried on the station in advance of the stereo starting date. Stereo programming was to be increased to 70 hours a week starting Sept. 17.

The station operators contend some stereo stations have not devoted enough hours to the new service to create consumer demand. They stress the importance of near-perfect transmission. In the last week, they added, three hi-fi manufacturers were refused air time because it wasn't available.

Messrs. Gabbert and Gielow offer these rules for stereo success: Enter fm stereo with the enthusiasm a new medium deserves. Promote thoroughly. Program enough stereo hours, creating a demand for stereo rather than limiting stereo to the time hi-fi companies will buy. Approach stereo on a long-term basis, realizing that the number of sets in the early days will not necessarily warrant bank, auto, food and other non-hi-fi advertising. Maintain quality in audio and programming to demonstrate stereo's excellence.

Radio-tv defense role to get NAB priority

NAB plans to take up the problems of broadcasters and civil defense in the near future and give the study high priority. That's the attitude of NAB President LeRoy Collins as expressed in a letter to N. Joe Rahall, president of the Rahall Radio Stations, responding to one from Mr. Rahall late last month.

Mr. Rahall told Gov. Collins that he had been impressed at the Defense Communications Seminar in Washington (Broadcasting, Aug. 28) with three problems facing broadcasters:

- The "urgent" need for some authority to be vested in station managers or licensees to assure that essential operating personnel remain at their posts during alerts. There is a corollary need for proper credentials to permit essential personnel to get to and from stations in time of emergency without undue delay.

- Construction of fallout shelters at stations participating in Conelrad alerts or during and after an attack. Although some broadcasters can build shelters on their own, others would need help from the government in some form (outright grants, matching funds in cooperation with state and local authorities) or long-term financing at low interest rates.

- The use of familiar local radio station voices (disc jockeys, announcers, personalities) on the air after an attack to boost the morale of listeners—through information and entertainment. These local familiar voices could be of "incalculable help" to families in time of emergencies or during prolonged confinement in shelters, Mr. Rahall explained.

In his reply, Gov. Collins said he thinks the whole matter of the relationship of broadcasting to civil defense has not received the attention it should at the higher level of government. "I am, confident, however," the NAB president said, "that the transfer of the operations of OCDM (Office of Civil & Defense Mobilization) to the Department of Defense, and the recent appointment of a man in the Defense Department to be responsible for civil defense activities, will provide a better possibility of getting some answers."

AB-PT redeeming 5% preferred stock

American Broadcasting - Paramount Theatres Inc. board of directors last week approved an Oct. 20, 1961, redemption of all outstanding shares of 5% preferred stock at a $20.50 price plus an amount equal to the accrued dividend to that date of five cents a share, or a total $20.55 per share. Par value of the stock is $20.

AB-PT President Leonard H. Goldenstein said shares of preferred stock outstanding amounted to 67,931. These shares are entitled also receive the regular 25 cent dividend payable on Sept. 15, 1961, to stockholders of record on Aug. 25, 1961.

Books will be closed on Sept. 20, 1961, to further the transfer of all shares of 5% preferred stock, and notice mailed that day to preferred stockholders. Payment of the redemption price to preferred holders starts Sept. 21 upon surrender of certificates to Bankers Trust Co.'s Wall St. offices in New York. Early in 1953, AB-PT issued 608,041 shares of preferred. AB-PT said the preferred stock would be eliminated to simplify the capital structure of the corporation and to eliminate the dividend requirements on the stock.
MCA would be most affected by SAG edict

AIM: TO TAKE TALENT AGENCIES OUT OF TV PRODUCTION

The Screen Actors Guild’s recent ruling to prohibit talent agencies from producing tv film programs and motion pictures (Broadcasting, Sept. 11) would affect primarily the activities of the Music Corp. of America. An MCA spokesman last week declined to discuss SAG’s demands, pointing out they had not been adopted and were subject to further negotiation.

SAG’s demands banning talent agencies from production were part of a proposed contract between the union and the Artists Managers Guild, an association of talent agencies. The present contract expires Dec. 31 and a meeting between SAG and the managers guild is scheduled tentatively for Oct. 1.

MCA’s Revue Productions is one of the larger tv program producers. For 1961-62, it will produce, co-produce or serve as sales agent for 11 network series: Wagon Train, Checkmate, Jack Benny Show, Alfred Hitchcock Presents, Leave It To Beaver, General Electric Theatre, Laramie, Ichabod and Me, Tall Man, Tales of Wells Fargo and My Three Sons.

SAG’s ukase would grant talent agencies a six-month period after Jan. 1, 1962, to cease production activities. In the past, agencies were able to obtain production waivers from SAG, but the union noted that this practice was instituted during tv’s developmental stages to encourage production. SAG added that this phase of tv has ended.

Reports circulated in Hollywood that the Artists Management Guild would seek to modify SAG’s demands, and failing this, might institute a test case in the courts.

The separation of talent agencies from production is reported to be under study by the Justice Dept., which has investigated the activities of MCA and other television producers.

MCA officials declined to discuss the steps it would take if it was compelled to spin off the production company from the talent agency. The general feeling is that the present ownership would retain Revue, which accounts for more than 80% of the company’s gross revenue.

WBC offers three tv series

Westinghouse Broadcasting Co. last week announced a trio of new TV offerings, two of which are immediately available to TV stations throughout the country without cost. The third series is a program subsequently to be released for syndication.

Introduced are: a series of 12 one-minute dramatizations of classics in children’s literature (labeled as I Have a Story series); English for Americans, an educational TV series of 50 half-hour programs which form a basic course in written and spoken English language, and College Presidents Speak, a series of 42 two-minute programs concerning urgent problems facing the nation’s colleges as well as those that confront the individual president.

Only the English for Americans series will not be immediately available to stations. This series starts today (Sept. 18) on the five WBC TV stations and on WNEW-TV New York (Mon.-Fri., 6:30-7 a.m. and in a Sunday afternoon time period to be announced). The program features Dr. Bergen Evans, professor of English at Northwestern U. WBC produced the series in cooperation with the university.

WBC’s I Have a Story is aimed at young people between 6 and 12 years. It combines both sophisticated TV advertising techniques with still motion animation of illustrations from the actual books. Narration is handled by announcer Rex Marshall and Joyce Davidson, feature editor of WBC’s PM East. Each episode concludes with an announcement the story can be found “at your nearest library.”

The programs in the College Presidents Speak series have been produced by each of the WBC TV stations (WBZ-TV Boston, WJZ-TV Baltimore, KDKA-TV Pittsburgh, KYW-TV Cleveland and KPIX (TV) San Francisco). Many of the spots were filmed on location at various colleges and others were taped in WBC station studios. The concept for this project grew out of WBC’s third produced and sponsored conference on local public affairs programming held at Stanford U. in 1959.

MGM-TV to syndicate two hour-long shows

MGM-TV, in its most recent diversification move, last week announced its participation in the syndication field for the first time. The tv arm of MGM Inc., said that The Asphalt Jungle and The Islanders, both hour-long filmed series it has produced, would be put into syndication this fall. The programs were on ABC-TV during the 1960-61 season.

There are 24 episodes in The Islanders series and 13 Asphalt Jungle programs available. MGM-TV officials indicated that both properties probably would be ready for local programming by Dec. 1. The company also has 78 episodes of The Thin Man, and 26 color programs in the Northwest Passage series available for future syndication. The two series were originally televised on NBC-TV and chances are both also will soon be put into syndication.

Richard A. Harper, director of syndicated sales for MGM-TV, said last week that the decision specifically to release The Asphalt Jungle and The Islanders stemmed from “a demonstrated demand” among stations and advertisers.
for quality 60-minute programs (also see lead story, page 19).

MGM-TV's move into syndication is only one of several actions the company has taken to implement its general diversification plans. Earlier this month the company announced its entrance into live and tape production (Broadcasting, Sept. 11). Previously MGM-TV expanded both its international and domestic sales forces, and syndicated its first package of 30 post-'48 motion-picture features.

On the international front last week, three of the film company's four network programs this fall were sold to the Canadian Broadcasting Corp. National Velvet (NBC-TV, Mon., 8:30-8:30 p.m.) was renewed for the second year on the full CBC network and will start today (Sept. 18), the same premiere date as in the U.S. Father of the Bride, (CBS-TV, Fri., 9:30-10 p.m.) was sold to the eight CBC owned-and-operated stations and will begin the end of this month. Dr. Kildare (NBC-TV, Thurs., 8:30-9:30 p.m.) was sold through NBC International to the full CBC network and its opening program is scheduled for Sept. 23, five days before its American premiere. The remaining MGM-TV-produced program is Cain's Hundred (NBC-TV, Tue., 10-11 p.m.):

**NBC films syndicates 'The Best of Groucho'**

NBC Films has sold its 250-segment package of The Best of Groucho in 40 key markets. Presented by NBC-TV for the last nine years under the titles of You Bet Your Life and The Groucho Show, this is the first season that the comedy-quiz series, starring Groucho Marx, has been sold off the network as a syndicated program.

Among the stations which have bought Best of Groucho are KTTV (TV) Los Angeles, WPIX (TV) New York, KTUU (TV) San Francisco, WTVJ-TV Detroit, KOMO-TV Seattle, WJXT (TV) Jacksonville, WMAR-TV Baltimore, WRC-TV Washington and WGN-TV Chicago. Bill Breen, national sales manager for NBC Films, estimates that more than 150 stations will buy the package.

NBC (Canada) Ltd., newly created Canadian subsidiary of NBC, has sold three tv programs in Canada. The Tab Hunter Show and the new hour-long Dr. Kildare series were sold to the Canadian Broadcasting Corp. tv network, and 57 episodes of the Loretta Young Show were sold to Procter & Gamble for showing in 19 major Canadian markets. Tab Hunter Show is being sponsored by Jergens Lotion, through Vickers & Benson Ltd.

George W. Harper, vice president and general manager of the Canadian subsidiary, said these are the first sales to be announced by NBC (Canada) Ltd., which was established in July to distribute and produce tv programs in that country.

**Film sales...**

Films of the 50's Vol. II (Seven Arts Associated): Sold to WKZO-TV Kalamazoo, Mich. Now sold in 45 markets.

---

**FATES & FORTUNES**

Charles Barker, account executive of National Gypsum, Cleveland, named vp of Fuller & Smith & Ross. Others named vps were Leonard Hall, creative director, Cleveland; Charles Hanson, creative director, Pittsburgh; George Schnake, group supervisor of consumer section for Alcoa, Pittsburgh; Donald F. Sternloff, creative director, San Francisco and Ralph Zylke, copy director, Chicago.

if you plan to install a tape-in-magazine system . . .

here's why you should choose AUTOMATIC ATC TAPE CONTROL

Since ATC's introduction of the tape-in-magazine system in 1958, all new tape cartridge developments have come from one company . . . Automatic Tape Control Inc. In 1960, ATC introduced the Dual-Tone system which allows automatic actuating of other equipment, such as reel-to-reel tape machines, Seeburg record changers, slide changers in TV, etc. In 1961 came the remarkable ATC 55, which plays up to 55 magazine-loaded tapes (and actuates other equipment) in sequence without reloading, resetting or manual cueing. And, in 1962, Automatic Tape Control Inc. will introduce an accessory unit that performs the functions of automatic program logging and automatic billing direct from magnetic tape! Only Automatic Tape Control equipment is designed for maximum flexibility and for the future . . . allowing for easy conversion to full or part-time automation or to automatic program logging and billing for your station! Made by broadcasters for broadcasters, and formerly distributed exclusively by Collins Radio Company, there are more than 4,000 thoroughly tested and proved ATC units in use in over 600 radio and TV stations. For complete information, a collect phone call will put you in touch with First Class licensed broadcast engineers who can answer all your questions. AUTOMATIC TAPE CONTROL INC., 209 E. Washington Street, Dept. 109, Bloomington, Illinois.
had previously been with BBDO in San Francisco.

Stephen P. Kelner joins marketing department, Lambert & Feasley, New York.

DEATHS

Oliver W. Heath, 67, vp of Leo Burnett Co., Chicago, died Sept. 2 in Evanston Hospital. He had been with agency for 10 years and in advertising business in Chicago for 40 years.

Anthony LaFrapo, 50, vp of RKO General, executive director of KHJ Los Angeles and director of news and special events, KHJ-AM-TV, died Sept. 13 of heart attack.

Leo Carrillo, 81, film and tv star, died in Santa Monica, Calif., Sept. 10 of cancer. Best known for his portrayal of “Pancho” in Cisco Kid series, his acting career spanned period nearly half century in length.

James T. Mahoney, 68, musical radio director, Arlington, Mass., died Sept. 1 at his New Hampshire summer home following long illness. Mr. Mahoney served as director of musical programs for WNBC New York, and as program director for radio stations in Baltimore and Boston.

WMCA's Nathan Straus dies at 72

Nathan Straus, 72, board chairman of WMCA New York and lifetime leader in public and business affairs, died last Wednesday, Sept. 13, in Massapequa, L. I., where he had gone to look over some property. He was understood to have suffered from heart ailment. R. Peter Straus, a son, is president of WMCA. Mr. Straus, who also was chairman of Straus Broadcasting which includes Radio Press International, taped news service, and WMCA purchased latter in 1943 and was its president until 1959 when he became chairman. Largely through Mr. Straus' efforts to reverse Mayflower decision prohibiting stations from editorializing, WMCA became the first radio outlet to air editorials when the FCC eased regulations in 1949.

He was administrator of the U. S. Housing Authority from 1937 to 1942, after he had led the movement for passage of the Housing Act in 1937. He was an international authority on public housing and wrote two books on the subject. Earlier, Mr. Straus had been a newspaper editor and entered the publishing field in 1914, when he purchased Puck magazine. He was a Navy veteran of World War I, member of New York state senate from 1921 to 1926, New York state administrator of National Recovery Administration in 1934 and chairman of New York City's mayor's advisory council from 1954 to 1958.

He was born in New York May 27, 1889. Survivors are his widow, Helen, four sons; R. Peter, Irving, Barnard and Nathan Straus III and a brother, Hugh. Funeral service was Friday at Jewish Community Center, White Plains, N. Y.
McGavren’s Labor Day field trip

What better way to understand your client than to visit him at his home base? Daren F. McGavren Co., New York, which represents Gordon McLendon’s west coast radio stations, the all-news radio station, XTRA “News” in Los Angeles and KABL San Francisco, carried this thought through by flying the whole sales staff in New York to visit both operations. They made the trip over the Labor Day weekend.

First stop was Los Angeles where they visited the offices of XTRA (a Tijuana, Mex., station, programmed and sold out of Los Angeles). From there, the sales people stopped in San Francisco to see KABL.

Pictured above are the happy visitors. They are (from left) Mike Schwartz, Ralph Conner, Monte Lang, Judy Priborshay (the stewardess), Gerry Muldering, Don Wilks, Roger Hudson.

What is a ‘Dinky Doo’?

A ‘Dinky Doo’ promotion conceived by WLEE Richmond on the spur of the moment blossomed into 34-hour success, proving again the pulling power of radio—and its persuasiveness.

Disc Jockey Harvey Hudson had finished playing the new Capitol recording, Dinky Doo, when he asked, what is it? It was not meant to be a quiz, but listeners began flooding WLEE’s switchboard with their own particular answers to the question. So Mr. Hudson created an answer (a person who leaves his chewing gum on the bedpost overnight) to the question.

A prize of one dollar was offered to the first person who correctly guessed the answer, with the prize being raised one dollar every 30 minutes until it reached $25 at which time it was frozen.

When the “quiz” had run about three hours, a comment was made on the air (strictly as a joke) that the manager of a local night club knew something about Dinky Doos. The remark tied up the night club switchboard for hours. WLEE mentioned out-of-town places that had information pertaining to the definition of a Dinky Doo.

Here are some of the places WLEE mentioned for listeners to call. (And all reported back to the station that listeners did call); Jimmie Fidler, Hollywood; The Water Commissioner of Allentown, Pa.; the Soviet Embassy, Washington; Broadcasting Magazine, Washington; Eddie Lyman, WQOK, Greenville, S. C. (brother of Dave Lyman, WLEE’s program director).

When it appeared that things were getting out of hand, WLEE broadcast a one word (bedpost) clue. Some 90 minutes later, a Richmond lady won the prize. She said she had tried to reach WLEE for 90 minutes but the line was busy.

D.j.’s wash elephants to publicize Shrine

The Shriners recently asked CHUM Toronto for help in publicizing their charity circus at the 1961 Canadian National Exhibition. CHUM responded with an elephant-washing contest among its disc jockeys, with the winner (based on fastest time) to receive 500 tickets to the circus.

The day-by-day competition: Monday—John Spragg washed his elephant in front of the grandstand crowd at the circus. Time: 2 minutes, 53 seconds. Tuesday—Dave Johnson duplicated the task in 2 minutes, 40 seconds. Wednesday—Bob Laine enlisted the aid of another elephant who blew water all over Bob’s elephant. Time: 58 seconds (Bob was disqualified). Thursday—Bob McAdorey walked his elephant to a nearby fire hall and washed his elephant with a stirrup pump in 1 minute, 49 seconds. Friday—Mike Darow returned to the circus and washed his elephant in the fantastic time of 46 seconds. It was a baby elephant. Saturday—Al Boliska had an elephant trucked to a nearby car wash and vowed to clean the animal in half a minute. However, it was not possible to turn on the water and steam without scaring the elephant, so Al had to carry buckets of water, himself. Time: 10 minutes, 32 seconds.

The winner: Mike Darow.

Repair those old antennas

To inform viewers of the importance of television antennas, WSJS-TV Winston-Salem, N. C., has started a 39-week tv-newspaper campaign in conjunction with that city’s various television repair shops.

Believing that most of the “poor” picture complaints stem from antennas which have not been adequately cared for, the station is attempting to enlighten the public on the technical aspect of television—and what it ought to know about simple maintenance.

CAN YOU TAKE A JOKE??

Well, then I must confess that it’s not exactly yours for the taking, but I DO offer—at reasonable rates—a weekly script service consisting of stories, satires, humorous comments on the passing scene—40 separate pieces of various length, designed to put the light touch to your programming. It’s the kind of material which, for the past ten years has stood this country boy in good stead in the big city. It would, of course, be EXCLUSIVE to you within your coverage area!

If interested—and I hope you are—write for sample script and details to:

KABC-TV charters the ‘A Train’
TAKES 250 TO DEL MAR FOR DAY AT THE RACES

Over 250 horse lovers representing the press, advertising agencies and advertisers were guests of KABC-TV Los Angeles earlier this month for a day at the Del Mar races.

The ABC o&o station charted a special 10-car train from the Santa Fe Railway Co., named it the “A Train” in conjunction with the station’s slogan, “Take the ‘A’ Train,” decorated it with posters and slogans promoting its new fall shows and took off for the track and a day of festivities.

Luncheon was served while a trio of roving music-men filled the air with familiar refrains—including the station’s theme song and those of ABC-TV shows. Accompanying the track fans were Marilyn Maxwell, star of Bus Stop, and Broderick Crawford and Ray Hamilton, co-stars of King of Diamonds, both new shows included in KABC-TV’s fall schedule. The track even named two feature races for the occasion with Miss Maxwell and Messrs. Crawford and Hamilton presenting the wreaths of roses to the winners.

Even the trip back had merit. The Victor’s Cocktail Party was the highlight along with prime rib dinners, a winning combination even for the losers.

KABC-TV says promotion for its 1961-62 season will be the biggest in its history. It plans 156 30-sheet billboards in strategic areas in Los Angeles for a period of 30 days; half-page ads in seven local and area newspapers every day for the remainder of this month; 104 king-size bus banners on as many buses for a month.

In addition, a direct mail campaign directed to agency executives, time-buyers and station reps, highlighting each of the 13 new network shows, has been created with recipients asked to send in humorous captions to the enclosed picture. The winner will receive a set of luggage.

KABC-TV will support the multimedia campaign with a heavy spot schedule of its own using the “Take the A Train” theme.

Among the 250 track fans who took KABC-TV’s ‘A Train’ was this distinguished quintet. From l to r: Elton H...Rule, vice president and general manager of KABC-TV; Broderick Crawford and Ray Hamilton, co-stars of King of Diamonds; Marilyn Maxwell, star of ‘Bus Stop,’ and James G. Riddeli, vice president in charge of ABC’s western division.

Shirts and ‘Muu Muus’

The title frame on Follow the Sun, new ABC-TV series (Sun., 7:30-8:30 p.m. EDT), has inspired Kaiser Industries to fashion an Aloha shirt and Muu Muu (Hawaiian dress) after the design used at the show’s opening. TV columnists and station promotion managers received shirts and Muu Muus to remind them the series began Sept. 17. Kaiser, which is part sponsor of the series, plans to make the design available through regular distribution later in the fall. Shown modeling the Follow the Sun shirt and Muu Muu are Eddie Kuaffman and Pete Taylor of Kaiser.

Milici’s ‘settled-in’ party

Deviating from the usual anniversary and new headquarters format, Milici Adv., Honolulu, recently celebrated a “settled in” party with some 460 guests in attendance.

In its new quarters for nearly a year, the 15-year old agency used the theme “we never had time to have one (a party) until now,” as the keynote of its various displays.

The party was publicized primarily by the use of a telephone recording, played more than 5,000 times in three weeks, according to local telephone company officials. Radio and tv personalities helped to spread the telephone number but the phone message merely was a teaser and never gave the time or place of the event.
FOR THE RECORD

STATION AUTHORIZATIONS, APPLICATIONS

As compiled by BROADCASTING Sept. 7 through Sept. 13. Includes data on new stations, changes in existing stations, ownership changes, hearing cases, rules & standards changes, routine roundup.

SALES EXECUTIVE WANTED
California-Nevada Territory

The man we want is a native Californian or at least a seven-year California Broadcast veteran, 30-40, travel 5 days weekly. Managerial experience, overall knowledge of radio operation, local, regional, metropolitan. Must make a good appearance, drive a good car—be forceful and dramatic, able to address large groups of people authoritatively.
We have seen some of the nation's top stations so solidity is a must in our man. He will be joining the largest radio and television sales-force in the country today with a proven seven-year track-record.
If you're looking for a job with incentives, expenses plus direct commissions, with over 75% renewals yearly, where a goal of $25,000 can be reached within two years without "gambling on the future"—we'd like to hear from you.
Complete resume, present income, picture, the works—personal interviews arranged the latter part September, Los Angeles and San Francisco.

BROADCASTING, September 18, 1961
OUR RESPECTS to Myron Frederick Shapiro, WFAA-AM-FM-TV Dallas

Hardly anything happens fast enough

The many moves of Mike Shapiro, general manager of WFAA-AM-FM-TV in Dallas, justify his ranking among the most mobile executives in broadcasting.

But they were planned moves, this youngish head of a major electronic operation explains, and they were confined to the Southwest, mostly Texas where there's plenty of room for moving.

The plan, as Mike explained it, is now that he's no longer job-hopping, was simple—to learn more about broadcasting and/or to improve his economic status.

His last move was made in April 1958 when he became manager of WFAA-TV. Last November he was promoted to general manager of all broadcast properties for the operating company, A. H. Belo Corp.

Mrs. Shapiro's Law • Just a year after he became manager of WFAA-TV the patient Mrs. Shapiro had a scare when her husband said he planned to attend the first NAB broadcast management seminar at Harvard. Fear of another bout with moving men and real estate people led her to lay down what her husband refers to as Mrs. Shapiro's Law. It runs like this: "The regular ground rules for marriage are out. You want to get drunk, go ahead. You want to chase after other women, okay. You want to stay out all night, good enough. But if you move once more, we're through." Thus far the law hasn't been put to a test.

Then there's Mr. Shapiro's Law, totally unrelated: "Hardly anything ever happens fast enough." This is typical of Mike Shapiro. Last winter he couldn't stand the delay any longer as construction crews finished off the new $5 million communications center adjoining the Dallas Morning News, a famed pioneering journal he refers to as "our newspaper subsidiary." A month before the building was opened he and Velma Collins, his secretary and WFAA-AM-TV office manager, moved into the still-littered premises.

Relaxation • There's only one place this bundle of energy can relax. That's on his 25-foot cabin cruiser while exploring the 100-mile shoreline of Lake Dallas or just idling at any convenient mooring site. Once he took up golf but quit because things didn't happen fast enough.

He's a real bird-dogger, station staffers say, but always willing to hear both sides of a story and he has the confidence of the whole organization. His coat comes off as he enters his office and it generally stays off until lunch time. At any given moment he's likely to be charging down the corridors of the glassed-in office acreage, with frequent stops at desks for a peantray or reminder of a task to be done.

On the telephone—and he usually is—he talks standing up, pacing the floor with the aid of a long extension cord. His manner is friendly but his black, wavy hair tousles easily when he gets in a business tussle. And he's one of the lucky species that can eat and eat without putting on weight.

Mike gets into just about everything that happens around WFAA. He's proud of all the equipment, including five video tape machines (two in a half-block-long van that's loaded with gear).

At his desk he uses more gestures than a country parson, though seldom raising his voice. His dress is conservative, aside from a tendency to blend serious neckties and socks offset by sporty loafers.

The Long Trail • The broadcast itinerary of Mike Shapiro began at the end of World War II. While recuperating from malaria, acquired as a glider pilot in North Africa, he did newscasts and entertained patients on the little gas-pipe radio station at Buckley Air Base.

After discharge in 1945 he asked for a job as announcer at WEBC Duluth, Minn., his home town. "Can you sell?" he was asked. "Sure," he replied and Arrowhead Network assigned him to WJMC Rice Lake, Wis.

But Texas had appealed to him in his glider training days and he got a job at KBWD Brownwood not far from his first base at Lamesa where he had met and married Connie King in 1942. Next stop was KGKL San Angelo where he sold time and did three newscasts a day. After a year as manager of the new KTXL San Angelo he moved to Odessa as manager of KECK.

Then he changed his business trail by opening an advertising agency in San Angelo and writing a newspaper column on the side. The next move also was non-radio—selling advertising specialties in San Angelo for Brown & Bigelow. The firm transferred him to Dallas, where he made a sales call at WFAA. Ralph W. Nimmins, now of WFGA-TV Jacksonville, Fla., induced him to go back into broadcasting, which he did via WFAA-TV. He sold time for two years, becoming local sales manager. When KDUB-TV Lubbock took the air in 1955 under W. D. Rogers, Mike took the post of commercial manager, soon rising to assistant manager.

His next move was to Avery-Knodel's TV staff in Chicago, but he soon went back to WFAA-TV as commercial manager. It was still 1955, the movingest year in Shapiro history. In 1957 he moved to Tulsa as managing director of KTUL-TV and then on to KATV (TV) Little Rock, Ark., as managing director.

End of the Line • A chance to rejoin WFAA-TV as manager came in 1958. That's when Mrs. Shapiro's antipathy to a nomadic life led her to proclaim a state of marital emergency. The back-to-Dallas move has proved a lasting one.

The Shapiroos have one child, a daughter, Lynne, aged 14.

Mike was born Dec. 16, 1918, in Duluth. He dropped the original Myron Frederick as a lad. His scholastic career included Duluth public schools, Duluth Junior College and U. of Minnesota.

One of his most satisfying experiences has been the success of his program, Let Me Speak to the Manager, which took the Dallas air early in the summer (Broadcasting, Aug. 21). The program gives the audience a chance to voice opinions and unload complaints; it gives Manager Shapiro a chance to reply.

He has, among others, two pet gripes—phony broadcast journalism based on non-existent staffers in far-away news centers, and government meddling of the censorship sort.

Industry activities include the ABC Board of Governors; ex-president of Broadcast Executives of Texas, and the Dallas Ad Club.
Carla's wasteland

W E DOUBT that you would find many residents of the Gulf Coast who would agree with those who characterize broadcasters as money-grubbing exploiters of the public. A lot of Gulf Coast residents would probably be dead if it weren't for broadcasting and broadcasters.

The evacuation of the target area of Hurricane Carla could never have been arranged if radio and television had not been available and if broadcasters had not worked around the clock to spread the word of threatening disaster. When it became evident that the storm was headed for the coast, broadcasters immediately went into action, with no thought of anything but public service of the highest order.

Performances like these are the rule rather than the exception for radio and tv. At time of crisis it has become the natural reaction of broadcasters to turn over whatever facilities and personnel are needed to distribute information. Yet the performance of Gulf Coast stations last week ought not to be taken for granted. All contributed vital services, and some did so at tremendous financial loss. One, KHOU-TV Houston, moved live cameras into the Galveston weather bureau headquarters and became a quasi-official source of intelligence on the progress of the storm and the methods of evacuation.

If broadcasting is a wasteland, it is a wasteland the country cannot do without.

Paul Harper's credo

A N eminently sensible evaluation of television programming and programming problems was presented last week by Paul Harper Jr., the young president of Needham, Louis & Brorby, an agency that has used tv advertising with conspicuous success.

It was the kind of thoughtful evaluation that tends to get lost in the noisy arguments of extremists who think things are all bad or all good. It deserves a hearing.

Mr. Harper has the knack of cutting through the fog of recent controversy. As he put it, "most of the controversy is being conducted in a vacuum with no reference to the basic choice involved." The choice must be between a television system programmed at public expense and one programmed at private expense.

A publicly-financed system would lead inevitably to centralized and arbitrary program selection and would require the whole public to share the expense of what only a segment of the public watched. That kind of system is now rejected by Mr. Harper as it was rejected by the nation in the formative days of radio.

The one major consequence of a system programmed at private expense, said Mr. Harper, is that "the character of programming will be set essentially by commercial values—and in more or less direct response to existing public tastes." This process guarantees a wider diversity of programming appeal to a wider variety of public tastes than could logically be expected from a centralized system under public financing.

It is said by critics that the present system does not provide diversity. That argument was answered nicely too. Mr. Harper pointed to the great volume of information programming in prime time that the television networks have broadcast in the past year. On the average those shows were watched by only 17% of the total audience viewing at the time, yet the networks are continuing to program shows of that kind knowing they will attract minority audiences.

Television cannot survive, said Mr. Harper, if it gets too far ahead of popular taste, yet television broadcasters are knowingly running the risk of getting ahead of taste in their efforts to find and satisfy new audiences.

All this is not to say that television is anywhere near perfection. Mr. Harper spoke of several areas in which he thought improvement ought to come: in production quality, in the creative search for new program forms and in the active encouragement of young talent, to name three. We agree, and we are sure thoughtful broadcasters would agree.

The improvement will come—but only if television is allowed to go about its work without incessant molestation.

Playing with gun-fire

L IKe his contrived publicity schemes of the past, Jack Paar’s Berlin incident made the headlines. And like most newspaper stories dealing with television, this one was overplayed.

This, however, is not to condone this latest Paar exploit. He played with fire. It could even have been gun-fire. He gave the Communists a new propaganda line as he made fools of American troops on sensitive duty.

There were repercussions from the White House. Ten Senators took the floor to admonish him—and, incidentally—all broadcasting. The Defense Department felt constrained to discipline two of its officers.

Mr. Paar was beyond his depth. He was attempting to perform a news function when his function is not news. He is an entertainer of sorts. The Army public-relations men in Berlin were wrong in according him the privileges given accredited newsmen, and NBC was equally wrong in giving him his head in an area beyond his training and capability.

Some good could result. The Paar incident once again underscores the importance of having news handled by newsmen. NBC has won acclaim because of the quality of its news and public affairs services under the direction of Executive Vice President William R. McAndrew, a hardened newsman and an excellent news manager.

Mr. Paar is not a newsman. He, and all other performers on stations as well as networks, should stick to their lasts.

Responsibility travels many roads. It led a WCKT investigative camera and news team 1683 miles to Flint to explore a revolutionary anti-delinquency project, called the Mott Plan, by which Flint's school plants are used 18 hours a day as neighborhood educational, cultural, recreational and civic centers.

Would the Mott Plan work in Miami?

There was some curiosity but very little information. WCKT brought back the information in another one-hour "New Force" documentary that told the Flint story as only on-the-scene film, live and tape production can.

RESULT: The Dade County School System is considering a genuine test of the Mott Plan.

This is Responsibility — television citizenship with showmanship!
Dr. Ernest F. W. Alexanderson made communications history in 1917, when he designed a 200-KW high frequency alternator that produces continuous oscillations. As a result, sound waves carry better, tune more sharply, and world-wide telegraphy is possible.

WGAL • WGAL-FM • WGAL-TV have pioneered in the development of mass communications. Established in 1922, 1944, and 1949, respectively, these stations have been and are dedicated to serving all listeners in the cities and communities throughout their coverage areas.

WGAL-TV

STEINMAN STATION
Clair McCollough, Pres.
Rating rigging?

House Subcommittee on Regulatory Agencies (old Oversight Subcommittee) held executive meeting last week with rating services prime topic. Cited was special two-day survey in midwest city presumably by secondary service, during which (1) low-rated station alleged was told ahead of time by rating firm that it should promote “spectacularly” and (2) top-rated station was indirectly encouraged to postpone planned promotion which happened to coincide with rating period. Result was tremendous increase in rating for one station and similar drop for other. Subcommittee also has evidence of at least one other instance of this type in major southern city.

Subcommittee, which has been noticeably inactive during present Congress, currently plans to hire outside group to continue investigation prior to public hearings. Subcommittee probably will meet at least once during adjournment although no firm date has been set.

Battles to CCBS

Roy Battles, assistant to the Master, National Grange, and former farm director of W.LW Cincinnati, is slated for appointment as director of Clear Channel Broadcasting Service with headquarters in Washington. Mr. Battles’ appointment was unanimously approved at CCBS meeting in Nashville, Sept. 14, subject to negotiation. He has agreed to assume post, vacant since late last year when Gayle Gup- ton of Nashville resigned.

FCC appeals board

Creation of “Board of Hearing Appeals” comprising five senior staff members who would decide hearing cases, subject to appeal to full commission, is center-piece of reorganization plan actively under consideration by FCC. Designed to relieve commission of workload so it can spend more time on policy and novel issues, action would constitute biggest delegation of authority by FCC under newly enacted reorganization plan as substitute for President's plan No. 2 which was defeated in House. So far there has been only preliminary discussion but commission hopes to have plan resolved within next few weeks.

If plan passes (there are only two indicated votes in opposition now) board would be recruited from present staff members, principally lawyers. This board would decide hearing cases following initial decision by examiners. Appeals could be taken to full com-

mission which could grant or deny, depending on its appraisal of issues. If denied, appeal would be in order to courts as presently provided. If granted, FCC would hear arguments on narrowed issues. Office would be headed by chief or chairman, with appointees retained at grade 15—same as examiners—and in established salary range of $13,730-$15,030.

Backdoor approach

New and hazardous FCC technique is to use requests for technical changes as hook to question stations’ programming. Southern fm station, granted last fall without hearing and with no complaints about proposed programming, applied recently for change of antenna site. FCC fired off letter asking station to explain what it had done to determine “community needs” in light of dearth of religious and educational programs. This backdoor approach is leading some Washington attorneys to advise clients to forego applications for minor changes.

Multi-merger for MW&S?

Newest merger report from Madison Ave.: Mogul, Williams & Saylor (total billings: $19 million) is negotiating for west coast agency. Field was narrowed to two last week, with final agency choice to be made soon. It was reported as early as this summer that MW&S sought association on west coast, but now it’s learned agency will not only acquire far west agency (and add some $2-3 million in billings) but also plans to buy similar sized agency in Chicago. Mergers are said to be all part of MW&S “Four-year expansion plan,” running to 1964.

New Bedford’s new year

New ch. 6 WTEV New Bedford, Mass., is shooting for January 1 target date with transmitter at Martha’s Vineyard, designed to provide grade A service over Providence, R. I., area. Station, headed by Basil Brewer, publisher of Standard-Times and owner of WNBJ, as majority stockholder under merger of competing applicants, is slated for primary affiliation with ABC-TV. Installation cost: about $1 million.

Caveat vendor

There’s new clause being inserted in station sale contracts which, in words of one broker, “we never had to worry about before.” This provides that after sale is approved and transfer consummated, sellers must return purchase money if station’s license is revoked because of past programming or other lapses which occurred under old ownership.

Center ceremonies on tv

Though opening of its first building is still year away, New York’s Lincoln Center for Performing Arts is making extensive tv plans for that event. President Kennedy is to be invited, with New York Philharmonic to perform. Also under discussion is regularly televised program of Philharmonic concerts.

Are buyers neglected?

Buyers in some smaller agencies are beginning to complain that rep salesmen don’t get around to see them as often as they once did, with result that these buyers frequently have to take initiative in getting availability lists. They say this parallels rise in self-representation among major group owners who presumably have fewer salesmen and therefore concentrate primarily on bigger agencies, but that trend also is apparent among some of bigger independent reps. They feel these reps are “spreading their salesmen too thin.”

May be permanent

New industry institution, South East Radio-Tv Seminar, may become annual event. Success of Sept. 15 Atlanta session in bringing together industry and commission spokesmen on controversial logging-form situation, has led to recommendation that Georgia Assn. of Broadcasters invite station executives and state association presidents in southeastern area to Atlanta every autumn.

Color convert

Reynolds Tobacco Co., Winston-Salem, which experimented with color commercials for Salem cigarettes on black and white series—NBC-TV’s Wagon Train—this past season, is understood to have decided to extend color effort for Salem on network’s Saturday Night at the Movies in upcoming season (9-11 p.m.), even though not all feature films will be presented in color. Advertiser also expected to decide soon whether to present Camel and Winston spot announcements on this program in color too. Agency: William Esty Co., N. Y.
WPIX-11 has a “corner” on the kiddy market. During the late afternoon and early evening hours when children dominate TV viewing, wpix-11 dominates all competition seven days a week. Every year the biggest new children’s show is fed into the most fabulous back-to-back lineup of children’s shows in television. This year it’s DICK TRACY. No other station comes close in delivering the tremendous New York children’s market of more than three million youngsters.
WEEK IN BRIEF

Choice positions for spot television accounts are getting harder to find during the third quarter, in contrast to the more phlegmatic pace of the first half of 1960, study reveals. See . . .

PREMIUM SPOTS IN SHORT SUPPLY . . . 23

The charms of San Francisco area add up to one of the largest markets in the United States. This economic giant on San Francisco Bay is a nine-county area whose growth rate is drawing wide attention. See Market Study . . .

THE BAY AREA GIANT . . . 59

Whose fluoride do you like? Big dentifrice sponsors are joining battle in effort to capture their share, or more, of the $235 million toothpaste market. Emphasis will be on new fluoride products. See . . .

THE TOOTHPASTE TURSSE . . . 24

NAB’s new administrative pattern as conceived by President LeRoy Collins was approved last week by the board’s reorganization committee. William Carlisle and Hollis Seavey promoted to important positions. See . . .

NEW LINEUP FOR NAB . . . 38

Mr. Minow may figure television is a vast wasteland but that doesn’t make it unanimous. A major Minnesota research project shows that an overwhelming portion of the public has entirely different ideas. See . . .

PUBLIC AGAINST CONTROL . . . 23

Prize, prize, who’s got the prize? An FCC examiner in St. Louis continues hearing into the claim that KWK played tricks in a prize contest. Ex-manager says his boss knew everything that went on. See . . .

JONES: SPEHERIS KNEW ALL . . . 86

The two Mighty Ms of the New York Yankees—Maris and Mantle—are making money like mad thanks to the power of television in the exploitation of fame and talent. Behind the scenes: Frank Scott, their agent. See . . .

MONEY FOR MARIS, MANTLE . . . 32

Voiding of the ch. 9 tv grant of WLOF-TV Orlando, Fla., was recommended in an initial decision by James D. Cunningham, FCC hearing examiner. Joseph L. Brechner says station will file exceptions at once. See . . .

ORLANDO INITIAL DECISION . . . 89

Now it’s the blue-chip advertisers turn to tell the FCC’s four-year-old long hearing all about program practices of tv networks. Testimony will be heard in New York before Examiner Cunningham. See . . .

TV CLIENTS FACE FCC . . . 50

There’s more Canadian television for Canadian viewers on the season’s schedules. Many U. S. programs are on the Canadian Broadcasting Corp. network but the Dominion is getting a larger share of its own programs. See . . .

Networks to studyTv 'children's hour'

FCC Chairman Newton N. Minow's proposal that TV networks develop quality children's programs and rotate them among three networks through week got quick response Friday (Sept. 22).

Each network said it would give Minow Plan its consideration. Mr. Minow delivered major speech at Radio & Television Executives Society luncheon in New York before more than 1,000, record attendance in 23-year history of RTES (see story, page 52).

Robert E. Kintner, NBC president, said network is ready to meet with other two on Minow proposal, and favors "all practicable steps to expand and improve quality programming which contributes to the development of the nation's youth."

Frank Stanton, CBS president who was on west coast on programming trip, said network would give “serious consideration” to plan and he looks forward to all three networks sitting down and discussing it.

Leonard H. Goldenson, AB-PT and ABC president, said his network is willing to study matter seriously. All three cited youth shows now on air and programmed by each.

Highlights of news conference held later:

Asked about Doerfer Plan (in which networks last season programmed public information shows in specific prime-time periods and turned some time each month back to stations for local shows), Mr. Minow said he favored this in principle, thinks it brought results and that FCC may pursue that line but is concentrating right now on children's programming.

FCC hopes to wind up its network study by end of this year, Mr. Minow said. In answer to another question, he stressed that stations will be held to their promises on what they feel is broadcasting in public service.

He predicted Congress will resolve matter of network licensing “one way or the other” next year. He said it's up to public to let FCC know its reactions to TV programs, and felt public must be told "it controls broadcasting" and in last analysis can change it.

Wilson asks damages for Miami ch. 10 delay

L. B. Wilson Inc., holder of grant for Miami ch. 10, has asked U. S. Supreme Court to require National Airlines to pay damages “because of the delay occasioned by the filing of the petition for a writ of certiorari.”

National Airlines, fighting FCC's order, has asked Supreme Court to review appeals court decision upholding FCC's 1960 order which voided 1957 ch. 10 permit to National and awarded it to L. B. Wilson. National received stay until Oct. 16 from Chief Justice Earl Warren two weeks ago (Broadcasting, Sept. 11).

Motion for damages for delay, filed under court rule, includes affidavit by Charles H. Topmiller, president of L. B. Wilson, indicating company has spent over $1 million—and over $746,000 for physical assets and $255,000 to keep station on standby basis (with August running $15,000 for this purpose), plus commitments involving $45,600 for two-year lease on studio building, and $2,100 for option to purchase building.

L. B. Wilson asked that special master be appointed by court to determine damages and compensation.

Nielsen tv report out on new fall programs

First ratings reports (using Nielsen multi-market survey of 24 cities) on this season's newly-started programs were being studied Friday (Sept. 22).

Among new shows, giving rating and share, along with competing programs (starting show given first): International Showtime on NBC-TV, Sept. 15 (Fri. 7:30-8:30), 17.1 and 34, as against Rawhide on CBS-TV, also 17.1 and 34, and ABC-TV's Matty's Funday Funnies and Harrigan & Son averaging 7.7 and 15, Car 54, Where Are You? on NBC-TV, Sept. 17 (Sun., 8:30-9 p.m.), 23 and 39, as against Ed Sullivan (CBS-TV) and Lawman (ABC-TV) 17.4 and 13.4, respectively.

DuPont Show of the Week on NBC-TV, Sept. 17 (Sun. 10-11), 21.7 and 38, against CBS-TV average of 19.2 and 34 for that hour and ABC-TV's 10.7 and 19.

Defenders on CBS-TV, Sept. 16 (Sat. 8:30-9-30), 21 and 38, against NBC-TV's average 15.6 and 29 for hour and ABC-TV's 13.7 and 25.

Follow the Sun on ABC-TV, Sept. 17 (Sun. 7:30-8:30), 16.3 and 31, Dennis the Menace and Ed Sullivan averaging 19.1 and 36 for that period, and NBC-TV news special and National Velvet in that period averaging 10.6 and 20.

McGee poses questions on GE, WBC licensing

Sen. Gale McGee (D-Wyo.) on Friday urged FCC to closely examine "implications" of granting television licenses to giant corporations like General Electric Co. and Westinghouse Electric Corp.

He said “dangerous situation" exists in absentee ownership of television stations by corporations that are defense contractors. Such companies have "double interest as well as capability in shaping public opinion," he said. GE and Westinghouse are "prime examples" of this situation, he added.

Second “dangerous consequence of current trend,” he said, is difficulty of fixing responsibility for conduct as licensee, since large corporations establish subsidiaries to operate tv properties. He noted that licenses of GE and Westinghouse stations are up for renewal at time when officers of both parent concerns have been fined and jailed for antitrust violations. “Where does corporate responsibility begin—or end—in the holding of tv licenses?” he asked.

He said "cold, calculating assessment" of situation is needed now, "before it is too late."

Union listener boycott asked in KFWB strike

Listener boycott was recommended Thursday to end 11-week-old strike by American Federation of Television & Radio Artists against KFWB Los Angeles by representatives of 23 unions, who pledged "complete support" to
JOSEPH M. McMAHON JR., previously director of advertising, Joseph Schlitz Brewing Co., appointed vp in charge of business development for Benton & Bowles, New York. He will report directly to agency president, William R. Hesse. Before joining Schlitz eight years ago, Mr. McMahon was general manager of Potosi Brewing Co. and general sales manager and assistant to president of Atlantic Brewing Co. He has headed his own advertising agency in Chicago and has been associated with Grant Adv., Campbell-Mithun and Kirkgasser-Drew agencies.

JOHN H. (Jack) Wrath, former president of Headley-Reed Co., New York, appointed manager of Chicago office of Paul H. Raymer Co., radio-tv station representative. Mr. Wrath joined Chicago branch of Headley-Reed in 1939 and subsequently was named manager of office there. Two years ago he was moved to New York as president of company. Headley-Reed merged with Bolling Co. earlier this year and Mr. Wrath remained with consolidated organization for several months before resigning.

JOHN E. ARDLE, vp and director of tv sales, Metropolitan Broadcasting Co., New York, appointed to newly created post of vp and general manager of Metropolitan's WNEW-TV New York. He joined station in 1957 as account executive. Following year he was named general manager, WTTG (TV) Washington, another metropolitan station, and returned to New York in May this year as vp and sales director. In past, he has been with NBC's spot and network sales departments and with Ziff-Davis Publishing Co. as sales executive.

FRANK A. SHERER, financial vp, Interpublic Inc., New York, and former president of Knickerbocker Savings & Loan Assn., that city, appointed executive vp of Interpublic. Before joining Interpublic (formerly McCann-Erickson Inc.) in 1959, he had spent 29 years in banking as president of Knickerbocker, senior vp of Corn Exchange Bank & Trust Co., New York and vp of Chemical Corn Exchange Bank, New York. He will continue to have prime responsibility for all Interpublic financial matters.

For other personnel changes of the week see FATES & FORTUNES

AFTRA in negotiating "an honorable strike settlement."

Group voted to appoint action committee to meet with KFWB in effort to bring about resumption of bargaining in good faith between station and AFTRA. Unions also agreed to recommend that their members "cooperate in this decision by all legal means, including refraining from listening to KFWB until a settlement is achieved, and to urge their relatives, friends and neighbors to do likewise and to request the sponsors not to advertise on KFWB until the dispute is ended."

Unions represented at meeting included: AFM, IBEW, NABET, Actors Equity, SAG, WGA, AGVA, AGMA, ITSE and its member unions.

FAHEY FLYNN BUYS WCSR

WCSR Hillsdale, Mich., was sold by Ruth Keister and Russell Holcomb to Fahey Flynn, Chicago newscaster, for $105,000. Station is on 1340 kc with 500 w day, 250 w night. Broker was Hamilton-Landis & Assoc.

ASR BUYS GAMES ON ABC RADIO

HAMEL 'VOLUNTEERED' TO LIE, SAYS JONES

Former KWK St. Louis General Manager William L. Jones Jr., who earlier in week told FCC hearing examiner that KWK Sales Manager Don E. Hamel "volunteered" to hide luxury hunt prizes late in contest (see story page 86), testified Friday that Mr. Hamel also "volunteered" to lie to FCC investigators.

Mr. Jones made charge during further cross examination by KWK counsel in station's revocation hearing in St. Louis. Mr. Jones also had implicated KWK President A. M. Spheeris in "rigged" contest circumstances.

Mr. Hamel testified earlier that Mr. Jones "ordered" him to hide prizes late in luxury hunts and ordered him to lie to all KWK principals and to FCC. Two luxury hunts involved $1,000 and $1,500 prizes, respectively, and were held in mid-1960. KWK repeatedly contends it volunteered truth to FCC when it was learned.

Mr. Jones Friday changed his testimony about how he and Mr. Spheeris were in Chicago when Mr. Jones said he had to return to St. Louis to "get rid" of second luxury hunt prize and end contest. Friday Mr. Jones thought it might have been at brunch at Ambassador East. Earlier in week he thought it was Sheraton Bar. KWK counsel questioned witness in detail about his various recollections of certain events but Mr. Jones admitted at times he could not recall for sure.

Asked his understanding of his admission, false affidavit to FCC, Mr. Jones thought he certified his signature and date. Asked if he knew it attested to truth of contents, he replied, "No, I'd never had that understanding." He could not recall if notary had administered oath when he signed.

FCC counsel Friday afternoon announced conclusion of government case. Examiner recessed hearing until Wednesday in Washington when date will be set for KWK to present defense case.

CATV SALES TOP $1 MILLION

Sales of three community tv systems were announced Friday:
- H&B American Corp., Los Angeles, paid $1 million for catv systems in Missoula and Whitefish, both Montana.
- Milton Thurbur, Ontario, Calif., accountant, bought Lake Arrowhead, Calif., catv for $72,500.
- Missoula system serves over 4,000 subscribers; Whitefish group, almost 1,000. H&B purchase includes microwave system.

BROADCASTING, September 25, 1961
ARCH RIVALS

Two fiercely competitive businessmen were cold-warring—throwing dirty looks, casting aspersions, even hurling abusives. Realizing this was hurting them both, they finally decided to settle the feud once and for all in a civilized duel. The winner would merge the two businesses and hire the loser (for further sport).

Terms of the duel: whoever first scored exactly 100 in the target would win. Each could begin shooting whenever he figured out the combination of rings to hit for that score. Assuming both men were straight shooters (in archery, at least), how many arrows did the winner use and what rings did he hit?

Send us the answer and we'll send you an exciting new prize. We're offering several, so be sure and tell us what you've won.

* No duality in some places. One example: WMAL-TV feature films, best buy in Washington, D. C., after 11:30 p.m., with the lowest cost per 1000 homes for 1960-61 season. (ARB, Oct., 1960 thru Apr., '61)
The New Sound from Programatic®

Automated for FM
World’s Finest Adult Music
Newly recorded in Full Fidelity
O-Vation Music—sparkling new tunes plus personalized new format—represents the finest automated radio service available. Geared to today's mature audiences and to FM programming needs, each 8-hour O-Vation Music tape plays exciting NEW instrumental and vocal arrangements drawn from the greatest talent in the world. It's the economical way for a broadcaster to separate FM from AM programming. Played on superb Programatic equipment you are assured of beautiful music reproduced with true tonal qualities.

Equally important is O-Vation's flexibility which allows the insertion of any number of local broadcasts, news breaks, commercials and public service programs.

Only Programatic equipment is specially designed to play O-Vation Music to maximum advantage. Programatic starts and stops O-Vation tapes automatically. It pre-selects other broadcast material, including desirable public service programs, and automatically injects them at times you select. From the small local broadcaster to big city giants, FM or AM, this means great savings in manpower and operating costs.

O-Vation Music is available to only one station per market. Make it yours and open new horizons of audience and profit potential. To find out more about it, just send in this coupon.
A calendar of important meetings and events in the field of communications

*Indicates first or revised listing.

**SEPTEMBER**

Sept. 26—Resumption of FCC hearing on network programming practices, Federal Court House, Foley Square, New York City.

*Sept. 27—Academy of Television Arts & Sciences, Hollywood chapter,-panel discussion—"Is TV Indeed a Wasteland?" Hollywood Palladium, 8 p.m.

*Sept. 28—Federal Communications Bar Assn., luncheon meeting with Kenneth F. Cox, chief of the FCC's Broadcast Bureau, speaking on "Program Form and Logging Changes—What's All the Shouting About?" Washington Hotel, Washington, D. C.

Sept. 28-29—tennessee Assn. of Broadcasters, Read House, Chattanooga. Speakers include FCC Commissioner Rosel H. Hyde; Vincent T. Wasilewski, NAB executive vice president; Mark Ballman, McCann-Erickson, Atlanta; Tommy Martin, Mutual Life Insurance Co. of New York; Ben Sanders, KICD Spence, Iowa; Elmo Ellis, program director, WSB Atlanta; Charles Lamb, publisher, The Music Reporter; Gov. Buford Ellington, Tenn.

Sept. 29—Minnesota Broadcasters Assn., annual convention. Speakers include NAB President LeRoy Collins and FCC Commissioner Robert T. Bartley, Learmington Hotel, Minneapolis.

**OCTOBER**

Oct. 2—Deadline for comments on FCC's proposal to add additional vhf channel at below minimum mileage spacing to following cities: Baton Rouge, La. (Doc. 14231); Birmingham, Ala. (Doc. 14236); Charlotte, N. C. (Doc. 14236); Dayton, Ohio (Doc. 14324); Jacksonville, Fla. (Doc. 14328); Johnstown, Pa. (Doc. 14329); Knoxville, Tenn. (Doc. 1427); Oklahoma City, Okla. (Doc. 14231).

Oct. 2—New deadline for comments in FCC rulemaking on new program reporting forms and logging requirements, extended from Sept. 7.

Oct. 2-3—New Jersey Broadcasters Assn., Colony Motel, Atlantic City. FCC Commissioner Robert T. Bartley will speak at Oct. 2 dinner: Howard H. Bell, NAB vice president, will address opening luncheon.

Oct. 2-4—Canadian Electronic Conference of Institute of Radio Engineers, Toronto, Ont.

Oct. 2-6—Society of Motion Picture & Television Engineers, 99th convention. Theme will be "Integration of Motion Picture and Electronic Systems." C. Loren Graham, Eastman-Kodak, is program chairman. Among topics to be discussed: Subscription tv, tv equipment and techniques and tv recording. Lake Place Club, Lake Placid, N. Y.

Oct. 3-4—Advertising Research Foundation conference, Hotel Commodore, New York City.

Oct. 6—UPI Broadcasters of Michigan, Poplar Motel, East Lansing.

Oct. 6—New deadline for comments on FCC rulemaking to deter tv stations from establishing translators for sole purpose of increasing their coverage area.

Oct. 6—Comments due on FCC's reopened option-time rulemaking. Reply comments will not be accepted.

*Oct. 7—Indiana Broadcasters Assn., fall meeting. Speakers include FCC Commissioner Robert E. Lee, French lick Sheridan Hotel, French Lick.

*Oct. 8—National Academy of Television Arts & Sciences, trustees' meeting. Washington, D. C.

Oct. 8-10—Advertising Federation of America, 7th district convention. Jackson, Miss.

Oct. 8-18—International seminar on instructional television, sponsored by Purdue U., in cooperation with UNESCO and the U.S. National Commission for UNESCO. Dr. Warren F. Selbert, Purdue professor, is seminar director; James S. Miller, Purdue Television Unit, is associate director. Purdue U., Lafayette, Ind.

**DATEBOOK**

RAB management conferences

Sept. 28-29 Des Plaines, Ill.

Oct. 9-10 Palo Alto, Calif.

A solid play in Michigan's Golden Triangle stakes you to a lively market—Lansing, Jackson and Battle Creek! WILX-TV cracks all three with a city-grade signal and scores big in a lush outstate area.
How the ocean grew “ears” to pinpoint missile shots

A quarter of the world away from its launching pad an experimental missile nose cone splashes into the ocean.

How close has it come to the target?
Where can it be found, recovered and studied?

To answer these questions quickly and accurately, Bell Telephone scientists have developed a special system of deep-sea hydrophones—sensitive “ears” that hear underwater. Its name—the Missile Impact Locating System, or MILS for short. MILS, produced by Western Electric, manufacturing and supply unit of the Bell System, involves two types of networks.

- One is a Long Distance network which monitors millions of square miles of ocean. The nose cone releases a small bomb which sinks and explodes at the proper depth for transmission of underwater sounds. Vibrations are picked up by hydrophones stationed at the same depth and instantly carried by cables to ground stations. Since the vibrations take longer to reach some hydrophones than others, time differences are measured to compute the location of the nose cone.

- The other is a “bull’s-eye” network which monitors a restricted target area. This network is so sensitive that no bomb is needed. It can detect the mere splash of an arriving nose cone and precisely fix its location.

MILS is now operating in both the Atlantic and the Pacific test ranges. It was installed by the U.S. Navy with technical assistance from Western Electric.

It’s still another example of how the universe of sound—below the sea, above the earth, in outer space—is constantly being explored by the Bell Telephone System.

Barbecued Beans story
Editor: By the time I got to page 45 in your Sept. 4 issue, it struck me that I'd passed a familiar picture. So I searched backward and—sure enough—on page 39, pardner, there was a picture of our real live cowboys cooking up some real live Campbell's Barbecue Beans.

I'd like to thank you for your kind words and for your accurate report of the entire operation.

I'd like to add that... Bill MacFarland and Don Goerke, the Campbell marketing manager and product advertising manager, respectively, were both instrumental in making our commercials effective, as well as the remainder of a complicated new-product marketing plan.—Hal Kaufman, Group Head, TV/Radio Creative Dept., Needham, Louis & Brorby Inc., Chicago.

‘Color blind’ reprints
EDITOR: REQUEST PERMISSION REPRODUCE LEAD EDITORIAL, “COLOR BLIND” [EDITORIALS, SEPT. 11] WITH CREDITS. OF COURSE.—JOHN P. SHIPLEY, RCA, DETROIT.

[Permission granted.]

‘Zoorama’ distributor
Editor: We were initially pleased, then quite dejected with the story on “Zoorama” [PROGRAMMING, Sept. 11]. Our dejection is because we, not CBS Films, are the distributor of “Zoorama” and those hard-won sales were worked out by us.

Apparently the confusion lies in our having recently sublicensed to CBS Films all overseas rights on the series.

Cannibalism?
Editor: . . . Unhappily there remains in our dual industry a type of mind which feeds on the concept of turning broadcaster against broadcaster. Apparently Mr. Kevin Sweeney, president of RAB, is still among that group judging by his quotation [BROADCAST ADVERTISING, Sept. 11]. Referring to the prospect of adding some $30 million to radio’s national spot and network business, he says, “... In this survey are the clues to the kind of selling it will take to carve the entire $30 million out of television even if we don’t hack a cent out of print media.”

For decades broadcasters have been weakening their collective position by

Texas market story

EDITOR: ... The Texas story [SPECIAL REPORT, Aug. 21] was a magnificent job in covering our state.—Howard H. Hicks, Executive Vice President, Beaumont Chamber of Commerce.

EDITOR: ... amazed at the amount of information you managed to pack into the article.—Camilla Koford, Librarian, Research Department, East Texas Chamber of Commerce, Longview.

[Reprints of BROADCASTING's special Texas market story are available at 20 cents per copy or $2.00 per hundred, plus express or mailing charges.]

Fm stereo story

EDITOR: ... I note with interest the article, "Fm stereo pioneers find the going rough" [THE MEDIA, Sept. 4]...

I recently wrote a manufacturer of fm tuners and stereo amplifiers ... on their views about advertising on fm and they sent me the following reply: "We find printed ads containing product illustrations to be much more effective than equivalent-priced radio announcements."

Fm broadcasters: Stand on your feet and refuse to begin stereo until you have proof in the way of a contract that you will be supported!—George R. Kravis, President, Kravis Radio Enterprises, Tulsa, Okla.

EDITOR: ... To introduce the public to stereo was one of the main reasons why we proposed a new all-am system for stereophonic transmission. ... High quality stereophonic reproduction can be enjoyed by merely tuning two conventional am receivers to the single am station broadcasting stereo.

... Once the commercial success of fm stereo is achieved many people will want to install fm stereo because of fm's unique programming concept and other advantages. Thus, strange as it may seem, the acceptance of am stereo should speed up the commercial success of fm stereo. —Leonard R. Kahn, Kahn Research Laboratories Inc., Freeport, L.I., N.Y.
Why WNBC-TV bought Seven Arts Vol. II

Says Pete Affe:
"The stars and titles among these Warner Bros. 'Films of the 50's' from Seven Arts will ADD NEW VIGOR to WNBC-TV's MOVIE FOUR.

With these block-busters complementing the NBC-TV network movies, Saturday night will be a real 'night out at home' for New York viewers."

Warner's films of the 50's...

MONDAY MEMO
from JOHN P. WARWICK, vice president, Warwick & Legler, New York

Tampering with television programming can derail the economy

There's a trend in some places of late toward more control and supervision of television program content. The talk is of too much sensationalism, too much crime, too much violence, too many westerns, and too much non-constructive entertainment. At the same time, there is agitation for more educational content, more sophisticated entertainment, and more "intellectualism."

In my opinion, the safest and only sure judgment of what programming content should consist of must come from the American viewer himself. As in all phases of life—from political to recreational—the people should have the last word. And they will watch whatever programs they want to watch.

And, by their own moral and ethical standards, they will monitor and censor their own television set for themselves and for their children. They have their own reasons for liking the programs they regularly watch: escapism, relaxation, a good laugh, or liking the lead performers. Who is to say the reasons are "wrong"?

The American people seem to like television programming the way it is. If they didn't, the sets-in-use pattern would be downhill. To try to control or to drastically change the overall programming approach would have two very pronounced effects—one immediate and one long-range.

Dropoff • The immediate effect would be that people wouldn't watch television as much as they used to. People will not watch what they don't want to watch. Pseudo-intellectualism and mass educationalism have their proper place, but if the American people don't want this kind of TV diet during prime time, the television set will soon become an unused item of living room furniture.

Now the second and long-range effect could very well be that of a depressant on our economy. Our economy has always been, and is now, based upon mass consumption which, in turn, makes possible mass production and distribution. One of the greatest forces for mass consumption is effective television commercials. A manufacturer sponsors a program to sell his products and he will continue to sponsor only a program which gets proper audience. Mass consumption could diminish if fewer people see the commercials or if certain products go off television.

This would mean a reduction in sales in the product categories affected, followed by a reduction in profits and in taxes paid to the Government. It could also bring about a slow-down in allied industries and suppliers to the manufacturer, and a probable increase in unemployment.

People Know Best • The people know what's best for themselves. If this were not true, America would not be the No. 1 nation in the world. When people become dissatisfied with programming content, they will make it known in their own way.

In a nutshell, there appears to be a direct link between popular program content and a dynamic economy; and, without minimizing other effective selling media, it cannot be denied that television is one of the most powerful. A close look shows how many basic industries could be affected by a slow-down in consumer desire: Automobiles (and thus steel), tires, soap, proprietary drugs, all types of food products (thus farmers), cosmetics, clothing, insurance, transportation, jewelry, and scores of others.

There is another very important factor that must be considered: the size of the television industry itself. Severe, unnatural programming adjustments in the form of unnecessary regulations could directly affect the lives of thousands of actors, writers, cameramen, technicians, producers, make-up people, etc., and, of course, the lives of their families.

Fortunately during our country's history there have been very few industries that have not been left alone to pursue their own natural competitive course. And, to date, television programming has been allowed to follow this same healthy pattern. Any change in this pattern, it seems to me, would be unfair and restrict competition in that many talented people would find no "market" for their services.

For instance • Some possible examples: actors who portray mainly "heavies"; writers whose specialty is melodrama and detective shows; and "stunt" men, who appear regularly in westerns.

We don't have to look far to see what can happen to an industry upon which artificial crubs have been placed. There is no doubt the farmer has not kept pace with the rest of the economy and every election time we hear both parties come up with their answer to the farm problem. Unfortunately, the problem never seems to be solved. Thousands of farmers must produce under unnatural laws of supply and demand. Many learned people of both political parties insist that it is more than coincidence that the farmer has not kept pace and that his procedures are unnaturally governed.

If someone, or some group, has an urge for extra censorship or to "do a little laundry in the entertainment field," they might very well look at the motion picture industry before they jump on television. Although most movies are fine family entertainment, a certain number produced each year, both here and abroad, would make most violent and questionable television shows look like a Sunday school picnic.

Let's leave things pretty much the way they are in television programming. The existing forms of censorship such as the code and the networks' continuity departments can take care of extreme cases, but for the overall approach to programming, I personally favor the status quo. The public likes it the way it is, and it's good for business, which means it's good for everyone.

John P. Warwick has been with Warwick & Legler, New York, for 13 years. Initially he worked on various national and regional accounts, each of which was active in network or spot radio and television. He was appointed vice president in charge of operations for W&L six years ago. Before entering the advertising business, he was a retail salesman, calling on food stores. Mr. Warwick served in the U. S. Navy during World War II. He is a graduate of Dartmouth College.

PREMIUM SPOTS IN SHORT SUPPLY

- Availabilities survey shows business well ahead of 1960
- 40-second breaks are getting extra volume from sponsors
- Major markets continue to get best breaks from advertisers

Spot television business has thrown off the sluggishness that marked the first half of this year and is moving into the fourth quarter with a momentum that already is putting the squeeze on premium commercial positions.

Minute availabilities are in short supply, especially in prime and evening fringe time, and unsold 20-second break positions are becoming increasingly hard to find in nighttime hours. These availabilities rank one-two in demand among agencies and advertisers.

This availabilities report represents the continuing interest found in a special Broadcasting sampling of television stations throughout the country, supplemented by a canvass of a dozen leading station-representation organizations. Although reflecting dominant viewpoints, however, these findings do not typify business conditions at all stations or in all markets, which historically can fluctuate widely from one to another and which this year may be doing so even more than usual.

40-Second Patterns - The study, while concentrating on the situation facing buyers as of the last week of September, also cast what is probably the first general light on overall patterns emerging in the use of the new 40-second station breaks which all three networks are putting into effect this fall. It also showed that stations and reps are predominantly optimistic about the sales outlook not only for the third quarter but for the fourth quarter as well.

Highlights:
- The majority of stations and reps reported that fall business is running ahead of last year's. Those who mentioned percentages usually put the gain in the 5 to 10% range. Stations indicating increases outnumbered those registering drop-offs by more than three to one, and among reps the ratio was closer to seven to one. A number of others, both stations and reps, said their current business was holding even with last fall's.
- The new 40-second station breaks in network prime time, 10 seconds longer than allowed by the networks in recent years, are generating a substantial volume of extra nighttime business, primarily of the 20-second variety, but there is a wide difference of opinion as to whether this will add up to a meaningful net gain or merely a transfer of advertiser dollars heretofore spent in other parts of the day.
- There has been a nominal show of adviser interest in, but no real demand for, 30-second and 40-second spots within the new 40-second prime-time breaks. Most stations would accept these longer spots if they were offered, but with a few exceptions are not currently pushing them. The 20-20 combination appears to be the standard pattern on stations selling the longer break period; otherwise it's the usual 20-10, plus a 10-second promo or service message to fill out the 40.
- There appears to be a growing trend among advertisers to concentrate on major-market stations and pass over or reduce their use of stations in smaller and medium-sized markets. This practice has been noticeable in past years but appears to be increasing, according to a number of sales authorities who attribute it both to an increasing advertiser tendency to demand greater sales results for their spot buys and to their more widespread use of the network.

Public votes 84 to 11 against FCC program control

FCC Chairman Newton Minow considers television a vast wasteland but there's evidence most of the public doesn't go along with this appraisal.

A survey conducted during the Minnesota state fair by Research Associates, St. Paul, shows that only 14% of those interviewed feel tv is a vast wasteland. In the survey, 79% answered “no” when asked if they think tv is a vast wasteland (7% didn't answer).

This major research project was based on interviews with 17,500 persons who attended the fair. Random sampling of adults was designed to produce typical responses.

Not only did 79% disagree with the FCC chairman's view, but an even bigger percentage—84%—answered “no” when asked whether they think the government should decide the kind of programs that go on tv. Only 11% said yes (5% didn't answer).

Dr. Roy G. Francis, professor of sociology of the U. of Minnesota and director of Research Associates, said these results are the first to come from a major project involving about 160 tv questions designed to find what the public thinks of the medium. Tabulating is expected to be completed in a fortnight.

Dr. Francis said television's critics apparently forget that "quality" is rare, referring to their repeated demands for top-flight, blue-ribbon programming in quantity. “A quality experience is isolated,” Dr. Francis explained. “You think about it afterward. Critics seem to think Hamlet should be available all the time. I would hate to live in that kind of a world.

“People tend to upgrade themselves in surveys when asked their preferences. We have found in radio surveys that they express a liking for classical music but actually may not listen to it. I have an optimistic view of the public's choice of viewing.

“This new survey indicates people like to decide for themselves what they want to see on television and don't want the government to tell them what to view. One ought not think that the tv viewer is incapable of deciding for himself.”
premium spots in short supply continued

programs being opened up for so-called "spot carrier" messages.

The spot availabilities in greatest demand and shortest supply, as indicated by both the station survey and the canvass of reps, not surprisingly are minutes and 20-second spots between 6 p.m. and the wind-up of network option time five hours later. Ten-second spots and IDs also have been sold in substantial volume in these periods, but on the whole the stations indicated ample availabilities remain for this period and especially in the fore part between 6 and 7:30 p.m.

The demand for and in many cases the shortage of minutes was pointed up by reps, many of whom said they were finding these availabilities in short supply not only during nighttime hours, but in virtually all other parts of the day as well. One rep said his stations had no minutes available after 6 p.m. and were within a couple of percentage points of complete sell-out from 1 p.m. on.

At the other extreme some stations reported as few as 10% of their minute availabilities sold in the generally popular early-evening fringe time of 6 to 7:30. In other day part stations reported 60-second sales ranging from a low of 6% of availabilities to a high of 40% in the morning, from 24% to 100% in afternoon, from 8% to 63% in the period from 11 p.m. to sign-off.

20's Short Too • Twenty-second availabilities also were frequently reported in short supply, but less so, on the average, than minutes. A number of stations said they had no 20-second availabilities left in the 6-7:30 period, but others said their 20-second sales in this segment ranged as low as 20% of the total which could be accommodated.

These extremes dramatize what rep salesmen historically emphasize: That sales can vary so widely from market to market that it can be misleading to talk in terms of averages. Many factors contribute to this fluctuation, but in some cases it seems to defy rational explanation.

The factor which salesmen singled out last week as a major influence—along with the obvious ones of market size and station position within the market—is network affiliation, which the consensus appeared to evaluate roughly this way: that NBC-TV is strongest in the morning and CBS-TV in the afternoon. Thus NBC-TV affiliates are apt to have fewer morning spot availabilities and CBS-TV fewer in the afternoon. In addition, several representatives felt that ABC-TV's daytime advertiser rotation system mitigates against daytime spot buying on ABC-TV affiliates by ABC-TV daytime network advertisers, on the theory that their spot buys might wind up too

No neutral corner in toothpaste battle

TV ONLY SURE WINNER AS P&G, C-P, B-M SET FLUORIDE AD PLANS

Three dentifrice giants—Procter & Gamble, Colgate-Palmolive and Bristol-Myers—are planning mammoth advertising campaigns to get their share of the $235 million dental hygiene market.

Their main attention will be focused on fluoride toothpaste, newest favorite of consumers. And their key medium, judging by present portents, is likely to be television.

Outside this battle is Lever Bros., a familiar figure in the cosmetic-detergent industry. Lever has no entry in the fluoride field but no one will be surprised if this major advertiser comes up with a product of its own and joins the competition.

By next spring the media battle will reach a peak. The familiar names will be promoted heavily.

The statistics for the future competition shape up like this:

Procter & Gamble, whose Crest is the only established fluoride brand on the market (it was introduced in 1955) is in good position and moving fast. Since last August when the American Dental Assn's Council on Dental Therapeutics endorsed Crest as "an effective caries dentifrice," the toothpaste has nearly doubled its share on the market and increased its annual sales by about $23 million.

Crest currently is the second leading dentifrice in the country, with an estimated 22% or $51 million of the $235 million toothpaste market. Before the ADA endorsement, Crest was third with sales of about $28 million or 12%.

Procter & Gamble took advantage of the dental association's stamp of approval (it was a qualified one) by substantially increasing its already heavy tv schedule for Crest. Television Bureau of Advertising figures show that in the first six months of this year, P&G's gross time billings for Crest for the first half of this year exceeded by $124,016—$4,916,746 for January through June 1961, as compared to $4,792,730 throughout last year—its gross time advertising expenditures for the brand in all of 1960. The Tvb figures also show that since the ADA endorsement, P&G has drastically shifted its advertising gears for Crest and is putting more and more into spot announcements. In the first half of last year, before the endorsement was made, only $107,070 of Crest's money was placed in spot. During the second half of the year—post-endorsement—$462,680 was spent in spot, a gain for spot of $355,610. So far this year, through June, P&G has spent $1,444,380 in spot and $3,472,366 in network advertising to promote its Crest brand. Indications are that P&G will accentuate its present tv advertising budget for Crest if competition from new fluoride brands warrants it. The account is at Benton & Bowles.

Stable Mate • P&G also markets Gleem, currently the third most popular dentifrice in the nation. Until Crest made its spectacular rise, Gleem (a non-fluoridated brand containing GI-70, a blend of antionic sulfonates) was the second-ranking toothpaste. It now enjoys 20% or about $47 million of the dentifrice market. During the first half of last year, P&G, through Compton Advertising, spent more than $3.6 million in gross tv time billings on Gleem—advertising expenditures it is almost duplicating this year. Procter & Gamble evidently does not intend to promote

24 [broadcast advertising]

broadcasting, September 25, 1961
close to their already placed commercials.

The generally improved spot business reported and foreseen was attributed in great part to the general improvement in the national economic situation since the first half of 1961, when total spot TV business was off about 1% (Broadcasting, Sept. 4). The consensus also felt that the 40-second station break in network prime time is pulling additional spot business into the prime evening hours.

More 20's Sold • But it was clear that this is being accomplished through the opening up and sale of more 20-second spots rather than any trend toward newer lengths. Reps said that although they have had inquiries about availabilities for 40-second and 30-second spots within the expanded break period, only Gulf Oil has placed firm orders (for 40-second spots). Among the advertisers identified as having sought information about 40-second availabilities are American Home Products, Esso, Brown & Williamson, Johnson & Johnson (Arsetin Cough Syrup) and Easy-All Spray starch.

The station answers to queries about acceptability of 30- and 40-second spots is generally yes—with a few exceptions, stations appear willing to accommodate them if an advertiser wants these lengths. But there is no strong push to get advertisers to buy them, although two or three reps have pointed out the advantages of a 30-10 combination from the advertiser's standpoint or expressed a preference for that combination. Even these efforts appear to be long-term, however.

In addition, several reps expressed the hope that advertisers will test the 40-second spot in order to ascertain its efficiency as compared to that of the standard lengths.

Will it Increase Totals? • Whether the upsurge of 20-second buying within the 40-second break will lead to a substantial increase in overall spot billing was a widely disputed question. Some said it already had done so; others said it has not had such an effect, in their experience, and that they didn't expect it to.

Some said they were selling no more prime-time business now than last year, when they had only 30-second breaks to sell. Others said they were selling more but that the increase appeared to be coming out of daytime or fringe time, while others reported an increase in prime time without any noticeable drop-off anywhere else.

Between these extremes the consensus appeared to be that it's still too early to tell, but that no matter where it comes from or shows up most prominently—a respectable gain is in store for spot television generally this fall and winter season.

one of its toothpaste brands at the expense of the other, but if Crest begins to find the going tough, some of Gleem's advertising outlay may be thrown into the fluoride fight.

Colgate-Palmolive Co., with its Colgate Dental Cream, is the reigning champ (a title it has held since long before the advent of either radio or TV) of the dentifrice field. But its former secure 35% of the market has slipped in the past year to 26%, only 4 percentage points better than Crest.

Realizing that its long reign is being seriously threatened by Crest, Colgate introduced Cue, a new fluoride toothpaste, in August. The brand in being tested in Louisiana and Texas with the aid of a modest advertising budget, handled by D'Arcy Adv., that includes print, tv spots IDs and cut-ins.

Some two weeks after the debut of Cue, Colgate put another fluoride toothpaste, called Colgate Fluoride, on the market. The latter brand currently is being tested in Oklahoma, Kansas and western Missouri. The tests are supported by print and TV spot tie-ins through Ted Bates & Co., which also handles Colgate Dental Cream.

The almost simultaneous introduction of two fluoride toothpastes by Colgate has most dentifrice people guessing. The products are considered virtually the same. The only apparent difference: Colgate Fluoride is a blue-colored toothpaste, while Cue is white. A company spokesman said that Colgate Fluoride is marketed as a blue dentifrice to avoid conflict with Colgate Dental Cream, which is white. He also said that Colgate, in introducing the two brands, is measuring the effectiveness of "divergent marketing concepts" to bring a fluoride product to the public. No indication was given as to which, if either of the two brands would be sold on a national basis, but betting in the dentifrice industry favors Colgate Fluoride as the eventual challenger to Crest's rising dominance.

Not So Brisk • Actually introduction of the two new brands marks a partial return to a marketing concept already tried by Colgate. In 1955, soon after P&G first unveiled Crest, Colgate began marketing a sodium fluoride toothpaste called Brisk. The brand never was very successful in changing consumer buying habits (Colgate says that "after exhaustive tests," it did not live up to "the high Colgate standards"), and subsequently promotional support of it was withdrawn. Currently Brisk is sold as...
a non-advertised paste containing BR-85 (sodium n-lauroyl sarcosinate).

Brisk's failure accentuated the long-standing controversy that exists among dental authorities over the relative merits of sodium and stannous fluorides. Colgate-Palmolive and Procter & Gamble, at least, seem convinced as to which of the two compounds is the better decay fighter—both Colgate Fluoride and Cue, as well as Crest, are stannous fluoride pastes.

While Colgate has not released details of any advertising plans for its two new brands, their promotional future may be determined by the company's advertising past. Last year Colgate spent about $12 million in total advertising expenditures, and TV received about three-fourths. For the first six months of this year, according to TVB, the company has incurred almost $5 million in gross time billings to advertise its Colgate Dental Cream brand. Although that brand alone surely will continue to get the major share of Colgate's ad expenditures, it's been reported that a new fluoride product—if retail sales show proper signs of encouragement—would eventually get a comparable advertising budget.

Something New • Bristol-Myers Co. entered the fluoride arena during the summer by adding sodium fluoride as well as hexachlorophene (said to be an anti-bacterial agent) to its established Ipana brand. The resulting toothpaste, called New Ipana, has been selling in states east of the Rocky Mountains, after tests in Washington and Baltimore, since the first week in August.

Doherty, Clifford, Steers & Shenfield is handling advertising for the brand and is making extensive use of one-minute and 30-second radio spots, and various TV IDs, spots and network sponsorships. Newspapers, magazines and supplements also are being used. The theme of the campaign: “Announcing the first major toothpaste advance since fluoride ... now Ipana has Hexa-Fluoride.”

Bristol-Myers, which test-marketed a fluoride paste called Sentry in the mid-50s but withdrew it because of inadequate sales interest, spent $1.1 million in both spot and network TV to advertise the old Ipana in the first half of 1961. As of June, Ipana was holding on to an estimated 6% of the dentifrice market—as compared to 7% in pre-Crest-endorsement days—and was sixth in the toothpaste parade.

Bristol-Myers traditionally is a heavy user of spot and network TV (last year it was the seventh biggest TV spender with total TV billings just under $21 million). With only one product in the dentifrice field, Bristol-Myers reportedly is ready to back its fluoride product almost dollar for dollar with Crest.

Lever Bros., with two conventional dentifrices in circulation, has so far refrained from hitching onto the fluoride bandwagon. A company spokesman will say only that the company is “watching the situation carefully.” He implied that the current fluoride toothpaste vogue has not proved a lasting one and that Lever Bros. will act when it is thoroughly convinced a fluoride brand is an absolute necessity in today's marketing scheme.

Where It Hurts • Lever's two existing dentifrice brands, Pepsodent and Stripe, have secured a total 16% of the market, but both have suffered from Crest's recognition by the ADA. Pepsodent (with Irium), which at one time ranked over Crest, currently is the fourth leading toothpaste with 9% of the total annual dentifrice sales, and Stripe (like the New Ipana it contains hexachlorophene) is in fifth place with an approximate 7% share of the market. The Pepsodent account is at Foote, Cone & Belding; J. Walter Thompson handles Stripe.

Although Lever Bros. is still a holdout and the other giant dentifrice makers have yet to complete advertising plans for the next episode in the struggle for supremacy, television already is reaping its share of preliminary benefits. A TVB report released last week showed that during the first half of this year, dentifrice advertising on TV has gone up 15.5%, or $2,406,977, over the same period in 1960.

New rep firm to cater to 'fine arts' clientele

The new company, which will establish branch offices in Chicago, Detroit, San Francisco and Los Angeles, was formed, according to Mr. Brown, to meet “immediate and pressing demands from agencies and advertisers for fine arts radio stations in major-market areas.”

New rep firm specializes in all-jazz fm stations

A specialized medium is emerging in fm radio, according to a new station rep in New York who is lining up all-jazz outlets.

Jazz is the only programming area of fm radio that am stations are not likely to touch in the years ahead, according to Robert Richer, who last week announced formation of Robert Richer Representatives Inc. (327 E. 58th St., telephone: Plaza 2-6462).

The new rep has already been appointed by KNOB (FM) Long Beach, Calif.; WJZZ (FM) Bridgeport, Conn.; WUPY (FM) Boston; WAZZ (FM) Pittsburgh, and KJAZ (FM) Alameda, Calif.

HJG-TV to rep tv stations

The formation of HJG-TV a new TV station representative firm, was announced last week by Lee Gorman, who will act as executive vice president. Mr. Gorman, national sales manager of WINS New York and formerly executive vice president of WABI-TV Bangor, Me., said the firm has signed contracts to represent WCCB-TV Montgomery, Ala., WCCA-TV Columbia, S. C., and KTVW (TV) Seattle, Wash. HJG-TV headquarters are at 7 Central Park West, New York.
Does it say success to you? It should. It’s the new symbol for the Blair Group Plan, the most successful and efficient radio spot buying concept in advertising history. Overstatement? Judge for yourself: the Blair Group Plan has never failed to meet the sales goals of its users. It enables you to reach 80% of the nation’s buying power through America’s most influential group of radio stations—with one order, one affidavit, one invoice. The Blair Group Plan has helped a score of advertisers, big and small, overcome highly competitive conditions. Call PLaza 2-0400 in New York City to find out how the Blair Group Plan can help your product to succeed. A service of John Blair & Company. Offices in eleven major cities.
PEPSI BACK AS 'STEVE ALLEN' REGULAR

Barnet tells why and how bottler returned to network tv

Back in June 1955, the Pepsi-Cola Co., New York, ended its sponsorship of Pepsi-Cola Playhouse on ABC-TV, signaling a virtual halt to the company’s investment in network programs on a regular basis. Pepsi had been a network advertiser since 1950 and its defection and subsequent absence from the medium, except for occasional specials and minute participations, were sources of annoyance and frustration for network sales executives.

This week, after an absence of more than six years, Pepsi returns to the roster of regular network advertisers, with an investment of approximately $3 million as an alternate-week, half-sponsor of ABC-TV's Steve Allen Show (Wednesday, 7:30-8 p.m.). Why did Pepsi leave the network field and why did it return?

Herbert L. Barnet, Pepsi-Cola president, summed up the company’s reasoning in this way:

"In 1955 we left network television because we felt that there was no programming available that was suitable for our purpose. We used our television money largely for spot tv and occasionally we sponsored a special, such as Cinderella and Annie Get Your Gun in 1957 and a spectacular featuring Jane Powell this past spring. "But about a year ago, at the suggestion of some of our bottlers, we decided to re-examine our position vis a vis network television. We knew what we wanted: it had to be a quality entertainment show that could garner a satisfactory rating; it had to be a prestige vehicle that would engender sponsor identity, and, perhaps, most important, it had to be a program that would lend itself to merchandising and promotion on both the national and local level."

Auditioning • Accordingly, Mr. Barnet and his two top aides, Philip Hinelfeld, vice president, advertising, and John Soughan, vice president, marketing services, listened to scores of presentations early this year on upcoming new network programs. After long and careful deliberation, they chose Steve Allen Show as Pepsi’s showcase television effort for 1961-62. Mr. Barnet and his associates are confident the program fulfills each of company’s criteria for television.

"We think that the program and Steve Allen himself will fit in well with Pepsi-Cola’s theme—'For those who think young,'” Mr. Barnet said. "In addition, Pepsi has a theory about pre-selling programs we sponsor. We will maintain a steady stream of promotional reminders to the public about the Steve Allen Show through millions of ‘collars’ around Pepsi bottles; banners on thousands of our company trucks; streamers and window displays in more than 5,000 stores; spot radio messages on stations throughout the country. We have always felt here that sponsoring a program is not enough; you’ve got to keep telling the people that you’re on the air with the show.”

Local tv advertisers can get big names

Videotape Productions of New York has developed volume-production methods that will permit local tv advertisers to use top television performers in custom-made tape commercials, it was announced last week by Herbert W. Hobler, Videotape sales director.

Mr. Hobler noted that the project is being expanded as a result of the company’s move last week to its new Videotape Center with three stages, from its previous single-stage plant. The new studio building at 67th St. and Columbus Ave., New York City, has been leased from NBC.

In describing the local advertiser project, Mr. Hobler explained that in the past it was difficult to obtain name personalities for tape commercials because of "booking conflicts and economics." Videotape Productions of New York, he said, will coordinate the appearance of a personality in a number of tv commercials for various sponsors in different markets. Production economies, he added, will be effected by using six standard sets and a rear projection for the background screening of local scenes.

These techniques will reduce costs, Mr. Hobler stressed, because local tv sponsors can now combine production resources as a group to use name talent for commercials during a continuous shooting period.

North American show goes on spot basis

After two years on ABC-TV, North American Van Lines through Biddle Co., Bloomington, Ind., will place its weekly Championship Bridge program this fall on a spot basis in at least 50 major markets and possibly as many as 75. North American cites high viewer loyalty among young executive class families, a highly mobile group, as one reason for the third year renewal of the Walter Schimmer Co. package. The mover also feels the program has strengthened agent relationships.

On set in Chicago during filming of one program for the new season’s series are: (standing l to r) Ed Russel, Biddle Co. vice president; Charles Goren, program star and bridge authority; Walter Schimmer, president of the Chicago tv film firm bearing his name; Jack Russel, Biddle account executive; (seated, l to r, and players featured on this particular program) Harry Fishbein, one of world’s leading players; George Foerstner, executive vice president of Amana Corp.; Lee Hazen, another top player, and Leonard Truesdell, president of Zenith Sales Corp. Messrs. Foerstner and Truesdell challenged the experts.

And for the staffs of KPRC Radio and KPRC Television “Carla” was all in a day’s work!

In the Gulf Coast Area of Texas and Louisiana, the KPRC Organization has, for almost four decades, been the service upon which people depend for the fastest, most factual reporting of the news. In times of stress particularly these two great KPRC stations demonstrate their sincere concern for the millions they serve. The recent experience with vicious Hurricane Carla once again gave KPRC and KPRC-TV the opportunity to serve . . . to save lives and property! At KPRC and KPRC-TV already, hundreds of letters of appreciation, telegrams and messages have been received. The people at these two stations are thankful that they could help. Being of service is a responsibility they readily accept.

Keystone reports Negro population up 25%
SAVS GAINS IN AFFILIATES’ MARKETS ABOVE AVERAGE

Keystone Broadcasting System, Chicago, which has 360 affiliated radio stations programming directly to Negroes in their communities, last week reported that the total U. S. Negro population rose 25.4% in the last decade—from 15,044,937 persons in 1950 to 18,871,831 in 1960.

Based on state-by-state material developed by the U. S. Dept. of Commerce in its 1960 Bureau of Census survey, the Keystone summary was analyzed by George Wharton, research director, in advance of national totals on Negro population to be issued by the Census Bureau later this year.

The Keystone study shows a total U. S. population of 179,323,175, of which Negroes make up 11%. West Virginia, Wyoming, Arkansas and Mississipi were the only states to show a decline in Negro population over the 10-year period. Of the 10 states with the largest Negro populations, only Mississippi had a decline.

In the 23 states where Keystone’s Negro Network affiliates are located, the average Negro population rise exceeds that of the national average gain. Mr. Wharton said the average network station carries 42 quarter-hours of Negro-appeal programming each week, which is “at least a 15% rise in the last 10 years.” Negro station affiliates increased from 278 in the same period.

The complete population breakdown for the total U. S. and each of the 48 states (Alaska and Hawaii were not included in the tabulation) and the District of Columbia follows:

BROADCASTING, September 25, 1961
Man, they’re on our trail—and GAINING!

You know how many wimmin listen regularly to WDAY Radio, in the Fargo area? The latest 55-county Pulse Area Report gives us 155,100 grow’d-up females—which is 42% more than the second station! (6 a.m. to 12 midnight, Mon. thru Fri., March-April, '61.)

At times, this audience gets as high as 87% more wimmin than Station B (7 to 9 a.m.).

We must admit we like the ladies. If you do, too (for commercial reasons, that is) you really got no other choice than WDAY Radio, the big adult-preferred station in the Red River Valley! Ask PGW.

Tv gives Maris, Mantle golden touch

EXPLOITATION OF YANK HEROES ON TV PAYS OFF BETTER THAN HOMERS

Ten years ago Roger Maris would have been lucky to parlay his spectacular batting achievements into a handful of gift watches, a loving cup, and a few thousand dollars in merchandising royalties. But today he's set to reap a half-million dollar harvest over a three-year period, exclusive of his baseball salary. The difference, for the most part, is television, with its unique potency for exploiting fame and talent.

Maris' Yankee teammate, Mickey Mantle, for example, will probably earn a $200,000 above his wages by 1964, even though he has failed to grab the magic ring that transformed Maris into such a sought-after personality—all but matching Babe Ruth's 60-homer record for 154 games. These financial windfalls for Marlin and Mantle are expected to come from tv motion-picture guest appearances, broadcast commercials, advertiser testimonial, ghost-written literary efforts, and merchandising tie-ups.

The man sowing these financial crops is Frank Scott, a managerial magician, who converts sports stars into valuable television and merchandising properties. In the role of business agent, he's been guiding the commercial fortunes of some of the nation's top athletes for the past 11 years, but never has he held so hot a hand. The M boys—Mantle and Maris—stacked back to back have tv producers and advertisers already beating a path to Mr. Scott's door.

No matter what happens during the remaining week of the baseball season, Mr. Scott is packaging his hard-hitting meal tickets as a tandem. He's already committed them to a guest shot on Perry Como's premiere program this season on Oct. 4 (NBC-TV, Wed., 9-10 p.m.) at $15,000, his current asking price for tv appearances by the duo.

That package price is expected to go up, but since the Como show is assured a certain degree of exclusivity, the M boys' immediate subsequent guest shots will not command as much money. (Mantle and Maris have promised not to make any other guest appearances prior to the NBC-TV program but are free to negotiate for any other engagement immediately afterwards. These conditions vary somewhat from the exclusivity clause in standard contracts governing tv guest appearances; no guest shots 21 days prior to and 8 days after an appearance on the tv show contracted for.)

Once free of their Como show commitment, Mr. Scott says, the M boys are slated for guest shots on at least six other tv shows (possibly CBS-TV's Ed Sullivan and Garry Moore shows and NBC-TV's Today show) within about a 30-day time span. He indicates that the New York Yankee outfielders, both of whom are members of the Screen Actors Guild and the American Federation of Television & Radio Artists, will receive $2,500 apiece for these appearances. In addition, Mr. Scott says, at least a dozen tv advertisers are knocking on his door in hopes of getting Mickey and Roger to appear in commercials.

During the course of the current baseball season, M and M each have been working for three tv advertisers. Mantle is seen in 60- and 20-second spots and IDs for Wonder Bread, a Continental Baking Co. product handled by Ted Bates & Co.; 60-second commercials, through Benton & Bowles, for General Foods' line of Post cereals; and one-minute and 30-second commercials for Colgate-Palmolive Rapid Shave, another Bates account. The Wonder Bread spots are being shown throughout the country; the Post cereal commercials, which are tied in with the company's baseball card trade-in promotion, are on many of the General Foods programs including Bugs Bunny, Angel and the Danny Thomas show, as well as in spots; and the shaving cream commercials are on four network shows, and in spots in selected markets.

Maris appears in three 60-second commercials. They are for R. J. Reynolds Tobacco's Camel Cigarettes, through William Esty Co.; Aqua Velva After Shave Lotion, a J. B. Williams product handled by Parkerson Adv., and Whitehall Labs' Infra-Rub product, which is placed through Sullivan, Stauffer, Colwell & Bayles. The Aqua Velva commercial is an integral part of ABC-TV's Lawrence Welk Show, and also is seen on local shows and in spots in various markets. William Esty Co. uses the Camel commercial on many of R. J. Reynolds' network shows and on its baseball telecasts. The Infra-Rub commercial is used by Whitehall Labs on several of its network programs.

Mr. Scott expects some of these advertisers to sign him up for another year's work, but insists that he won't increase their fees just because the baseball tandem suddenly have become a household preoccupation. Up until now they have been receiving between $1,500 and $5,000 a commercial, which is given as a down payment against residuals.

"You can't hold companies like R. J. Reynolds and Colgate-Palmolive over a barrel just because you suddenly get hot," Mr. Scott explains.

Maris on Camel • This is the second year Mr. Maris has been doing the Camel commercial and Mr. Scott says the Yankee received a "substantial increase" over his 1960 fee as a result of winning last year's most valuable player award in the American League. Following logic one step further, Mr. Scott figures most advertisers now employing the services of the M boys will renew next year and offer them voluntary raises in recognition of their well-publicized performances this season.

Operating in, what is for him, an unprecedented seller's market, Mr. Scott has several other highly attractive financial deals brewing. He says that "two of radio's biggest syndicators" (he declines to identify them further), wants Mantle and Maris to do daily 15-minute sports shows in the off-season. He also claims that an unnamed tv network (rumor says it's CBS-TV) is planning an hour-long special on the famous sports pair for a post-World Series showing. The Life Story of Mickey Mantle, a 60-minute show, was televised by NBC-TV on its now-defunct Kraft Theatre program on Oct. 3, 1956, but the rights to the story have since reverted back to Mr. Scott. Mantle reporter received approximately $25,000 for his part in the program, a price that could about double if present plans
TIMELY! INFORMATIVE PUBLIC SERVICE! WFAA's "Open Mike" tears right into the heart of controversial issues, the latest being widespread publicity and the subsequent law-ban of a popular novel. With the police chief, a minister, a psychiatrist and a librarian forming the discussion panel, WFAA Program Director Pierce Allman put printed "smut" on the firing line. The result was a better informed public and kudos from listeners everywhere. People around "Big D" like to be informed. That's why they turn to WFAA-820. A call to your PETERSMAN now can establish your client's message in WFAA's always interesting, timely, adult appeal programming.
Erickson's formula for millionaires

Rodney Erickson, president of Filmways Inc., who has said that it was his goal to be a millionaire by age 45 (BROADCASTING, Aug. 8, 1960), last week gave advice to advertising executives on “How To Make a Million Dollars in the Agency Business by Really Trying.”

Mr. Erickson, who turned 45 this year, did not mention whether he himself has attained the millionaire goal, but suggested to members of the Chicago Federated Advertising Club that the “quickest and surest way” to attain that moneyed status was to (a) write a best-selling book or (b) invest in stock of client companies on the basis of information obtained while working on agency accounts.

A one-time vice president and general manager of tv for Young & Rubicam, New York, Mr. Erickson suggested that agency officials explore the possibility of persuading their management to provide them with such money-earning devices as stock options, profit sharing, deferred payment and insurance policies.

Among his other suggestions in his recipe for success:

“Don’t be afraid to be fired; most notable people in the advertising field have been fired a number of times.”

“Be sure that your new job has more benefits than the old job and your salary is at least doubled.”

“A growing middle-sized agency with a long way to go offers much more keeping-money potential in stock appreciation so long as top management is sound.”

“The trouble with most agencies today is that their personnel are more interested in personal security and in keeping an account by sycophancy, doing what the client asks, rather than taking a position of leadership and forcing the clients to accept new concepts.”

for another show materialize.

Best of all, Mr. Scott is happiest over the merchandising deals he is manipulating for his most celebrated clients. For the M boys are high up on the most-wanted list of manufacturers whose products thrive on personal endorsements.

Profitable Area • Mr. Scott says that personal endorsements are particularly profitable because Maris, for example, should not only get up to $5,000 for an immediate endorsement, but also is likely to receive as much as 5% of total net sales of the product, or 2% of gross.

In speaking of his ball-playing gold mines, Mr. Scott also casually mentions possibilities of a motion-picture about the M boys and numerous ghost-written book, magazine and newspaper column deals. In all he estimates that each man possibly can realize $100,000 in contracts right away—$50,000 of that amount from tv—besides the aforementioned added money they can earn over a three-year span. These grandiose rewards make Mantle’s current yearly pay of $75,000, and Maris’ annual salary of $40,000 seem like mere necessaries.

Business briefly...

Lincoln-Mercury division, Ford Motor Co., has bought into 11 NBC-TV shows to introduce and promote its 1962 models. In addition to the already announced sponsorship of Alfred Hitchcock Presents, L-M will participate in 87th Precinct, Outlaws, and Tales of Wells Fargo. Advertiser will also sponsor six one-hour specials to be produced by NBC News. Agency: Kenyon & Eckhardt.

Bristol-Myers, on behalf of its new pain reliever, Exedrin, has bought spot tv time in over 100 markets, as well as daytime participations on CBS-TV. Campaign begins Oct. 1. Agency: Young & Rubicam, New York.

Esquire Shoe Polishes, New York, has bought part sponsorship of NBC-TV’s Checkmate (Wed., 8:30-9:30 NYT). It was also learned that Esquire plans to buy a minimum of 20 tv spot markets and several radio markets around the country. No details were available. Agency: Mogul, William’s & Saylor Inc., New York.

Block Drug Co., Jersey City, N. J., begins a spot radio and tv campaign in mid-October for its Rem cough medicine. Spots are scheduled for 24 weeks in 17 radio markets and 19 weeks in seven tv markets. Agency: Lawrence C. Gumbinner, New York.

V. La Rosa & Sons, New York (macaroni, spaghetti and egg noodles) is advertising with a schedule on 53 radio and tv stations in 11 markets, beginning Oct. 1 and running through the year’s end. Agency: Hicks & Greist, New York.

ADVENT OF THE ‘EVENT’

It’ll save tv, says Weaver, in talk on Westinghouse plans

Sylvester L. (Pat) Weaver Jr., in his first “public” appearance since his return to the television business, last week that “event-type programming” is “the salvation of television.”

He added a qualifier: “In the opinion of some people.” But he left no doubt that he is among those who share that view.

He made the observation at a luncheon at which Roger Bolin, advertising director of Westinghouse Electric—which is spending more than $7 million in “event-type programming” via 18 specials scattered over the three tv networks during the 1961-62 season—made news in another way. Taking a position contrary to that of many advertisers, who as a class are generally represented as anxious to keep a finger in the production of their programs, Mr. Bolin said that in his view “the role of a sponsor is to pick up the check.”

Leland Hayward, appearing with other producers who will help turn out the 18 1-hour and 1½-hour specials in the Westinghouse Presents series, already had paid tribute to Westinghouse for “trying to do something that is not conventional programming” and for following a policy of “absolutely no interference” with his work on the Westinghouse program.

Mr. Weaver, who won a reputation as one of television’s leading creative figures during his tenure as president and in other key posts at NBC, was host at the luncheon as head of television and radio for McCann-Erickson, Westinghouse agency handling the 18 specials. For the past few years he has been board chairman of McCann-Erickson (International)—a post he still holds—and thus has been inactive in television until his appointment as head of M-E Productions a few months ago.

He said the “event-type programming” typified by the Westinghouse series—which will deal with a wide range of contemporary subjects, past events, international affairs and original drama—will let viewers know that “there are people who are trying to open up the forms of the television business.”

He said he hopes the Westinghouse Presents programs will be both artistic and commercial successes.

The $57 million figure on Westinghouse’s commitment for the series—an unofficial estimate—includes costs of producing the commercials, advertising and promoting the series, etc., as well as the time and production costs for the programs themselves.

A new lineup for NAB staff
CARLISLE NAMED VP; SEAvey TO HEAD GOVERNMENT RELATIONS

NAB enters the autumn season with a revamped headquarters staff. LeRoy Collins, president, announced the new lineup after it was approved by the NAB board's reorganization committee at a Sept. 21 meeting (see chart opposite page).

Two main changes were made in the staff. William Carlisle, formerly manager of station relations, was promoted to a vice presidency and given supervision of several key association functions. Hollis Seavey, of the government affairs staff, was promoted to government relations manager.

The top headquarters operating post is held by Vincent T. Wasilewski, named executive vice president Sept. 7 (BROADCASTING, Aug. 28). His appointment had come simultaneously with naming of Robert D. Swezey, formerly of WDSU-AM-TV New Orleans, as code authority director. This is a new post embracing both the radio and television codes. Messrs. Wasilewski and Swezey report direct to Gov. Collins.

Gov. Collins proposed a basic shift in the NAB administrative structure at the board meeting in June (BROADCASTING, June 19). The new chart has the code agency reporting directly to him.

Other department heads at NAB include: George W. Bartlett, promoted from acting manager to manager of engineering; James H. Hulbert, manager of broadcast personnel and economics; Richard M. Allerton, research manager. These departments report to Vice President Carlisle. They formerly reported to the industry affairs vice president.

John F. Meagher continues as radio vice president. Radio code matters, formerly under his office, have been transferred to the new code authority headed by Mr. Swezey.

Howard H. Bell continues as industry affairs vice president but is freed of administrative details to devote more time to committee operations and board liaison, industry organizations and the Assn. of Professional Broadcasting Education.

More Changes ♦ Douglas A. Anello, who had been chief counsel, was promoted to general counsel reporting to Mr. Wasilewski.

John M. Couric continues as public relations manager but now reports directly to the executive vice president instead of the industry affairs vice president. His responsibilities include publicity, promotional activities, public relations aid for members and liaison with public service organizations.

The NAB tv vice presidency was abolished last June when Charles H. Tower left NAB to join Corinthian Stations. Dan W. Shields, who had been Mr. Tower's assistant, becomes special assistant, television. He reports to the executive vice president and will specialize in tv matters.

Everett E. Revercomb, secretary-treasurer, previously head of the administration department, now assumes in addition the auditing, library, production-mail room and stenographic pool functions. John L. Perry is special assistant to the president.

Gov. Collins summed up the staff changes this way: "This new arrangement of staff positions, which includes reductions and consolidations, will enable NAB to provide a more effective and efficient operation with an actual reduction in administrative cost."

Board Changes ♦ The reorganization committee reviewed plans to change the structure of the board of directors. A new and smaller board setup is planned, possibly including emphasis on at-large directorships. A recommended plan will be submitted to the next NAB board meeting, scheduled Jan. 29-Feb. 3 in Sarasota, Fla.

Mr. Carlisle joined NAB as field representative in 1954 after serving with New England stations, agency and broadcast equipment firms. He attended Boston U. business school and served as a Marine reserve captain in World War II. He was named NAB station relations manager in 1957. His station service included WKBR Manchester, WTSV Claremont, and WTSL Hanover, all New Hampshire.

Mr. Seavey is a former radio network newsmen and has been active for a decade in Washington legislative affairs. He is a former director of MBS Washington operations, director of Clear Channel Broadcasting Service and director of Regional Broadcasters Assn. He was owner-operator of WCUM Cumberland, Md. He joined NAB's government affairs staff in July 1960. His station posts included WHLD Niagara Falls, N. Y.; KOXY Oklahoma City; WCOP Boston and WOL Washington. He was graduated from Harvard in 1937.

Members of the Reorganization Committee are Clair R. McCollough, Steinman Stations, chairman of the joint NAB board; George C. Hatch, KALL Salt Lake City, Radio Board chairman; Dwight Martin, WDSU-TV New Orleans, TV Board chairman; J. M. Higgins, WTHI Terre Haute, Ind., Radio Board vice chairman; William B. Quarton, WMT-TV Cedar Rapids, Ia., TV Board vice chairman; W. D. Rogers, KDUB-TV Lubbock, Tex., and Richard W. Chapin, KFOR Lincoln, Neb. Mr. Chapin was excused from attendance at the NAB meeting.

Text of Newton Minow's words of praise for radio

I'm grateful to you for asking me to talk about radio.
Radio is America's roommate. We hear its voice from the time we wake up in the morning until we go to sleep at night.
Radio is also America's traveling companion. It travels with us like a welcome shadow.
A neighbor puts a radio in his hip pocket when he goes out to prune the roses. The newspaper delivery boy makes his rounds to the sound of music. I have a radio in the bathroom so I can catch the news while I'm shaving. The automobile radio rides in almost every car pool. And some people are even taking sets to the ballpark so they can keep score on the announcer. I suppose that about the only place radio isn't going with us these days is solitary confinement.
Radio is America's roommate because it's so downright companionable. It goes places, it does things. And, above all, it always takes us along.

I know the owners and managers of the 206 stations affiliated with the CBS Radio Network agree that behind its air of easy informality radio has tremendous power to inform as well as entertain. It is this power that gives it special responsibilities in the community.

Must for News • We all recognize that entertainment—that music—is the core around which the day's programming is built. But we also know that more people depend on radio for news as it happens, and for news of community affairs, than they do on any other means of communication.

A recent radio study made use of the grim "rumor of war" research question. As one might expect, seven out of ten people questioned said that they would turn on their radios to verify a report that war had broken out. And with the aftermath of Hurricane Carla, America was reminded of the herculean service radio provides.

Or take a less catastrophic example. On any snowy morning in winter, sets are turned on all over the house, because people depend on radio to tell them if the schools will be open, if the main roads are passable, if downtown offices expect their people to make it to work. This is just one of the many community jobs which only radio can accomplish.

Unbeatable • Broadcasters of your caliber who seek to serve as well as to entertain your communities—and who serve by furnishing quality news broadcasts, news analyses, world roundups, documentaries, special events, and community affairs—should be commended and encouraged. Nothing can beat radio on a breaking news story.

Typical of the contributions to public information are many especially informative broadcasts over CBS Radio last year: Lippmann on leadership; Secretary Herter's address on U. S. foreign policy; Premier Khrushchev and Prime Minister Nehru at the United Nations; the White House Conference on Aging, the Race for the Nation debate between Sens. Goldwater and McCarthy on the issue "Does a Big Federal Government Threaten Our Freedom?" the report on medicine of the future; and the story of America's first space man.

I also want to commend you for occasionally massaging the egghead—for continuing a great musical tradition by making a place in your schedules for the broadcasts of the New York Philharmonic and the Cleveland Symphony Orchestra.

This is responsible broadcasting and this is what makes radio the finest kind of companion.

CBS RADIO NEAR BLACK INK
Affiliates meeting told network on the brink of making money for first time since 1950s

Radio and its prospects got a good bill of health last week at the CBS Radio Affiliates Assn.'s eighth annual convention—even from FCC Chairman Newton Minow.

Some 200 officials of CBS Radio affiliated stations heard President Arthur Hull Hayes and his associates report that the network is on the verge of making money for the first time since the early 1950s (BROADCASTING, Sept. 18) and that progress and outlook in both programming and sales are good.

They also got an unexpected tribute from FCC Chairman Minow, who has concentrated on blasting television's "wasteland" programming and said practically nothing about radio since he took office early this year. Responding to President Hayes' request, Mr. Minow sent a taped message praising both radio and its public service record (text of address above).

One gloomy note in what was generally conceded to be one of the most amicable and non-controversial national gatherings of radio affiliates in several years was sounded by Thomas K. Fisher, CBS Inc. vice president and general counsel. The program forms which the FCC currently proposes to incorporate in license applications, Mr. Fisher warned, clearly limit broadcasters' programming freedom and, if accepted, may easily lead to further acts of censorship.

The convention, held Monday and Tuesday in New York, also:
• Heard CBS President Frank Stanton describe plans for the new CBS headquarters building (BROADCASTING, Sept. 11) and outline a tentative timetable calling for ground-breaking before the end of this year and occupancy by the end of April 1964 (story page 42).
• Saw a demonstration of "Audi-max," a new automatic audio level control system designed to provide maximum audio coverage at all times. President P. Goldmark of CBS Labs, which developed Audimax, said that in addition to this immediate advantage of improving modulation, "it will be a boon to the completely automatic station of the future."
• Elected a new slate of affiliates association officers, headed by E. Harbauer of KCMO Kansas City (see page 101).
• Adopted a resolution commending
On the move. That's Los Angeles. And anticipating the changing tastes of this huge metropolitan area is a big job... a job for a station like KABC-TV. ABC's Flagship in the West is getting the job done with aggressive programming, imagination and flexibility.

GO FIRST CLASS ON...

KABC-TV

Owned and Operated by American Broadcasting-Paramount Theatres, Inc.

Represented by ABC-TV National Station Sales, Inc.
“Northwest has run many tours in the Tri-State (Ohio, Indiana, Kentucky) area, but the WCKY group is the largest produced by any radio station.” ■ That’s what the Area Sales Representative for Northwest Orient Airlines had to say about WCKY following the station’s second successful tour to Hawaii for Northwest. ■ He continued: “There are many ways for Northwest to say ‘Thanks’, but I think the one you will best appreciate is the one that extends our contract for 26 weeks ... making WCKY the ONLY Cincinnati station to have a full 52 weeks of advertising from Northwest in 1961.” ■ Talk to your AM Salesman about getting results like this for your product on Cincinnati’s Total News and Information Station

*(41 persons bought the tour ... at $850 each.)

50,000 WATTS • CINCINNATI

the network and its leaders; its mixture of news and public affairs, informational features and name-star entertainment in a program schedule “pertinent to our times”; the development of Audimax and also of NetALERT, the new signalling system which went into operation early this month. The resolution also pointed up the “great significance” of FCC Chairman Minow’s estimate of radio’s service to the public.

In his report President Hayes said CBS Radio holds a position of supremacy which rests on unequalled news and public-affairs programming, name-star entertainment programming which no other network is undertaking, the introduction of technical advances such as NetALERT and Audimax, successful operation of the Program Consolidation Plan (which, introduced two years ago and modified last year, cut back on entertainment programming, stepped up news programming and introduced a new system of station compensation based on programs supplied by the network for sale by the stations, instead of dollar payments), and “a substantial upturn” in CBS Radio’s economic prospects.

Mr. Hayes reported “much” improvement in the CBS Radio financial picture: “We would have arrived at the break-even point for the year 1961 had it not been for the economic situation during the first half. However, unless we encounter some very unforeseen reverses, the network will not lose money in the second half of this year, and I think we will pass the break-even point in the year 1962.”

Homes Delivered • He said “the real acid test of our commercial schedule” is in the number of homes delivered to advertisers—and cited A. C. Nielsen Co. figures to show CBS Radio running well ahead of the other radio networks in this respect. In program acceptance, he cited Pulse surveys in 103 markets as the best barometer available and said they showed the CBS outlets ranked first, second or third in 67 of these markets, demonstrating “that any CBS Radio affiliate can be the dominant station in its market.”

Mr. Hayes said he also had discerned a trend away from what he called “fad radio,” toward programming with more substantial content:

“I think the American audience is more and more regaining an appreciation of thoughtful, quality programming and not what some stations choose to call ‘modern’ radio. Now, in retrospect, maybe it should have been termed fad radio. But let me underscore the fact that a good network station that is really serving the public can compete with a fad radio station and can build not only as large but a larger audience.”

The affiliates heard Mr. Fisher describe the FCC’s proposed new program
ALL EYES WILL BE ON ALLIED ARTISTS...

Allied Artists Television Corp. . . . the newest name in feature film sales to TV . . . is ready to release two new powerful packages of entertainment today!

Released: Allied Artists' Cavalcade of the 60's, forty great features, made in the nineteen fifties, and starring top names that include Rod Steiger, Gary Cooper, Anthony Perkins, Patti Page, Dorothy McGuire, Joel McCrea, Rory Calhoun, Ernest Borgnine and others . . .

Released: Allied Artists' "Bomba" series! "Bomba, the Jungle Boy." featured in twelve top jungle films—brought to life from Roy Rockwood's ever-popular books, PLUS an outstanding Sabu feature.

Also — many fine half-hours including 98 episodes of "I Married Joan".

Contact your nearest Allied Artists TV Corp. office for availability.

ALLIED ARTISTS TELEVISION CORP.

New York, New York
165 West 46th Street • PLaza 7-8530 • Alan G. Roberts

forms as "the jugular issue of all issues facing broadcasters today." He said the questions—166 in the tv form, 145 in the one for radio—are so detailed and precise that "practical men know what the commission prescribes as in the local public interest, thereby circumscribing the freedom of the broadcaster in his own determination of what to program."

Transgressed Authority • Mr. Fisher said that if FCC took these questions, turned them around and stated them affirmatively as programming standards "there would be no doubt that it [FCC] had transgressed its authority." Although the broadcaster is free to answer the questions negatively, "he knows that he had better have an overwhelming reason for such a response," the attorney added. He said: "It is far easier to play it safe and to capitulate to the programming implications of the questionnaire. To those who would say, 'Why not get the government off our back—let's do what they want and then they will go away,' I sadly reply: 'How blind, how shortsighted, how naive can you get—having tasted power in this area, will not the taste hunger for more power?"

"Having once exercised this power, will not the Commission itself become a helpless victim in the drive of one pressure group after another to require it to impose additional questions, additional 'standards' of programming?"

Mr. Fisher also had an answer for those who argue that a broadcast license is merely a "privilege," that the broadcaster is a "trustee" who uses "the people's air." He said: "It is the broadcaster who assembles and pays for the broadcast equipment; it is the broadcaster who assembles and pays for the property called programming; it is the broadcaster who activates the move-

ment of his property (in the form of energy) from his transmitter to radio or television receivers. I do not maintain that clearing the air of loose assertions such as 'privilege,' 'trusteeship,' 'fiduciary obligation' and 'the people's air' answers the problem as to the relationship between the First Amendment [freedom of speech, the press, etc.] and the power of Congress to regulate interstate commerce, but it does rid our thinking on this subject of predilections, prejudices and false analogies."

During the two-day meeting five stations received Golden Microphone Awards to mark 30 years of affiliation with CBS Radio. President Hayes presented them to Harrison Fuerst, representing KVOR Colorado Springs; Arnold F. Schoen Jr. for WDBO Orlando, Fl.; August C. Meyer for WMDB Peoria; Ben Williams for WTOC Savannah, Ga., and L. S. Mitchell for WDAE Tampa, Fl.

Preceding the general affiliates meetings, station managers and sales managers of the seven CBS-owned radio stations held their annual round of weekend conferences with President Hayes and other CBS Radio Div. officials.

McGannon unit studies research center idea

The first steps looking toward the feasibility of an industrywide radio-tv research and personnel training center were examined Sept. 18-19 by the NAB special research committee named last month (Broadcasting, Aug. 28). Broadcast, education, advertising and research specialists discussed the idea with the committee.

Donald H. McGannon, Westinghouse Broadcasting Co., committee chairman, said the session was held to familiarize members of the group with all aspects of the project. He said the next meeting will be held Nov. 9-10 in Chicago.

A subcommittee will study a group of university proposals, including an elaborate presentation submitted by the U. of Missouri.

The center was first proposed at the NAB May convention by NAB President LeRoy Collins. NAB's board approved a study of the idea at its June meeting.

Attending the meeting were Julius Berman, ABC-TV; Hugh M. Beville Jr., NBC; John P. Cowden, CBS; George C. Hatch, KALL Salt Lake City, NAB Radio Board chairman; Daniel W. Kops, WAVZ New Haven, Conn.; Irvin Lichtenstein, MBS; Richard B. Rawls, KPHO Phoenix, Ariz.; Willard Schroeder, WOOD Grand Rapids, Mich. Representing NAB were President Collins; Howard H. Bell, industry affairs vice president, and John L. Perry, assistant to President Collins. Melvin Goldberg, Westinghouse research director, attended as an advisor to the committee.

WBNX goes Spanish

WBNX New York, effective Oct. 2, will broadcast in Spanish from 10:30 a.m. to midnight Mon.-Sat., according to Richard Eaton, president of United Broadcasting Co., which owns the station. At the same time, Mr. Eaton also announced the appointment of Jose De la Vega as consultant for the station's evening programming. He formerly served as director of Spanish programming for WWRL New York.

TOA asks donations for pay tv fight

Movie exhibitors are being asked to contribute to a $24,000 defense fund to fight pay tv’s advent.

Such an appeal was made last week by Philip F. Harling, assistant to the president, Theatre Owners of America, and chairman of that group’s anti-pay tv committee, to the annual convention in St. Louis last week of the Missouri-Illinois Theatre Owners Assn., a TOA affiliate.

Mr. Harling, who also is vice president and executive secretary of Fabian Theatres Corp., said St. Louis area theatre owners will be expected to contribute $12,000 or 5% of the $240,000 needed to wage an effective war against pay tv forces. This figure, he said, is in relation to the percentage of money St. Louis area exhibitors gross as compared to national film grosses. (TOA affiliate chapters in other parts of the country also will be asked to make similar contributions.) Mr. Harling explained that the money would be used “to press our current court appeals, and to undertake our grass roots congressional campaign.”

The TOA currently has two appeals against proposed pay tv experiments pending in federal courts. Last month the exhibitor organization together with other theatre interests appealed an Arkansas Public Service Commission ruling granting International Telemeter Co. virtual license to operate a closed circuit toll system experiment in Little Rock, Ark. (Broadcasting, Sept. 4). Earlier in the year, TOA asked the U.S. Court of Appeals in Washington to reverse the FCC’s approval of a Phonevision test in Hartford, Conn. (Broadcasting, March 27). Both appeals are still pending, and Mr. Harling reiterated last week that if necessary, both would be carried to the U. S. Supreme Court.

Mr. Harling said the purpose of the grass roots campaign, which he hopes will start this fall, is to start a flood of public protest to Congress against pay tv. Theme for the campaign, Mr. Harling said, is that pay tv is not in the public interest. He reminded exhibitors that pay tv “is dedicated to putting you out of business,” and warned that if it ever gets a foothold and can “somehow prove that is is economically sound, its tentacles will wrap around all the U. S. just as quickly as tv itself caught hold a decade ago.”

CBS evening news shows near complete sellout

Approximately 96% of the evening time allocated to CBS news and public affairs television programs is sponsored for the fourth quarter of 1961, it was announced last week by William H. Hylan, CBS-TV network vice president, sales administration.

The sales, Mr. Hylan stressed, include renewals and a large volume of business placed by new advertisers. He said this “reflects the fact that viewers want more of this type of programming.”

In addition to the nighttime sales, according to Mr. Hylan, two new daytime features, Calendar (Mon-Fri., 10-10:30 a.m.) and new five-minute strips at 11:55 a.m.-12 noon and 3:55-4 p.m. have been sold completely. The five-

Metropolitan tv show to feature FCC

FCC Chairman Newton N. Minow and four other members of the commission will participate in an in-depth review of the history of the U. S. communications industry in a special tv report, New York Debut —31, on Metropolitan Broadcastings six tv outlets. The program was to be taped Friday (Sept. 22) for presentation on Sunday, Oct. 1.

The program, produced by Metropolitan Broadcasting in cooperation with the FCC and the Municipal Broadcasting System of New York City, will deal with the story of the FCC’s uhf experiment on ch. 31 in New York, designed to gather information about uhf transmission and reception. Host and narrator of the hour-long show will be Mark Evans. Participants will include Commissioners Minow, Rosel H. Hyde, Robert T. Bartley, Robert E. Lee and Frederick W. Ford; Ken Cox, head of the FCC Broadcast Bureau, and Edward Allen, FCC chief engineer. Commissioners T. A. M. Craven and John S. Cross will not appear because of prior commitments.

The uhf test station was slated to commence operations last Friday (Sept. 22). The City of New York (WNYC) will program it with specially produced educational programming on a regular schedule starting Nov. 10.

As a public service, Metropolitan will make its special program available to tv stations and educational institutions throughout the country. Metropolitan stations are: WNEW-TV New York, WTTG (TV) Washington, KOVR (TV) Sacramento Stockton, WTVH-TV Peoria, KTVP-TV Decatur, Ill., and KMBC-TV Kansas City.

minute programs have been bought respectively by Johnson's Wax and Frigidaire. Mr. Hylan noted that additional minutes will be opened up in Calendar, which begins Oct. 2, and will be made available for sale under the Morning Minute Plan.

CBS News and public affairs programs carried in evening time include The Twentieth Century (Sun., 6-6:30 p.m.), Sunday News Special (11-11:15 p.m.), Eyewitness (Fri., 10:30-11 p.m.), CBS Reports (Thur., 10-11 p.m.) and Douglass Edwards With the News (Mon.-Fri., 7:15-7:30 p.m.).

Changing hands

ANNUNCE • The following sales of station interests were reported last week subject to FCC approval:

- WAKY Louisville, Ky.: Sold by Barton and Gordon McLendon to group headed by Federic Gregg Jr., and John R. Ozier, who own WMAK Nashville, and 10 others from Louisville and Kansas City, for $1,350,000. The sale of WAKY is necessitated by the McLendons purchase of WGES Chicago (Changing Hands, July 31) which would give the McLendon group more than the seven radio stations to which one entity is limited. McLendon stations, in addition to WAKY, are KLIF-AM-FM Dallas, KILT-AM-FM Houston, KTSA San Antonio, all Texas; KEEL Shreveport, La.; KABL San Francisco and WYSL-AM-FM Buffalo, N. Y. Broker was Blackburn & Co.
- WEZL Richmond, Va.: Sold by Ben Strouse, Samuel E. Feldman and Lee Back to Robert A. Monroe for $175,000. Mr. Monroe is president of WAAA Winston-Salem and WSRC Durham, both North Carolina. The sellers own WEBB Baltimore, Md.: Mr. Strouse is principal owner of WWDC Washington, D. C. WEZL operates on 5 kw daytime on 1590 kc. Broker was Blackburn & Co.
- WJHB Talladega, Ala.: Sold by Bill Tyler and Jim Hemphill to Tallahama Broadcasting Co. for $45,000. Buyers comprise principals now associated in the ownership of WGAD Gadsden, Ala., and with most of them also holding interests in WGSV Guntersville, Ala. Major stockholders in buying group are Ed Carrell, WGAD manager, and Rep. Albert M. Rains (D-Ala.). WJHB is 1 kw daytime on 1580 kc. Broker was Paul H. Chapman Co.

APPROVED • The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For the Record, page 102).

- KOEL Oelwein, Iowa: Sold by C. W. Cribb and local businessmen to Hawkeye Broadcasting Inc. for $364,000. Hawkeye is principally owned by James Stuart, who also controls these Stuart stations: KFOR Lincoln, KRGI Grand Island, KODY North Platte, all Nebraska; KMNS Sioux City, Iowa, and KSAL Salina, Kan. Commissioner Bartley dissented.

Four NAB committees appointed by Collins

Four committees of the NAB board of directors were appointed Sept. 21 by LeRoy Collins, president. They are convention, radio fund finance, tv fund finance and general fund finance.

Named co-chairmen of the arrangements committee for the 1962 convention, to be held April 1-5 at the Conrad Hilton Hotel, Chicago, were Joseph M. Higgins, WTHI Terre Haute, Ind., and William B. Quarton, WMTT Cedar Rapids, Iowa. They are respective radio and tv board vice chairmen. Others named to the convention committee were Odin Ramsland, KDAL Duluth, Minn.; Henry B. Clay, KTHV (TV) Little Rock, Ark.; Robert T. Mason, WMRN Marion, Ohio; James D. Russell, KKTV (TV) Colorado Springs, Colo.; George T. Frechette, WFHR Wisconsin Rapids, Wis.; Robert F. Wright, WTOK-TV Meridian, Miss.; Simon Goldman, WJTN James-town, N. Y., and Joseph S. Sinclair, WJAR-TV Providence, R. I.

The general fund committee, handling NAB budget matters, includes the radio and tv finance committees. Members of the radio fund finance committee are Merrill Lindsay, WSOY-FM Decatur, Ill., chairman; George C. Hatch, KALL Salt Lake City; Richard W. Chapan, KFOR Lincoln, Neb.; Ben B. Sanders, KICD Spencer, Iowa; John F. Patt, WJR Detroit; F. C. Sowell, WLAC Nashville. The tv fund finance committee includes Campbell Arnoux, WTAR-TV Norfolk, chairman; Clair R. McLoughlin, Steiman stations; Dwight W. Martin, WDSU-TV New Orleans; Joseph C. Drilling, WJW-TV Cleveland, and W. D. Rogers, KDUB-TV Lubbock, Tex.

Stations form resort group

J. A. Lucas Co., Los Angeles station rep, has formed Resort Market Radio Group, composed of six stations whose combined market area is said to be visited by more than 26 million tourists annually. Stations are KRAM Las Vegas and KONE Reno, both Nevada; KOWL Lake Tahoe, KDON Salinas-Monterey, KCMJ Palm Springs, KIST Santa Barbara, all California.
NAB analyzing logging field tests

Results of NAB’s field testing of proposed FCC logging requirements were being analyzed last week at the association’s Washington headquarters preparatory to the FCC’s Oct. 6 public conference on the new forms.

NAB’s advisory committee reviewed plans for the conference at a Sept. 20 meeting in Washington. The association was authorized by the FCC to select industry participants at the conference (BROADCASTING, Sept. 18).

Among NAB witnesses will be radio and tv station representatives who have had actual experience filling out logging forms designed to meet the more detailed requirements proposed by the commission. The association selected across sections of radio and tv stations to operate Sept. 11-16 under two different test logs—one designed to meet all proposed FCC requirements and another simplified log providing all information now required on logs and believed adequate for commission needs.

A number of southeastern stations have field-tested their own versions of the new logs. They recited their difficulties at the South East Radio-Tv Seminar held Sept. 15 in Atlanta under auspices of the Georgia Assn. of Broadcasters. Kenneth Cox, FCC broadcast bureau chief, and other commission personnel participated. H. Randolph Holder, WGAU Athens, president of GAB, announced last week that transcripts of the day-long seminar will be available at $5 each. They can be obtained from Jack Williams, GAB executive secretary, 24 Ivy St., S.E., Atlanta.

Members of the NAB advisory committee are Clair R. McCollough, Steinman stations; Dwight W. Martin, WDSU-TV New Orleans, and George C. Hatch, KALL Salt Lake City.

Lady Bird urges radio-tv fight ignorance, poverty

Mrs. Lyndon B. Johnson urges that the “electronic miracle of radio and television” be used “to fight the overpowering statistics of ignorance and poverty.” In a speech last Monday (Sept. 18), the wife of the U.S. vice president told some 150 members and guests of the New York chapter, American Women in Radio & Television, that much “has already been done.” She referred specifically to the development of radio and tv in Southeast Asia, where she visited recently with her husband. LBJ Co., which is headed by Mrs. Johnson, owns, KTBC-AM-TV Austin, 29% of KWTX-AM-TV Waco, and through KWTX, 50% of KBTX-TV Bryan, all Texas, and 75% of KXII (TV) Ardmore, Okla. Also owned is KRGV-AM-TV Weslaco, Tex., which is being sold pending FCC approval (BROADCASTING, Aug. 21).

Mrs. Johnson said: “Women are playing a leading role in television, which is growing at an unprecedented rate in these lands. Both media play an increasingly vital role in the political, economic and technical development of the nations of the world. Just how great a role tv could play is illustrated by the scope of the audience which awaits them so eagerly—at least six viewers per set. In the Philippines, there are five tv stations and 43,000 tv sets with 10 viewers for every set. In India, one experimental station serves 320 receivers and the audience is 10,000.” Mrs. Johnson also said she was gratified to hear “so many feminine voices as announcers and newscasters in Southeast Asia.”

County set projections going to NCS customers

Advance reports—in percentages on the county-by-county circulations of all radio and television homes have been delivered by A. C. Nielsen Co. to subscribers to its NCS ‘61 service, Nielsen officials announced last week. They explained that actual circulation figures cannot be computed until the U. S. Census Bureau releases its already-overdue counts of tv and radio homes, county by county.

Pending issuance of the Census base figures, however, Nielsen can prepare interim projections—based on current county-by-county estimates of receiver homes—for clients who feel they must have some such figures immediately.

The advance reports show, for each station, the percentages in each county which view or listen to that station weekly, daily, in daytime and at night. The percentages were compiled from returns representing more than 200,000 families throughout the U. S.

ABC-TV signs WCCA-TV

WCCA-TV Columbia, S. C., a new uhf outlet which begins operations Oct. 1, will be a primary affiliate of ABC-TV in the market. Julius Barnathan, ABC vice president for affiliated tv stations, last week said that “the addition of this station [ch. 25] now makes it possible for Columbia viewers to enjoy complete three-network television service.” WCCA-TV is licensed to First Carolina Corp. Harold Anderson is president and general manager and Lee Gorman is executive vice president.

EXCEPTIONAL QUALITY BUYS

CALIFORNIA—Fulltime AM-FM combination grossing in excess of $10,000.00 monthly and capable of doing much better under different ownership. Good real estate included. Priced at less than $200,000.00 on long terms. Another H & L Exclusive.

WEST—Profitable daytime servicing single-station market of 40,000-plus. Attractiveness of this physical facility is exceeded only by beauty of area itself. Good gross-cash flow record. Priced at $345,000.00 on long terms. Another H & L Exclusive.

BROADCASTING, September 25, 1961
Music separates ‘good guys’ from bad

Radio stations can be classified easily into “good guys” and “bad guys” through the application of the “Musical Virtue Scale” devised by Stephen B. Labunski, vice president and general manager of WMCA New York. Mr. Labunski, more in truth than in jest, offered the following definitions in his “Musical Virtue Scale” during a talk before Columbia Records’ A & R Seminar in New York last Thursday (Sept. 14):

Classical • The very best of the “good guys”; free to disregard news, public service; forget about over-commercialization; the music this type of station plays takes care of all necessary and desirable uplifting of audience; known to have many influential friends among its listeners; “program balance” requirements do not apply. Immune to criticism and license troubles. A real champion.

Semi-classical • Almost as much of a “good guy” as classical brother; allowed to triple-spot because musical selections are longer, and everybody understands perfectly; no need for strong news coverage, informational programming or special documentaries because the audience which likes such music reads prodigiously and travels extensively, hence needs no additional information or ideas. A true winner.

“Good” Music • A real comer among the “good guys,” rising fast—although occasionally plagued by rating and money problems: very big with certain timebuyers and newspaper columnists who don’t listen to the radio. A good, worthy citizen.

Middle of the Road • One of the pretty “good guys”; when on his good behavior, not too much of a target, but expected to perform vigorously in the public interest, dig for news, hold down commercial load and avoid contests; influential leaders who listen to this kind of station ordinarily admit it to rating services, thus might be counted on to testify as character witnesses at a hearing. A junior winner.

Modified Current Pop • (Nothing too loud; nothing too young). Borderline case; must do penance in the form of outstanding news, highly original public service campaigns, and inventive community projects. (Note: The mixed-up, but prevailing euphemism here is “to take the sting out of the rock.”) High ratings and sound operation keep this type of station in the running, but no favors are expected or received; must keep extra careful memo files, be expert in logging procedures, write voluminous attachments to license renewal applications. (Note: National buyers think the quantity of such stations is many times the actual number, since nervous Top Forty and Rock ‘n’ Roll operators on selling trips tell buyers that this is the kind of station they run back home). A junior winner fighting to avoid being shifted to loser’s column.

Top Forty • (By the numbers, for the numbers). Clearly one of the “bad guys”; while actual standing depends in part on dial position, wattage, history of ownership, commercial effectiveness, durability of ratings and size of manager’s ex-

Media reports...

Presentations • WLWT (TV) Cincinnati has presented to the Cincinnati and Hamilton County Public Library Films & Recordings Center, 26 15-minute Dateline: U.N. programs, telecast over WLWT and WCET (TV), Cincinnati’s city station, over the past two years. The films, produced by the U.N. under the sponsorship of the U.S. Broadcasters Committee for the United Nations, now are available to the general public.

RPI signers • Radio Press International has signed the following stations to its voice news service: WHB Kansas City, and WRAL Raleigh, WJNC Jackson-

ville and WGOL Goldsboro, all North Carolina.

Appointment • KGO San Francisco has appointed the Charles W. Johnson agency, that city, to handle its advertising.

Winner • WIXT (TV) Jacksonville, Fla., has been cited for outstanding educational achievement by the Action in Education Awards for its Project 4 series. The awards program, sponsored by Better Homes & Gardens magazine in cooperation with the National Education Assn. and National School Boards Assn., is designed to encourage individuals and organizations to work with school officials for the improvement of local educational facilities.

New studios • WYFI-FM Norfolk, Va., moved into new studios at the Golden Triangle Hotel, Sept. 2, and plans broadcasting stereophonically early in October. The station will carry news programs and commentators of the Mutual Broadcasting System.
pense account, operators of such stations are given to sudden increases in church attendance when license renewal is pending. A loser.

Rock 'n' Roll - As bad a "bad guy" as there can be; nothing this station does right helps: assumed to have entirely teen-age appeal—in total disregard of official doctrine which clearly states that while programs for little children are all good, programs for teen-agers are all bad. When ratings are poor, everybody believes them; when ratings are great, the ratings are crooked; hopeless case. A real trouble maker.

Country and Western - Another one of the "bad guys," but considered very fortunate that current indignation is directed at rock 'n' roll and rhythm and blues, which, along with narcotics and fall-out, are recognized to be the chief menaces to American life. Such types of stations are advised to twang those guitars quietly and stay out of the limelight. A loser with a cowboy hat.

Mr. Labunski concluded with this statement:

"Get the idea? No longer do you have to worry about what kind of radio station it might be; whether it does a good or a bad job for its community; whether it is well run: whether the listening public seems to like what it hears; whether it serves its advertisers well and is run at a profit. All this is quite beside the point; you classify a radio station entirely by the music you think it plays, then you quickly check to see where it fits. Some are 'good guys' and some are 'bad guys.' It's just as simple as that."

Eight southern stations didn't carry Negro show

Eight television stations in the South did not carry ABC-TV's documentary on Negroes, "Walk In My Shoes," last Tuesday (Sept. 19) and one station that presented the program, KTBS-TV Shreveport, La., reported it had received "a number of complaints" about the telecast. The documentary, part of the Close-Up series sponsored by Bell & Howell, was filmed in various parts of the country, and presents Negroes from various economic and social levels giving their opinions and attitudes regarding life in America.

An ABC-TV official in New York said he had heard about the complaints in Louisiana. He added that to his knowledge, there had been "no repercussions" at other stations.
Semifinal round in the FCC’s four-year-old inquiry into network programming practices begins tomorrow (Tuesday) with testimony from approximately 40 corporation executives representing blue-chip advertisers who spend hundreds of millions of dollars annually in TV.

The hearing, to be presided over by FCC Chief Hearing Examiner James D. Cunningham, will be held in the federal building in Foley Square. The testimony is expected to continue through next week. Ashbrook P. Bryant, chief of the FCC’s Network Study Staff, and associate James Tierney, will question witnesses.

Much emphasis is expected to be placed on the control advertisers exert over the programs they sponsor on television. This question was touched during late 1959 and early 1960 hearings in Washington before the FCC en banc.

Messrs. Cunningham and Bryant held hearings in New York early this summer (Broadcasting, July 3) with testimony on programming taken from producers, directors and performers. Following the sessions with advertisers, the final phase of the investigation will feature testimony from the networks.

Nearly half of the top 100 TV advertisers in the country will have executives testifying at the hearing. Following is a list of the witnesses, their companies and 1960 TV advertising expenditures time costs only at the gross one rate, as compiled by TV Bureau of Advertising. (They are not listed in their order of appearance at the hearing but according to national ranking in total advertising. All but the last three companies, which do not have figures listed, were in the top 100 TV advertisers in 1960).

A. N. Halverstadt, Procter & Gamble ($101,491,119); Samuel Thur, Lever Bros. ($45,148,700); R. G. Rettilg, American Home Products Corp. ($42,788,167); Edwin K. Ebel, General Foods ($37,164,388); George T. Laboda, Colgate-Palmolive Co. ($33,930,510); Gail Smith, General Motors ($24,631,853); Alfred A. Whittaker, Bristol-Myers ($20,916,848); John W. Burgard, Brown & Williamson Tobacco Corp. ($20,319,349); Howard Gray, R. J. Reynolds Tobacco Co. ($20,064,986); Robert A. McNell, Sterling Drug ($17,544,809).

The list continues with M. A. Souers, General Mills ($17,221,517); Daniel Ladd, P. Lorillard & Co. ($16,185,911); Albert R. Stevens, American Tobacco Co. ($15,758,375); Roger M. Greene, Philip Morris ($15,395,008); John H. Childs, Texaco ($12,675,832); Lawrence W. Bruff, Liggett & Myers Tobacco Corp. ($12,534,604); Carl Stursburg, Warner-Lambert Pharmaceutical Co. ($11,766,820); Harry F. Schroeter, National Biscuit Co. ($11,669,252); Robert Fisher, Ford Motor Co. ($11,188,453); Douglas L. Smith, S. C. Johnson & Son ($10,916,907); Leonard Lavin, Alberto-Culver Co. ($10,664,198); Joseph L. Caliri, National Dairy Products ($9,742,461); Roger H. Bolin, Westinghouse Electric Corp. ($9,033,435); R. E. Forbes, Chrysler Corp. ($8,955,261); J. Edward Dean, I. E. Du Pont ($7,958,352).

Also, Edward Kletter, J. B. Williams Co. ($7,803,465); David W. Burke, General Electric ($7,711,788); Albert Brown, Best Foods Div. of Cona Products Co. ($7,079,906); Robert L. Estridge, Ralston-Purina ($6,742,580); Theodore Bergmann, Revlon ($6,578,940); Thomas B. McCabe Jr., Scott Paper Co. ($5,524,138); Max Banzhaf, Armstrong Cork Co. ($4,181,034); David A. Shepard, Standard Oil of New Jersey ($3,961,555); Henry M. Kennedy, Prudential Insurance Co. ($3,793,131); Ted Hunt, Alcoa ($3,651,676); C. M. Underhill and Charles W. Huse, U. S. Steel Corp. ($3,298,618); James W. Cook, AT&T; Peter G. Peterson, Bell & Howell; Robert E. Gorman, All-State Insurance.

First day witnesses will include Messrs. Kennedy, Shepard, Dean and Forbes.

**NAB asks fm freeze**

A freeze on fm construction permits that would conflict with proposed new FCC mileage separations was asked Sept. 22 by NAB. The petition to the commission endorsed the goal of orderly fm development but said the problem would be more serious if grants were made that conflict with the mileage separation principle. Previously CBS had filed somewhat similar freeze request (Broadcasting, Sept. 11).
New RCA Cartridge Tape System with “TRIP CUE”

Here's the cartridge tape system with something new—trip cue! This unique feature allows you to record a special trip-cue tone that, during playback, can be used to start the next device in an automatic or semi-automatic system, with split-second timing. (In TV operations it may be used to advance slide projectors.)

Delayed broadcast, spot announcement campaigns, production aids, themes, station breaks can be handled by the RT-7A with a minimum of effort. Cartridge is selected, placed in a playback unit, forgotten until "Air" time, then instantly played at the flick of a button. Cueing and threading are eliminated.

Check this handsomely-styled equipment against any other for compactness and design...Provides transistor circuitry, low power consumption, simplicity of operation! It's one more in a growing line of value-packed new products for radio and television stations from the pioneer in broadcasting. See your RCA Broadcast Representative. Or write to RCA Broadcast and Television Equipment, Dept. 7D-22, Building 15-5, Camden, N. J.
MINOW'S TV PLAN FOR MINORS

FCC head offers legal shield to non-adult networks as inducement

Newton N. Minow last Friday zoomed in on what he considers a particularly arid heath on the vast wasteland—children's programs.

Speaking at a Radio & Television Executives Society luncheon in New York, the FCC chairman said most children's programs are neither harmful or helpful to their audience—"they are dull, gray and insipid ... like dishwater... just as tasteless... just as nourishing." He referred to such fare as "timewaster shows... They hold down, and babysit. Period.

As an alternative, Chairman Minow suggested the three TV networks alternate in presenting quality children's shows in a specific one-hour time slot daily. In this way no single network would suffer unduly from the competition of more "entertaining" children's programs which might draw a larger share of audience.

The plan is similar to the so-called "Doerfer Plan." In 1960, John C. Doerfer, then FCC chairman, recommended such a plan for informational programs and it was adopted by the TV networks. As with the Doerfer Plan, the Minow Plan makes allowance for any children's program local stations might want to produce. "Let that program be as lively, as entertaining, as educational, as whimsical as your creative talents may lead," he urged.

If the specter of antitrust regulations should arise in the network executive's mind, Mr. Minow explained, Attorney General Robert Kennedy has said he will "give prompt and sympathetic consideration to approving any plan you may devise involving a combined effort to improve children's programming."

Chairman Minow said he offered the suggestion not because it is necessarily the best but so "we may at least get off dead center in the area of constructive discussion. Feel free to ask your government to help you if you want it. We can lift a burden as well as an eyebrow."

'Discovery's' Sad Fate • Choosing as a case history the ill-fated ABC children's educational show Discovery (Broadcasting, Aug. 14), Mr. Minow recounted that 67 of 110 ABC-TV affiliates were able to clear the proposed program but advertisers felt there would not be enough viewers to make their advertising worthwhile. The chairman said that although this would have made the program available to a potential audience of more than 14 million children, the show was canceled "and it will not be seen by one child in the country."

Carefully pointing out that he did not necessarily advocate that this particular program should have been carried—"That decision rests with you radio and television executives"—Mr. Minow urged that programs with the goals to which Discovery aspired should be worth advertisers' backing. "We cannot accept the premise that the chance to reach 14 million children is not enough to be worthwhile," he said.

Children should be given what they need to grow as well as what amuses them, the chairman said, pointing out that in a "random survey" he conducted he found children overwhelmingly preferred candy to spinach: movies to Sunday school and tv watching to attending school.

Grown-Ups, Too • The FCC chairman made only a few references to general programming. He cited a copyrighted Broadcasting survey of the program preferences of network, agency and production personnel who gave as their personal favorites some types of programs other than the preponderance of existing television fare. "Why not try your own taste for a change?" Mr. Minow asked.

Chairman Minow said he doesn't plan to take over the "wasteland" again because "we've all had enough of repeats and summer reruns," but "I emphasize that I do not retrace a single word." He repeated that he opposes censorship and cited criticisms of the Jack Paar incident in Berlin (Broadcasting, Sept. 18) brought to the FCC's attention. This is an example of how the commission declines to censor individual programs, he said. The FCC is not going to evaluate anyone's judgment in producing that program," he said.

The chairman also had a kind word for the improving quality of tv programming, particularly news and public information. Said he: "The mood for change is in the air and the evidence of change is slowly but surely coming on the air."

KWXT-TV says proposals will not create duopoly

The FCC's rules forbidding a licensee to have more than one station in a market (duopoly) would not be violated if KWXT-TV Waco, Tex., is permitted to increase power and antenna height and move its transmitter. This was KWXT-TV's assertion in asking the FCC to reconsider and grant without hearing its application. The FCC set the hearing to explore whether a duopoly situation existed among KWXT-
Another way copper from Anaconda is helping cut the cost of getting electricity to the job

It’s not a simple job to get electricity to big heavy-current motors that travel on moving cranes, ore bridges, monorails. In heavy-duty use where high amperage is needed, steel rails weighing 60 to 80 pounds per yard have carried the power. Then came extruded aluminum rails that were lighter and easier to install. But aluminum would wear and pit from friction of the current collectors unless protected by grease. Furthermore, unprotected aluminum rails if not used for a while acquire an oxide coating that is an electrical insulator.

An ingenious solution that cuts costs all around involves a happy wedding of steel and copper. The compact little copper-headed steel conductor rails manufactured by the Ringsdorff Carbon Corp., shown at left, have current-carrying heads of extruded Anaconda copper. Because copper conducts electricity better than any other commercial metal, the rails take up very little space. The steel portion provides the strength needed and makes installation easy. The best part of it is that the graphite used in the sliding current collectors has an affinity for copper, lubricating and protecting as it goes. This cuts the cost of maintaining the system. Wear on the copper is negligible and carbon shoes need replacement only every one to three years.

This use of copper, industrial winner of the 1961 Annual Copper and Brass Achievement Awards, illustrates another way copper from Anaconda is helping industry do things better and at lower cost. Whether the problem is to get electric power from a substation to an ore-bridge motor — or from a power plant to the heart of a city — Anaconda, through its subsidiaries, Anaconda American Brass Co., and Anaconda Wire and Cable Co., is constantly working with industry to find new solutions ... to help provide more value for less money.

Subsidiaries of Anaconda Manufacture: Copper and aluminum electrical wires, cables and accessories; Aluminum ingot, sheet, plate, plain and laminated foil, rigid foil containers, restaurant and household foil wrap; Copper, Brass, and Bronze sheet, plate, strip, tube, pipe, rod, wire, forgings, extrusions; fabricated metal products; flexible metal hose and tubing.

ANAConDA
Air Express: Why is it anchor man in America's missile race?

Anchor man on a relay team is the fellow who clinches victory with a final burst of speed. That literally describes the role of Air Express on America's missile team.

Our future as a nation may rest on the success of this all-star team, and Air Express is proud to be a member. But not really surprised.

In the air, shipments bearing the familiar red, white and blue Air Express label are first on, first off, first there—via all 35 scheduled airlines.
On the ground, they're whisked door-to-door by a special fleet of 13,000 trucks, many radio-dispatched. And throughout the U. S. and Canada, each AIR EXPRESS shipment gets kid-glove handling. Armed guard protection—an AIR EXPRESS exclusive—is available, too.

These unique advantages aren't restricted to missile programmers, either. Any business—large or small—can enjoy them in full and at amazingly low cost. Just one phone call to your local AIR EXPRESS office arranges everything, door-to-door.

Why not make that call today and discover why modern business men find that it pays in so many ways to think fast . . . think AIR EXPRESS first?

AIR EXPRESS

CALL AIR EXPRESS DIVISION OF R E A EXPRESS • GETS THERE FIRST VIA U. S. SCHEDULED AIRLINES
The LBJ Co. holds but 29.05% of KWTX-TV, which in turn owns 50% of KBTX-TV, the Waco station pointed out. It said there were no special arrangements whereby The LBJ Co. could exert control over KWTX-TV. That company has only three directors of 10 on the board of directors; those directors have no contact or association with any of the employes nor any duties and responsibilities in connection with KWTX-TV's day-to-day operation. KWTX-TV maintained. The LBJ Co. acquired interest in the Waco station in exchange for physical facilities of a uhf station which the company operated there and discontinued.

The three stations have separate staffs, sales representatives and network affiliations; no control or "privity" exists between KWTX-TV and the company headed by Vice President Johnson's wife, Ladybird, according to the petition.

Two low-band uhfs reserved for education

Two low-band uhf channels were reserved for educational tv and ch. 34 was assigned to Blythe, Calif., in rule-makings which have been finalized by the FCC. The agency also asked for comments in several other proposed channel reassignments.

Ch. 18 Austin, Tex., was reserved for etv with ch. 70 deleted and commercial ch. 67 added there. In addition, ch. 75 was substituted for ch. 53 in San Marcos, Tex. Athens, Ohio, gained ch. 20, shifted from Coshocton, Ohio, with an etv reservation.

The Blythe ch. 34 allocation is the first tv frequency assigned to that city and was requested by Blythe Telecasting Co.

The commission also asked for comments on the following rulemaking proposals: (1) delete ch. 12 from Brainerd, Minn., and reassign the vhf to Walker, Minn.; (2) delete etv ch. 73 Bay City, Mich., and reserve ch. 19 that city for educational use; (3) delete ch. 19 from Palm Springs and add it to Indio, both California, which would solve a present adjacent-channel mileage separation problem with ch. 18 San Bernardino, Calif., for which Norman H. Rogers holds a grant, and (4) reserve ch. 20 in Eugene, Ore., for etv.

At the same time, the Florida Educational Television Commission petitioned the FCC for rulemaking to allocate ch. 11 to Orlando and reserve it for etv. In reply to the difficulty of the 220-mile minimum mileage separation requirements raised by the operation of WINK-TV Fort Myers on ch. 11 only 132 miles from Orlando, the etv organization pointed out that WINK-TV operates with the comparatively low power of 95 kw and that the space between the two cities is mostly ocean and swamp.

Ch. 24 is presently assigned to Orlando for etv. The city is also served by two commercial channels, 6 and 9.

In another petition, William J. Cal- sam asked that ch. 15 be shifted from Rochester to Oneonta, both New York, with ch. 62 going from Oneonta to Rochester. Mr. Callem said he would apply for ch. 15 if shifted to Oneonta.

Celler sports bill goes to White House

Congress turned on the speed last week to complete action on legislation that will permit professional sports leagues to negotiate package television contracts with the networks.

The House passed the bill (HR 9096) by voice vote on Monday, and two days later the Senate Judiciary Committee cleared it for the floor, jettisoning several sports bills of its own to save time.

Final action came about 8 p.m. Thursday, as the Senate, working late in hopes of completing its work in time to adjourn no later than early this week, shouted its approval of the bill and sent it on to the President for his signature.

The measure was requested by the National Football League after a federal district court in Philadelphia voided its two-year, $9.3-million contract with CBS-TV. The court said it violated a previous antitrust ruling (Broadcasting, July 24).

Under the bill, the NFL, and other professional football, basketball, and hockey leagues would be free to sell their television rights as a package without fear of violating the antitrust laws.

Support From Rival • The American Football League, which is starting its second season under a package television contract with ABC, has supported the bill. AFL Commissioner Joe Foss said the league wanted assurance that the Justice Dept. would not challenge its contract (Broadcasting, Sept. 4).

Rep. Emanuel Celler (D-N.Y.), who introduced the bill, said it is necessary to assure weaker NFL teams of adequate television income. He said proponents of the bill fear that the networks will purchase tv rights only of the stronger teams.

Unless package agreements are per- Government continued on page 79
he never wrote for ratings

(but his "Iceman Cometh" rated 11.0*.) On Thursday evening, September 14, 1961, an extensive home television viewing survey was compiled by ARB in the greater Los Angeles Metropolitan area. The "Play of the Week" that night was Eugene O'Neill's "The Iceman Cometh."

It ran against two leading Westerns, three top situation comedies, and television's highest rated gangster series, all long established viewing favorites. Yet, IT TIED OR BEAT THE TWO LEADING NETWORKS IN EVERY HALF HOUR RATED. It was the first choice of 241,615 television homes; the first choice of over 483,230 people, in America's second largest market. (Play of the Week gets the lion's share of audience in over 20 major cities coast to coast on week-end, daytime showing, and on late night scheduling.

*ARB. SPECIAL COINCIDENTAL.

There are two important factors to be considered about this rating. First, "Play of the Week" attracts 95% adult audience. And the greatest percentage of the audience is in the medium and upper income brackets. (In nationwide surveys, the majority viewing "Play of the Week" are in the $8000 and up bracket.) Second, the Los Angeles rating reflects the changing taste of the American television viewer. The average American is becoming the above average American. He's becoming aware of the extraordinary, the provocative, the "unequalled in television's 13 years," "the milestones in the television era." The maturing American wants more. More like the second year of outstanding "Play of the Week" shows. More like the challenging and informative "Open End." NTA has more, and more. Does your dollar rate with the maturing American?

NTA/PLAY OF THE WEEK

8530 WILSHIRE BOULEVARD, BEVERLY HILLS
What would you charge for a new metal that's three times stronger than carbon steel? United States Steel developed just such a metal, "T-1" Steel, and though it's three times stronger, it costs only about 2½ times more. So, designers can frequently use one ton of "T-1" to do the work of three tons of carbon steel—at less cost. For example, on California's new Carquinez Strait Bridge, "T-1" saved $800,000 in the total cost of steel.

Is United States Steel reducing its own potential income with this new steel that performs better at less cost? No, because the money saved by "T-1" in one application will be invested elsewhere—in another new bridge, in more machinery, in more farm equipment—continuing the growth of America's economy. This is why United States Steel believes that the value of a material is determined by its performance... and why the development of stronger, better performing steels is essential to the growth of a stronger America. America grows with steel.
The growing giant on San Francisco Bay

A FANTASTIC PAST IS JUST PROLOGUE TO THE BAY AREA'S FUTURE

The sixth largest market, famed for the catastrophic tremor after the turn of the century, is now in the early stages of what is shaping up as a twin explosion — population and economic.

San Francisco is going through a series of basic business changes that are moving it high onto the nation's statistical pinnacle. It is as different and about as unstatic as an area can be. Yet somehow the Bay Area economic complex continues to suffer from the inspired adjectives of those whose perspective is influenced by the blend of natural and man-made charms.

To be blunt about it, San Francisco is a nine-county area whose three separate cores — the city itself, Oakland to the East and San Jose to the South— comprise one of the fastest growing markets anywhere.

Of course the fog rolls, as 2½ million tourists observe every year. And there's a salty tang in the air, and clangy little cable cars clatter up and down the towering hills.

There's no use trying to argue when a resident says, "Here's where I want to stay forever." After all, he's in love with the 12 months of May that start New Year's Day and keep on right through the year.

The lyrical claims of the talented journalist in love with the Golden Gate bridge, the tall trees across the bay, the abounding dineries and the sporty topography properly portray San Francisco as one of the thoroughly charming places among the world's cities.

San Francisco is justly famed for its Chinatown and its fine shopping. Its residents dress with more formality than Southern Californians — hats and gloves are the thing at luncheon as well as for evening affairs; most of the men wear hats on the street. Its sports fans die a dozen deaths when the Giants or '49ers lose a baseball or football game, an enthusiasm that's duplicated in Oakland as that city rises in the national sports scene. There's even smog, a merger of atmospheres, factory belchings and automotive fumes first cultivated by Los Angeles.

But San Francisco, properly conceived for commercial purposes, must be considered in terms of its eight corporations, each with billion-dollar-plus assets (Bank of America leads the list, with $11.45 billion). Its commerce provides the top means of employment.

Retailing alone is heading toward the $6 billion mark in 1961. Foreign and domestic commerce is blessed with five fine harbors. Population is expanding at a fantastic rate — 35.7% in the 1950-60 period. The future holds another bright prospect — enormous growth in the importance of Asia to the world market. San Francisco faces Asia just as New York faces Europe.

By 1990 the population will double
to 7.2 million, government forecasts indicate. By 2020 the population will reach 14.4 million, bringing the Bay Area right behind Los Angeles which by then expects to be the nation’s largest market.

Judging by trends of recent years, there may be around the year 2000 a solid coastal strip of homes, industry and shopping centers between Los Angeles and San Francisco.

Any look at the more interesting dollar aspects of the Bay Area inevitably turns toward the impact of its weather and associated geographic phenomena. It’s never necessary to close down a plant or office at 3 p.m. because it’s too hot to work. Nor are there early closings designed to get people home before the snow messes up traffic.

As the Bay Area populace (continually augmented by streams of new arrivals from points north, east and south) heads for the outlying hills the weather problem becomes somewhat more complex. “We live continually with the hills, the sea and the sky and they’re a great influence and inspiration,” one contemplative businessman observed.

They’re also a headache for professional weather people. The East Bay shoreside cities and those on the peninsula to the south have similar temperatures but with a 6 to 8-degree wider daily range. Communities farther inland, behind hills which keep off the ocean winds, escape the summer fog and have daytime temperatures up to 25 degrees higher than San Francisco. Adroit weather forecasters get around the dilemma with flexible predictions. Last Aug. 29, for example, the weather prediction read in part: “High temperature for Tuesday, 68 to 80; low 52 to 57,” leaving it up to each individual to fit the forecast to his personal geography.

San Francisco, of course, has justly famed cultural characteristics including an opera company, symphony, theaters, museums and institutions of higher learning. The city and its hills, and the surrounding hills, have natural charm. The market is growing furiously and will keep up the pace. San Francisco is different, diverse and sometimes devious. Its intimate commercial traits deserve a careful look.

The components of a thriving market
THREE CORE CITIES, NINE COUNTIES MAKE UP THE BAY DISTRICT

San Francisco Bay, one of the world’s finest landlocked harbors, is 40 miles long, varies in width from 3 to 12 miles and has a total area of 540 square miles. The bay is surrounded by nine counties: San Francisco, Marin, Sonoma, Napa, Solano, Contra Costa, Alameda, Santa Clara and San Mateo, to list them in clockwise order. But whether these nine counties should be considered as a single market, or as two or three or more markets, or as forming the major part of an even larger market, such as that covered by Bay Area radio and tv stations, is a matter not of fact but of highly disputed opinion.

“Here, in these nine counties, over half the population of the northern section of the state lives, grouped about the core cities and forming, in effect, a single city economically and geographically,” says the San Francisco Bay Area Council. But the Census Bureau, in its tabulations, defines the San Francisco-Oakland Standard Metropolitan Statistical Area as one six-county market, the San Jose SMSA (Santa Clara County) as another and leaves Sonoma and Napa counties out of the major market picture altogether.

Oakland’s Chamber of Commerce believes that the six-county market is in reality two markets, three West Bay counties with San Francisco the core and three East Bay centered on Oakland.

San Jose spokesmen disagree on whether this city is a vital part of the Bay Area complex or an individual entity, to be thought of as apart and distinct from San Francisco and Oakland.

In the Early Days • Mel Scott, in his definitive volume, The San Francisco Bay Area, notes that not long after the founding of San Francisco in 1776, the ranch owners of the East Bay protested “against being obliged to participate in decisions affecting the new trading town . . . Bridges, telephone and telegraph cables, radio and television today have overcome the physical barrier, yet sectional feeling persists.”

Broadcasting Senior Editor Bruce Robertson, for the larger part of this market study, chose to consider the nine Bay-bordering counties as a composite market. In the following paragraphs, however, each of the three core cities and its immediate area of greatest influence is given brief individual treatment.

What makes San Francisco so prosperous
IT’S A STATISTICAL STORY WRITTEN BY BIG BUSINESS

Surrounded on three sides by water, San Francisco stands like a square nail of a stubby thumb at the head of the San Francisco-San Mateo Peninsula, which stretches down 50 miles south.

A Chinatown of prosperity and magnetism for tourists that not even Paladin could have envisioned has helped San Francisco to develop into the truly unique metropolis of the west (see tourism story, page 76). ward before joining the mainland a few miles north of San Jose.

Built on many more hills than Rome’s seven, the city is nonetheless laid out on the traditional grid pattern of rectangular blocks, with streets crossing each other at right angles even though they sometimes have to go straight up the mountainside to do it. (The brake lining business in San Francisco is brisk.) A major exception is Market Street, which slices diagonally across the
Whether it's a trip to Fisherman's Wharf for the local cliff dwellers or a sightseeing junket up San Francisco's steep hills, the cable car has become one of the internationally-known trademarks of the Bay Area. It clangs up Powell Street over Nob Hill to the wharf, skirting Chinatown and the Latin Quarter enroute.

downtown business district, dividing it into a northern district of new buildings, fine offices and smart shops, and a southern section that is somewhat rundown at best and at worst degenerates into skid row.

Small Area - Smallest of California's counties (city and county boundaries coincide), San Francisco's 45 square miles provide residences for 740,316 individuals (at the time of the 1960 census), with the state's densest population of 26 persons per acre. San Francisco also has the lowest number of persons per household in the state, 2.44.

Headquarters of some of the country's largest banks, utilities, merchandising and transportation companies, San Francisco at the end of last year was home office site for 84 corporations with assets of more than $10 million, including eight with assets exceeding $1 billion: Bank of America ($11.451 billion), Federal Reserve Bank of San Francisco ($6.191 billion), Pacific Telephone ($3.051 billion), Standard Oil Co. of California ($2.782 billion), Wells Fargo Bank American Trust Co. ($2.700 billion), Pacific Gas & Electric Co. ($2.478 billion), Southern Pacific ($2.241 billion), Crocker-Anglo National Bank ($1.862 billion).

Large companies employ high salaried executives at their home offices and the city's wages and salaries in 1959 amounted to $1.835 billion, a rise of 4.1% over the 1950 payroll of $1.294 billion. Personal income for the city rose by 4.5% in the same period, from $2.011 billion in 1950 to $2.293 billion in 1959. Many of the high salaried executives live in suburban areas outside the city, of course.

In July 1960, wholesale and retail trade was the leading source of employment in the city, with 116,500 employees, nearly a quarter of the total of 473,500 civilian employees for that month. Service trades ranked second, with 92,200 employees; manufacturing and government (federal, state and local) were tied for third place, with 69,700 employees each, followed by transportation, communication and utilities ($5,400); finance, insurance and real estate ($49,700); and contract construction ($21,000). The California Dept. of Employment, source of that analysis, adds the comment: "Most industries in San Francisco are highly unionized."

For the first half of 1961, building permits totaled $54,741,340, about 15% off from last year's record pace, although the aggregate value of known major construction projects under way in June was $139,921,000. These include the block-square, 20-story $32.7 million federal office building, one of the largest in the West, the $5.8 million International Building, the $5.1 million Alice Griffith Garden Homes public housing project, a number of $4 million-plus apartment buildings and the $4 million Lowell High School, to cut the list off at that figure. Work on the new Hilton Hotel, a $15 million structure which will offer motel drive-to-your-own-door service for its first 10 floors, with conventional hotel accommodations above that level, has been delayed several times and its starting date is still not definite.

The importance of Oakland to the area

IT SPARKS THE PROSPERITY OF THE 3 WEST COUNTIES

The six-county San Francisco-Oakland market set up by the Census Bureau should really be two metropolitan areas, three West Bay counties (Marin, San Francisco and San Mateo) making up the San Francisco market and three East Bay counties (Alameda, Contra Costa and Solano) with Oakland as their central city, the Oakland Chamber of Commerce asserts. The Oakland metropolitan area, the Chamber points out, has more population (and more growth in the 1950's), more industrial development, more employment in manufacturing, more freight carloads, more construction of buildings and highways than the West Bay counties.

Personal income for the Greater Oakland market totaled $3.65 billion in 1959, of which $2.45 billion came as wages and salaries. The 1959 income represented a rise of 76% from the 1950 figure, while wages and salaries rose 73%. Taxable retail sales for the three East Bay counties totaled $2 billion in 1960.

Federal Dollars - The Naval Air Station at Alameda, the Navy shipyard at Mare Island, Travis Air Force Base and Benecia Arsenal make the government an important employer in the East Bay. In July 1960, the California Dept. of Employment estimated that out of a total of 495,000 employed persons in the three counties, 99,200 (20%) were working for some branch of government, only slightly less than the 110,700 employed in manufacturing or the 104,100 in the wholesale and retail trades.

Oakland itself is eight miles east of San Francisco across the Bay Bridge. With 19 miles of deepwater port facilities and the western terminals of three cross-country railroads and five interstate trucking systems, not to mention more than 100 flights a day out of the Oakland International Airport, Oakland is an important shipping point, as well as a major manufacturing and trading center.

As real estate man Robert A. Futter-
man comments in his thoughtful book, *The Future of Our Cities*, “It is broadly true to say that San Francisco became the commercial, cultural and upper-income residential center, while Oakland grew up into an industrial, blue-collar, lower-middle-class appendage. But Oakland has its own downtown, containing corporate headquarters (most notably the spanking new Kaiser Center, on the north edge of Oakland’s core, the largest industrial headquarters west of the Mississippi), and in its own hills and those of adjoining Berkeley, by the U. of California. Oakland has residential districts as wealthy as any in America.”

**THE BOOM IN SAN JOSE**

Its population more than doubled in the last decade—and an even more fantastic growth rate is forecast

A sign hanging in the lobby of KNTV (TV) San Jose informs visitors that “…we may seem slightly crowded and terribly busy. We’re just suffering with growing pains like the rest of this fantastic area, which is destined to be the largest market in California in just 15 years… the largest population center in the United States by the turn of the century.”

There may be a slight touch of civic-pride-engendered exaggeration there, but not very much. Between 1950 and 1960 the population of the city more than doubled, to 204,196; so did that of Santa Clara County (San Jose’s metropolitan area), to 624,315, with immigration accounting for 90% of the increase. State statisticians add 26,000 to the city total, 43,000 to that of the market. And the Dept. of Commerce estimates that by the year 2020 Santa Clara will have the largest population of any Bay Area county—2,931,000.

**Boom in Construction** • Building permits in the county totaled 20,272, valued at $273,996,546, more than half for one-family dwellings (11,076 worth $142.5 million). Just under 40% of the 1960 construction ($106.7 million) took place in San Jose, five times the 1950 total ($20.5 million) and more than 30 times the 1940 construction figure ($3.1 million).

Santa Clara is the top agricultural county of the Bay Area, accounting for $91.3 million income last year, with prunes, strawberries, apricots, cherries, pears, walnuts, tomatoes and green beans the major crops. Agricultural income has been dropping steadily since the 1955 peak of $100.9 million, as housing and industry take over farmland. The 21,700 persons employed in agriculture in Sept. 1960 (according to the California Dept. of Employment) were only half the number employed in either trade (43,600) or service (43,400) and fewer even than the 27,300 government employees. Manufacturing employs most people (83,600 in September 1960), many of them canning, freezing, or drying the locally grown fruits and vegetables, but with a steadily increasing number working in durable-goods manufacturing, notably electronics, missiles and machinery, which are changing the seasonal employment pattern to one of year-round stability. The average industrial wage is estimated at $5,800 a year.

Offering decentralization, with industrial areas near residential districts so that the average worker’s home is less than 15 minutes from his job, the San Jose metropolitan area has attracted more than 350 new concerns in the past 15 years. In 1960 alone, 42 new plants, representing an investment of $6.8 million and employing 1,847 persons, moved into Greater San Jose, and 38 plant expansions added another $29.9 million to the manufacturing facilities total.

**Other Gains** • The San Jose metropolitan area, 39th nationally in terms of population, had retail sales of $732.5 million in 1958, a rise of 57.6% over the 1954 total of $464.7 million, according to the Census Bureau’s figures of those years, and for 1960 the total is estimated at $917.1 million, up nearly 20% over 1958. Automobile registration was 277,960 for last year, when the City of San Jose collected $157,775 from parking meters, exclusive of what was paid at the municipal parking lots. In addition to local expenditures, delegtates to 85 conventions brought $2.4 million in new money into San Jose.

**TO THE NORTH**

Agriculture, more industry forge prosperous link

North of San Francisco over the Golden Gate Bridge lies Marin County, a suburban community, more than half of whose workers are employed outside the county, chiefly in San Francisco. Trade, services and government account for most of the employment within the county. Circling northeast over the top of the Bay are the agricultural counties of Sonoma and Napa, the latter world-renowned for its dry wines. Senior citizens, retired on comfortable incomes, are numerous in both counties, and Napa’s Lake Berryessa is the core of a new recreational area.

San Mateo County, stretching south along the Peninsula between San Francisco and Santa Clara, starts with the industrial community of South San Francisco, also center of an expanding residential area. Further south, past the estates of Burlingame and Hillsborough, comes a chain of suburban communities, like Redwood City, Menlo Park and Palo Alto, home of Stanford University. Here, commuters and retired persons are being joined by an expanding number of scientists and skilled technicians, employed in electronics research and manufacturing which is fast becoming the area’s major local industry.

Bay area sales, population match gains

NEXT FIVE YEARS EXPECTED TO SHOW GROWTH OF ADDITIONAL 14%

Bay Area income more than kept pace with area population during the 1950’s and in 1958 totaled $9,172 million for the nine counties, the Bank of America reports. Per-capita income for the area averaged $2,627, just about the same as Los Angeles and well above the national average.

Retail sales in 1960 totaled $5,699 million for the nine-county Bay Area, $4,530 million for the six-county San Francisco-Oakland metropolitan area, making it the nation’s sixth largest market either way. Per capita, this amounts to an average of $1,162 for the nine-county region, $1,627 for the six-county area.

Those figures, issued by the California State Board of Equalization, are based on taxable retail sales and do not include sales of food purchased for consumption outside the store, which are not taxed by the state.

More Food Sold • Food sales for the nine-county area in 1960 were estimated at $1,181 million, a gain of 41% over 1950, in a Stanford Research Institute study, which compares them with food sales of $1,197 million for Detroit, $1,003 million for Boston, $756 million for Pittsburgh and $623 million for St. Louis. The same study, as summarized by J. Walter Thompson, shows 1960 sales of Bay Area eating and drinking places as totaling $472 million, ahead of Detroit’s $372 million, Boston’s $359 million, Pittsburgh’s $212 million and St. Louis’ $197 million. The Bay Area restaurant and bar business, according to SRI, increased 24% between 1955 and 1960, a faster rate of growth than that of any of the other four cities.

Dominantly Urban • The essentially urban character of the area, with 79% of the population in incorporated cities, is reflected in the retail sales figures. In the nine counties of the Bay Area, only 8.1% of last year’s retail sales were made outside of city limits and the figure drops to 6.5% for the six-county San Francisco-Oakland district.

Safeway dominates the chain food store field in the San Francisco-Oakland market area, with 114 stores out of a total of 336 in the six counties, nearly three times as many as Louis Stores, which rank second with 44. This makes shelf space in the Safeway stores essential to the food product seeking to break into this market and failure to secure it in adequate proportions has on occasion caused the cancellation of advertising campaigns which could not succeed without the proper distribution of the product. In San Francisco itself, Safeway has 31 of the 45 chain food stores in the city, but this is not actually as important as it sounds for the pattern of retail stores stretched along the city’s streets and bus routes instead of bunched into shopping centers has allowed scores of small “mom and pop” groceries to remain in business long after the chains have driven them out of most markets.

Growth Will Continue • A projection made by the market research department of a food store organization anticipates a 14% increase in population in the Bay Area in the next five years, with a concurrent rise of 22% in food store sales. The growth is looked for chiefly in suburban areas, on the basis that the

The $75 million San Francisco airport is the jet aviation center of Northern California’s 48 counties and aerial gateway to the U. S. from the Pacific. Started in 1927 as Mills Field, the present site was completed in 1954.
TOP SPOT

...that's the position of San Francisco's KTVU among the Nation's independent television stations. Three out of eight recent ARB surveys show KTVU in the top spot among major market independent television stations in share of nighttime audience.* This leadership has been accomplished in just a little over three years on the air. Call H-R Television for the complete story of KTVU and for top spot availabilities.

population trend of recent years away from central cities to the suburbs will continue until 1966, at least.

A survey of shopping centers, made by the San Francisco Examiner in 1959, showed a total of 154 centers operating in the nine-county Bay Area, with four more under construction and 61 proposed. The total of those in operation included 10 regional, 15 community and 128 neighborhood centers. Santa Clara County had the most, 40 centers, with four in San Francisco and three each in Napa and Solano counties at the foot of the list. The business done by the various centers ranged from an annual volume of $250,000 at the low end of the scale to $60 million a year at the top.

Sixth All Around • A comparison of retail sales in the San Francisco-Oakland metropolitan area with that of other major markets, available in the Dept. of Commerce 1958 census of business, presents a statistically static picture. The San Francisco-Oakland complex stands sixth in population, sixth in overall retail sales, sixth in general merchandise, sixth in food, sixth in automotive, sixth in furniture, sixth in liquor. It rises to fifth place in restaurant business, drops to seventh in lumber, apparel and drugs. Somewhat surprisingly, in view of its water-bounded location, it ranks eighth in retail fish sales. On the plus side, the San Francisco-Oakland market stands fourth in the retail sales of books (ahead of Boston as well as Philadelphia and Detroit), fourth in jewelry sales, and in the gift-novelty-souvenir category and in pet shop business.

The market ranks fifth in hotel business (following New York, Chicago, Los Angeles and Miami) and third in motel business (topped only by Miami and Los Angeles).

Auto-Ownership High • An eight-city survey made last March by Television Advertising Representatives, using the same census metropolitan area bases, compares San Francisco-Oakland family purchases with those of Baltimore, Boston, Charlotte, Cleveland, Jacksonville, Pittsburgh and Washington, D.C. Among this group, San Francisco-Oakland ranks second in auto ownership: 86.0% of its families own autos, ranked only by Jacksonville with an 88.9% auto-ownership score. More San Francisco-Oakland families (74.3%) eat hot cereal and more (94.0%) use headache remedies than any other market of the eight, but only in Boston are there fewer who use margarine than the 65.4% of

Two pet peeves

Bay Area media people wish they could institute a course in geography for advertisers and agencies in other parts of the land. “You wouldn’t believe how many people think they can buy Los Angeles media and cover all of California,” one station executive stated. “San Francisco is farther from Los Angeles than Pittsburgh is from New York or Cleveland is from Chicago, but a helluva lot of buyers east of the Rockies have still to find this out.

“And another thing. If you want to get along with San Francisco people, don’t call it Frisco.”

Over 120 steamship lines make the Bay a ‘port of call’

One of the world’s greatest natural harbors, San Francisco Bay has five major ports—Alameda, Oakland, Redwood City, Richmond and San Francisco. Over 120 steamship lines make the Bay a regular port of call, with some 10,000 arrivals and departures each year. In 1959, the volume of Bay Area imports and exports combined exceeded $1 billion for the first time. Coffee, automobiles, crude petroleum and copra (dried coconut) are the leading imports; industrial machinery, manufactured cotton and fruit, dried and canned, the major exports.

The San Francisco port leads in volume of general cargo, but Richmond, handling large quantities of petroleum, is tops in tonnage. An active barge traffic on the Bay carries at least half as much tonnage as do the ocean-going vessels. Three transcontinental railroads and more than 700 national and regional trucking companies move cargo in and out of the Port of San Francisco’s 42 deep-water piers to all sections of the country and the port’s own State Belt Railroad sends an average of 625 cars a day over its 60 miles of track.

In 1960, better than 5.5 millions of tons of cargo passed through the Port of San Francisco. 3.5 million tons inbound and 2 million tons outbound. Inbound cargo included 1.3 million tons from abroad and 1.8 million tons went out to foreign ports. For the first half of 1961, revenue tonnage was off .8% from the like period of last year, dropping 2.6% in imports, 4.4% in exports.

Ships of all sizes and descriptions jam the five ports
KGO-TV Put them to work

This summer, KGO-TV in San Francisco helped find vacation jobs for 7,953 high school students in the Bay Area. We achieved these results through a public service program series and a spot announcement campaign which urged potential employers to hire our young people and thereby help them become responsible, mature citizens. As a result, more students found work than in any past year—a big 63% more.

T.H.I.S. REMARKABLE REACHING POWER OF KGO-TV IS put to work FOR COMMERCIAL MESSAGES, TOO.

Local, regional advertising dominant

SHIPPING COSTS GIVE AREA FIRMS BIG ADVANTAGE OVER EASTERNERS

The San Francisco Bay Area has often been called paradoxical and nowhere is it more so than in its advertising pattern.

Like the rest of the Pacific Coast, it must pay the "west of the Rockies" freight premium and higher prices apply to products shipped in from the eastern part of the country. Accordingly, local or regional products dominate the area scene, the area markets and the area advertising.

Of some 25 companies with annual advertising expenditures of more than $1 million, only a handful—like Dole, Del Monte, Kaiser, Safeway, Gallo—have brand names known across the nation. Most are distributed only in the West and many only in the Bay Area.

Local and Regional • Accordingly most of the advertising placed by Bay Area agencies is local and regional in character. And it's likely to remain so, according to Taylor Rhodes, research and media vice president of Foote, Cone & Belding, San Francisco. "For every new national account we gain through a move of company headquarters to California, we lose one through the merger of a West Coast company with an eastern firm that moves its headquarters—and its advertising—back East."

The 1958 Census of Business lists 342 advertising establishments in the San Francisco-Oakland complex and 28 in the San Jose metropolitan area, with combined business of $11.8 million, which puts the area in sixth place nationally, less than $2 million behind fifth-place Philadelphia ($119 million). That these establishments are chiefly advertising agencies and their business chiefly billings is substantiated by the latest San Francisco telephone directory, whose Yellow Pages list 226 agencies in that city alone.

With the sixth largest population in the country and also in sixth place in retail sales, the San Francisco-Oakland metropolitan area should logically stand sixth in volume of advertising. But does it? Take a look at the television revenue figures for 1960 released earlier this month by the FCC (Broadcasting, Sept. 4). Overall revenue of the four tv stations for the year was $17,161,000, putting the market into seventh place, behind Philadelphia, Boston and Detroit (each with only three tv stations), as well as Chicago with four and New York and Los Angeles with seven stations apiece.

Network Revenue • In network tv, San Francisco-Oakland moves up into sixth position, its network revenue of $3,499,000 beating out Cleveland (with three stations) for the rank by a scant $55,000. But when it comes to national spot, the picture reverses itself and San Francisco-Oakland drops to a dismal ninth place, its billings of $9,791,000 topped by eight markets, including Pittsburgh (another three-station market) and Cleveland, whose spot business was above the $10 million mark.

Only in local tv business does San Francisco-Oakland shine. Its local tv revenue in 1960 amounted to $5,477,000 to put the market into fifth place, ahead of Pittsburgh, Cleveland, Detroit and Philadelphia and only $22,000 behind fourth-ranking Boston.

The FCC has not yet released its 1960 market-by-market radio figures, but the 1959 data show the San Francisco-Oakland market, with 18 am stations, in seventh place in overall radio billings for that year with a total of $8,894,576. When the San Francisco-Oakland and San Jose metropolitan areas are combined, however, the 24-station billings for 1959 add up to $10,129,312, ranking sixth in the national picture. The joint market also stands sixth in national spot for that year, with billings of $5,016,667 and moves up to fifth position in network business ($164,324). It also stands fifth in local business, with billings of $5,863,809. Similar calculations cannot be made for tv, as San Jose has only one tv station and the FCC, to avoid disclosure of individual station finances, reports only on multi-station markets.

Travel by Car • An auto-oriented market, with better than 85% of the commuters who travel in and out of the city of San Francisco daily doing so in private automobiles, the area is equipped auto. This is typical of the bumper-to-bumper flow that moves throughout the San Francisco Bay area each and every day of the year.

With its eye on its own booming population, San Jose spared no expense for its City Hall. This is the $2 million structure recently completed.

good for outdoor advertising and there are few vacancies among the estimated 3,500-4,000 boards in the Bay Area. Workers traveling by auto are not as good newspaper readers as those using trains or buses, however, and suburban wives are apt to be more interested in local news and the advertising of their own shopping centers than of what is going on in downtown San Francisco, Oakland or San Jose. More than 20 daily papers serve as many communities and none of the three San Francisco dailies has as much as 30% penetration of the Bay Area’s 1.17 million families.

The San Francisco morning papers, Chronicle and Examiner, are more widely read than the evening News-Call Bulletin, one obvious reason being that virtually all of the other dailies in the area are evening papers. "Trans-bay rivalry keeps the N-CB off the newstands in the East Bay and the Oakland Tribune off the San Francisco streets.

Broadcasting Area — The airborne media — radio and television — pay no attention to political boundary lines and frequently send their programs far beyond the limits of the nine counties bordering San Francisco Bay. This is an important consideration for an area in which more than 80% of the people live outside San Francisco proper, compared to less than 70% a decade ago. For radio, the man who commutes by auto, the woman who drives to her community shopping center or supermarket, represent a big plus. Outdoor activities around patio and pool, common year-round except for the midwinter rainy season, also add to radio listening and, with the ever-increasing purchase of portable tv sets, to tv viewing as well.

Radio has virtually 100% coverage of Bay Area homes; tv’s penetration borders on 90% and more than 85% of the area’s 1.5 million automobiles are equipped with radios, this figure mounting week by week as new cars replace old ones. FM penetration of Bay Area homes is close to the 50% mark, with 23 stations serving this audience, 17 of them independently programmed.

In August, one fm station started regular broadcasting of fm multiplex stereo programs, devoting nearly 50 hours a week, about 40% of the station’s overall broadcast schedules to this new service. In just one month, the station reported, more than 3,000 multiplex receiving units, approximately $50,000 worth, were sold in the area and the station signed enough new business to pay its stereo installation costs twice over.

POPULATION EXPLOSION

Bay Area gains 35.7% during past decade

"Everybody wants to live in California," a saying underscored by the 585,000 rise in the state’s population from July 1, 1960, to June 30, 1961, applies to the Bay Area as well as to Southern California. "In recent years nearly three-fifths of the population increases have been from people moving into the area," the Bay Area Council reports, noting that the newcomers come from all parts of the country, with the number from each state roughly proportional to its size.

In the nine Bay Area counties live nearly three and three-quarters million individuals, 3,638,939, at the time of the 1960 census in April of last year. (As of July 1, 1961, the California Dept. of Finance calculated that the

70 (SPECIAL REPORT: SAN FRANCISCO BAY AREA)
nine-county total had risen by 135,500, a gain of 3.7%. Nearly two-thirds reside outside the three core cities, San Francisco, Oakland and San Jose, whose combined population at census time was 1,255,212.

Furthermore, while the nine-county population increased 35.7% in the decade between the 1950 and 1960 censuses, the three-city total rose only 4.5% in that 10-year period. San Francisco and Oakland both showed declines in residents, 4.5% for San Francisco, 4.4% for Oakland, in the 1950-60 decade. San Jose, with a 114.5% increase, was solely responsible for the core cities combined gain in number of residents. But even so the core cities' percentage of the total Bay Area population dropped by a quarter, from 46.8% in 1950 to 36.5% in 1960.

"60 Census Report Findings - More than half of the Bay Area residents are in the 18-64 age bracket. More than a third are under 18 and, upsetting the popular belief that most California immigrants are senior citizens, only about 10% of the Bay Area population falls into the 65-over group. The San Francisco-Oakland metropolitan area has 32.6% of its residents in the under-18 class, 58.4% in the 18-64 group and 9.0% over 65, with a median age of 31.8 years. The San Jose metropolitan area residents are somewhat younger: 36.1% under 18, 54.9% between 18 and 64, 7.0% 65 or over and a median age of 26.7 years.

Less than one-third (30.2%) of the San Jose residents of 14 or over are unmarried, compared to slightly over a third (34.4%) for the San Francisco-Oakland area and to well over two-fifths (43.9%) for San Francisco itself.

Like New York, San Francisco has a strong attraction for young adults who like the stimulating climate offered by the city, intellectually and culturally as well as weatherwise.

A comprehensive study of trends made by the U. S. Dept. of Commerce predicts that by 1990 the population of the Bay Area (nine counties) will have doubled to a total of 7,425,000 and that after another 30 years, in 2020, it will stand at 14.4 million. By 1990, this study predicts, Alameda County will be the most populous in the area, with 1,673,000 residents, and Santa Clara second with 1,532,000. But by 2020 Santa Clara will be first, with a population of 2,931,000, nearly five times its present number of residents. San Francisco is expected to reverse the downward trend of the last decade and to gain residents in the

"World's greatest ball park" by a breeze! That's the way San Franciscans feel about Candlestick Park. They've even been known to call us "the world's greatest radio station." Could be, but Pulse won't go that far. Pulse says simply that we are absolute Number One in the entire 6-county San Francisco-Oakland area. Call AM Radio Sale: for all the facts on "the world's greatest radio station." They'll know who you mean.

years ahead, although more slowly than those areas now less densely populated. By 1990, that city will have a population of 938,000 and by 2020 of 1,018,-

000, the study predicts, about a third greater than present. In general, the North Bay counties are expected to in-

crease nearly eight times in the next 60 years, while South Bay will quadruple.

The 2020 rank of Bay Area counties by population, the Dept. of Commerce estimates, will be:

**MORE CARS THAN HOMES**

86.5% of Bay Area families own at least one; over 1½ million autos; one for every 2.4 persons

The automobile is an important ele-

ment of the way of life in the San Francisco Bay Area. There are more passenger cars than households, 26.6% more, or slightly over five family auto-

mobiles for every four families. Put another way, there is one passenger car for every 2.4 individual residents of the nine Bay counties. If this figure does not quite match the one car for every 2.2 persons in the Los Angeles metropo-

litan area, it’s a good second and far ahead of the national average.

The 1960 auto count is 6% ahead of that for 1959, when statisticians estimated that, in the San Francisco-Oakland metropolitan area, 61.9% of the families owned one car, 24.6% owned two cars or more and 14.1% got along without a family auto. For families who live inside San Francisco and whose bread earners work in the city, this is not too difficult. The city-owned transit system provides fast and frequent street-car and bus service, with rush-hour expresses from distant points.

More than 10,000 commuters a day ride Southern Pacific suburban trains up the Peninsula from San Jose and points along the 50-mile run from that city core cities. The reverse flow from the central cities to the suburban areas has increased almost as much.

**BROADCASTING, September 25, 1961**
to San Francisco each morning. Thousands more come to work and go home again by intercity bus. But more than 85% of those who commute to the city do so by private auto. There are many car pools, but a 1959 survey showed an average of only 1.72 persons per private vehicle. Between 1954 and 1959, rush-hour person trips increased 19.3%; the number using public transit dropped 15%; the number using private automobiles rose 43%.

Incidentally, if you’re going to San Francisco, leave your scooter at home. A new ruling went into effect Sept. 15 barring scooters from California freeways on grounds they can’t keep pace with the cars, to the great annoyance of the Bay Area’s 20,000 scooter owners.

Outlook: Trouble * At present, with 1.5 million private autos in the Bay Area, the freeways are hard put to handle the rush-hour traffic and far-sighted citizens are worrying about what will happen between now and 1980, when it is estimated that the area’s population will have doubled and there will be a million more private cars on the road. Some, including the San Francisco Chamber of Commerce, are pumping for more freeways to be built immediately. But plans of the state highway department for a new freeway through the city’s west side have been at least temporarily blocked by a group of resolute citizens protesting against either giving up their homes for the freeway or having it as a neighbor.

The Bay Area Rapid Transit District has proposed a plan of combination subway, ground and elevated public transit service of fast electric trains, which it asserts will save the community two dollars that will have to be spent for freeways and parking facilities before 1975 for every dollar spent now for rapid transit. (Make that $1 billion now and $2 billion by 1975 and you’ll have some idea of the magnitude of the BARTD proposal.) Moreover, the organization’s studies have convinced it, and many others, that the private auto alone cannot do the job and that without rapid transit the city will find its economic growth slowly strangled.

But when the BARTD proposed that trains be run across the Golden Gate Bridge, one of the designers of that structure objected that the bridge could not safely support this extra load. The transit district engineers said it could. After much heated debate, the bridge authorities voted not to permit its use for the trains. This eliminated Marin

County from the rapid transit plan and placed in jeopardy the $1 billion district bond issue scheduled to go to the voters next June. That caused as great an uproar as the original proposal and a few days ago the boards of supervisors of San Francisco and Marin counties demanded that the Golden Gate Bridge District appoint an impartial engineering team to make an independent survey on the bridge's ability to handle rapid transit.

Automobiles require parking space and in crowded San Francisco space is hard to come by and expensive when its available. New building owners are required to provide adequate off-the-street parking for tenants and customers, but there were enough structures erected before the parking rules were adopted to keep the curbs lined with cars and the parking spaces (many of them vertical, with layer upon layer of autos) filled, even at $1 a day in San Francisco.

EMPLOYMENT

The statistics are another proof of the area's vitality

Trade, retail and wholesale, is the largest source of employment in the Bay Area, followed by manufacturing, services and government, which together account for more than three-quarters of the jobs in the nine counties, according to estimates for July 1960 by the California Dept. of Employment, whose tabulation goes like this:

<table>
<thead>
<tr>
<th>Industry</th>
<th>Total—Nine Bay Counties</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

1Includes all civilian employees of federal, state, and local governments regardless of the activity in which the employee is engaged.
2Employment estimates include wage and salary workers, self-employed and unpaid family workers, and domestics.

There is, of course, considerable variation from county to county. Agricultural employment, for example, averages to 4.6% of the nine-county total but is better than 20% of the total in Sonoma County and less than one-hundredth of 1% in San Francisco. Government jobs are the most numerous in Napa and Solano counties, but stand no better than third elsewhere. Trade furnishes the most employment in four counties (Marin, San Francisco, San Mateo, Sonoma), drops to second place in four more (Alameda, Contra Costa, Napa, Solano) and is third in Santa Clara County. Manufacturing has a wider range, from first place to fifth.

In the six San Francisco-Oakland metropolitan area counties, August 1961 showed the highest amount of employment on record, with 1,167,000 persons on the payrolls of the area. At the same time there were 67,100 persons listed as unemployed but whereas employment was up from July, unemployment was down.

Chinese small part of foreigners in area

Everyone has heard that San Francisco has the largest Chinese population of any city outside China. Anyone who's ever visited San Francisco and seen Oriental faces on every side is unlikely to dispute that statement. Yet the 1960 census reports only 36,445 Chinese in the city and only 55,965 in the whole nine-county Bay Area. Add all the Japanese, Filipinos, Koreans and other eastern races and the Asian total still amounts to only 121,858, less than 4% of the total population. Not a drop in the bucket to the quarter million Negroes or the 400,000 Latin Americans living in the Bay Area, but who ever heard about them?

There are also the Irish, the French, the Germans, the Italians and Greeks, the Danes, Finns, Swedes and Norwegians, the Armenians, the Russians, the Yugoslavs and the Poles, who all contribute greatly to San Francisco's reputation as the nation's West Coast melting pot and even more to its roster of fine foreign restaurants.

All together, Latins, Asians and Europeans, these foreign-speaking peoples add up to about a million Bay Area residents, who read more than 20 foreign-language newspapers and listen to their native tongues on the radio. A mounting percentage can read and talk English. One fm station broadcasts an hour of Gaelic each week; another airs 90 minutes of classical Chinese drama each evening. An am station which devotes itself chiefly to foreign language programs offers more than a dozen languages during the week, including Chinese, Japanese and Tagalog and is toying with the idea of broadcasting Chinese translations of Gunsmoke.

Negros are important market

Negroes, totaling 244,411 in the Bay Area at the time of the 1960 census, amount to 6.7% of the total population and form an important segment of the market. This is especially true in the six-county San Francisco-Oakland district where 97% of the nine-county Negroes reside. This number has grown...
by 62.2% since the 1950 census and is more than 12 times the 1940 total.

The first Bay Area Negroes were concentrated in Oakland, families of Pullman employees working on the trains whose cross-country runs terminated there. With the growth of manufacturing and government employment, they have spread out from this base, but real estate and social restrictions, as well as financial considerations, have tended to keep them close to the business and industrial centers and 86% of the Negro population of the San Francisco-Oakland district live within 15 miles of San Francisco's Civic Center, chiefly in the East Bay cities.

Interviews with more than 500 Negroes by Far West Surveys showed this group to have a mean family income of $370-$420 a month, with some families receiving more than twice that amount. Interviewers found more than 90% of their respondents had TV sets and refrigerators, more than two-thirds owned automobiles and record players, more than 97% had radios (two-thirds of the homes having two or more sets, one-third with three or more).

Pulse and Hooper surveys indicate that the Bay Area Negro is a better-than-average radio listener and that he listens most to the two stations which program specifically for him.

MORE PEOPLE MEAN MORE BUILDING

And it provides another criterion of area's good times

As more and more people move into the Bay Area, more and more places are needed to house them. In the 10-year period, 1951-60, a total of 378,389 dwelling construction permits were issued in the nine bayside counties. Single unit dwelling permits totaled 279,392, nearly three times as many as the 98,997 multi-unit buildings, although the number of new one-family homes built each year has declined from the 1955 peak of 39,719 to 25,891 in 1960, while the duplexes and apartments have shown a steady increase from 5,372 in 1955 to 20,203 last year.

The total dwelling permits, single and multi-units combined, dropped from its 1959 peak of 49,355 to a 1960 total of 46,094. Dollarwise, residential construction amounted to $545.9 million in 1959, and dropped to $510.0 million last year. The cost of constructing a medium-size-dwelling as of Jan. 1, 1961, is estimated at $13,608 (excluding land). less than 1% over the 1960 figure of $13,480. In 1950 a home of this type could have been built for $8,000.

A noticeable trend toward homeownership is shown by the census statistics. In 1950, less than half (48.0%) of the San Francisco-Oakland metropolitan area families owned their own homes. By 1960, 54.5% of this six-county area total were homeowners. In the San Jose metropolitan area, there were 184,945 occupied housing units in 1960, of which a staggering 68.8% were occupied by their owners, more than twice the number of renters.

The $13,608 figure is about right for a house in Daly City (that's where Candlestick Park, windblown home of the Giants, is located), according to the real estate ads. For twice that amount one can get a home in the Marina district, although a good view of the yacht harbor brings a premium. And a mansion in Pacific Heights can be had for $200,000 or so.

But some people prefer apartments and they too are available in all sizes, locations and prices, up to Green Hill Tower, cooperative apartment house on Russian Hill, where a luxury penthouse is available at $250,000 and other apartments are priced down to $43,500.

The need for more housing for more people has led city planners to come up with a scheme to turn the Presidio into 5000 dwelling units.
The San Francisco Rapid Transit Assn. has an ambitious plan of subways and elevated railways for electric trains that would reduce travel time in the Bay Area to the minutes shown on this chart.

But residential construction is only part of the problem. Business and industry need places to work in as much as people need homes to live. And in 1960 non-dwelling construction permits grants in the Bay Area totaled $319,462,338. Added to the residential total, this brings the value of all construction in the nine counties last year to a resounding $860,462,388.

And there's no let up in sight. In the first six months of this year, permits totaling $486.62 million have been issued, 13.3% ahead of the first half of 1960. Residential permits for the first six months of 1961 cover construction of 25,037 dwelling units at a cost of $274.58 million, 7.6% in number and 5.9% in cost ahead of last year. June's 4,612 residential unit permits topped the June 1960 figure by 14.4% and their construction cost of $58.65 million was 27.7% higher than the June 1960 total.

**TOURISM**

Out-of-town visitors play important part in economy

Tourism is an important part of the San Francisco economy, ranking third, behind manufacturing and agriculture, as the source of "new" dollars, according to the San Francisco Chamber of Commerce. And if anyone should doubt that the city recognizes the importance of its out-of-town guests he has only to look at the cable cars, which are a unique and time-tested tourist magnet, although lacking many of the desirable elements of a modern in-city transportation system.

Californians Inc., organized in 1922 to promote tourism in North and Central California, reports that last year 2.5 million visitors spent $205.9 million in the region, of which about half went for food and lodging, a sixth was spent in department, drug and other non-food retail establishments, an eighth for gas, oil, garage and other auto expenses and 7.5% for amusements. In the Bay Area itself last year, 1.7 million visitors (90,000 more than in 1959), spent $90.3 million (up $4.7 million) for an average of $52.80.

Conventioneers Spend Most • But the best visitors for San Francisco's cash registers are the convention delegates. Records of the San Francisco Convention and Visitors Bureau show that in 1960 a total of 294,372 individuals from outside San Francisco attended 397 trade shows and conventions and spent $37.5 million while in the city, an average of $120.85. A study made in 1958 showed an average daily expenditure of $39.29 per convention visitor, 50% more than the $26.76 daily...
Two attractions for tourists are San Francisco's War Memorial Opera House (top), home of the famed local opera company and the San Francisco Symphony, and the flower stands which dot the city's streets.

average in 1948. As with individual visitors, convention arrivals are growing from year to year, with 64,000 more delegates attending 59 more meetings and spending $6.4 million more in 1960 than in the year before.

So, whether he's munching a Pronto-pup (hot dog backed into a dough and eaten on a stick) while gazing at Seal Rocks or dining lavishly on shish kebab and paklava at Omar Khayam's; whether he's riding the Powell St. cable car to Fisherman's Wharf or a sightseeing bus to Mission Dolores; whether he (or more likely she) is buying souvenirs in Chinatown, at Gump's or at Woolworth's, San Francisco welcomes its visitors with glad smiles and ringing cash registers.

Electronics big business

Electronics, which was unknown prior to World War II and has had most of its growth since 1950, is already an important item in the economy of the San Francisco Bay Area. The Western Electronic Manufacturers Assn. estimates that electronics sales in the Bay Area will total $675 million this year, a gain of nearly 20% over last year's $570 million and of more than 45% from the $460 million total in 1959. Electronics firms currently employ 45,500 persons in the area, up from 40,000 last year and 35,000 the year before. The number of electronics firms in the nine counties has increased from 144 in 1959 to 167 this year.

DEINTERMIXTURE & THE HILL

Total of nine bills, resolutions introduced; all express opposition to FCC's proposal

Additional congressional storm warnings were hoisted last week advising the FCC its proposed vhf-uhf deintermixture plan is in for rough weather on Capitol Hill when Congress returns in January.

Nine bills and resolutions have been introduced, seven of them last week, either to block implementation of the plan temporarily or limit the FCC's power to shift a station from a vhf to an uhf band. In addition, a number of House members have expressed their opposition to the FCC proposal in floor speeches.

One of the key developments of the week was a meeting of some 25 House members who discussed means of coordinating their opposition to the FCC plan. The meeting was called by Rep. Peter F. Mack Jr. (D.-Ill.), a member of the House Commerce Committee, which has jurisdiction over the FCC.

First serious signs that the deintermixture proposal was in trouble on the Hill appeared two weeks ago, when Rep. Mack and other members of the Commerce Committee began pressing for a hearing on deintermixture. Rep. Oren Harris (D-Ark.), committee chairman, gave assurances at an executive session that a hearing will be held early in the next session (Broadcasting, Sept. 18).

Rep. Mack said no formal action was taken at the meeting, but he promised to keep interested members informed on developments in the deintermixture controversy. Congressmen attending the meeting were from areas affected by the FCC's plan to delete vhf channels from large markets (Broadcasting, July 31).

Rep. Mack, one of the first congressmen to speak out against the proposed plan, said he called the meeting to reply to a number of inquiries he had received concerning the issue.

Opposition Views • Throughout many of the comments at the meeting, according to Rep. Mack, and speeches made on the House floor, ran several common themes—that the proposal discriminates against rural areas, that it is not in the public interest, that the FCC should not act until its $2-million uhf study in New York is completed, and that if the FCC is permitted to proceed with its proposed deletion of eight channels, it will seek to delete eight others at a future date.

In addition, Rep. Mack said, some House members feel the FCC "lacks the courage" to take its deintermixture plans into large metropolitan areas. If the commission is interested in deintermixture, he said, it should delete vhf channels from large cities, which could easily be served by uhf.

"The vhf bands," he added, "should be left in the rural areas," where vhf is needed to service large numbers of people scattered over considerable distances. He said none of the eight communities chosen for deintermixture have populations of more than 200,000.

These views are reflected in a bill (HR 9349) he introduced Thursday. It would make it unlawful for the commission, in allocating vhf and uhf channels, to give any "undue or unreasonable prejudice or disadvantage" to any area.

Five of the other bills would prohibit the FCC from deleting a vhf channel from a market for the purpose of deintermixing it. But all five also are designed to help solve the vhf-uhf problem by incorporating legislation sought by the FCC.

This would require manufacturers to produce only all-channel television receivers by authorizing the commission to prescribe the channels that receivers shipped in interstate commerce must be equipped to receive. This legislation has already been introduced in both chambers at the request of the FCC (Broadcasting, June 19).

Supports FCC on Sets • Rep. Kenneth A. Roberts (D-Ala.), in introducing one of the two-part measures (HR 9267), said the FCC should have the authority over receivers it requests, since "that is the only practical way of getting uhf stations on the air." But, he added, "if
Your car, madame...

But where is the car? Here we are floating...

Magic, you say? Yes! Camera and film magic!
we enact set legislation as the FCC has asked, this will be a compelling reason for the FCC not to shift any vhf stations to uhf.

Prospects for the set legislation, however, are not bright. Rep. Harris and Sens. Warren G. Magnuson (D-Wash.) and John O. Pastore (D-R.I.), chairmen, respectively, of the Senate Commerce Committee and its Communications Subcommittee, have expressed serious reservations about the proposal (Broadcasting, Aug. 7).

The remaining legislation thrown into the fight against deintermixtuation are resolutions introduced by Reps. Vern Thomson (R-Wis.), George W. Andrews (D-Ala.) and Rep. George M. Grant (D-Ala.). The first two (H Res 450 and H Res 457) ask the FCC to delay its deintermixtuation plans until its uhf study in New York is completed and a report is submitted to Congress. Rep. Grant would put the House on record as recommending that no station now operating on a vhf channel be asked to move to a uhf band.

**More comments on deintermixtuation plan**

The Assn. of Maximum Service Telecasters has asked the FCC to set aside its proposed rulemaking to authorize vhf drop-ins in eight markets or in the alternative to revise the proposal so as to provide certain safeguards to existing tv stations and to keep drop-ins to a minimum.

The AMST comments were among several papers filed in the FCC's deintermixtuation proposals. The deadline for comments has been extended to Dec. 1, but the number of early comments indicates the high degree of interest in the FCC proposal (Broadcasting, Sept. 11).

AMST said the FCC should set aside its decision to authorize vhf assignments at less than minimum separations, but if it doesn't the agency should revise the procedure it used in determining those eligible for consideration and change its overall, pre-planned method of selection so as to guard against a "proliferation" of drop-ins. The FCC also should change its mind about not specifying how directional antennas should be operated by vhf drop-in stations, the group added. More protection should be given to co-channel and adjacent channel assignments than that presently contemplated, the AMST said.

The trade association also filed op-positions with the FCC to eight petitions for reconsideration seeking short-spaced vhf assignments in cities not included in the drop-in rulemaking (Broadcasting, Sept. 11). Grant of AMST's request for reconsideration would fully dispose of each of these petitions, the association said. The eight petitions also emphasize the importance of revisions by the FCC in procedures followed in the drop-in proceedings, AMST maintained. A "market pre-planning case" would relieve the FCC of additional pleas for short separations, AMST said. The association referred to the following petitions:

Leon P. Gorman for ch. 3 in Portland, Me.; John McLendon for ch. 5 in Jackson, Miss.; ch. 57 WKNX-TV Saginaw, Mich., for ch. 11 in Saginaw-Flint-Bay Arca, Mich.; ch. 18 WXIX-TV Milwaukee for ch. 9 there; ch. 49 WAKR-TV Akron, Ohio, for ch. 12 there; WVUE (TV) New Orleans for ch. 12 in that city at reduced separations; ch. 67 WNOK-TV Columbus, S. C., for ch. 8 there, and KUTV (TV) Salt Lake City for ch. 5 in Toledo, Ohio (with ch. 12 to be added to Cleveland for ch. 5).

**Request Premature**

Ch. 12 WICUTV Erie, Pa., said that the KUTV request is premature in that it assumes ch. 12 will be deleted from Erie. WICUTV served notice that it will fight to retain the vhf channel and will show that such is in the public interest. The Erie station listed the same opposition to WAKR-TV's request for ch. 12.

WMTW (TV) Poland Spring, Me., opposed the Gorman petition on the grounds that its ch. 8 operation constitutes a third vhf service in Portland. Ch. 5 KALB-TV Alexandria, La., charged that the McLendon petition for ch. 5 in Jackson is "patently inconsistent" with FCC criteria.

WJTW (TV) Jackson (ch. 12) pointed out that WVUE recently received a construction permit for ch. 12. New Orleans meeting separation requirements which underscores that New Orleans is not qualified for short separations.

WWTV (TV) Cadillac, Mich., on ch. 13, indicated a willingness to shift to ch. 9 to allow assignment of ch. 13 to Grand Rapids, provided WWTV may continue on ch. 13 for 60 days after the new ch. 13 grant. WWTV reported plans to "proceed promptly" to make the necessary changes and said 160-day delivery of a new antenna and a severe winter would preclude installation until next spring. The FCC has adopted rulemaking to implement the shifts.

The Rotary Club of Opp, Ala., said WSFA-TV Montgomery, 85 miles away on ch. 12, should be permitted to keep its vhf assignment. Opp residents get NBC news on WSFA-TV and "blurred or indistinct presentation" of these re-

A writer is in deep thought . . .

"M-m-m—magic ride. How can we do that? A flying carpet? M-m-m—could be! But can't we do better?"

The writer drops back into deep thought. Suddenly . . .

"I've got it! Magic ride! Young couple—riding through the country. No car—just floating. Magic! That's what we want!"

Grand idea. But how to do it? * * *

Film was the answer—film with all its versatility—its adaptability. Film with a special prism camera—plus time, patience, skill.

Result: a TV commercial to rave about—unusual in every way—beauty—impact—memory value.

But that's film for you! Film does the unusual—gives you the commercials you want—and when!

What's more, film, and film alone, gives you the convenience, coverage and penetration of multiple markets that today's total selling requires.

WTIC-TV 23 the of Sept. proposed of 10.0 GHz. would the FCC's de-intermixture proposal. (Broadcasting, Sept. 4). The Better Business Bureau of Greater Columbia said WIS-TV provides the organization with "speed and essential coverage" for its warnings to the public and that this protection to the public would be reduced under the proposed changes. The South Carolina Chamber of Commerce submitted a resolution which held that shift of WIS-TV's ch. 10 would "seriously impede" communication service by WIS-TV, including wide-ranging tv coverage from the state capital.

Also receiving local support was WTIC-TV Hartford, Conn., in its efforts to retain ch. 3 which the FCC has proposed to delete from that city. Filing petitions with the commission seeking retention of the vhf channel in Hartford were the Board of Aldermen of Waterbury and the Chamber of Commerce of Naugatuck.

MORE FILE FOR NEWLY-ASSIGNED VHFS

**Grand asks Grand Rapids ch. 13, Baker Syracuse ch.9**

There has been no scarcity of interested parties seeking to operate tv stations on third vhf channels added by the FCC at Rochester and Syracuse, both New York, and Grand Rapids, Mich. (Broadcasting, Aug. 7). In fact, one or more applicants already have applied for each of the channels and others have indicated their intentions to do so.

Two applications were filed last week —by Grand Broadcasting Co. for ch. 13 at Grand Rapids, and by W. R. G. Baker Radio & Tv Inc., for ch. 9 at Syracuse. Already on file are applications by Syracuse Tv Inc. and Veterans Broadcasting Co. for ch. 9 at Syracuse and Anthony R. Tyrone for ch. 13 at Rochester.

Most of the applicants have requested an interim operation of some sort. The commission invited such proposals in finalizing the channel additions. Several other "interested parties" (ABC, WMAX Grand Rapids and Genesee Valley Tv Co.) have made proposals to the FCC designed to expedite the start of a third commercial service in the three cities.

The Grand application, which includes among its principals the former FCC Secretary, Mary Jane Morris, and 23 stockholders with "228 years of experience in broadcasting," is the most unusual of the group. Grand's bid consists of three volumes totaling over four inches in thickness and containing 21 exhibits. One of the exhibits, numbering 262 pages, is titled: "History of Development of Program Plans for Grand Broadcasting Co."

Grand waived its right to a hearing and asked that the application either be granted or denied as filed. "We see no need to engage in lengthy hearing, proposed findings, initial decisions, oral arguments not to exhaust the record further," the applicant said. Grand further asked that it be given a conditional grant to operate on ch. 13 "upon the basis of its complete showing."

**The Experiences** In addition to Miss Morris (16.66%), other Grand stockholders include her brother, John C. Morris (16.66%), Leonard A. Versluis (16.66%), Donald F. DeGroot (6.41%), Leonard A. Versluis Jr. (3.84%) and 18 others, none with over 2.56%. The Morrises have been partners in a Grand Rapids law practice since Miss Morris resigned from the commission in 1960. Mr. Versluis Sr. formerly owned WLAV-AM-FM Grand Rapids, 33½% of WJIM Lansing, Mich., and 50% of WLOD Pompano Beach, Fla. Grant Ashbacker (2.58%) formerly owned WKBZ Muskegon, Mich., and was the principal in the famous "Ashbacker" court case in which it was ruled that the FCC may not deny an application competing with another one without a hearing. Other Grand stockholders with broadcast backgrounds: Mr. DeGroot is assistant general manager of WWJ-AM-TV Detroit; Martin Giaimo (2.56%) is man-

Reports termed 'fallacious'

Paul W. Morency, president of ch. 3 WTIC-TV Hartford, Conn., charged last week that a uhf operator's statements on the coverage WTIC-TV has given an FCC proposal to make Hartford all uhf are "completely contrary to fact... fallacious and unsupported."

Mr. Morency's reply came in a letter to William L. Putnam who had charged that WTIC-TV "falsely reported" the facts (Broadcasting, Sept. 11).

WTIC-TV will oppose the shift of ch. 3 by all "proper and appropriate means."

Mr. Morency said in his letter which also was filed with the commission. He told Mr. Putnam that if WTIC-TV telecasts material dealing with the merits of the proposed de-intermixture that Mr. Putnam will be offered equal time to present opposing views. Mr. Putnam is the principal owner of WWLP (TV) Springfield, WRLP (TV) Greenfield and WWOR (TV) Worcester, all Massachusetts uhf stations.

ager of WNEM-TV Flint studios; Harry Le Brun (2.56%) is president and 33½% owner of WSAF Sarasota, Fla.

Veterans Broadcasting Co. owns WVET-AM-TV Rochester and 80.58% of KTVE (TV) El Dorado, Ark. Veterans also asked for interim operation on ch. 9 in Syracuse. Veterans has more than 100 stockholders and is headed by President Ervin F. Lyke (8.2%).

Syracuse TV Inc., which did not request a temporary operation on ch. 9, is owned by Founders Corp. (80%) and Macmillian Ring-Free Oil Co. (20%). Founders is an investment holding corporation with interests in KORL Honolulu, WTAC Flint, WFBL Syracuse and WSMB New Orleans. John M. Shaeen owns 53.62%. Robert G. Munro is president of Founders and board chairman of Macmillan.

W. R. G. Baker takes its name from the late president of General Electric. Its stockholders include Leon P. Markert, Robert J. Conan, Richard N. Groves, William V. Stone, Daniel W. Casey Jr. and Naomi Baker (widow of W. R. G. Baker), J. J. Bernard Jr., formerly with KTVI (TV) St. Louis, holds no stock but will be general manager if the Baker application is successful.

Mr. Tyrone, executive vice president of the Hamilton Management Corp. (Denver investment company), is the sole owner of his application for ch. 13 Rochester. He has requested temporary authority for interim operation, which has been opposed by prospective applicant Genessee Valley TV Co. Genessee said it was formed in 1958 to seek a third vhf for Rochester and that no interim operation should be considered until all parties have had a chance to file for ch. 13.

TRADEMARK BILL
Passed by House over FTC head's objections

A bill that the Federal Trade Commission chairman says would permit broadcasters and advertising agencies to register, as their own, slogans originally developed for radio and television sponsors, slipped through the House last week without debate.

The purpose of the bill (HR 4333), according to the House Judiciary Committee, which approved it, is merely to "clarify" the meaning of various provisions of the 1946 Trademark Act and codify present practices of the Patent Office.

But in a letter to the judiciary committee, FTC Chairman Paul Rand Dixon objected to new language in the bill which would permit "titles, character names and other distinctive features of radio or television programs" to be "registered as service marks notwithstanding that they, or the programs, may advertise the goods of the sponsor."

Since this amends existing law, he said, it might be interpreted to permit "broadcasting or advertising services" to acquire rights in promotional material that had been developed and used in behalf of program sponsors. "No other purpose is discernible," he said.

The amendment, he added, would prohibit the Patent Office from denying a proposed service mark to a broadcaster or advertising agency on the ground that it advertises the goods of a separate party rather than the applicant's services.

An advertising agency, he pointed out, might be able to gain control of a phrase developed for a client, and then prevent the client from using it independently or through another agency. "Thus, the advertiser may, through the trademark statute, possibly secure control of what is really his client's property," the FTC chief said.

In a brief discussion of the bill before House passage, Rep. John V. Lindsay (R-N.Y.), the measure's sponsor, dismissed Mr. Dixon's objections. He said the amendment "makes clear in the law" the position held by the trademark office for some 10 years. He described the legislation as primarily "a housekeeping bill."

The report of the judiciary committee noted that the bill has the approval and support of the U.S. Trademark Assn., the American Bar Assn., the National Assn. of Manufacturers, and various other lawyers groups.

Equal-time suspension sought for N. Y. election

Sen. Jacob K. Javits (R-N.Y.) and Rep. John V. Lindsay (R-N.Y.) have launched an effort to open the way for political debates on television by candidates in New York City's November election.

They introduced joint resolutions last week (SJ Res. 140 and HJ Res. 581) seeking the suspension of the equal-time provisions of the Communications Act for candidates for mayor, president of the city council, and comptroller.
At last you have a choice when you buy video recording tape. The new one is called Emitape. It was developed in the United Kingdom by EMI, pioneer and developer of the world’s first public TV system. It has been proven in tens of thousands of actual telecasting hours. It was most enthusiastically received at the recent NAB Show. The rigid quality control maintained throughout the Emitape manufacturing process assures you of excellent wearing qualities, edge straightness, signal-to-noise ratio and recording performance.

Dropouts average no more than 20 per minute, including defects of less than 6db amplitude modulation depth, and a time duration of under a few microseconds. Head wear is considerably reduced with Emitape. With most equipment a minimum head life of 150 hours can be expected. Audio head stacks show negligible wear after 500 hours of service. Tape life is also long. The average figure is 100-150 passes.

But get all the facts. Write, wire or call EMI/US Magnetic Tape Division, Los Angeles: 1750 North Vine Street, Hollywood 2-4909. New York City: 317 West 44th Street, Circle 5-3400. (Also available, from the new General Communications Division of EMI/US: a complete line of TV cameras, solid state distribution and switching equipment.) Emitape
JONES: SPHEERIS KNEW ALL

KWK's ex-manager tells FCC hearing in St. Louis that president was in on decisions to hide truth

William L. Jones Jr., former general manager of KWK St. Louis, testified before an FCC hearing examiner in the station's revocation hearing last week that KWK President Andrew M. Spheeris knew all along that the prizes for the two treasure hunts in the summer of 1960 were not hidden until late in the station promotion contests.

He further implicated Mr. Spheeris in decisions to keep the truth from others, including the FCC. Mr. Jones also said that KWK Sales Manager Don E. Hamel "volunteered" to hide the prizes late in the contests.

When the prizes were actually hidden is an issue in the case. The hearing has been in progress for two weeks in St. Louis, before examiner Forest L. McClenning.

Mr. Hamel earlier had testified that it was Mr. Jones who had ordered him to hide the prizes only hours before they were found and that it was Mr. Jones who had ordered him to lie about the acts to Mr. Spheeris and other KWK principals and to the FCC. Mr. Hamel had testified also that Mr. Spheeris appeared shocked and surprised when he finally told him in March of this year that prizes were not hidden until the last day (Broadcasting, Sept. 18).

During cross-examination later in the week by KWK Counsel Robert M. Booth Jr., Mr. Jones admitted that the FCC earlier this year promised him immunity from prosecution for perjury if he would tell them the truth, but he said this was not contingent upon his testifying in the KWK hearing.

Mr. Jones admitted he lied to the FCC field investigators in August 1960 and January 1961. He admitted he also made a number of false statements about the treasure hunts in a local court suit in September 1960 and that he misrepresented the facts in his affidavit to the FCC later that month. But he contended he did so reluctantly and chiefly at the urging of Mr. Spheeris.

Breath of Confidence • Before commencing his cross-examination Thursday morning, Mr. Booth unsuccessfully sought to have all of Mr. Jones' direct testimony stricken from the record. He charged a "breach of confidence" on the part of the commission staff for disclosing to Mr. Jones in June of this year portions of statements that KWK principals had volunteered to the Broadcast Bureau during an informal conference in May.

Mr. Booth said the disclosures were made as a result of the manner in which the FCC staff questioned Mr. Jones and indicated this knowledge gave him a two-to-three month advance tipoff of what KWK witnesses would say. The KWK counsel claimed this prejudiced the station's position since the credibility of witnesses had become paramount in the hearing.

The examiner denied Mr. Booth's request by stating he could not believe there has been "sufficient prejudice" incurred. Mr. Booth indicated he would appeal to the commission itself.

Under direct examination by the FCC counsel, Mr. Jones said he is still being paid by KWK pursuant to contract and that he will receive a percentage of profits until Nov. 15. Earlier testimony showed that the KWK board of directors fired Mr. Jones on May 15.

Mr. Jones' KWK car and country club membership were assigned Mr. Hamel.

Mr. Jones testified he talked with Mr. Spheeris about hiding a treasure hunt. He said he knew "we discussed the problems of early discovery" and said "I know we decided to hide it later in the hunt." Mr. Jones said Mr. Hamel "volunteered" to hide the first prize but he could not recall when.

Mr. Jones testified that when he later learned FCC investigator Leroy Schaff was coming to the station he and Mr. Hamel "agreed to keep our stories the same" and to say the prizes were hidden the first day of each contest when the clues began. He said he thought this meeting was "off the record" and that Mr. Booth had told him to tell Mr. Schaff any official statement would have come from Mr. Booth's office.

The former KWK general manager told of a meeting of KWK principals in New York Sept. 14-15, 1960, at which his affidavit to FCC was made and signed. He said he told Mr. Spheeris "I wasn't going to tell anyone it (the prize) was hidden the first day" but Mr. Spheeris said "don't worry about it, I'll handle Booth."

Mr. Jones said Mr. Booth did not want to be "specific" in the affidavit and finally asked if it was all right to say the prize was hidden within a week or 10 days. Mr. Jones said he replied "fine" and did not volunteer the correct date nor did anyone ask him.

Later Mr. Jones said he told Mr. Spheeris he didn't think "this was going to fool anybody." Mr. Jones said he was concerned because his signature was on the FCC document but he said Mr. Spheeris told him not to worry because "they're not interested in you. They're interested in the license."

Arrival of FCC Team • Mr. Jones said that when two FCC investigators arrived at KWK in January of this year Mr. Booth was not sure he would let him see them but "that morning Mr. Booth decided he was going to cooperate" and let both Mr. Jones and Mr. Hamel be interviewed.

Mr. Jones said he showed Mr. Hamel his (Jones') FCC statement before the separate interviews but that deviations occurred. Mr. Jones said Mr. Spheeris called the next day and said "For God's sake, why can't you guys get your stories straight? Next time I'm going to be there." He said he replied, "Why weren't you here this time?"

Mr. Jones said that as 1961 wore on he talked to Mr. Spheeris "several times" and told him "I was getting more unhappy by the day and I was interested in resigning and getting out of the whole thing." Mr. Jones said he told Mr. Spheeris that if Mr. Hamel "got on the stand you're dead."

In May of this year KWK counsel Mr. Booth and Jack P. Blume arrived at KWK, Mr. Jones recalled, and said Mr. Spheeris told him "we were going to file some sort of an affidavit and if we stipulated doing some wrong we could get out." He said he told the KWK president it was "pretty late" to do this but Mr. Spheeris replied "I don't know, these guys will handle it."

Mr. Jones related that the KWK counsel never got around to talking to him and later Mr. Spheeris called him.
Mr. Jones also testified Mr. Spheeris
also told him he did not want any
record of the prize trade deals on the
 corporate books. Other witnesses ex-
plained this was because they were
considered “washouts” and, if entered,
commissions to certain employees and
others would have to be paid even
though no cash had been received.

Under cross-examination by KWK
counsel, Mr. Jones was questioned in
detail about the visit of investigator
Schaff in August 1960. Asked if he had
made a true statement to FCC in June
1961 to the effect that he did not then
talk to Mr. Spheeris because the KWK
president was on vacation, he replied
“that is correct.”

He also was questioned extensively
about events surrounding the mid-Sep-
ember 1960 meeting in New York and
steps leading up to the decision earlier
that year to hold the first treasure hunt.
He said he discussed the idea with no
one except Mr. Spheeris.

First Sponsor • Mr. Jones told KWK
counsel the first treasure hunt contract
with the sponsor, 3-V Cola, was for a
minimum of four weeks and that there
was no guarantee about when the prize
would be found. Mr. Jones said the
agency and client were told that if the
prize were found the first day the con-
tract still was firm for four weeks.

After stating he and Mr. Spheeris
then discussed hiding the prize “late”
after the contest began, Mr. Jones was
unable to recall the specific statements
of Mr. Spheeris. But he said he re-
membered Mr. Spheeris was “a little
bit worried” about someone finding the
prize and not knowing what it was as
had happened to certain other stations.

Pressed by KWK counsel about the
discussion, Mr. Jones was unable to say
whose idea it was about hiding the prize
late, other than “we agreed” it was a
good idea. “Whether he told me spe-
cifically to hide it late I couldn’t say,”
Mr. Jones replied. He admitted as true
his statement to the FCC staff in June
that he had made it “clear” to Mr.
Spheeris it was his (Jones’) intention
not to hide the prize before the contest
began.

The FCC counsel also took further
testimony last week from KWK Presi-
dent Spheeris and also KWK Vice Presi-
dent Hugh K. Boice Jr. and KWK
Treasurer John C. Gagliano.

Mr. Spheeris related that after he
learned in late March of this for the
first time from Mr. Hamel that the
prizes were not hidden at the start of
the treasure hunts, he mentioned it to
Messrs. Boice and Gagliano and in-
structed KWK counsel to make a spec-
ial investigation. He said he did not

tell counsel what Mr. Hamel had divulged because he wanted to learn the truth and not accuse anyone prematurely until it could be learned.

Mr. Sp heaters related that later after the KWK attorneys interviewed Mr. Hamel he did not discuss the subject with Mr. Jones "on advice of counsel." He said the attorneys did not interview Mr. Jones because there was possible perjury involved and they wanted to protect the rights of both Mr. Jones and Mr. Hamel.

Mr. Spheeris said he did not learn of investigator Schaf's August 1960 visit to KWK until after he returned from vacation and Mr. Jones told him about it. He said Mr. Jones minimized it and suggested former employees might have been responsible. Mr. Jones told him that when the investigator arrived he called KWK counsel and was instructed to cooperate, Mr. Spheeris related.

Boise Testimony • Recalling the September 1960 meeting in New York when Mr. Jones' affidavit to the FCC was prepared, Mr. Boice said that upon "repeated questioning" and "crossfire" Mr. Jones said the treasure hunt prizes had been hidden the "first or second day" of the contest. Mr. Boice said it was "disturbing to me he couldn't give me an exact date."

Mr. Boice introduced a subsequent letter from Suzanne C. Cleaveland, WEMP corporate secretary, which contained a notation Mrs. Cleaveland was understood to have made in her diary concerning the April 1960 WEMP board meeting.

"Read by FCC counsel, it said "AMS finds his with WVLJ. This case we fired if FCC lawyers get together in D. C. on Monday and decide he's fly in the ointment. Inferred has tied re time of capsule.""

Mr. Boice, however, said he did not recall that Mr. Spheeris had stated anything to this extent during the WEMP meeting.

Mr. Gagliano testified that in May 1960 Mr. Jones had mentioned the treasure hunt idea to him and he said he cautioned Mr. Jones to be sure to get "clearance" from Mr. Spheeris before starting it. During the September 1960 New York meeting he recalled KWK counsel Booth gave Mr. Jones "a pretty rough time."

Robinson denied grant of am without hearing

The FCC refused to grant without hearing an am station in Holly Springs, Miss., to multiple radio-station owner Aaron B. Robinson last week and so dismissed his application, an alternative he had requested. The application was set for hearing on grounds that Mr. Robinson had too great a concentra-

tion of stations in one geographic area. Commissioner Rosel H. Hyde dissented to the necessity of a hearing.

Mr. Robinson told the FCC Holly Springs needs an "outlet for local self-expression" but said that if he could not be spared the expense of a hearing, he would not prosecute the application. He said the area is not sufficiently economically promising.

Stations in which Aaron Robinson has majority interest: WDXI-AM-TV Jackso n, WDXX Lawrenceburg, WDPN Clarksville, WENK Union City, WTPR Paris, all Tennessee, and WCMA Corinth, Miss.

More federal reams needed, ACLU claims

Broadcasting needs more government supervision, not less. This was the theme of comments by the American Civil Liberties Union on the FCC's proposed changes in program reporting forms. The brief denies critics' contentions that the new forms constitute censorship and maintains that, to the contrary, by easing some of "the tremendous commercial pressures" on broadcasting they would be an antidote to the industry's own "censorship in reverse." This is the "censorship" which, the ACLU maintains, often keeps "counterversial and stimulating material" off the air.

There are many "fine programs" and some broadcasters who apparently want to improve their output, ACLU continues. But on the whole "television has hardly tapped its great potential to benefit society" and FCC Chairman Newton Minow was "all too accurate" when he called tv a "vast wasteland."

Rating 'Tyranny' • The brief strikes out at "the tyranny of the rating system" which has "raised mediocrity to star status" and "virtually stifled original incentive," and at the "sponsorship criteria" which leaves "even the most imaginative broadcaster somewhat at the mercy of the sponsor," who in turn puts his faith in the ratings.

"We all know," ACLU says, "that the process almost invariably leads to the same conclusion: less public affairs programming, especially in prime time, less cultural programming, more, and still more, of the tawdri ness which now fills our screens. The system and the sponsor have proven victorious all too often, and, even more often, have provided the cautious and profit-seeking broadcaster with an all too convenient excuse for not meeting his obligations to the public interest."

WNTA-TV sale parties urge quick FCC approval

Both parties to the sale of ch. 13 Newark-New York last week asked the FCC to approve the sale and not to allow protests by New Jersey's Gov. Robert Meyner to delay closing the transaction. The $6.2 million contract between National Telefilm Assoc. and Educational Television for the Metropolitan Area Inc. calls for FCC con-

GE, WBC STATIONS

Union cites antitrust case in asking license refusals

A new wrinkle was thrown into the FCC deliberations on whether to renew the broadcast licenses of General Electric Co. and Westinghouse Broadcasting Co. last week when the United Automobile Workers urged the FCC not to renew the licenses or those of "any other corporation found guilty of violating the antitrust laws."

In a letter to commission Chairman Newton N. Minow, the UAW said that any company which "knowingly or wilfully" engages in price fixing should not be rewarded with "lucrative franchises." The letter cited the Landrum-Griffin bill which denies certain rights to union members "who have been convicted for violating laws against society" and said that the same principle should be applied to management.

Copies of the letter were sent to Commissioners T. A. M. Craven, Rosel Hyde, Robert E. Lee and John S. Cross, who were erroneously reported by a Washington columnist to have voted formally for renewal of the licenses in question. The GE and Westinghouse renewals were questioned after criminal antitrust convictions of their parent companies and several officers for price fixing.

The case has been before the FCC several weeks but no formal vote has been taken (CLOSED CIRCUIT, Sept. 18, 11). It was not discussed at last week's meeting. GE owns WGY, WGFN (FM) and WRGB (TV) Schenectady, N. Y. WBC, subsidiary of Westinghouse Electric Co., owns WBZ-AM-TV Boston, KYW-AM-TV Cleveland, KPIX (TV) San Francisco, KDKA-AM-TV Pittsburgh, WJZ-TV Baltimore, KEX Portland, Ore., WOWO Ft. Wayne, Ind., WIND Chicago and WBZA Springfield, Mass. The company also has contracted to purchase KLAC Los Angeles and plans to surrender WBZA upon approval.
sent prior to Oct. 29 (Broadcasting, Sept. 11, July 10).

NTA charged Gov. Meyner seeks to delay approval by “the creation of fanciful questions.” The seller rebutted the governor’s charge of trafficking, claiming the station’s “tremendous losses incurred... do not permit any unconscionable profit and perhaps [the sale] may result in no profit at all.” NTA pointed out that the educational group’s offer was not the high bid for the channel but was accepted because NTA thought bringing etv to the New York area would be in the public interest.

ETMA pointed out that it intends to provide etv to New Jersey as well as New York and Connecticut and claimed that such a grant has ample FCC legal precedent. The etv group said it plans to provide community service for Newark and to give its residents and officials opportunity for self-expression. “It is clearly unfair to deny Newark as well as the rest of the metropolitan area its only opportunity” for etv, ETMA pleaded.

**ORLANDO INITIAL DECISION**

Recommends ch. 9 grant be voided and that Mid-Florida be disqualified for ‘ex parte’

Chief FCC Hearing Examiner James D. Cunningham recommended last week that the June 1957 grant of ch. 9 Orlando, Fla., to Mid-Florida TV Corp. (WLOF-TV) be declared void and that the applicant be disqualified completely from further consideration.

“Mid-Florida was not and could not... have been unaware of ex parte representations to then FCC Commissioner Richard A. Mack and ‘ratified’ them,” Mr. Cunningham ruled in his initial decision. He said the record, following rehearing of the case late last spring (Broadcasting, May 29), leads to this “one reasonable conclusion.”

There is no evidence that the only other ch. 9 applicant, WORZ Inc., participated in or knew of any improprieties on its behalf and therefore WORZ is not disqualified from receiving a grant, the examiner stated.

Joseph L. Brechner, president of WLOF-TV, immediately expressed “shock” at the examiner’s conclusions. “We will file exceptions immediately and the case will be argued before the full commission. At that time we are confident that the commission will reverse the examiner...” Mr. Brechner said.

The WLOF-TV president pointed out that Mr. Cunningham found no direct affirmative evidence that any ex parte contacts were made with the knowledge and consent of Mid-Florida.

Mr. Cunningham condemned the actions of Orlando civic leader William H. Dial, who admitted contacting Mr. Mack and discussing the merits of the ch. 9 applicants while the case was before the commission. “Dial sought to influence the vote of Mack by creating in his mind the impression that WORZ was an unfit party to receive the tv permit... and that it should be issued to Mid-Florida which he represented, notwithstanding the attempted deception by one of its own officers and directors...” An original initial decision in 1955 had favored WORZ Inc., relying heavily on testimony that Mid-Florida officer and stockholder Hyman Roth “sought to deceive and mislead the commission.”

Unreasonable, Incredible • Mid-Florida’s principals denied that they sanctioned Mr. Dial’s discussions with Mr. Mack or that they knew of them at the time, Mr. Cunningham noted. “Notwithstanding that there is no direct evidence, as such, rebutting these assertions, they cannot be accepted in light of the record as a whole for they are unreasonable, incredible and contrary to normal human experience,” the examiner stated.

Although Dial considered his repeated ex parte approaches to Mack wholly proper, he would not advise the Mid-Florida group under any circumstances. “This circumstance would appear to be of significance inherent for if Dial had no compunction regarding these approaches... it is inconceivable and incredible that, in such a frame of mind, he would not and did not notify the Mid-Florida group by whom he had been retained and with whom he had been working closely....”

The grant is void, the examiner ruled, because Mr. Mack should have been disqualified from voting. None of the present commissioners are disqualified, Mr. Cunningham said, but it is impossible to measure the influence which then Commissioner Mack may have had on them at the time of the grant (the vote was 5-0).

Mid-Florida’s principals at the time of the original grant included Mr. Brechner, Mr. Roth, John W. Kluge, president of Metropolitan Broadcasting, Harris H. Thompson and approximately 15 others. Mr. Brechner purchased Mr. Kluge’s interest (25%) in 1959 for $350,000, and is now the largest single stockholder with 43% of the Class B stock.

A lot of noise, but little legislation

FCC REVAMP AMONG FEW RADIO-TV BILLS ENACTED THIS SESSION

With Congress packing its bags preparatory to a 3½ month recess, its battle cry, so far as legislation affecting broadcasters is concerned should be, "Wait'll next year."

The legislators made starts on a number of important bills in the first session of the 87th Congress, ignored others completely, and completed action on only a handful.

But one of those that made it through the legislative mill in the eight-month session is an act by which the 87th Congress will be remembered—the reorganization of the FCC.

The legislation, drafted largely by the commission itself, is designed to streamline FCC functions to permit the commissioners more time for important policy considerations. It allows the commission to delegate adjudicatory functions to individual commissioners or lesser employees, and to accept or reject applications for review.

Congress went to work on the bill with considerable verve after the House had rejected President Kennedy's plan to reorganize the FCC. That was defeated largely on the ground that it would have increased considerably the powers of the controversial chairman, Newton N. Minow (Broadcasting, June 19).

Another important piece of broadcasting legislation sent to the White House was the Celler sports bill, on which the Senate completed action Thursday night (Sept. 21). The bill (HR 9096), in effect, overrules a Federal Court ruling voiding the National Football League-CBS contract, and permits professional sports leagues to negotiate package television pacts with the networks (see story, page 56).

Minimum Wage Exclusions • Congress also went along with a long-sought NAB request to remove announcers, news editors and chief engineers employed by small town radio or television stations from provisions of the minimum wage law. The exclusion was written into the 1961 Fair Labor Standards Act.

But those were the only significant measures affecting the broadcasting industry approved in the first session. Still awaiting action are a number of important bills. These include proposals to free broadcasters from the bonds of the equal-time requirements of the Communications Act so that they can give free time to the top candidates of the major parties.

The Senate Communications subcommittee began, but never finished, hearings on a bill (S 204), introduced by Sen. Warren G. Magnuson, which would make permanent the 1960 suspension of Sec 315, which applied to presidential and vice presidential candidates.

These hearings will undoubtedly be resumed in the second session. And when they are, they will involve a second, and broader, political broadcasting bill (S 2035), introduced by Sen. John O. Pastore (D-R.I.) in June. This one would apply to candidates for U. S. senator, congressman and governor, as well as president and vice president.

Hearings bearing on the future of Sec. 315 were held also by the Senate Commerce Committee's Watchdog Subcommittee. For three days last April the subcommittee, which policed the industry in connection with the liberalization of the political broadcast provisions of the Communications Act, heard the FCC and a string of witnesses in an inquiry into alleged broadcaster bias during the 1960 presidential election. The subcommittee has yet to submit recommendations, based on its investigations and hearings, for changes in the law.

Proposals for federal aid for educational television, which have been advanced, in vain, in three previous Congresses, were advanced again in the first session of the 87th—and made considerable progress.

As it has in the past three Congresses, the Senate approved a proposal by Sen. Magnuson to grant each state up to $1 million for educational television facilities. The House approved an etv bill (HR 132) of its own, which provides for federal grants totalling up to $25,500,000 on a matching-funds basis.

The bill, sponsored by Rep. Kenneth Roberts (D-Ala.), was approved by the House Commerce Committee late in the session, then pigeon-holed in the Rules Committee during the closing rush of House business. Indications were that it would get to the floor next year.

Unfinished Business • Other bills which were the subject of hearings, but failed to make it through Congress included measures to:

- Create a five-man commission to study and report on the manner in which the spectrum space is allocated, (hearings begun by the Senate Communications Subcommittee).
- Reimburse major political parties up to $1 million, and minor parties up to $100,000, for radio-tv time purchased in behalf of their presidential candidates (shelved by Senate Rules Committee).
- Permit radio and television coverage of House committee meetings (killed by House Rules Committee).
- Eliminate the oath requirement on certain FCC documents (passed the Senate, but remained in committee in the House).
- Require licensees to maintain and illuminate abandoned radio towers (passed the Senate, but remained in committee in the House).
- Extend the hours of daytime-only radio stations (still in House Commerce Committee).
- Require high ethical standards on the part of FCC and other regulatory agency members (still in House Commerce Committee).

Confirmations • The first session of the 87th Congress also saw the Senate confirmation of such key New Frontiersmen as FCC Chairman Murrow; former CBS news commentator Edward R. Murrow, as director of the U. S. Information Agency; and Paul Rand Dixon, as chairman of the Federal Trade Commission.

In addition, Capitol Hill produced
its quota of eye-catching hearings affecting the broadcasting industry. The Senate Juvenile Delinquency Subcommittee's investigation of television's influence on youthful viewers produced some juicy headlines, and promises to produce more before they are concluded.

Congressional interest in U. S. satellite communications policy was made clear when four committees held hearings on the subject. Additional committees are expected to get into the act.

A congressional report that had long been awaited with some uneasiness by the broadcasting industry turned out to be nowhere near as explosive as some had expected. This was the broadcast-ratings report, prepared for the old House Oversight Subcommittee by a committee of the American Statistical Assn. The report said rating services were guilty of some errors but, on balance, did a competent job.

During the final weeks of the session, two new issues arose that are certain to provide fodder for controversial hearings next January. Both involve the FCC—its proposals to break down 13 clear channels and to delete vhf channels from eight markets in the commission's deintermixture plan.

**AT&T RATE CHANGES**

**If approved, will jump wire-service costs 19%**

Radio and tv stations which use AP or UPI wire services would have to pay about 19% more, if proposed charges filed by AT&T's Long Lines Dept., Sept. 14 are adopted.

The AT&T submitted proposed new tariffs for private line usage in conformity with FCC instructions following the issuance of an initial decision in the long-pending private-line telephone and teletypewriter service investigation. The initial decision was issued last July and recommended that private-line telephone charges be reduced, while private-line telegraph service charges be increased—to give AT&T a net increase of $1.5 million for these services.

Instead of a $1.5 million increase, AT&T Assistant Vice President C. F. Nelson said, the changes would result in a decrease of $308,000.

Commercial private telephone line users would pay 2.1% more, and government users 7.8% less. The largest jump, according to AT&T estimates, would be for press channels: a 19% jump.

UPI calculated that the proposed tariffs would increase its costs by $738,000 a year—18%.

One of the reasons for the discrepancy between the FCC's estimates and the actual figures, AT&T said, was that the commission based its figuring on 1955 revenues, while the proposed charges are based on 1961 revenues.

The AT&T noted that it was submitting the proposed rates at the FCC's instructions. The private line case has been going on since March 1956. The revenues involved for the telephone company are about 2% of its total.

**WLW cancels union show; UAW protests**

The United Automobile Workers is aroused at WLW Cincinnati and Sen. Philip A. Hart (D-Mich.) has added his voice to the union's in protesting the Crosley station's decision not to renew a union program.

The program, *Eye Opener* with Guy Nunn, has been running on WLW and 16 other radio stations for the past year. It is a taped commentary of news from a liberal and labor viewpoint, running 30 minutes and heard five times a week on WLW from 7 p.m. to 7:30 p.m. UAW officials said that when it asked last month that the program be renewed WLW replied that it was unacceptable and would be replaced by a sustaining news program. This information, the union claimed, was received Sept. 7, just four days before its contract with WLW expired.

The union said it complained to the FCC at this "abrupt" cancellation and that the FCC had informed it that the station had been asked for its version of the affair.

Crosley President R. E. Dunville told the FCC that the union program was not cancelled; the 52-week contract was not renewed. A substitute program, more in the public interest, Mr. Dunville said, was Conference Call, comprising five minutes of NBC news plus discussion of day's events by news editors of Crosley stations.

**Rochester stay requests refused by commission**

Realignment of tv station ownership in Rochester, N. Y., was okayed by the FCC for the second time last week when the agency refused to grant a stay requested by the National Assn. of Broadcast Employees & Technicians (AFL-CIO) and the American Federation of Tv & Radio Artists (BROADCASTING, Sept., 18, 11). Still pending is a petition by the unions for reconsideration.

The $6.5 million transaction involves the purchase of Transcontinental Tv Corp.'s WROC-TV ch. 5 by ch. 10 shareholders WVET-TV (Veterans Broadcasting Co.) and WHF-TV (Gannett newspapers). WVET-TV will relinquish ch. 10 and operate on ch. 8, recently shifted from Syracuse to Rochester, with ch. 5 going to Syracuse, in rule-making which added third vhf's to both cities.

In denying the union appeal, the commission said that the petition for stay did not show that irreparable injury will be sustained by the public or the unions pending FCC consideration of the NABET-AFTRA petition for reconsideration.

---

**'Big Sister' may be listening at the FCC**

Persons telephoning the FCC might be wise to ask whether their calls are being monitored. According to a report of the House Government Operations Committee, the commission is one of 33 government agencies (out of 37 surveyed) that permit the practice.

The report recommended that monitoring be tightly controlled by regulations which would require that:

- Telephone eavesdropping be banned.
- The use of recording devices be banned unless advance notice is given to the other party.
- Callers be notified whenever a secretary is placed on the line "for any purpose."

The report noted that the FCC staff members, as a result of the subcommittee's inquiries, have begun formulating rules governing telephone monitoring. The committee appeared particularly irked that, of all agencies, the FCC, which is "charged by law with the duty of regulating interstate and foreign commerce in communication," doesn't regulate telephone monitoring by its own personnel and permits the practice without requiring that the caller be warned.

Set sales, production drop sharply in July

The vacation month of July caused production and sales of radio and tv to drop drastically—with radio plunging to a low for the year, and tv the lowest since January.

Production and sales figures for the seventh month of 1961 and 1960, as reported by Electronic Industries Assn.:

MGM Telestudios’ new portable tv camera

MGM Telestudios has developed a lightweight, hand-held tv camera, which is said to facilitate the taping of commercials on location. The new equipment—a 40-pound, strip-down version of the standard studio image orthicon camera—is fitted with a bazooka-type grip and is operated in the same manner as the military weapon. The cameraman holds it with one hand, braces it on his shoulder and sights through a specially-built finder.

George K. Gould, president and general manager of the MGM-TV subsidiary, claims the new camera produces commercials of equal quality to ones shot with standard video tape equipment. He says the camera, which is equipped with a Zoomar lens, solves the former taping problem of shooting in cramped quarters on location. MGM Telestudios’ easy-to-handle camera, he explains, can be used in the middle of a stream, from a moving outboard motorboat, or from the top of a cliff. When in use in a tight and fairly inaccessible location, it’s hooked to power control equipment by a thin, flexible, 1,000 foot line.

Telestudios, which MGM-TV purchased from National Telefilm Assoc. last May, has spent the summer producing taped on-location commercials for tv from a Bucks County, Pa., farmhouse base (Broadcasting, July 24). The company also has been using a variation of Ampex’s Inter-Sync one-camera editing technique (Broadcasting, Dec. 5, 1960, et seq.).
PROGRAMMING

ASCAP income up only slightly this year

DROP IN BUCKET TO WHAT IT COULD BE, MEMBERS TOLD

In the first seven months of this year, ASCAP had domestic income of $19,683,306, West Coast members were told Thursday in an interim treasurer’s report. The figure is virtually identical with the income of $19,668,982 for the same period of 1960. After expenses amounting to just under 20% of the income, $15.8 million was left for distribution to members. Distributions of approximately $6.5 million each were made in April and July. There was also a distribution of $1.1 million from foreign royalties in May and another of about $3.4 million is anticipated for December.

Irving Caesar, chairman of the ASCAP executive committee, who read the treasurer’s report, commented that this income was only a drop in the bucket to what it might be.

He noted that if a tax of a penny every other week were levied on every radio and tv receiver in the land for the music they provide, this would produce an annual revenue of $100 million. In times of rising costs like the present, he said, ASCAP must always be on the lookout for new sources of revenue. ASCAP President Stanley Adams, however, reported that the television broadcasters, whose ASCAP contracts expire at the end of the year, are more likely to make an effort to get a reduction in the fees they are paying for the use of ASCAP music than to go along with any move to increase them.

A change in the manner of calculating broadcast performance credits, with stations being asked to submit logs to ASCAP for it to use in place of the tapes it now uses, is under consideration, Mr. Adams told the West Coast membership. The change would cut the cost of figuring credits, he said, and also reduce the chance of failure to identify performances properly. Unlike BMI, which already uses logs in the compilation of its performance credits, ASCAP would not notify stations in advance of the time for which they will be asked to supply logs to ASCAP, he stated.

Since Feb. 28, Mr. Adams reported, ASCAP has added 214 writer members and 127 publisher members. Total membership is now 5,556 active writer members and 1,847 active publisher members, plus 669 non-participating writers.

Allied Artists releases 40 post-'50s to tv

The newly formed Allied Artists Television Corp. announced last week that the company is placing into distribution a package of 40 post-1950 feature films, 12 of which are in color.

Robert B. Morin, vice president and general sales manager, said the package includes “The Phoenix City Story,” “Face of Fire” and “Cow Country.” He noted that Allied Artists Television, a wholly owned subsidiary of Allied Artists Corp., is the successor company to Interstate Television Corp., and will handle all series and feature pictures formerly distributed by Interstate.

James C. Stern, formerly with United Artists Associated, last week was appointed central division sales manager for Allied Artists Television Corp. He will locate his headquarters in Chicago.

SESAC’s sports package sells

SESAC Inc., New York, reports that more than 125 radio and tv stations have purchased its “Instant Sports Music” package, which was introduced three weeks ago, for fall sports programming schedules. SESAC is extending its offer of a special package rate of $19.95. The package consists of 10 high fidelity albums containing more than 100 selections of band music for use on scoreboard shows, half-time ceremonies, etc.

CBS Films to syndicate WBBM-TV ‘talk’ program

CBS Films, a tv film syndicator which has made a success of selling off-network comedy shows, is now trying its hand at syndicating a station “talk” show.

The CBS stations Division subsidiary has announced that it is syndicating At Random, a late-night talk program produced by CBS-TV’s owned-and-operated Chicago station, WBBM-TV. The 90-minute weekly show, now in its third year on the Chicago station, has already been sold to six stations. It’s currently programmed at 12:15 p.m. to 1:45 a.m. Saturday-Sunday.

Newspaper columnist Irv Kupcinet is moderator and plays host to celebrated guests who discuss important and lively topics of the day.

CBS Films is offering stations a complete 90-minute video tape version of each program a week after its original showing on WBBM-TV. Stations which have bought the show are KCOP (TV) Los Angeles, WSB-TV Atlanta, KSD-TV St. Louis, WGAN-TV Portland, Me., WTMJ-TV Milwaukee and WFBM-TV Indianapolis. Four of the stations are programming the conversation series instead of their schedule of feature films.

The syndication firm has sold numerous off-network comedy shows in past years. Among its best-sellers are Amos ‘n Andy, Our Miss Brooks, Sergeant Bilko, The Honeymooners, and I Love Lucy. This year, besides At Random, CBS Films has syndicated such backlog programs as December Bride, Angel, Deputy Dawg, and Wanted—Dead or Alive. With the exception of the last named, all are comedy series.

‘Highly mobile’ sales plan at Official Films

Official Films Inc., New York, has a new method of selling its syndicated properties. Each salesman may now attempt to make a sale in any area of the country, not necessarily his own territory.

Seymour Reed, Official Films president, said per-unit cost of sales has dropped in proportion to the amount of sales being made, although over-all sales costs have risen. Salesmen venturing out of their areas coordinate their trips with the company sales manager, Mr. Reed said. He added that as a result of this “highly mobile” operation, sales on its latest programs—Peter Gunn, Yancy Derringer, Mr. Lucky and Wire Service—have risen to a total of 55 markets in the two months they have been in distribution.

Twelve new markets have signed for the series, Mr. Reed said. They are KLZ-TV Denver; WINS-TV Milwaukee, WSM-TV Nashville, WXEX-TV Richmond, WFMJ-TV Youngstown, Ohio; WLKU-TV Green Bay, Wis; WCTV (TV) Tallahassee, KKKT (TV) Colorado Springs, KLAS-TV Las Vegas, KOLN-TV Lincoln, Neb., and WKYT (TV) Lexington, Ky.

INTERNATIONAL

A possible headache from Rome

INTERNATIONAL MEET TO STUDY BROADCASTER PAY TO RECORD MAKERS

A worldwide conference for the international protection of performers, record makers and broadcasters gets underway in Rome Oct. 10 and it could spell trouble for U. S. broadcasters.

The meeting, under the sponsorship of three international organizations, will consider a draft of an international convention drawn up by a group of experts last year. No U. S. broadcaster or representative was present at this preliminary meeting.

The Rome meeting, which will run Oct. 10 to 26, is under the auspices of the International Labor Office, the United Nations Educational, Scientific & Cultural Organization, and the International Union for the Protection of Literary and Artistic Works (Berne Bureau).

Scheduled to attend the conference as the representative of the U. S. broadcasting industry is Robert Evans, CBS attorney. Sydney M. Kaye, chairman of BMI, is scheduled to attend for that organization. Herman Finkelstein will represent ASCAP.

Sticky Clause • Perhaps the most upsetting provision in the draft convention is Article 11. This would require broadcasters to pay record makers for the use of their “phonograms.” This is the term used in the draft meaning phonograph records.

Another provision gives performers the right to prevent the broadcasting or recording of live performances without their consent.

A clause approves the right of record manufacturers to authorize or prohibit the recording of their records either directly or when broadcast.

The draft contains another provision
Brown warns of Canadian-content dangers

Canadian broadcasters were urged by one of Canada's largest advertisers to resist restrictions by regulatory bodies which can alienate station audiences. Donald A. Brown, advertising manager of Colgate-Palmolive Ltd., Toronto, told the French-language radio and television broadcasters: "I am against forcing an audience to listen to substandard juvenile programs because of Canadian content regulations.

Too many Canadian shows fall into this category," he told the French-language Radio and TV Broadcasters Assn., holding its first meeting outside Quebec Province at Toronto Sept. 9-13. "You must give the audience what they want, and make them want what you give them," he said.

Regulations were necessary and often in the best interests of those regulated, but too often the voice of the industry is not heeded by those making the rules, Mr. Brown said. (Radio broadcasting regulations in the program field are currently being revised by the Canadian Board of Broadcast Governors, following public hearings on the subject late in August.)

The French-language broadcasters' meeting was under the chairmanship of D. A. Gourd, CKRN-AM-TV Rouyn, Que. At the business session Henri Audet, CKTM-TV Three Rivers, Que., was elected president and Auriele Pellevier, CHRC Quebec, Que., vice president. Directors elected: Paul L'Anglais, CFTM-TV Montreal; Dumont Lepage, CFRG Gravelbourg, Sask.; Conrad Levigne, CFCL-AM-TV Timmins, Ont.; Raymond Crepeau, CIMS Montreal; and Andre LeCompte, CJBR-AM-TV Rimouski, Que.

which authorizes broadcasters to approve or prohibit the rebroadcast of their broadcasts or recording of their broadcasts.

Hague Meeting Thirty experts participated in the meeting at The Hague.

Canada rep association to release ad figures

For the first time in 35 years since radio became an advertising medium in Canada, accurate figures as to advertising expenditures will be available later this year. The 12 members of the recently-formed Station Representatives Assn. of Canada, Toronto, Ont., have arranged for independent auditing of industry figures. Data from major radio stations placing national business directly rather than through station representatives, is also being obtained. Quarterly and annual figures are expected to be available late in October.

The SRAC is also working on an improved broadcast order form and contract on continuous forms, for possible adoption by all station representatives and advertising agencies. At present only about half the reps and agencies find the standard form suitable to their needs.

New station holdings acquired by Selkirk

Selkirk Holdings Ltd., Edmonton, Alta., recently acquired, for an undisclosed sum, all shares of Interior Broadcasters Ltd., corporate owner of CJIB Vernon, B. C., the Selkirk's annual report states. CJIB owns one-third of CHBC-TV Kelowna, B. C. Both stations have made a profit the past few years. Selkirk Holdings has also increased its interest in CICA Calgary, Alta., and now holds 60% of CFAC Calgary, Alta.

Selkirk consolidated net profit declined from $142,820 last year to $118,720 for the fiscal year ending June 30, 1961. The difference is accounted for by inclusion in last year's earnings of certain non-recurring items. The company is changing its fiscal year to end Dec. 31, and says its outlook for the final half of this year is promising. Selkirk also owns CJOC Lethbridge, Alta., and a share of CILH-TV there. H. E. Pearson, Edmonton, is president, and Gerry Gaetz, managing director.

REPRESENTED NATIONALLY BY HENRY I. CHRISTAL COMPANY

WGY 810 KC, 50 KW
A GENERAL ELECTRIC STATION
ALBANY - SCHENECTADY - TROY

on May 2-20, 1960. They represented 16 countries. From the United States were:

Arthur Fisher, then U. S. Register of Copyrights; Henry W. Wiens, then deputy assistant Secretary of Labor; and Dr. A. Bogsch, legal adviser, U. S. Copyright Office.

Attending The Hague meeting were representatives of the International Federations of Musicians, Actors, Variety Artists, Phonograph Industry, European Broadcasting Union, Film Producers, Literary and Artistic Ass'n., Authors' and Composers', Hotel, Restaurant and Cafe Keepers, and Intellectual Workers.

The president of the 1960 conference was G. H. C. Bodenhausen, The Netherlands; Mr. Wiens was one of the vice presidents.

The draft treaty was circulated among the governments which participated. As of June 21 there had been no reply from the United States. Other comments by governments included:

- The concept of rebroadcasting should be defined to determine whether this means simultaneous relay or deferred relay (Austria).
- The right of phonograph makers to remuneration should be upheld (Czechoslovakia).
- The provision which forbids use of television broadcasting material by third parties charging admission to the public should be reworded to cover users who might derive direct or indirect profit from such viewing (Switzerland).

Names of members of the official U. S. delegation will be known in a week or two.
MORE CANADIAN TV FOR CANADIANS

Regular CBC-TV fall-winter lineup sold out, network says

Ten Canadian-produced shows occupying six hours of network time will be among the weekly sponsored programs to be seen in Canada this fall and winter on the Canadian Broadcasting Corp. television network. Doug Nixon, director of CBC network programming at Toronto, reports sponsorship of all regular programs for sale on network time, with a number of new sponsors for network programs.

Included in the network schedules are a number of United States network shows, as well as U. S. and British film shows.

In addition to the regular evening programs there is a series of special programs. Trans-Canada Telephone System, Montreal, Que., through McKim Adv. Ltd., Montreal, has four such programs scheduled, starting with a 90-minute Canadian-produced Pirates of Penzance operetta on Oct. 2, two Telephone Hour shows from NBC, and a dramatic production Trial by Jury early next year.

Timex Corp. of Canada Ltd., Toronto, has three one-hour network programs coming from ABC, through Ronalds-Reynolds Co. Ltd., Toronto, Ont. Max Factor & Co., Toronto, through James Lovick & Co. Ltd., Toronto, has scheduled Tribute to Jack Benny from CBS on Sept. 27. General Motors Products of Canada Ltd., Toronto, through MacLaren Adv. Co. Ltd., Toronto, has scheduled three CBS programs, Victor Borge Show Sept. 27, Red Skelton Show Nov. 3 and Danny Kaye Show Nov. 6.

Sports Specials • A series of special sports events including football, hockey, and World Series baseball has been sold to a number of sponsors, including Carling Breweries Ltd., Toronto (McKim Adv. and F. H. Hayhurst Co., Toronto); American Motors Ltd., Toronto (McKim Adv., Toronto), British American Oil Co. Ltd., Toronto (James Lovick & Co., Toronto), Imperial Oil Ltd., Toronto (MacLaren Adv. Co., Toronto), Gillette Safety Razor Co. Ltd., Montreal (Maxon Inc., New York), Chrysler Corp. of Canada, Windsor, Ont. (BBDO, Toronto), Dow Brewery Ltd., Montreal (Vickers & Benson Ltd., Montreal), and Imperial Tobacco Co. Ltd., Montreal (Cockfield Brown & Co., Montreal).

Starting Sunday evening, Westminster Paper Co. Ltd., Vancouver, B. C., and Ralston Purina Co. Ltd., Port Credit, Ont. (both through James Lovick & Co., Toronto) sponsor Hazel: General Foods Ltd., Toronto (Baker Adv. Co., Toronto) and Pepsi-Cola of Canada Ltd., Montreal (BBDO, Toronto) sponsor a live Canadian show Parade; Colgate-Palmolive Ltd. (Spitzer, Mills & Bates Ltd., Toronto), Canadian Kodak Co. Ltd., Toronto (Baker Adv. Co., Toronto), and Singer Sewing Machine Co., Toronto (Young & Rubicam Ltd., Toronto) share Ed Sullivan Show; and General Motors of Canada Ltd., Oshawa, Ont. (MacLaren Adv. Ltd., Toronto) sponsors Bonanza.

Monday evening Canadian show Don Messer's Jubilee is shared by Pillsbury of Canada Ltd., Toronto (Leo Burnett Co. of Canada, Toronto) and Massey-Ferguson Ltd. (Needham, Louis & Brorby of Canada, Toronto); General Foods Ltd., Toronto (Baker Adv. Co., Toronto) sponsors Danny Thomas Show; Gillette Safety Razor Co. of Canada, Montreal, and Ford Motor Co. of Canada Ltd., Toronto (Vickers & Benson Ltd., Toronto) share Canadian quiz show Live a Borrowed Life; and the Bob Cummings Show is shared by Sherwin-Williams Co. of Canada, Montreal (Cockfield Brown & Co., Montreal) and Beecham Products Ltd., Toronto (McConnell-Eastman Co. & Co., Toronto).

Tuesday Lineup • Tuesday evening the Garry Moore Show is shared by Procter & Gamble of Canada Ltd., Toronto (Compton Adv. Inc., New York), Coca-Cola Ltd., Toronto (McConnell-Eastman Canada Ltd., Toronto), and Gillette Safety Razor Co. of Canada, Montreal (Spitzer, Mills & Bates Ltd., Toronto); Canadian show Front Page Challenge is sponsored by Lever Bros. Ltd., Toronto (MacLaren Adv. Ltd., Toronto) and Du Maurier Cigarettes Co., Quebec City (Vickers & Benson Ltd., Montreal), with Red Skelton Show sponsored by Ford Motor Co. of Canada, Toronto, and S. C. Johnson & Son Ltd., Brantford, Ont. (Needham, Louis & Brorby of Canada, Toronto).

Wednesday evening Kellogg Co. of Canada, London, Ont. (Leo Burnett Co. of Canada, Toronto) sponsors Huckleberry Hound; Canadian show Playdate is shared by Sterling Drug Mfg. Ltd., Windsor, Ont. (Dancier-Fitzgerald Sample Inc., Toronto), Philips Electronic Industries Ltd., Toronto (Needham, Louis & Brorby of Canada, Toronto), Procter & Gamble Co. of Canada, Toronto (Leo Burnett of Canada, Toronto) and Coca-Cola Ltd., Toronto; Perry Como Show is sponsored by Kraft Foods Ltd., Montreal (J. Walter Thompson Co., Toronto).

Thursday evening My Three Sons is shared by Campbell Soup Co. Ltd., New Toronto, Ont. (BBDO, Toronto), and Carnation Co. Ltd., Toronto (Baker Adv. Ltd., Toronto); The Defenders has as sponsors Sterling Drug Mfg. Ltd., Windsor, Lever Bros. Ltd., Toronto, Texaco Canada Ltd., Montreal (Ronalds-Reynolds, Ltd., Montreal) and Imperial Tobacco Co. of Canada Ltd., Montreal (McKim Adv. Ltd., Montreal).

Friday Schedule • Friday evening the Canadian show Country Hooeydown is shared by S. C. Johnson & Son Ltd., Brantford, Ont., and Beecham Products Ltd., Toronto; Car 54 Where Are You? has as sponsor Procter & Gamble of Canada Ltd., Toronto; Canadian program Tommy Ambrose Show is for General Motors of Canada Ltd., Oshawa, Ont., and Perry Mason is shared by Gillette Safety Razor Co. of Canada Ltd., Montreal, Kimberly-Clark Corp. of Canada Ltd., Toronto (Spitzer, Mills & Bates Ltd., Toronto), Sterling Drug Mfg. Ltd., Windsor, and Noxema Chemical Co. of Canada Ltd., Toronto (Young & Rubicam Ltd., Toronto).

Saturday evening starts with Dennis the Menace sponsored by Kellogg Co. of Canada Ltd., London, Ont., and an unnamed advertiser; Canadian Hockey is for Imperial Oil Ltd., Toronto; Canadian show Juliette is shared by Imperial Tobacco Co., Montreal, and Procter & Gamble Co. of Canada, Toronto; Canadian sports commentary King Whyte Show is sponsored by American Home Products Ltd., Toronto (Young & Rubicam Ltd., Toronto).
Abroad in brief...

'Down Under' upswing • Fremantle International, New York, reports the company has completed sales totalling more than $250,000 in Australia and New Zealand over the past three months. Robert Laphrone, Fremantle's director of operations in that area, has sold The Beachcomber series, Time Out For Sports series, and various five-minute programs in Australia. In New Zealand, he has sold Silents Please, Royal Canadian Mounted Police, Wonders of the World and Cartoon Classics.

Joiners • Eleven Canadian tv stations have joined TVb of Canada, newly formed television bureau. They are CKVR-TV Barrie, Ont.; CJAY-TV Winnipeg, Man.; CKCK-TV Regina, Sas.; CFPL-TV London, Ont.; CION-TV St. John's, Nfld.; CHBC-TV Kelowna, B.C.; CFCL-TV Timmins, Ont.; CJLH-TV Lethbridge, Alta.; CHAB-TV Moose Jaw, Sas.; CFQC-TV Saskatoon, Sas., and CKBI-TV Prince Albert, Sas.

Changing hands • CFBC Saint John, N. B., is being sold for an undisclosed price to a group of local businessmen, subject to approval by the Board of Broadcast Governors, at its next meeting at Montreal. New owners are James H. Turnbull, A. Norwood Carter and James McMurray. Station manager is R. T. Bowman.

Y&R merge • Young & Rubicam, New York, reports it has merged its Latin American companies with Noble Adv., Mexico City, to form Young & Rubicam Noble. The consolidation involves some 45 clients of Y&R offices in San Juan, Caracas, Mexico City, and Noble offices in Mexico City and San Salvador. Edward J. Noble, president of Noble Adv., becomes a vice president of Young & Rubicam, New York, and president of Young & Rubicam Noble.

Am-fm ban lifted

Early next year the Board of Broadcast Governors will hear applications for new Canadian radio stations, both am and fm, in the eight major markets where second television stations have begun operations in the past twelve months. The BBG is lifting its ban on new am and fm stations for Halifax, Montreal, Ottawa, Toronto, Winnipeg, Calgary, Edmonton and Vancouver.

Its first 1962 meeting will hear applicants for stations in eastern Canadian cities, its second meeting for those west of the Great Lakes area.

Spots with name stars tell advertising's role

The radio industry's promotion of advertising's role in the U. S. economy, in cooperation with Advertising Federation of America and the Advertising

at WGY...

being listened to rather than just being heard is the difference between selling and not selling. People listen to WGY because they like WGY PERSONALITY PROGRAMMING. CHRISTAL COMPANY WGY 910 KC, 50 KW A GENERAL ELECTRIC STATION ALBANY • SCHENECTADY • TROY

Assn. of the West, has been supplemented by distributions to stations of a special recording of 14 messages by nine radio stars this month. Earlier this year the radio campaign committee distributed 3,000 live scripts, compared to a total of 669 scripts in 1960.

The AFA announced that the Advertising Recognition Program has enjoyed the widest participation and the best cooperation in the more than 10-year history of the old Advertising Week campaign. The program has gained impetus by new injections of life which the tv, radio and newspaper industries have given this "bread and butter" educational effort this summer. AFA reported that network tv stations are now carrying the messages dozens of times each month, many of them in prime time, while new ads are being readied for newspapers and radio for coverage in depth.

Drumbeats...

KCBS survey • To find out the pulse-beat of its audience about various subjects, KCBS San Francisco last week invited listeners to mail in cards in response to a question read on the air. The question will be repeated several times during the week with replies due at midnight Friday. They will be analyzed on the News Conference on Monday.

Sun-tagger • Members of the American Society of Travel Agents and promotion managers of ABC-TV affiliates will combine efforts in a series of promotions for Follow the Sun, new hour-long dramatic series which started Sept. 17 (Sun., 7:30-8:30 p.m. EDT). Travel contests, displays in travel agencies and studios and tv interviews are a few of the planned local promotions. The series stars Brett Halsey and Barry Coe as two free-lance magazine writers in Hawaii.

Fair winners • KNTV (TV) San Jose, Calif., conducted a Match the Badge contest at the Santa Clara County Fair, coinciding with its live and direct telecasts at the fair. Duplicate badges were passed out to different people. If they found each other, they became winners—and recipients of General Electric appliances as prizes.

Treasury workers • Bullwinkle J. Moose and Rocky Squirrel, stars of NBC-TV's animated color cartoon series, The Bullwinkle Show (Sun., 7-7:30 p.m. EDT), last week launched the 1961 school campaign for U. S. Savings Stamps. Bill Scott and Jay

FANFARE

Big show ad

What is claimed to be one of the largest advertisements ever devised for a tv show heralds Walt Disney's new NBC-TV color series, Wonderful World of Color.

Eastman Kodak Co., alternate sponsor of the series (with RCA), is devoting its giant "Colorama" in the east balcony of New York's Grand Central Terminal to a picture of a family watching Mr. Disney and his new character Ludwig Von Drake on tv. The 16x60-foot transparency will be on display through Oct. 9, Wonderful World of Color, (Sun., 7:30-8:30 p.m. EDT) began yesterday (Sept. 24).
A “qualitative” research profile of KRON-TV San Francisco—and tv in general—has been conducted for the station by Dr. Ernest Dichter, president of the Institute of Motivational Research (Croton, N. Y.).

The study was shown in slide presentation form for agencies in New York for the first time last week.

Among the findings: an emotional disturbance which tv causes among viewers of programs (tv appears to be “best liked” and “least respected” of all media), that is, a gap between what’s believed popularly as the medium’s potential and the actual viewer “fulfillment.”

Dr. Dichter also reported that much of the “disturbed tv climate” comes from a combination of “taste-fatigue” (too much similarity in program types), and what he calls an appeal in level, to the “lowest tv denominator”).

KRON-TV got a favorable response among San Franciscans because of its national and local “bi-dimensional nature”; its excellence in news and informational programming, and as an outlet carrying commercials which are better than the average.

Dr. Dichter in his study, the second he’s made public in many years (the first such report about three years ago concerned the image of CBS-TV outlets on the west and east coasts), claimed a shift in attitude toward tv commercials. Many viewers regard several commercials with greater interest and a more positive response than even programs themselves.

Among the criteria which upgrade tv commercials as a group on a given station: are helpful, engage interest of the viewer, are cute and clever, exhibit good taste, give information about new products, and existing brands and products. It helps, too, if brands have a “good reputation.”

Dr. Dichter maintains that a commercial’s “acceptability” hinges on its “ingenuity” (extent people like it), and the extent to which pleases the viewer (and doesn’t “insult” his intelligence). He warns that many commercials within one advertiser category are becoming “indistinguishable” as imitation increases after an initial success. People, he said, don’t “hate” advertising on tv, but want “better” commercials.

Miami station promotes show on D.C. television

WTVJ (TV) Miami has mailed 1,600 invitations to key government, station and network officials in Washington, calling their attention to the premiere of Look at America, a new public affairs series that debuts on WTTG (TV) Washington, Oct. 1 and features the award-winning documentary, “The Plight of Pepito,” produced by WTVJ.

Look at America will feature outstanding public-affairs efforts of various stations throughout the country. It was designed by WTTG as a vehicle by which lawmakers and other interested bodies in Washington could have a first-hand view at the local program fare being produced elsewhere.

“The Plight of Pepito” was originally shown by WTVJ on July 27 and repeated last month. It also has been selected by the U. S. Information Agency for showing in Central and South America.

The program is a report on the problems of Cuban exiles in South Florida, prepared with the specific intention of creating understanding in their behalf.

Charles Strother, tv producer and director of Leo Burnett, Chicago, joins MGM Telestudios, New York, as staff producer. Firm produces commercials on video tape.

Herbert Westphalen, manager, marketing research division, Lennen & Newell, New York, named research account supervisor. Harry Dale, marketing research project director, succeeds Mr. Westphalen, and Marvin Grant, research department, J. Walter Thompson, that city, from 1959-1961, rejoins L&N as research account supervisor. Mr. Grant previously served as project director, marketing research division at L&N.

Ann del Valle, publicity director of March of Dimes tv film The Scene Stealers, and pr director for late Cecil B. DeMille, joins Helen Morgan Co., New York public, press and stockholder relations firm, as partner.

D. Jack Jordan appointed account executive at Tracy-Locke Co., Dallas-based advertising agency.

William G. Bess, most recently on creative staff of Erwin Wasey, Ruthrauff & Ryan, appointed senior creative writer in Los Angeles office of Donahue & Coe.

Louis Dorkin, account executive, Diamond-Fisher-Sample, New York, elected vp of agency. Mr. Dorkin joined D-F-S in 1953 as member of media department and was named account executive in 1957.

Wallace A. Ross, director of American TV Commercials Festival and film industry consultant named to minority capacity by U. S. Tele-Service Corp., N. Y., tv monitoring service which provides clients with "Photo-Scripts," re-productions of tv commercials from film, tape, kinescope recordings or off-the-air. Mr. Ross will assist in development of new uses for "Photo-Scripts."

William Lynn, program director and supervisor, ABC-TV, Hollywood, joins Young & Rubicam, New York, as radio-tv supervisor.

Jack Sherry, audience promotion director of WKY-TV Oklahoma City, named copy chief of Ackerman Assoc., Oklahoma City advertising and pr firm.

Bob Zschunkle promoted to assistant director and media department administrative manager for Campbell-Mithun. He will continue to function as top media planner for all Pillsbury products. Frank Rolfe, associate media director for Pillsbury products, promoted to supervisor of all time buying for C-M.

Jack E. Rice Jr., vp in charge of new business development, Cunningham & Walsh, New York, elected senior vp. Mr. Rice joined C&W in 1955 as account supervisor on Jaguar car account. Previously, Mr. Rice was advertising director, foreign products branch, Ford Motor Co.

James R. Cronin, copy supervisor of Campbell-Mithun, named radio-tv director of Lilienthal & Co., Chicago advertising agency.

Richard L. Thompson, advertising manager of Western Condensing Co., Appleton, Wis., which has since become industrial division of Foremost Dairies of San Francisco, joins Chicago office of Clinton E. Frank as account executive.

Jimmie Fritz, vp of Roche-Eckhoff & Assoc., resigns to accept position with Langendorf Bakeries as director of merchandising for southern area.

John L. Gwynn, vp and media director of Erwin Wasey, Ruthrauff & Ryan, Chicago, appointed to new post of media director of agency's central division.

THE MEDIA

Robert L. Dudley, station relations and sales development director, The Meeker Co., tv-station representative, New York, elected vp.

Merrill Pietila, formerly with Adam Young, appointed general manager of San Francisco office of California Spot Sales Ltd., west coast radio-station representative.

Kenneth Beachboard resigns as manager of WFBC-TV Greenville, S. C. Wilson C. Warn, executive vp of parent corporation, will assume vacated post.

Charles L. Bennis, manager, radio recording, NBC New York, also named director, radio network operations.

Harold D. Colli-priest, general sales manager of KLUB Salt Lake City, named manager of KCPL, that city. Mr. Colli-priest started his career in radio as production and continuity director of KLUB and later moved into sales department as account executive.

John DeMarco, program director of KGMB Honolulu, promoted to station manager. He will be succeeded by John Henry Russell who had served as air personality at station.

Robert H. Silverman, 11-year veteran of fm broadcasting in New York, named station manager of WFTM (FM) Lake Success, N. Y., which is expected to start operations in October. Owned and operated by Friendly Frost Broadcast Div., Westbury, N. Y., station is reportedly first in U.S. to be built from ground up specifically for stereo fm (BROADCASTING, Aug. 7). Mr. Silverman, who was sales manager of WBAI-FM New York for five years, last year helped organize WABC-FM New York. He began career in 1950 with WABF-FM and in 1952 joined WQXR, both New York, as account executive.

Bruce E. Haight, financial planning
Hartenbower named

E. K. Hartenbowner, KCMO
Kansas City, named chairman of
board of CBS Radio Affiliates
Assn. last week at organization's
eighth annual convention (see
page 38). He succeeds John S.
Hayes of Post-Newsweek sta-
tions. Larry Haeg, WCCO Min-
neapolis, was elected vice chair-
man, and Joe L. Smith Jr., WJLS
Beckley, W. Va., secretary-treas-
urer. F. Ernest Lackey, WHOP
Hopkinsville, Ky., and Wester-
man Whillock, KBOI Boise, Id-
a, were named to join Messrs.
Hartenbower, Haeg and Smith on
the executive committee. Michael
R. Hanna, WHCU Ithaca, N. Y.,
Robert McConnell, WISH Indi-
anapolis, and Messrs. Whillock
and Smith were named to the
committee to arrange next year's
convention. Other members of
the board are J. Frank Jarman,
WDNC Durham, N. C., Joseph
K. Close, WKNE Keene, N. H.,
and F. C. Sowell, WLAC Nash-
ville, Tenn., who were in charge
of the 1961 convention arrange-
ments; A. R. Hebenstreit, KGGM
Albuquerque, N. M., and Wend-
dell Adams, KINS Eureka, Calif.

Jerry Kunkel, assistant program
manager of WKY Oklahoma City,
named program director of KTRN
Wichita Falls, Tex. He replaces
Joe Henderson, who resigned.

Carol Hart joins WEJL Scranton,
Pa., as music director.

Tom Bennett, formerly program
manager of KDKA Pittsburgh, and
production manager of U. of Detroit
radio staff, named director of radio
program service of U. of Detroit
public information department.

Duane Harm, assistant sales man-
ger, ABC-TV Chicago, joins sales
staff, Avery-Knodel, station repre-
sentative, that city.

Ronald A. Rogers and Vernon Enlow
join KERA-TV, Dallas educational sta-
tion, as directors. Mr. Rogers formerly
served as production assistant and
news-film supervisor for CBS-TV and
Mr. Enlow was salesman of KVEK-
TV Clovis, N. M. Also joining station
staff is Ronald E. Green, who was
named production supervisor. He had
previously served as technical director
of KUON-TV Lincoln, Neb.

Al Cahill, program director of
WPTZ (TV) Plattsburgh, N. Y., joins
WAST (TV) Albany, N. Y., as sports
director and air personality.

Walter Carlin joins production staff,

WNYY New York.

John J. Magan, radio sales staff, Avery-Knodel, station representative, New York, joins WNBC, that city, in similar capacity.

GOVERNMENT

Edwin R. Bayley, information director for Peace Corps, appointed special assistant in White House News Office. He will be in charge of development of special projects, such as long-term projects involving TV and magazines. He will also represent News Office on various informal interdepartmental committees dealing with information.

Jack Melville Whitney II, partner in Chicago law firm of Bell, Boyd, Marshall & Lloyd, named member of Securities and Exchange Commission by President Kennedy. Mr. Whitney, whose appointment was confirmed by Senate last Friday, succeeds Earl F. Hastings for remainder of term expiring June 5, 1964.

D. Brainerd Holmes named head of $20 billion manned space flight program to moon and planets. Appointment was announced by Space Administrator James E. Webb last week. Mr. Holmes, who will take his new post Nov. 1, is general manager of RCA's Major Defense Systems Division and before that was RCA project manager for ballistic missile early warning system.

Louis C. Stephens, chief attorney of FCC's Rules & Standards Div., Broadcast Bureau—and principal draftsman of significant FCC orders in recent years (pay TV, clear channels, allocations)—went on leave pay Sept. 21. He is joining in legal capacity Urbanizadora S.A., Guatemala City. Company is engaged in construction of public housing in Latin America.

PROGRAMMING

William M. Wolfson, treasurer and most recently vp, Independent Television Corp., New York, resigns to accept post of vp, M. A. Gordon & Co., financing firm. Mr. Wolfson joined Television Programs of America, New York, in 1956 (company ITC acquired from Mr. Gordon in 1958) as controller and subsequently treasurer.

Gene Tunick, eastern district manager, United Artists Corp., New York, succeeds Milton E. Cohen as eastern and Canadian division manager. Mr. Cohen was named national director, roadshow sales.

Bert Weiland, eastern division sales manager and midwest division manager, Independent Television Corp., New York, appointed general manager, syndication sales, and A. J. Torregrossa, sales service manager, named administrative assistant for sales. Pierce V. S. Smith; Wilfred Guenther; James R. Deitsch, and Harold Winther, all with Ziv-UA, join ITC as account executives.

Michael R. Santangelo, director of pr and special events for Westinghouse Broadcasting Co. since 1957, named assistant to Richard M. Pack, vp-programming. In last few years, Mr. Santangelo has served programming department on contributory basis for such projects as "Reading Out Loud, Benny in Brussels, and PM West."

EQUIPMENT & ENGINEERING

P. B. (Pincky) Reed, RCA vp in Washington in charge of government relations in electronic data processing, last week was transferred to RCA Electronic Data Processing plant at Cherry Hill, N. J., as division vp, special international accounts. He will report to E. S. McCollister, division vp, marketing. Mr. Reed, a quarter century veteran with RCA, had served in Washington for two and one-half years.

Harry L. Atkinson, manager, marketing operations, RCA Sales Corp., Indianapolis, appointed to newly created post of manager, business planning.

ALLIED FIELDS

Roy Whisnand, recently resigned vp of Plough Broadcasting Co. and general manager of WCBP Boston, moves to presidency of his own company, Whizzer Enterprises, and announces formation of Coupon Jamboree with offices in Statler Office Building Boston. Coupon Jamboree is campaign providing built-in bonuses of selective couponing, audience contest participation and personalized advertiser jingles to be sold throughout U. S. and Canada.

DEATHS

Harry K. O'Neil, 67, member of Tobias, O'Neil & Gallay, Chicago, died Sept. 12 in VA Research Hospital, Chicago.

decision looked toward this action. Action Sept. 14.

Announcement of these preliminary steps does not constitute commission action in such cases, but is merely announcement of proposed disposition. Commission reserves right to reach different result upon subsequent adoption and issuance of formal decisions.

INITIAL DECISIONS

■ Hearing examiner Annie Neal Hunting issued decision of May 17, 1959, disallowing following applications to increase daytime power from 400 kw. to 1 kw., continued operation on 1400 kw., 250 w.-N. of Associated Beasts, Inc. (WZST) Easton, Pa.; Belvedere Best, Corp. (WWIN) Baltimore, Md.; South Jersey Radio Inc. (WOND) Pleasantville, N. J.; WYQA in having examiner file. Pa.; Kendirk Best, Inc. (WJGB) Harris- burg, Pa., and Scranton Radio Corp. (WICK) Scranton, Pa., each with alternative condition; also waiver of Sec. 3.188 (TTK) in considering complaint.

Action Sept. 20.

■ Hearing examiner William F. French issued initial decision looking toward granting application of Cosmopolitan Bestg. Corp. (WBGR) Wilkes-Barre, Pa., to operate on 105.9 mc; ERP 3.01 kw; ant. height 388 ft. in Newark, N. J. Action Sept. 19.

■ Hearing examiner James D. Cunningham issued his initial decision in Orlando, Florida. Sept. 9 tv proceeding which was remanded to commission on May 21, 1959 by United States Court of Appeals, Ninth Circuit.

■ By memorandum opinion and order, commission denied petition for reconsideration of decision of April 24, 1959, granting construction permit to do work on its 100 kw. station in Ashtabula, Ohio. By Mr. Bryant, for reconsideration of denial of its petition for reconsideration of its 1 kw. station at Terre Haute, Indiana.

By memorandum opinion of June 7, 1959, granting permission to Bell Telephone Co. to add a small new station in New York City under its common carrier permit. Action June 12.
prejudice to ch. 24 proposal. In view of outstanding proposal in Doc. 14229 to alter method of determination, the commission did not propose to make suggested ch. 24 changes. A poll was taken, and Wilkes-Barre, to extent that they are affected by this proceeding, can be met. Commissioner Boston requested that the Anscome's request for show-cause order to be continued to Sept. 15, hearing from ch. 56 to ch. 24, but will deal with that matter at time of final decision. Since Binghamton has no border with Canadian border, appropriate steps under Canada-U.S. tv provisions are understood to be taken. At same time, commission dismissed earlier petition by Mr. Anscome to substitute ch. 24 for ch. 56 at Binghamton. Ann. Sept. 29.

Question has arisen with respect to Nov. 1, 1961, to remove and replace board's order of Sept. 13, 1961 which amended Sec. 1.509(1) of pregrant procedure rules to require that (1) all parties file, on or before Sept. 19, petitions to deny broadcast applications must be filed within 30 days after issuance of public notice of acceptance of application for filing. Whether petition to deny is timely filed will be determined by provisions of Sec. 1.509 in effect when petition is filed and irrespective of when application was filed. Amendments became effective Nov. 1, 1961 as to all applications which are filed on or after Nov. 1, 1961 will be timely if filed no later than 30 days after issuance of public notice of acceptance for filing. Petitions to deny filed prior to return of applications if commission has not granted application or designated it for hearing, and if it is not an application of the so-called "cut-off" date and "cut-off" date has passed. Ann. Sept. 29.

By order, commission granted requests by American Bestco, Co. and Goodwill Stations, Inc. to Sept. 29 time filing responses to petitions filed on or before Sept. 19, 1961 for reconsideration of proceedings on interim policy on vhf channel assignments and amendment of Part 3 of rules concerning engineering standards. Extending actual band to existing vhf bands, including WIS, Bookfoord, Ill.; Hartford, Conn.; Erie, Pa.; Binghamton, N.Y.; Champaign, Ill.; Columbus, Ohio; and Montgomery City, Ala. petition for additional vhf channel to Oklahoma City, Okla.; Jackson, Miss.; Binghamton, N.Y.; Dayton, Ohio; Jacksonville, Fla.; Birmingham, Ala.; Knoxville, Tenn.; and Charlotte, N.C. Action Sept. 14.

**ACTIONS ON MOTIONS**

By Hearing Examiner Charles J. Frederick

On or about the time that hearings were held, October 18, 1965, the application of Licensee of KUOM, 1270 kHz, and WHOI (FM), 90.9 kHz, was granted, for the purpose of authorizing the operation of a new station at Bismarck-Mandan, N. Dak.

By Hearing Examiner Millard M. French

• Granted in part motion by Allen T. Simmons, Inc., party in proceeding on an amended application for a new station at Fredericktown, Mo., by and WHOI (FM), 90.9 kHz, of St. Paul, Minn., to be operated by and WHWH, Inc.

• On own motion and with consent of parties, continued Sept. 18, 1965, prehearing conference to Sept. 29, 1965, continuing in session, on an application for a new station at Doty, Wis.

• Granted in part motion by WSKY, 780 kHz, of Syracuse, N. Y., for leave to amend its application for a new station at Willoughby, and to reopen the proceedings on the application.

• On or about the time hearings were held, October 12, 1965, the application of WWSR, 1540 kHz, of Rensselaer, Ind., to be operated by WWSR, Inc., was granted, for the purpose of authorizing the operation of a new station at Rensselaer, Ind.

• Granted in part motion by RTCP, Inc., party in proceeding on an amended application for a new station at Wheaton, Ill., by and WDRM, 1370 kHz, of Wheaton, Ill., to be operated by WDRM, Inc.

• On or about the time hearings were held, October 29, 1965, the application of WYVL, 1360 kHz, of Butler, Pa., to be operated by WYVL, Inc., was granted, for the purpose of authorizing the operation of a new station at Butler, Pa.

By Hearing Examiner William B. Guenther

• On or about the time hearings were held, October 16, 1965, the application of WZMN, 1550 kHz, of West York, Pa., to be operated by WZMN, Inc., was granted, for the purpose of authorizing the operation of a new station at West York, Pa.

• Reopened record in proceeding on an application for a new station at Hopi, Ariz., by WHUZ, Inc., to be operated by WHUZ, Inc.

• Granted in part motion by WPIC, 1560 kHz, of Peoria, Ill., for leave to amend its application for a new station at Willoughby, Ohio, to show that the proposed station would serve the public interest, convenience and necessity.

By Hearing Examiner Arthur H. Halpin

• Granted in part motion by WQVY, 1510 kHz, of Auburn, N. Y., for leave to amend its application for a new station at Fort Payne, Ala., and to reopen the proceedings on the application.

• On or about the time hearings were held, November 9, 1965, the application of WQVY, 1510 kHz, of Auburn, N. Y., to be operated by WQVY, Inc., was granted, for the purpose of authorizing the operation of a new station at Fort Payne, Ala.

• On or about the time hearings were held, October 21, 1965, the application of WQVY, 1510 kHz, of Auburn, N. Y., to be operated by WQVY, Inc., was granted, for the purpose of authorizing the operation of a new station at Fort Payne, Ala.

• On or about the time hearings were held, October 26, 1965, the application of WQVY, 1510 kHz, of Auburn, N. Y., to be operated by WQVY, Inc., was granted, for the purpose of authorizing the operation of a new station at Fort Payne, Ala.

• On or about the time hearings were held, November 11, 1965, the application of WQVY, 1510 kHz, of Auburn, N. Y., to be operated by WQVY, Inc., was granted, for the purpose of authorizing the operation of a new station at Fort Payne, Ala.

By Hearing Examiner Albert A. Katz

• Granted in part motion by WSB, 750 kHz, of Atlanta, Ga., for leave to amend its application for a new station at Duluth, Minn., and to reopen the proceedings on the application.

• Granted in part motion by WSB, 750 kHz, of Atlanta, Ga., for leave to amend its application for a new station at Duluth, Minn., and to reopen the proceedings on the application.

• Granted in part motion by WSB, 750 kHz, of Atlanta, Ga., for leave to amend its application for a new station at Duluth, Minn., and to reopen the proceedings on the application.

• Granted in part motion by WSB, 750 kHz, of Atlanta, Ga., for leave to amend its application for a new station at Duluth, Minn., and to reopen the proceedings on the application.

• Granted in part motion by WSB, 750 kHz, of Atlanta, Ga., for leave to amend its application for a new station at Duluth, Minn., and to reopen the proceedings on the application.

By Hearing Examiner Stanley L. Krockford

• Reopened record in proceeding on an application for a new station at New York, N. Y., by WOR, 1070 kHz, of New York, N. Y., for leave to amend its application for a new station at New York, N. Y., and to reopen the proceedings on the application.

• On or about the time hearings were held, November 3, 1965, the application of WOR, 1070 kHz, of New York, N. Y., to be operated by WORAM Broadcasting Corp., was granted, for the purpose of authorizing the operation of a new station at New York, N. Y.

• On or about the time hearings were held, November 3, 1965, the application of WOR, 1070 kHz, of New York, N. Y., to be operated by WORAM Broadcasting Corp., was granted, for the purpose of authorizing the operation of a new station at New York, N. Y.

• On or about the time hearings were held, November 3, 1965, the application of WOR, 1070 kHz, of New York, N. Y., to be operated by WORAM Broadcasting Corp., was granted, for the purpose of authorizing the operation of a new station at New York, N. Y.

• On or about the time hearings were held, November 3, 1965, the application of WOR, 1070 kHz, of New York, N. Y., to be operated by WORAM Broadcasting Corp., was granted, for the purpose of authorizing the operation of a new station at New York, N. Y.

• On or about the time hearings were held, November 3, 1965, the application of WOR, 1070 kHz, of New York, N. Y., to be operated by WORAM Broadcasting Corp., was granted, for the purpose of authorizing the operation of a new station at New York, N. Y.

ANNOUNCERS

Radio Announcer Not Wanted!

We want a personality instead. He is bright and lively, but not a screamer. He has a personality of his own. He loves gimmicks and contests, and he may have a file of gags and comedy material. He will develop his own music formula, and he will demonstrate exceptional ability on remotes and personal appearances. Above all, he can sell! This man will push his tape and resume to: WLEI P.O. Box 8765, Richmond, Virginia.

P.S. We have the number one rating. Do you?

SITUATIONS WANTED

Production—Programming, Others

SALES ENGINEERS WANTED

Immediate opportunity for sales engineers to manage broadcast equipment sales in various territories. The main requirement is a broad background in radio combined with some sales experience. Also, must be aggressive, responsible and with a deep desire to sell equipment. Excellent starting salary with an attractive incentive program and all travel expenses paid.

Opening also available in home office sales staff preparing technical proposals for men who want to sell but cannot travel.

Become part of the dynamic expanding sales organization of a nationally known electronics manufacturer. Send resume immediately to Box 241H, BROADCASTING.

BROADCAST SALES ENGINEERS WANTED

INSTRUCTIONS—(Cont'd)

Announcing programming, console operation. Twelve weeks intensive, practical training. Finest, most modern equipment available. G. L. approved. Elkins School of Broadcasting, 2603 Inwood Road, Dallas 35, Texas.

MISCELLANEOUS

"Deejay Manual," a complete gagfile containing ad libs, bits, gimmix, letters, patter $2.00. Show Biz Comedy Service, 65 Parkway Court, Brooklyn 35, N.Y.

25,000 professional comedy lines, routines, ad libs. Largest laugh library in show business. Special monthly topical service featuring deejay comment, introductions. Free catalog. Orben Comedy Books, Hewlett, N.Y.

Announcers

Radio Announcer Not Wanted! We want a personality instead. He is bright and lively, but not a screamer. He has a personality of his own. He loves gimmicks and contests, and he may have a file of gags and comedy material. He will develop his own music formula, and he will demonstrate exceptional ability on remotes and personal appearances. Above all, he can sell! This man will push his tape and resume to: WLEI P.O. Box 8765, Richmond, Virginia.

P.S. We have the number one rating. Do you?

Moving?

Send for Booklet

A free, 16-page booklet prepared by Burnham Van Service, Inc. can give you helpful, work-saving, cost-saving pointers on how to organize your move from city to city when you change jobs. How to prepare to move, tips on packing, a helpful inventory checklist of things to do are among the topics included. Write for your free copy. No obligation. Chuck Swann, Burnham Van Service, 1634 Second Avenue, Columbus, Georgia.

In carrying out the administrative pro-
grame, the chairman will designate an officer or em-
ployee of the commission who will promptly investigate 
in which it appears that employees may have engaged in 
conflict of interest. Such invest-
igation will be initiated in all cases 
where there is reasonable cause to suspect 
that an employee has engaged in 
such an activity. In those cases where 
investigation is not expected to result 
in the confirmation of an employee's 
conflict of interest, the employee may apply in writing 
for a determination that his employment shall 
not be regarded as a conflict of interest, and his 
employment shall be regarded only as 
consistent with his duties and responsibilities. It is, therefore, 
expected that employees of the commission 
will comply with the following general 
standards:

A. General Standards of Conduct

Employees shall conduct themselves in such a manner that the 
commission is effectively accomplished and shielded from improper 
conduct that may impair the authority and responsibilities. It is, therefore, 
expected that employees of the commission 
will comply with the following general standards:

B. Use of Federal Property

Employees may not use federal property of any kind for other than officially 
authorized purposes, and are responsible for protecting and 
conserving all federal property, including equipment and supplies, which is entrusted to their care.

C. Disclosure of Information

Except as specifically authorized to do so, an employee may not, directly or indirectly, make public or permit others to make public any information,
which he or she has knowledge of or which comes into his possession as a result of his official duties or responsibilities.

III. Conflicts of Interest

A conflict of interest is defined as an interest which is substantially 
differing from, and interfering with, the interests of the commission.

A. General

However, employees who are engaged in private business or professional 
activities, and who are prohibited from doing so. It is also important to note that employees are prohibited from engaging in any activity which may impair the authority and responsibilities of the employee or the commission. In particular, employees are prohibited from making public or permitting others to make public information which he or she has knowledge of or which comes into his possession as a result of his official duties or responsibilities. It is, therefore, expected that employees of the commission will comply with the following standards of 

b. Use of Federal Property

Employees may not use federal property of any kind for other than officially 
authorized purposes, and are responsible for protecting and 
conserving all federal property, including equipment and supplies, which is entrusted to their care.

C. Disclosure of Information

Except as specifically authorized to do so, an employee may not, directly or indirectly, make public or permit others to make public any information,
which he or she has knowledge of or which comes into his possession as a result of his official duties or responsibilities.

III. Conflicts of Interest

A conflict of interest is defined as an interest which is substantially 
differing from, and interfering with, the interests of the commission.

A. General

However, employees who are engaged in private business or professional 
activities, and who are prohibited from doing so. It is also important to note that employees are prohibited from making public or permitting others to make public information which he or she has knowledge of or which comes into his possession as a result of his official duties or responsibilities. It is, therefore, expected that employees of the commission will comply with the following standards of 

b. Use of Federal Property

Employees may not use federal property of any kind for other than officially 
authorized purposes, and are responsible for protecting and 
conserving all federal property, including equipment and supplies, which is entrusted to their care.

C. Disclosure of Information

Except as specifically authorized to do so, an employee may not, directly or indirectly, make public or permit others to make public any information,
which he or she has knowledge of or which comes into his possession as a result of his official duties or responsibilities.

III. Conflicts of Interest

A conflict of interest is defined as an interest which is substantially 
differing from, and interfering with, the interests of the commission.
All about time... in 12 hours

Involved in time buying?
Broadcast sales? Traffic? Work in New York for a rep, network, agency or advertiser?

Chances are you’ve got problems. We’ve got answers—in the 1961-’62 Time Buying and Selling Seminar. The new TB & SS is “all about time.” It’s a one-of-its-kind, 12-hour course in the business side of broadcasting, designed to help make your work easier and provide the know-how that can mean faster advancement.

Curriculum: Covers everything from the basics to the nuances of time buying and selling.

Sessions: Eight, 5:30 to 7:00 p.m., every Tuesday starting October 24. Instructors: Eight industry executives representing advertiser, rep, agency and network operations.

Enrollment is limited to 50. So use the coupon below today to reserve your place. (The check you send is tax-deductible. But then it’s probably also a step toward a higher tax bracket.)

If you prefer to first see a program listing the Seminar subjects, call Claude Barrere, Radio and Television Executives Society, PL 8-2450.

Enroll me immediately in the 1961-’62 RTES Time Buying and Selling Seminar (Fee: $15)

BROADCASTING, September 25, 1961
OUR RESPECTS to Adrian Daniel Woolery, president, Playhouse Pictures

Animated commercials are tv's best cartoons

The finest form of tv cartooning is the animated commercial, according to Adrian Woolery, president of Playhouse Pictures. Properly planned and executed, the animated commercial has amused many a viewer into action that has rung many a dealer's cash register and set sales records for many delighted advertisers. But the tv cartoon program is something else again, and generally something inferior, Mr. Woolery believes. The demands of television for program material are so great and the price the medium is willing to pay for programs so small that it's impossible for a conscientious cartoon producer to turn out the footage that is called for without sacrificing either quality or solvency.

"For the present, at least, the theatre offers greater rewards, artistically as well as financially, to the animated cartoon producer," Mr. Woolery said last week. "So, if Playhouse Pictures gets into the field of pure entertainment—and we have a couple of ideas that may be worth developing—our efforts will be aimed at theatrical exhibition. Our television output will continue to be animated commercials."

Honest Pride • There was no note of apology in his reference to commercials, no hint that these tv sales spots are in any way inferior to the programs they adjoin. And it would never occur to Ade Woolery that there should be. Like any other businessman with a good product, he is proud of the work his company turns out, proud of the fact that in the past five years Playhouse commercials have won well over 100 awards and citations in national and international competitions, proud that they have produced enviable sales results from their sponsors, who return season after season, asking Playhouse Pictures for more of the same.

For Adrian Daniel Woolery is a businessman. Sober in expression and conservative in dress, he might be a successful banker, retailer or professional man. His business is located in Hollywood, but there is no Hollywood touch to his personality. His product is artistic, but there is nothing arty about the man himself. "I have no artistic talent," he freely confesses, "nor even any artistic leanings. My function is the usual management function of making decisions about what we're going to do and how it's going to be done, then hiring the right people for the job. If a decision is needed, it's up to me to make it, but that's the extent of my creative contribution."

How did Ade Woolery come to be mixed up in an essentially artistic business? A school chum of Ade's wife had married a nephew of Walt Disney and they came to visit the Woolerys in Seattle. The nephew talked about the opportunities Disney offered a bright young man; Ade indicated he might be available and two weeks later he got a phone call and it was goodbye Seattle, hello Hollywood. Starting with a trainee's job in the camera department, he progressed to scene planning and to unit production manager.

On the Move • Ade spent five years with Disney, leaving in November 1941 to go to Screen Gems as production supervisor of animated shorts. In 1943 three of his former associates at Disney formed Industrial Films and got Ade to work with them on their first big job, a pro-Roosevelt film ordered by the CIO for use during the 1944 political campaign. This led to a number of government contracts which put the firm into the defense work class and enabled its principals to leave their other jobs and devote full time to their own company, which was renamed United Productions of America and, eventually, UPA Pictures. Ade left Screen Gems to join the new company as production and cost control manager. He later became partner and co-owner of UPA, but he wanted to run his own shop so, in July 1952 he left UPA and founded Playhouse Pictures.

Today, Playhouse Pictures occupies its own building, but in 1952 Ade had desk space as headquarters and did mostly service jobs, hiring freelance help as needed. His years at Disney, Screen Gems and UPA had given him a wide acquaintance with the animation craftsmen and an intimate knowledge of who was best for a particular job, so Playhouse Pictures' work was good and the demand for it grew.

A Ford in his Future • In 1954, Playhouse Pictures got an order for 10 tv spots from Ford and created a humorous animated series which won national recognition and started the light-selling technique for which the organization has since become noted. "I think Ford series really put us into business," he stated. "Since then Ford has been a regular client and has been a bell-wether in attracting other assignments."

The list of Playhouse Pictures accounts reads like a blue book of American advertisers. Memorable creations include Ford's "Shaggy Dog" (which won a first award at the Cannes Film Festival), Burgermeister's "Little Man" (dubbed the most beloved tv character in the West) and Falstaff's "Old Pro" (whose fans outnumber those of most real life sports stars), to name only three. Last year, Playhouse spots for Kaiser, Olin Mathieson and Ford took all three top commercial animation awards at the Venice Film Festival, resulting in the presentation of the Venice Cup to Playhouse Pictures, first time this award has ever gone to an American producer. "You don't have to sell this kind of business," Ade observed. "Each job we do gets us offers to do others. I'm our only salesman and I haven't made a sales trip in over a year. We get an inquiry from a company or its agency, show them our sample film and discuss the kind of commercials they have in mind and whether they or we will provide the storyboard. My function is to set the price for the package and, if we get the order, to see that it's produced the way they want it and that we get our costs back plus a reasonable profit."

Born in Seattle, Aug. 6, 1909, Ade grew up in that city, graduating from West Seattle High School and spending two years at Wilson Business College. In 1935, he married the former Marguerite Holzheimer. They have two sons, Ted, 21, and Gerry, 17.

Tall, (6' 3") and broad shouldered, Ade Woolery is a big man, but religious adherence to a diet-and-exercise routine keeps his weight to 200 pounds or less. His newest hobby is flying and he holds a private pilot's license. No card player, Ade prefers to do his gambling at the crap tables and several times a year indulges this proclivity at Reno or Las Vegas.

Broadcasting, September 25, 1961
The popular vote

The Kennedy administration, which came to power at least partly through skillful political forecasting, ought not to be particularly pleased by a poll recently conducted in Minnesota.

The poll showed that the policies of FCC Chairman Newton Minow, one of the administration’s most conspicuous members, have been rejected by an overwhelming vote.

As reported elsewhere in this issue, a respected St. Paul research firm headed by a U. of Minnesota professor surveyed 17,500 persons who attended the Minnesota state fair.

Asked if they thought television was a vast wasteland, 79% said no, 14% said yes, 7% did not answer.

Asked if they thought the government ought to decide the types of programs to be broadcast, 84% said no, 11% said yes, 5% did not answer.

If Mr. Minow thinks he has a mandate to change television, the mandate comes from a minority too small to figure in any election. Administrations stay in office only by majority vote. If its communications policy is to be of any significance in the public appraisal of its record, the current administration ought to be somewhat concerned about its prospects in 1964.

The Georgia conclave

The democratic process can be highly effective if it isn’t hampered by red tape, protocol or the cramping restrictions of hearing formalities. The recent South East Radio-TV Seminar in Atlanta proved that.

This gathering of 100 broadcasters deeply concerned over the requirements of FCC’s proposed logging rules had started out as a small regional project. Because of the threat to station solvency that was feared by those who had examined the proposed rules, the Georgia Assn. of Broadcasters found its Sept. 15 meeting had aroused national interest.

Industry and government met on cordial terms. Kenneth Cox, the FCC’s Broadcast Bureau chief, listened with interest to the practical applications of the commission’s rules and to the two NAB representatives.

Few broadcasters could recall a more effective meeting with spokesmen for their regulators. They had the satisfaction of over-the-table discussion unhampered by fear of ex parte charges, political influences or bureaucratic bias. It was an excellent preliminary to the Washington conference of the NAB and FCC on the same subject to be held Oct. 6.

Who’s boss?

The fact that the FCC voted finally to break down 13 of the remaining two-dozen clear channels is not in itself too significant. The choice before the commission was not whether any of the channels should be duplicated but whether all of them would be thrown open to secondary operations in “under-served” areas if any actually exist.

The really important action was that, by majority vote, the FCC elected to defy the House Commerce Committee which specifically had requested that it defer final decision until the committee and Congress had the opportunity to consider pending legislation which would prohibit the breakdowns.

This was bold action. It was mitigated somewhat through the device of delaying consideration of applications for duplicated assignments so that no breakdowns possibly could occur until well after the next session of Congress convenes in January.

What does this action portend? Does it mean that in the controversial areas of television, involving deintermixture and sub-standard drop-ins, that the FCC will ignore congressional opinion? We doubt this. And we doubt whether Congress would condone it. President Kennedy’s Reorganization Plan No. 2, involving the FCC, was overwhelmingly defeated in the House because it would place too much power in the hands of the FCC chairman and because Congress is jealous of its prerogatives in relation to the independent agencies vis a vis the executive branch.

Congress has always resisted executive interference with the independent agencies. The licensing and legislative functions belong to Congress, its leadership, whether Republican or Democratic, always has contended. Because Congress is busy and does not have the expertise, it has created such agencies as the ICC, FCC, FTC and FAA to perform specialized work. And it won’t easily retreat from that position.

As to the merits of the clear channel breakdown, we feel the FCC action is untimely, but for the unusual reason that it waited too long. It was 16 years ago that the clear channel case was opened. Conditions have changed. There is no shortage of am stations anywhere except possibly in isolated areas where it would be economic suicide to build new Class II, 10 kw stations. And these, in most instances, are the very areas where the only service now available is from the clear channels.

It will be a long time before there is a showdown. We have the hunch that certain FCC members voted for the partial break-down with the hope that Congress would take over and decide the issue before any real damage is done.

An expert on the subject

Next time David Susskind begins shooting off his mouth about how lousy television is, he can be silenced by a perfect squelch—a re-run of his Open End program of Sept. 10.

That was the program on which he, Jackie Gleason, Toots Shor, Joe E. Lewis, Ernie Kovacs, Marya Mannes, Lenore Lemmon and Richard Gehman spent two bibulous hours discussing Frank Sinatra and the Rat Pack. Viewers reported later it was like walking sober into a cocktail party that had been going on since the day before.

All the participants are interesting personalities in their own right. The trouble was that they were misused. And the management of the program must be charged to Mr. Susskind.

Come to think of it, Mr. Susskind is right. Television can be lousy at times.
"Thanks A Lot, Old Rebel"... Some are too excited to say it. "Thanks" is there, though, in the glowing eyes of thousands of kids every year when they get that treasured autograph and that "Hello there, Joey," from their favorite friends, the Old Rebel and Pecos Pete of WFMY-TV ("Troubles" sometimes licks a hand or two for her public). When these three come to town, in this area of 466,640 TV homes, everyone, Gram'pa on down, turns out for festivity, foolishness and fun. In High Point, Haw River, Topnot—throughout the nation's 44th TV market—they're local institutions: "Why it wouldn't be a parade without the Old Rebel and Pecos Pete." Part of their ability to delight audiences comes from their deep and genuine affection for children—and the feeling is mutual!
